If we break down that rule, then what rule can we establish and where is the line of demarcation? Suppose we break down the rule as to the inherent nature of the goods, their unwholesome nature, and then suppose that Henry Ford is manufacturing cars in Detroit in an open shop, and the question is raised as to whether States which do not desire to have goods from an open shop distributed within their borders may enact laws controlling that proposition. May Congress say that Mr. Ford's cars are subject to the operation of the laws of that State or to the exclusion of the State if it sees fit?

I know of no rule that we can follow except the rule which has been laid down, and that is that the goods themselves must be of such nature as to be dangerous to society or unwholesome for society. Of course, no one will contend that, because the goods are made by prison labor, the goods themselves become in any way affected or tainted or injurious to society. No one can successfully contend that they come under the rule set forth in the Rahrer case, as it is called, because that is placed upon an entirely different principle.

One of the reasons, and the prime reason, for the organization of the Federal Union was to bring harmony out of the chaos which prevailed with reference to commerce between the States. The very object and purpose of the first meeting of the fathers was to see if they could so arrange matters that goods could be shipped from Pennsylvania into New Jersey, we will say, although New Jersey might object to the shipping. It was demoralization in commerce and in the business world which first brought them together. When they finally organized the Government and put their views into the Constitution, in order that the original idea might prevail they placed interstate commerce under the control of the Federal Government.

If my State is manufacturing goods, it has a right to enjoy the commerce of the entire Union. It enjoys the commerce of the entire Union because the Constitution places the control of it under the Federal Government. The State of Michigan may not discriminate and prohibit the goods of Idaho from coming into that State, and it may not, after they reach that State, embarrass their sale or distribution so as to make commerce ineffective. The reason why it may not do so is because that power which originally belonged to the State was taken away from the State and lodged in the National Government.

I ask the friends of the bill in all sincerity, if the rule which was laid down with reference to goods being defective is not the rule and we are to depart from it, then what is to hinder the Congress of the United States from consenting that any State may take out of interstate commerce anything that it desires to take out? We would place interstate commerce back under the jurisdiction and under the discretion of the States themselves.

If these goods were in transportation from one State to another, no one could tell by looking at the goods or by examining the goods or by using the goods whether they were made by convict labor or made by free labor. We would have to go some place exterior to the article itself and outside of the commodity itself to ascertain whether the defect existed, and when we ascertain the defect, we do not ascertain a defect as to the goods, but as to the individual who made them. We may just as well say that some manufacturer who is running an open shop should not have the benefit of interstate commerce under the protection of the Constitution of the United States.

Mr. FESS. Mr. President——

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Ohio?

Mr. BORAH. I yield.

Mr. FESS. Is there any power to require the labeling of those goods as convict made? Where is that power?

Mr. BORAH. That proposition has been suggested to me within a few brief moments. I am not concluding myself upon this question, because I am speaking without much reflection upon it, but I think the National Congress might pass a bill which would require notice to individuals who were buying as to the goods. That might be possible; I do not know. But we could not, because they were labeled so and so, close to them the channels of interstate trade. They would have the right to pass in the channels of interstate trade. An individual might not see fit to buy them because they were manufactured there, but we could not deny another individual in the same State, who might be willing to purchase them, the right to buy them if he wished to do so. I do not think free labor ought to compete with convict labor, but there is a way to avoid it without doing violence to the Constitution and establishing a precedent the evil consequences of which may be very great.

Mr. FESS. If the Senator will permit me, I understand the status of the situation as explained by him to be that the State of Ohio is impotent to protect itself from goods made by prison labor and shipped into its borders on the ground that the goods are not deleterious, and secondly, that it is incompetent on the part of the Federal Government, through the Congress, to protect the State. What is our protection? Is it credible that we have no protection at all?

Mr. BORAH. The Senator lives in a glorious Union. He lives in a Union which is alike beneficial to every man, woman, and child in it, in whatever part he or she may live. Each individual has a right to enjoy the laws of the Union, a right to the protection of the Union, the benefits of the Union, whether it is in the State of Ohio or whether it is in the State of Idaho. Ohio can not isolate itself and shut itself off from the other

parts of the Union and exempt itself from the operation of the Constitution. That is true. That can not be done. The only way you could get isolation would be to refer back to the days when the fathers were encouraged to form the Constitution. Then the States could have done what the Senator is now trying to do.

Mr. FESS. The Senator will recognize that it leaves us in this position: That we can protect American labor against the competition of cheaper labor from the Old World, but we can not protect American labor from the cheaper prison-made goods produced within our own borders.

Mr. BORAH. What the Senator means to say is that we can not do what we wish to do in the State of Idaho; that is what he is trying to say. He is not dealing alone with Ohio, for when he says that the people of Idaho manufacturing a certain article shall not do business in Ohio, he is not only affecting the interests of his people but he is affecting the interests of the people of Idaho; and that, in my judgment, is what the Constitution of the United States says we can not do.

Mr. FESS. The logic of the Senator from Idaho is that the American people living in one State are wholly helpless to protect themselves either through their own legislature or through the Congress of the United States.

Mr. BORAH. They can protect themselves within the jurisdiction of their own State through their own legislature.

Mr. FESS. That is not our trouble. Our trouble is to protect ourselves from the States that are shipping prison goods into Ohio.

Mr. BORAH. Let me ask another question. I can not see any distinction; if the Senator can see a distinction, I would like to have it. Suppose that union labor in the State of Ohio should come to the conclusion that it did not want open-shop goods in the State of Ohio; and suppose union labor were strong enough and had molded public opinion sufficiently effectively to induce the Legislature of the State of Ohio to enact such a law; would the Senator then contend that the State of Ohio was helpless because it could not shut out goods which were made in an open shop? I am simply using that as an illustration. One of the great problems in the labor world is the open shop; here is a constitutional method by which the open-shop man may be put out of business if the doctrine now being promulgated is sound.

Mr. FESS. I do not concede for a moment that goods made in an open shop are on a parallel with goods made by prison labor.

Mr. BORAH. So far as the goods are concerned; what is the difference in the goods?

Mr. FESS. But we are dealing with transportation.

Mr. BORAH. I know, but the Senator is referring to a commodity in transportation. So far as the goods are concerned, what is the difference in the goods, whether made by a convict or by a man in an open shop?

Mr. FESS. There is no difference more than might be found in goods made by different institutions.

Mr. BORAH. Yes. Does the Senator think there is any difference between open-shop goods and convict-made goods?

Mr. FESS. So far as the goods are concerned. I do not mean the difference is in the goods; I mean the difference is in the effect that such commerce has upon free labor.

Mr. BORAH. Union labor takes the position that open-shop goods are quite as destructive.

Mr. FESS. I do not think that.

Mr. BORAH. I know the Senator does not, but union labor, so some union leaders contend, take the position that the open-shop goods are quite as destructive to fair wages and to the benefits which labor should have from its work as are prison-made goods.

Mr. FESS. I think not all union labor certainly thinks that.

Mr. BORAH. Well, suppose they should. I will ask the Senator to what extent are prison-made goods circulated in interstate commerce as compared with open-shop goods?

Mr. FESS. To a very small percentage.

Mr. BORAH. Yes; the percentage is very small.

Mr. FESS. But that does not change the principle.

Mr. WALSH of Montana. Mr. President——

Mr. BORAH. I yield to the Senator from Montana.

Mr. WALSH of Montana. Mr. President, I feel compelled to say a few words in justification of my vote in favor of this proposed legislation and of my conviction that it is entirely consistent with the Constitution.

There can be no doubt at all that before the Union was effected each of the 13 separate colonies had a perfect and absolute right to exclude all goods produced in any other colony. They, however, entered into the compact of the Union; and the right to exclude goods from another State must reside either in the various States where it was or it must have been conferred, in whole or in part, upon the Government of the United States. I think nobody can controvert that statement. It is not possible that that part of the power which existed in its plenitude in the colonies has gone out into thin air—has been dissipated in the ether. It resides solely within the States or it resides within the Government of the United States itself. It does not reside in the States. Everybody agrees that no State can legislate excluding goods of another State. It has been so determined repeatedly, and that not only with respect to goods entirely wholesome but with respect to goods that are regarded by the State as deleterious to the health and welfare of its people; at least such goods can not be excluded when they come in in the original package. So the power must reside somewhere; and if it resides anywhere it must reside in the Congress of the United States by virtue of the power given to it to regulate commerce between the various States. Therefore the entire power which prior to the adoption of the Constitution of the United States resided in the States now resides either in the States or in the Federal Government. Unquestionably it resides in the Federal Government. Then, it seems to me, the Federal Government may exclude from interstate commerce, passing from one State to another, such goods as it may see fit to exclude; and in this instance it does not exercise the plenitude of its power, but simply provides that prison-made goods shall not pass in interstate commerce practically into any State that forbids the passage of such goods into the State. So that the answer to the question addressed to the Senator from Idaho [Mr. BORAH] by the Senator from Ohio [Mr. FESS] is this: That his State can not exclude them, and so he must come to the Congress of the United States in order to exclude them; and that is what is being done here. The people of the States must have some place to go, either to their own legislatures or to the Congress, unless, indeed, there is some provision of the Constitution of the United States which prohibits the Congress from passing legislation of that kind; and if there is I do not know anything about it.

Mr. GOFF. Mr. President——

Mr. WALSH of Montana. I yield to the Senator from West Virginia.

Mr. GOFF. I should like to ask the Senator to differentiate the child-labor decision from the conclusion which he has reached.

Mr. WALSH of Montana. The Senator's question is indeed pertinent. I was just going to speak about that and to say that this line of argument, I recognize, is not in all respects consistent with the decision in the child-labor case. The argument which I have advanced—and I have studied the briefs upon both sides of that case—apparently never was presented to the Supreme Court of the United States at all on either side and is not touched upon at all in the opinion of the Supreme Court in that case. But, regardless of that, the very well-considered opinion of a very eminent constitutional lawyer, Mr. Richberg, will be found in the RECORD—it was put in the RECORD the other day—in which he canvasses that particular question and shows that the Supreme Court must go further than they did in the child-labor case in order to condemn this legislation. I fully agree with the argument there made. In other words, it is forbidden by the law of the State of Ohio that goods of this character shall be sold in the State at all or sent into the State for use and consumption in the State, so far as the State can do so, and this legislation is simply to help out the State so that its own policy within its own borders shall be made effective.

Mr. BORAH. Mr. President, if the contention of the Senator from Ohio were true, we could have 48 different policies.

Mr. WALSH of Montana. Exactly.

Mr. BORAH. And we would be back where we were when we started in 1787.

Mr. WALSH of Montana. The whole thing depends upon the legislation of Congress, and that is where the Constitution of the United States intended it should be; that in order to prevent the passage of goods from one State to another the determination should not rest in the particular State, but it should rest in the Congress of the United States, and all the States together should say whether they would prevent the passage of particular goods from one State to another.

Mr. GOFF and Mr. GLASS addressed the Chair.

Mr. GOFF. Mr. President, I think I was on my feet first, and I should like to ask the Senator a question.

Mr. WALSH of Montana. I yield first to the Senator from West Virginia.

Mr. GOFF. Does the Senator take into consideration that the Supreme Court, not only in the first but in the second child-labor case, had in mind the defective or inherently vicious

quality of the goods shipped in interstate commerce when it rendered those decisions and differentiated them from the Rahrer case?

Mr. WALSH of Montana. Yes; I had it in mind.

Mr. GOFF. I understood the Senator to state just the contrary a moment ago.

Mr. WALSH of Montana. No; I have it in mind that those decisions were justified upon the ground that there was no inherent unwholesomeness in the particular goods.

Mr. GOFF. Would not the Senator concede, according to his line of argument, that if one State said that no goods made in the night time should be sold within its borders because such sale would be contrary to its exercise of police power, the Congress, in order to recognize that exercise of police power by the State, could pass an act that would interdict the shipment of such goods in interstate commerce?

Mr. WALSH of Montana. I undertake to say that those who framed the Constitution intended to repose the matter in the good sense and in the discretion and the wisdom of the Congress of the United States, and if the Congress of the United States should be so lacking in good sense as to pass any such law, I do not know of any constitutional ground upon which it could be held invalid.

Mr. GOFF. Then, according to the Senator's argument, that means that the Congress of the United States has the power whenever it sees fit, in the exercise of an impartial legislative discretion, to delegate to any State of the Union a power resident in the Constitution of the United States.

Mr. WALSH of Montana. That is a different thing. There is no delegation at all; the Congress of the United States says that in the exercise of its own powers it destroys the inhibition of the Federal Government against the passage of these goods in interstate commerce.

Mr. GOFF. Is the Senator familiar—I assume, of course, he is—with the Knickerbocker Ice case, in which the Supreme Court of the United States held distinctly that Congress can not delegate to any of the States the exercise of the maritime power of the Federal Government.

Mr. WALSH of Montana. I do not regard that any power is delegated to any State in this instance.

Mr. GOFF. The Senator knows that the Supreme Court said in the child-labor case that to uphold the child-labor enactment would be in effect to delegate to the States the interstate-commerce clause of the Constitution.

Mr. WALSH of Montana. That is not the ground upon which they have based their decision.

Mr. GOFF. Oh, no; they based it upon the ground which the Senator from Idaho [Mr. BORAH] has clearly brought out.

Mr. GLASS. Mr. President——

Mr. WALSH of Montana. I now yield to the Senator from Virginia.

Mr. GLASS. I do not know anything about the decisions in any of these cases, but I should like to inquire if the power possessed by Congress to deal with interstate commerce is not derived from that provision of the Constitution which authorizes the Congress to regulate interstate commerce?

Mr. WALSH of Montana. It is.

Mr. GLASS. Does the Senator differentiate regulation from extinction? Does the Senator contend that it is within the power of Congress to prevent all interstate commerce?

Mr. WALSH of Montana. The question as to whether the right to regulate includes the right to prohibit has been the subject of repeated consideration by many of the courts. That argument was made in the Webb-Kenyon case, and it was made in the Rahrer case, that while Congress had the power to regulate the passage of intoxicating liquors from one State to another it had not the power to prohibit the passage; but the Supreme Court held otherwise.

Mr. GLASS. The Senator contends, then, that it is within the power of Congress entirely to prohibit interstate commerce?

Mr. WALSH of Montana. Yes; I should say that under the constitutional grant the Congress of the United States could absolutely say that no goods of any kind shall pass from one State to another.

Mr. GLASS. Then, perhaps, it would be well to amend the Constitution of the United States.

Mr. WALSH of Montana. There is no occasion for amending the Constitution of the United States, because nothing of that kind is at all likely to happen. There are a lot of things that the Congress of the United States could do that would practically destroy our existence; but it does not do them.

Mr. WATERMAN. Mr. President, will the Senator yield?

Mr. WALSH of Montana. Certainly.

Mr. WATERMAN. I should like to ask the Senator one question before he takes his seat. Does the Senator contend that the Congress of the United States, to which is delegated certain express powers, can abdicate any of those powers and turn them over to the States?

Mr. WALSH of Montana. No; I do not.

Mr. WATERMAN. Does the Senator contend that that can be done in interstate-commerce matters?

Mr. WALSH of Montana. No; I do not.

Before we conclude, however, I should like to ask the Senator from West Virginia [Mr. GOFF] a question, seeing that he has been so generous in questions addressed to me.

Mr. GOFF. I am always glad to have the Senator from Montana ask me questions. I always feel as pleased as I am honored.

Mr. WALSH of Montana. I should like to ask the Senator if he agrees with me that prior to the Constitution any State could exclude from its borders the products of any other State?

Mr. GOFF. I do not see that it can; no.

Mr. WALSH of Montana. No, no; if we had not any Constitution at all now, if we had 13 colonies, I want to know from the Senator whether any one of them could exclude from its borders the products of any other State?

Mr. GOFF. Oh, I suppose it could at that time; yes.

Mr. WALSH of Montana. Very well. Now, the 13 colonies get together. What has become of that power?

Mr. GOFF. That power is delegated under the tenth amendment to the Constitution of the United States; and what is not delegated is reserved to the people of the States.

Mr. WALSH of Montana. Was this power reserved to the people of the States, or was it delegated to the Congress?

Mr. GOFF. What was delegated to the Congress of the United States was merely the power to regulate, and also to prohibit interstate commerce in articles of an inherent viciousness, as the Supreme Court has said; otherwise you have the police power.

Mr. WALSH of Montana. The Senator is making his argument, and not answering my question.

Mr. GOFF. If the Senator will come back with another question, and in his other question show wherein I have not answered the first question he propounded, I will take that up.

Mr. WALSH of Montana. We start out with the proposition that each of the 13 colonies has the absolute right to exclude goods from another State.

Mr. GOFF. Exactly.

Mr. WALSH of Montana. Now, comes the Constitution. We have reached the conclusion that the State can not do it; it must let goods come in from another State.

Mr. GOFF. Exactly.

Mr. WALSH of Montana. What has become of the original power?

Mr. GOFF. The original power has been delegated to the Constitution of the United States to regulate commerce between the States not for the benefit of one individual State but for the benefit of the entire Union; and the founders of the Constitution knew, from the confusion that existed prior to its adoption, that the power to interdict commerce between the different States stood in the way of a union of the 13 States.

It was for that reason only that the power to regulate commerce, which the Supreme Court says permits prohibition in the case of inherently vicious things, was delegated to the Constitution of the United States and otherwise reserved to the States.

I do not see how you can have an exercise of the commerce clause of the Federal Constitution with respect to innocent matters, or pursuant to the whims of the different States, unless you invade by delegation the police power reserved to the States or to the people when the original Colonies delegated the regulation of interstate commerce to the Federal Constitution.

Mr. WALSH of Montana. Now, let me follow the argument of the Senator. It is that prior to the Constitution each Colony had the right to exclude from its borders all the products of another State—wholesome products as well as deleterious products. The States now have no power to exclude from their borders products coming from another State, either deleterious or wholesome, and the Congress of the United States has no power to prevent the passage in interstate commerce of any products of another State except the deleterious products. What has become of the original power to exclude from the commerce of the various States wholesome products?

Mr. GOFF. That power, if it exists, is in the States.

Mr. WALSH of Montana. But everybody agrees that the States can not do it.

Mr. GOFF. But the State only has the power not to receive the product after it comes into the State and becomes part of the State's commerce.

Mr. WALSH of Montana. Let us test the Senator. Suppose the State of Ohio passes a law prohibiting the importation into

that State of wheat from any other State. Would that be upheld as constitutional?

Mr. GOFF. No, sir.

Mr. WALSH of Montana. Certainly not. The State has no power to do anything of the kind.

Mr. GOFF. No; the State has no power, because there is nothing inherently vicious in it.

Mr. BORAH. Mr. President, suppose the Congress should undertake to give the State of Ohio that privilege. Could Congress do it?

Mr. WALSH of Montana. No; Congress could not give that power to the State. Congress must pass its own legislation.

Mr. BORAH. Exactly; but suppose the Congress should say with reference to wheat exactly what it is saying with reference to prison-made goods. Would it be constitutional?

Mr. WALSH of Montana. My judgment is that the power rests in the Congress of the United States to exclude from a State the products of any other State; and I can not escape the conclusion that because that power resided in the States before the Constitution was adopted, it still resides with the States—and nobody contends that it does—or it resides with the Congress of the United States, because I can not conceive that that power has gone up into nothingness.

Mr. BORAH. Mr. President, there is no difficulty in my conceiving that a power once existing may have been taken away by constitutional enactment.

Mr. WALSH of Montana. I have no difficulty at all about that.

Mr. BORAH. A power is not a disembodied spirit. We can extinguish it if we want to.

Mr. WALSH of Montana. My contention is, however, that it was given away to the Federal Government.

Mr. BORAH. Now let us consider a practical proposition, one which I submitted here a while ago. Suppose the Congress of the United States should pass a law applying to goods made in an open shop, the same rule that is applied in this bill, and that every State in the Union if it saw fit could pass a law against the sale and transportation and use of goods made in an open shop. Suppose Congress should pass a law, as it is sought to have it do here, approving of that. Would it be constitutional?

Mr. WALSH of Montana. When the Constitution of the United States reposed in the Congress the power to regulate commerce in order to overcome the chaos that existed at that time, when the different States legislated upon that matter and reposed it in the Congress, they rested in the good judgment and discretion of the Congress of the United States with respect to the matter; and we have to take the chances on foolish legislation being enacted by the Congress.

Mr. BORAH. Mr. President, in my judgment, that is precisely what the fathers did not do. They did not leave this matter wholly to the discretion of Congress. They undertook to provide that the regulation of interstate commerce should be done by the National Government—not abandoned or abdicated by the mere passage of a law which would leave each State to determine for itself what goods should come within that State. There is no escape from the conclusion that if we may pass this bill, which has no reference to the character of the goods and has no reference to the fact that they may be unwholesome, then we may apply it to anything that floats in the channels of interstate trade; and we might pass a law which would have so universal an effect as wholly to abdicate the duty which rests upon us under the Constitution of the United States. In other words, we are permitting the States to regulate commerce by assenting to the policies which they wish to pursue.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. BORAH. I yield.

Mr. BARKLEY. Let us assume that no State had any law whatever on this subject, and that Congress were now attempting to say by law that goods of this sort can not pass from one State to another, not because there is a law in that State against their sale and distribution but because Congress in the exercise of its power to regulate commerce, says that this commerce shall not pass over any State line. Would the Senator say that the Congress did not have the power to do that?

Mr. BORAH. I have always felt, Mr. President, that the power to regulate was not the power to destroy; and that raises the exact question which was mentioned by the able Senator from Montana.

Mr. BARKLEY. But if the Congress did have the power to prevent its shipment from one State to another, regardless of any State law on the subject, does the passage of a State law on the subject deprive Congress of the power which it might inherently possess?

Mr. BORAH. Certainly not; but I did not answer the Senator that they had that power. I say it raises the question of whether the power to regulate includes the power to destroy; and I do not think it does include the power to destroy.

Mr. FESS. Mr. President, will the Senator yield there?

Mr. BORAH. I yield.

Mr. FESS. Back in 1809, when Jefferson authorized the embargo acts, that question was raised—that under the power to regulate commerce an embargo, which is a destruction of commerce, could not be laid. Do we not frequently lay an embargo?

Mr. BORAH. There has been a distinction drawn between foreign commerce and interstate commerce. In that instance they were dealing with foreign commerce and in time of threatened war, and the court invoked what they called a sovereign power of the Government aside from the constitutional power. If I may be permitted to say so, I do not assert that the court was correct. I do not think we have any power at all except what is found in the Constitution.

Mr. FESS. The question I raised was stimulated by the Senator's statement that the power to regulate does not extend to the power to destroy. In the case of an embargo it does extend to that power.

Mr. BORAH. Mr. President, we must concede that the very object of the interstate-commerce clause was to give us uniformity of commercial interstate trade. That must be conceded. Every argument and the entire discussion shows that the fathers had in mind the compelling of uniformity throughout the United States with reference to interstate commerce. I undertake to say that if this law is constitutional you have utterly destroyed the uniformity, except as that uniformity might be agreed upon by the States themselves; and that is what the fathers intended should not be. Under this proposed law you will have four or five or six States which are in favor of it; you will have five or six which are against it. In other words, you will have destroyed the very uniformity which it was the object and purpose of the interstate-commerce clause to accomplish.

Mr. FESS. The Senator does not mean by that statement that every State is to be like every other State, and all the commerce in one State is to be just the same as the commerce in other States?

Mr. BORAH. Certainly not necessarily to be like it; but if you are going to have uniformity in interstate commerce, each State can not declare its own policy with reference to interstate commerce.

Mr. FESS. That is the point exactly; and we are not attempting to declare it as a State. We are trying to do it here as a Federal Government, making it by Congress, so that it will be uniform except as modified by the situation in a State that differs from the situation in another State.

Mr. BORAH. We do not do anything here that is effective in the way of excluding these products from interstate commerce. We give the State of Ohio the power to do it.

Mr. FESS. Does the Senator mean that we have here a situation as to which both the States and the Federal Government are hopelessly impotent and they can not meet it? Is there a situation as to which there is no power anywhere to correct it or to give relief? Is that the Senator's position?

Mr. BORAH. Yes; that is just exactly my position—that you can not get relief in this way, by leaving to each State to determine for itself what its policy shall be with reference to these goods.

Mr. FESS. How can we get it?

Mr. BORAH. Suppose the Senator lived in a State that was less devoted to protection than his State is; that it wanted free trade, and it did not want any goods to come within the State that came under the doctrine of protection. Would Congress have the right to say that the State of Ohio might exclude the policy of protection within its borders?

Mr. FESS. I do not think so.

Mr. BORAH. No; I do not, either.

Mr. BARKLEY. Mr. President, if the Senator will yield, that would be in violation of the provision of the Constitution which says that all taxes levied in the United States must be uniform throughout the United States; and protection being under the form of taxation, such an attempt would violate the specific provision. There is, however, no provision of the Constitution that requires commerce to be uniform throughout the United States.

Mr. BORAH. I think there is.

Mr. BARKLEY. Where is it?

Mr. BORAH. I think it is just as implicit in the commeree clause as if it were written in there. Let us take something, then, aside from the protective proposition. I want to ask the Senator from Ohio again, if his State were opposed to goods made in an open shop, does he think that the Congress could give the State of Ohio the power to exclude them?

Mr. FESS. No; I do not, Mr. President. That is an entirely different thing.

Mr. BORAH. It is different because those interested in the Senator's State have not yet made the fight on that.

Mr. FESS. It is not that at all. It is fundamentally different. The one has to do with competition between free labor and prison labor. That certainly is not comparable to goods made in a closed shop in contrast with goods made in an open shop. The principles are not similar at all.

Mr. KING. Mr. President, will the Senator permit me to ask him a question?

Mr. FESS. Yes.

Mr. KING. The Senator says it is not comparable. It seems to me it is only a question of degree. Will the Senator permit me to propound an inquiry? Suppose two States are engaged in the production of sugar beets and the manufacture of sugar therefrom; that in one State Mexican labor is employed for such purpose, but an adjoining State does not employ Mexican labor, or at least employs only an inconsequential amount; that the former State can not compete and is jealous of the latter State's success in the manufacture of sugar and it passes a law prohibiting, in its own State, the production of beet sugar if Mexican labor is employed. Could Congress, yielding to the importunities of the latter State, pass a law interdicting transmission in interstate commerce of sugar produced by Mexican labor, no matter how good it was?

Mr. FESS. Mr. President, the question that is in my mind I think is in the minds of all Senators here. Here is an institution that is making goods, which go on the open market, by prison labor, which has been produced in a sovereign State as not conducive to the welfare not only of the State but of the labor in the State. The State itself is not competent to deal with it. Is it credible that there is not any power in the Federal Government to meet that situation? The Senator is using a hypothetical case. I am using a concrete case. I want to know whether there is no power on earth or in heaven which would enable us to deal with the question of prison-made goods, which the State has pronounced unlawful?

Mr. KING. The Senator did not answer my question. Let me suggest this to him: Does the Senator think that it is credible—I do not remember whether he used the word "creditable" or "credible"——

Mr. FESS. Credible; believable.

Mr. KING. In some of the States engaged in the production of beet sugar there may be Mexican labor, or Spanish labor, or Belgian labor; in the Senator's own State there is some Belgian and Mexican labor, as I recall the testimony before the Inmigration Committee. Is it "credible" that if the State of Ohio, using this class of labor, should come into competition with the State of Nebraska, which is producing sugar and does not employ such labor, or any cheap labor, and Nebraska should pass a law prohibiting the production of sugar in the State of Nebraska where that character of labor is employed, Congress could pass a law prohibiting the transportation in interstate commerce of sugar produced in Ohio by labor of the kind described?

Mr. FESS. There ought to be some power somewhere lodged to meet a situation like that. The Senator mentions Ohio employing Belgian labor. That is the first information of that fact I have; I know nothing of that; but that does not change the illustration. The illustration the Senator gives raises a question and there should be a power somewhere to deal with it. The Senator evidently believes that there is no power anywhere, that the people of the United States are helpless, that they can not make laws to deal with their own welfare.

Mr. KING. Mr. President, the Senator must not put words into my mouth. I expressed no opinion; I am just trying to follow the ratiocinations of the Senator's mind.

Mr. FESS. That is difficult, evidently, for the Senator to do.

Mr. KING. I know it is.

Mr. HAWES. Mr. President, the proponents of this legislation have carefully avoided occupying much time in the Senate, because it is their desire to bring this bill to a vote and a decision, and for the further reason that the friends of the measure did not want to obstruct the consideration of other bills.

Regarding the constitutionality of the bill, may I be permitted to say to the Senate that long hearings were held on the House side and upon the Senate side. Briefs were filed and arguments were made, and the whole question was gone into exhaustively.

We have had some questions propounded here within the last half hour suggesting that if a State did this, would this law cover such an act of the State? In the first place, it could not affect any act unless that act were a constitutional act, and the constitutionality would ultimately find its decision before our highest tribunal.

Believing that if there is an open constitutional question the proper place for a decision in that matter is the Supreme Court of the United States, the proponents of this bill—and I believe they are many more than a majority; in fact, I am quite sure there is two-thirds majority in the Senate—would leave that question to the Supreme Court, and have not gone into it. However, we have submitted in the RECORD briefs as to the constitutionality of this bill.

Mr. President, on the first of January 33 States of the Union will have their legislatures in session. This bill, if it is passed, will be of great interest to those legislatures, and they ought to have notice as quickly as possible that the Congress of the United States has taken cognizance of the subject and have their attention directed to it. For that reason alone there should be no further delay in the consideration of the bill.

I can not resist the temptation, however, to call attention to one enactment, the Lacey Act. The Lacey Act became necessary because the sportsmen of the country desired to protect quail and fur-bearing animals. They could not succeed because the market hunters filled the markets of the States with quail, if you please, from the then territory of Oklahoma, so the Lacey Act was passed, not because of the character of quail but to protect the markets in the States.

It was my pleasure to introduce in the House what was called the black bass bill, to make it possible for the States to protect that wonderful game fish. So we passed a law there—and I think most of the Senators voted for it in this body—prohibiting the interstate shipment of black bass for commercial purposes. Without that law the will of some 31 States in the Union would have been set aside, because the market hunter there again could put the black bass on the market, and they could not be separated from the domestic bass.

This bill does not rest upon the child-labor decisions. What I desire to do now is to appeal to Senators for a vote on this bill to-night.

Mr. SHORTRIDGE. Some of us want to say just a word before it is voted upon, if the Senator will permit.

Mr. HAWES. The bill has been before the Senate since the 22d of February, and those interested in it have remained quiet on both sides of the Chamber. There are many here ready to speak for the bill, but they have refrained from doing so, leaving much—in fact all—of the discussion to the opponents of the bill, with the hope that we might arrive at a decision to-day.

Mr. SHORTRIDGE. Mr. President, I assume that many Senators—perhaps all—have arrived at a conclusion satisfactory to themselves, respectively, as to the constitutionality of this bill, and I do not rise at this late hour with any self-assurance that I can disturb the conclusions they have reached. But this is said to be a deliberative body. Sometimes we exalt ourselves by saying we are the most and greatest deliberative body in the world. However that may be, I request the Senate to deliberate a moment longer and permit me to refer to one or two propositions involved in the legal discussion.

Whilst the learned and thoughtful Senator from West Virginia [Mr. GOFF] was making his argument holding that the proposed law would be unconstitutional, a plain violation of the Constitution, and directly in the face of and offending the clear decisions of the Supreme Court of the United States in the two child-labor decisions, I had the temerity to rise and question him as to the origin of the power of Congress to deal with commerce. He had, it is true, quoted a certain section of the Constitution as the origin or source of that power, but I ventured to invite further attention to the specific words of that section. I call those words to the attention of all Senators again. Section 8 of Article I reads, in part:

> The Congress shall have power * * * to regulate commerce with foreign nations and among the several States and with the Indian tribes.

It is not necessary to make a display of acquaintance with the history of our country. I assume that every Senator is familiar with the conditions existing under the Articles of Confederation, and entirely familiar with the reasons which induced the thirteen Colonies, represented yonder in Philadelphia, to frame this document and to submit it to the people for ratification.

Senators have, however, very properly called attention to the fact that each and every one of those 13 States—for such they were, States, though sometimes called Colonies—had the sovereign power to regulate, to exclude, or prohibit interstate and foreign commerce. That was a condition which brought and might bring about much ill feeling, a condition of things not to

be endured longer than absolutely necessary, a condition of things to be done away with as soon as possible.

Just tribute has been paid to the fathers, the great men who sat in that historic Convention Hall in Philadelphia. They were, indeed, great men, far-seeing men, and they saw and realized the then condition of things in respect of commerce between or among the 13 States. What did they do? They took from each of those States the power over that subject matter. The question I put a while ago seemed to call for definite answer. That question was, What was the extent of that power, the power inherent in the States which was delegated to the Congress? Was it a limited power or was it all comprehensive? The learned Senator from Montana [Mr. WALSH] grasped the purport of my question perhaps not originally suggested by me. He expressed himself very clearly to the effect that the power to deal with this subject matter, namely, commerce between or among the States, was delegated to Congress. I renew the question: What power was delegated? I answer, the power to regulate commerce among the different States. To what body was that power delegated? It was delegated to the Congress, made up of the two Houses.

Is there any limitation upon that delegation of power? Is there any word in the paragraph or section quoted which indicates that the framers of the Constitution, or the people who ratified it, reserved or intended to reserve any of that power in the individual State? I submit that it was an all comprehensive, full delegation of power to regulate this subject matter of commerce and to regulate it in such way or to such extent as Congress in its wisdom might deem wise and for the welfare of the Union.

The answer to my question is found in the express words which I have quoted. It is a power, first, to regulate commerce as between this country, the United States of America, and any or all foreign countries. The Congress has that power, delegated explicitly, not impliedly, not vaguely, not by indirection, not by silence, but affirmatively, specifically delegated. Does any one now question our power to regulate commerce between citizens of the United States and foreign countries?

Mr. KING. Mr. President, will the Senator from California permit an inquiry?

The PRESIDING OFFICER (Mr. STECK in the chair). Does the Senator from California yield to the Senator from Utah?

Mr. SHORTRIDGE. With pleasure.

Mr. KING. Does not the Senator go too far and claim too much for the grant of authority contained in the constitutional provisions to which he just referred? If I interpret the Senator's view correctly, it is that there is unlimited authority upon the part of the Government to interdict all interstate commerce; so that if Congress were so "unwise," using the expression of the Senator from Montana [Mr. WALSH], as to pass a law of the character just indicated, it would have the power. I am speaking now only of power and not of policy. I do not think the power to regulate commerce is quite as broad as the Senator indicates. I can not think that the fathers intended to commit to the Federal Government unlimited authority for Congress to prohibit all interstate commerce and all intercourse between the States.

Mr. GOFF. Mr. President, with the Senator's permission, I want to ask the Senator from Utah a question.

Mr. KING. I am interrupting the Senator from California.

Mr. SHORTRIDGE. I am glad to yield to the Senator from West Virginia.

Mr. GOFF. I have asked the Senator's permission to propound this question to the Senator from Utah. Then, is it not the Senator's conclusion that the fathers did not delegate to the Federal Government the power to confuse and confound the commerce of the United States?

Mr. KING. I shall not attempt to determine just what the words "confuse and confound" mean as expressed by the Senator. I confess that I am impressed by the argument made by the Senator from Montana [Mr. WALSH]. The power did exist in the thirteen colonies to prohibit imports. The Senator from Montana contends that when the Constitution was formed, that powed did not evaporate—to use his expression. It still exists and is found somewhere. Where does it exist? If it has not evaporated, it must exist either in the States or in the Federal Government, or in both. I confess that the decisions of the courts leave considerable confusion and have developed dubiety in my mind as to just exactly what the power of Congress is. But I feel certain that the framers of the Constitution did not intend to give to the Federal Government complete and unrestricted authority to absolutely prohibit intercourse between the States.

Mr. BORAH. Mr. President, may I ask the Senator from Utah a question?

Mr. SHORTRIDGE. I am pleased to yield to the Senator from Idaho.

Mr. KING. Not having the floor in my own right, I do not want to be drawn into this debate.

Mr. BORAH. Before the adoption of the Constitution did not the States have the power to prevent individuals going into a State if they did not want them?

Mr. KING. Yes.

Mr. BORAH. They can not do it now.

Mr. KING. No.

Mr. BORAH. Neither can the Federal Government do it.

Mr. SHORTRIDGE. That is not commerce. The coming or going of men from State to State could scarcely be denominated commerce.

Mr. BORAH. I know it is not; but we are speaking about the power. The power existed once in the States, but it does not exist there now. Neither does it exist in the Federal Government. I presume it has gone into ether.

Mr. KING. I shall permit the Senator to contend with my friend the Senator from Montana [Mr. WALSH] as to the question of ether.

Mr. SHORTRIDGE. Mr. President, what I am endeavoring to make perhaps a little more emphatic is that the States, by and through the Constitution and their act of ratifying it, delegated some power to do some things. They undertook to delegate that power by or through the use of very simple, plain, understandable English words. They said that the Congress, the Nation speaking through the Congress, should have the power to regulate commerce with foreign nations. This morning I called attention to the fact that the tariff act of 1922, by section 307, excludes from the United States foreign convict-manufactured goods. I venture to inquire whether that was a valid law. If Congress had the power or has the power under this section of the Constitution, in and about the regulation of foreign commerce, to exclude foreign convict-made goods, then I follow by inquiring what is the power of Congress in respect of commerce among the States of the Union?

I do not wish to appear dogmatic, but permit me to say that I am somewhat familiar with the child-labor decisions and the others cited; but this is what I now submit: If Congress has the power to exclude foreign goods made by convict labor, it has the same power to deal with convict-made goods as they may pass or seek to pass from State to State. I am not alarmed over the consequences if that power exists, for I will remind my learned friend, the distinguished and honorable Senator from Idaho [Mr. BORAH], that the framers of the Constitution had confidence in the Congresses which were to be brought into being under the instrument they were framing. They had faith. They had confidence. They realized full well that the people were called upon to surrender great powers and to delegate to Congress those great powers which might be abused; but they thought they were escaping from great dangers, curing great evils, and they knowingly made the delegation of their powers over international and interstate commerce and with the Indian tribes. Mr. President, we are inquiring as to the power of Congress. That power may be abused, may be unwisely exercised. But whether it is abused or unwisely exercised or not does not answer the question as to the extent of the power.

Under the child-labor decision, as of then, it seemed necessary to propose an amendment to the Constitution giving to Congress the power which those decisions held it did not possess. But I do not think that the court's attention was called to a situation which now confronts us and, with great deference, I do not think the court's attention was called to the all-comprehensive and unlimited power of Congress to deal with trade or commerce as between this country and foreign nations, or as among the States, or as with the Indian tribes.

Now, I wish to put a question to the Senate which may not be necessary to be answered. Suppose the State of California wished to trade with certain Indian tribes, selling certain kinds of goods under certain terms and conditions. Suppose the State of Idaho desired to trade with certain Indian tribes or suppose any State desired to trade with Indian tribes. Would Congress have the power, or has Congress the power, to enact some general law in respect of trade or commerce with the Indian tribes? Of course, Congress has that power—and, of course, if Congress exercised that power and enacted such a law—that law would be valid, the supreme law of the land, "anything in the Constitution or laws of any State to the contrary notwithstanding."

I do not know whether that question has ever been put, answered or decided, but as for me I answer at once I think that Congress has the power to pass a general law binding upon the citizens of every State in regard to or in respect of trade with the Indian tribes.

Mr. GOFF. Mr. President, will the Senator from California yield to me in order that I may make an answer to that question?

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from West Virginia?

Mr. SHORTRIDGE. Yes.

Mr. GOFF. I think the Senator's question illustrates the inherent defectiveness of the argument of those who are advocating this bill, in this: The Indian tribes are the wards of the United States Government; the Senate and House of Representatives would possess the same power in regulating commerce between the States and the Indian tribes that a guardian would have over a ward, and it would be a very different and a very restrictive power as compared with the regulation of interstate commerce between the States.

Mr. SHORTRIDGE. Now, will the Senator from West Virginia be good enough to answer me this question?

Mr. GOFF. Of course, I will.

Mr. SHORTRIDGE. Where does Congress get the power to regulate commerce with the Indian tribes?

Mr. GOFF. It gets it from the Constitution.

Mr. SHORTRIDGE. Where does it get the power to regulate commerce with foreign nations?

Mr. GOFF. It gets it from the Constitution, of course.

Mr. SHORTRIDGE. Where does it get the power to regulate commerce as between the States?

Mr. GOFF. It gets it from the same place.

Mr. SHORTRIDGE. All right. Is there any limitation set down in the language of the Constitution which differentiates the extent of the power, whether it be in respect to foreign commerce, or commerce among the States, or commerce with Indian tribes? Has a State the power to make a general law in respect of commerce with Indian tribes? I imagine the Senator would answer "no."

Mr. GOFF. Of course, it has not. Does the Senator want me to answer further now?

Mr. SHORTRIDGE. Let me proceed for a moment. No State has the power to enact a law in respect to trade with Indian tribes; no State has the power to enact a law with respect to trade among the States; and no State has the power to enact a law with respect to commerce with foreign nations. Why? Because all that power was delegated to the Congress; and that power is an existing power, which may be wisely or unwisely exercised.

Mr. CARAWAY. Mr. President, may I ask the Senator from California a question?

Mr. SHORTRIDGE. Yes.

Mr. CARAWAY. I should like to be able to agree with the Senator, and I should like to support the bill, but is there not a world of difference between the power to regulate and the power to restrict? They mean absolutely two different things. If we prohibit, there is nothing to regulate. There must be transactions going on if there be regulation. The writers of the Constitution evidently knew the difference between the meaning of "regulate" and "prohibit." I should like for the Senator to explain that. There can be no regulation where there is no commerce. If there is prohibition there is no regulation.

Mr. SHORTRIDGE. Commerce, of course, does not depend upon one article or the dealing in one article.

Mr. CARAWAY. I am aware of that fact, but if Congress may prohibit one article it may prohibit every article. The Senator from California will agree with me as to that?

Mr. SHORTRIDGE. I will.

Mr. CARAWAY. So, therefore, if we shall exercise the right to prohibit, there will be nothing to regulate, and, therefore, the framers of the Constitution did not have in view prohibition when they spoke of regulation because there must be some interchange in order that there may be regulation; and if the power were delegated actually to prohibit, I wonder if it would not have been wiser to use the term "regulate or prohibit"?

Mr. SHORTRIDGE. I thank the Senator for the questions.

Mr. CARAWAY. These questions have bothered me, though they may be perfectly plain to other Senators.

Mr. SHORTRIDGE. They set in motion a long train of thought, but I submit to the learning of the Senate that we are looking now for power to do a particular thing. For the moment I am not discussing whether it is wise to exercise the power or not.

Mr. CARAWAY. I understand that; but, if the Senator will pardon me for just a moment further, if there is no power to prohibit we have to get that power out of the word "regulate," do we not?

Mr. SHORTRIDGE. Yes; I suppose so.

Mr. CARAWAY. It has to be derived from that power?

Mr. SHORTRIDGE. Yes; I think so.

Mr. CARAWAY. I am frank to say that I am not arguing with the Senator; I am merely seeking information. It may be that the power to prohibit may be derived from the power to regulate; the power to prohibit, growing out of the power to regulate. I am merely trying to find out the Senator's view, because if he is correct the power to strike down all commerce exists in the power to regulate, and there could not be a single article passed from one State to another if Congress saw fit to exercise the power to regulate commerce in the way of striking it down.

Mr. SHORTRIDGE. Mr. President, I do not hesitate to express the opinion that when the people framed and ratified this instrument, giving power to Congress to regulate commerce as between us and foreign nations, as among the States, and with Indian tribes, they by that act divested themselves severally of all power in the premises and vested it wholly in the Congress, trusting that the Congress would exercise that power wisely—not do a foolish or suicidal thing.

Mr. CARAWAY. May I suggest further——

Mr. SHORTRIDGE. If the Senator will pardon me, my answer to his question is that I do claim that, under this delegation of power and under the guise of regulating commerce, Congress can prohibit importations from abroad or the sending of certain goods from State to State.

Mr. CARAWAY. The belief then—and I am not contradicting the view of the Senator; I am merely trying to get the Senator's idea—his belief is that the States delegated and intended to delegate to Congress the right actually to prohibit any commerce among the various States. I am not saying the Senator is not right, but——

Mr. SHORTRIDGE. Mr. President——

Mr. CARAWAY. If the Senator will pardon me, I will not interrupt him again—I had thought there was nothing in the Constitution to indicate that the people had no jealousy of the rights Congress might assert or of the influence and control the Federal Government might try to exert. I thought it was exactly the other way; that they undertook to say to Congress, "You can do this thing and nothing else." Unless the power was specifically granted it was by implication reserved. I thought they guarded very jealously the assumption of authority by the Federal Government.

Mr. SHORTRIDGE. Mr. President, I call the attention of the Senator to paragraph 18 of section 8 of Article I of the Constitution which reads:

> The Congress shall have power * * *
>
> To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or any department or officer thereof.

Here is a most comprehensive delegation of power, a power which has many times been exercised—the power "to make all laws which shall be necessary and proper for carrying into execution the foregoing powers." And the courts have repeatedly held that it is within the jurisdiction of Congress to determine what law or laws are "necessary and proper" to carry into effect a delegated power.

Mr. BLEASE. Mr. President, will the Senator permit me to ask him a question?

Mr. SHORTRIDGE. Certainly.

Mr. BLEASE. If the Congress of the United States can constitutionally enact this measure prohibiting prison-made goods from being sold in interstate commerce, what would prevent Congress from enacting a law prohibiting the sale of goods made by foreign labor? For instance, in some sections of the country the immigration laws are violated openly and flagrantly by bringing laborers across the border. Such laborers produce crops which are sent all over this country, and as soon as the crops are made the violation of the immigration law is endeavored to be remedied by sending the foreigners back home. If Congress can enact a law prohibiting the selling of convict-made goods or the shipping of convict-made goods, why can it not enact a law prohibiting the sale of commodities produced and manufactured with the help of foreign labor?

Mr. SHORTRIDGE. We can do so, in my judgment; and the law would be perfectly valid.

Mr. BLEASE. I am very glad to hear the Senator from California make that admission, because it may be very important on a bill now pending on the calendar.

Mr. SHORTRIDGE. My views may not be fully known to the Senator, but I claim that we have exercised that very power in the section quoted in the tariff act of 1922. We have now excluded, prohibited, cut off all commerce with foreign nations of goods made by convict labor, and if we have the power to do that, I submit we have the same or equal power in respect of convict-made goods made in any State, namely, the power

to regulate, if necessary prohibit, commerce with those goods among the States of the Union.

Mr. REED of Missouri. Mr. President, before the Senator takes his seat I should like to ask him a question. By asking the question I do not want to be understood as taking a position on this bill, but I am interested in knowing how the Senator distinguishes between the pending legislation and the child-labor legislation under the decisions of the Supreme Court. I should like to have the Senator's views; I am not prepared to enter into any discussion at all.

Mr. SHORTRIDGE. I have stated briefly that I thought the cases, or the child labor laws and this proposed law, were entirely different. I took the liberty of saying that I was more or less familiar with those two decisions, because, in the light of them, as the Senator may recall, I offered an amendment to the Constitution giving to the States the power which those decisions said the States did not possess. I think in this instance, if this bill should pass and become a law and a case should be carried to the Supreme Court where its constitutionality should be involved, that the case need not turn upon the quality of the goods but upon economic considerations, social considerations, penological considerations, or other considerations than the character of the goods involved in the interstate commerce; indeed, I do not think that is the only ground upon which the case might be decided. I do not think in passing on the constitutionality of this measure we are limited to the consideration of the mere quality of the goods in question. In other words, if this bill is passed and its constitutionality should be drawn in question, a court will not be concerned with its wisdom but will inquire as to the power of Congress; if we have the power to enact the law it is not for a court to say whether that law is wise or foolish.

Mr. REED of Missouri. Mr. President, may I ask the Senator if there were not other considerations than the mere quality of the goods in the child-labor case? I repeat that I do not desire to debate this question at this time; I am not prepared to debate it; but it was claimed in the child-labor case that these laws were passed prohibiting the shipment in interstate commerce of goods made by children because they protected the health of the citizen; that they found their reason in the health, the morals, and the welfare of the children of the land. The case did not turn on the question of whether the goods were as excellent goods as those made elsewhere, or whether the goods were fit to be used; but, as I recall, it turned upon the right and power of the Federal Government to employ the interstate-commerce clause for other reasons than merely regulating commerce, for the purpose of going into a State and regulating the condition of its inhabitants.

That is not a very accurate statement, but I think it expresses the thought. I recall that the opinion states that if this power could be extended as claimed, it could be extended so as very largely to control all the affairs of the people. That, again, is not the language, but that is the thought as I recollect it. I have not read the decision for a long time. Was there not just as much chance to decide that case upon other points than the quality of the goods as there is this case?

Mr. SHORTRIDGE. Yes, Mr. President. Many a good case, many a just cause, has been lost for lack of adequate presentation. In the cases referred to, the Senator will recall that the decision of the court was as by 5 to 4; and, with the utmost respect for that great tribunal, there are many who think that the four dissenting judges laid down the proper rule; but we bow, of course, to the decision of the court in those cases.

Mr. REED of Missouri. And the Senator thinks that that decision might be overruled in another case?

Mr. SHORTRIDGE. I certainly do—but I hasten to add that I do not think it necessary to overrule those decisions in order to uphold this proposed law.

Mr. REED of Missouri. Of course, at the present time it is like some other 5-to-4 decisions; they have brought about some very drastic results in this country.

Mr. GOFF. Mr. President, the Senator will also concede that if there is a minority side to the vote on this bill, it is as right as the minority opinion of the Supreme Court?

Mr. SHORTRIDGE. Yes; minorities are sometimes right.

Finally, Mr. President, I desire to apologize for delaying the vote. I did not intend to trespass at all upon the time of the Senate; but I have not yet heard any answer or attempted answer to certain questions I took the liberty of propounding. Be it so; so far as I am concerned, the Senate may proceed to vote.

Mr. GOFF. Mr. President, it is not my desire to continue this argument any further. I have taken up now too much of the time of the Senate in discussing all of these questions. I answered in the debate earlier in the day the questions propounded by the distinguished Senator from California [Mr. SHORTRIDGE], who has asked them a second time. I shall not reply to them further.

I now move, Mr. President, the immediate consideration of the motion which I made before I commenced the argument in this matter and ask for its disposal.

Mr. SHORTRIDGE. Mr. President, a parliamentary inquiry. What is the motion?

Mr. BLEASE. Mr. President, I suggest the absence of a quorum.

Mr. SHORTRIDGE. I raise the point of order that the motion is out of order.

The PRESIDING OFFICER. The Secretary will call the roll.

Mr. SHORTRIDGE. I take it that the Chair has overruled the point of order?

The PRESIDING OFFICER. The Chair recognized the Senator from South Carolina.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	La Follette	Steck
Barkley	Fletcher	McKellar	Steiwer
Bingham	Frazier	McLean	Stephens
Black	George	McNary	Swanson
Blaine	Gerry	Moses	Thomas, Idaho
Blease	Glass	Neely	Thomas, Okla.
Borah	Glenn	Norris	Trammell
Brookhart	Goff	Nye	Tydings
Broussard	Gould	Oddie	Tyson
Bruce	Hale	Pittman	Vandenberg
Burton	Harris	Reed, Pa.	Wagner
Capper	Harrison	Robinson, Ind.	Walsh, Mass.
Caraway	Hawes	Sackett	Walsh, Mont.
Copeland	Hayden	Schall	Warren
Couzens	Heflin	Sheppard	Waterman
Curtis	Johnson	Shipstead	Watson
Deneen	Jones	Shortridge	Wheeler
Dill	Kendrick	Simmons	
Edge	Keyes	Smith	
Edwards	King	Smoot	

The VICE PRESIDENT. Seventy-seven Senators having answered to their names, a quorum is present.

Mr. GOFF. I now renew the motion which I made just prior to the roll call.

Mr. SACKETT. On that I ask for the yeas and nays.

The VICE PRESIDENT. Will the Senator state his motion?

Mr. GOFF. It is the motion which I understand the clerks have upon the desk, which I made prior to beginning my argument—that this bill be referred to the Committee on the Judiciary with a request that it consider its constitutionality and report to the Senate not later than Monday, January 7, 1929.

The VICE PRESIDENT. The question is on the motion of the Senator from West Virginia. On that motion the yeas and nays are demanded.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. CURTIS (when his name was called). I have a general pair with the senior Senator from Arkansas [Mr. ROBINSON], who is absent; but I am permitted to vote on this question, and I vote "nay."

Mr. GEORGE (when his name was called). Upon this matter I have a pair with the senior Senator from Colorado [Mr. PHIPPS]. In his absence I withhold my vote. If the senior Senator from Colorado were present, he would vote "yea" on this motion, and if I were permitted to vote I would vote "nay."

The roll call was concluded.

Mr. JONES. I desire to announce the following general pairs:

The Senator from Massachusetts [Mr. GILLETT] with the Senator from New Mexico [Mr. BRATTON].

The Senator from Wyoming [Mr. WARREN] with the Senator from North Carolina [Mr. OVERMAN]; and

The Senator from Rhode Island [Mr. METCALF] with the Senator from Delaware [Mr. BAYARD].

I also desire to announce that the junior Senator from Delaware [Mr. HASTINGS] is detained from the Senate on official business.

Mr. SHEPPARD. My colleague [Mr. MAYFIELD] is unavoidably detained. If he were here, he would vote "nay" on this motion, and he would vote "yea" on the final passage of the bill.

The result was announced—yeas 13, nays 62, as follows:

YEAS—13

Bingham	Goff	Reed, Pa.	Waterman
Blease	Keyes	Smith	
Borah	McLean	Smoot	
Bruce	Moses	Thomas, Idaho	

NAYS—62

Ashurst	Brookhart	Caraway	Deneen
Barkley	Broussard	Copeland	Dill
Black	Burton	Couzens	Edge
Blaine	Capper	Curtis	Edwards

Fess	Heflin	Pittman	Thomas, Okla.
Fletcher	Johnson	Robinson, Ind.	Trammell
Frazier	Jones	Sackett	Tydings
Gerry	Kendrick	Schall	Tyson
Glass	King	Sheppard	Vandenberg
Glenn	La Follette	Shipstead	Wagner
Gould	McKellar	Shortridge	Walsh, Mass.
Hale	McNary	Simmons	Walsh, Mont.
Harris	Neely	Steck	Watson
Harrison	Norris	Steiwer	Wheeler
Hawes	Nye	Stephens	
Hayden	Oddie	Swanson	

NOT VOTING—20

Bayard	Greene	Mayfield	Pine
Bratton	Hastings	Metcalf	Ransdell
Dale	Howell	Norbeck	Reed, Mo.
George	Larrazolo	Overman	Robinson, Ark.
Gillett	McMaster	Phipps	Warren

So Mr. GOFF's motion was rejected.

Mr. BINGHAM. Mr. President, I should like to debate the bill, but the hour is late, and there are other matters which are pressing. I understand the Senator from Missouri has an amendment which he is about to offer. I shall therefore only ask unanimous consent that a telegram and a statement from the wardens of many State penitentiaries be printed in the RECORD, to show their opinion of the effect of this legislation.

The VICE PRESIDENT. Is there objection?

There being no objection, the telegram and statement were ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C., *December 12, 1928.*

Senator HIRAM BINGHAM,

Senate Office Building, Washington, D. C.:

The Wardens' Association of America, meeting with the American Prison Congress at Kansas City, Mo., in October, 1928, unanimously adopted the following resolution:

"Resolution

"Whereas idleness in penal institutions is destructive of the physical, mental, moral, and spiritual welfare of their inmates; and

"Whereas productive labor under normal sanitary working conditions in penal institutions is a controlling factor in prison reformation, discipline, and order; and

"Whereas there have been introduced from time to time bills in Congress and in the State legislatures, the effect of which if enacted into law would be to destroy or cripple the marketing of products of penal institutions and farms: Therefore be it

"*Resolved,* That we are opposed to any and all State or Federal legislation that would directly or indirectly interfere with the production, manufacture, sale, or transportation of products of penal institutions; that we believe such legislation is unnecessary, unwise, and unfair to the penal institutions; and be it further

"*Resolved,* That a committee be appointed to keep in touch with all such proposed legislation and to protest to Congress and the State legislatures against its enactment."

We respectfully petition the Senate not to pass the Hawes-Cooper bill, H. R. 7729. We ask that it be referred to a committee and that we be permitted to appear before that committee.

Committee Wardens Association of America: E. J. Fogarty, chairman, superintendent Cook County Jail, Chicago, Ill.; R. M. Youell, superintendent Virginia State Prison, Richmond, Va.; A. H. McCauley, chairman board of directors, South Carolina State Prison, Chester, S. C.; J. J. Sullivan, warden Minnesota State Prison, Stillwater, Minn.; T. P. Hollowell, warden Iowa State Prison, Fort Madison, Iowa; Elmer Greenn, warden Illinois Penitentiary, Joliet, Ill.; Archdeacon B. M. Spurr, chaplain West Virginia State Prison, Moundsville, W. Va.; John J. Hannan, chairman board of control, Madison, Wis.; George Jameson, superintendent South Dakota Penitentiary, Sioux Falls, S. Dak.; H. K. W. Scott, superintendent Connecticut State Prison, Wethersfield, Conn.; J. F. Thames, Mississippi Prison Commission, Jackson, Miss.; John Snook, warden Federal Prison, Atlanta, Ga.; P. J. Dugan, warden New Mexico State Prison, Santa Fe, N. Mex.; Lewis D. White, warden United States Federal Prison, Leavenworth, Kans.; A. F. Miles, superintendent Indiana Reformatory, Pendleton, Ind.; Mrs. Blanche La Du, member Minnesota Board of Control, St. Paul, Minn.; Miss Margaret Elliott, superintendent Women's Prison, Indianapolis, Ind.; Warden Davis, Utah State Prison, Salt Lake City, Utah; F. E. Crawford, warden Colorado State Prison, Canon City, Colo.; Homer K. York, member of board of trustees, Marion, Ind.; Mrs. Wm. Harrison Cade, board of welfare, 2506 Aubert Avenue, Chicago, Ill.; Ralph Howard, superintendent of Indiana State Farm, Putnamville, Ind.; William H. Harrison, director of penal institutions, Jefferson City, Mo.; John J. Burnet, industrial director, Jefferson City, Mo.

A protest against the passage of Hawes-Cooper bill, House bill No. 7729, Senate bill No. 1940

To Members of Congress:

We respectfully petition you not to pass Senate bill No. 1940, introduced by Senator HAWES, of Missouri, nor H. R. No. 7729, introduced by Representative COOPER of Ohio.

In our deliberate judgment these acts are not only unnecessary, unwise, and unconstitutional, but if passed will destroy the penal system built up in a large majority of the States of the Union, after years of experimenting with different systems and after the expenditure of millions of dollars by the various States.

In the Southern States cotton, grain, sugar cane, and livestock are produced on penal farms; in others, turpentine and lumber are produced by convict labor; in others granite and marble are quarried and dressed, and agricultural limestone is quarried and crushed by convict labor; in Missouri and other central States sheep, hogs, and cattle are raised and slaughtered on penal farms and the surplus sold; in Oregon flax raised on farms is processed by convict labor; in many States fruits and vegetables are raised and canned on penal farms and gardens; in the great wheat-growing States of Minnesota, Wisconsin, Kansas, Indiana, Oklahoma, Missouri, and the two Dakotas for a great many years binder twine and farm implements have been manufactured by convict labor and sold to the farmers of those States; in other States scrub brushes, rat traps, rag rugs, and rag carpets are made by the criminal insane; in others work shirts, work clothing, overalls, work shoes, brooms, and mops are made by convict labor; in a few States coal is mined from State-owned coal mines by convict labor.

In some States juvenile offenders, male and female, are committed to houses of correction, schools of reform, orphanages, or convents, and are employed making knit goods, embroidery, baskets, books, and a variety of other wares.

The effect, if not the purpose, of the Hawes-Cooper bill is to utterly destroy the market for all these "goods, wares, and merchandise manufactured, produced, or mined, wholly or in part by convicts or prisoners, or in any penal or reformatory institution."

THE HAWES-COOPER BILL UNNECESSARY

There have been practiced in the United States in the past 130 years six systems of prison labor, namely, the lease system, the contract system, the piece-price system, the public account, the State-use system, and the public works and ways system.

Each system has and has had its advocates and critics, each system has both its advantages and disadvantages. The two systems which encountered the greatest amount of criticism have been the lease system and the contract system. The former in the earlier history of the Republic widely prevailed, but to-day it does not exist in any State; the contract system which was formerly in extensive use has gradually been superseded by other systems and now exists in but few States, as the following table compiled by the United States Bureau of Labor Statistics, Bulletin No. 372, January, 1925, page 17, shows:

Per cent of convicts that were employed at productive labor under different systems in different years as shown by reports of this bureau

System	Year				
	1885	1895	1905	1914	1923
Lease	26	19	9	4	
Contract	40	34	36	26	12
Piece-price	8	14	8	6	7
Public account	[1] 26	[1] 33	21	31	26
State-use			18	22	36
Public works and ways			8	11	19
Total	100	100	100	100	100
Per cent of all convicts that were employed at productive labor	75	72	65	(2)	61

[1] Public account, State use, and public works and ways were inseparably combined.
[2] Not reported.

The individual States can be trusted to correct any defect in their penal systems, as the above table shows, and it is unnecessary for the Federal Government to attempt to coerce the States to adopt a particular system of penal management or labor.

THE HAWES-COOPER BILL UNWISE

All but four States of the Union utilize a combination of several systems of labor to meet their prison problems and have found the practice satisfactory and in entire harmony with the public opinion and legislative policy of the respective States. To illustrate, most States utilize the State-use system in making clothing and shoes for inmates, the public works and ways system to build roads or public buildings, and utilize the surplus inmate labor under the public-account, piece-price, or contract system to manufacture binder twine, produce cotton, of livestock, or clothing, which is sold.

Under this system a great many penal institutions are self-sustaining, and many more are nearly so. Inmates are given a share of their earnings, which in many instances amounts for each inmate to as much as a dollar and a half a day which he may use for the support of his family.

Under this combined system which prevails in more than 40 States, idleness in prison has been reduced to a minimum, inmates have been trained to habits of industry and thrift, prisoners have been rehabilitated and restored to society to live normal lives, and the taxpayers' burden had been lessened.

If the pending bill is passed and the States are compelled to adopt exclusively the State-use system of convict labor, we believe it will produce idleness instead of employment in prisons, chaos instead of order therein, will entirely destroy our markets and prison industrial organization, and will necessitate huge annual appropriations in the respective States, which heretofore have been unnecessary.

THE OSTENSIBLE OBJECTIVE OF THE HAWES-COOPER BILL

The proponents of the bill contend that the product of convict labor should not be sold in competition with outside labor, and that this competition is overcome by having convicts work for the State, or subdivisions thereof, or manufacture articles to be used by the State, its subdivisions, or State institutions. In other words, they seek to compel the adoption of the State-use system of convict labor in every State.

The fallacy of this position is obvious. Do not school desks, chairs, blackboards, public printing and book binding, road signs, and automobile tags made by convict labor compete with outside labor just as truly as binder twine, work shirts, or overalls? The question answers itself.

The Hawes-Cooper bill seeks to divest prison-made goods of their interstate character and to subject them to the law of the State into which such goods may be transported.

Many years ago there were passed, in 10 or 15 States, acts requiring all goods made in penal institutions or produced by convict labor to be labeled "Convict made," before being exposed for sale, and, in addition to this, most of these acts required that a merchant handling convict-made merchandise must first obtain a license from the secretary of state before he be permitted to sell such merchandise; and the cost of the license varied from $100 to $1,000 per year. In addition to this, the merchants handling convict-made goods in some of these States were required to keep a list of the persons to whom such goods were sold, and to file such lists with the secretary of state.

These acts applied to merchandise produced by convicts whether in factory, on farm, in the dairy, or elsewhere. These acts were intended to make the selling of convict-made goods so burdensome and so expensive that no merchant could qualify to handle them.

In several suits brought to test the constitutionality of these acts they were held unconstitutional, as in violation of the commerce clause of the Federal Constitution.

However, these old acts in these 15 or 20 States are still on the statute books and have not been repealed. The manifest purpose of the Hawes-Cooper bill is to revitalize these old acts and to make effective similar acts, the passage of which is to be pressed in several of the States with the same purpose and effect as the earlier statutes; that is, to destroy as far as possible all market for produce or merchandise created by convict labor.

If the Hawes-Cooper bill or any similar legislation is passed and held constitutional, each State might pass as unreasonable and as burdensome legislation affecting the sale of convict-made goods as the whims of any particular State legislature might dictate, with the result that the laws in all 48 States might differ very materially, so that any State producing or trying to sell its merchandise would have to know and comply with the law in 47 other different States.

THE HAWES-COOPER BILL UNCONSTITUTIONAL

Under the Constitution of the United States the power to regulate commerce between the States is lodged exclusively in Congress, and Congress has no power to delegate to the several States the right to regulate commerce among themselves.

The only right the several States have to interfere with or interrupt interstate commerce is in the exercise of the police power reserved to the States when the interstate commerce is immoral or fraudulent in its nature or dangerous to the public health.

The proponents of the Hawes-Cooper bill make no claim, and can not justly do so, that goods made by convicts are injurious to the morals or the health of the States.

The proponents of the Hawes-Cooper bill contend that the pending legislation is a copy of the Wilson Act of August 8, 1890, which divested intoxicating liquors of their interstate character and subjected such shipments to the laws of the State into which they should be shipped. If you will read the Wilson Act, you will see that the pending bill is not a copy of it, but that the Wilson Act expressly provided "All fermented, distilled, or other intoxicating liquors or liquids transported into any State or Territory * * * shall upon arrival in such State or Territory be subject to the operation and effect of the laws of such State or Territory enacted in the exercise of its police powers."

We believe we express practically the unanimous opinion of prison wardens and prison boards in the United States in protesting against the passage of the pending bill or any legislation that interferes with the respective States in handling their domestic prison problems.

There are approximately 100,000 convicts in the United States, and not more than 50,000 of them are engaged in productive labor whose products are sold on the open market. It is estimated that the amount of goods produced by convicts and sold represents not more than one-twentieth of 1 per cent of the products of outside labor; the amount of the competition is infinitesimally small.

We have the feeling that the pending bill was inspired by and its passage urged by a highly organized minority of manufacturers, who have adopted this method of stopping prison-made manufacture in only one or two lines.

We have spent years in the effort to handle the penal problems of our respective States, and we hope that our earnest opposition to this bill will arouse you to the seriousness of the situation which would result from its passage.

Very respectfully,

Louis H. Putnam, director State institutions, Providence, R. I.; R. M. Youell, superintendent Virginia Penitentiary, Richmond, Va.; Henry K. W. Scott, warden State Prison, Wethersfield, Conn.; Jno. B. Chilton, warden Kentucky Penitentiary, Eddyville, Ky.; J. W. Wheeler, warden State Prison, Boise, Idaho; A. H. Harrison, director penal institution, Jefferson City, Mo.; Geo. Ross Pou, superintendent State Prison, Raleigh, N. C.; A. F. Miles, superintendent Indiana Reformatory, Pendleton, Ind.; Joseph E. Robinson, chairman board of charities and correction, Frankfort, Ky.; Thos. P. Hallowell, warden Iowa State Prison, Fort Madison, Iowa; Jno. J. Hannon, president board of control, Madison, Wis.; W. R. Bradford, director South Carolina Penitentiary, Columbia, S. C.; M. F. Conley, commissioner of prisons, Frankfort, Ky.; A. G. Macaulay, director South Carolina Prison, Columbia, S. C.; Oscar Lee, warden, Waupum, Wis.; Jno. L. Moorman, chairman board Indiana Prison, Michigan City, Ind.; T. E. Lukens, board prison administration, Boise, Idaho; Ralph Howard, superintendent Penal Farm, Greencastle, Ind.; Levin J. Chase, secretary board of trustees, New Hampshire; A. M. Scarborough, former president Wardens' Association, Columbia, S. C.; A. L. Deniston, treasurer board of trustees, Michigan City, Ind.; H. M. Beard, superintendent Kentucky Reformatory, Frankfort, Ky.; Jas. N. Pearman, superintendent South Carolina Penitentiary, Columbia, S. C.; J. J. Sullivan, warden, Stillwater, Minn.; J. S. Blitch, warden, Raiford, Fla.; Walter H. Daly, warden, Michigan City, Ind.; A. F. Roach, warden, Rawlings, Wyo.; Jas. A. Lakin, chairman prison committee, Moundsville, W. Va.; J. N. Baumel, warden, Anamosa, Iowa; P. J. Brady, warden, Baltimore, Md.; J. I. Burnett, industrial superintendent, Jefferson City, Mo.; E. T. Westerfelt, board of control, Lincoln, Nebr.

Mr. HAWES. Mr. President, I offer the amendment which I send to the desk. The amendment is offered to conform to a suggestion made by the junior Senator from Wisconsin [Mr. BLAINE].

The VICE PRESIDENT. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 1, line 5, strike out the words "except paroled convicts or prisoners" and insert in lieu thereof the words "except convicts or prisoners on parole or probation."

Mr. BLEASE. Mr. President, I should like to ask for information. Suppose that amendment is adopted and the governor should parole a certain number of prisoners on the condition that they would work a certain number of hours a day at a certain class of work. In my State the supreme court has held that a prisoner on parole is serving his sentence while he is on parole, and that at the expiration of the time for which he was sentenced he then becomes a free man and is released from his parole. For instance, if a man is sentenced, for manslaughter, to 10 years, and serves 5 or 6 years of his sentence, and the governor paroles him during good behavior, if he goes out of the penitentiary and does behave himself and is not sent back to prison for a violation of his parole, at the end of the 10 years he is no longer a paroled prisoner but is a free man.

Suppose the governor of my State were to parole 25 prisoners on the condition that they would work in the State penitentiary chair factory so many hours per day; that is, they would go in there in the morning and work so many hours, and be free to go where they pleased and act as they pleased and do as they pleased, from, say, 4 o'clock in the afternoon until 9 o'clock the next morning.

Mr. HAWES. I will say to the Senator that the laws of his own State would control in this matter, and that this bill would

not take anything from any State law or add anything to it. It would leave the situation to the control of the prison officer of South Carolina.

Mr. BLEASE. Then what would prohibit South Carolina, after she had had furniture manufactured in the penitentiary factory, from sending it into another State?

Mr. HAWES. I do not understand the Senator.

Mr. BLEASE. What would prohibit South Carolina, if she did what I have just suggested, from then sending that furniture into another State for sale?

Mr. HAWES. Nothing in this measure.

Mr. BLEASE. Nothing at all?

Mr. HAWES. No.

Mr. BLEASE. Then what good is the bill?

Mr. HAWES. I have tried to make it clear several times that there is no State in the Union that prohibits the sale of convict-made goods. They provide for different forms of licensing and branding. This would prohibit the product of the penitentiary of the Senator's State from entering a State when it did not comply with the law of that State.

Mr. BLEASE. Mr. President, suppose the goods are made partly by paroled convicts and partly by regular prisoners; what then would be the result?

Mr. HAWES. It would depend on the law of the State, the Senator's own State, or the State to which they were to be sent.

Mr. BLEASE. And this bill would not interfere with it?

Mr. HAWES. Not at all.

Mr. BARKLEY. If they were properly labeled, it would not make any difference how they were made if they complied with the State law?

Mr. HAWES. That is true.

Mr. KING. The expectation is, however, as I understand, that with the passage of this bill the States will pass laws forbidding the sale, within their own borders, of convict-made goods, hoping thereby to prevent the transportation in interstate commerce of any goods made by convicts.

Mr. HAWES. That may happen, but the object of this measure is to permit any State that proposes a reform in its State to be able to enforce that reform.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Missouri.

The amendment was agreed to.

Mr. STEPHENS. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 1, lines 3 and 4, strike out the word "produced" between the words "manufactured" and "or."

Mr. HAWES. I have no objection to that amendment, so far as I am concerned.

Mr. BORAH. I understand there is no objection to that amendment, but I would like to know what the object and purpose of it is. There are certain States which have prison farms. Is this amendment designed to let the products of those through and exclude the products of those which have manufacturing establishments?

Mr. STEPHENS. I will say, Mr. President, that when this amendment was prepared I had in mind the condition in my own State. There we have a State farm, and a large amount of cotton is produced on that farm. It was feared by some of the people in my State that this bill, if enacted into law, might interfere with the conduct of the business of the State penitentiary farm. Therefore I offered the amendment, so that there would be no question about that kind of condition being exempted from the provisions of the bill.

Mr. BORAH. I do not know that I heard the Senator correctly. Do I understand the Senator in charge of the bill to agree that this is designed to keep the bill from operating against prison farms?

Mr. HAWES. That is it. It will be followed by an amendment proposed by the Senator from Washington or the Senator from Mississippi.

Mr. BORAH. Would the Senator accept an amendment striking out the word "manufactured"?

Mr. HAWES. I would not.

Mr. GOFF. Mr. President, as I understand, the legal effect of the amendment will be that if all of the farm labor of the Northwest is made up of convict labor there will be no interdiction on the shipping of products of the farm in interstate commerce.

Mr. BORAH. Mr. President, I want the RECORD to show, if I am correct in my statement, that the bill itself discriminates between different kinds of prison-made goods. It does not operate as to prison goods or products produced upon a farm, although they may be produced by prison labor. It applies, however, to goods which may be produced by prisoners if in a manufacturing establishment. It is an arbitrary discrimination within the line of prison-made goods. We see already the injustice, the geographical and the class features of the old Confederate days.

Mr. HAWES. Mr. President, there is no single State in the Union that prohibits the sale of agricultural products produced by convicts and no such inhibition is contemplated, so far as I know, by any State. The bill relates to manufactures exclusively and solely, and the suggestion of the Senator from Mississippi is to clarify the situation. I am perfectly willing to meet it on constitutional lines later in the Supreme Court.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. HAWES. I yield.

Mr. BARKLEY. In view of the fact that the provisions of the bill pending, containing the word "produced," seem to give the only hope of any farm relief that we may expect at this session, does not the Senator think that the word ought to remain in the bill?

Mr. BORAH. I do not think that it does give farm relief. I think it is a direct discrimination against the farmer.

Mr. BARKLEY. It is permitting prison farmers to come in competition with free farmers throughout the country.

Mr. BORAH. On the contrary, it is going to require the free farmer to come in direct competition with the prison farmer.

Mr. BARKLEY. It brings about more competition among legitimate farmers and I think the word ought to be left in the bill as it is, because I would be in favor of any measure of farm relief that the Senate might pass.

Mr. BORAH. But the effect of the amendment is to bring the free farmer in competition with the prison farmer.

Mr. BARKLEY. Oh, no; it is to bring the prison farmer into competition with the free farmer. [Laughter.]

The VICE PRESIDENT. The question is upon agreeing to the amendment submitted by the Senator from Mississippi.

The amendment was rejected.

The VICE PRESIDENT. The bill is still in Committee of the Whole and open to amendment.

Mr. HAWES. I submit the following amendment, which I send to the desk. I submit it at the request of the Attorney General of the United States, who asked for the change.

The VICE PRESIDENT. The amendment will be stated.

The LEGISLATIVE CLERK. On page 1, line 6, after the word "institutions" and before the word "transported," insert the following:

Except commodities manufactured in Federal penal and correctional institutions for use by the Federal Government.

Mr. KING. Mr. President, may I ask the Senator from Missouri whether the bill now before us seeks to prohibit the Federal Government from disposing in the usual way, through sale in the States and in commerce, of the products of an institution, correctional or otherwise, controlled by the United States?

Mr. HAWES. I will say to the Senator that none of the products of the prisons of the United States are sold upon the open market, but the Attorney General thought that possibly the provisions of the bill might interfere with the present custom of the Federal Government in producing these goods and using them for governmental purposes. In other words, the amendment proposed is a clarifying statement. I will say to the Senator that all the larger penitentiaries of the United States confine the work of convicts to what is called the State-use system, and the Federal penitentiaries do that at the present time.

Mr. KING. Then if the Federal Government, because of having, in one or all of its penitentiaries or corrective institutions, a surplus of products over those which the Government requires, desires to sell that surplus in interstate commerce, would the bill prohibit it?

Mr. HAWES. No; unless they try to sell in the markets of a State whose laws prohibit it.

Mr. KING. That is what I mean. Then any action of a State in prohibiting convict-made goods being sold there would apply to the Federal Government as well as the State?

Mr. HAWES. Exactly.

The VICE PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from Missouri.

The amendment was agreed to.

Mr. HAWES. I now submit the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The LEGISLATIVE CLERK. On page 2, line 6, strike out the word "three" and insert the word "five," so as to make the section read:

SEC. 2. This act shall take effect five years after the date of its approval.

The VICE PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from Missouri.

The amendment was agreed to.

Mr. McNARY. Mr. President, I submit the amendment which I now send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The LEGISLATIVE CLERK. On page 2, line 5, after the word "otherwise," insert the following proviso:

Provided, That this act shall not apply to the preparation or processing of farm products so as to make the same suitable for use by the manufacturer in the making of any manufactured article.

Mr. HAWES. So far as I am concerned, there is no objection to the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment. [Putting the question.] The noes seem to have it.

Mr. McNARY. I ask for a division.

Mr. BINGHAM. Mr. President, before the question is put may we have an explanation of the amendment?

Mr. McNARY. Mr. President, I am trying to meet a situation which obtains in some of the Western, Central, and Southern States with respect to the raw material that finally enters, through the process of conversion, into manufactured goods. I might give an illustration which comes to my mind as related to my home State of Oregon, where the prisoners are used in the production of flax. It is sown by prisoners, harvested by prisoners, and ratted by the prisoners, which is one of the processes through which it must go before it becomes suitable for use by the manufacturer. It loosens the fiber so as to make flax readily available for use by the manufacturers. I believe a similar situation probably obtains in the South with respect to cotton.

I only want to protect those penal institutions where there is a small contribution made in the process from production to manufacture, so that the processing in the production will not be included in the idea of the "manufactured goods." I have asked in the amendment a provision covering simply those instances of which I have just given an example, where the prisoners perform only a part of that process which goes from the mere production to the manufactured article. This is asked in order that the provisions of the bill may not apply to those goods which are produced by convict labor, such as the growing and producing of flax, which later is processed in the manner I have mentioned, and eventually goes into manufacture.

That is the situation which I am trying to meet and which I do not believe impinges upon the general purposes of the bill. It is also my belief that in many of the institutions of the country of the character we are now discussing, where there are similar conditions with reference to which we are trying to legislate, there ought to be, in my opinion, such an exemption from the operation of the law if it becomes such.

The VICE PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from Oregon [Mr. McNARY], on which the division has been demanded.

On a division, the amendment was agreed to.

The VICE PRESIDENT. The bill is still in Committee of the Whole and open to amendment. If there are no further amendments to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate.

The VICE PRESIDENT. The question is on concurring in the amendments made as in Committee of the Whole.

Mr. REED of Pennsylvania. Mr. President, I do not intend to take any time in discussion, but merely to state that my vote against the bill is based on a conviction of its unconstitutionality and upon a sincere belief that there is a duty on us to declare by our vote such a conviction, and that that duty rests as heavily upon us as it does upon the Supreme Court. That is the reason why I shall vote against the bill.

Mr. BRUCE. Mr. President, I simply desire to state why I shall vote for the bill now before the Senate. While I do not think that one State of the Nation has a right to impose its ideas upon any other, yet in every other respect I favor the provisions of the bill. The system of prison-made goods tends to establish very fine moral results so far as the character of the prisoners is concerned. It enables a prisoner to provide for his family which he has wronged, and if he has no family it enables him to provide funds to get a start in life when he leaves the prison. The reasons which impel me to vote for the bill are somewhat technical, but to my mind fully persuasive.

Mr. NEELY. Mr. President, an editorial relative to the pending bill appeared in last Monday's Wheeling Register, one of the most ably edited papers of West Virginia, entitled "Prison Reform and Convict Labor." This editorial expresses views on the legislation before the Senate of which I unqualifiedly approve. Therefore I ask unanimous consent to have it read from the desk.

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The legislative clerk read as follows:

[From the Wheeling Register, Monday, December 17, 1928]

PRISON REFORM AND CONVICT LABOR

Within the week action by the Senate is expected upon the House bill passed last session prohibiting prison-made goods to be sold anywhere except in the State produced. Passage of this measure will bar prison goods from interstate commerce and thus destroy the markets for such garments. Only a few Commonwealths, of which West Virginia is one, maintain the sweatshop prison-labor system, the output of which goes into competition with free labor, thus making more difficult the struggle for a living among law-abiding workmen and their families.

For years correction of the prevailing system at Moundsville has been urged, but officials and legislators have been successfully prevailed upon by some means or other to withstay drastic action. Accordingly, West Virginia has remained among the unprogressive Commonwealths that must hang their heads in shame when accused of permitting convict labor to be exploited by grasping outsiders.

But thanks to the Federal Government and the Members of Congress, it begins to look as if convict goods will be ruled out of interstate commerce, and welcome be the day. There is plenty for West Virginia to do with its convicts if only sensible methods are adopted. The taxpayers of the State have just voted $35,000,000 more to complete the good-roads system. The mileage can be covered in a haphazard way, such as has marked most of our highway construction to date, or the building can be done efficiently, conservatively, economically, and lastingly.

There is little use building poorly drained, unmarked, unguarded, narrow-guage roads, to be wrecked by frosts and chewed to pieces by heavy trucks. What the State needs is broad, well-banked, well-drained highways that will bear the strain of increased traffic, and convict labor could be economically employed upon the heavy excavating and grading work. To-day there are more than 2,000 prisoners at Moundsville, packed into an institution that was erected to properly house but 800. The crowding makes for many objectionable conditions. It could not be otherwise.

But take 1,000 men and place them upon the roads beginning with the spring and the situation is immediately relieved and would do away with all cause for another penal institution, as recommended to the budget commission, at a cost of $1,000,000 and the State treasury woefully depleted. Besides road construction the convicts could be usefully employed upon repair work and in wintertime, with proper distribution and working out of self-constructed camps, could keep the highways free of snow and ice.

Mr. WATERMAN. Mr. President, I am so firmly convinced that the pending measure is unconstitutional that I must vote against it, and assume that as a lawyer I ought to take that responsibility.

Mr. SACKETT. Mr. President, I wish to say to the Senate that I made a plea yesterday in behalf of a further delay in the time when this bill shall take effect for the benefit of the States that can ill afford to spend the great amount of money which I know it will be necessary for them to expend in order to put their houses in order to meet its provisions. I suggested to the Senator from Missouri [Mr. HAWES] that it was a real problem, and he has accepted an amendment providing for five years' delay. I am so firmly convinced that free labor should not be put unnecessarily in competition with convict labor that I wish now to support the bill.

Mr. HEFLIN. Mr. President, the amendment just adopted will give the States that are engaged in business which puts convict labor in competition with free labor ample time in which to adjust themselves, to get out of the business in the five years provided for. I am going to vote for this measure, because I do not believe that it is right to force the great army of wage earners in America into competition with prison labor in the United States. I think the principle is wrong. It is not right to have the product of the cheap labor of those who have committed crimes, who are being taken care of by the State government and used in one kind of work or another, put in competition with the product of those who, as law-abiding citizens, are employing their skill and energy in supporting themselves and their families.

Mr. GOFF. Mr. President, I wish to ask the Senator from Alabama this question: Does he consider, when prison-made goods that enter into interstate commerce represent only one-twentieth of 1 per cent of the goods manufactured in the United States, that they really compete with free labor?

Mr. HEFLIN. They compete to that extent, Mr. President, and while they may constitute merely a small percentage in the

whole United States they may constitute a very large percentage in some of the States and may present a serious question in some localities.

Mr. GOFF. Of course, the Senator takes into consideration the legal maxim of not taking notice of trifles; that is, de minimis non curat lex.

The VICE PRESIDENT. The question is concurring in the amendments made as in Committee of the Whole.

The amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The VICE PRESIDENT. The question is, Shall the bill pass.

Mr. NEELY. I ask for the yeas and nays, Mr. President.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REED of Pennsylvania (when his name was called). I have a general pair with the Senator from Delaware [Mr. BAYARD], but I am advised that on this question he would vote as I intend to vote. So I am at liberty to vote, and vote "nay." I understand, however, that the Senator from Delaware is otherwise paired.

Mr. WATERMAN (when his name was called). I have a pair with the senior Senator from Arkansas [Mr. ROBINSON], and therefore withhold my vote.

The roll call was concluded.

Mr. BINGHAM. I desire to state that the junior Senator from Rhode Island [Mr. METCALF] is detained at home on account of illness. If present, he would vote "nay."

Mr. GEORGE. I have a pair with the senior Senator from Colorado [Mr. PHIPPS]. If present, he would vote "nay." If I were at liberty to vote, I should vote "yea."

Mr. JONES. I desire to announce the following pairs:

The Senator from Massachusetts [Mr. GILLETT] with the Senator from Mexico [Mr. BRATTON];

The Senator from Rhode Island [Mr. METCALF] with the Senator from Delaware [Mr. BAYARD];

The Senator from Wyoming [Mr. WARREN] with the Senator from North Carolina [Mr. OVERMAN]; and

The Senator from Oklahoma [Mr. PINE] with the Senator from Missouri [Mr. REED].

The result was announced—yeas 65, nays 11, as follows:

YEAS—65

Ashurst	Fess	La Follette	Smoot
Barkley	Fletcher	Larrazolo	Steck
Black	Frazier	McKellar	Stelwer
Blaine	Gerry	McNary	Swanson
Brookhart	Glass	Neely	Thomas, Okla.
Broussard	Glenn	Norris	Trammell
Bruce	Gould	Nye	Tydings
Burton	Hale	Oddie	Tyson
Capper	Harris	Pittman	Vandenberg
Caraway	Harrison	Ransdell	Wagner
Copeland	Hawes	Robinson, Ind.	Walsh, Mass.
Couzens	Hayden	Sackett	Walsh, Mont.
Curtis	Heflin	Schall	Watson
Deneen	Johnson	Sheppard	Wheeler
Dill	Jones	Shipstead	
Edge	Kendrick	Shortridge	
Edwards	King	Simmons	

NAYS—11

Bingham	Goff	Moses	Stephens
Blease	Keyes	Reed, Pa.	Thomas, Idaho
Borah	McLean	Smith	

NOT VOTING—19

Bayard	Greene	Metcalf	Reed, Mo.
Bratton	Hastings	Norbeck	Robinson, Ark.
Dale	Howell	Overman	Warren
George	McMaster	Phipps	Waterman
Gillett	Mayfield	Pine	

So the bill was passed.

CONSTRUCTION OF CRUISERS

Mr. HALE. Mr. President——

The VICE PRESIDENT. The Senator from Maine is recognized.

Mr. HALE. I move that the Senate proceed to the consideration of Calendar No. 1022, being the bill (H. R. 11526) to authorize the construction of certain naval vessels, and for other purposes.

Mr. KING. Mr. President, I move as a substitute for the motion just submitted by the Senator from Maine that the Senate proceed to the consideration, as in open executive session, of the so-called multilateral treaty.

Mr. SWANSON. I make the point of order against the motion of the Senator from Utah. There can be no substitute offered for the motion of the Senator from Maine. The Senate will either have to vote the motion down or vote it up.

Mr. HALE. Mr. President, I have a motion pending before the Senate.

Mr. NORRIS. Mr. President, I should like to say to the Senator from Maine that he will not be able, I am sure, to get his motion acted on to-day. It is subject to debate. Why does he not let it go over until to-morrow after the morning hour?

Mr. HALE. I do not see how any Senator can object to voting on the question of considering the bill. There may be opposition to the bill, but I do not think there is any objection to taking it up.

Mr. KING. Yes; there is.

Mr. NORRIS. There is objection to taking it up, I will say to the Senator, and, as I understand, it will be impossible for him to get a vote on the motion to-night.

Mr. HALE. I should like to have my motion before the Senate; I do not want to have any other measure made the unfinished business.

Mr. NORRIS. The Senator can make his motion to-morrow. If he insists on a vote on the motion now, it will only result in wasting the remainder of the afternoon, and it is now half past 4.

Mr. HALE. I will be entirely willing to have my motion pending and then have the Senate go into executive session or adjourn, but I want the motion I have made to be before the Senate.

Mr. NORRIS. That will make it necessary for the Senator to renew his motion, and I have no objection to that. It will die the minute we adjourn.

Mr. CURTIS. Mr. President, I move that the Senate proceed to the consideration of executive business.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield to me for a moment?

Mr. CURTIS. Yes.

Mr. REED of Pennsylvania. Mr. President, as I understand the rules of the Senate, if we adjourn without action on the motion made by the Senator from Maine, the motion dies to-night, and then any business under consideration at 2 o'clock to-morrow automatically becomes the unfinished business, and the Senator from Maine will have no opportunity to make his motion.

Mr. CURTIS. The Senator can make his motion in the morning hour or at any other time when he can get recognition.

Mr. NORRIS. It would not do the Senator any good to make the motion to-night, as long as we are not going to vote on it to-night; and I tell the Senator frankly that I do not think it is going to be voted on to-night.

Mr. FLETCHER. The effect of it is to make the bill the unfinished business.

Mr. NORRIS. No; the bill can not be made the unfinished business in that way. The Senator will have to make his motion again to-morrow. As the Senator said, the motion dies when we adjourn.

Mr. SWANSON. Mr. President, it seems to me we can prevent that very easily. We can make a motion to take a recess until to-morrow morning; and if that is done, this motion will be before the Senate when we convene.

EXECUTIVE SESSION

Mr. CURTIS. I insist on my motion that the Senate proceed to the consideration of executive business.

Mr. HALE. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. HALE. Does the point made by the Senator from Pennsylvania [Mr. REED] apply?

The VICE PRESIDENT. The motion dies if an adjournment is taken.

Mr. KING. I call for the question on the motion of the Senator from Kansas.

Mr. NORRIS. I object to debate on the motion of the Senator from Kansas. It is not debatable.

The VICE PRESIDENT. The motion of the Senator from Maine can be renewed at any time to-morrow; but the motion will die if an adjournment is taken without its being acted upon. It will have to be made again to-morrow morning.

Mr. HALE. I give notice, then, that I shall renew the motion to-morrow morning.

Mr. LA FOLLETTE. I make the point of order that the motion of the Senator from Kansas is not debatable.

The VICE PRESIDENT. The point of order is sustained. The question is on the motion of the Senator from Kansas that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 25 minutes spent in executive session the doors were reopened.

DATA ON BOULDER DAM

Mr. ODDIE. Mr. President, on December 11 I made a request that a compilation of data on Boulder Dam be printed as a Senate document. Since then an estimate has come in regarding the cost of printing that compilation, and I ask that the data,

together with the estimate, be referred to the Committee on Printing of the Senate.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

DEATH OF REPRESENTATIVE CHARLES L. FAUST

The VICE PRESIDENT. The Chair lays before the Senate the resolutions from the House of Representatives, which will be read.

The resolutions were read, as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. CHARLES L. FAUST, a Representative from the State of Missouri.

Resolved, That a committee of 19 Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral.

Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect, this House do now adjourn.

Mr. JONES. Mr. President, on behalf of the junior Senator from Missouri [Mr. HAWES], who had to leave to catch a train, I offer the resolutions which I send to the desk and ask for their adoption.

The VICE PRESIDENT. The clerk will read the resolutions.

The resolutions (S. Res. 281) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. CHARLES L. FAUST, late a Representative from the State of Missouri.

Resolved, That a committee of six Senators be appointed by the Vice President to join the committee appointed on the part of the House of Representatives to attend the funeral of the deceased Representative.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

The VICE PRESIDENT appointed as the committee on the part of the Senate, under the second resolution, the Senator from Missouri [Mr. HAWES], the Senator from Ohio [Mr. FESS], the Senator from Oklahoma [Mr. THOMAS], the Senator from Iowa [Mr. BROOKHART], the Senator from Kentucky [Mr. BARKLEY], and the Senator from Michigan [Mr. VANDENBERG].

ADJOURNMENT

Mr. JONES. Mr. President, as a further mark of respect to the memory of the deceased, I move that the Senate do now adjourn.

The motion was unanimously agreed to; and the Senate (at 5 o'clock p. m.) adjourned until to-morrow, Thursday, December 20, 1928, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 19 (legislative day of December 17), 1928

MEMBER UNITED STATES TARIFF COMMISSION

Sherman J. Lowell.

DIRECTOR OF THE MINT

Robert J. Grant.

Donald A. Whoolery, Smithfield.
Bessie Havlichek, Smock.
Mearl W. Smith, Wehrum.

HOUSE OF REPRESENTATIVES

WEDNESDAY, *December 19, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

We are sincerely grateful to Thee, our God and our Father, that it is sublimely true that all things are possible to him that believeth. Increase the power of our faith in Thee—the faith that is the evidence of the unseen and the substance of our hopes for time and for eternity. Failure to trust leads us to be distrusted, and how helpless and weak we become. Let our belief in the final triumph of all things good be so strong in us that it can not be shattered. Thou hast no wonderful secrets for the unbeliever; Thou dost keep and unfold them even to Thy humble children. Lead us with strong wills and soul might to believe that we are part of a great plan and are servants of a great purpose that shall carry with them the rapture of moral victory, spiritual progress, the aspirations and the onward march of our country. Through Christ, our Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate agrees to the amendments of the House of Representatives to the bill (S. 4302) entitled "An act to authorize the Secretary of Commerce to convey the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., as a memorial to commemorate the Battle of Fort Fisher."

The message also announced that the Senate had concurred in the following resolution:

House Concurrent Resolution 45

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn on Saturday, December 22, 1928, they stand adjourned until 12 o'clock meridian, Thursday, January 3, 1929.

PAVING OF DRY VALLEY ROAD, STATE OF GEORGIA

Mr. MORIN. Mr. Speaker, by direction of the Committee on Military Affairs, I ask unanimous consent to take from the Speaker's table the bill (S. 3881) to provide for the paving of the Government road, known as the Dry Valley Road, commencing where said road leaves the La Fayette Road, in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, constituting an approach road to said park, with House amendments, insist on the House amendments and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

Mr. CRAMTON. Mr. Speaker, reserving the right to object, this is a bill that was passed the other day on the unanimous consent calendar after an agreement had been reached, which was accepted by the gentleman from Georgia [Mr. TARVER] who had charge of the bill in the House. Now, there is no use of some of us working on the Consent Calendar bills if they are going back to the Senate and a conference is to be ordered, which means, in nearly every case, that they will be restored to their original terms; and by reason of the fact that I feel an agreement reached on consent day should be an agreement

that would bind at least those in charge of the bill in the House, I am obliged to object to this bill going to conference.

Mr. MORIN. I think the purpose of the conference is that we insist on the House amendments.

Mr. CRAMTON. If I can have assurance that the conferees will insist on the House amendments, then I have no objection.

Mr. TARVER. Mr. Speaker——

Mr. MORIN. Mr. Speaker, I have been informed that is the purpose of asking for the conference and have been requested to do this by the chairman of the subcommittee, Mr. JAMES.

Mr. CRAMTON. The gentleman from Georgia [Mr. TARVER] is on his feet, and I would be interested to hear from him as to what will happen if this goes to conference.

Mr. TARVER. Mr. Speaker, the bill in question is a bill which was introduced in the Senate by the Senator from Georgia, Mr. HARRIS. The agreement which was made by myself the other day was entered into with the gentleman from Michigan [Mr. CRAMTON] in the utmost good faith, and I am in no way responsible for the action of the Senate.

Mr. CRAMTON. I understand that, of course, Mr. Speaker.

Mr. TARVER. Or the action of the Senator in asking that conferees be appointed.

At the time the bill was under consideration I urged the inadvisability of the adoption of the amendment. I believe the bill in its original form is just and fair and should have been enacted, but somewhat under compulsion I was forced to make the agreement with the gentleman from Michigan. I have in no way been active in seeking to bring about a disagreement with the House amendments or a conference. Of course, since it has been determined by the Senate that a conference is advisable, it seems to me that one should be had, and so far as I am concerned in my future vote in the premises I shall be inclined to adopt as my attitude whatever the attitude of the conference committee may be; but, certainly, Senator HARRIS, not being a party to this agreement and being the author of the bill, had the right to move to disagree to the House amendments.

Mr. CRAMTON. The gentleman from Georgia is absolutely correct as to that and with the assurance of the gentleman from Pennsylvania who will probably be the head of the House conference——

Mr. MORIN. No; the gentleman from Michigan [Mr. JAMES] will be the chairman of the conference.

Mr. CRAMTON. If the gentleman assures us the conferees will maintain the House position, I have no objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. JAMES, WAINWRIGHT, and MCSWAIN.

Mr. BANKHEAD. Mr. Speaker, before we leave this question, it looks to me as if the record is left in a rather unfortunate situation if we are going to have a real conference. The gentleman from Michigan [Mr. CRAMTON] has bound the tentative chairman of the House conferees to the proposition of maintaining the House attitude and that practically amounts to no conference.

Mr. CRAMTON. That is the kind of conference I feel the House should have in this case.

Mr. BANKHEAD. If that is the state the record is to be left in, I think it ought to be made perfectly clear. That is all I have to say about it, Mr. Speaker.

Mr. CRAMTON. My understanding of the statement of the gentleman from Pennsylvania [Mr. MORIN], chairman of the Committee on Military Affairs, is an assurance that no report will come back to the House increasing the appropriation as passed by the House.

COMMITTEE RESIGNATIONS

The SPEAKER. The Chair lays before the House the following communication:

DECEMBER 19, 1928.

Hon. NICHOLAS LONGWORTH,
House of Representatives, Washington, D. C.

MY DEAR MR. SPEAKER: I herewith tender my resignation as a member of the Committees on Census; Education; Coinage, Weights, and Measures; and War Claims.

Sincerely yours,

FLORENCE P. KAHN.

The SPEAKER. Without objection, accepted.

There was no objection.

The SPEAKER. Also the following:

DECEMBER 18, 1928.

The SPEAKER,
House of Representatives, Washington, D. C.

MY DEAR MR. SPEAKER: I herewith tender my resignation, to become effective immediately, of my membership upon the following committees of the House of Representatives: Expenditures in the Executive Departments, Mines and Mining, Revision of the Laws, Territories.

Sincerely yours,

J. RUSSELL LEECH.

The SPEAKER. Without objection, accepted.

There was no objection.

The SPEAKER. Also the following:

DECEMBER 18, 1928.

Hon. NICHOLAS LONGWORTH,
Speaker House of Representatives, Washington, D. C.

MY DEAR SIR: I hereby resign from the Committee on Rivers and Harbors.

Respectfully,

WM. M. MORGAN.

The SPEAKER. Without objection, accepted.

There was no objection.

The SPEAKER. Also the following:

DECEMBER 19, 1928.

Hon. NICHOLAS LONGWORTH,
House of Representatives, Washington, D. C.

MY DEAR MR. SPEAKER: I hereby resign as chairman of Elections Committee No. 1.

Because of other changes in committee assignments, I ask that this resignation be effective at once.

Sincerely yours,

DON B. COLTON.

The SPEAKER. Without objection, accepted.

There was no objection.

Also the following:

DECEMBER 15, 1928.

Hon. NICHOLAS LONGWORTH,
House of Representatives, Washington, D. C.

DEAR MR. SPEAKER: Due to the many demands made on me in order to clear up matters affecting my district before I retire on March 4, I find it will be impossible for me to attend to my duties as a member of the Committee on Roads, and therefore tender you my resignation as a member of that committee. I am doing this because, appreciating the importance of the committee, I feel some one should be appointed in my place at the earliest possible moment.

For the past 20 years I have been deeply interested in the improvement of roads and my work on the committee has been very pleasant. I shall never forget the courtesies extended to me by my colleagues who are members of the committee, and especially the chairman.

With best wishes, I am

Yours very sincerely,

W. J. SEARS, M. C.

The resignation was accepted.

Mr. TILSON. Mr. Speaker, I send to the Clerk's desk and ask immediate consideration of the following resolution:

The Clerk read as follows:

House Resolution 270

Resolved, That the following Members be, and they are hereby, elected chairmen and members of the following-named standing committees of the House, to wit:

CARROLL L. BEEDY, of Maine, chairman of the Committee on Elections No. 1.

DON B. COLTON, of Utah, chairman of the Committee on Public Lands.

JAMES WOLFENDEN, of Pennsylvania, Committee on Banking and Currency.

FRANCIS D. CULKIN, of New York, Committee on the Merchant Marine and Fisheries.

W. M. MORGAN, of Ohio, Committee on Foreign Affairs.

FLORENCE P. KAHN, of California, Committee on Military Affairs.

J. RUSSELL LEECH, Pennsylvania, Committee on Naval Affairs.

EARL W. VINCENT, Iowa, Committee on the Post Office and Post Roads.

RICHARD B. WIGGLESWORTH, Massachusetts, Committee on Rivers and Harbors.

ROBERT R. BUTLER, Oregon, Committee on the Public Lands and Committee on Irrigation and Reclamation.

The resolution was agreed to.

APPROPRIATION BILL FOR THE DEPARTMENTS OF STATE, JUSTICE, JUDICIARY, AND THE DEPARTMENTS OF COMMERCE AND LABOR

Mr. SHREVE, from the Committee on Appropriations, by direction of that committee, reported the bill H. R. 15569, making appropriations for the Departments of State and Justice, and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1930, and for other purposes, which was ordered printed and referred to the Whole House on the state of the Union.

Mr. OLIVER of Alabama reserved all points of order.

WILLIAM TYLER PAGE

Mr. TILSON. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. TILSON. Mr. Speaker, it is always a great pleasure to make reference to long and faithful service, in any worth-while fields of endeavor, and when it occurs in connection with an official of this House it is especially gratifying. I rise now to call attention to the fact that 47 years ago to-day, William Tyler Page, the very efficient Clerk of this House, entered upon his duties as an employee of the House of Representatives and has been in continuous service during the entire 47 years. [Applause.] In order that you may not think of our very genial Clerk as having as yet grown old in this honorable service, I mention the fact that he was only 13 years of age when he began his service.

Mr. BLANTON. Will the gentleman yield?

Mr. TILSON. Certainly.

Mr. BLANTON. And it is the fact that our good friend, Hon. William Tyler Page has the high regard, respect, and warm friendship not only of all Members regardless of their political affiliations but also of every person who with him here has served the Government.

Mr. TILSON. The question of party affiliation has nothing whatever to do with the high regard in which the membership of this House hold Tyler Page. [Applause.]

Mr. Speaker, I ask unanimous consent for five minutes to address the House.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

PROSPERITY ADDRESSES AND MESSAGES OF THE PRESIDENT

Mr. TILSON. Mr. Speaker, on Monday last, our good friend, the gentleman from Kentucky [Mr. GILBERT], who, I am sorry to say, is out of the Hall at this moment, made a speech on this floor. With a portion of the gentleman's speech I agree. With some of it I find myself in disagreement. Some of it, I am sorry to say, I can not regard as in full accord with all the facts in the case. I refer for the present to one paragraph of the gentleman's speech only. As he is not present, and, in order to be sure that I do not misrepresent him, I shall read it:

> For eight years I have heard Presidents' messages of prosperity, of dollars and cents, until materialism has become nauseating. Not once has ever been mentioned education, refinement, the arts, the sciences, honesty, morality, patriotism, or Christianity. Think of the President confining an entire address on George Washington to his farms, his slaves, his business ability, and material prosperity!

This paragraph from the gentleman's speech covers a period of eight years and reflects upon two Presidents. Of course, we are all familiar with the messages of these Presidents during the eight years, and we know that in many instances in the messages and other public utterances of both these Presidents references direct and inferential were made in numerous instances to the subjects which the gentleman from Kentucky says have never been mentioned. All that Members have to do to verify what I say is to secure copies of the several messages and other public utterances of these Presidents and read for themselves.

For the present I shall quote from only one public address of our present President, and I refer to it because it is printed in the same issue of the CONGRESSIONAL RECORD that carries the speech of the distinguished gentleman from Kentucky.

On pages 771 and 772 of the RECORD appears the gentleman's speech. Beginning on page 745, there is extended by the distinguished gentleman from Virginia [Mr. BLAND] an address by President Coolidge delivered at the dedication of the Fredericksburg and Spotsylvania County Battle Fields Memorial on Friday, October 19, 1928. I shall read only two extracts from this speech which bear directly on the statement of the gentleman from Kentucky.

Mr. GARNER of Texas. Mr. Speaker, will the gentleman yield?

Mr. TILSON. Yes.

Mr. GARNER of Texas. I do not see the gentleman from Kentucky present at the moment, but my recollection of his statement is that he referred to messages of the President to Congress, and not addresses made on outside occasions, and if my construction of his language is correct, I do not think it is an impeachment of his statement to read from a speech made by the President outside of a message to Congress.

Mr. TILSON. I am not offering these particular excerpts to contradict the gentleman from Kentucky, who is a most estimable, admirable, and truthful gentleman. Every Member of the House is fond of the gentleman from Kentucky and respects him for his fine work in the House, but even a good Member may sometimes get his facts twisted and give a very erroneous impression. I wish at this time to put into the RECORD only two brief extracts from a public utterance of President Coolidge, which give a directly contrary view to that which the gentleman from Kentucky has represented as the presidential attitude toward certain subjects of very great moment.

Mr. BLANTON rose.

Mr. TILSON. I am not willing to yield to the gentleman from Texas until I read the excerpt from an address of President Coolidge which I wish to get in here at this point. In the address of President Coolidge at Fredericksburg, after having referred to material prosperity, giving facts and figures, he goes on to say:

> These figures, which would be cold and uninteresting in themselves, when we realize that they illustrate the life and development of our country, can not fail to have a deep fascination. But those wonderful records would be of little avail if they were not accompanied by evidences of the moral power of the Nation. Education is on the increase. Our charities are lavish and world-wide. Our missionary efforts reach in every direction. Our actions in behalf of limitation of naval armaments have been of great benefit to all mankind.

There is just one more extract that I wish to put into the RECORD from the same speech:

> Such are some of the outlines of the mansion in which dwell the people of the United States. It is "a house not made with hands." Into it have gone the sacrifices and prayers of many generations. While it is by no means complete, it is already the most comfortable habitation which a nation ever enjoyed. Its prevailing atmosphere is marked by progress, peace, and tranquillity. Sectional animosities have disappeared. Industrial conflicts have almost ceased. Her territorial integrity is secure. Her constitutional liberties are protected by the eternal vigilance of her people. Our country is still worthy of those who have made such great sacrifices in its behalf, still determined to improve the opportunities which those sacrifices created, still loyal to the faith of the past, still inspired by the hope of the future.

These two extracts from a very recent speech of the President should be set in juxtaposition to the speech of the gentleman from Kentucky, a considerable part of which might well be characterized as the "Reflections of Gloomy Gus the morning after."

The SPEAKER. The time of the gentleman from Connecticut has expired.

Mr. BLANTON. Mr. Speaker, I ask that the gentleman's time be extended for a quarter of a minute in order that I may ask him a question.

Mr. TILSON. I do not desire any extension of time, Mr. Speaker.

Mr. BLANTON. The gentleman should have quoted from some of the President's messages to the Congress.

FORMER REPRESENTATIVE W. A. CALDERHEAD

Mr. STRONG of Kansas. Mr. Speaker, with sorrow I rise to announce the death of Hon. W. A. Calderhead, who passed from this life on yesterday, December 18, at Enid, Okla.

For 14 years Mr. Calderhead represented in this body the district that I now have the honor to serve, and during all those years he rendered faithful and efficient service to the great benefit of my district the State of Kansas, and our common country. I think perhaps his greatest effort was in the defense and maintenance of the gold standard on which our monetary system is now based, and I know that the old Members of the House will learn of his passing with sorrow.

Mr. Calderhead will be buried at his home in Marysville, in Marshall County, Kans., where I knew him since 1891. He was a clean, honorable, and able man, whom I was always glad to have for a friend.

ADDRESS OF THE SECRETARY OF WAR AT KILL DEVIL HILLS, N. C.

Mr. MAAS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein an address delivered by the Secretary of War at Kitty Hawk, N. C.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. MAAS. Mr. Speaker, under the leave to extend my remarks in the RECORD I include the following address of the Secretary of War at Kill Devil Hills, Kitty Hawk, N. C., December 17, 1928:

> Since time immemorial nations have consecrated battle fields and erected monuments to their distinguished sons. This Nation, dedicated to peace, may well consecrate these sea-swept, sandy shores as a peace-

time battle field, for here mankind won a notable battle; here man conquered air. Here, where they won their first great victory, will be erected a monument to our peace-time pioneers of progress, Wilbur and Orville Wright.

Since their first flight in 1903 aviation has made tremendous progress. The great continent that lies to the west of us is being covered with an invisible network of airways. This mighty ocean has been dwarfed by brave men and women who, in their tiny planes, defied space and sea.

The memorial soon to arise here will forever keep alive the names of these two Americans who gave wings to the world; but an even greater memorial to Wilbur and Orville Wright will be the part to be played by the future expansion of aviation in fostering peace, prosperity, and progress throughout the world.

Even as we to-day lay the cornerstone of this memorial, so aviation of to-day is building the foundation for a great structure—the aviation of to-morrow. From that foundation time can never erase the names of those two brothers who had the courage, the ability, and patience to transform man's dream of flight into the realm of reality—Wilbur and Orville Wright.

ORDER OF BUSINESS

The SPEAKER. Under the special order of the House, the Chair recognizes the gentleman from Texas [Mr. GARNER] for 40 minutes.

Mr. GARNER of Texas. Mr. Speaker and gentlemen of the House, I asked for the indulgence of the House this morning in contemplation of a hearing that we were having the day before yesterday morning before the joint committee of the two Houses, known as the Tax Committee, composed of five members of the Finance Committee and five members of the Ways and Means Committee of the House of Representatives. In addition to that, I thought it not improper to use a few minutes of time to call attention to the condition of the Treasury of the United States as I see it. Along last summer the Chief of the Bureau of the Budget estimated that there would be a deficit of $94,000,000 in this fiscal year. I do not recall the exact date that he made that estimate, but some time during the summer. I know that at the time I was somewhat shocked at the result of the income and outgo of the Treasury, and while I made no effort at that time to ascertain the facts on which it was based, since I have arrived in Washington this fall I have done the best I could to find the cause, if there was a cause, for the revenues not equaling the expenditures.

I am in perfect agreement with the President of the United States when he suggests that it is a reflection upon the administration, and that means the Congress, and that means myself as well as others, for the Budget not to be met, and to have a deficit at the end of a fiscal year. Especially am I concerned about that since I was one of the Members who a year ago insisted on a larger reduction of taxes than the administration suggested. I feel that I was probably more responsible for that than the ordinary Member. Therefore I was very much concerned when I was told by the Chief of the Budget that there was to be a $94,000,000 deficit for the year 1929. Arriving in Washington only two days before the meeting of Congress, I undertook to get what data I could concerning the condition of the Treasury, but before I could accumulate that data the President of the United States addressed his annual message to the Congress of the United States, and to my great surprise and gratification he told the Congress of the United States that, instead of there being a deficit, as the head of the Budget had suggested, that on July 1, 1929, there would be a surplus of $37,000,000. I ceased my efforts to undertake to find out if the head of the Budget was correct and, if so, the basis on which he had made that estimate, because it was satisfactory to me that this Congress had not passed a tax reduction bill that impaired the credit of the United States to the extent of $94,000,000 in a fiscal year.

I was very happy, I will say, to find myself in a position to see that reducing taxes much more than the administration said they should be reduced we still find ourselves with a handsome surplus on the 1st day of July, 1929. But to my great surprise, and I think a surprise to this House and to the country, six days later—in other words, on the 11th day of December—the President of the United States sent to this House a message with an estimate of $75,000,000 increase in expenditures for this fiscal year, creating a deficit of some fifty-odd million dollars. I say, I was astounded at it, and I believe it was a surprise to this House and to the entire country, and I wondered how it was possible for the Treasury to make a mistake over a period of six days of $75,000,000. Now, remember, that the President when he sent his message to the Congress based his estimate on the Treasury figures, could not have done it otherwise.

It is impossible for the President to send to this House a message as to the condition of the Treasury on what the surplus would be without basing his figures on the Treasury report. So on the 4th day of December, 1928, the President of the United States said we would have a surplus of $37,000,000, and on the 11th day of the same month he says, "I made a mistake when I submitted that, saying we would have a surplus of $37,000,000; we are going to have a deficit of $55,000,000." The question comes immediately why this mistake was made. Why was it that in the summer we had $94,000,000 deficit and on the meeting of the Congress we had $37,000,000 surplus, and six days later we had $55,000,000 deficit. There must be some reason, gentlemen. These mistakes can not be made in a hodgepodge way. I am going to give you my deduction of it. I am going to give my reason, nothing but circumstantial evidence, but I will call the attention of the membership of this body who have been here some years, and I have repeatedly charged on the floor of this House, and the facts have borne out every charge, that the Secretary of the Treasury invariably makes his estimates to support the views and legislation he wants to get from this House. When he wanted to defeat the soldiers' bonus he estimates a deficit of around $600,000,000. Ninety days afterwards, when there was an occasion to show there was plenty of money on hand, he estimated a surplus of something like $300,000,000—$900,000,000 in 90 days. Now we have his estimate at the rate of a mistake of ten millions a day, which is at least a reduction of $80,000,000 per day from what it was about five years ago; but in every instance in this House when we have had under consideration tax reduction and tax consideration the Secretary of the Treasury has made his estimate to fit his desires. And his estimates have not panned out. The Secretary of the Treasury was interested in one piece of legislation in this Congress. So far as the RECORD shows, he was particularly interested in one piece of legislation that involved the Treasury. That was the loan to a foreign country of $12,000,000. The Secretary of the Treasury is a shrewd man. He and his advisers understand the psychology of this House. He knew then that unless he could have the President of the United States tell Congress that it had a surplus and we could loan the money to a foreign country in time of peace without a bond issue or levying any additional tax he could not have pased that bill.

He knew that if the President of the United States told the Congress that we are going to have a deficit of fifty-odd million dollars this fiscal year that he could not have induced you to pass the Greek loan bill, because you would not have loaned money to a foreign country out of a busted Treasury, and he knew the country would have condemned you for it; but in order to induce you to pass it, in order to secure the legislation that he wanted, he made a misleading and, the facts show, it seems to me, a deliberately false statement as to what the prospects of your Treasury would be on the 1st day of July, 1929. He said on the 4th day of December, 1928, that we would have a surplus of $37,000,000, and within seven days from that date he included an estimate that he had the President send to this House, an additional estimate, for $75,000,000, creating a deficit of about fifty-odd million dollars. Did the Secretary of the Treasury on the 4th day of December of this year know that there was going to be a deficit? I will undertake to prove that he did. Then if he knew that there was going to be a deficit and he permitted the President to tell the Congress and the country that there was going to be a surplus, what is your conclusion as to the character of information that he gives to his President and to the Congress? Can you depend upon it?

I have tried to point out to you for six or seven years that you could not depend upon the estimates of the Treasury Department if it would have adverse bearing on its proposed legislation. It makes its figures to fit its views on legislation. I say that is not only misleading but it is dishonest.

I think I had better tell the House just in a moment the reason why I am making this talk. When on December 17 we met out in that little committee room in the northeast corner of the Capitol, the joint committee, composed of five Members of the House and five Members of the Senate, I gave notice and said to the gentleman from Oregon [Mr. HAWLEY], "What we do the Congress ought to know about it. I do not believe in these executive sessions." I think when I am to act officially representing the Congress of the United States in committee work I want the House to know of my action, and I do not want any secrecy or closed doors about it. So I asked that a stenographer be present.

A stenographer was on hand when we met on the 17th day of December this year. Then the Treasury officials, when they were in there—there were about a half dozen of them—were asked whether or not there was anything going to be said that might injure the Treasury. I do not know what they meant by

injuring the Treasury—whether it referred to individuals or their reputation or the finances of the Treasury. Anyhow, they came to the conclusion in the discussion that something might be said that would affect taxpayers whose cases are still pending. I think that is a correct statement. I do not see Mr. COLLIER here at the moment, or Mr. HAWLEY. They were there, however, and if I have made a misstatement I hope they will call my attention to it. So we decided not to take down the testimony.

Mr. HAWLEY. Mr. Speaker, will the gentleman yield?

Mr. GARNER of Texas. Certainly.

Mr. HAWLEY. The Treasury officials were asked if they could talk as freely under the law if a stenographer were present as they could to the committee when no stenographer was present. They said that under the law they were not permitted to make public certain matters relating to returns. As the gentleman knows, certain matters must not be made public under the law. For that reason a stenographer was not in attendance.

Mr. GARNER of Texas. I accept the gentleman's statement. But there were others, I know, who said that when certain subjects come up that should not be taken down the custom was to say to the stenographer, "Just lift your pen." But that was not done. So our hearing was held for four hours without a stenographer, and I said I would tell, so far as my memory went, what occurred in that conference. I wanted the House of Representatives to know it.

I repeat, that on the 4th day of December of this year, under his duty to the Congress, the President sent here a message, and he was proud—read that message—he was particularly proud of the fact that he would have no financial disgrace of a deficit. He based that statement upon information received from the Secretary of the Treasury. On that same day—on that identical day, the 4th of December, 1928—the Treasury Department was certifying to this joint committee a refund to the United States Steel Corporation of $15,752,442.55, which had to be paid in addition to what had already been paid. It was one item in the $75,000,000 of additional estimate of expense sent to Congress on the 4th day of December. The President of the United States told the Congress there was $37,000,000 surplus on that same day. On that identical day his Secretary of the Treasury sent papers to this Congress showing an additional $75,000,000 as necessary to run the Government for the fiscal year.

Gentlemen, I do not know what you think about it, but I imagine that if the gentleman from Connecticut [Mr. TILSON] were President of the United States and he had a Secretary of the Treasury that misled him to the extent of $75,000,000, when he had the correct information in his hand at the moment, he would have called him upon the carpet, and I know if I could transpose myself into that position I would call for his resignation on the ground of negligence or misinformation on the part of the man occupying the great position of Secretary of the Treasury.

Now, I want to talk to you for a moment about this settlement, because that is what we were called to pass upon. We had a hearing. Let me tell you the genesis of it. Back in 1924, as I recall, we inserted in the tax bill what is known as the publicity clause, requiring the publicity of income-tax returns. That law continued in effect until the 1926 act; or maybe it was in 1923–24. Anyhow, somewhere within the last seven years we passed a publicity clause. A great many people in this country thought it did not work very well. I am not certain myself that it did. I have had very little experience and observation in the matter, so that I can not act as a witness in the case. But it was complained about, and Congress decided to repeal it, and they substituted for it, in order to satisfy certain gentlemen in another body, what was known as the proper means of securing information from the Treasury, and that was to give the Committee on Ways and Means of the House and the Finance Committee of the Senate and the joint committee the right of securing information from the department. For that purpose we put a clause in there. The original clause was that all refunds should be reported to this joint committee. Well, they said that would mean a lot of work, and a provision was inserted later omitting everything less than $75,000. Everything over that they must report.

The result is that they have sent estimates up here for refunds in excess of $75,000 and made that report to this committee. This committee, you remember, has no power. It can only express its opinion. So these reports have been coming up, and a man by the name of Parker, who used to work in the Treasury, I believe, and who is, as I understand, an expert accountant and said to be a very capable man, and who was with the Couzens committee at the time they made an examination of the Treasury, is one of the principal men Mr. HAWLEY has in his joint committee office. When this report was sent up here Mr. Parker wrote a letter and said, "This thing is of such magnitude that I do not feel like taking the responsibility of passing on it."

He had been passing on all the others, simply letting them go by, making no particular comment one way or the other. But he did not feel like passing on this because it was too big a thing. So. Mr. HAWLEY, agreeing with that, said, "I will call the joint committee to consider it." And he did. On last Monday we met and we had a hearing. I want to give you some of the facts we found. I want to say a word just here about one new man I have come in contact with in the Treasury Department, a man named Bond. I think he is one of the fairest men I have ever come in contact with. I believe he is a very able and efficient man; and there is one thing he will do, gentlemen, he will tell you the truth and I believe he will tell you the whole truth. I am afraid some of them in the Treasury Department do not give you the whole picture. They may tell you the whole truth if you will dig it out of them with an awl and gimlet, but they will not tell you the whole truth unless you force it; but I am inclined to think this man, Bond, is one who will, because he did not try to keep anything back; he gave us the whole facts and let us be responsible for our action upon them.

In 1917 we enacted in this country what is known as the excess-profits tax. Under that law every company was required to make its return for 1917. The United States Steel Corporation—I wish I had a blackboard like we had down in the committee. Being simple children, being Members of the Senate and House and not knowing much about this, we had a big blackboard which the Treasury officials used; and, by the way, that gave us a better insight into it than I believe would otherwise have been obtained. In 1917 the United States Steel Corporation made a report of its excess profits and income taxes. We had both, you remember. We had a 6 per cent income tax and an excess-profits tax, as I recall, running to 80 or 90 per cent. They made a report. They voluntarily reported to the Treasury of the United States that they had a net income, subject to taxation, of $568,964,000. That is what the United States Steel Corporation reported to the Treasury of the United States under oath as their net income subject to the application of the income tax and the excess-profits tax for that year. Well, you would think that if they made that report and no additional laws were passed or anything exempting them from taxation that they would pay those taxes. They made this voluntarily and they made no protest on those taxes. Now, what is meant by a protest? The record shows that not one single suggestion was made by the United States Steel Corporation that they had paid too much in taxes for a period of two years. They paid taxes in 1921 and they did not make any protest until that date.

Mr. HAWLEY. Will the gentleman yield?

Mr. GARNER of Texas. Yes.

Mr. HAWLEY. Was it not stated at the hearing that whenever the taxes were paid, which were paid promptly thereafter, a claim for refund was filed for overpayments, which satisfied the condition of the law?

Mr. GARNER of Texas. All right. In answer to that, there was not a claim filed for refunds until 1923. I will show you what it was, and let me get this letter to do it. I got a letter from them this morning, and I think I am going to want some more time if I am to go into this as fully as I want to go into it. This is a letter received this morning from Mr. Henry Herrick Bond, one of the frankest men I have found in the Treasury Department, and I believe a very efficient man. The first application was made February 23, 1923, for taxes paid in 1917.

Mr. HAWLEY. Will the gentleman yield further?

Mr. GARNER of Texas. Yes.

Mr. HAWLEY. Was not that within the legal period?

Mr. GARNER of Texas. Oh, I do not deny that. I am not trying to plead the statute of limitations. I am just trying to convince you and illustrate that the United States Steel Corporation did not think they had any money coming to them until 1923 and never was allowed a refund until 1925. The most remarkable thing about this situation is that in 1925 the largest refund ever known in the history of this country was made immediately after the election. Now, after permitting the President to misrepresent the situation to the Congress, the Treasury now comes in and asks for $75,000,000 for refunds on claims that have been pending for taxes paid 10 years ago. Is there nothing which indicates that there must be some kind of manipulation about this? Does it strike you that this thing just naturally happens that way? Would it strike an ordinary jury, if you were trying a man for his liberty, that these things just come around that way? Gentlemen, they do not naturally

happen that way. They have already been permitted a refund of $31,000,000 on 1917 taxes. The United States Steel Corporation, which never asked for any refund for five years after paying taxes, has already been allowed $31,000,000 on that particular year, 1917, and this $15,000,000 plus the interest, making $26,000,000, is in addition to the $31,000,000 that they have already gotten into their exchequer and probably paid out in dividends, which have been allowed as a credit on taxes that have been coming along during these years. Here is one company in the United States, large, it is true, that gets a refund. I learned the reason it took so long to arrive at the amount of taxes owed by the company.

I want to tell you gentlemen about it. They said it was on account of the consolidated and affiliated reurn. I want you who struck out that provision in the 1928 act to think of that. The Treasury now admits—and I want somebody to challenge this if it is not so—that the most difficult phase of the excess-profits and income tax of corporations is the consolidated and affiliated return. It has taken 10 years to figure this out for one company.

I want to repeal that. That is one good thing you can do; that is one way you can hasten matters, by repealing the consolidated and affiliated return provision; and you can get honest taxation that way, too. Remember that.

Ah, how they shift. Just let me show you what I got this morning. Listen to this:

DEAR MR. GARNER: I inclose list of claims filed by the United States Steel Corporation for the years 1917–1920, inclusive, which we believe to be complete. You will appreciate that there is considerable duplication in these claims.

I also inclose a statement relative to the pending claims for refunds on excess-profits tax years by all taxpayers, which is as complete as we have been able to prepare in the limited time available.

If you desire further information, kindly advise me.

Gentlemen, I did not get this until about 10 o'clock this morning, and I only had time to glance at it, but I notice they give here a long list of applications for refunds by the United States Steel Corporation and its subsidiaries, and they make this statement:

In addition to the above claims filed by parent company, claims were filed for the year 1917 by the subsidiary corporations as follows.

Look at this list—$5,500,000 for the American Sheet & Tin Plate Co.—and it runs all the way down the list, comprising tens of millions of dollars for refunds filed by the subsidiaries for the year 1917.

Why, of course it took them a long time to figure this out; but the worst part about it, and the thing I want to condemn, is that you do not know what they are doing in the Treasury Department. Nobody in this country knows anything about it. This little information that ekes out now and then is all the information we get.

Gentlemen—you Republicans—if you do not want some official body to break into the Treasury Department and "spill the beans," you had better prepare some way whereby Congress can get information about what is going on in the Treasury Department. Mark my prediction! The American people will not tolerate the continued secrecy, the continued machinations in that department, the continual mutterings that come out of that department.

I have been driven to this conclusion. I hated to believe it; but, sir, I say that every indication shows that the Secretary of the Treasury is administering this law so as to make it so disagreeable to the American people that they will repeal it, because he is not in sympathy with it.

I have heard a good deal in the last three or four months about putting men in charge of the enforcement of the law who are not in sympathy with it. There is a good deal in that statement and I think it is one that appeals to a great many people in this country if we may take the returns of the last general election. If this is true, we know that the present Secretary of the Treasury is not in sympathy with the estate tax or the graduated income tax, and yet you leave in his hands, you turn over to this man the enforcement and the administration of a law that he dislikes, and he makes it so detestable, he makes it so obnoxious, and is making it so obnoxious to the American people, that he and his associates hope to make it so bad that the American people will demand its repeal and go to some other system that he believes is a better system.

Mr. BLACK of Texas. Will the gentleman yield for one question?

Mr. GARNER of Texas. Yes.

Mr. BLACK of Texas. Under the present law Congress requires all expenditures of the Government to be audited by an independent agency—the Comptroller General.

Mr. GARNER of Texas. Yes.

Mr. BLACK of Texas. Would it not be wise that all of these refunds, especially all over a reasonable amount, should be audited by the same independent auditing agency?

Mr. GARNER of Texas. Well, ordinarily, I would say yes, to my friend from Texas, but I will tell you that that is a difficult thing to do. It means duplication of work that would be stupendous and extremely expensive.

I realize that in this identical case it has taken a great deal of labor, and what I want to bring to your attention is the system existing in the Treasury Department that I believe is vicious, bad, and can result in no good to the Treasury.

This is the system. How did they settle this case? They did not settle it by any definite rule. They did not settle it by statute. They settled it by four processes, as admitted by them. They settled it by bargaining with the taxpayer. You have got a bargaining outfit at the Treasury Department, which is admitted to be so. If I am making any mistake I want you gentlemen, members of the joint committee, to call my attention to it.

It was admitted by the Treasury Department in this hearing that they bargained with the taxpayers as to how much they should pay, and they thought that was the better way to settle this matter.

You can understand why there are so many tax attorneys swarming around Washington when the question of what the taxpayer shall pay is not how much he owes, but how much he can get in an agreement with the department instead of how much the law requires.

Gentlemen, I agreed to a provision in the last bill, and I am still debating in my own mind whether I did right or not. When I analyze the Treasury Department and analyze its faults and misleading estimates in order to carry through legislation, its settlements with taxpayers on a bargain counter, I doubt whether I should have agreed to section 606 in the tax law of 1928. Do you know what that does? Oh, it is the greatest power ever given to one man in the way of handling Government finances. The Secretary of the Treasury tomorrow can have a settlement with a taxpayer, and although the taxpayer may owe $10,000,000, he can settle by the taxpayer paying only $1, and under this law the Secretary of the Treasury can sign the agreement and the people of the United States are forever barred from collecting the balance of that money, although we might find they had made a mistake. Why did I agree to that? Why, my friends, because the Treasury Department was breaking down of its own weight, and it was either a question of giving them this relief, as they said, or in the course of time the American people would demand the repeal of this law because they were breaking down of their own weight. Twenty-one thousand cases were pending before the Board of Tax Appeals and 163,000 were pending in the Treasury Department. Something had to be done, and the Secretary of the Treasury and his advisers said, "If you will give us this discretion, we will settle these cases," and I agreed to do it.

I deliberately charge the Secretary of the Treasury with making this law so onerous to certain taxpayers that it will become so disagreeable to the American people that they will repeal the estate tax, the graduated income tax, and adopt some other system of getting revenue to run the Government.

I have heard Republicans say that the way the law was being administered undoubtedly the American people would soon repeal it. I believe this is the best system that we can get to have capital pay its part. I do not want to see it repealed. I do not want to see it so administered that the people will demand its repeal—not on account of the law itself but on account of the maladministration of the law. If it is ever repealed it will not be on account of the demerits of the law but on account of the demerits of those charged with its administration.

Now, gentlemen, the voluntary return by the United States Steel Corporation was that their capital was $1,400,000,000. They made an amended return in 1919 for taxes in 1917, and cut down their capital to $1,173,000,000. Under three years exhaustive audit by the ablest men in the country they found that the invested capital in the concern was $1,096,000,000. They first said that they had a net income of $568,000,000. They finally whittled it down until by the final report it was $479,000,000—almost a mistake in the United States Steel Co. alone in the net income of 1917 of $100,000,000 in one year.

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. BYRNS. Mr. Speaker, I ask unanimous consent that the time of the gentleman from Texas be extended 30 minutes.

Mr. GARNER of Texas. I will say to the gentleman I do not want as much time as that, but I will take 15 minutes.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the time of the gentleman from Texas be extended 15 minutes. Is there objection?

There was no objection.

Mr. GARNER of Texas. Now, gentlemen on the Republican side of the House, you would have thought that after this hearing, this settlement would have been approved—there are six Republicans and four Democrats on the joint committee. What happened? I can not give you all the facts that we got in four hours, but we went into executive session. Did they approve it? That was what they were called for, to approve it or disapprove it. No; they did not approve it. The chairman, good man, innocent, nothing the matter with him, never had an idea or thought of doing anything wrong, but if Andrew Mellon and his crowd said that the horse was 16 hands high, he would say "Well, I never saw one as high as that, but if they declare that he was 16 hands high, why he must be 16 hands high." [Laughter.]

He was willing to approve it, and willing to approve everything they suggested about it; he never refused a single request.

But there was a gentleman there from the city of Pittsburgh, where the Carnegie company is located, a gentleman from Pennsylvania by the name of Reed, who said he could not take the responsibility of approving this thing. [Applause.]

Gentlemen, there must be something the matter with it; there must be something wrong with that settlement if you could not get the United States Steel Co. with its subsidiary in Pittsburgh to be approved by a Senator from that State who has unjustly been charged with being the creature of the Secretary of the Treasury.

Would you not have thought, if he could not approve it, that I ought to have some doubt about approving it? Mr. COLLIER and I sat together and waited for them to move. They first moved its approval, and Mr. REED said, "I can not do it." Then they looked around and said, "This is going to fail," and then it would be putting the fat into the fire, and finally Mr. HAWLEY said, "Mr. GARNER, you make a motion." He wanted me to make a motion to approve it. I said, "No; I have got no motion to make." [Laughter.] So he withdrew the motion to approve it because he could not get enough to have it approved, and he said, "Let us adjourn," and we adjourned. The Republicans of that joint committee declined to approve the settlement made by the Secretary of the Treasury with the United States Steel Corporation by which the total amount that will be refunded to that company under this settlement for that fiscal year, including interest, is more than $65,000,000! Think of it! One company receives a refund on the taxes it paid the Government for one fiscal year to the amount of $65,000,000—returned to it because of a mistake! Gentlemen, it is too stupendous to comprehend. That is not all. Mr. Bond was frank enough when I asked him the question. I said, "How much more, Mr. Bond, will you have to pay the United States Steel Corporation if you make the settlement on that basis?" He said, "If we continue to settle the other cases for 1918, 1919, and 1920 on that basis, it will be about $25,000,000 to $30,000,000," and when I asked him when he was going to pay it, he said if the settlements were made in time that it would be paid in this fiscal year. I shall put in the data for 1918, 1919, and 1920. In effect, his statement means the Treasury is going to make such a deficit this fiscal year so that the Congress will never forget it. You are not only going to settle $15,000,000, but, if settled on that basis, this one company alone will be settled with to the extent of $28,000,000 to $30,000,000 more, and be paid this year.

I make this statement, that the Secretary of the Treasury can, by manipulating the refunds and accelerating the collections, make a difference of $100,000,000 in any fiscal year that he wants to. Could he not have put off the payment of this $75,000,000 a little longer? Why did he not do it? I do not know, but there may be something in the back of his head to the effect that after the 4th of March he might not have a chance. I do not know whether that is it, but I do know this—that he is in great haste to settle these cases that have been pending for 10 years. It would seem to me that he could have let it go over just 90 days more, and let a new administration do some of the refunding in place of the old. It might have been advisable. Or, in order not to disgrace this Republic as the President has suggested, with a deficit, he could have let it go over until July 1, in place of doing it now. He could have done that.

There is now law that compels him to make this approval. He could have carried it over, Mr. LONGWORTH; he could have kept this Congress and this administration from going before the world with a deficit on the 1st day of July. Nobody is responsible for it except the Secretary of the Treasury, and I say that if I were President of the United States and he deliberately fixed it so that I would have to reverse myself in such a way, I would ask for his reasons. I would never permit myself to be treated in such a manner as the Secretary of the Treasury has treated the President of the United States within the last 30 days—telling him on December 4, "Sir, you tell the Congress that you have $37,000,000," and now, on the 11th of December telling him that a mistake has been made of $75,000,000. They made a mistake of $75,000,000 in six days, or about $12,500,000 a day.

Mr. MOORE of Virginia. Mr. Speaker, will the gentleman yield?

Mr. GARNER of Texas. Yes.

Mr. MOORE of Virginia. I don't know whether the gentleman stated it or not, but the vote on the Greek settlement bill was on the 10th, and the House was not aware of the reversal of the Treasury figures until after that vote was taken.

Mr. GARNER of Texas. Yes; that is correct. I do not believe that you are entitled to misrepresent in order to get legislation through or to defeat legislation. I know that we can fix our consciences by withholding information, saying that it is the other fellow's duty to get it, and that we will not give it to him; but that is not as bad as giving misinformation in order to induce you to vote one way or the other.

Now, gentlemen, I do not know what you are going to do. If you were the Secretary of the Treasury, and Congress had created a joint committee to pass on refunds that you had arranged, and that committee after a called session and a hearing of four hours, declined to give you a clean bill of health, declined to say that it would indorse your settlement, would you not have hesitated to continue a settlement of that kind? But they will not do it. Do you know what he is going to say? I know. He is going to say that he will take the responsibility.

Gentlemen, for the last six or seven years he has been the most powerful man in the world. I say that he can take the responsibility because he does not care whether you are coming out with a deficit if he can pass the Greek bill. But you ask, "What is the use?" I do not know that I can answer that question. I do not know even what is the use of making these statements, but I took the floor this morning because there was no stenographic report of that case, and I wanted you to have some conception of what is going on. If you had had a report of it, so that you could read it, you would be able to get your information there. In addition to that, I want to call attention to what seemed to me to be one more estimate from the Treasury Department that was a mistake, and that is the mildest term that I can call it—one more estimate from the Treasury Department that was a mistake—a mistake of $75,000,000 over a period of less than seven days.

Mr. LOZIER. Will the gentleman yield?

Mr. GARNER of Texas. I will.

Mr. LOZIER. I would like to ask the gentleman in the whole history of the American Republic has there ever been a single instance in the administration of Albert Gallatin, Alexander Hamilton, and other great Secretaries of the Treasury where there was such erroneous statements made as to revenues of the Government that have been made in the last few years by the Secretary of the Treasury?

Mr. GARNER of Texas. I am sorry I can not answer the question, because I am not familiar enough with that history. I know this, that the Secretary of the Treasury has given back more money to the big taxpayers than all the other Secretaries of the Treasury since the beginning of this Republic. I can say more than that. He has given back to these special taxpayers since the election of 1924 more money than in the history of this Republic, and it seems a greater proportion after election than any other period—$75,000,000 even six days after the meeting of Congress, a month after election. Do you approve of that settlement?

Mr. GIFFORD. Will the gentleman yield?

Mr. GARNER of Texas. I will.

Mr. GIFFORD. Having talked with the gentleman a little about it, I would like to ask if the committee which was called in to approve this settlement could not decide from the actual merits of the case, did actually decide just like a bargain counter?

Mr. GARNER of Texas. I say the Treasury Department run under the direction of the Secretary of the Treasury as it is now is adopting no definite rule or law to guide it and making bargain settlements, is in a chaotic condition.

You do not want to cheat the United States Steel Corporation, and I do not want to cheat it. I want to treat it just like every other taxpayer of this Nation, although it may be the largest one in this Nation, it is entitled to the same consideration as the man who pays only one dollar.

I say we owe as much duty to the United States Steel Corporation to protect it against paying too much taxes as any man in this House, but, sirs, you can not justify this system of bar-

gaining in the Treasury Department. No man can do it. You will find that if it is continued they will continue to swarm here with multiplied attorneys to bring what influence they can to bear upon a bargain counter. I do not believe it is a good system. [Applause.]

ARMY PROMOTIONS

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by way of an explanation of what is known as the McSwain amendment to the Wainwright bill relating to promotions in the Army.

The SPEAKER. The gentleman from South Carolina asks unanimous consent to extend his remarks in the manner indicated. Is there objection? [After a pause.] The Chair hears none.

Mr. McSWAIN. Mr. Speaker, justice will finally win by its own inherent power. Truth, although slow, like the mills of the gods, will eventually take possession of the minds of the people. These remarks will be very apropos in connection with the bill known as the Wainwright bill, with the McSwain amendment, known as H. R. 13509.

In 1920 the Congress by the national defense act directed that the officer strength of the Regular Army be practically doubled. The sections of that act especially pertinent to this inquiry are sections 24, 24a, and 24b, and we naturally desire to know whether or not the War Department properly understood and executed the will of Congress in connection with this law. When the promotion list as arranged by the War Department was finally published in 1921 it was discovered that as to the ranks of captain, first lieutenant, and second lieutenant, all officers of these three ranks were commingled and intermingled one with the other so that in hundreds of cases second lieutenants and first lieutenants were arranged upon the promotion list higher up than some captains. This meant as vacancies should occur these first lieutenants and second lieutenants would be promoted to grade of major before those captains whom they preceded on the promotion list would become majors.

Now, there are about 900 emergency captains that were thus put upon the promotion list below first lieutenants and second lieutenants of the Regular Army, and about 900 emergency first lieutenants that were placed upon the list below second lieutenants of the Regular Army. The statistics show that these 900 captains are, on the average, about 10 years older than those lieutenants who precede them upon the promotion list. All this first became known in 1921, after the emergency officers had already accepted their commissions and had entered upon their service, and thus entirely severed all connection with their civilian pursuits and were understood by their neighbors, friends, and business associates as having entered the Regular Army for the rest of their lives. Thus it was hard for them to change their plans again so quickly, and therefore as a class they did not resign from the Army after discovering the injustice that had been done, but continued to serve faithfully and loyally in the belief that the War Department itself would see its mistake and correct its wrong, or that Congress itself would by legislation correct the mistake.

This intermingling of officers without regard to rank did not prevail in the higher ranks. Some emergency officers received commissions as colonels in the Regular Army and they were arranged among the colonels. In like manner some emergency officers were appointed lieutenant colonels and were arranged among lieutenant colonels of the Regular Army. The same arrangement was observed as to emergency officers appointed majors. The law itself provided that a suitable number of emergency officers should be appointed in each of the grades below brigadier general, to be selected according to their "qualifications" for their respective grades according to the decision of a board of general officers. To show that Congress expected that age and experience should count and be respected it provided that no person below 48 years of age should be appointed colonel and no person below 45 years should be appointed lieutenant colonel and no person below the age of 36 should be appointed major. When the War Department sent out instructions to examining boards throughout the country it expressedly stipulated that the board should give examinations corresponding to the ranks applied for. In other words, there should be one kind of examination for major and another kind with less range of subjects for captain and another kind with still less range for lieutenant. Section 24a of the act provided that a uniform system of promotion for officers was to be based on "equity, merit, and the interests of the Army as a whole." When it was provided in subdivision 4 of section 24a that emergency captains and lieutenants appointed to the Regular Army under this act should be placed according to commission service among the captains and lieutenants of the Regular Army no one ever thought that the War Department would construe and interpret this language of subdivision 4 as it did. All our thinking and observation of military matters proceeds upon the invariable rule that rank should be respected in promotion.

The Members of Congress who enacted the law understood this principle, and the emergency officers so understood it, and the public generally so understood it. It was therefore a startling and shocking interpretation which the War Department placed upon the language of the act. It was so shocking that some of us not directly in touch with the Army could not realize for several years just what had happened. The relatives and friends of emergency officers that had been thus treated would make their complaint to us from time to time, but we never fully understood for several years just what had been done. We waited then for the War Department to suggest legislation to correct this glaring and manifest injustice. The War Department appointed numerous boards and made numerous studies, but the outcome of the matter was always that the correction of this injustice, which was freely admitted by the War Department, would work an injustice to others, and therefore recommended that no rearrangement be made.

I specifically deny that the correction of an injustice to one man can ever be an injustice to the other man that has been the beneficiary of the original act of injustice. To illustrate: If a lower court erroneously and illegally decides that a tract of land belongs to John Smith and puts John Smith in possession of the land, and then an appeal is taken, and after several crops have been produced on the land rent free by John Smith the Supreme Court reverses the court below and decides that in equity, justice, and merit the land belongs to William Jones, how can it be an injustice to require Smith to surrender possession of land he never should have possessed? In fact, a court of equity would require John Smith to account for rents and profits.

But officers that were first lieutenants and second lieutenants in the Regular Army at the time the national defense act was passed in 1920 and who on account thereof were promoted as of July 1, 1920, to be captains and to take rank over those emergency captains, who on an average are about 10 years older, will not themselves be reduced in rank. These young captains will continue to be captains. Under the ruling of the War Department these lieutenants became captains at an average age of about 25 years. Having been in the Army since 1917, they were thus on an average about 22 years when commissioned as second lieutenants. Relatively few of them had had any previous military training; most of them were just out of college and a few of them had been working for a salary for about a year. Certainly some of them had only a high-school education. I have yet to learn of one of them that had been carrying on any independent and separate business of his own in the competitive business world. Not many of them had begun any profession and a few were working for salaries, and thus taking orders from others. Doubtless, they were as much surprised to find themselves quickly jumped to be captains so early in life as the captains 10 years older were surprised to find themselves ranked by these young captains. These younger captains will continue captains, and if the Wainwright bill passes as amended, then practically all of them will be promoted to be majors at about the same time. The older captains will be higher ranking captains and will be higher ranking majors as they ought to be.

I deny the argument made by Major Summers of the General Staff at the hearings that all new officers should come into the Army as second lieutenants. Naturally, all the Regular Army officers would desire this to be done, but it has never been the practice in the American Army.

Andrew Jackson became a general in the Regular Army without any previous Regular Army rank. Frederick Funston was made a brigadier general, being his first commission in the Regular Army. Gen. Joe Wheeler resigned a lieutenancy in the Regular Army in 1861, and in 1901 was commissioned brigadier general in the Regular Army. Leonard Wood resigned his commission as a surgeon in the Army and became colonel of volunteers, and thereafter was commissioned a brigadier general of the line. There are numerous other examples of how persons have been commissioned in various ranks of the Regular Army, and have been promoted along with Regular Army officers of the same rank. Therefore, it is unfair and unreasonable to permit the War Department to interpret the will of Congress so that persons now nearly 45 years of age on the average, and being commissioned as captains in 1920, find themselves preceded on the promotion list by captains on an average of 10 years younger. I deny that mere length of service in the Regular Army is a fair and reasonable test and measure of merit, and standard of what is best for the interests of the Army as a whole. The qualifications of the individual should be the primary test. Some persons may serve in the Regular Army 30 years or more

and never have one-tenth of the ability and skill as military leaders as other persons who have never served in the Regular Army at all. It is ridiculous and absurd to assume that the merely holding of a commission in the Regular Army confers ability, character, and the quality of leadership. All history and experience assert the contrary; and, in fact, these captains now nearly 45 years old as an average brought into the Regular Army their business and professional experience and training. They are very useful and valuable to the Regular Army. These older captains had been business men, insurance agents, and farmers, real estate agents, and brokers, and thus had a varied experience with the competitive business world. Furthermore, as a class they are well educated.

Their examinations show their educations, showed what colleges they had attended, showed what business they had engaged in, and showed what service they had performed during the World War. I submit that the examination papers and the service records of these older captains permitted the War Department to know much more about them than it could know about the younger captains. The War Department naturally selected the most choice officers that applied for commissions from the many thousands that were seeking commissions. Furthermore, the record shows a large percentage of these older captains had either received military training while in school or had been commissioned officers in the National Guard. All this training was valuable preparation for their intensive instruction in the training camps. At least one of these captains graduated at a good military school, held a commission in the National Guard for about 10 years, had become colonel of his regiment, and was with that regiment when it was inducted into Federal service in 1917. This particular individual possessed preeminent qualifications to be a major, but it so happened that on July 1, 1920, he lacked a few days of being 36 years old, the minimum set by the law as above stated. But at the same time there were many Regular Army officers that became majors on or about July 1, 1920, at the age of 28. Thus they held that a Regular Army officer with no business and professional training, with little if any knowledge of the competitive business world, was qualified to be a major at 28, but an emergency officer, who had been out in the business world, who had been gainfully employed in support of his family, who had been trained in the National Guard and in military schools, all at his own expense, and who had had as much experience in combat during the World War as any Regular Army officer, could not become a major unless 36 years old. This was a direct and conspicuous discrimination against the emergency officer. It is true that this age requirement was written into the law, but it only shows how Congress followed some one's suggestion and advice, and legislated in such a way as to prejudice the emergency officer. The question ought to be "qualifications," and where the qualifications are equal, age ought to have priority. But the War Department has ignored the question of qualifications, and had disregarded that wisdom and knowledge which age and experience bring, and had applied the arbitrary and meaningless and unreasonable standard of "length of commissioned service."

Members of Congress need not deceive themselves nor be deceived by others as to the real point of contention in this matter. Though there may be some collateral issues, resting upon individual cases, yet its main issue, the chief bone of contention, lies between the emergency officers, now captains and first lieutenants who served in war in higher grades as a general proposition and with distinction during the war, and, on the other hand, the Regular Army officers, especially including many officers that entered by way of provisional second lieutenants, who are now captains and became captains, many of them, at about 25 years of age. Here is the real contention; the hearings show it; the records prove it; and the correspondence of individual members on this subject with officers and relatives and friends of officers, when correctly analyzed and understood, will prove it.

Unfair and unjust as is the situation now, its unreasonableness and absurdity will be more manifest if we project ourselves 10 or 15 years into the future, as we must. At that time these emergency officer captains will be 55 or 60 years of age and will still be captains. These Regular Army officers, who claim that their rights will be invaded by the adoption of my amendment, will be 45 or 50 years of age and practically all of them will be majors and some of them will be lieutenant colonels. These older officers, still captains, will have grandchildren attending the same post schools and playing on the same grounds with the children of these younger Regular Army officers. The younger officers, with small and younger families and no grandchildren, will be occupying the larger and more conspicuous houses, and the older officers, below them in grade and in pay, will be living with larger families in the smaller and remote houses. This is a situation that will prove mortifying and embarrassing to these older emergency officers, and especially so to their wives, children, and grandchildren.

The contrast will be so conspicuous as to demand constant explanation. To the minds of children, grandchildren, and neighbors and friends, the fact that the officers, though 10 years older, are outranked by one or two grades by the officers 10 years younger, will constitute an indictment of either the ability or the character, and perhaps of both, of the older officers. Children, grandchildren, relatives, and friends of these older captains will be constantly explaining and apologizing. This is a condition calculated to produce unrest and dissatisfaction. It will do more than destroy morale; it is calculated to produce mutiny, and nothing short of the fine quality of discipline in the hearts of these older emergency officers has preserved their loyalty and maintained their esprit de corps. I counsel forbearance and patience; I insist that Congress will right their wrongs.

Furthermore, I submit most respectfully and deferentially, but earnestly, that the quickness and ease with which these younger officers jumped, in the course of three years, from civilian life, and most of them just out of high school and college, to the permanent rank of captain, are not calculated to establish discipline in them nor to develop a seasoned morale, nor to build up a genuine esprit de corps. Why do I say this? Because what we obtain quickly and easily in contrast with others, we do not properly prize and appreciate. Already these same young captains are fretting at the bit, wishing to be made majors and thinking that they ought to be made majors; their rapid rise from zero in the military life to the rank, dignity, power, and income of a captain in the Regular Army, is unparalleled. Gen. Hunter Liggett had to serve 19 years to become a captain. Gen. Robert L. Bullard had to serve 15 years to become a captain. Gen. John F. Morrison had to serve 14 years to become a captain. Gen. John J. Pershing had to serve 15 years to become a captain; and these examples are fair standards of the time required of the officers of the generation that held high command and discharged great responsibility during the World War.

Again, these younger officers, though the natural spirit of selfishness and personal ambition forbid them to say so in words, yet in the bottom of their hearts, in the silence of the night, in the presence of eternal truth, they are obliged to realize that through a situation of circumstances that they did not control and therefore for which they are not to blame, they have become the favored beneficiaries of rapid promotion, with prospects of further promotion, and that their good fortune was at the cost of men who are on the average 10 years older and have therefore had wider experience and are better trained to exercise high command. This comparison is based on the reasonable assumption that the natural abilities and home training and education of the individuals in the two classes are approximately the same and without any known advantage to either class.

We do know, however, because the records show it, that these older officers, certainly a large per cent of them, had military training either in schools or as officers in the National Guard before April 6, 1917. Furthermore, their records show that they had professional and business experience, which are an important addition to the school education. On the contrary, these younger officers were but little beyond high school and college and with practically no responsible business and professional experience. How can there be any doubt as to the superiority of these older men to exercise command in the Army? Therefore, in the face of the very nature of the facts and in defiance of universally recognized principles concerning rank and promotion, the War Department put an interpretation upon the act of Congress that advances the younger and less qualified officers ahead of the older and better prepared officers. When these younger officers have had the same amount of experience 10 years hence they will surely be equal to these older officers.

It is ridiculous and absurd for any person to say that the various examinations of the former emergency officers in the Regular Army held generally in the fall of 1920, after the Congress by law had decided to double the number of officers in the Regular Army, were not to consider grades and ranks. The law stipulated that qualifications should count and by inference stipulated that age should count. The law required that some of these emergency officers should be appointed in all of the grades from colonel down. As a matter of fact, these boards did recommend the appointment of these emergency officers for commission in all of the grades. The instructions from the War Department said that, "the general qualifications from each applicant should not be limited to moral fitness, but should take into consideration experience, age, grade for which quali-

fied, and probable general value to the Government." Beyond the shadow of a doubt, and it is admitted by every general officer that has appeared before the Committee on Military Affairs, when an emergency officer applied for and took an examination for captaincy in the Regular Army, and was accepted and commissioned, he had a right to assume that he would be placed along with all other captains in the Regular Army, and arranged among all other captains according to length of their respective commissioned service. There was no more reason for him to think that he would find himself on the promotion list below first lieutenants and second lieutenants than he would have in thinking that he would be placed on the promotion list of persons listed as majors and lieutenant colonels. The rule has always been through our recorded history that colonels rank with colonels, majors rank with majors, captains with captains, and lieutenants with lieutenants.

Therefore when the War Department found that its interpretation of this act of Congress would conflict with these universally accepted and applied rules of military life the War Department should have hesitated, and should have called into consultation responsible Members of Congress, and should have ascertained what reason Congress could have had for contravening all of these well-accepted rules.

If they considered the language imperative there should have been a delay in action until the next session of Congress, and the mistakes of language in the act of June 4, 1920, should have been pointed out and Congress given a chance to clear up the language, so as not to make itself ridiculous, and so as to not to compel the War Department to violate all military conceptions and to bring about a state in the Army of unrest, dissatisfaction, and low morale.

Speaking on this subject of promotion and retirement, Gen. Charles P. Summerall, Chief of Staff of the United States Army, used this language:

The present condition is leading to a very unfortunate situation. It has been explained to you, and will be further explained in detail, that we have a large number of officers, who are representative American citizens and who have come from the mass of the people. Most of them have worked their way up in life. They have demonstrated by their service in a great war their ability to be officers, and they have deserved at the hands of the Government considerate and just treatment. They see, however, that before them is a hopeless future. The great majority must remain in grades not commensurate with their duties, their age, or their length of service. They will do what every man does under such circumstances—they will stagnate. They see themselves confronted by the problem of living. Every man in this country has a right to aspire to improve his scale of living, and because he finds himself initially in one scale of living he is not deprived of the right to seek a higher scale of living.

Again, General Summerall, speaking before the same committee, used the following language:

No man can command successfully American soldiers or officers unless they have confidence in his sense of justice. The Government, above all, must show them that it treats them according to reasonable standards of justice. You can not treat any man unjustly without arousing in him a sense of bitterness, resentment, and antagonism that will injure whatever native ability he may have.

Among the basic elements of human nature are ambition and a sense of justice. These are the stuff of business efficiency and they are no less indispensable in the military service. All countries have adopted a system of military grades, thus giving to each officer an opportunity to rise to a position commensurate with his ability, age, and length of service. This is called "promotion" and "rank." Relative to the high positions of civil life, such rewards are small, but they are more precious to the soldier than any material consideration.

CALENDAR WEDNESDAY

The SPEAKER. This is Calendar Wednesday. The Clerk will call the committees.

When the Committee on the Post Office and Post Roads was called.

RECEIPTS FOR MAIL

Mr. KENDALL. Mr. Speaker, I call up the bill H. R. 56, which is on the Union Calendar and approved by the Post Office Department.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 56) to authorize the Postmaster General to issue receipts to senders for ordinary mail of any character, domestic or international, and to fix the fees chargeable therefor.

Mr. KENDALL. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Postmaster General may provide by regulation for furnishing to the sender a receipt showing the mailing of ordinary mail of any class, domestic or international, and for the payment of such fee as he may prescribe for such receipt: *Provided*, That the furnishing of such receipt shall not place any liability on the Post Office Department or its revenues.

With a committee amendment as follows:

Page 1, line 5, strike out the words "domestic or international." Amend the title.

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended.

A motion to reconsider the last vote was laid on the table.

EMERGENCY STAR-ROUTE SERVICE

Mr. KENDALL. Mr. Speaker, I call up the bill H. R. 57.

The SPEAKER. The gentleman from Pennsylvania calls up a bill, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 57) to enable the Postmaster General to authorize the establishment of temporary or emergency star-route service from a date earlier than the date of the order requiring such service.

Mr. KENDALL. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole. The bill is on the Union Calendar.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 8 of the act entitled "An act to amend the act approved June 25, 1910, authorizing the postal savings system, and for other purposes," approved May 18, 1916 (39 Stat. L. 161), is hereby amended by adding thereto the following proviso:

"*Provided further*, That the provisions of section 3960, Revised Statutes, that no compensation shall be paid for additional service in carrying the mail until such additional service is ordered, the sum to be allowed therefor to be expressed in the order and entered upon the books of the department, and that no compensation shall be paid for any additional regular service rendered before the issuing of such order, shall not apply to any service authorized under this act."

With a committee amendment as follows:

Page 1, line 6, after the figures "161," insert "United States Code, title 39, section 434."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

PAN AMERICAN POSTAL UNION

Mr. KENDALL. Mr. Speaker, I call up the bill H. R. 12415, on the Union Calendar, and ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman calls up the bill H. R. 12415, and asks unanimous consent that it be considered in the House as in Committee of the Whole. Is there objection?

Mr. BRIGGS. Mr. Speaker, may we have the bill reported first?

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 12415) to grant freedom of postage in the United States domestic service to the correspondence of the members of the Diplomatic Corps and consuls of the countries of the Pan American Postal Union stationed in the United States.

Be it enacted, etc., That under such regulations as the Postmaster General shall prescribe correspondence of the members of the Diplomatic Corps of the countries of the Pan American Postal Union stationed in the United States may be reciprocally transmitted in the domestic mails free of postage, and be entitled to free registration, but without any right to indemnity in case of loss. The same privilege shall be accorded consuls of such countries stationed in the United States and vice consuls when they are discharging the functions of such consuls, for the exchange of official correspondence among themselves, and for that which they direct to the Government of the United States.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania, that this bill be considered in the House as in Committee of the Whole?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

TRANSPORTATION OF FOREIGN MAIL

Mr. KENDALL. Mr. Speaker, I call up the bill H. R. 6864 on the House Calendar.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 6864) to authorize the Postmaster General to require steamship companies to carry the mail when tendered

Be it enacted, etc., That section 203, chapter 321, of the act of March 4, 1909, is amended by the addition of the following proviso: "*Provided*, That the Postmaster General may require the transportation by any steamships of mail between the United States and any foreign port at the compensation fixed under authority of law. Upon refusal by the master or the commander of such steamship or vessel to accept the mail, when tendered by the Postmaster General or his representative, the collector or other officer of the port empowered to grant clearance, on notice of the refusal aforesaid, shall withhold clearance until the collector or other officer of the port is informed by the Postmaster General or his representative that the master or commander of the steamship or vessel has accepted the mail or that conveyance by his steamship or vessel is no longer required by the Postmaster General."

With committee amendments as follows:

On page 1, beginning on line 3, strike out "that section 203, chapter 321, of the act of March 4, 1909, is amended by the addition of the following proviso: *Provided*, That the" and insert: "That section 203 of an act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909 (35 Stat. L. 1127, U. S. C., title 18, sec. 326), is amended by adding to the end thereof the following new paragraph."

On page 2, line 1, at the beginning of the line insert the word "The."

The committee amendments were agreed to.

Mr. HOGG. Mr. Speaker, I offer an amendment.

The SPEAKER. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 2, line 1, before the words "The Postmaster General," insert "except as otherwise provided by treaty or convention."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

POISONS IN THE MAIL

Mr. KENDALL. Mr. Speaker, I call up the bill H. R. 10441.

The SPEAKER. The gentleman from Pennsylvania calls up a bill which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 10441) to amend section 217, as amended, of the act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909

Be it enacted, etc., That section 217, as amended, of the act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909, be amended to read as follows:

"All kinds of poison, and all articles and compositions containing poison, and all poisonous animals, insects, and reptiles, and explosives of all kinds, and inflammable materials, and infernal machines, and mechanical, chemical, or other devices or compositions which may ignite or explode, and all disease germs or scabs, and all other natural or artificial articles, compositions, or material, of whatever kind, which may kill or in any wise hurt, harm, or injure another, or damage, deface, or otherwise injure the mails or other property, whether sealed as first-class matter or not, are hereby declared to be nonmailable matter and shall not be conveyed in the mails or delivered from any post office or station thereof, nor by any letter carrier; but the Postmaster General may permit the transmission in the mails, under such rules and regulations as he shall prescribe as to preparation and packing, of any articles hereinbefore described which are not outwardly or of their own force dangerous or injurious to life, health, or property: *Provided*, That the transmission in the mails of poisonous drugs and medicines may be limited by the Postmaster General to shipments of such articles from the manufacturer thereof or dealer therein to licensed physicians, surgeons, dentists, pharmacists, druggists, and veterinarians, under such rules and regulations as he shall prescribe: *Provided further*, That all spiritous, vinous, malted, fermented, or other intoxicating liquors of any kind are hereby declared to be nonmailable and shall not be deposited in or carried through the mails. Whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail, according to the direction thereon or at any place at which it is directed to be delivered by the person to whom it is addressed, anything declared by this section to be nonmailable, unless in accordance with the rules and regulations hereby authorized to be prescribed by the Postmaster General, shall be fined not more than $1,000 or imprisoned not more than two years, or both; and whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail, according to the direction thereon or at any place to which it is directed to be delivered by the person to whom it is addressed, anything declared by this section to be nonmailable, whether transmitted in accordance with the rules and regulations authorized to be prescribed by the Postmaster General or not, with the design, intent, or purpose to kill or in any wise hurt, harm, or injure another, or damage, deface, or otherwise injure the mails or other property, shall be fined not more than $10,000 or imprisoned not more than 20 years, or both."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

SAFEGUARDING THE MAILS

Mr. KENDALL. Mr. Speaker, I call up the bill H. R. 13114.

The SPEAKER. The gentleman from Pennsylvania calls up the bill H. R. 13114, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 13114) to amend section 197 of the Criminal Code (sec. 320, title 18, U. S. C.)

Be it enacted, etc., That section 197 of the Criminal Code (sec. 320, title 18, U. S. C.) as to read:

"Whoever shall assault any person having lawful charge, control, or custody of any mail matter, with intent to rob, steal, or purloin such mail matter or any part thereof, or shall rob or attempt to rob any such person of such mail or any part thereof, shall for the first offense be imprisoned not more than 25 years; and if in the effecting or attempting to effect such robbery he shall wound any person having custody of or engaged in safeguarding the mail or put his life in jeopardy with a dangerous weapon, he shall be imprisoned for life; and if in effecting or attempting to effect such robbery he shall kill any person having custody of or engaged in safeguarding the mail, he shall be punished by death."

With committee amendment as follows:

Page 1, line 4, strike out the word "as" and insert in lieu thereof the words "be amended."

Page 1, line 9, strike out the words "for the first offense."

Page 1, line 10, strike out after the word "in" the word "the."

Mr. KENDALL. Mr. Speaker, I yield five minutes to the gentleman from Pennsylvania [Mr. KELLY].

Mr. SUMNERS of Texas. Will the gentleman from Pennsylvania yield to me for a question?

Mr. KELLY. Certainly.

Mr. SUMNERS of Texas. I want to ask about the effect of these committee amendments, especially the amendment dealing with the matter of first offenses.

Mr. KELLY. It is really to correct a typographical error. The original print of the bill should have contained the language as is now proposed, but by inadvertence it did not. It was the intention of the committee to omit the words "for the first offense" and provide imprisonment for not more than 25 years. This measure is urged by the Postmaster General as a means of dealing with the serious situation that confronts the department.

Mr. SUMNERS of Texas. Will the gentleman yield for another question?

Mr. KELLY. Yes.

Mr. SUMNERS of Texas. Did the committee consider making it a capital offense, within the discretion of the jury, where a robbery is committed with firearms?

Mr. KELLY. Yes; that was considered by the committee and it was finally decided that it would be best in the form in which the bill is reported. However, that provision was thoroughly considered and a draft containing it was before the committee.

Mr. SUMNERS of Texas. I do not suppose there is any question as to jurisdiction between this committee and the Judiciary Committee.

Mr. KELLY. I will say to the gentleman that it was unofficially stated to me by a member of the Judiciary Committee that the bill should have gone to that committee, but it deals with matters pertaining to the Post Office Department exclusively and it has already been acted upon by the Post Office Committee.

Mr. BANKHEAD. Mr. Speaker, I would like to submit a parliamentary inquiry on that proposition. It seems to me that a bill of this gravity, a bill proposing to inflict capital punishment, should properly have gone to the Committee on the Judiciary, but I suppose the Speaker properly referred it to the

Post Office Committee. I do not want to raise the question of jurisdiction now and probably it is too late, but I think it is rather important that the record should be made clear on that point.

Mr. RAMSEYER. Will the gentleman yield?

Mr. BANKHEAD. Yes.

Mr. RAMSEYER. It is too late to raise the question of jurisdiction.

Mr. BANKHEAD. I admitted it was probably too late to raise that question, but as it is a matter of considerable importance, I thought I would make an inquiry of the Chair and ascertain whether he was firm in his opinion that the bill originally was properly referred to the Post Office Committee.

Mr. KELLY. I will say that the bill deals exclusively with the Postal Service and so it was dealt with by the Post Office Committee.

Mr. RAMSEYER. Will the gentleman yield further?

Mr. BANKHEAD. Yes.

Mr. RAMSEYER. I know, as a matter of practice, having for a number of years served on the Post Office Committee, that bills for the enactment of criminal statutes for offenses against the Post Office Department have invariably been referred to the Committee on the Post Office and Post Roads.

The SPEAKER. The Chair does not recall the reference of this bill in the first instance, but inasmuch as it is the duty of the Committee on the Post Office and Post Roads to report legislation relating to the Postal Service, and in view of the fact that this bill does not affect anything but the Postal Service, the Chair is inclined to think it was properly referred. In the future the Chair will undertake to examine very carefully bills relating to the Postal Service that carry the death penalty.

Mr. BANKHEAD. Mr. Speaker, that was my only purpose in making the inquiry, because it seemed a matter of considerable gravity.

The SPEAKER. The Chair will keep that in mind. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

Mr. KELLY. Mr. Speaker, I desire to offer an amendment.

The SPEAKER. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. KELLY: On page 1, line 6, after the word "of," add the words "or engaged in safeguarding."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The SPEAKER. The Clerk will call the next committee.

The Clerk called the Committee on the Public Lands.

Mr. COLTON. Mr. Speaker, I call up Senate bill 3162.

Mr. TILSON. Will the gentleman yield?

Mr. COLTON. I yield.

Mr. TILSON. We should like very much to go ahead with the appropriation bill for the Department of Agriculture to-day and finish it. Therefore I ask unanimous consent that Calendar Wednesday business be dispensed with for the remainder of the day.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that Calendar Wednesday business be dispensed with for the remainder of the day. Is there objection?

Mr. LEAVITT. Mr. Speaker, I reserve the right to object to submit a parliamentary inquiry. This committee would then have the next Calendar Wednesday?

The SPEAKER. The committee would have the next two Calendar Wednesdays.

Is there objection to the request of the gentleman from Connecticut?

There was no objection.

AGRICULTURAL APPROPRIATION BILL

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15386) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15386, the Agricultural appropriation bill, with Mr. LUCE in the chair.

The Clerk read the title of the bill.

The Clerk read as follows:

Market inspection of farm products: For enabling the Secretary of Agriculture, independently and in cooperation with other branches of the Government, State agencies, purchasing and consuming organizations, boards of trade, chambers of commerce, or other associations of business men or trade organizations, and persons or corporations engaged in the production, transportation, marketing, and distribution of farm and food products, whether operating in one or more jurisdictions, to investigate and certify to shippers and other interested parties the class, quality, and/or condition of cotton and fruits, vegetables, poultry, butter, hay, and other perishable farm products when offered for interstate shipment or when received at such important central markets as the Secretary of Agriculture may from time to time designate, or at points which may be conveniently reached therefrom, under such rules and regulations as he may prescribe, including payment of such fees as will be reasonable and as nearly as may be to cover the cost for the service rendered: *Provided*, That certificates issued by the authorized agents of the department shall be received in all courts of the United States as prima facie evidence of the truth of the statements therein contained, $420,000.

Mr. ABERNETHY. Mr. Chairman, I move to strike out the last word.

I do this for the purpose of eliciting some information from the chairman of the subcommittee. I received a letter this morning from the commissioner of agriculture of our State, who is very much concerned about the insects that are bothering our bulb culture in the eastern part of the United States, and particularly in North Carolina.

I notice in the report, Mr. Chairman, you say for the investigation of bulb insects in the East, $7,500. This is confined to the whole eastern section of the United States, is it not?

Mr. DICKINSON of Iowa. That is for the whole eastern section where they have bulb culture. There are about four States that produce bulbs in the eastern section, New York, New Jersey, Virginia, and North Carolina, and this is for investigation of the diseases that are prevalent in those States on the eastern coast.

Mr. ABERNETHY. I would like, Mr. Chairman, the privilege of inserting in my remarks this letter from our commissioner of agriculture.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

The matter referred to follows:

NORTH CAROLINA DEPARTMENT OF AGRICULTURE,
Raleigh, December 15, 1928.

Hon. CHARLES L. ABERNETHY,
Member of Congress, Washington, D. C.

DEAR MR. ABERNETHY: It is my understanding that the Bureau of Entomology of the Federal department asked the Bureau of the Budget for an item of $15,000 to be used in the studies of bulb insects affecting narcissus and other related bulbs which are now being grown to a large extent in North Carolina and Virginia. I am just informed that the Bureau of the Budget did not include this item, but that it did include an item of $15,000 for the study of bulb insects on the Pacific coast, and an appropriation for the study of bulb fungus diseases on Long Island.

Within the last few years the bulb industry has grown very extensively in North Carolina, as will be seen from the following quotation from a recent report of the Federal Horticultural Board:

"Omitting the paper-white narcissus, Chinese sacred lily, and Soleil d'Or, which are confined to the Southern States and are known as polyanthus types, the figures for the States having more than 1,000,000 of the hardy daffodil types, are as follows:

New York	7,740,706
Washington	7,147,280
Oregon	5,452,310
Michigan	4,550,900
Virginia	4,032,200
Texas	3,987,000
New Jersey	3,947,600
North Carolina	2,777,600
Illinois	2,403,162
California	1,362,510
Ohio	1,208,025
Total for the United States	45,462,727

"According to the annual reports of the Federal Horticultural Board, it appears that 12,575,730 narcissus bulbs were imported into the United States during the fiscal year 1927–28, and that of this number 1,525,858 reached the State of Virginia."

North Carolina is vitally interested in a study of these bulb problems. I am wondering, therefore, if you would use your influence in securing an amendment to the appropriation bill granting this appropriation of $15,000 to the Bureau of Entomology for this work on the Pacific coast in order that an equal amount will be provided for

work in our section. It is my understanding that a large portion of this money would be spent in eastern North Carolina and southeastern Virginia.

Any assistance that you can render in this matter will be greatly appreciated.

Respectfully yours,

WM. A. GRAHAM,
Commissioner of Agriculture.

Mr. KINCHELOE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Kentucky offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. KINCHELOE: Page 62, line 5, after the ward "cotton," insert a comma and the word "tobacco."

Mr. KINCHELOE. Mr. Chairman, I do not desire to take up any time of the committee if the chairman of the subcommittee will agree to this amendment.

Mr. DICKINSON of Iowa. Mr. Chairman, we have no objection to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Market news service: For collecting, publishing, and distributing, by telegraph, mail, or otherwise, timely information on the market supply and demand, commercial movement, location, disposition, quality, condition, and market prices of livestock, meats, fish, and animal products, dairy and poultry products, fruits and vegetables, peanuts and their products, grain, hay, feeds, and seeds, and other agricultural products, independently and in cooperation with other branches of the Government, State agencies, purchasing and consuming organizations, and persons engaged in the production, transportation, marketing, and distribution of farm and food products, $1,227,000.

Mr. HARE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HARE: Page 63, line 5, after the word "products," strike out "$1,227,000" and insert in lieu thereof "$2,227,000."

Mr. HARE. Mr. Chairman, on last Saturday I gave notice to the House that at this time I would introduce the amendment just read asking to increase the appropriation for the market news service from $1,227,000 to $2,277,000. I assume that the Members of the House are quite familiar with this service.

We understand that the market news service was created in the Department of Agriculture a few years ago with the idea of furnishing producers information with reference to the demand and supply of particular crops in particular markets on any particular day of the year. This news service is of special importance to farmers who are engaged in growing fruits and perishable farm crops. For instance, a farmer has a perishable crop that he is ready to place on the market to-day; he has no information whatever as to the market to which this produce should be directed so that it would bring the highest possible price. But if he were advised by the Department of Agriculture, we will say every afternoon or evening at 6 o'clock, that in the great consuming centers of the country there is only a certain amount or a certain quantity of the crop in which he is interested, he would be able to know just where to consign his shipment. In other words, if a producer of watermelons or cantaloupes should know at the setting of the sun to-day the quantity of cantaloupes or watermelons in the various consuming centers he would know exactly where to consign his shipments.

This has proven to be a very valuable service, but on account of the limited appropriations the Department of Agriculture has not been able to render the service except in cases where the producers furnish the money to supply them with the information, whereas, gentlemen, the Bureau of Foreign and Domestic Commerce, as I pointed out a few days ago, is charged with the responsibility of securing and locating markets for the products of manufacturers.

This last year it was instrumental in increasing the sales of manufactured goods to the extent of $45,000,000 or more, and yet the manufacturers were not called upon to pay anything for this service. The manufacturer and the purchaser were brought together by this governmental agency with no cost to either, and yet when the great producers of agriculture call upon the Government to furnish them with the same information or with corresponding information the Government has to come back and say, "We have it but we can not furnish it unless you put up the money to pay the cost of it."

This amendment provides that the appropriation shall be increased in a sufficient amount to bear the expense. Permit me to say that the Department of Agriculture, according to my understanding, recommended to the Bureau of the Budget this last year, or before this appropriation bill was framed, that this appropriation be increased $796,000. The Department of Agriculture, the governmental representative of the farmers, we might say, asked for this increase, but the Bureau of the Budget did not grant it, for it is my understanding that the department represented to the Bureau of the Budget that it would take the amount suggested to give prompt and efficient market news to all sections of the country.

I pointed out in a speech here last Saturday that the justification for this appropriation is that the Government is already providing similar service for the manufacturers of this country through the agency and efforts of the Bureau of Foreign and Domestic Commerce, and, according to the report of the director, the bureau last year through its representatives increased the sales of 25 manufacturers approximately $7,500,000, or an average of about $298,000 each. We want by this amendment to provide a corresponding service for agriculture; and in this connection I desire to call attention to a statement made by President-elect Hoover in a speech he made in St. Louis on November 2. When speaking of farm-relief legislation, he said:

I believe we can apply to agriculture the principles and activities in this direction which we have applied to commerce and industry during the last seven and a half years. I believe we can solve a very large number of the problems of agricultural distribution and marketing through such methods.

There is no doubt, gentlemen, but what the bureau referred to has done wonderful things in assisting manufacturers in marketing and disposing of their products at a profit, and I contend that in all fairness and justice to the farmer and to agriculture this amendment should be adopted.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. DICKINSON of Iowa. Mr. Chairman, there has been a great deal of agitation for an increase in the market news service. The minute we take over the market news service and have the Government pay for the whole of it you are going to increase the appropriations to where it will be beyond all bounds. There is just as much cooperation in the expansion of the news service so far as industry is concerned as there is agricultural. There is a great deal of cooperation, in fact all the big concerns in the foreign trade have their own representatives as well as representatives of the Government helping to extend trade in these areas.

The market news service is more or less new, but it has developed very fast. The thing that this House ought to remember is that in many items it is not money that will do the business; it is experience.

As a matter of fact, this department is expanding as fast as it ought to expand, because the minute you say that you ought to have established a new station you are not getting the value of the money expended.

Now, this map shows the big stations maintained solely at the Government expense. Growing out of this there are branches to small stations. There has been a demand made here that the Government should take over the total expense of the small stations and relieve all these various substations from any contribution whatever and maintenance of the new service. As a matter of fact, whenever you do that, if you establish that policy you are going to tremendously curtail the expansion of the news service, because I do not believe that you are going to get the department or the Budget or the President to continually come back here and make larger and increased appropriations for these items year after year at the sole expense of the Government.

As a matter of fact, the news-service station should be partially contributed to by those interested in the news service in the various localities. Here is what happens: They come and say we are willing to give the service an office, contribute so much, and we want the Government to be in command, and we will contribute so much locally and the Government contribute so much. In that way you establish a cooperative news station that is partially in charge of the local people and partially in charge of the Government. You have cooperation of the two. The minute you adopt this other program you are going to cripple the service.

Mr. MORTON D. HULL. What did the department request?

Mr. DICKINSON of Iowa. There is no statement in the hearing——

Mr. MORTON D. HULL. I understand that the department made a request for a larger sum and the Bureau of the Budget cut it down.

Mr. DICKINSON of Iowa. It is not on record what the department did request.

Mr. HARE. Will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. HARE. The department asked for $796,000 more than the Bureau of the Budget allowed.

Mr. DICKINSON of Iowa. As a matter of fact, we have found that every department wants to increase its service faster than is justified. They make requests of the Budget a great deal larger than they should. I would like to know what official is giving out information of that kind.

I would like to know what official of the Bureau of the Budget is giving it out.

Mr. HARE. No one volunteered information to me. It was given to me because I asked for it.

Mr. DICKINSON of Iowa. I would like to know what official is giving out to Members of Congress promiscuous information of this kind outside of the hearings.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HARE. Will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. HARE. As I understand, the department does not give out the information promiscuously, but my information was obtained upon my personal request.

Mr. DICKINSON of Iowa. I suggest to the Members of the House that you will find in the hearings a criticism by me with reference to the secrecy of department estimates. I believe those estimates ought to be printed in the Budget hearings. I believe they ought to be public property, and I have so stated in the hearings. I also believe that if they were public property you would find that the department heads in some of the departments of this Government would not be making the extravagant requests that they are making now, knowing that they are not going to get them, because the amount they could possibly get under the appropriation, under the Budget system, could not reach such an amount. I am opposed to the department heads coming in here and making extravagant requests to the Budget upon the theory that they may work out some little amount of increase in their respective departments, and we found all along the line where we found the amount certified by those departments, that many of the requests are in excess of what they know the Budget will authorize. For that reason, if they were made public and printed, they would be careful as to how big a request they made to the President and to the Budget for their respective departments.

Mr. O'CONNELL. And the gentleman is contending this morning that the department makes statements to Members that are different from the statements made before the committee?

Mr. DICKINSON of Iowa. I am not contending any such thing.

Mr. O'CONNELL. That is what I understood.

Mr. DICKINSON of Iowa. I did not mean any such thing.

Mr. O'CONNELL. If the gentleman would clarify it, I would be grateful.

Mr. DICKINSON of Iowa. I say that they are not supposed to have the department estimates made public. I asked the gentleman where he got his information. We did not have any information from this department that they were not getting enough money to carry on this news service. We did not ask for their estimates, although we had that privilege.

Mr. BYRNS. Of course, the gentleman understands that the reason for that is the Executive order which forbids any executive department from asking any more than the Budget approves.

Mr. DICKINSON of Iowa. Yes.

Mr. KETCHAM. Is it not a fact that this is a considerable increase over last year's appropriation in any event?

Mr. DICKINSON of Iowa. Yes.

Mr. KETCHAM. It is an increase of $150,000, as I make it, and that is a 12 per cent increase, which seemed to me to be sufficient.

Mr. DICKINSON of Iowa. The increase in the bill this year over last is an apparent increase of $150,645; $51,823 of that is required under the Welch Act, so that there is $90,822 of increase in this item. With a service of this kind, if you make them drunk with money, you hurt the service rather than help it.

Mr. HARE. As I understand it, the Bureau of Foreign and Domestic Commerce which does a similar work for industry has an appropriation of approximately $3,000,000. Does the gentleman think that the Government should show any partiality or discrimination in making its appropriations in favor of industry in finding markets as against the service that it is willing to render to agriculture?

Mr. DICKINSON of Iowa. Oh, I do not think that you can compare a foreign service of that nature with the kind of service that we are discussing here.

Mr. HARE. But we can compare the principle involved.

Mr. DICKINSON of Iowa. Oh, no; you can not.

Mr. McLAUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. McLAUGHLIN. I can see that there may be necessity of forbidding officials of departments coming to Members of Congress and trying to override the action of the Bureau of the Budget, but I am unable to understand why the doors are closed entirely to Members of Congress and committees so that they can not find out even what a department asks the Bureau of the Budget to recommend.

Mr. DICKINSON of Iowa. That information can be obtained as I understand it, in all public hearings, and I understand now that it is being given out to the gentleman from South Carolina [Mr. HARE] by both the department officials and the Budget officials.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. McLAUGHLIN. But the gentleman from Iowa now inveighs against that, and says that it is improper and should not be done.

Mr. DICKINSON of Iowa. It is improper according to the order mentioned by the gentleman from Tennessee [Mr. BYRNS].

Mr. BYRNS. It is improper, as I understand the Executive order, for any Government official to appear before the committee and urge or ask an increase of their estimates over the amount allowed by the Budget; but I wish to say that, in so far as the Subcommitees of the Committee on Appropriations are concerned—and I speak particularly with reference to those of which I am a member—we never have any trouble in getting the facts when we ask for them as to how much the department originally asked; but they never volunteer the information.

Mr. McLAUGHLIN. But the gentleman from Tennessee knows that when a Member on the floor asks members of the Committee on Appropriations for that information, it is denied him.

Mr. BYRNS. I think the gentleman is mistaken as to that. It may be that in the course of the hearing that information was not asked for and obtained, but I do not think any member of the committee has ever denied that information, nor do I think that any Member of Congress should be denied that information when he goes either to the department or to the Budget. It is a public matter, and every Member of Congress is entitled to it.

Mr. McLAUGHLIN. But the only opportunity a Member of Congress has, or many of them, is to make inquiry of a member of the Committee on Appropriations when he is presenting the matter on the floor. Why a part of the information should be withheld I do not understand.

Mr. BYRNS. I want to reiterate what I said to the gentleman from Michigan a moment ago. I do not think that any chairman of a subcommittee or any member of the Committee on Appropriations has ever refused or would hesitate for a moment to give such information.

Mr. DICKINSON of Iowa. All of the information that members of the committee have is in the hearings, and the minute those hearings are printed they are made available to all Members.

After an estimate is passed before our committee it is printed because we never ask anything for record as to estimates outside of a departmental hearing.

Mr. McLAUGHLIN. The gentleman knows that an official of the department appearing before a committee of Congress is not permitted to tell what he asked the Budget for.

Mr. DICKINSON of Iowa. He is if you ask the question.

Mr. McLAUGHLIN. There are some estimates required to be kept secret, I do not know just exactly——

Mr. DICKINSON of Iowa. There is no question in my judgment it would be a wholesome thing if these estimates were made public.

Mr. BURTNESS. Members of the Appropriations Committee in this respect are in a different position than the other Members.

Mr. DICKINSON on Iowa. Not according to the statement of the gentleman from South Carolina.

Mr. BURTNESS. I understood the gentleman from Michigan to ask the question, or to raise the question, that you could not ask the direct question of the department heads.

Mr. McMILLAN. Can not any other Member of Congress who might desire raise the same question of the heads of a department?

Mr. DICKINSON of Iowa. That is according to the gentleman from South Carolina.

Mr. BURTNESS. It would perhaps be quite right for the subcommittee to simply ask as the item was read what was the estimate made in the department.

Mr. DICKINSON of Iowa. Well, now, I would like to make a little speech.

Mr. BRIGHAM. Are the department estimates submitted to your committee?

Mr. DICKINSON of Iowa. No, sir.

Mr. OLIVER of Alabama. With respect to some questions asked on the other side of the aisle, the subcommittee I serve on usually inserts in the record not only the Budget recommendation but also the estimates made by the departments to the Budget. If you will examine the hearings for the Departments of Justice, State, Labor, and Commerce, which will be available to-morrow, you will find much information of that character in the hearings.

Mr. BURTNESS. That very point was in my mind in the question, so that Members of Congress who desired information could look at the hearings.

Mr. DICKINSON of Iowa. I want to get this before the House if I can. There are increases authorized by the Budget of $150,645. There are $51,823 for the Welch Act. There is a $24,400 increase in the survey of livestocks and meats. Now, that survey is an important thing. Now, we increased a new service on fruits and vegetables in the amount of $41,464. It was a service very well worth taking care of, and it is a service the department wants to increase as fast as they can. Fifteen thousand two hundred and forty dollars is for poultry and eggs. Now, that has become a big item in the merchandise of this country, and we are increasing that. There is $17,718 carried for the service of grain, feed, and hay.

This map shows you where the large stations are, and you will see that they reach out to practically all the great producing areas of every section of the country as well as to the great consuming areas. You will notice the chain runs through most of the Mississippi Valley, on account of the vast production there; and that being the case, and taking into consideration the fact that it reaches out to the Pacific coast and down to the Gulf and over into the States of Florida and Alabama, it means that we are trying to expand this service to practically every area in the country.

Now, I do not believe that this House would be justified in increasing the amount in the bill and making an effort to double or treble the service under the existing conditions, because of the fact that we are now expending it, in my judgment, economically so far as we can do it. I hope the amendment will be defeated.

Mr. BANKHEAD. Mr. Chairman and gentlemen of the committee, ordinarily in these items of appropriation I am content to accept the judgment of the members of the committee who prepared them. But occasionally items will arise of such importance, particularly to some industry of the country, that I think we are occasionally justified in overriding the decisions of the committee with reference to the amounts recommended to be appropriated, and I regard the item covered by the amendment proposed by the gentleman from South Carolina [Mr. HARE] as coming within the exception I have stated.

I represent an almost exclusively agricultural district. It is a district where our people for generations have been confining their agricultural activities largely to one cash crop, and for years and years the agricultural leaders have told us, and also the Department of Agriculture in Washington and the extension agents, that we should implore the farmers of Alabama to get away from the 1-crop system and diversify their agriculture.

My attention to the necessity of the new system along the line carried by this paragraph in the bill has been called particularly by the efforts of a local association in my home county, the Fruit and Vegetable Growers' Association. A number of our farmers went into the enterprise last year and devoted a great deal of preliminary expense to preparing the land and securing fertilizers and planting the crops, and they had splendid yields of their truck crops. But this past summer, when the time came for these men to market their products and they began to make inquiries as to what sections of the country afforded the best facilities for marketing, they could not find them because the officials of the department here, as the gentleman from South Carolina has pointed out, which has been clothed with authority to supply such information, say they have not sufficient funds to cover those sections to furnish it to the producers, the men gambling on their time and toil and money to produce their crops.

This inability to procure adequate information either from State or Federal authorities as to where the best markets could be had, where they could sell at a profit, presents to my mind a very practical proposition. I think by the enlargement of this appropriation the thousands and tens of thousands of farmers all over my section of the country who are undertaking to diversify their products and have money coming into their hands at certain seasons of the year, instead of one harvesting and marketing period, will be encouraged. I believe that this additional appropriation, as pointed out by the gentleman from South Carolina, is abundantly justified. The department having the administration of this fund say they need a larger sum for the effective prosecution of this work.

Mr. DICKINSON of Iowa. Mr. Chairman, last year Senator MCNARY, in the hearings on the bill, asked that we provide for a complete survey, a complete job, in every part of the country. The department made that survey, and they made an estimate based on that survey, and that is where you get the $700,000 suggested by the gentleman from South Carolina [Mr. HARE]. That being the case, it is an effort on the part of the gentleman from South Carolina not only to inaugurate the complete service of the entire country all in one lump, but to increase that by something like $200,000.

Mr. HARE. I asked the gentleman from Iowa to agree to an amount equivalent to that suggested by the Budget.

Mr. BANKHEAD. Mr. Chairman, I just want to add this one word: We have been talking about farm relief in Congress for a number of years past. It is still a matter of active interest and it is still undecided. It is possible that at the extra session of Congress a compromise farm relief bill of some sort will be enacted, and I have no doubt that that bill, if enacted, will carry an appropriation for a revolving fund of a very large figure. I understand that $300,000,000 or $400,000,000 has been suggested as a proper amount to be turned over to the farm board to facilitate the profitable marketing of farm products. I have no doubt that the bill to be reported will carry an appropriation to that extent but my knowledge of this situation, with the limited opportunity I have had to give the subject careful study, leads me to believe that if you will transfer from that $300,000,000 or $400,000,000 at least a million dollars to supply facilities to actual producers to obtain a direct and immediate market for their products you will do more for farm relief in a substantial way, especially for the benefit of the producers of fruits and vegetables, than you would do by adding this entire amount to the farm relief bill. Therefore I sincerely trust that the amendment of the gentleman from South Carolina will be adopted.

Mr. LARSEN. Mr. Chairman, I move to strike out the last two words. I take advantage of the opportunity afforded in order that I may present to the House my ideas as to the logic of the position of the gentleman from Iowa regarding the duty of the Chief of the Budget. I do not concede infallibility of the Budget. Of course, we all understand that the Bureau of the Budget is not engaged in the administration of the various departments but we know that the bureau simply has information as to what the economy program of the administration is and, therefore, undertakes in a general way to allot the amounts that the administration thinks should be expended by the various governmental departments.

The Bureau of the Budget, as a matter of course from the nature of the circumstances, knows little or nothing as to the actual needs of the Agricultural Department, of the Military Department, or of any other department except as the head of the bureau obtains information from those departments as to their needs and desires. When it becomes necessary for the Bureau of the Budget to ascertain the needs of the Agricultural Department, the chief must go to the Agricultural heads for such information. For one, I believe that the information which is given to the Bureau of the Budget ought also to be available to Congress, in order that each Member of the Congress may understand what the desires and the necessities of the Agricultural Department are, just as well as the Bureau of the Budget understand them. Of course, I can understand why it may not be desirable to the Chief of the Bureau of the Budget to set aside an amount for the use of the Department of Agriculture, or any other department, and then have some man who is at the head of such department say that the amount allotted to department is not sufficient to meet its actual requirements and demands.

That is no doubt the reason for the Executive order. But, nevertheless, this is information that ought to be available to the Members of Congress. Congress, in the last analysis, has the responsibility of meeting the demands of the country. That responsibility rests upon the Members of Congress and not upon the Bureau of the Budget. We should meet that responsibility ourselves.

The CHAIRMAN. The time of the gentlemen from Georgia has expired.

Mr. LARSEN. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. ABERNETHY. Will the gentleman yield?

Mr. LARSEN. Yes; certainly.

Mr. ABERNETHY. Does not the gentleman know, as a matter of fact, that if you undertake to get information from any head of a department they hesitate to give it to you because they are afraid of the Damocles sword that is kept over their heads by the Bureau of the Budget?

Mr. LARSEN. Yes; I presume that condition exists in all the departments. As the gentleman has asked me the question I will state what my experience has been. I have in mind one case in which I looked up the matter myself. It was regarding an estimate or request for appropriation made of the Bureau of the Budget by the Post Office Department. I found that such information was in that instance contained in the hearings that were held before the subcommittee dealing with the Post Office appropriation bill and it was therefore available to all the Members. I think it ought always to be available to the Members and ought to be contained in the records.

Mr. McMILLAN. Will the gentleman yield?

Mr. LARSEN. Yes.

Mr. McMILLAN. As I understand it, under the present practice we legislate here as the result of the recommendations, to a great extent, of the Budget and not of the departments?

Mr. LARSEN. Exactly so.

Mr. McMILLAN. And in legislating we are the representatives of the people of the country and not of the Budget Bureau?

Mr. LARSEN. That is true. The difficulty is that we may fail to know the amounts which the heads of the departments think necessary to properly administer the departments over which they preside; we simply may have information as to what the Bureau of the Budget has decided to allot to the various departments rather than what amount should be allotted. As I understand, we may legislate in accordance with the Executive idea of economy rather than in accordance with necessities. I think that is a very regrettable condition and that we ought to correct it. It can be corrected if the members of the Appropriations Committee, who are dealing with these matters, will be diligent and see that the information is always obtained and embodied in the hearings. [Applause.]

Mr. McLAUGHLIN. Mr. Chairman, I rise in opposition to the amendment. The question has been raised here as to whether or not in matters of this kind all information is available to Members of Congress. I believe it should be. I believe at the same time that it is not available under the present way of doing business. If there is any fault with our comparatively new method of making appropriations, having all bills come from one committee instead of from a number of them, as was formerly the case, it is that very few Members, usually only three of them, have or are permitted to have full and intimate knowledge of the important matters which go into a bill. Other Members, all the rest of them, have difficulty in getting information. Obstacles are actually deliberately placed in the way of their getting information which, I think, everybody will agree they are entitled to have.

Now, I presume the idea is that if Members of Congress get full information, learn, for example, what heads of bureaus and departments wish, some of which has been denied by the bureau, the Congress will be inclined to extravagance. What is the history during the years the Bureau of the Budget has functioned and since the adoption of the rule of the House providing for preparation and presentation of appropriation bills by one committee alone?

It is within the right of the House and the Senate and the two bodies acting together on the receipt of a bill from a committee to change the amounts, put them up or put them down, as the judgment of the Congress dictates, and early in the history of the Bureau of the Budget and the system we now have in the House, whenever the House makes a material increase in an appropriation recommended by the Budget Bureau and presented to the House in a bill, there is an outcry over the country to the effect that the House is reckless and extravagant, is disregarding the recommendations of the Budget, is out of sympathy with the President's policy of economy. It is true that the Congress makes many changes, increases many appropriations, but at the same time it reduces many others, with the result that when the sessions of Congress close, when the record of each year by itself in full is made up, it is found that the Congress has appropriated less money than was recommended by the Bureau of the Budget and by the President himself; and these reductions made by the Congress have not been small or insignificant. During the years of the life of the Budget system appropriations have been more than $368,000,000 less than the recommendations by the bureau and the President. The Congress, particularly the House, during each and all of the last eight years, has been the most economical part of the entire Federal Government.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. BUCHANAN. Mr. Chairman, I rise in opposition to the amendment.

As a member of the subcommittee, gentlemen, I feel it is my duty to state to the House the action of the subcommittee, what caused its action, the estimate of the Secretary of Agriculture to the Bureau of the Budget, and what caused this estimate.

All this talk we have had about a member of the Committee on Appropriations not being willing to state the amount the Secretary estimated to the Budget is all foolishness. There is no member of the Appropriations Committee who ever refused such information if he knew it; and if he did not know it, of course, he could not give it. So far as I am concerned, if Members of the House will read the hearings they will find in the hearings that, as far as my convictions and opinions are concerned, I do not think there is a single activity of the Federal Government outside of our foreign relations that every Member of Congress and every citizen of the United States ought not to have information about. This lies at the very foundation of a republican form of government, that its citizens shall know what the Government is doing and its every act that affects their interests. [Applause.] This is in the hearings on this bill.

I do not believe the estimates of any department should be kept secret at all. I do not believe the action of the Budget should be kept secret or that there should be any secrecy whatever in connection with the fiscal affairs of the Government, or anything else, for that matter.

Now, as to this item, Senator McNARY and Mr. DICKINSON of Iowa—in fact, the two subcommittees of the two Houses—have long felt that there should be a regular, orderly, systematic plan adopted by the Congress to govern market news service. In other words, the United States should be divided into zones, taking into consideration the relationship of production and consumption of specified commodities, and segregating them into appropriate production and consumption zones, and central stations should be established in each zone and to each of these central stations should be sent all the required information.

The Federal Government should maintain at its own cost the central stations where it collects all the information. Then the Federal Government should define a policy of whether or not, when they send this information out to local communities, local towns, or to different States, it should bear all the expenses or whether they should require a certain percentage of this extra expense to be contributed by the States, municipalities, or other organizations.

We should adopt a general policy and treat every section alike and not have the slipshod method that now controls the conduct of this fund.

In obedience to this idea Senator McNARY requested the Secretary of Agriculture to make an estimate to the Budget that would provide for a complete and efficient marketing service that would render service to every section and every locality where such service was demanded throughout the United States.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BUCHANAN. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BUCHANAN. In obedience to this recommendation for a complete service for the Union the Secretary of Agriculture recommended to the Budget an increase of $796,000. If it had not been for this request of Senator McNARY, the Secretary of Agriculture would have asked a normal increase—about what the Budget approved and about what this committee gave. This recommendation was based upon, called for, and responded to only by reason of this request as to how much it would take for a complete service throughout the Union. So that this amendment, which was introduced by my friend from South Carolina [Mr. HARE], provides over $200,000 more than is necessary for a complete service throughout the Union.

Now, let us look into this estimate. I think we treated this service fairly.

This committee gave an increase over the last appropriation of $98,822. The gentleman from Iowa [Mr. DICKINSON] read you the allocation of that increase. Granting an increase as provided in the amendment when the committee has under consideration the formulation and adoption of a complete plan governing the service throughout the Nation is inadvisable and bad business—I do not think it is business, I do not think the money would be economically expended. It would provide for too great an expansion in one year.

Now as to the present system, I hold in my hand a statement from the Agricultural Department where 34 little towns and cities have asked for this service. The reply was that they must contribute something towards this service and these towns have contributed all the way from $100 to $1,500—one town having paid $100 for the service and another town having paid $1,500 for the service with absolutely no rule to govern the equity or charges imposed upon the two sections. That is not right, that is not equality, that is not justice to all sections of this country at the hands of this department.

Mr. GREEN. Will the gentleman yield?

Mr. BUCHANAN. Certainly.

Mr. GREEN. Can the gentleman inform us whether or not in the administration of this fund due consideration has been given to farm products as compared with industry—manufacturing concerns?

Mr. BUCHANAN. The fund has been administered by the Department of Agriculture solely in the interest of agriculture. The only reason it has business with manufacturing concerns is because there is where a great part of the consumption comes from, and from those concerns and industrial centers we must gather the information on consumption of farm products to furnish to the farmers.

Mr. MOORE of Virginia. Will my friend yield?

Mr. BUCHANAN. Surely.

Mr. MOORE of Virginia. My friend just stated that there was a recommendation to increase the appropriation $796,000.

Mr. BUCHANAN. Yes; for a complete service throughout the United States.

Mr. MOORE of Virginia. Does not the gentleman think that if that appropriation were made the Agricultural Department could be trusted to spend it properly and afford to agriculture generally a relief by extending the market service?

Mr. BUCHANAN. That may accord with the gentleman's idea, but in my experience as a member of the committee, when a department gets an appropriation for an amount of money like that there should be regulations and limitations as to the expenditures.

Mr. MOORE of Virginia. The difficulty is we have no method of regulation.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BUCHANAN. I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MOORE of Virginia. There seems to be a very urgent necessity found in many sections of the country for the expansion of this service. We have in my own State a great anxiety for the extension of the service, and the only way we can get any form of extension and in that way some measure of agricultural relief is to have an increased appropriation.

Mr. BUCHANAN. Personally I think the urgency of this matter is mostly a matter of imagination.

Mr. MOORE of Virginia. I do not think so if I may say so; the President the other day pointed out the difficulty found by the potato producers. I know of an important Virginia association engaged in the production of that one crop and it has trouble in securing information, and probably can not get it unless the Department of Agriculture is provided with the opportunity to furnish it.

Mr. BUCHANAN. Does my friend realize that from every central station that information is daily sent out over the earth through more than 100 broadcasting stations, and that a telegram to that station will bring the information desired? It is the idea of some Members that this information is locked up in the bureau and can not be obtained. There is not a word of truth in that. All information and any information at the request of any citizen anywhere will be promptly furnished. It is furnished to the press and is being carried throughout the United States. It is even mimeographed and sent wherever needed.

Mr. MOORE of Virginia. If my friend will yield further, the logic of that statement would seem to be that you might properly reduce the present appropriation.

Mr. BUCHANAN. That very position was taken by my friend from Tennessee [Mr. BYRNS] and by myself and by other Members of this House years ago. This appropriation has increased by leaps and bounds since it was inaugurated, and I tell you that any place that has interest enough to want a local office and local news ought to be required to contribute a small amount to demonstrate that interest and necessity. Therefore I advocate central stations, from which this news could be disseminated under cooperative agreements to every section whenever and wherever demanded.

Mr. McMILLAN. Mr. Chairman, will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. McMILLAN. Would you say that that ought also to be true of the Bureau of Domestic and Foreign Commerce with regard to the manufacturing interests of the country? That information is disseminated through that bureau free of charge, without cost to anyone making inquiries.

Mr. BUCHANAN. Oh, I am not going to get off on a discussion of the Bureau of Foreign and Domestic Commerce.

Mr. McMILLAN. I mention that because that is the bureau that undertakes to disseminate information in line with this to the manufacturing interests of the country.

Mr. BUCHANAN. What does the gentleman mean—publishing trade opportunities in foreign countries? That has no application whatever to this.

Mr. McMILLAN. In the Bureau of Foreign and Domestic Commerce they publish trade opportunities for people at home to secure business.

Mr. BUCHANAN. To secure business in foreign countries.

Mr. McMILLAN. And at home.

Mr. BUCHANAN. They merely publish these opportunities. The Agricultural Department publishes everything that it has, and more.

Mr. McMILLAN. Our people here at home do not pay for that service that they receive.

Mr. BUCHANAN. No; neither do the farmers pay for the service of publication in the newspapers or for literature, or for news sent out over the radio by the Department of Agriculture. I undertake to tell you that the Agriculture Department gives more complete free information to the producers of this country than the Department of Commerce does to the manufacturing interests.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. GREEN. We have in our State of Florida a State marketing bureau. I am wondering if the gentleman knows whether there is a provision in this bill for cooperation with that marketing bureau.

Mr. BUCHANAN. At what place?

Mr. GREEN. Jacksonville.

Mr. BUCHANAN. There is a place at Orlando, Fla., and at Belle, Fla., and at Sanford, Fla.

Mr. GREEN. Our State marketing headquarters is in Jacksonville.

Mr. BUCHANAN. They can get complete information.

Mr. GREEN. Can it be obtained without expense to our State?

Mr. BUCHANAN. I would not say so.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I move to strike out the last word to make this observation, that the estimate of the department was for a complete survey, that if you appropriated the full amount of money asked for it could not be inaugurated in any single year. In view of the fact that we have increased this amount for this service every year, it seems to me that the committee is proceeding with its expansion as fast as good judgment dictates it should be expended. As a matter of fact, all of the money that you want to appropriate is not going to give you the service. What you must have is experience and to work out the system as good judgment dictates. I think the committee has met the demand for an increase in this service when it put in here the amount of the Budget of approximately $100,000. I ask for a vote.

Mr. HARE. Mr. Chairman, I ask unanimous consent to modify my amendment by the substitute which I send to the desk.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to modify his amendment by a substitute which he sends to the desk, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HARE: Page 63, in line 5, after the word "products" strike out the figures "$1,227,000" and insert in lieu thereof the figures "$2,023,000."

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. HARE. Mr. Chairman, I rise for the purpose of stating that this substitute is offered for the purpose of conforming to what the chairman said the department said in its investigation would be a sufficient amount to give complete market news to the entire country.

Mr. DICKINSON of Iowa. And the gentleman admits that that would be inaugurating the service all in one year, without gradual development or expenditure.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina.

The question was taken; and on a division (demanded by Mr. HARE) there were—ayes 48, noes 59.

So the amendment was rejected.

Mr. JONES. Mr. Chairman, I ask unanimous consent to return to page 61 for the purpose of moving to strike out the proviso beginning on line 16.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to return to page 61 for the purpose of offering an amendment. Is there objection?

There was no objection.

Mr. JONES. Mr. Chairman, I offer that amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JONES: Page 61, beginning in line 16, strike out the proviso, ending in line 19.

Mr. JONES. I do not think there is any objection to the amendment.

Mr. DICKINSON of Iowa. There is no objection to that.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Texas.

The amendment was agreed to.

The Clerk read as follows:

In all, salaries and expenses, $4,662,933.

Mr. SCHAFER. Mr. Chairman, I move to strike out the last word and ask unanimous consent to proceed out of order for five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin? [After a pause.] The Chair hears none.

Mr. SCHAFER. Mr. Chairman, I do not think I will take five minutes. I desire to call to the attention of the House that a few days ago there was considerable discussion on this floor concerning the plan of apportionment which would exclude aliens from the total count of the population as a basis for apportionment. At this time I merely want to read into the RECORD a letter which appears to substantiate some of the statements I made the other day. At a later date I will present some important facts bearing on the matter. This letter, which was sent to all Members of the House and Senate, was from William H. Anderson, general secretary American Protestant Alliance, reads as follows:

AMERICAN PROTESTANT ALLIANCE,
New York City, December 18, 1928.

To the Members of the Senate and House:

It was charged last Saturday on the floor of the House that a proposal to amend the Constitution of the United States to provide for the exclusion of aliens from the total count of the population as a basis for the apportionment of congressional districts, the precedent for which is found in the New York State constitution, was inspired by the Anti-Saloon League and the klan.

If it were a mere question of credit, time could settle it, since the record is conclusive. But when an attempt is made to obscure the merits of such a fair and vital proposal by raising false issues, establishment of its origin becomes vital to the cause.

I originated this proposal, and am not and never have been a member of the klan. It was first proposed nearly 10 years ago. I included it in a dry enforcement manual written, published, and copyrighted by me in 1921. It was actually introduced in the House at my request by Mr. STALKER a year ago, on December 15, 1927, as H. J. Res. 102. The klan has never indorsed it, though, so far as I know, klansmen individually generally approve it.

This disposes of the charge of klan origin. The charge respecting the Anti-Saloon League is partly true, in that I was superintendent of the Anti-Saloon League of New York when I first made and published this proposal. While the Anti-Saloon League has never formally indorsed it, its national president and national superintendent have approved it from the prohibition angle. Undoubtedly the constituency of the dry organizations will approve it as a matter of fundamental justice. Why should citizens of the United States in the larger cities (merely because they are entirely surrounded by aliens) have more proportionate representation in Congress than an equal number of citizens living where there are no aliens?

This proposal raises no religious issue. The American Protestant Alliance, which is behind it, makes no attack upon any system of worship or the religious faith or belief of any person. While it is being pushed on its merits as a strictly American proposal, I admit it will put a terrible crimp in Tammany and the Tammany sort of wet political organizations and the wet and alien forces behind Tammany.

Yours very truly,

WILLIAM H. ANDERSON,
General Secretary American Protestant Alliance.

Mr. BLACK of New York. Will the gentleman yield?

Mr. SCHAFER. I will.

Mr. BLACK of New York. Does not the gentleman think that he should reserve that letter for insertion in the RECORD as a public document until the new administration comes in? These fellows are not responsible for this administration, but are for the next administration.

Mr. SCHAFER. The facts do not substantiate the gentleman's contention.

If he will carefully scan the returns of the last election, he will find that nearly all of the States carried by Governor Smith are strongholds of the Ku-Klux Klan and dry forces.

The Clerk read as follows:

COMPLETION OF WOOL WORK

To enable the Bureau of Agricultural Economics to complete the work of the domestic wool section of the War Industries Board and to enforce Government regulations for handling the wool clip of 1918 as established by the wool division of said board, pursuant to the Executive order dated December 31, 1918, transferring such work to the said bureau, $8,000, and to continue, as far as practicable, the distribution among the growers of the wool clip of 1918 of all sums heretofore or hereafter collected or recovered with or without suit by the Government from all persons, firms, or corporations which handled any part of the wool clip of 1918.

Mr. BYRNS. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I do so for the purpose of asking the gentleman in charge of the bill a question. This appropriation has been carried for a great number of years. I have had something to say in regard to it for a number of years past each year, and each time I have gained the impression that the work was going to be completed, and it would not be carried in a future bill, but I note that every year it comes along with exactly the same language, to complete the work, and $8,000 is provided. I understand there are two or three employeed in the Department of Agriculture to carry on this supposed work. Now, this work has gotten to a point where I can not understand why it is necessary to keep one or two employees, at a good salary, and probably a clerk or secretary, on the rolls while these suits are pending; and the charge has been made, and made deliberately in this House and on the outside, that these suits have been deliberately held up, and those in charge of the work there have not been pressing them as they should be, and that, as a matter of fact, if it were not for their delay they would have been settled long ago. In fact, the issue could and would have been settled long ago had not the Government, acting, no doubt, on the advice of these very employees, abandoned an appeal from an adverse decision in one of the inferior Federal courts.

It seems to me there ought to be a conclusion. If it is necessary to look after the suits that are pending, the cases should be turned over to the Department of Justice. Why continue this appropriation merely to keep somebody in a job year after year?

Mr. DICKINSON of Iowa. Mr. Chairman, will the gentleman yield?

Mr. BYRNS. Yes.

Mr. DICKINSON of Iowa. On page 503 of the hearings you will find the following statement showing the present status of this work:

	Number of dealers	Excess profits
Total ascertained 1918 excess wool profits	1,058	$1,511,552.03
Excess profits—		
Collected	1,002	760,702.91
Distributed to growers		453,669.36
Held because paid under protest		48,887.38
Undistributable (can not locate growers)		249,310.39
Uncollectible (included in above total ascertained), due to insolvency of dealers or adverse court decisions not determinative of the facts	28	70,623.98
Yet to be collected	28	680,225.14
Cases pending with Department of Justice	20	654,581.72
Cases pending with Department of Agriculture	8	25,643.42

Those are cases pending in the Department of Agriculture and the Department of Justice at this date. On the next page, page 504, you will find this statement:

The present appropriation item of $8,000 is to cover salaries, travel, and other expenses incident to the trial of pending cases and the incidental audit of new cases which may be received. The entire salary of an accountant and auditor, amounting to $3,200, is carried in this appropriation, as he has been engaged on this work for a number of years, has audited the cases still pending, and his testimony is absolutely essential in connection with the trial of pending cases. The only other salary now carried under this appropriation is that of one stenographer and general clerk ($1,800) who is familiar with the details of this work, and devotes part of her time to other work.

Now, we had this question up at the suggestion of the gentleman from Tennessee as to whether or not we could abandon this item. This man, when you come to the trial of the case, is necessary. He would aid in presenting the data gathered on the part of the Government. I do not think, if we struck out this item and the man were lost, that you could successfully prosecute these cases. One case went to the Supreme Court and was dismissed. The department insists that it simply involves the merits of this controversy. They want to have a case tried on its merits and taken to a higher court.

Mr. BYRNS. If the gentleman will pardon me, that is the same explanation that I received a year ago and two years ago. Of course, the gentleman is giving the explanation that has been given to him by this employee engaged in the so-called work, but that is the excuse that has been given for the past four or five years to my knowledge. Why is it that it takes seven or eight years to have this work concluded and to put that test case through the Federal courts? Without regard to what has been suggested by those interested in one section or another of the country, it leads to the suspicion that there has been no real, genuine effort on the part of those in charge of this work to conclude it, for the reason that when it is concluded, their salaries will cease.

I do not subscribe to the gentleman's idea, that simply because the testimony that could be given by this accountant down there would be valuable to the Government, we ought to keep him on the roll year after year at $3,200. If he is a citizen of the country and has evidence or information of value to the Government, in the first place he ought to be willing to give it, since he secured it while employed by the Government. If he is not willing, then we have laws to compel him to give testimony as to the facts.

This matter ought to be concluded. I do not know for sure whether it was the gentleman from Iowa or his predecessor, who was then in control of this bill, who gave me the assurance, as I understood it, that in another year this matter would be cleared up. I have no assurance now that in the next year's bill this appropriation will not still be carried.

Mr. DICKINSON of Iowa. I have not given such an assurance, but it is my impression that the department, through one of its officials, did make such a statement, depending upon the issue of a former case decided by the Supreme Court, not on the merits of the case itself.

Mr. BYRNS. The gentleman employed down there is an accountant, not an attorney. These cases, of course, that are pending are in the charge of the United States district attorneys in the various districts where the suits have been brought. They are under the Department of Justice. The United States district attorney, of course, gets a salary. Why is it necessary to keep an accountant down in the Department of Agriculture to try a simple suit in the Supreme Court? Why not let the Department of Justice handle these cases?

Mr. DICKINSON of Iowa. The detective gets the evidence, and oftentimes the evidence of the detective has more to do with the winning of a lawsuit than anything else.

Mr. BYRNS. Yes. This man has been in the Agricultural Department for eight years, and the Department of Justice has the power to bring him into court and compel him to tell the court or jury the facts. If we are going to have this man on the salary roll all these years, incurring all this expense, there will not be anything to recover when we get through. Besides the cases are to be tried on the law of the case. If evidence was needed it ought to have been taken long ago. The facts are that there is no justification for this appropriation. It should have been wound up long ago.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

For the control and prevention of spread of the European corn borer, $898,000: *Provided*, That in addition thereto there shall be immediately available for this purpose $50,000 of the $10,000,000 appropriated by the joint resolution making an appropriation for the eradication or control of the European corn borer, approved February 23, 1927 (U. S. C., Supp. I, p. 22, sec. 146).

Mr. KETCHAM. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Michigan moves to strike out the last word.

Mr. KETCHAM. I do this, Mr. Chairman, for the purpose of asking the chairman of the subcommittee to make a statement as to the status of the appropriation that was considered last year in connection with the authorization of $7,000,000 adopted by the Congress in May of 1928 for corn-borer clean-up.

Mr. DICKINSON of Iowa. That appropriation was made available, but there is no appropriation in this bill from that amount.

Mr. KETCHAM. Is the reason for that the fact that this bill covers the operations of the Department of Agriculture for the fiscal year beginning July 1 next; and consequently, if we are to have any immediate value out of any corn-borer clean-up appropriation it would have to come in a deficiency bill for the present year that would make available the funds in the coming spring? Is that correct?

Mr. DICKINSON of Iowa. As a matter of fact, that $7,000,000 was merely an authorization; an authorization, I think, for a year.

If there is any activity under that appropriation, it would have to come under authority of a deficiency appropriation.

Mr. KETCHAM. That is the reason it is not included in this bill?

Mr. DICKINSON of Iowa. Yes; and it would not be included in this bill under any circumstances. This bill merely carries $898,000, which continues the quarantine and eradication work in order to prevent the corn borer from spreading. It carries absolutely nothing for clean-up work. It carries absolutely nothing for the purpose of enabling them to go on a man's farm and assist him in cleaning up his cornstalks. The attitude of the department, as I see it, is that their activities at the present time should be limited to two fields of investigation; first, research investigations, for which there is provided $150,000 out of the old $10,000,000 appropriation, and second, the quarantine work, which provides for quarantine and the stationing of men on public roads to prevent people from taking corn from an infested area into an uninfested area.

They further state that there has been no commercial damage outside of a very small area in the lake section. That being the case, the department's recommendations are only for the quarantine control work and for further research work along the lines suggested. One of the things I want to bring to the attention of the gentleman is that one of the best ways to eradicate the corn borer is by making paper out of cornstalks. I have here an issue of the Prairie Farmer, which is printed on paper made from cornstalks. The cornstalks were collected at Danville, Ill., some of them from the farm of the gentleman from Illinois [Mr. HOLADAY]. It was made into pulp there; from there it was taken to Kalamazoo, Mich., and there put into paper, and this edition of the Prairie Farmer is printed on paper made out of cornstalks.

Mr. BUCHANAN. Will the gentleman yield?

Mr. DICKINSON of Iowa. If I have the floor, I will yield.

Mr. BUCHANAN. It was manufactured from cornstalks into paper in eight hours.

Mr. DICKINSON of Iowa. I thank the gentleman for that suggestion. If we are going to be able to use cornstalks for a matter of this kind we are going to have one of the best clean-up methods you could possibly have anywhere, because you will take the home of the corn borer and make it into paper rather than leave it in the field, where the corn borer can hibernate.

Mr. KETCHAM. Specifically I want to ask the gentleman whether or not under the present situation of this authorization the Committee on Appropriations can consider or has any idea of considering recommendations for a $7,000,000 clean-up appropriation at this session of Congress?

Mr. DICKINSON of Iowa. We have nothing before us, and we can only consider those things which come before us in the regular way.

Mr. KETCHAM. Do I understand that last year the usual procedure was taken and that the Department of Agriculture reported to the Budget and that the Budget, through the President, made a recommendation to your committee, and the appropriation was considered but it was not included in a deficiency bill because of the lack of time; is that correct?

Mr. DICKINSON of Iowa. That is correct.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. KETCHAM. Mr. Chairman, I ask unanimous consent to proceed for one additional minute.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to proceed for one additional minute. Is there objection?

There was no objection.

Mr. KETCHAM. I would like to inquire whether it is the position of the Committee on Appropriations that a new recommendation must be made, and that the previous recommendation does not hold over from the first session of the Seventieth Congress to the second session but must be begun again? In other words, you will take no action on last spring's recommendation one way or the other unless a new recommendation comes through the regular channels, as though it had not been previously recommended?

Mr. DICKINSON of Iowa. I think that would be our position.

Mr. KETCHAM. I want to get this exactly correct. That is a correct statement of the committee's position?

Mr. DICKINSON of Iowa. Yes.

Mr. KETCHAM. I am emphasizing this point because there are a number of States vitally interested in this appropriation, and I want to know exactly what the status of the matter is. I thank the gentleman for his response.

The pro forma amendment was withdrawn.

Mr. SMITH. Mr. Chairman, I move to strike out the last two words. I understood the gentleman to say that his committee can consider nothing that does not come before it. I assume that means comes through the Budget. Is that correct?

Mr. DICKINSON of Iowa. Well, our recommendations as a committee, as I understand it, are based on Budget recommendations. We can consider an increase in an amount or a new item in a project. For instance, under plant industry we could go out anywhere and take on a new plant, but we could not put into an appropriation bill an entirely new item, which would be an absolutely new project, without some legislative authority.

Mr. SMITH. Unless it is estimated for?

Mr. DICKINSON of Iowa. Unless it is estimated for; yes.

Mr. SMITH. In other words, a matter brought to the attention of your committee by a Member of Congress, something relating to his district, can not be considered by the Committee on Appropriations unless it has been estimated for; is that correct?

Mr. DICKINSON of Iowa. Oh, no; unless it is authorized in some law that has been heretofore passed.

Mr. SMITH. Suppose it is for the increase of an appropriation?

Mr. DICKINSON of Iowa. We can consider that.

The pro forma amendment was withdrawn.

The Clerk completed the reading of the bill.

Mr. HOUSTON of Hawaii. Mr. Chairman, I move to strike out the last word.

I wish to take this opportunity of making some remarks upon the estimates for the Weather Bureau. In view of the fact that the bill was not available to the Members until the day upon which it was introduced and that the Weather Bureau section of the bill was read for amendment on the same day, I was not able to prepare the information at that time.

The Pacific Ocean is one of the largest bodies of water in the world and the water areas in the world are three-fourths of the whole world area. In this section, for the Weather Bureau, there is included an increase of appropriations of $20,000 for marine observations in the field, all of which is to be expended in the Atlantic Ocean. None of it is for extension in the Pacific Ocean.

I have here a letter from the Director of the Weather Bureau in which he says, "Of course, the amount of money is quite inadequate to indicate current weather conditions in an area as large as the Pacific Ocean."

It is a fact that upon one of the sample charts that is issued by the Weather Bureau, the whole weather forecasts in that ocean are predicted, for example, on this particular chart of January 5, 1922, upon five ship observations, besides the shore observations.

When we are trying to increase our sea-borne commerce, we must provide accurate methods by which the weather may be known to the operators on the sea, and the marine part of the Weather Bureau service must be organized not only upon the Atlantic Ocean but in the Pacific Ocean as well.

The estimates that were given to me as necessary to start the work in the Pacific, and increase it at least appreciably, were $5,000 and I would have submitted such an estimate upon page 16 of this bill had I had the opportunity of getting the information in proper time.

I simply now wish to call attention to the lack of information that is available in the Pacific Ocean for American and world commerce.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that the clerk be authorized to correct the totals in the bill.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. DICKINSON of Iowa. Mr. Chairman, I move that the committee do now rise and report the bill back to the House, with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LUCE, Chairman of the Committee of the Whole House on the state of the Union, reported that the committee, having had under consideration the bill H. R. 15386, the agricultural appropriation bill, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and the bill as amended do pass.

Mr. DICKINSON of Iowa. Mr. Speaker, I move the previous question on the bill and all amendments thereto to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Upon motion of Mr. DICKINSON of Iowa, a motion to reconsider the vote by which the bill was passed was laid on the table.

COMMITTEE TO INVESTIGATE NORTHERN PACIFIC LAND GRANT

The SPEAKER. To fill a vacancy on the Joint Committee to Investigate the Northern Pacific Land Grant the Chair appoints the gentleman from Iowa [Mr. LETTS].

COMMITTEE TO INVESTIGATE CAMPAIGN EXPENDITURES

Mr. SNELL. Mr. Speaker, I offer the following resolution and ask unanimous consent for its immediate consideration.

The Clerk read as follows:

House Resolution 271

Resolved, That House Resolution 232, creating a special committee to investigate and report to the House on campaign expenditures, be, and the same is hereby, amended so that the functions of said committee and the time for making its report to the House are extended from January 1, 1929, to March 1, 1929.

The SPEAKER. Is there objection to the present consideration of this resolution?

Mr. CRISP. Mr. Speaker, reserving the right to object, is this satisfactory to the minority?

Mr. SNELL. I was about to say that I have consulted the minority leader and some members of the committee, and it is perfectly satisfactory. The work they did was continued so late in the session that it is absolutely impossible for them to complete the report on the 1st of January, and we are extending the time to the 1st of March.

The SPEAKER. Is there objection?

There was no objection.

Mr. SNELL. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

RESOLUTION MAKING IN ORDER CERTAIN LEGISLATION

Mr. SNELL, from the Committee on Rules, presented a report of that committee on House Resolution 273, making in order certain legislation, which was referred to the House Calendar and ordered to be printed.

Mr. MOORE of Virginia. Would the gentleman from New York mind telling us what those bills are?

Mr. SNELL. Those are judges bills, one for the southern district of New York, one for the eastern district of New York, one for an additional judge for the second judicial circuit, and one for the southern district of Florida.

AMENDING CLAUSE 4 OF RULE XI

Mr. SNELL, from the Committee on Rules, submitted a report on House Resolution 261, amending clause 4 of Rule XI of the rules of the House of Representatives, which was referred to the House Calendar and ordered to be printed.

AMENDING RULE X

Mr. SNELL, from the Committee on Rules, submitted a report on House Resolution 272, providing for the amending of Rule X for the appointment of committee on memorials, which was referred to the House Calendar and ordered to be printed.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 5773. An act to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes;

H. R. 14801. An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes; and

H. J. Res. 352. A joint resolution for the relief of Porto Rico.

The SPEAKER announced his signature to an enrolled bill and joint resolution of the Senate of the following titles:

S. 4302. An act to authorize the Secretary of Commerce to convey the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., as a memorial to commemorate the battle of Fort Fisher; and

S. J. Res. 167. A joint resolution limiting the operation of sections 198 and 203 of title 18 of the Code of Laws of the United States.

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee did on this day present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H. R. 5773. An act to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes;

H. R. 14801. An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes; and

H. J. Res. 352. A joint resolution for the relief of Porto Rico.

APPROPRIATION BILL FOR DEPARTMENTS OF STATE AND JUSTICE, THE JUDICIARY, AND FOR DEPARTMENTS OF COMMERCE AND LABOR

Mr. SHREVE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 15569) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1930, and for other purposes; and pending that I will ask the gentleman from Alabama if we can agree on the time for general debate?

Mr. OLIVER of Alabama. I have requests at the present time for about two hours.

Mr. SHREVE. Mr. Speaker, I ask unanimous consent that general debate be limited to four hours, one-half of the time to be controlled by the gentleman from Alabama [Mr. OLIVER] and one-half by myself.

The SPEAKER. The gentleman from Pennsylvania moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15569, and pending that he asks unanimous consent that general debate on the bill be limited to four hours, two hours to be controlled by himself and two hours to be controlled by the gentleman from Alabama [Mr. OLIVER]. Is there objection?

There was no objection.

The motion of Mr. SHREVE was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union, with Mr. LEAVITT in the chair.

The Clerk read the title of the bill.

Mr. SHREVE. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. TILSON. May I ask the gentleman from Alabama if the gentleman from New York [Mr. SIROVICH] may have time tomorrow, because he gracefully yielded the other day when he asked to have a fixed hour?

Mr. OLIVER of Alabama. In my estimate of time I had in mind an hour for the gentleman from New York.

Mr. SHREVE. Mr. Chairman, I yield to the gentleman from New Jersey [Mr. ACKERMAN] 40 minutes.

Mr. ACKERMAN. Mr. Chairman and members of the committee: Among the great departments of our Government for which this bill makes appropriations is the Department of State. It is probable that at only one other time in the history of our country has the work of this department reached the proportions in which it is being handled to-day. That time was preceding our entry into and during the World War.

Some of the current problems in which new developments are noted almost daily are quite as important and contain elements of as far-reaching effect as some of the memorable notes exchanged with the European powers at that time.

KELLOGG PACT

I refer particularly to the multiple treaty for the outlawing of war, now reported to another body for ratification. When the history of the world for the year 1928 shall come to be written there will be recorded beyond peradventure as its crowning achievement the signing by 15 nations on August 27 of the Briand-Kellogg pact for the renunciation of war as a means for the settlement of international differences.

That this accomplished fact is no mere gesture is readily grasped when it is recorded that a large number of other nations have joined the original signers, which group comprised with a single exception the principal nations of the world.

When it is said that the governments of the world, all but six, have expressed willingness to join in this crusade for the renunciation of force the impetus that has been given to the idea that peace on earth is devoutly wished for, is greatly strengthened and the attainment thereof becomes perceptibly nearer.

The frightful toll in human life that war exacts has permeated to the marrow of every government, producing the conviction that if so-called civilization is to long endure the thoughts of using barbaric methods must be eradicated from the catalogue of activities constituting national existence.

PLANTING SEED

Planting the seed in the mind of nationals that armed conflict has no longer a part in the national formula for sustaining honor and dignity, the expectation bids fair of realization that as "great oaks from little acorns grow" we, too, may see our fondest hopes in this particular fulfilled.

A President of the United States once remarked that it did not make so much difference as to the length of the step as to the direction in which it was taken.

The right direction happily has been sensed as well as the step taken. True, police protection and insurance are still to be regarded as of great value. The Army and Navy are not to be abandoned, but if in the course of time, as the beneficence of the idea, that of renunciation, grows and becomes a fixed reality, a reduction of a part of six hundred and seventy millions annually in our present cost for maintenance might eventually be possible.

If the entire burden of armament throughout the world could be lifted, the sum of three billions annually, we are told by experts, could be otherwise expended. What a fund for the amelioration of mankind, in the eradication of slums, the building of improved highway construction, the creation of playgrounds for children, so that their bright young lives would have safe places in which to expend their youthful energy, and for other uplifting operations.

The ceremony at Paris was in complete harmony with the simplicity of the compact. Including the ambassadors and their staffs, not over 300 persons were present. The clock room of the foreign office would not hold any more. The American ambassador, Mr. Herrick, had only two score of tickets to satisfy the demand of the Americans.

HIGHLY HONORED

To be one of those favored was the honor which was highly appreciated. The barrage of cameras and moving-picture machines was not only imposing, but it was formidable.

I counted over a score of installations for permanently recording this historic event. Hitherto I was somewhat familiar with the mechanical devices necessary for formal occasions similar to inaugurations and conventions. But this occasion surpassed them all in the multiplicity of the devices for the recording for posterity the momentous occasion. The event taking place in an interior, huge searchlights of a million candle power were ranged out of doors, their focus being trained on the table where the signatures were affixed, the object being to produce adequate light for the proper accomplishment of the work of the photographic operators. When the electricity was turned on, the heat generated was noticeable to a marked degree. This condition being foreseen, special fire-fighting apparatus stood ready for services. Fortunately its help was not needed.

AMBASSADORS ENTER

When the ambassadorial procession approached the salon the invited guests, according to the usages of polite custom, arose in their places to pay due deference to the notables about to enter. This interfered with the photographic line of vision. Many insistent and prolonged cries of "be seated," "sit down," were violently ejaculated, thus marring the solemnity of the occasion. When Secretary Kellogg came to attach his signature

to the pact he was overcome with emotion, the evidences of which were plainly visible before he brushed them away.

That the United States should have contributed in such a marked degree to this epochal proceeding is most fitting, and the American people will hasten to give full credit to all who have had a part in this great achievement.

It would be impossible to overestimate the tact, the candor, the patience, and the unflagging industry of Secretary Kellogg in attaining this epochal achievement.

Surmounting every obstacle, he has reached a pinnacle of useful endeavor seldom if ever equaled.

LATIN-AMERICAN RELATIONS

Colonel Lindbergh's flight to the countries of Central America had great value in our relations with those countries. Quick to see the possibilities of improving our means of communications with them, arrangements are now practically complete to have each of those nations tied to the United States by means of daily mail-plane flights over established courses. These may easily be extended as required, so that it is well within the realm of possibilities to see in the not-distant future not only mail but passengers and freight transported by the same means. Sections now somewhat isolated and remote will become practically a part of our own land.

As we saw a few weeks ago when the *Graf Zeppelin* was here, we will undoubtedly see dirigibles carrying mail, passengers, and freight to the Latin-American and South American countries. I hold in my hand one of those letters, postmarked on the face of it October 28, 1928, on this side of the Atlantic, and on the back there is a receiving postmark of Friedericks-hafen, in Germany, of November 1—only three days in time being required for communications leaving America to reach the German Republic.

In this connection, I wonder how many of the membership of this House know that the postal laws have been so reorganized that it costs no more for an American to send a letter from Washington to any country in Central America or South America—with two exceptions, Dutch Guiana and French Guiana—for the same 2-cent stamp that you use in mailing a letter from here to the Treasury Department or to New York City? That shows that the United States is quite up to date as far as postal facilities are concerned.

There is no part of the world in which the United States has a deeper and more friendly interest than Latin America. Our relations with the Latin-American countries during the past year have been very satisfactory. During the year 1927 American trade with Latin America amounted to over $2,000,000,000, or 40 per cent of the total foreign trade of Latin America. It is estimated that American investments in Latin America now reach more than $5,000,000,000. During the year 1927 alone, the State Department informs us, $335,000,000 worth of Latin American government obligations were purchased by citizens of the United States. There are in the Latin-American field 47 diplomatic and 149 consular officers of the United States.

One of the most important events in 1928 in connection therewith was the Sixth Pan American Conference at Habana. It seems needless to point to the results of that conference as they have been universally described as beneficial by the public press and by our delegates as well as by the President and the Secretary of State. The conference covered matters of an inter-American juridical nature, problems of inter-American communications, intellectual cooperation among the Americans, inter-American economic problems, and inter-American social problems, all of which are of vast importance to the United States.

Almost as though "coming events had cast their shadows before," a treaty division was established last spring in the Department of State. It is now possible to give specialized attention to the important questions of treaties between this country and other countries.

SEVEN HUNDRED TREATIES

The United States has some 700 treaties. Some of them are of a permanent character, such as treaties of peace and boundary. Others require revision from time to time to meet new conditions which may arise. Eighty-five of the treaties are commercial treaties or commercial agreements. A large number of this class no longer meet present requirements because conditions have changed since they were concluded. Of the 26 general commercial treaties to which the United States was a party at the close of the war, 19 were concluded prior to 1885 and 7 of these prior to 1850.

Anyone acquainted with the changes in trade relations, manufacturing competition, and in other directions must realize that these treaties must fail to meet present requirements. With some of the important countries, especially some of the new countries which came into existence as the result of the war settlements, the United States has no general commercial treaties.

The clauses embodied in the tariff law of 1922 have made it necessary to negotiate a new series of commercial treaties. The older commercial treaties were based generally on the conditional most-favored-nation principle. The unconditional most-favored-nation principle results necessarily from the tariff act of 1922. These new treaties have generally taken the form of treaties of friendship, commerce, and consular rights. Only eight such treaties have so far been concluded since 1922, those with Austria, Estonia, Germany, Honduras, Hungary, Latvia, Norway, and Salvador.

There are many other classes of treaties urgently requiring attention, such as consular conventions, conventions on maritime law, conventions in regard to naturalization, extradition, arbitration, liquor smuggling, industrial property, and copyrights. Within the past year there have been proposed to foreign governments by the United States 32 treaties of arbitration and 15 of conciliation. Eleven treaties of arbitration have been signed, 7 treaties of conciliation, 3 of friendship, commerce, and consular rights, and 11 others.

OFFICE OF THE LEGAL ADVISER

One of the most interesting and important branches of the Department of State, and one concerning which more should be heard, is the office of the legal adviser. It is that office, headed by the solicitor, that gives legal advice to the Secretary of State and other offices of the department and which determines what shall be done with the many international claims filed against the United States or by the United States against foreign governments.

Through that office collections have also been made from various foreign governments of a number of claims during the past year ranging from $500 to $80,000 each, and correspondence with various foreign governments is now in progress for the collection of claims of numerous American citizens aggregating many millions of dollars. One of these claims amounts to $13,000,000.

This office has been engaged recently in the preparation of approximately 450 claims filed by American citizens against Turkey and in correspondence with 750 prospective claimants preparatory to the discussion of claims with representatives of the Turkish Government. These claims aggregate some $6,500,000.

The solicitor has defended the United States against a number of claims by foreign governments growing out of the alleged detention of ships and expropriation of property by the United States during the World War and out of alleged excessive taxation and default in obligations of the Government of the United States to former American Indians now in Canada. Two of these claims amount to more than $3,000,000.

The solicitor's office distributed the awards in favor of 29 American claimants, made by the American-British Arbitral Tribunal, established pursuant to the convention of 1910, in the amount of approximately $75,000. Some of the claims arose more than half a century ago and much difficulty was experienced in determining, in the light of assignments, bequests, and court decrees, who the rightful beneficiaries of the awards were.

This office handled several cases before the International Joint Commission, United States and Canada, involving boundary waters between the two countries and conflicting interests of American and Canadian citizens arising along the boundary.

The office participated in the proceedings of the International Radio Conference held in Washington in 1927, and in the preparation for participation in the International Telegraph Conference held in Brussels from September 10 to 22, 1928. It has participated in the conferences on the revision of the navigation laws of the United States and in the preparation of numerous memoranda for the American delegates to other international conferences. In brief, the office of the solicitor advises not only the Secretary of State in matters of law but virtually every American delegation to an international conference and the American representatives on virtually all international commissions.

RATIOS

It is very popular at the present time to talk about ratios—especially in connection with naval affairs. For my own part I am not only willing but thoroughly indorse any proposition that is deemed essential to safeguard this country and protect its citizens and activities. Doubtless there are many that will agree with me. Why, then, should there not be such a ratio of helpfulness to the activities which furnish the foundation reason for there being a navy or an army?

As our commerce increases, the stimulus that fostered it, perhaps really instituted it, should not be attenuated or curtailed. The growth of commerce should be continually nurtured and watched, and the vision that only sees as far as the moment is not the kind that can prosper in the hectic rivalry that is the order of the day. The amounts expended for trade promotion are analogous to seed being planted in fertile soil which have

brought forth in many instances not only a hundred but a thousand fold. I heartily indorse the principle of economy, and whatever energy I had had or can exercise in the future will be directed to that end, but with the strong competitive conditions existing throughout the world it will not do to ignore opportunities as they come knocking at our doors. We must seize psychological opportunities.

Years of association with these hearings enables the committee to appreciate the intense and increasing interest that the Members of the House are manifesting in connection with trade expansion, for their constituents are pleasantly tasting to a limited degree the fruits of the progress that has been accomplished, and their appetite having been whetted, they are naturally demanding more.

FOREIGN TRADE PROMOTION

Now let us for a few moments consider the trade situation of the world to-day as it comes to us through the Bureau of Foreign and Domestic Commerce.

America's expenditures on her foreign trade promotion are not as large as those of our principal trade rivals. On a per capita basis our Canadian neighbors will spend nearly twice as much as we will during the present fiscal year. If the appropriations of the Bureau of Foreign and Domestic Commerce were on the same basis as those of the Canadian Commercial Intelligence Service, the United States would spend $8,196,888 instead of $4,257,357.

On the basis of current appropriations and 1927 export figures American expenditures on trade promotion are only 76 per cent of those of the British Department of Overseas Trade. In other words, it would require an increase of $1,310,000—from $4,257,357 to $5,567,357—to make the appropriations of the Bureau of Foreign and Domestic Commerce equivalent to those of its British rival.

Even Japan is spending more proportionately than the United States. Considered on the same basis as Great Britain it would be necessary to increase the bureau's appropriations by $763,000—from $4,257,357 to $5,020,357—to make them equivalent to the Japanese expenditures.

These figures do not tell the entire story by any manner of means. Take Great Britain as an example. The British Government has undertaken to spend approximately $48,500,000—or at the rate of $4,850,000 a year for 10 years—on the promotion of the sale of empire products within the empire. Although this is primarily a domestic sales campaign, it has a direct bearing on American trade, not only in the British Isles but also throughout the British dominions and colonies, which, taken as a unit, constitute our most important single market. In fact, 42 per cent of our total foreign commerce is with the empire.

Again, the British Government will spend in their fiscal year 1928–29 the sum of $437,500 on the export credits guaranty department, an increase of $185,000 over the 1927–28 appropriation. Since 1920 a revolving fund of $126,000,000 has been set up to take care of the commitments guaranteed under this single piece of legislation which is directly concerned with British trade expansion.

Another type of indirect trade promotion on behalf of British trade is found in the East African loan act under which a revolving credit of $48,600,000 has been created for the development of transportation facilities, such as railroads, roads, and harbors, in British East Africa. A large part of these credits will, it is expected, be utilized in the development of commerce in British machinery and equipment.

The growing importance of promotion activities in international trade is further emphasized by other examples. France is proposing to spend in 1929 over 25,000,000 francs on certain phases of her export drive. This does not tell the whole story, as this represents only part of the official expenditures. Due to the interlocking relations between the French trade-promotion bureau and French chambers of commerce, there are other expenditures which are not in the official budget.

Italy will spend in her fiscal year 1928–29 nearly seven and a half million lire for some of her trade activities. This does not include semiofficial items, such as are represented by the recent floating fair of Italian products which toured Latin America, displaying the best Italy could supply in many lines, the total value of the exhibits alone being 5,000,000 lire.

Australia furnished another interesting example. In London and Paris this enterprising dominion is spending, according to the 1927 Australian Yearbook, about $125,000 a year at each post for trade promotion. In the fiscal year ending June 30, 1929, the Bureau of Foreign and Domestic Commerce will spend $99,750 in the United Kingdom and $90,025 in France. Even the Union of South Africa is in some respects spending more money than the United States. For instance, at Milan, Italy, where both countries have offices, South Africa has a budget of $55,000 as compared with an American expenditure of $7,310.

The following table is inserted to show amounts appropriated for promoting our trade and the products or industries to which these sums are applied:

Appropriations for fiscal year 1928–29

[Compared with the value of trades or products of industries served]

Industries or trades	Federal appropriations available directly for promotion work (nonregulatory functions) 1928–29	Value of product of industries served, 1926 or 1926–27	Appropriation per million dollars of product
Agriculture	[1] $35,349,884	[1] $13,000,000,000	$2.719
Mining	[3] 4,419,100	[4] 5,520,000,000	800
Manufactures	[5] 4,294,255	[6] 62,714,000,000	68
Fisheries	2,140,748	135,000,000	15.857
Foreign commerce	[7] 5,972,690	[8] 9,023,000,000	662
Domestic commerce	290,000	[9] 70,000,000,000	4.1

[1] Does not include appropriations for such regulatory services as meat inspection, enforcement of grain futures act, enforcement of packers and stockyards act, etc., nor appropriation for "Forest Service," "Public roads," and "Flood relief."
[2] Estimated value of all farm products, 1926–27.
[3] Includes Bureau of Mines and Geological Survey appropriations, and two items of Bureau of Standards.
[4] Estimated value of metal and mineral products, 1927.
[5] Includes appropriations for Census Bureau and Bureau of Standards.
[6] Total value of manufactures of United States for 1925.
[7] Includes appropriations of the Bureau of Foreign and Domestic Commerce (less item of $290,000 for Domestic Commerce), and one-third of funds of Consular Service. Other two-thirds of consular appropriation is assumed to be for consular routine and regulatory functions.
[8] Total foreign trade in 1927–28 (exports plus imports).
[9] Excluding duplication; including the many resales the figure would probably be doubled.

Up to this point my remarks have been almost exclusively directed to European or, at least, Eastern Hemisphere countries. I feel it will be of interest and value in this discussion of trade-promotive activities to show at this time a comparison of imports into several of the nations located in the Western Hemisphere. These tables show not only the amount of goods imported but the place of origin and their percentage of the country's total importations:

CANADA

United States exports to Canada and expenditures by Bureau of Foreign and Domestic Commerce in Canada for trade promotion

	United States exports to Canada	Amount spent by bureau				
		Ottawa	Montreal	Toronto	Vancouver	Total
1924	$624,031,000	$15,027				$15,027
1925	648,768,000	18,866	$3,324			22,190
1926	738,568,000	22,620	7,762	$3,612		33,994
1927	836,532,000	24,423	8,561	6,579	$9,600	49,163
1928	[1] 769,505,000					

[1] First 10 months of 1928.

BRAZIL

Imports into Brazil from Europe and the United States and expenditures by the Bureau of Foreign and Domestic Commerce in Brazil for trade promotion

Year	Europe		United States		Amount spent by bureau
	Dollars	Per cent of total	Dollars	Per cent of total	
1923	138,587,000	55	51,740,000	22	$23,580
1924	177,627,000	58	73,808,000	24	37,406
1925	236,246,000	57	102,263,000	24	48,194
1926	212,285,000	54	114,626,000	29	40,043
1927	208,563,000	53	111,186,000	28	55,011

The bureau maintains offices at Rio de Janeiro and Sao Paulo.
Area: Brazil, 3,276,358 square miles; United States, 3,026,789 square miles.

ARGENTINA

Imports into Argentina from Europe and the United States and expenditures by the Bureau of Foreign and Domestic Commerce in Argentina for trade promotion

Year	Europe		United States		Amount spent by bureau
	Dollars	Per cent of total	Dollars	Per cent of total	
1923	439,331,000	64.4	142,539,000	20.9	$28,750
1924	410,351,000	63.4	142,722,000	22.0	34,729
1925	491,487,000	61.3	188,487,000	23.5	47,949
1926	442,213,000	58.3	186,886,000	24.7	52,840
1927	(1)		(1)		54,537

[1] Figures not available.
Area: Argentina, 1,153,417 square miles; United States, 3,026,789 square miles.

Mr. HARE. Mr. Chairman, will the gentleman yield?

Mr. ACKERMAN. Yes.

Mr. HARE. The gentleman speaks of the great increase in exports to Canada and these other countries. Speaking particularly of Canada, does the gentleman attribute that increase to the services rendered by the Bureau of Foreign and Domestic Commerce?

Mr. ACKERMAN. To a great degree, to an increasing degree, and the amount of money that we have expended at the present time, furnished to the Bureau of Foreign and Domestic Commerce, for expansion of trade in Canada is a few dollars less than $50,000.

Mr. HARE. The gentleman has made some very interesting statements, and I am very grateful to be able to listen to them. I am very much interested to note that the United States is quite able to compete in foreign markets with goods produced in foreign countries.

Mr. ACKERMAN. Yes.

Mr. HARE. Would the gentleman mind giving us his observation as to how we are able to do that, in view of the fact that our wage standard is so much higher here than in other countries.

Mr. ACKERMAN. I think it is the method of approach adopted by our American commercial representatives and attachés.

The splendid work of the State Department under Secretary Kellogg is ably supplemented by what is being done by the Department of Commerce, and the active cooperation of these two great forces so vigorously maintained and increasingly active is a welcome omen for an increase in volume which will surpass all previous records. That this will redound to the benefit of agriculture and contribute toward an improvement in any so-called farm problem there can not be the slightest doubt.

In London, Mr. Cooper, our commercial attaché, I have personally observed, has a splendid location for quickly reaching the English buyers, but the facilities of the office are far too small for the enormous increase of inquiries that have been worked up for American goods. The prime location at Bush House, Aldwych, right in the center of London's activities, must be permitted to function to the highest degree and some means must be found to give our representatives this, the additional quarters which I saw were urgently needed.

In Paris, where the offices are located in the chancellerie the close contact with the embassy proves of great value. Here is the great mart of Europe with its finger on the pulse beats of every nation without exception, not even excluding the soviets. It requires wisdom of the highest order to handle these problems and that standard is maintained by the fine force where the Commerce Department is functioning in the Rue de Chaillot.

OVERCOMES DIFFICULTIES

In Belgium, and especially in Brussels, the Commerce Department's force of trained observers is making increased headway in competition with the great nations of Europe. Here is another spot where further consideration could be given to the additional facilities, very much needed, which would produce an abundant harvest. Belgium, although a small country territorially considered, is a beehive of industry, its network of railways being amply supplemented by a series of canals which allows of its products being transported at minimum cost, while the wages paid industrial workers do not exceed on the whole 25 per cent of what is paid in the United States. Necessarily, therefore, great skill and consummate tact must be exercised in getting favorable consideration for the products of the United States. Messrs. Hunt and Miller, of the Commerce Department's staff in Brussels are valiantly upholding the fine tradition of their offices, and are being rewarded by seeing American goods increasingly used.

The Press fair in Cologne, that great German city, proved a wonderful testimonial to the inventive genius of the Teutonic Nation, and will do much by rapid strides in overcoming whatever prestige may have been temporarily sidetracked by the events growing out of the World War.

GERMANY REGAINING

Germany is regaining her commerce and trade supremacy at a very rapid rate. The launching of the two monster vessels, the *Bremen* and *Europa*, which will be plowing the Atlantic next spring, will bring the Old World within five days and possibly less to our Atlantic coast. These carriers will lack nothing in the way of speed and comfort for the business or pleasure traveler and their enormous auxiliary cargo carrying capacity will undoubtedly be utilized in filling orders for our goods. In Hamburg, Mr. Scott, of the Commerce Department, has a central location for his office.

The manner in which it reflects the United States throughout its appointments is well worthy of note and, indeed, might prove a model for other offices. Everything in the office is of American manufacture—the carpets, the furniture, the electric-light fixtures, the bookcases, the books themselves, all breathe America continuously. What an admirable advertisement this affords.

Mr. Scott, who hails from Atlanta, is, in my opinion, a very capable individual, making a wonderful impression upon everyone with whom he comes in contact and increasing the trade of America by the clean, businesslike methods he employs in pushing the merits of American goods.

OFFICES IN OLD PALACE

Mr. Lawrence Grooves, a native of western New York, who has represented the Commerce Department in Germany, Hungary, and at Baltic ports, is now in Vienna. His offices there are in an old palace, but which is in good repair and very centrally located. It was obtained for the United States on a long lease during the reconstruction period at a very low rental. There is a large number of the unemployed in Austria, and it will take a number of years for the reconstituted country to absorb them; nevertheless Mr. Grooves has made wonderful progress and been highly successful in advancing the merits of the American tobacco manufacturers' products among the Austrians, in spite of the strong entrenchment of the Austrian and Hungarian tobacco monopolies. In France there is no unemployment. In Italy unemployment is decreasing. Nowhere in the world except in the United States are such wages paid to wage earners or where they ride to the places of occupation in motor vehicles of their own as in the United States.

SCOPE OF THE BUREAU'S WORK

The Bureau of Standards has been increasing its activities for better living conditions in the American home as well as better methods and practices in production and distribution of all articles of human consumption and usage.

Some, perhaps many, of you may ask, What is the Bureau of Standards? Let me give you the answer of Doctor Burgess, the very capable director: First, it is a collection of some 20 buildings on a 43-acre plot in the northwest suburb of Washington, equipped to carry out tests and investigations on all sorts of problems involving physics, chemistry, technology, and engineering; second, and more important, it is a group of some 850 men and women, most of whom are expert in some scientific field of activity and imbued with the spirit of discovery and service.

It is one of the great service bureaus of the Department of Commerce, concerned with science and industry, and equipped to perform laboratory and consulting functions for many departments of the Federal Government. It also helps the public in many matters relating to scientific and industrial research and standardization.

Its activities directly or indirectly concerned with the home are many and are constantly on the increase. They relate to the dwelling itself, its location and financing; the materials that enter into its construction, their properties, lasting qualities, and safety; the fixtures and utilities required, including plumbing, gas, and electricity; the accessories to the home, such as the automobile and radio; the comfort and well-being of the occupants, with their many problems of clothing, shoes, and household supplies—chinaware, hardware, glassware, and many other items in a long list—including quality of material and methods of purchase, all of daily concern to the housewife.

According to certain studies, 85 per cent of the goods sold at retail are purchased by women. As purchasing agents for the home, they, like the purchasing agents of corporations, are concerned with getting their money's worth. They want the right quality and full count or measure for the price paid.

Let us consider further what the Bureau of Standards, through Assistant Director Ray M. Hudson, has to say on this subject:

Businesses may have their treasurers, their comptrollers, even their boards of directors, who watch expenditures. By careful perusal of charts and graphs, by weighty conferences, they determine how annual income is to be spent.

But homes have their wives who do the same work in 26,000,000 independent businesses—the households of America. Without elaborate research, without the counsel, and the conferences of big business, these executives spend annually $40,000,000,000. They spend it amazingly well, too, though they are not specialized purchasing agents any more than they are specialized cooks, or interior decorators, or educators, or furnace tenders.

Their decisions are governed by the welfare of their families. "Is this breakfast food better for my children to eat?" "Will this davenport and these curtains, this lamp, and this piano make my home a pleasanter place to be?" "Will this school give my daughter what I know she needs?" "Would another kind of heating equipment make our home more comfortable,

more healthful next winter?" These are samples of the questions they ask.

Always they visualize the ideal, these wives and mothers, before they consider economies. But they watch for economies as few business men do. By aptitude and training they are excellent shoppers. The competition for their attention, the courting of their favor, is tremendous. The way to their hearts and their purses is not easy, but it is clear. These general purchasing agents are readers of advertising, consistent, critical readers of advertising. It has been estimated that they buy more than 80 per cent of all advertised merchandise.

According to certain studies the bureau has made, women buy 95 per cent of the silk sold, 90 per cent of the jewelry, 84 per cent of the articles usually purchased in department stores, 82 per cent of the groceries, 80 per cent of the electrical supplies, 75 per cent of men's socks that are sold, 74 per cent of the drug store products, 73 per cent of the pianos, 65 per cent of the leather goods, 64 per cent of men's neckwear, 47 per cent of the hardware, and 40 per cent of the automobiles.

The savings wrought through her cooperation will not only enlarge the purchasing power of her dollars but will make it possible for thousands, possibly millions, more families to increase their possessions, and advance their living standards. In this connection a brief review of the present possessions of our 26,000,000 families is interesting. About one-half of them, or nearly 13,000,000, own their homes; 10,000,000 have phonographs, 6,000,000 have pianos, 5,000,000 have vacuum cleaners, 4,500,000 radios, 4,000,000 refrigerators, and 3,500,000 washing machines. There are 20,000,000 automobiles among our 26,000,000 families. We may assume these figures represent the relative order of importance of the average family's desires, for if it wanted washing machines or refrigerators as much as it does automobiles it would buy them.

This situation is very gratifying, indicating as it does a high degree of industrial stability and continued prosperity for our people. A sidelight on this latter condition is shown in the current distribution of over $550,000,000 to the 8,000,000 Christmas club members by over 8,000 banks and financial institutions throughout the United States. This distribution is estimated to be 10 per cent greater than that for 1927.

INSURANCE INCREASING

Another sidelight is found in the fact that for the first nine months of 1928 the amount of new insurance written by the 45 companies reporting is $9,058,081,000, or nearly $1,000,000,000 more than for the same period in 1927.

Savings-bank deposits rose from $13,040,000,000 in 1919 to $26,091,000,000 in 1927, an increase of 100 per cent in eight years.

Many other evidences of greater individual wealth can be cited, but the significant fact is that this increase is the result of our progress in national efficiency. This in turn is the result of the elimination of waste in production and distribution, the widespread application of simplification and standardization, the development and use of more labor-saving machinery, and the increased productive output of the individual.

Underlying all this improvement is the great contribution made by scientific research. The findings of science are being more widely accepted, applied, and used by industry to-day than at any time in the history of our country.

Coincident with the increase in individual prosperity reflected in the foregoing has come a higher standard of living, one in which quality is paramount. Our people have learned that through mass production and the elimination of waste in industry goods can be made to sell at relatively lower prices, but they do not want cheap or shoddy goods at any price. They are demanding that goods shall be made well, shall wear well, and give good service. They are demanding also that goods shall have more art or style in them and be more attractive in appearance and finish.

In response to these demands industries are employing research methods and making greater use of the research laboratories of the country, particularly of our Bureau of Standards.

The bureau is constantly cooperating with industries in the refinement and improvement of basic materials, such as textiles, leather, rubber, paper, glass, chemicals, dyes, metals, and also building materials, such as cement, clay products, and the like.

Not only is the bureau aiding in the direct improvement of the materials but also of the processes and equipment by which those materials are prepared for further use.

New standards are being set for grades and qualities of essential materials and commodities, and the demand by industry for service from the bureau in this latter field is steadily increasing.

Among the standards established to date through this cooperative service are those for clinical thermometers, staple porcelain plumbing fixtures, steel pipe nipples, genuine wrought-iron pipe nipples, and standard-weight malleable iron or steel screwed unions.

Other projects for which commercial standards are being developed include surgical gauze, brass pipe nipples, furnace and fuel oils, regain in mercerized-cotton yarns. The value of commercial standards is well illustrated in their application to the latter item for the establishment of a commercial standard providing for a uniform moisture content and regain in mercerized yarns, will furnish a standard basis for marketing and obviate or avoid the controversies now occurring between buyers and sellers over weights of this commodity.

There is great need and therefore opportunity in the commodity field for the establishment of commercial standards of grade and quality to give the consumer greater assurance of full value in his purchases, to increase confidence and good will for the merchant, and to help the manufacturer eliminate waste in production.

To-day there are many manufactured articles the outward appearance of which is so similar as to prevent any ready comparison of quality by the majority of buyers without resort to elaborate or expensive laboratory tests. Consequently, goods are often purchased on a price basis and without full knowledge of their true quality.

The purpose of commercial standards is to make it possible for the small as well as the large purchaser to buy according to specification without having to test the material or article as delivered to see whether or not it meets the specification. Proof on this point is found in public certification through the use of proper labels and advertising by the manufacturer that the goods meet the commercial standard adopted for them and indorsed by the United States Bureau of Standards.

Already 1,022 manufacturers interested in 146 Federal specifications have signified their willingness to certify, when requested, that goods furnished by them on orders calling for such delivery are according to these specifications.

The success with which the commercial-standards program is meeting indicates it will be followed by many of our principal industries seeking to strengthen public confidence and good will for their products and to protect the latter's good name.

SIMPLIFIED PRACTICE

The success of the bureau's cooperation in simplification is demonstrated by the fact that over 100 simplified practice recommendations are now in effect and are being well adhered to or observed by the industries to which they apply.

Completed programs include the reduction of varieties of paving brick from 66 to 5; files and rasps from 1,351 to 475; plow bolts from 1,500 to 840; varieties of shovels, spades, and scoops from 5,136 to 2,178; of solid-section steel windows from 42,877 to 2,244; and of grinding wheels from 715,200 to 254,400.

Sixty other simplifications are under way. Among the commodities covered by them are photographic paper, beverage bottles, hospital plumbing fixtures, coopers' wares, medicine chests or cabinets, and glass containers for the drug and pharmaceutical industries.

Since January 1, 1928, 21 simplifications have been effected; 23 of those previously completed have been reaffirmed, and 9 others revised to meet current needs and conditions.

In the 11 months, to December 1, 1928, the acceptors of the completed simplification programs have increased from 7,731 individual firms and corporations to 11,319, a gain of 46 per cent. This response testifies that business finds worth while benefits in simplified practice.

Six years ago, the dry-cleaning industry appealed to the Government for assistance in research work. The Government acceded to this request on one condition: That the problems attacked should be of interest to, and the result should be available to, the entire industry. "Entire industry" was defined as being made up of a minority composed of dry cleaners and a majority composed of the general public as ultimate consumers. The national association has consistently gone more than half way in meeting this viewpoint. In consequence, the results have astonished both parties.

That the work has been of value to the industry is amply proved by the enthusiasm with which it is financially supported. The Government is rewarded for its efforts partly by the increased prosperity of the dry-cleaning industry, which is one of the items making up the prosperity of American business; partly by the knowledge that the general public is now getting better service than was formerly possible; partly by the fact that the damage to garments due to dry cleaning has been materially reduced, thereby adding just so much to the effective income of the customers. The known germicidal effects of dry cleaning may have some beneficial effect on public health. The adoption, as a standard, of a solvent less flammable than gasoline has reduced the risk to life and property, which fact has already been recognized by lower insurance rates.

Much progress has been made through the reduction of waste in production. Simplification and standardization have helped greatly.

The success of simplification in the United States has been watched closely by foreign nations. As a result the Japanese can manufacturers examined 2,134 varieties of canned goods put up in Japan, found 250 different styles of cans, and standardized on 14. They said, "Our aim is for superior quality at the lowest possible price."

More recently the Australian Commonwealth organized an engineering standards, also a simplified practice association "to develop Australian industry, eliminate waste in manufacture, reduce cost of production, simplify distribution, stabilize employment, and promote a spirit of cooperation between divergent trade interests."

Simplification is extending beyond our factories into general business. A few years ago the American Bankers' Association simplified bank-check sizes. Its former president, T. R. Preston, says: "Universal adoption of these standards will save $20,000,000 a year." Printers have estimated that simplification has reduced the cost of checks by $2.50 per thousand. To-day 85 per cent of all checks issued are simplified checks.

In fields where simplification is not applicable to the products or services sold it is being applied to purchases. The Philadelphia company reviewed the 16,000 forms it was using, discontinued 72, revised 9, consolidated 45 to 22, reduced its letterheads from 161 to 27, pen points from 30 to 6, and so on. This enabled the company to coordinate its purchases, and buy these items of supply in larger quantities and at lower prices.

The Atlantic Coast Line Railroad cut its inventory 71 per cent by eliminating 25 per cent of the items formerly carried in its supply stocks, and thereby released nearly two and one-half million dollars of otherwise idle capital.

Not only have other countries, factories, and general business adopted simplification methods developed at the Bureau of Standards, but municipalities are also employing them to good advantage.

The city of Milwaukee under its recently installed centralized and coordinated purchasing system saved its citizens in one year $432,000 on a volume of $4,000,000.

To date 90 simplifications have been effected in as many different commodity lines, through the cooperative efforts of the manufacturers, distributors, and consumers concerned. It is conservatively estimated by industry that this activity is yielding benefits and savings in excess of $300,000,000 annually. It costs the taxpayers from $50,000 to $85,000 a year to maintain.

It can not be too emphatically stated that in this simplification movement there has been no Government coercion. The results have been attained by voluntary cooperation of the interested parties, using the Government agency to bring them together and indorse and support their collective efforts toward eliminating the wastes inherent in overdiversification of product. Only when 80 per cent of the interested parties indorse a project does the Government promulgate it. The simplification idea has been sold to a considerable body of the American business public, and the problem now is to keep the ball a-rolling.

COLOR STANDARDS

A field of technical standardization which is becoming of greater and greater importance is grading by color and basing sales prices for many commodities on color determinations. For example, some $230,000,000 worth of vegetable oils are sold per year, all on a color basis. The bureau has calibrated a master set of glasses for control of this product and is now engaged in supplying substandards to the trade. There are many food products of which color is considered of importance. These include cheese, sirup, oleomargarine and butter, meat, chocolate, tomatoes, sugar, and many others. I cite the case of color as one illustration of a rapidly developing field of standardization of particular interest to your business, a field of very considerable complexity from the laboratory point of view, but of great importance practically. Other industries were also interested, such as paint, textile, and glass.

I trust it is not inappropriate to mention the fact to the members of the Committee of the Whole that the members of the subcommittee handling this bill, in addition to their being thoroughly sympathetic with the activities of the department concerned, are in a position to visualize the various situations as they are brought in review by the bureau chiefs having the matters in charge. Fortunate indeed is the country that can enlist the services of such an able, untiring chairman as Mr. SHREVE, or as that of the ranking member of the minority, Mr. OLIVER of Alabama. Together with the other members they have traveled collectively in excess of a million miles in viewing the localities which are receiving departmental consideration and support, both domestic and foreign. The departments, realizing that sympathetic consideration is accorded but that rigid scrutiny will be exercised concerning any proposition advanced, are encouraged in their all-the-year-round work by this fact—a circumstance fraught with great benefit to the whole community. [Applause.]

Mr. O'CONNOR of Louisiana. Mr. Chairman, will the gentleman yield?

Mr. ACKERMAN. Yes.

Mr. O'CONNOR of Louisiana. I have a letter from a very prominent citizen in New Orleans, Mr. Frank Dameron, asking me to do what I can to be of assistance in the way of securing for the Bureau of Foreign and Domestic Commerce as liberal appropriations as the circumstances would warrant. Has the committee considered all of the factors in the case?

Mr. ACKERMAN. They have tried to, and I believe the chairman of the subcommittee, the gentleman from Pennsylvania [Mr. SHREVE], will speak further on that subject.

Mr. SHREVE. Mr. Chairman, I yield one minute to the gentleman from New York [Mr. BACON].

Mr. BACON. Mr. Chairman, I ask unanimous consent to extend my remarks by inserting at this point a very concise table showing past Budget estimates, total appropriations, and amounts saved by Congress since the Budget was first instituted.

The CHAIRMAN. Is there objection to the request of the gentleman from New York? [After a pause.] The Chair hears none.

The table is as follows:

Congress and fiscal years	Total Budget estimates	Total appropriations	Decrease (−) or increase (+), appropriations compared with Budget estimates	Net decrease in Budget estimates
Sixty-seventh Congress, first and second sessions:				
Fiscal year 1923, regular annual, permanent, and indefinite	$3,924,586,066.78	$3,751,917,629.14	−$172,668,437.64	
Supplemental and deficiencies for fiscal year 1922 and prior years	467,571,992.68	327,878,638.05	−139,693,354.63	
Total	4,392,158,059.46	4,079,796,267.19	−312,361,792.27	−$312,361,792.27
Sixty-seventh Congress, third and fourth sessions:				
Fiscal year 1924, regular annual, permanent, and indefinite	3,714,602,281.19	3,706,779,083.12	−7,823,198.07	
Supplemental and deficiencies for fiscal year 1923 and prior years	236,411,166.57	233,492,860.49	−2,918,306.08	
Total	3,951,013,447.76	3,940,271,943.61	−10,741,504.15	−10,741,504.15
Sixty-eighth Congress, first session:				
Fiscal year 1925, regular annual, permanent, and indefinite	3,632,173,054.96	3,622,125,959.19	−10,047,095.77	
Supplemental and deficiencies for fiscal year 1924 and prior years	160,974,906.47	161,997,365.16	+1,022,458.69	
Total	3,793,147,961.43	3,784,123,324.35	−9,024,637.08	−9,024,637.08
Sixty-eighth Congress, second session:				
Fiscal year 1926, regular annual, permanent, and indefinite	3,747,876,017.78	3,736,124,595.31	−11,751,422.47	
Supplemental and deficiencies for fiscal year 1925 and prior years	416,402,528.03	415,557,454.60	−845,073.43	
Total	4,164,278,545.81	4,151,682,049.91	−12,596,495.90	−12,596,495.90
Sixty-ninth Congress, first session:				
Fiscal year 1927, regular annual, permanent, and indefinite	3,961,470,187.42	3,953,628,990.08	−7,841,197.34	
Supplemental and deficiencies for fiscal year 1926 and prior years	454,709,266.73	455,834,399.73	+1,125,133.00	
Total	4,416,179,454.15	4,409,463,389.81	−6,716,064.34	−6,716,064.34

Congress and fiscal years	Total Budget estimates	Total appropriations	Decrease (−) or increase (+), appropriations compared with Budget estimates	Net decrease in Budget estimates
Sixty-ninth Congress, second session:				
Fiscal year 1928, regular annual, permanent, and indefinite	$4,022,971,757.60	$4,014,988,936.40	−$7,982,821.20	
Supplemental and deficiencies for fiscal year 1927 and prior years	195,792,534.01	196,022,416.18	+229,882.17	
Total	4,218,764,291.61	4,211,011,352.58	−7,752,939.03	−$7,752,939.03
Seventieth Congress, first session:				
Fiscal year 1929, regular annual, permanent, and indefinite	4,332,235,695.16	4,322,208,922.06	−10,026,773.10	
Supplemental and deficiencies for fiscal year 1928 and prior years	305,141,118.98	306,027,902.57	+886,783.59	
Total	4,637,376,814.14	4,628,236,824.63	−9,139,989.51	−9,139,989.51
Grand total net reduction in Budget estimates since the beginning				−368,333,422.28

Mr. BACON. It is customary to criticize the Congress for extravagance. The above record since the establishment of the Bureau of the Budget proves the falsity of this accusation. During the past seven years the Congress has cut down the estimates of the Bureau of the Budget by the large total of $368,333,422.28.

Mr. SHREVE. Mr. Chairman, I yield 25 minutes to the gentleman from Wyoming [Mr. WINTER].

Mr. WINTER. Mr. Chairman, ladies, and gentlemen of the committee, I realize it is not a very propitious time to address the House, and for that reason I shall insert under leave some matters in the RECORD which I had hoped to present here on the floor. I am sure that you all enjoyed, as I did, the able and interesting address made by a preceding speaker, the gentleman from New Jersey [Mr. ACKERMAN]. I wish that there might have been a full attendance of Members to have heard it.

Prior to the consideration of the bill now before us we passed the Interior appropriation bill and the agricultural appropriation bill.

Those two bills have to do in certain of their provisions with a common subject. The Interior bill appropriated, among other things, for reclamation. The agricultural bill had a great deal to do in many of its provisions with the encouragement and promotion of agriculture and the application of funds for research work looking toward the improvement of agriculture and the increasing of the amount of production. There was, therefore, an interrelation between the two bills.

It is not my purpose to indulge in an argument with reference to reclamation. I would like to give you a very brief picture, a bird's-eye view, as it were, of the reclamation activities of the Government. It is now some 26 years since the reclamation act was passed. As the result of those 26 years of activity there have been brought under irrigation 1,956,910 acres. That has been done at a cost of $175,116,945. There has been created as a result of these activities and the capital and labor of the settlers a valuation of something in excess of $600,000,000. The total value of the annual crop of last year from these 24 projects was $133,207,210, which, you will note, is about 1 per cent of the value of the total agricultural production of the entire country, which is in the neighborhood of $13,000,000,000. During 1926, at a time when the settlers were still under considerable disability and disadvantage, they repaid into the reclamation fund the sum of $4,260,221.35. Last year, 1927, they repaid the sum of $5,299,149.15, an increase in the one year over the prior year's payment of $1,038,928.20.

There was received during the last year from various sources going to make up the reclamation fund, in addition to these payments of $5,299,149.55 by settlers, the sum of $705,822.66 from the receipts from the sale of public lands and the sum of $2,454,168.68 from mineral royalties collected by the Government under the general mineral leasing act. From these three sources the total amount paid into the reclamation fund last year was $8,459,140.87. In addition to the 1,956,910 acres occupied and irrigated on the reclamation projects we have 160,000 acres unoccupied but ready for irrigation and for settlers. Unfortunately those 160,000 acres are concentrated in five particular projects, and therefore present a problem of serious concern as to the ability of these five projects to meet their contracts and obligations to the Government. But they can be made to do so. These projects can each be made a complete success and the return of the investment of the Government insured.

There is pending before the Congress a bill known as the aided and directed settlement bill, H. R. 9956, upon which extensive hearings have been held and upon which there is a favorable report before the House. Its purpose is to bring about the settlement of this particular 160,000 acres of vacant land on the five particular projects; and I would bespeak from the Members of the House a careful and earnest reading of the hearings on that bill and of the bill itself and of the report filed therewith.

My remarks to-day are prompted by the repeated observations of Members here on the floor who have announced their opposition to bringing under cultivation any more farm land. Those remarks usually were made in connection with and in opposition to any more authorizations by this body of new reclamation projects. There also has been uninformed and unwarranted propaganda against reclamation and new projects by the Chicago Tribune, the United States Chamber of Commerce, the American Society of Civil Engineers, and the Department of Agriculture. Analysis of the situation demonstrates they are wrong.

Those of us who come from the arid States of the West are fairly well satisfied with the provisions of the Interior Department appropriation bill, which passed this House, in that it made provision for the continuation of the construction of a number of existing projects which have heretofore been authorized. There was no particular opposition in the House to that bill in that respect. But there were sentiments expressed here in opposition to reclamation progress which I am sure were founded on an erroneous conception of the conditions and the facts; and these observations and remarks which I now make and matters which I desire to insert in the RECORD are designed to dissipate what I consider to be a mistaken impression as to the effect of reclamation and the production of crops upon reclamation projects upon the agricultural situation in this country; and to bring to your minds the fact that they do not in fact add in any appreciable way to the crop surplus or to the so-called farm problem.

As a basis for what I wish to say and to insert in the RECORD, I quote from President Roosevelt in his message to Congress in 1901, prior to the passage of the reclamation act. He said:

> It is as right for the National Government to make the streams and rivers of the arid region useful by engineering works for water storage as to make useful the rivers and harbors of the humid region by engineering works of another kind. The storing of the floods in reservoirs at the headwaters of our rivers is but an enlargement of our present policy of river control, under which levees are built on the lower reaches of the same streams.

And in this connection, and in connection with that quotation from President Roosevelt, I note and mention in passing that portion of the bill for the control of the floods of the Mississippi which provided for the simultaneous survey of tributaries of that river, and which devoted $5,000,000 of that appropriation to that purpose. By that provision we are getting right back to the original, and in my judgment the right, idea of flood control. In connection with that control of the tributaries of that stream we have the accompanying benefits of flow regulation, improved navigation, the creation of storage for irrigation, storage for water power, and the production of electrical energy.

Again I quote from President Roosevelt as follows:

> The reclamation and settlement of the arid lands will enrich every portion of our country, just as the settlement of the Ohio and Mississippi Valleys brought prosperity to the Atlantic States. The increased demand for manufactured articles will stimulate industrial production, while wider home markets and the trade of Asia will consume the larger food supplies and effectually prevent western competition with eastern agriculture. Indeed, the products of our irrigation will be consumed chiefly in upbuilding local centers of mining and other industries, which would not otherwise come into existence at all. Our people as a whole will profit, for successful home making is but another name for the upbuilding of the Nation.

Those words were true when spoken in 1901, and they are just as true to-day.

It is well known that the farm surplus problem has to do principally with the crops of corn, wheat, and cotton. These comprise a very small part of irrigated crops. There is no competition between these reclamation projects and central and eastern agriculture. The crops produced on the reclamation projects are not competitive. They are mainly special crops, such as the sugar beet, seed potatoes, seed beans and seed peas, and early vegetables; and most of the products other than those just named are used in feeding livestock. In other words, all these products are consumed locally, and of course, therefore, they do not come on the market into competition with the products of the other agricultural States.

I want to quote from a public statement made by President Coolidge about two years ago—perhaps three—along this same line, as follows:

criticism of such a program of encouragement—

And he was speaking of new reclamation projects—

on the ground that there already is an overproduction in agricultural products lies in the lack of understanding that these projects take many years for development; that they furnish but a small portion of the total increased food supply required even by our increase in population; and that the utilization of their supplies lies in the development itself.

President-elect Hoover in a recent address called attention to the fact that we are importing into this country annually $800,000,000 worth of farm products which we can raise and ought to raise in this country. Certainly our eastern brethren will agree that they would prefer to have these products raised in this country and in the western arid regions rather than to import them from foreign countries, and it is our hope that in the expected tariff readjustment or revision there will be such tariffs levied as will make it possible to raise in this country this nearly $1,000,000,000 worth of food products which we now import but which we ourselves could raise.

Again, we should maintain in this country a proper balance between agriculture and industry. I wish I had the time to elaborate upon this proposition and call attention to the gradual transformation that has occurred in this country from the early day when we were 70 to 80 per cent agricultural until now we are probably from 60 to 70 per cent industrial instead of agricultural.

The President has called attention to the fact that we are gradually becoming an industrial Nation instead of an agricultural Nation. I say it would be a false economic principle for America at least, if we should join in the view of those countries—such as England—which are practically manufacturing countries and are dependent upon foreign countries for the very food upon which their people must live. I say we should maintain a proper balance of agricultural production in this country, and that, while we are producing abundantly at the present time, President Coolidge has called attention to the fact, in addition to these other things, that with our increasing population it will not be many years until we are not raising sufficient food for our own people. I have here a quotation from Secretary Jardine, made before a reclamation conference in this city two years ago, in which he stated that within 10 years we would have to have more acres under cultivation and greater production in this country to provide for our own people. Our increasing population comes to us at the rate of 1,500,000 from natural increase and perhaps 200,000 by immigration, even under our restricted immigration act, and undoubtedly there are a number who come unlawfully into the country. The annual total is thus nearly 2,000,000. In a period of 10 years this means an increase of 20,000,000.

I wish to call attention to the fact that if a reclamation project is authorized on this good day, depending upon its size, it would not contribute to the agricultural production of this Nation for from 10, 15, to 20 years, and when we take into consideration the certain increase in population it will not do to wait for the 10, 15, or 20 years to pass to authorize and begin a project. That should be done at this time in reasonable, regular order. Reclamation should be allowed to come on naturally and gradually as it has heretofore without cessation.

I call your attention next to the fact that the total contribution by all of the reclamation projects, which have been built in 26 years, last year was but 1 per cent of the total agricultural production of the Nation. In other words, by all the expenditures and all the labor of the Reclamation Service, and all the capital and labor of the settlers, we have increased the agricultural production of this Nation but one twenty-sixth of 1 per cent annually during the 26 years we have been active under the reclamation act.

The President called attention, in the remarks I have quoted, to the fact that these projects not only consume their own products, but constitute a market for the rest of the country, not only for manufactured products but for the very staple agricultural products of wheat, corn, and cotton, of which there is a surplus. Instead of adding to the number of bushels or bales of these products, these projects create a demand and help to consume the staple products which go to make up the real farm surplus and problem. These projects have created and maintain a market annually for manufactured products of $500,000,000.

Another thing which ought to be considered is that in these arid Western States there is on the average but from 5 to 7 per cent of their total area which is susceptible of irrigation. The rest of the area of those States is made up of mountainous country or of plains which are grazing lands, which can never be reached by any water that is available. These States, it seems to me, under these conditions, are reasonable in their request that reclamation shall proceed in an orderly way and not be cut off from consideration, and shall not cease because of a temporary depressed condition of agriculture as to products to whose surplus it does not add and with which its special products do not come in competition.

It would seem that these States, when we consider that the other agricultural States have 100 per cent of their area under cultivation, or capable of cultivation, should at least be entitled to have a development up to the possible 5 per cent of their entire area. In my State at the present time, consisting of 62,000,000 acres, there are less than 2,000,000 acres of land actually under irrigation. The utmost we can ever hope for is 3,000,000 to 4,000,000 acres, or from 5 to 7 per cent of our area.

The reclamation policy is but following out our general policy of a homestead provision for the making of homes in this country. When these arid lands are prepared by the Federal Government under the law, and by storage works water is made available, they are then homesteaded by home seekers. The United States Supreme Court has sustained the reclamation law upon the theory that the Government has the right to improve its own lands for the purpose of making them habitable and for the purpose of furnishing possible homes for future homesteaders.

In this connection, I wish to mention the fact that there are bills pending before the Congress which not only propose to regulate and lease the balance of the unreserved and unappropriated public domain, 194,000,000 acres, but which contain express provisions repealing the homestead laws. Such bills should be opposed and that great policy preserved.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. SHREVE. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. JONES. Will the gentleman yield for a question or does he prefer not to yield?

Mr. WINTER. If it is a brief question, I yield.

Mr. JONES. The gentleman is making an interesting and enlightening statement and I am enjoying it very much. The gentleman may have covered it in the first part of his speech, when I was not present, but I am wondering if the gentleman favors linking flood control and irrigation projects, or is there need of that in the particular section he has in mind?

Mr. WINTER. If I get the purport of the gentleman's question, in our section of the country, yes. All of our tributaries upon the eastern side of the Rockies flow into the Mississippi, and I have mentioned the connection between storage for irrigation, power, and flood control.

Mr. JONES. That was probably before I came in. The reason I asked the question is that in discussing these matters some have taken the position that this water is a curse and have tried to get rid of it in the lower channels of the rivers instead of utilizing the water and producing a good result.

Mr. WINTER. One of the greatest paragraphs in the speech of acceptance of Herbert Hoover was that which started out with the statement that every drop of water which flows unused to the sea is an economic waste, and in that same paragraph he immediately followed that statement up with the correlated subjects of flood control, regulation of flow, water transportation, irrigation, and power. Altogether it presents a picture and a practical possibility of a magnificent development.

Mr. JONES. Then the gentleman thinks that proper flood control will enable us to utilize the water for good purposes higher up in the tributary streams?

Mr. WINTER. Certainly; that is the true economic way of treating this flood-control problem.

And, finally I quote from the last message of the President upon the general proposition, as follows:

For many years the Federal Government has been committed to the wise policy of reclamation and irrigation. While it has met with some failures, due to unwise selection of projects and lack of thorough soil

surveys, so that they could not be placed on a sound business basis, on the whole the service has been of such incalculable benefit in so many States that no one would advocate its abandonment.

[Applause.]

I want to mention and ask the Members to read an article written by Mr. B. E. Stoutmeyer, of the legal staff of the Reclamation Service, which can be found in the CONGRESSIONAL RECORD of December 7, page 220.

I would ask leave to insert, without reading, an article written by Mr. Charles Niethammer, of the Casper Packing Co., upon the subject of reclamation, farm surplus, and the farm problem in general. It takes a proposed new project, the Casper-Alcova project, and by concrete example and analysis proves conclusively that the fear of added surplus is unfounded.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

The matter referred to follows:

AN ANSWER IN BEHALF OF THE CASPER-ALCOVA PROJECT TO THE PROPAGANDA REGARDING THE OVERPRODUCTION OF FARM CROPS BEING WIDELY CIRCULATED AGAINST THE FURTHER DEVELOPMENT OF WESTERN IRRIGATION PROJECTS

This article is by Mr. Charles Niethammer, of the Casper Packing Co., who, by virtue of his experience in the buying and feeding of livestock and on account of his interest in and study of the Casper-Alcova project, is amply qualified to write on this subject.

CASPER CHAMBER OF COMMERCE,
Casper, Wyo.

Considerable opposition has been voiced lately against the development of additional irrigation projects on the grounds of an existing overproduction of certain farm products.

We desire to show that such objections are applicable to such a slight extent, if at all, to the proposed Casper-Alcova project that they should not in fairness be given serious consideration. There is no existing overproduction in connection with any of the main crops that could be raised on this project, and so far as this region is concerned the need for this development is more urgent, more imperative, than ever, due to the changed conditions in the livestock industry.

During the last 25 years the value of cattle in our State has increased from $13,000,000 to $50,000,000. The number of sheep has increased from 2,000,000 to over 4,000,000 head, and their value has mounted from $4,000,000 to $35,000,000.

When cows were selling at $15 a head and ewes at $2 per head, buying feed for them was out of the question. They were wintered through on the open range, with an occasional hard winter wiping out a part of the herd. With cows selling at $75 and ewes at $10 to $12 per head, stockmen can no longer take chances on the weather. The State produces an entirely insufficient amount of feed to maintain the livestock industry on a sound basis and provision must be made for greater protection against hard winters. That can only be done by raising a greater amount of feed right here, as it is not practical to ship in feed. The result has been that cowmen have cut their herds to a size that they can easily carry through the winter, much to the disadvantage of the State and of the country at large.

It has come to our attention that appeals are being made from certain sources that we should lower tariff on feeder cattle from Canada and Mexico in order to keep beef within the reach of the laboring man. The shortage is real enough—if greater numbers of cattle were shipped to the market this fall than were expected, it was due to the fact that the unusually high prices prevailing in the early part of the season caused many cattle to be shipped that should have been held over and used in restocking the range. By putting the cattle business of the West on a more substantial basis, the country will be assured of an ample supply of beef without opening the gates to foreign competition.

These high values are not temporary, but are due to conditions which have been long in forming. Since 1900 the per capita number of cattle and sheep in the United States has decreased 50 per cent and any increase to come will likely be at no greater rate than the increase in population. Under present prices, a series of hard winters, without ample supply of feed, may cause losses almost as great as the cost of the entire Casper-Alcova project.

The proposed Casper-Alcova project occupies a very strategic position as a point for wintering livestock. It is situated in the heart of an immense range country and is easily accessible from all sides. Within the territory, which it will serve directly as a feeding place, there are grazing to-day over 500,000 sheep and 40,000 head of cattle. There is no question as to the advantages of winter feeding of sheep, for aside from producing bigger and stronger lambs, it increases the wool clip approximately 2 pounds per head.

Out of the 500,000 lambs raised here each year about 100,000 are retained as breeding ewes. Without exception these lambs could be brought to the project for wintering as most of them now are fed part of the winter on the high-priced feed shipped in here from other places. A number of old ewes, approximating the number of breeding lambs held back, must be shipped to market each year, whereas a great majority of these ewes would be good for one or two more lamb crops if they could be wintered on feed. A very safe estimate for the total of ewes, which in normal years would be wintered on the project, would be 150,000. The return to the project from this source would be in excess of $350,000 and a good part of this would be for roughage and other feed not easily disposed of. During a hard winter, the project would act as a safeguard for all the sheep run in the adjacent territory.

The cattle business would be a counterpart of the sheep business only on a smaller scale. During the last 10 years the cattle business has changed largely to a cow-and-calf business. The growing demand for baby beef has made it profitable for the stockmen to sell their increase as calves or yearlings, whereas in former years most of the steers were carried until they were three and four year olds and were less apt to suffer on the range during the winter months. This means that it is necessary to keep a much greater percentage of breeding cows and young cattle than formerly and consequently there exists a much greater need for feed during the winter.

Just how many cattle may eventually be cared for on this project can only be approximated, of course. With the existence of a sufficient supply of feed the cattle business would thrive in this section as the range can handle a great many more than are being run here at the present time. The number of calves and breeding cows that would, under present conditions, be brought onto the project to be wintered, together with the number of lambs and ewes, would furnish an outlet for the crops from nearly one-third of the total acreage of the Casper project.

Objections may be made by Corn Belt feeders that too great a development of irrigation in the range States would deprive them of their supply of feeder cattle and leave them without a satisfactory means of disposing of their crop. As has already been pointed out, we are now selling mostly young cattle, and a much greater percentage of our cattle consists of calves and cows than ever before. The most profitable way of utilizing feed crops from a project such as this would be to merely winter the stock and sell them off the range in the summer and fall.

Owing to the small acreage of grain usually raised on Wyoming projects, hardly any cattle are finished here. A part of them may be put on short feed, but these are mostly shipped as feeders early in the spring.

From the above it can be seen that there exists not only a strong potential market but a very urgent need for a large percentage of the crops that can be produced on this project. This is a market, owing to the impracticability of shipping in feed, which can be supplied in no other way than by growing the feed here at home. Not a pound of this feed would in any manner add to the overproduction, since it would only be used in safeguarding the investment and improving the quality of our livestock.

The foundation of our State's prosperity is the livestock business, and we must protest against any attempt to deny the people of Wyoming the right of this irrigation development—on the grounds of an existing overproduction of farm crops—when there is no apparent overproduction of the kind of crops raised on irrigation projects in Wyoming. Such a program would only serve to injure this State's prosperity without in any way solving the problem of overproduction.

The figures so far cited take no account of any expansion in the sheep industry that would result locally through the establishing of this project. For a number of years lamb has not been available as a food item to the average family owing to its high price.

Feeder lambs have been selling from 11 cents to 13 cents per pound at shipping time. They can profitably be sold at 9 cents per pound, which would result in a much greater demand for the meat and would make room for considerable expansion in the sheep industry. A dependable supply of feed would enable sheep owners of this section to increase their operations sufficiently to make up for the decrease in price. Certainly nothing could be more desirable than to increase the wool production of this country, which at the present time imports nearly as much as it grows. (The United States imported 264,000,000 pounds of wool in 1927 and produced 328,000,000 pounds; no overproduction here.)

Next in importance to the forage crops on this project would be the raising of sugar beets. Based on percentages prevailing in this State, between 11,000 and 12,000 acres of the Casper-Alcova project would eventually be planted to this crop. Favorable soil and climatic conditions in Wyoming have made beet raising a very profitable undertaking for the farmer. The great numbers of livestock in the area adjacent to Casper would be a decided help to the beet growers and sugar refineries in furnishing a market for the beet tops and beet pulp. With the United States producing only about one-fifth of the sugar that is being consumed in this country, the argument of overproduction can hardly be applied against this crop. The United States imported 4,126,000 tons of sugar in 1927 and continental United States produced only 1,164,000 tons.

While feed crops and sugar beets may be the two largest single items produced, the possibilities for diversification in the Mountain States will assure the project a large acreage given to the growing of special crops particularly suited to this region. Chief among such crops being raised

in this State are dry beans, seed peas, certified seed beans, and other certified seed crops. The raising of these crops, along with the growing of turkeys, was begun in our State on a large scale in 1921.

In 1928, three of these crops—i. e., turkeys, dry beans, and certified seed—exceeded, respectively, the million-dollar mark, according to agricultural statistics for the State. With an acreage only one-third as large as the proposed Casper-Alcova project, one irrigated district in the State in 1928 produced nearly 100 carloads of beans. Another small community shipped six carloads of turkeys to the New York market. The climate and altitude made for a hardiness in our certified seed, which make them much sought after by States that import their seed supply. What portion of the acreage of this project might be employed in this manner is difficult to determine in advance, but an analysis of the carload shipments of a representative territory within the State of Wyoming, containing about 35,000 irrigated acres, will show better perhaps than anything else how little Wyoming projects produce of such items as are most subject to overproduction. This district, outside of livestock, shipped in 1927, 505 carloads of produce, divided as follows:

Carloads of—	
Sugar	395
Dry beans	65
Seed peas	3
Wool	23
Honey	2
Turkeys	3
Alfalfa meal	4
Wheat	8
Potatoes	2

Out of a total of 505 carloads there were only 8 carloads of grain, and this mostly from adjacent dry-land sections. A large part of the crops of this project were, of course, used in the feeding and wintering of livestock.

Summing up the various points, it is obvious that the crops of the proposed Casper-Alcova project would not add to the overproduction existing in some farm products for the following reasons:

First. Because a large percentage of the acreage would be used for wintering cattle and sheep which are now being run on the open range.

Second. Because a large part of this acreage would be devoted to the growing of sugar, of which the United States now imports four times as much as is produced in this country. (Imports, 1927, 4,216,000 tons; United States production, 1,164,000 tons.)

Third. Because it would increase the production of wool, of which the United States imports nearly half of our total requirements. (Imports, 1927, 264,000,000 pounds; United States production, 328,000,000 pounds.)

Fourth. Because a large part of the acreage would be used in the growing of special crops, in which no overproduction exists, and some of which (certified seed) actually are a great help to agricultural interests of other States on account of the exceptionally high quality and virility of the seed grown in this altitude and climate.

Mr. SHREVE. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker pro tempore [Mr. TILSON] having resumed the chair, Mr. LEAVITT, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 15569) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1930, and for other purposes, had come to no resolution thereon.

ADJOURNMENT

Mr. SHREVE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 56 minutes p. m) the House adjourned until to-morrow, Thursday, December 20, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Thursday, December 20, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

First deficiency appropriation bill.

Independent offices appropriation bill.

COMMITTEE ON FOREIGN AFFAIRS

(10.30 a. m.)

Requesting the President to propose the calling of an international conference for the simplification of the calendar, or to accept, on behalf of the United States, an invitation to participate in such a conference (H. J. Res. 334).

COMMITTEE ON THE POST OFFICE AND POST ROADS

(10 a. m.)

To amend the first paragraph of section 7 of the act entitled, "An act reclassifying the salaries of postmasters and employees of the Postal Service, readjusting their salaries and compensation on an equitable basis, increasing postal rates to provide for such readjustment, approved February 28, 1925" (H. R. 11622).

To amend the first paragraph, and that portion of paragraph 4 as far as the first colon, of section 2 of the act entitled "An act reclassifying the salaries of postmasters and employees of the Postal Service, readjusting their salaries and compensation on an equitable basis, increasing postal rates to provide for such readjustment, approved February 28, 1925" (H. R. 13709).

To classify certain positions in the Railway Mail Service (H. R. 9766).

SUBCOMMITTEE OF THE COMMITTEE ON INDIAN AFFAIRS

(2 p. m.)

For the relief of J. F. McMurray (H. R. 10741).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

696. A letter from the Secretary of the Navy, transmitting draft of a proposed bill to authorize the Secretary of the Navy to dispose of material to the sea scout department of the Boy Scouts of America; to the Committee on Naval Affairs.

697. A letter from the Acting Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of St. Johns River, Fla., from Jacksonville to the ocean (H. Doc. No. 483); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

698. A communication from the President of the United States, transmitting supplemental estimate of appropriation for the Department of the Interior, Bureau of Reclamation, for the fiscal year 1930, amounting to $300,000 (H. Doc. No. 484); to the Committee on Appropriations and ordered to be printed.

699. A communication from the President of the United States, transmitting deficiency estimate of appropriation pertaining to the legislative establishment, Library of Congress, for the fiscal year 1924, in the sum of $33.23 (H. Doc. No. 485); to the Committee on Appropriations and ordered to be printed.

700. A letter from the Acting Secretary of Agriculture, transmitting report on work done, expenditures and receipts, expenses under Federal highway act; roads and trails in the national forest; receipts and expenditures, Center Market, District of Columbia, and disposition of useless papers; to the Committee on Expenditures in the Executive Departments.

701. A communication from the President of the United States, transmitting supplemental estimate of appropriation pertaining to the legislative establishment, United States Botanic Garden, for the fiscal year 1929, in the sum of $15,000 (H. Doc. No. 486); to the Committee on Appropriations and ordered to be printed.

702. A communication from the President of the United States, transmitting supplemental estimates of appropriations pertaining to the legislative establishment, House of Representatives, for the fiscal year 1929, in the sum of $42,348 (H. Doc. No. 487); to the Committee on Appropriations and ordered to be printed.

703. A letter from the Acting Secretary of Commerce, transmitting report that the field office of the Steamboat Inspection Service at Honolulu, Hawaii, has reported the sale of 210 pounds of useless papers and the revenue received from the sale was 47 cents; to the Committee on Interstate and Foreign Commerce.

704. A letter from the Secretary of the Interior, transmitting report of the withdrawals and restorations contemplated by the statutes; to the Committee on Expenditures in the Executive Departments.

705. A letter from the Secretary of the Interior, transmitting report of expenditures from the appropriation "Support and civilization of Indians, 1928"; to the Committee on Expenditures in the Executive Departments.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. SHREVE: Committee on Appropriations. H. R. 15569. A bill making appropriations for the Departments of State and Justice and for the Judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1930, and for other purposes; without amendment (Rept. No. 1961). Referred to the Committee of the Whole House on the state of the Union.

Mr. SNELL: Committee on Rules. H. Res. 261. A resolution amending clause 4 of Rule XI of the rules of the House of Representatives; without amendment (Rept. No. 1962). Referred to the House Calendar.

Mr. SNELL: Committee on Rules. H. Res. 272. A resolution to create a standing committee on memorials; without amendment (Rept. No. 1963). Referred to the House Calendar.

Mr. SNELL: Committee on Rules. H. Res. 273. A resolution providing for the consideration of H. R. 9200, H. R. 14659, S. 1976, and S. 1275, bills providing for the appointment of additional judges; without amendment (Rept. No. 1964). Referred to the House Calendar.

Mr. GRAHAM: Committee on the Judiciary. S. 1965. An act to authorize the appointment of a district judge for the northern district of Mississippi; without amendment (Rept. No. 1965). Referred to the Committee of the Whole House on the state of the Union.

Mr. WILLIAMSON: Committee on Expenditures in the Executive Departments. H. J. Res. 357. A joint resolution entitling all employees of the United States Government in the District of Columbia to pay for Monday, December 24, 1928, the same as any other holiday; without amendment (Rept. No. 1966). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. FRENCH: A bill (H. R. 15568) to provide for the acquisition, sale, and closer settlement of delinquent lands on irrigation projects by the Government to protect its investment; to the Committee on Irrigation and Reclamation.

By Mr. SHREVE: A bill (H. R. 15569) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1930, and for other purposes; committed to the Committee of the Whole House on the state of the Union.

By Mr. BACHMANN: A bill (H. R. 15570) authorizing S. R. Cox, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near New Martinsville, W. Va.; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 15571) to repeal the act for the construction of a bridge across the Ohio River at or near New Martinsville, W. Va.; to the Committee on Interstate and Foreign Commerce.

By Mr. DARROW: A bill (H. R. 15572) to amend the radio act of 1927; to the Committee on the Merchant Marine and Fisheries.

By Mr. JOHNSON of South Dakota: A bill (H. R. 15573) to amend the World War veterans act, 1924; to the Committee on World War Veterans' Legislation.

By Mr. FULBRIGHT: A bill (H. R. 15574) granting pensions and increase of pensions to certain soldiers and sailors of the war with Spain, the Philippine insurrection, or the China relief expedition, to certain maimed soldiers, to certain widows, minor children, and helpless children of such soldiers and sailors, and for other purposes; to the Committee on Pensions.

By Mr. HULL of Tennessee: A bill (H. R. 15575) to amend the Federal water power act and to more clearly define and declare Federal and State water power policy; to the Committee on Interstate and Foreign Commerce.

By Mr. SIMMONS: A bill (H. R. 15576) to authorize credit upon charges due the United States by the farmers' irrigation district, North Platte irrigation project, Nebraska and Wyoming; to the Committee on Irrigation and Reclamation.

By Mr. BRITTEN: A bill (H. R. 15577) to authorize the Secretary of the Navy to dispose of material to the sea-scout department of the Boy Scouts of America; to the Committee on Naval Affairs.

By Mr. EVANS of Montana: A bill (H. R. 15578) proposing a location at Flathead Lake, Mont., for a summer residence for the President of the United States; to the Committee on Public Buildings and Grounds.

By Mr. COLTON: A bill (H. R. 15579) providing for the construction of a sanatorium and hospital at Ogden, Utah, and providing an appropriation therefor; to the Committee on World War Veterans' Legislation.

By Mr. BERGER: Joint resolution (H. J. Res. 361) authorizing and requesting the President to proclaim a full pardon and amnesty to certain political prisoners; to the Committee on the Judiciary.

By Mr. CRAIL: Joint resolution (H. J. Res. 362) for the appointment of one member of the Board of Managers of the National Home for Disabled Volunteer Soldiers; to the Committee on Military Affairs.

By Mr. ZIHLMAN: Joint resolution (H. J. Res. 363) authorizing the granting of permits to the committee on inaugural ceremonies on the occasion of the inauguration of the President elect in March, 1929, and for other purposes; to the Committee on the District of Columbia.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BACHMANN: A bill (H. R. 15580) granting a pension to Isaiah Nixon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15581) granting a pension to Samatha A. Broszt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15582) granting a pension to Walter Fallen; to the Committee on Pensions.

Also, a bill (H. R. 15583) for the relief of Raymond H. Leu; to the Committee on Naval Affairs.

By Mr. BLAND: A bill (H. R. 15584) granting a pension to T. Abraham Hetrick; to the Committee on Invalid Pensions.

By Mr. BLOOM: A bill (H. R. 15585) granting a pension to Helga Ida Maria Gouraud; to the Committee on Invalid Pensions.

By Mr. CRAIL: A bill (H. R. 15586) granting a pension to Ada Brown; to the Committee on Invalid Pensions.

By Mr. DAVENPORT: A bill (H. R. 15587) granting a pension to Adelia Benson; to the Committee on Pensions.

By Mr. DICKINSON of Missouri: A bill (H. R. 15588) granting an increase of pension to Samuel W. Dicus; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15589) granting an increase of pension to Mary J. King; to the Committee on Invalid Pensions.

By Mr. DOMINICK: A bill (H. R. 15590) for the relief of Henry I. Power; to the Committee on Military Affairs.

Also, a bill (H. R. 15591) for the relief of Claud J. Adams; to the Committee on Military Affairs.

By Mr. ELLIOTT: A bill (H. R. 15592) granting a pension to Mary Turner; to the Committee on Invalid Pensions.

By Mr. FULBRIGHT: A bill (H. R. 15593) granting a pension to Barbra Eakins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15594) granting a pension to Melissa J. Ramsey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15595) granting an increase of pension to Mary Jane Butler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15596) granting an increase of pension to Lucinda Kittrell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15597) granting an increase of pension to Laura E. Adams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15598) granting an increase of pension to Julia Tremain; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15599) granting an increase of pension to Dessie M. Davis; to the Committee on Invalid Pensions.

By Mr. GUYER: A bill (H. R. 15600) granting an increase of pension to Lena Jenkins; to the Committee on Pensions.

Also, a bill (H. R. 15601) granting an increase of pension to Martha A. Nugent; to the Committee on Invalid Pensions.

By Mrs. LANGLEY: A bill (H. R. 15602) granting a pension to Elizabeth Turner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15603) granting a pension to Annie Cruse; to the Committee on Invalid Pensions.

By Mr. LEECH: A bill (H. R. 15604) granting an increase of pension to Albert C. Kinsey; to the Committee on Invalid Pensions.

By Mr. MAJOR of Missouri: A bill (H. R. 15605) granting a pension to Lawson T. Green; to the Committee on Invalid Pensions.

By Mr. MANLOVE: A bill (H. R. 15606) granting an increase of pension to Surilda J. Slavens; to the Committee on Invalid Pensions.

By Mr. MOORE of Kentucky: A bill (H. R. 15607) granting a pension to John W. Skaggs; to the Committee on Invalid Pensions.

By Mr. MOORE of Virginia: A bill (H. R. 15608) providing for the advancement of Robert G. Dickson on the retired list of the Army; to the Committee on Military Affairs.

By Mr. PURNELL: A bill (H. R. 15609) granting a pension to Melissa M. McCool; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15610) granting a pension to Grace Hixon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15611) granting a pension to Wilbur L. Hensley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15612) granting an increase of pension to Sarah E. Ellington; to the Committee on Invalid Pensions.

By Mr. ROBSION of Kentucky: A bill (H. R. 15613) granting an increase of pension to Woodard Hensley; to the Committee on Pensions.

By Mr. SWING: A bill (H. R. 15614) authorizing the Secretary of the Treasury to pay to Eva Broderick for the hire of an automobile by agents of the Indian Service; to the Committee on Claims.

By Mr. UNDERWOOD: A bill (H. R. 15615) granting an increase of pension to Amelia Blosser; to the Committee on Invalid Pensions.

By Mr. VINSON of Georgia: A bill (H. R. 15616) granting six months' pay to H. M. Cawley; to the Committee on Military Affairs.

Also, a bill (H. R. 15617) to compensate H. M. Cawley for the loss and death of his son, Edward S. Cawley; to the Committee on Claims.

By Mr. WELCH of California: A bill (H. R. 15618) for the relief of Thomas H. Dowd; to the Committee on Military Affairs.

By Mr. WILLIAMS of Illinois: A bill (H. R. 15619) granting an increase of pension to Elizabeth Glardon; to the Committee on Invalid Pensions.

By Mr. WILLIAMSON: A bill (H. R. 15620) granting an increase of pension to Lucy Alvira Coonen; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

8065. By Mr. CRAIL: Petition of Democratic Luncheon Club, of Los Angeles, Calif., favoring and commending the Colorado River project; to the Committee on Irrigation and Reclamation.

8066. By Mr. DAVENPORT: Petition of citizens of Oneida County, N. Y., favoring enactment into law of House bill 11410; to the Committee on the Judiciary.

8067. By Mr. GARBER: Petition of the Kiowa, Comanche, and Apache Tribes of Indians of Oklahoma, protesting against the appropriation of any funds from what is known as "Red River money" for the purpose of constructing a hospital, or for the maintenance of the Kiowa Indian Agency's operating expenses; to the Committee on Indian Affairs.

8068. By Mr. McCORMACK: Petition of Cumann Bhreandain, St. Brendan Society, Mary C. O'Connor, 10 Marlboro Street, Belmont, Mass., secretary, urging repeal of the so-called national origins in the immigration act; to the Committee on Immigration and Naturalization.

8069. By Mr. O'CONNELL: Petition of the Illinois Valley Protective Association, Peoria, Ill., favoring the passage of the Smoot bill (S. 4689 and H. R. 14116), to provide for Federal loans for reclamation purposes; to the Committee on Irrigation and Reclamation.

8070. Also, petition of Ed. S. Vail Butterine Co., Chicago, Ill., opposing the passage of the Haugen bill (H. R. 10958) to amend the definition of oleomargarine; to the Committee on Agriculture.

8071. Also, petition of the Maritime Association of the Port of New York, favoring amendments to the laws, through which to clothe the courts with power adequately to punish all parties found guilty of the charge of theft and pilferage; to the Committee on the Judiciary.

8072. By Mr. WYANT: Petition of Pennsylvania Society, Sons of the American Revolution, John L. Walker, president, favoring passage of House bill 10171, to exempt from taxation new national headquarters of National Society Sons of the American Revolution; to the Committee on the District of Columbia.

8073. Also, petition of Pennsylvania Society Sons of the American Revolution, opposing repeal of national origins clause of present immigration law; to the Committee on Immigration and Naturalization.

8074. Also, papers to accompany the following bills: H. R. 15513, granting a pension to Susan Enos; H. R. 15514, granting a pension to Emma H. Woolsey; H. R. 15515, granting a pension to Victoria Davis; and H. R. 15516, granting a pension to Lillie M. Humphreys; to the Committee on Invalid Pensions.

SENATE

THURSDAY, *December 20, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Strong Son of God, Immortal Love, to whom all the ministries of life are sacraments of beauty, we thank Thee for the gladness of the morning which calls to holy dedication and the gentle peace of evening which speaks of quiet rest. Help us to a deeper knowledge of the world within, the glorious kingdom of the mind, the deep recesses of the soul, where we can hear Thy voice, comforting our sadness, banishing our care, urging us beyond ourselves to battle for the right. Free us from all pride and fear, from vulgar ambition and ignoble self-indulgence, that our desires may meet and answer to Thine own. Make us brave enough to bear the truth, strong enough to live in the light, and glad to yield ourselves to Thee, our Savior and our Friend. Amen.

RELIEF OF FARMERS IN FLOOD-STRICKEN AREAS

The VICE PRESIDENT. According to the unanimous-consent agreement previously entered into, the Chair lays before the Senate the joint resolution (S. J. Res. 182) for the relief of farmers in the storm and flood stricken areas of southeastern United States. The joint resolution is before the Senate as in Committee of the Whole. The question is on agreeing to the committee amendment, on page 2, line 12, to strike out the word "section" and insert the word "resolution."

Mr. CURTIS. Mr. President, nothing has been done with the Journal.

The VICE PRESIDENT. The joint resolution is in order before the reading of the Journal.

Mr. CURTIS. Mr. President, that can not be the case. Nothing can be done before the Journal is disposed of.

The VICE PRESIDENT. The Chair will state that the unanimous-consent agreement sets aside all rules of the Senate.

Mr. CURTIS. I do not care to discuss the matter with the Vice President, but Rule III specifically provides that—

> The Presiding Officer having taken the chair, and a quorum being present, the Journal of the preceding day shall be read.

The VICE PRESIDENT. The unanimous-consent agreement provides that the joint resolution shall be the first order of business this morning. Without objection, the reading of the Journal will be dispensed with and the Journal will be approved.

Mr. KING. Mr. President, let the joint resolution be read.

The VICE PRESIDENT. The joint resolution will be read.

The Chief Clerk read the joint resolution (S. J. Res. 182) reported yesterday from the Committee on Agriculture with an amendment, as follows:

> *Resolved, etc.*, That the Secretary of Agriculture is hereby authorized, for the crop of 1929, to make advances or loans to farmers in the storm and flood stricken areas of the southeastern United States where he shall find that an emergency for such assistance exists for the purchase of seed of cotton, corn, legumes, and vegetable crops, feed for work stock, and fertilizer, and, when necessary, to procure such seed, feed, and fertilizers and sell the same to such farmers. Such advances, loans, or sales shall be made upon such terms and conditions and subject to such regulations as the Secretary of Agriculture shall prescribe, including an agreement by each farmer to use the seed and fertilizer thus obtained by him for crop production. A first lien on the crop to be produced from seed and fertilizer obtained through a loan, advance, or sale made under this section shall, in the discretion of the Secretary of Agriculture, be deemed sufficient security therefor. The total amount of such advances, loans, or sales to any one farmer shall not exceed the sum of $3,000. All such advances or loans shall be made through such agencies as the Secretary of Agriculture may designate. For carrying out the purposes of this section there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $15,000,000, to be immediately available.

The amendment of the committee was to strike out, on page 2, line 12, the word "section" and insert the word "resolution," so as to make the sentence read:

> For carrying out the purposes of this resolution there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $15,000,000, to be immediately available.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

Mr. SMITH. Mr. President, the Senate is familiar with what occurred when the Porto Rican relief measure was here on both occasions; first, when it was introduced by the Senator from Connecticut [Mr. BINGHAM], and again when it was called up for consideration and finally passed. I endeavored on both occasions to make my position clear. The agreement that was reached was that the matter now covered by the pending joint resolution should be referred to the Committee on Agriculture and Forestry. This was done.

Yesterday morning we had a meeting of that committee. Representatives of the districts, including all the States that were so seriously damaged, were present. They confirmed what I had already outlined before the Senate. The condition that

exists in the States that were named specifically—Florida, Georgia, South Carolina, and North Carolina—was fully explained to the committee. After full hearing of the testimony given by parties representing those States the committee members present voted unanimously to report the joint resolution favorably.

It is not necessary for me to go into detail as to the condition that exists. I tried to do so fully when the matter was before the Senate heretofore. The Senate did not hesitate, and I was glad to join with them in the relief, so far as possible, of the distressing conditions in Porto Rico. I said then, and I repeat now, that in extending aid to the distressed Porto Ricans it did not in any manner lessen our duty to relieve the distress of a greater area and hardly less in degree that exists in the States I have named. The precedent has already been established, and I for one think it is a proper precedent. The Government of the United States represents the concentrated force of all the American people expressed in our organized society, and it does seem to me that it is a happy expression of the desire of all the people to aid any part of them who may be distressed. I voted gladly and cheerfully for the Porto Rican relief measure, and as I said then and repeat now, I think fellow feeling makes us understand the situation more clearly—at least more forcefully—than those who are not in like circumstances can understand it.

Half of my State, so far as agriculture is concerned, was affected by the storm and is in a condition that makes it almost impossible for the people to carry on unless they shall receive relief. Not alone is this a private thing. There has been extended to those people the quasi hand of the Government in the form of our intermediate credit banks and other institutions furnishing, as we had hoped, financial aid in a form that would be more suitable and available to agriculture; but they are powerless in these circumstances under the law even to grant a modicum of relief.

Now that the committee has reported and in pursuance of the promise made and the understanding had, the measure is before the Senate and the issue now is whether or not there shall be extended in as good faith to the citizens of this immediate country, who have been affected as the Porto Ricans were affected, the same measure of relief that was granted Porto Rico.

Mr. BORAH. Mr. President, will the Senator yield?

Mr. SMITH. I am glad to yield to the Senator from Idaho.

Mr. BORAH. I have never been informed in anything like detail as to the nature of the injuries or the nature of the devastation created by the storm.

Mr. SMITH. I will state to the Senator that I made the explanation before the Senate day before yesterday and it was confirmed yesterday before the committee. For the first time in the history of our State, so far as any meteorological record has been kept, from about the 16th day of June until the 19th day of September we had a precipitation that approximated 50 inches. During the growing period of the crops we had unspeakable and unprecedented torrents of rain. That extended through parts of Florida, Georgia, and South Carolina. The ground was sodden and the streams were full to overflowing, and then, as a culmination there came the Porto Rican or tropical hurricane which struck our section on the 19th of September. The crops, as I indicated, had been previously injured and devastated. The hurricane was accompanied by a wind which in our section reached a velocity of 90 miles an hour, according to the Government records, with a rainfall greater in the space of time in which it fell than any preceding torrent which had fallen, so that the rivers already at flood could not take care of the additional amount of water. Areas were covered to a depth of anywhere from 4 to 15 feet; farm lands and houses were submerged, livestock destroyed, corn and cotton crops ruined. The region stood in that condition for more than two weeks, so that when the water receded the entire area had practically been denuded of everything. That is now the condition.

Mr. BORAH. Mr. President, may I ask the Senator what is the extent of territory in the condition which he has described?

Mr. SMITH. The devastated region extends from about the Savannah River on the southeast up nearly to Wilmington, N. C., covering almost one-half of the State from just below what we call the beginning of the coastal plain to the coast.

Mr. FLETCHER. Mr. President, will the Senator from South Carolina yield to me?

Mr. SMITH. I yield.

Mr. FLETCHER. In answer to the inquiry of the Senator from Idaho [Mr. BORAH], I should like to quote from the preliminary summary report of the Red Cross of September, 1928. It says:

> In Florida the centers of greatest destruction were in the counties of Palm Beach, Broward, Okeechobee, Martin, and Hendry. More than 1,800 persons were believed to have been killed—

That number turned out to be an underestimate. I think the number of killed was over 2,000—

> mostly by drowning, and approximately 1,800 people were injured; 31,615 homes and other buildings were destroyed or damaged and agriculture suffered heavily. The problem of unemployment, which often accompanies disasters, added to the seriousness of the situation. In the Lake Okeechobee area water covered a large section of rich agricultural land, due to the overflowing of the lake. This water remained on the land for weeks and to date is still retarding the progress of permanent reconstruction measures in many places. More than 18,000 families, or 60,000 individuals, were affected by property losses throughout the entire Florida hurricane area.

A million acres of land—mostly agricultural land—were seriously affected and the waters of the lake piled up by the storm were thrown over the lower rim and drowned a great many people.

Mr. BORAH. May I ask the Senator from South Carolina what is the estimate reported by the committee for the proposed relief? Is it the same as when the joint resolution was originally introduced?

Mr. SMITH. It is exactly the same. The terms were gone over in committee which collaborated with the officers of the department, and followed closely the precedent heretofore set.

Mr. President, this is the condition. I know of course that there will be many who will be skeptical but even in the case of the appropriation for feed which we made I am informed that approximately 80 per cent of the advances so made have already been returned, and I am confident that with this aid to the distressed people they will be able practically to return this amount in the course of time. We, however, must recognize that out of the abundance of those who are not afflicted should come aid to those who have been. I have letters here which I have not seen fit to put into the RECORD from substantial, trustworthy individuals to the effect that unless this aid shall be extended, and extended at once, more than 60 per cent of the inhabitants of this region who have heretofore been engaged in agriculture must find other employment.

Mr. LA FOLLETTE. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Wisconsin?

Mr. SMITH. I yield.

Mr. LA FOLLETTE. May I ask the Senator whether any estimate has been made of the approximate damage in this area caused by the flood and storm?

Mr. SMITH. There was an approximate estimate made by the director of the agricultural extension service in my State, collaborating with members of the extension service in Washington, and the amount carried in this joint resolution is the result of their approximate estimate. It is proposed to afford relief to people in five States.

I wish to say that some question has been raised as to a provision for the purchase of fertilizer. Those Senators from the Western States who are in sympathy with this proposition, perhaps, may not realize that the application of fertilizer—artificial fertilization—is just as essential to the coastal plain from Maine to Florida as is irrigation to the land in the West. The land of the coastal plain is highly productive under an application of concentrated fertilizer but it is not productive, generally speaking, without such fertilizer. The greatest item of cost on our farms is the fertilizer bill. There is expended something like $50,000,000, if I recall the amount correctly, spent each year in South Carolina for the purchase of fertilizer. Fertilizer is used perhaps more extensively in the region directly affected by this disaster than in any other portion of our State. Therefore, a provision for seed, unless accompanied by a provision whereby the land could be fertilized would be futile. When so fertilized, perhaps, this land is as productive per acre as is any land in the country.

Mr. FESS. Mr. President, will the Senator from South Carolina yield to me?

Mr. SMITH. I yield.

Mr. FESS. The joint resolution is considerably broader than any similar measure we have heretofore adopted, is it not, in extending beyond the furnishing of seed and including several other items?

Mr. SMITH. No. We passed one such measure last year, which was lost during the filibuster here, though it had passed both Houses. The reason of this extension, as I was trying to explain, is: Heretofore the major portion of the relief asked was for seed alone, because those making application for relief did not need any fertilizer and the hay crops and the ordinary ani-

mal food crops had not been so totally destroyed as they were by this inundation of water lying on the land indefinitely in the region to which I refer.

It was practically a wiping out of all of the resources of the ordinary farmer because of the water and the effect of the wind. Some of us personally saw the conditions. In what ordinarily would be called upland, in our parlance, rivers rising in the mountains of our State, and all of them emptying into certain channels, overflowed to such an extent that the farmers were out in boats trying to save a little corn which they saw above the water in their cornfields. Testimony was given yesterday that some of them tried to gather their peanuts and waded into the water to try to get them out before they had sprouted and soured. The sweet potato crop had sprouted or was rotting on the ground, and the hay was covered with a silt deposit from the water that stood over it. I wish the Senator from Ohio could have seen the conditions himself. Now we are asking that an appropriation shall be made so that these people may have some feed for their work animals as well as fertilizer to aid them in making crops.

Mr. FESS. Mr. President, I think I would have no hesitancy in voting for the measure if it were limited to seed, and I wonder whether the Senator from South Carolina can not agree to an amendment of that kind?

Mr. SMITH. To do what?

Mr. FESS. To limit the relief to a supply of seed.

Mr. SMITH. Mr. President, such a thing would be absolutely futile. I wish the Senator from Ohio could understand that unless the farmers are helped to buy fertilizer, which is the sina qua non in the States affected—and there is not a Senator from that section who will not testify to that fact—the use of seed would be an idle gesture.

Mr. President, I want my colleagues to be thoroughly familiar with the facts. I am setting them forth just as they are, and what I say is subject to the corroboration of my colleagues from the stricken region.

Mr. BORAH. Mr. President——

Mr. SMITH. I yield to the Senator from Idaho.

Mr. BORAH. I should like to ask the Senator from Ohio, if the Senator from South Carolina will permit me, why he would confine the relief to be afforded to the supplying of seeds, if the ground would not bear anything after the seeds were planted?

Mr. FESS. I had in mind the precedent which we are about to establish. Heretofore we have not, as I remember, gone farther in affording relief in such cases than to make provision for a supply of seed.

Mr. BORAH. I supposed the objective we have had in mind all the time was relief.

Mr. FESS. Yes.

Mr. BORAH. And if we can only accord relief by enlarging the scope, I should suppose that would be the proper thing to do. In other words, heretofore, perhaps, the furnishing of seed was sufficient to effectuate relief, but, according to the facts here, it does not seem to be so.

Mr. FESS. That is the question that I am raising—whether the situation can not be satisfied by limiting the joint resolution to supplying seed.

Mr. GEORGE. Mr. President, will the Senator from South Carolina yield to me?

Mr. SMITH. I yield.

Mr. GEORGE. With the Senator's permission, I should like to say that the furnishing of seed would not reach this situation. If the purpose of Congress is to extend aid, it will be necessary to include fertilizer. When a case of emergency is found by the Secretary of Agriculture to exist, as the Senator from South Carolina has said, fertilizer is necessary as well as seed.

Then there is an additional reason: This is not an appropriation to be distributed to distressed farmers without the hope of return. It is an appropriation to be loaned by the Secretary of Agriculture where he finds an actual emergency existing in any part of the region of Florida, Georgia, or South Carolina, such as is described in this resolution. The loan is, of course, to be secured, and under the custom prevailing it will be impossible properly to secure a loan merely for the seed with which to plant the crop. The security must necessarily cover the crop; and the crop can not be separated into two forms of security, so to speak. In other words, if the seed is to be supplied, the land must be fertilized before a crop can be grown, and the Government can obtain real security for the advance necessary to cover both the seed and the fertilizer.

Ordinarily, the furnishing of seed might meet an emergency of this kind. That could only be true where a large expenditure for fertilizer was unnecessary. With us, it is absolutely indispensable. Since the Government would not make any loan in any emergency case in any part of these three States without at least a first lien upon the crop, it would be most difficult for the farmer to obtain his fertilizer upon a second or a third lien. Therefore it is not only advisable from the standpoint of the Government, if loans are to be made at all, but it is indispensable to the farmer that he be able to procure money for seed and for fertilizer, so that he may execute a lien on his crops insuring the repayment of the money.

Mr. FESS. Mr. President——

Mr. SMITH. I yield.

Mr. FESS. I had not gone into the situation fully. I simply read the joint resolution, and thought it was going further than we go ordinarily; and I was somewhat tardy about giving my support to the joint resolution, although it is a relief measure, unless it is absolutely essential. I rather think the observations made by the Senator from Georgia have explained the matter satisfactorily.

Mr. GEORGE. Mr. President, if the Senator will permit me to make an additional statement, while the territory in which this relief is to be administered is generally described as the Southeastern States, yet every loan is to be made by the Secretary of Agriculture under such rules as he may prescribe; and, reading the joint resolution, of course, the Secretary of Agriculture will extend aid in no instance except where an actual emergency is found to exist as the result of the storms which commenced in Florida on August 11 and continued through the storm of September 19.

Mr. President I do not believe there will be ultimate loss to the Government in this instance, because the money is to be loaned; it is to be loaned upon fair security; it is to be loaned to farmers residing in a section where the making of crops is not experimental; where, through generation after generation, the farmers have been able to make a crop at least sufficient to repay the primary advances for seed and for fertilizer.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from North Carolina?

Mr. SMITH. I yield.

Mr. SIMMONS. Am I to understand the Senator from South Carolina to say that he has included in his joint resolution only Georgia, South Carolina, and Florida?

Mr. SMITH. Oh, no; the joint resolution speaks for itself. It refers to the Southeastern States affected by the storm. That includes the Senator's State as well—Florida, Georgia, North Carolina, and South Carolina.

Mr. SIMMONS. The Senator has limited the loan that may be made to one person to a thousand dollars, has he?

Mr. SMITH. No; $3,000.

Mr. SIMMONS. I simply wanted to say, Mr. President, in addition to what has been said by the Senators from South Carolina and Georgia, that probably the effects of the storm to which they have alluded were not quite so disastrous in North Carolina as they were farther south; but in all the coastal counties of North Carolina the damage was very great.

Mr. SMITH. In some portions it was almost equal to the damage in any of the others.

Mr. SIMMONS. In some portions it was equal to that in South Carolina. I do not know so much about Florida.

The Senators from South Carolina and Georgia have correctly stated the situation with reference to the necessities of the farmer. The crops which we have in North Carolina, South Carolina and Georgia are entirely different from those cultivated in the West.

The question of seed is usually not nearly so important with us as it is in the West. We cultivate cotton, tobacco, and corn. The seed is an important item, but not anything like so important as it is in the sections where they grow small grain and where a large quantity of seed is necessary in order to cover a moderate-sized farm.

Mr. SMITH. May I state to the Senator right there, that in this particular instance, perhaps for the first time in the history of this region as to corn and cotton, the excessive rain preceding the storm, and the storm coming at a time when the cotton was open, and it being very warm, most of the seed germinated or was so affected by the moisture that under a test made—I presume by a Government official—I am informed that there was but 30 per cent germination; 65 per cent of the cotton-seed tested was unfit for planting, and that condition covers a vast area. I know it has affected mine, but I have not yet had tests made to enable me to say to what extent. As for corn, the corn used for seed purposes throughout the coastal plain was practically destroyed.

Mr. SIMMONS. The Senator is right. I have myself seen cotton in the field where the lint was washed away to such an extent that the seed could be seen; and, of course, damage would follow, and germination be made impossible with such seed under those circumstances. So it would be necessary for

the farmers to buy seed. Ordinarily, they save their seed; but this year a great many of the farmers would not feel safe in doing that.

While the question of seed supply is negligible as compared with that of fertilizer, it would be very helpful; there is no question about that; but if the bill were limited to seed alone, I do not think it would be worth while to pass it.

Mr. SMITH. No, no.

Mr. SIMMONS. The subject of fertilizer is one of great importance to these people. I want to say to the Senator from Ohio that the people who cultivate most of the crops in my State, particularly in eastern North Carolina—and I assume that is true especially in South Carolina and Georgia—are people of very moderate means. They are not landowners. They are what we call tenants. They rent a small farm—a two or three horse farm, as we call it—and, as a rule, they have to borrow money for their fertilizer every year; either that, or they have to pay very high time prices.

At one time it was an easy matter for these tenants to borrow this money from the banks upon what are known as chattel mortgages, but that time has now passed. Our banks have stopped lending on chattel mortgages.

The farmers, as a rule, have to mortgage their crops to the fertilizer producers, and have to pay the high time prices. Generally, I should say, the interest and the price increase on time transactions which they must pay amount to at least 25 per cent.

The fertilizer people in our section are also in trouble. The banks are in trouble. The small tenant farmers are in trouble. All of those circumstances combined create a situation where, if the farming operations of those sections are to be carried out successfully this year, as in former years, it is absolutely necessary that we have some measure of relief from some other source. If it is not obtained from the Government, we must shift and try to get it somewhere else. We can not get it in our immediate section.

The Senator is right. In my section of the country our lands are not productive unless they are highly fertilized. The fertilizer bill, therefore, is the main item of cost in making a crop in that section; and these tenants have to secure it in any way they can. I really apprehend that unless something is done to relieve this situation it will result in a very grave curtailment of production in the southeastern States.

At best, Mr. President, fertilizer is very expensive. A great many farmers use as much as a ton of fertilizer per acre. Certain high-grade fertilizer will cost from $35 to $40 a ton. Sometimes only half a ton is used; sometimes not quite so much; but fertilizer is just as important to us, as the Senator said, as irrigation is to the western country. In the western country irrigation is furnished the farmers by the Government, of course, upon terms of repayment; but our farmers are not asking charity. They expect to pay back this money; and if the Secretary of Agriculture is ordinarily cautious he will be able to make loans that will be adequately secured, and the loss to the Government, if any, will be negligible. It certainly will not be any greater than the loss to the Government through affording irrigation facilities in the West.

Mr. SMITH. I should like to state in this connection, speaking of this necessity for fertilization, that during the World War the price of nitrogen went to something like $100 a ton. It is now about $60 a ton. I got through an appropriation of $20,000,000 to enable the Government to go down to Chile and get this stuff and sell it to the farmers. We bought that fertilizer through the Government appropriation, never lost a dollar, and when the accounts were settled up we found that we had estimated a little too much for the cost of distribution that we had added to the cost of the stuff itself, and the Government was the better by $50,000. In other words, every dollar that was appropriated for the purchase and sale of this ingredient to the farmers on the Atlantic seaboard was repaid and there was $50,000 excess.

Mr. President, I have stated the situation; and I hope now this body will grant to our people the same relief that they have granted to the people of Porto Rico.

Mr. BLAINE. Mr. President, will the Senator yield for some questions?

Mr. SMITH. I yield.

Mr. BLAINE. I desire to inquire if either of the States has taken any action, through its legislature or otherwise, to afford this relief?

Mr. SMITH. Mr. President, I do not doubt that when the legislature meets in my State it will do all that it can, but the Senator, without my going into any very great detail, can understand why the relief from that source is very doubtful. I do not care to discuss here now the situation which may exist in the different States of the Union, but I am sure the Senator will understand that we would not have come here to ask relief from the Government if it had not been a case of necessity.

Mr. BLAINE. I would like to inquire of the Senator if any special session of the legislature has been called.

Mr. SMITH. In my State the legislature meets in January.

Mr. BLAINE. There was no call for a special session for this emergency?

Mr. SMITH. No. I think the authorities recognize that if they called the legislature there would scarcely be any available means of relief on account of the distressing condition that has existed in the purely agricultural States for the last eight or nine years.

Mr. BLAINE. I would like to make another inquiry. Is there anything in the constitution of either of the States affected which would prevent them from furnishing the relief to those in distress in their particular States?

Mr. SMITH. I think there is.

Mr. BLAINE. I observe that the resolution fixes the maximum at $3,000; that is, for seed, fertilizer, and feed for work stock. It would appear, just on a casual survey of the situation, that anyone who required $3,000 worth of seed, fertilizer, and feed for work stock would be the owner of a very large farm undertaking or estate. Why should not such a person undertake to obtain a loan through the sources that are available?

Mr. SMITH. If the Senator is thoroughly conversant with the ordinary condition of agriculture, he will know that the larger the holding, the greater the liability, if it is in farm land. I am glad the Senator asked that question for this reason—and I will submit the matter to any one owning land to any extent—that the landlord is perhaps in as bad condition as the tenant, or worse.

Mr. SIMMONS. I want to say to the Senator that a great many of them already have their lands encumbered in the Federal loan banks.

Mr. SMITH. To the limit.

Mr. BLAINE. In other words, they are land poor.

Mr. SMITH. They are worse than land poor. Their lands have been mortgaged, these last few years, giving rise to the paramount issue in America of farm relief. We need not go into that. The Senator certainly is advised, if he is acquainted with the farm at all, that the average tenant has no resources except the immediate crop, and he does not have very much of that.

Coming to the question of $3,000, where a man who has 8 or 10 or a dozen tenants on his farm, he is held responsible for the living of every one of those families. To illustrate, take one of my farms. I have some 10 or 12 families which run a crop on the land. They have no financial standing, they have no credit.

I furnish them their fertilizer, their stock, the feed for the stock, and a sufficient amount to feed and clothe the families while they are making their crops; and we share the proceeds of the crop, so that I may be able to pay back my loans and they pay for the advances they make. Unless I am able to get a sufficient amount to enable those poor people to live, they can not get along at all.

Mr. BLAINE. Mr. President, will the Senator submit to another question?

Mr. SMITH. Certainly.

Mr. BLAINE. Generally throughout the United States individual farmers, running into the tens of thousands, lose their feed crops. In those cases, as far as I know, there has never been any legislative relief, though the exigency of the case is just as serious as where there is a great group affected by some disaster. Some farmers can not obtain relief, and so they sell their livestock and await the beneficence of Providence to enable them to produce a crop in the succeeding year to take the place of that which they have lost. Is not this the first instance where relief has been offered or suggested to include the feeding of livestock?

In 1922 or thereabouts, when the drought affected the wheat-growing States of the Northwest, the farmers there were permitted to borrow not exceeding $300, as I remember, for the purpose of purchasing seed wheat. If the suggestion of this measure is to become a public policy, then there should be relief in the case of these individual farmers, who no doubt number tens of thousands, who have suffered the loss of their crops and their buildings and their barns on account of local tornadoes and cyclones devastating only small areas, but innumerable areas throughout the country, some of them losing their crops through drought, some in the lowlands and valleys through floods, some losing their buildings on account of conflagration, and many other causes of tremendous destruction. Those individual farmers suffer just as keenly as do the sufferers where the devastation is of a wider extent, so far as the individuals

are concerned. While they are spread over a larger area, their losses may be as great or greater. Would the Senator, therefore, suggest that in those cases there ought to be general legislation or specific legislation?

Mr. SMITH. Where the devastation does not cover such a wide area, and there may be few who suffer, the local communities can absorb the loss. We have had tornadoes in our State. The Senator speaks of us establishing this as a policy. I hope the weather will not establish as a policy this thing that occurred for the first time in the history of the country. If it does, we will not come back. If it is to be a permanent policy of the weather that a hurricane, the like of which has never been recorded in the history of the Weather Bureau, shall come on the heels of an unprecedented rain precipitation of 90 days, if that is to become the policy of the weather, then I quit now. We are no more likely to have this a policy than the weather is likely to have this disaster as its policy. But the Senator will not gainsay that when a disaster as extensive as this and as destructive as this comes, the organized society of America may not respond through an expression of the Senate.

Mr. BLAINE. Mr. President, I just want to suggest to the Senator that I am not opposing his resolution. I have every reason, so far as I am concerned, to promote by legislation the interests of those who suffer because of some terrible calamity that befalls them through no fault of theirs; but I was endeavoring to obtain the Senator's views from a general-policy standpoint, because where the loss is an individual loss it is just as great to the individual as is the loss to the respective individuals over a large area.

Where there is a large area I appreciate that the locality may have been wiped out, and therefore local aid could not be obtained; but I was inquiring whether or not the area was so great or the devastation so great and the financial distress so great that the respective States could not come to the relief of their citizens within their own State.

Mr. SMITH. That is the situation.

Mr. BLAINE. The question with me is as to whether or not this policy should be established generally. I do not think I am in disagreement with the Senator on the general proposition that if this devastation was so great as to wipe out great areas of productive wealth in the farming regions of these States, and that it would be rather impossible for the communities or the State to produce or afford the relief, then I think out of the generosity of the people of the whole country there should come relief.

Mr. FLETCHER. Mr. President, I will mention to the Senator that the area in Florida involved is about a million acres of land, and the loss arising from this storm, unprecedented in our history, as the Senator from South Carolina has said, is estimated at from sixty to one hundred million dollars.

Mr. BLAINE. Just one other question, if the Senator from South Carolina will permit. I inquire whether or not there ought not to be some provision respecting the application for a loan under the measure?

Mr. SMITH. We have left that to the discretion of the Secretary of Agriculture. That is exactly how we dealt with that matter in reference to the seed; it is the identical wording.

Mr. LA FOLLETTE. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. LA FOLLETTE. I note that in 1922, when an act was passed for the purchase of seed in certain crop-failure areas of the West, a provision was added fixing a penalty for anyone who knowingly made any false representation in an effort to obtain benefits under that act. I am entirely in sympathy with the purposes of the Senator's resolution, and I wish to inquire of him whether or not he would object to having such a proviso added to his resolution. For the Senator's information, I will read that portion of that act.

Provided, That any person who shall knowingly make any false representation for the purpose of obtaining an advance, loan, or sale under this resolution shall, upon conviction thereof, be punished by a fine of not exceeding $1,000, or by imprisonment not exceeding six months, or both.

I merely suggest to the Senator that the area involved is rather great and that it might be some protection to the Secretary in administering the resolution, assuming that it passes, if such a penalty were provided.

Mr. SMITH. I think there would be no objection, only I think it would be a futile thing. We would have to imprison them, because they would not have anything with which to pay a fine. Seriously, however, I do not see any objection to it.

Mr. HEFLIN. Mr. President, I do not think this amendment should be put on the pending measure. I fear that it would be a reflection on the people of this afflicted area in South Carolina, Georgia, Florida, and a portion of my State. No such provision was made in the Porto Rican measure providing for loans to individuals of not over $25,000 each. Under the pending joint resolution we can not loan more than $3,000 to any one man. The matter the Senator has in mind is sufficiently safeguarded in the resolution; it is taken care of because it provides that the Secretary shall make no loans until he is satisfied, on the facts submitted to him, that it is a meritorious case, and then he is to be provided with certain securities and is to be satisfied with the paper executed to him for the Government. I think that is sufficient.

Of course, I would be in favor of punishing anybody who would undertake to defraud the Government or to practice deception on it, but since we approved the measure and have extended aid to the people of Porto Rico, where a few millions have been appropriated to grant relief to them, without providing any penalty for any such deception practiced upon the Government, I think it is not proper to put such a provision in this resolution regarding citizens of the United States who have been so sorely afflicted as those people have in the recent floods of the South.

Mr. SMITH. I have no objection to the amendment for the reason that I am sure there will be no case of the kind in that region, and if there should be it ought to be punished. I do not think that any such case will arise. Personally, I have no objection to the amendment. I do not think it is a reflection on anyone to safeguard the loans.

Mr. LA FOLLETTE. Mr. President, if the Senator will yield to me I would like to make a reply to the remarks made by the Senator from Alabama.

Mr. SMITH. I yield to the Senator from Wisconsin.

Mr. LA FOLLETTE. I should like to say to the Senator from Alabama that the Senator from Wisconsin intends no reflection upon the citizens of the afflicted area.

Mr. HEFLIN. I am satisfied of that.

Mr. LA FOLLETTE. The fact is that when a very similar act was passed in 1922 for the relief of the crop-failure areas in the Northwest, where the amount to be obtained by an individual was limited to only $300, I find that this provision for penalty for false representation was contained. It seems to me, in fairness to the Cabinet officer who will be required to enforce the terms of the resolution, should it be passed, that it would be a matter of wisdom to provide such a penalty. I shall offer the amendment at the proper time when I may obtain the floor in my own right.

Mr. HEFLIN. Mr. President, if the Senator from South Carolina will permit me——

The PRESIDING OFFICER. Does the Senator from South Carolina yield further to the Senator from Alabama?

Mr. SMITH. I yield.

Mr. HEFLIN. There are a number of instances where Congress has appropriated money for the relief of people who had suffered by reason of fire or flood or earthquake. I find an appropriation was made by Congress to the French West Indies to relieve those people who suffered from an earthquake. I remember voting for an appropriation when the San Francisco earthquake came and did a great deal of damage there, killing a great many people and destroying a great deal of property. I remember when the fire swept Salem, Mass., we voted the amount asked for without any question. I remember when the World War was raging Congress appropriated $100,000,000 for the distressed and starving people of Europe. I remember when we opened our hearts and appropriated $20,000,000 at one time for the relief of suffering people of Russia. So Congress has risen nobly to those occasions, and I have no doubt it will do so now.

I am on the committee that reported the resolution favorably. The Senator from South Carolina made a statement before that committee, as did the Congressmen from South Carolina, who appeared before us, showing beyond all question that the appropriation is needed. The same situation exists as to Georgia and Florida. Two or three counties in my State were involved, though I do not know to what extent and whether they will ask for relief or not. They are at liberty to do so under this resolution.

One of the witnesses testified that he saw, in this flood over in South Carolina, where the crops and even the houses were covered with water and the household effects were under water for days, the livestock destroyed, the crops destroyed, and these people now have nothing to subsist upon. They are destitute, very blue, and very despondent. As the Senator from South Carolina has said, if they do not get this relief, they have got to give up farm operations in that section and go somewhere and start life over again in a new field, if they can find anything

to do. I think Congress ought to appropriate the money, and I believe that it will do so.

Mr. SMITH. Mr. President, I have concluded my appeal to this body, and I now express the hope that the Senate will take the action which the situation justifies.

Mr. HARRISON. Mr. President, I would not now take the time of the Senate if I thought there was any chance of voting upon the pending joint resolution at this time. But it is generally known and understood here that there is a small-sized filibuster on, and that if the joint resolution should be voted on before 2 o'clock there would be a motion made to take up the so-called cruiser bill. Therefore it is the cruiser bill and the peace pact that I desire to discuss briefly.

I am sorry that the distinguished chairman of the Committee on Naval Affairs, the Senator from Maine [Mr. HALE], is not now in his seat, because I was in hopes that my honeyed words might appeal to him.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER [Mr. BURTON in the chair]. Does the Senator from Mississippi yield to the Senator from North Carolina?

Mr. HARRISON. With pleasure.

Mr. SIMMONS. I would ask the Senator from Mississippi if we could have action upon the joint resolution right away without any debate?

Mr. HARRISON. May I say to the Senator that I would gladly yield if we could get a vote on the proposition; but I understand that the Senator from Maine is going to make a motion to take up his naval cruiser bill before 2 o'clock in the event we pass the resolution, and there could be no debate upon the motion to take up that bill in that event and, therefore, that discussion of the joint resolution is to proceed until at least 2 o'clock.

Mr. KING. I will say to the Senator from North Carolina that there will be no vote upon the joint resolution now before us until about one minute before 2 o'clock.

Mr. HARRISON. That was the understanding I had.

Mr. SMITH. Mr. President, I did not clearly understand the remark of the Senator from Utah. Will he kindly repeat his statement?

Mr. KING. There will be no vote upon the joint resolution pending, because a number of us desire to speak, until about five minutes or one minute before 2 o'clock. I want to speak.

Mr. SMITH. I understand, but I want to call the attention of the Senate to the fact that the parliamentary situation ought no to be allowed, in the final outcome of this measure, to deny the suffering people the relief which the measure would give them. We ought to pass it to-day because the first of the year is nearly here when they must know whether or not they can carry on.

Mr. HARRISON. I agree with the Senator, but he heard what the Senator from Utah has said and what other Senators have said, so I am going to occupy the time of the Senate for a few moments in the hope that my admonition and appeal will be accepted by certain other Senators.

Mr. SIMMONS. Upon investigation I find the situation is very much as the Senator from Mississippi states. If the resolution is attempted to be passed now, it would just result in probable delay to accomplish some other purpose. I am reliably informed that immediately after 2 o'clock there will be no disposition to interfere further with the passage of the resolution of the Senator from South Carolina.

Mr. HARRISON. That is my understanding.

Mr. SIMMONS. I have been so informed.

Mr. HARRISON. Mr. President, two of the most important questions confronting the Senate are the proposed bills touching cruiser construction and the so-called Kellogg peace pact. I want it understood in the beginning that I am not opposed to an adequate Navy. I have never been styled in any sense of the word a pacifist. I have always voted for an adequate Navy and I hope I always shall.

I will assume for the sake of argument that the 15 cruisers provided for in the proposed legislation are needed by the Government to give to the United States a well-rounded Navy. I will assume for the sake of argument that the bill should have been passed by the Senate within a week after its passage last March by the House of Representatives. I will assume, for the sake of argument, that the Government has suffered a great deal through the negligence of those who have directed the destinies of this proposal. I will assume, for the sake of argument, that the Naval Board and the Navy Department and this administration were wrong a year ago when they said that in order for the Government to have a well-rounded Navy we ought to expend something over a billion dollars. I will further assume, for the sake of argument, that the Naval Board and the Navy Department and this administration were wrong when they put their support behind the House legislation at first and asked that more than $700,000,000 be appropriated to give us a well-rounded Navy. I will even further assume, for the sake of argument, that the administration now occupies the correct position in asking for an outlay of only $270,000,000 when formerly it asked for approximately $1,000,000,000 to give us a well-rounded Navy.

Assuming all those things to be true, yet the question that confronts me is, Why do we in one hand hold a peace pact for the preservation of peace throughout the world and in the other a bundle of explosives to burst upon the world? I want to address myself to the inconsistency of such a position. I want to address myself to the psychology of the situation that confronts the Senate. I wonder to myself what the peoples of the world will think of our attitude in handing to them at this particular time a peace pact renouncing war and at the same time, through the proposed bill, making plans and preparations for war?

Now, I am merely wondering how my genial and good friend from Maine, the chairman of the Naval Affairs Committee [Mr. HALE], is going to answer that proposition. I am wondering what this administration is going to say when it tries to reconcile those two views. Is there not some incongruity between the State and Navy Departments?

Mr. HALE. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Mississippi yield to the Senator from Maine?

Mr. HARRISON. I yield.

Mr. HALE. I can answer the Senator very easily when I get the floor with my bill, as I hope to do before long.

Mr. HARRISON. Yes; I know; but I hope that the words that I am going to speak will dissuade the Senator from bringing up his bill. I am wondering why, Mr. President, for more than eight months the distinguished chairman of the Naval Affairs Committee and the steering committee of this body sat supinely and made no effort, to speak of, to push the proposed cruiser bill to passage, but suddenly he was aroused just as the Foreign Relations Committee reports out the peace pact, and now wants to supersede it. Certainly such action is as much ridiculous as it is confusing.

Mr. HALE. Mr. President, the Senator from Mississippi knows very well that every attempt was made to bring up the cruiser bill, but that it was found impossible to do so.

Mr. HARRISON. I know that the Senator from Maine has in his own heart wanted to bring the bill up, but the trouble is that he has not been supported in his desire. The committee has not supported him and the administration has not supported him.

Mr. HALE. Yes; they have supported me in every way possible.

Mr. HARRISON. That puts them in a worse attitude than I thought they were. I can not understand how any administration that prates and proclaims to the world that it is for this peace pact can at the same time want to give the impression to the world that it is a lie and say that it is for building bigger armaments and undergoing an additional outlay of two hundred and seventy-odd million dollars for naval construction.

I am not unmindful of the fact that the report has been circulated by leaders of thought in this country, that editorials have been written, and men from the pulpit and the rostrum have proclaimed, that this proposed multilateral peace pact is but milk and water; that it does not mean anything; that it is not worth the paper on which it is written; that it is merely a gesture without courage back of it to put into effect any measure to prevent war and to preserve the peace of the world. I am not unmindful of all those caustic criticisms, and the attitude of the Senator from Maine and of the administration, if he is correct in the last statement he has made, would give dignity to some of those assertions that it is milk and water; that it is merely a gesture, that it is a fraud, that it is a sham, that it is a pretense; but for my part I will not accept that contention. I believe that the peace treaty is offered in good faith. I have more confidence in the administration than has my friend from Maine and some others in this body or elsewhere in the country. I can not believe that this administration would be guilty of such perfidious action as to say that the peace pact does not mean anything; that it is not offered in good faith. I say, Mr. President, that, while it does not go so far as I would go, it is a step in the right direction, and throughout my public service I have always accepted any proposals that tend to the peace of the world. This proposal was conceived in such a spirit. It means something. It means that if the nations who are signatories to it will abide by it, we shall have no more wars

because war is renounced, and the peace of the world will be preserved. But I say to my genial friend from Maine, I say to the steering committee of this body, I say to the administration and to the country, that if we would have the nations of the world believe that we are in good faith, that we are sincere in this proposal, that we believe it means what it says, we ought to get whole-heartedly behind it and unanimously support it. Do not let us do it faint-heartedly, do not let us tender it to the people as you would tender an invitation to me to come to your home to dinner and at the same time write a postscript saying "I do not mean it." That is what your unseemly action now would indicate. That is what the world will say if we offer this peace pact to the world, and at the same time set it aside, supersede it, and say, "Oh, let us build more cruisers; we need them to have a great Navy."

The late former chairman of the Naval Affairs Committee in the House of Representatives, one of the best men whom I ever knew, Mr. Butler, said when this bill was up for consideration on the floor of the House that it was but the beginning of a program that would call for an outlay of three and one-half billion dollars. If we are going to have peace in the world, if all the nations of the world agree here to renounce war and adopt nothing but policies that tend toward peace, why should we be so insistent at this time on appropriating—because that is what it means—more than $270,000,000 dollars to add to the armament of the United States?

Mr. President, under the present administration we have had eight years of vacillation and isolation. Already irreparable damage has been done to the influence of this Government in the eyes of the world. And at this time, it matters not to me from what source the suggestion comes, I am willing to help the administration make amends in at least some small way for its past deportment. In so far as this Nation is concerned, this peace pact is of value even though it marks the facing about and the end of a policy of isolation.

We are an essential part of the world. We have a vital stake in the peace of the world, and our economic and political interests are such that we can not afford to intrust them to others, and our obligations are such that they can not be discharged by others.

The peace pact "condemns a recourse to war and renounces it as an instrument of national policy." It pledges "the settlement of all disputes of whatever origin by pacific means." That is a great forward step in the progress of peace. In the actual renunciation of all wars the pact goes further even than the covenant of the League of Nations. Of course, the nations which are members of the league and are also parties to this treaty, and practically all of them will be, are binding themselves to much less than they did when they signed the covenant of the league. Under the covenant of the league, nations are permitted to go to war at the expiration of nine months in case they have lived up to their obligations to seek, during that period provided for by the covenant, a settlement of the disputes at issue. And this pact will fill a gap in the covenant of the league in that it even renounces resort to war after the nine months of conciliation and arbitration.

And so this pact, while it in no way affects the orderly operations in the interest of world peace as provided for in the covenant of the league, will broaden and make strong the obligations upon the part of the nations to preserve peace.

Before the establishment of the League of Nations it was deemed to be an essential prerogative of sovereignty for a nation to wage war whenever it saw fit. The nations which joined the league solemnly renounced that right, and this undoubtedly marked the greatest advance that has ever been made, or ever will be made, toward doing away with war as an instrument of national policy. It was through the genius and leadership of a great American that our Government made an invaluable contribution to world peace and justice through the establishment of the league and the World Court, which have in such a short time, and under many handicaps, including, I may say, the lack of support from the United States, more than justified the hopes that were centered about them. In the words of Elihu Root, one of the ablest of all American statesmen, uttered two years ago:

> The league in the political field and the court in the judicial field have been rendering the best services in the cause of peace known to the history of civilization, incomparably the best.

The league and the court were created at a time of great need, but, under the difficult circumstances that came in the wake of the World War that had shaken the foundations of civilizations, it was difficult to take such a forward step in the face of all the reactions to prejudice, greed, and passion that came after the war; and it would not have been possible to do so had it not been for the indomitable will and the courage and genius of Woodrow Wilson, who had a vision of a world organized for peace, which he never lost sight of, and who pressed forward with a steadfast purpose until he had reached an advanced position that is now occupied by most of the nations of the world. Russia and Mexico, torn by internal strife, held back, and our Government, listening to those who preached a crass and sordid materialism, or moved by partisan consideration, turned her back upon that great vision and refused to march in the big parade for the preservation of peace throughout the world.

And in consideration of this peace pact, presented yesterday by the distinguished Senator from Idaho [Mr. BORAH], at the instance of the Foreign Relations Committee of this body, given to us by this Republican administration, as a Democrat I refuse to do to some of my colleagues on the Republican side and to the administration respecting it what most of them and the administration did to us in the League of Nations fight.

I prefer to place the interest of the country and the cause of peace above party, and still hope, whether I am following the leadership of a Republican or a Democrat, for this great country to again carry the moral leadership of the world.

I am not deceived into believing that we can banish war by merely signing a treaty which frowns upon it, and then do nothing to prevent it. I believe that we have a bigger part to play in international affairs than we have played during the last eight years. We can not detach ourselves from the rest of the world and supinely sit, and disinterestedly say that we have no interest to serve, nor obligation to discharge in taking an active part in organizing the world for peace. If that is to be our Government's policy in the future, then I would say, it is better to let this treaty alone, because if we become parties to the treaty in that spirit, it may do more harm than good.

I am assuming that this peace pact is offered by this Government in good faith. I am assuming that this administration sees the error of its way and that many of those who refused to cooperate in making the league the great success that it is, have recoiled and are now willing to lend their influence in seeing that this Government play a man's part in world affairs.

I have never doubted the high motives and the fine qualities of sincerity that have prompted the present Secretary of State in his movements toward peace. As a distinguished Member of this body, Secretary Kellogg cooperated to the limit in standing by the cause of peace and in having this Government assume some of its responsibilities as a great world power in making the league a success. Those of us who were in the thickest of that fight will not forget that as a Senator at that time, the present Secretary of State used every effort and all of his influence upon recalcitrant Republican colleagues, that he might persuade them to agree to such reservations as would carry us into the league without sacrificing any of the sovereign rights of this Nation.

The suggestion of our Secretary of State to Monsieur Briand that this proposal of France for a separate pact between France and our Government be made a multilateral treaty, and other nations be invited to join, is in keeping with his conception and policies to prevent war and preserve the peace of the world through international cooperation and reciprocal obligations. When I vote for this peace pact, as I shall, I am confident, if those who direct the destinies of this Nation are sincere in their advocacy of it—and I believe they are—that it will lead to a more active policy upon our part in international affairs.

I know that if disputes are not to be settled by resort to arms, and that is what the peace pact obligates the signatories not to do, then means must be established by resorting to reason and conciliation either at the conference table or in the courts. So, while this peace pact does not provide the instrumentalities nor the agencies to which we and the other nations to it must resort, it is logical to suppose that it will be followed by other agreements or other understandings pointing the way in which these questions must be solved peacefully. The only agency in the world that offers the orderly processes through which questions that threaten war may be solved is the Covenant of the League of Nations. The irresistible forces of peace, security, and justice lead us toward it daily; and this is one of the steps carrying us in the direction of Geneva.

In 1921 we held a disarmament conference here in the city of Washington. We agreed upon a plan, and from that conference we went out and scrapped $400,000,000 worth of armaments. Secretary Hughes and President Harding at that time journeyed forth throughout the country and magnified the accomplishments of that disarmament conference. "Oh," they said, "we have achieved much." Then, they held another conference in 1927 to undo some of the things that were done in the 1921 conference, or to do what we had been told was done in 1921. That conference failed, and it failed primarily, because

we refused to set around a conference table and first dispose of questions, such as the freedom of the seas, for which we think we need a navy. I notice that in the debate in the House on this cruiser bill it was said, "Let us start the construction of these 15 cruisers immediately, because, you know, in 1931, under the action of the 1921 Washington conference, we are going to have another disarmament conference; so we want to get ready for it, and we want to have all these cruisers started and on the way to completion before we have that other disarmament conference. They might then order us to scrap them, as was done in the 1921 conference.

Why the proposed action is ridiculous in the premises! Let us put ourselves whole-heartedly behind this peace pact. I submit that there is no more urgent reason for passing the cruiser bill at this particular time than there was a year ago. I submit that if we want to, we can pass it six months from now just as easily; but if we want to show the world that we are really for peace, that this peace pact really means something, let us concentrate our efforts on that. Let us discuss peaceable questions, preparations and plans for peace, rather than at this particular time to be discussing and making preparations and plans for another war.

I submit that the psychology is bad, that it will destroy our prestige and work injury to our influence with other nations.

I know there may be some who will say that this peace pact will involve us in such controversy that we will need a gigantic navy in order to back it up. If that is the view of the administration, if that is the logic of the contention of the administration and those who support it here, then, of course, you admit in the beginning that your peace pact is worthless. If you think you need a great, big navy to help it out, construe it, and put it in force, all right; take that argument, if you wish; but I do not accept it.

I believe that the pact means what it says, and that we ought to invite other nations to join it, and that we ought to show them by our action here that we are whole-heartedly for it, and that we ought not to take up the consideration of the cruiser bill at this particular time. The measure of good that will come from our passing the peace pact will very largely depend upon the vitality we put into our action in its consideration.

At this season of the year when we are looking forward to the celebration of the coming of the Prince of Peace, when angels will be singing "Peace on earth, good will toward men," we are preparing to construct, in the circumstances, these 15 cruisers at a cost of $255,000,000!

I like to think, Mr. President, because there is much sound reasoning in the expression, of the words from the prayer of the old darky in Irwin Russell's Christmas Night in the Quarters, when he said:

> De sinfullness ob sin
> Is 'pendin' 'pon de sperrit
> What we goes an' does it in.

So let us show the right spirit in ratifying this peace pact. Let us make the world believe that we mean at least what we say; and let us defer this cruiser program until a more opportune time.

Mr. HARRIS. Mr. President, I am sorry to differ with my friend from Mississippi [Mr. HARRISON]. I am in favor of the Kellogg treaty and also the cruiser bill which he opposes. I think Secretary Kellogg has done a great work, and every one should commend him for it. I should like to see the treaty ratified before Christmas, and I will vote to put it ahead of the cruiser bill; but I am just as strongly for the cruiser bill as I am for the Kellogg treaty. I am proud of the fact that I have voted for every measure that would bring about arbitration in settling our differences with other nations instead of going to war, which I consider a relic of barbarism.

I am glad to see the American Legion and the Women's Auxiliary of the American Legion here urging the passage of the cruiser bill. I believe that it is for the protection of the people of this country and that it will avoid war. Mrs. Boyce Ficklen, jr., of Washington, Ga., one of the leading women of my State, is president of the Women's Auxiliary of the American Legion, and with the other officers she has been here urging the passage of the cruiser bill.

Everyone in this country and in the world knows that the United States Navy and Army never will be used for a war of aggression; but the possession of this Navy will make other nations have more respect for us, and will keep us out of war. Congress owes it to the children of coming generations to do everything possible to avoid another war, and George Washington and many of our great men have urged us to prepare in peace times so as to avoid war.

I hope the Senator from Idaho [Mr. BORAH] will press this treaty every day and night until it is voted on. I am quite willing to meet here every day and at night in order to pass the treaty. I hope we can vote on it, as I said, before the Christmas holidays; it would be most appropriate to pass a measure that would help bring about international peace at Christmas time; but I also hope that Senators will not oppose the cruiser bill simply because of the ratification of the Kellogg treaty, as they will both help in keeping peace with our neighbors in all parts of the world.

I was very much interested in reading in the CONGRESSIONAL RECORD a speech by one of the ablest and best men in public life in the United States in the last half century, the present occupant of the chair of the Senate [Mr. BURTON in the chair].

I wish every Senator would read his farewell words to the Members of the House, in which he urged international peace, and urged that they assist in its preservation in every way possible.

As I said, Mr. President, I sincerely hope that both the peace treaty and the cruiser bill will be passed without delay.

CONSTRUCTION OF CRUISERS AND THE MULTILATERAL TREATY

Mr. HALE. Mr. President, it is quite evident that the joint resolution now before the Senate can not be passed before 2 o'clock. I am entirely willing, if the motion I am about to make prevails, to allow unanimous consent to take up the joint resolution for the rest of the afternoon.

I now move that the Senate proceed to the consideration of H. R. 11526, Order of Business No. 1022, to authorize the construction of certain naval vessels, and for other purposes.

Mr. NORRIS. Mr. President, I make the point of order that that is a violation of the unanimous-consent agreement.

Mr. HALE. The motion is not debatable; but I will state, Mr. President, that it is not a violation of the agreement. The motion is in order at any time before 2 o'clock.

Mr. TRAMMELL. Mr. President, I very much hope the Senate will dispose of the joint resolution to-day.

Relief for the farmers and fruit growers in the storm area of Florida—which is but a very limited portion of my State—and the farmers of other sections in the Southeastern States should not be further delayed. As will be recalled more than two weeks ago at the time the Senator from Connecticut [Mr. BINGHAM] introduced the Porto Rican resolution in the Senate, I immediately addressed the Senate in an appeal for aid for Florida farmers and growers who had suffered so severely from the storm of the past fall.

Later when the Porto Rican resolution came before the Senate from the committee, I proposed an amendment to authorize loans and advances to the farmers and fruit growers of Florida who had suffered so severely from the same hurricane that wrought such appalling destruction in Porto Rico. My amendment with the resolution of the Senator from South Carolina [Mr. SMITH] was by the Senate referred to the Senate Committee on Agriculture. I then appeared before that committee and further appealed for aid for the unfortunates in Florida. Two or three times having spoken before the Senate and having appeared before the Committee on Agriculture it would be useless for me to speak further. What I desire is action without further delay. I think, however, the resolution should have a minor amendment that it may be made absolutely certain that its provisions will fit the Florida situation. When I have an opportunity I will offer this amendment which I now have prepared and which the Senator [Mr. SMITH], in charge of the resolution has agreed to accept. My amendment would insert on page 1, in line 4, after the word "farmers," the words "and fruit growers," and on the same page, in line 8, after the word "legumes," the words "nursery stock." It is claimed by some that the present wording of the resolution is sufficient to cover fruit growers, as they come under the general term "farmers," but I think it better to amend as I propose. I will offer this amendment when I have an opportunity under the the rules.

Mr. WARREN. Mr. President——

Mr. KING. Mr. President, a point of order has been raised.

The VICE PRESIDENT. The motion of the Senator from Maine is not debatable.

Mr. KING. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. KING. A point of order has been raised against the motion submitted by the Senator from Maine; namely, that under the unanimous-consent agreement the submission of the motion is not in order.

The VICE PRESIDENT. There was no agreement for a final vote under the unanimous-consent arrangement, and the motion of the Senator from Maine is in order.

Mr. KING. Mr. President, I shall feel constrained to appeal from the decision of the Chair. The understanding of the

unanimous consent was that the resolution was to remain before the Senate until acted upon.

Mr. HEFLIN. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McMaster	Smith
Barkley	Frazier	McNary	Smoot
Bayard	George	Metcalf	Steck
Bingham	Gerry	Moses	Steiwer
Blaine	Glass	Neely	Stephens
Blease	Goff	Norris	Swanson
Borah	Greene	Nye	Thomas, Idaho
Brookhart	Hale	Oddie	Thomas, Okla.
Broussard	Harris	Overman	Trammell
Bruce	Harrison	Pine	Tydings
Burton	Hastings	Pittman	Tyson
Capper	Hayden	Ransdell	Vandenberg
Caraway	Heflin	Reed, Mo.	Wagner
Copeland	Johnson	Reed, Pa.	Walsh, Mass.
Couzens	Jones	Robinson, Ind.	Walsh, Mont.
Curtis	Kendrick	Sackett	Warren
Dale	Keyes	Schall	Waterman
Deneen	King	Sheppard	Watson
Dill	La Follette	Shipstead	Wheeler
Edwards	McKellar	Shortridge	
Fess	McLean	Simmons	

Mr. McMASTER. I desire to announce that my colleague the senior Senator from South Dakota [Mr. NORBECK] is detained from the Senate on account of illness.

Mr. HEFLIN. I desire to announce that my colleague [Mr. BLACK] is absent from the Senate on important business.

The VICE PRESIDENT. Eighty-three Senators having answered to their names, there is a quorum present.

Mr. KING. Mr. President, I desire to appeal from the decision of the Chair wherein the Chair held that the unanimous-consent agreement which in good faith was entered into for the consideration of the joint resolution now before the Senate could be superseded by the motion offered by the Senator from Maine. When it was entered into it was distinctly understood that the joint resolution was to have a favored status legislatively and disposed of during the morning hour to-day. We have relied on that understanding to-day and have referred to the fact that the matter would not be disposed of until the end of the morning hour. May I inquire of the Chair whether the motion is debatable?

Mr. MOSES. A point of order, Mr. President.

The VICE PRESIDENT. The motion is not debatable. The Chair will sustain the point of order.

Mr. HARRISON. Mr. President, the Senator certainly has a right to discuss his appeal, as I understand it.

The VICE PRESIDENT. The motion is not debatable under the rule.

Mr. MOSES. The motion is not debatable, and an appeal from a ruling on it can not be debated.

The VICE PRESIDENT. The motion to proceed to the consideration of the naval bill not being debatable, an appeal from the decision of the Chair holding that motion in order is not debatable.

The unanimous-consent agreement provides that on Thursday morning any report of the Committee on Agriculture and Forestry on Senate Joint Resolution 182 shall be considered, but no agreement was made as to time for a final disposition of the resolution. The Chair rules that under those circumstances this motion to proceed to the consideration of the naval bill is in order. The Senator from Utah appeals from the decision of the Chair.

Mr. KING. Upon that I demand the yeas and nays.

The yeas and nays were ordered.

Mr. MOSES. May the question be stated, Mr. President?

The VICE PRESIDENT. The question is, Shall the decision of the Chair stand as the judgment of the Senate? The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. DILL (when his name was called). I have a pair with the junior Senator from Illinois [Mr. GLENN], who is absent. I transfer my pair to the junior Senator from Missouri [Mr. HAWES] and vote "nay."

The roll call was concluded.

Mr. JONES. I desire to announce that the senior Senator from Massachusetts [Mr. GILLETT] has a general pair with the senior Senator from New Mexico [Mr. BRATTON], and that the Senator from New Jersey [Mr. EDGE] is paired with the Senator from Alabama [Mr. BLACK].

Mr. DENEEN. I wish to announce the unavoidable absence of my colleague [Mr. GLENN] and to state that if present he would vote "yea."

Mr. GEORGE (after having voted in the affirmative). I neglected to announce that I have a pair with the senior Senator from Colorado [Mr. PHIPPS], but I am informed that if present he would vote as I have voted on this question. I therefore allow my vote to stand.

The result was announced—yeas 63, nays 13, as follows:

YEAS—63

Barkley	George	McMaster	Simmons
Bayard	Gerry	McNary	Smoot
Bingham	Glass	Metcalf	Steck
Borah	Goff	Moses	Steiwer
Broussard	Greene	Norris	Stephens
Bruce	Hale	Oddie	Swanson
Burton	Harris	Overman	Thomas, Okla.
Capper	Harrison	Pine	Tydings
Caraway	Hastings	Pittman	Tyson
Couzens	Heflin	Reed, Mo.	Vandenberg
Curtis	Johnson	Reed, Pa.	Walsh, Mass.
Dale	Jones	Robinson, Ind.	Walsh, Mont.
Deneen	Kendrick	Sackett	Warren
Edwards	Keyes	Schall	Waterman
Fess	McKellar	Shipstead	Watson
Fletcher	McLean	Shortridge	

NAYS—13

Blaine	Frazier	Nye	Wheeler
Blease	Hayden	Ransdell	
Brookhart	King	Sheppard	
Dill	La Follette	Smith	

NOT VOTING—19

Ashurst	Gillett	Larrazolo	Robinson, Ark.
Black	Glenn	Mayfield	Thomas, Idaho
Bratton	Gould	Neely	Trammell
Copeland	Hawes	Norbeck	Wagner
Edge	Howell	Phipps	

So the decision of the Chair stood as the judgment of the Senate.

The VICE PRESIDENT. The question now is on the motion of the Senator from Maine [Mr. HALE].

Mr. NORRIS. Mr. President, I move that the Senate do now adjourn, and upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. DILL (when his name was called). I have a pair with the junior Senator from Illinois [Mr. GLENN]. Not knowing how he would vote, I transfer that pair to the junior Senator from Missouri [Mr. HAWES] and vote "nay."

The roll call was concluded.

Mr. JONES. I desire to announce that the senior Senator from Massachusetts [Mr. GILLETT] has a general pair with the senior Senator from New Mexico [Mr. BRATTON], and that the Senator from New Jersey [Mr. EDGE] is paired with the Senator from Alabama [Mr. BLACK].

Mr. CURTIS (after having voted in the negative). I have a general pair with the senior Senator from Arkansas [Mr. ROBINSON]. Not knowing how that Senator would vote, I transfer the pair to the junior Senator from New Mexico [Mr. LARRAZOLO] and let my vote stand.

Mr. GERRY. I desire to announce that the senior Senator from New York [Mr. COPELAND], the junior Senator from New York [Mr. WAGNER], and the junior Senator from Florida [Mr. TRAMMELL] are detained on official business.

The result was announced—yeas 7, nays 69, as follows:

YEAS—7

Blaine	Brookhart	King	Nye
Blease	Frazier	La Follette	

NAYS—69

Ashurst	Gerry	Metcalf	Smoot
Barkley	Glass	Moses	Steck
Bayard	Goff	Norris	Steiwer
Bingham	Greene	Oddie	Stephens
Borah	Hale	Overman	Swanson
Broussard	Harris	Pine	Thomas, Okla.
Bruce	Harrison	Pittman	Tydings
Burton	Hastings	Ransdell	Tyson
Capper	Hayden	Reed, Mo.	Vandenberg
Caraway	Heflin	Reed, Pa.	Walsh, Mass.
Couzens	Johnson	Robinson, Ind.	Walsh, Mont.
Curtis	Jones	Sackett	Warren
Deneen	Kendrick	Schall	Waterman
Dill	Keyes	Sheppard	Watson
Edwards	McKellar	Shipstead	Wheeler
Fess	McLean	Shortridge	
Fletcher	McMaster	Simmons	
George	McNary	Smith	

NOT VOTING—19

Black	Gillett	Larrazolo	Robinson, Ark.
Bratton	Glenn	Mayfield	Thomas, Idaho
Copeland	Gould	Neely	Trammell
Dale	Hawes	Norbeck	Wagner
Edge	Howell	Phipps	

So the Senate refused to adjourn.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. The question is on the motion of the Senator from Maine, which is not debatable.

Mr. BORAH. I am not going to debate it. I desire to submit a unanimous-consent agreement.

The VICE PRESIDENT. The Senator from Idaho is recognized for that purpose.

Mr. BORAH. I submit the following unanimous-consent agreement:

It is agreed by unanimous consent that the so-called cruiser bill (H. R. 11526) be made the unfinished legislative business of the Senate for Thursday, January 3, 1929, at 2 o'clock p. m., and that the so-called multilateral treaty renouncing war be made the unfinished business of the Senate in open executive session on the same day.

Mr. NORRIS. Mr. President, may I inquire of the Senator from Idaho, if this agreement is entered into, what would be his policy in moving to go into open executive session for the consideration of the treaty? Would he undertake to keep the treaty constantly before the Senate if he had the votes to go into open executive session, or would he be inclined to divide the time with those who want to consider the cruiser bill?

Mr. BORAH. I think it would be my duty to ask that the treaty be kept before the Senate. If a majority of the Senate was in favor of it, I would pursue that course.

Mr. HALE. Of course I could not agree with the Senator that we should divide the time between the two matters in any way, as was suggested.

Mr. BORAH. I am not asking unanimous consent to that end. I would feel under obligation to make the motion.

Mr. NORRIS. Of course, it would be necessary for the Senator from Idaho to have a majority of the Senate to take up the treaty in open executive session.

Mr. SWANSON. Mr. President, will the Senator yield?

Mr. BORAH. I yield.

Mr. SWANSON. Let the Senate itself have absolute control of which shall be considered first, which shall be considered last, which shall be voted on first, and which voted on last. If Senators believe that a majority rules in a legislative body, I do not see how anyone could object to this agreement which makes these matters the unfinished business of the Senate in preference to all other legislative business. If it is determined to make the cruiser bill the unfinished business in legislative session of the Senate in preference to any other measure, then the Senate is in control as to which shall be considered first, which shall be considered last, which shall be voted on first, and which voted on last. It is the right and privilege of the majority of the Senate absolutely, and not of any one Senator. The Senator from Idaho and the Senator from Maine are not the only ones permitted to make the motion. Any Senator can make the motion to proceed to the consideration of one or the other measure as he sees fit.

Mr. LA FOLLETTE. Mr. President, will the Senator from Idaho yield?

Mr. BORAH. I yield.

Mr. LA FOLLETTE. Is not that just the situation in which the two measures are now placed? They are subject to the control of the majority of the Senate, and I see nothing to be gained by the adoption of the unanimous-consent agreement.

Mr. HEFLIN. Mr. President, if the Senator from Idaho will permit me——

Mr. BORAH. I yield.

Mr. HEFLIN. I can see this to be gained with reference to the measure that is now before this body asking relief for farmers down in the flood-stricken areas of the country. If we can get an agreement by which the two measures referred to shall go over, we can transact this other business before Congress adjourns for the holidays.

Mr. BORAH. May I say that this much is to be gained, in my judgment, that if we do not come to some agreement at this time, to-day and to-morrow and the next day will be utilized in creating an unfortunate friction between the two measures?

Mr. LA FOLLETTE. May I suggest to the Senator from Idaho that he is only postponing the evil day when that friction is bound to be developed?

Mr. SWANSON. Mr. President, will the Senator from Idaho yield further?

Mr. BORAH. I yield.

Mr. SWANSON. It takes a two-thirds vote in executive session of the Senate to provide for the consideration of a treaty as in open executive session. This is a unanimous-consent request which the Senator is submitting and it does not require a two-thirds vote for the treaty to be considered in open executive session, if the unanimous-consent agreement is entered into. The treaty and the cruiser bill would go over until the 3d of January, thus giving Senators an opportunity to prepare themselves to discuss the measures. We shall in that way accomplish what would otherwise take us two or three days to accomplish.

The VICE PRESIDENT. The Chair will correct the statement of the Senator from Virginia that it requires a two-thirds vote to consider a treaty in open executive session. It may be done upon a majority vote. It takes a two-thirds vote to consider the confirmation of a nomination in open executive session.

Mr. SWANSON. It has been decided repeatedly, and the Vice President himself, I believe, has so decided.

The VICE PRESIDENT. That was on the confirmation of a nomination. The rule expressly provides that a treaty may be considered in open executive session either by unanimous consent or by a majority vote.

Mr. SWANSON. I may be mistaken, but I know I tried to get the Vice President to rule once that a majority should control.

The VICE PRESIDENT. The Vice President made that decision in accordance with the rule which makes specific provision that a majority vote only is necessary.

Mr. SWANSON. But two days will be lost here if we do not get this unanimous-consent agreement. I am satisfied if we go into executive session the treaty will be made the unfinished business.

Mr. FLETCHER. Mr. President, is the Senator attempting to have us agree to consider the two measures at the same time?

Mr. BORAH. But in different fashion, one in legislative session and the other in open executive session.

Mr. HARRISON. May I ask the Senator from Idaho what time he proposes to occupy in open executive session? How much time does he propose to give to the consideration of the treaty and how much to the consideration of the cruiser bill?

Mr. BORAH. I will say to the Senator from Mississippi and to the Senate that there will be no occasion to quarrel with the Senator from Idaho as to testing the majority of the Senate upon taking up the treaty every day. I want to get the treaty out of the way. I do not desire to take it up before the holidays. I am not attempting to have it taken up before the holidays. Nothing could be gained by doing so.

Mr. HARRISON. The Senator does not want to have the cruiser bill supersede the peace pact?

Mr. BORAH. I do not.

Mr. KING. Mr. President, may I inquire of the Senator from Idaho if he regards either measure as having precedence over the other in the order of consideration when the Senate convenes January 3?

Mr. BORAH. I would regard myself as perfectly free to move to take up the treaty, and I would feel under obligation to make the motion. If the Senate did not see fit to do it, that would be one thing; but I certainly would test it.

Mr. KING. Will the Senator permit another inquiry?

Mr. BORAH. Certainly.

Mr. KING. I hope he will not regard it as improper. If for any reason the Senator should not be here or should feel constrained to yield temporarily the right of way to some other bill, would the Senator feel that any other Senator was transgressing the proprieties of the occasion if he should move to proceed to the consideration of the treaty in open executive session?

Mr. BORAH. Not at all, but the Senator will have to be apt in order to get ahead of the Senator from Idaho in that respect.

Mr. KING. I am sure if the Senator is here he will do so. I was taking into account the contingency of illness or something of the character.

Mr. LA FOLLETTE. Mr. President, it seems to me, so far as the Senate is concerned, that it faces the issue of deciding which one of the measures is to be taken up for consideration before the other. So far as I am personally concerned I am ready to face that issue now; but if the Senator from Idaho [Mr. BORAH] is in a position where he can not in good faith make that motion prior to adjournment for the holidays, I see something to be accomplished by postponing the issue until that time. For that reason and that reason alone I shall not interpose an objection.

The VICE PRESIDENT. Is there objection to the unanimous-consent request submitted by the Senator from Idaho?

Mr. HARRISON. Mr. President, if this unanimous-consent request shall be agreed to, of course, the motion made by the Senator from Maine will be withdrawn?

The VICE PRESIDENT. It will be.

Mr. KING. It will be superseded.

Mr. HARRISON. Did the Senator from Maine say anything?

Mr. KING. Silence gives consent.

Mr. MOSES. The Senator from Maine did not have to say anything when the Chair spoke.

Mr. KING. Mr. President, as one of the opponents of the proposition to take up for consideration the cruiser bill in advance of the treaty, in view of the explanations and statements made by the chairman of the Committee on Foreign Relations,

I shall not oppose the proposed unanimous-consent agreement; but I deplore that we are not to have an opportunity of voting upon the treaty before the Christmas holidays. Even though it be considered as a gesture, as some Senators have said, I think that it would be a magnificent gesture if we were to ratify the treaty before adjournment for the holidays and thus give some additional evidence of the sincere desire of the United States to promote the cause of world peace. Imperfect and unsatisfactory as the treaty is, it will be regarded by millions of people in this and other lands as an effective movement toward international fellowship and the abolition of war.

The VICE PRESIDENT. Is there objection to the request for unanimous consent? The Chair hears none, and the agreement is entered into.

Mr. KING. Mr. President, that vacates the motion.

The VICE PRESIDENT. The motion of the Senator from Maine [Mr. HALE] will be withdrawn.

RELIEF OF FARMERS IN FLOOD-STRICKEN AREAS

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 182) for the relief of farmers in the storm and flood stricken areas of Southeastern United States.

Mr. SMITH and Mr. SMOOT addressed the Chair.

The VICE PRESIDENT. The Chair recognizes the Senator from South Carolina.

Mr. SMITH. Mr. President, I think now in good faith that Senate Joint Resolution 182 should be proceeded with and a vote be taken upon it.

The VICE PRESIDENT. The joint resolution of the Senator from South Carolina is the pending business.

Mr. SMOOT. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes.

Mr. HARRISON. Will the Senator from Utah yield for one moment?

Mr. HEFLIN. I hope the Senator from Utah will withhold his motion for a moment until we may get a vote on the joint resolution of the Senator from South Carolina.

Mr. SMITH. Mr. President, will not the Senator from Utah withhold his motion until we may dispose of the joint resolution?

Mr. SMOOT. I am willing to do so if it shall not take very long.

Mr. SMITH. I ask for a vote on the joint resolution.

Mr. LA FOLLETTE. Mr. President, I offer the amendment to the pending joint resolution which I send to the desk.

The VICE PRESIDENT. Without objection, the committee amendment will be agreed to. The Senator from Wisconsin [Mr. LA FOLLETTE] offers an amendment, which will be stated.

The LEGISLATIVE CLERK. On page 2, after line 15, it is proposed to insert the following:

> That any person who shall knowingly make any false representation for the purpose of obtaining an advance, loan, or sale under this resolution shall upon conviction thereof be punished by a fine not exceeding $1,000 or by imprisonment not exceeding six months or both.

Mr. SMITH. I accept the amendment, Mr. President. I think it is a very pertinent one.

Mr. REED of Missouri. Mr. President——

The VICE PRESIDENT. Without objection——

Mr. REED of Missouri. One moment. I should like to have the amendment again stated. I failed to catch its full import.

The VICE PRESIDENT. The clerk will read the amendment.

The legislative clerk again read the amendment.

Mr. REED of Missouri. Mr. President——

Mr. LA FOLLETTE. May I say to the Senator from Missouri that that provision has been in most of the similar measures which have been passed by Congress? As the Senator will observe, it applies only to those who "knowingly" make false statements in order to obtain relief under the provisions of the joint resolution.

Mr. REED of Missouri. Is the word "material" in the resolution so as to read "material false representation"?

Mr. LA FOLLETTE. No.

Mr. REED of Missouri. That word should be in the amendment.

Mr. LA FOLLETTE. I took the language from previous similar acts and resolutions which have been passed.

Mr. REED of Missouri. I think the word "material" ought to be placed in the amendment.

Mr. LA FOLLETTE. I am perfectly willing to have that word inserted in the amendment.

Mr. REED of Missouri. I do not want to take time; I merely wish to say that, as a matter of principle, I think it is a very doubtful thing to be multiplying penal statutes. They are so often abused by Federal authorities in these days that we ought to be careful about them. If the words "willful and material" were inserted in the resolution, perhaps it would not be so bad.

Mr. FLETCHER. The word "material" should be inserted before the word "representation."

Mr. SMITH. I suggest the insertion of the word "material" where indicated by the Senator from Missouri.

The VICE PRESIDENT. The clerk will read the amendment as it is proposed to be amended.

Mr. LA FOLLETTE. After the word "any," in the first line of the amendment, I suggest the insertion of the word "material."

The LEGISLATIVE CLERK. As proposed to be amended, the amendment would read:

> That any person who shall knowingly make any material false representation for the purpose of obtaining an advance, loan, or sale, and so forth.

The VICE PRESIDENT. Without objection, the amendment as modified is agreed to.

Mr. KING. I offer an amendment, which I ask to have read.

The VICE PRESIDENT. The amendment will be stated.

The LEGISLATIVE CLERK. On page 2, line 13, after the word "resolution," it is proposed to insert the words "including all expenses and charges incurred in so doing."

Mr. SMITH. That is all right; I accept the amendment.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. FLETCHER. Mr. President, I move to insert after the word "farmers" the words "fruit growers," because the word "farmer" might not be broad enough to cover fruit growers; a fruit grower may not be classified as a farmer. I want to make the joint resolution broad enough to cover fruit growers.

Mr. HEFLIN. The joint resolution was intended to reach the fruit growers, and I think that amendment ought to be made.

Mr. SMITH. Very well; I accept the amendment.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. FLETCHER. I move to insert, after the word "legumes," in line 8, page 1, the words "nursery stock," so that it will cover seeds and nursery stock.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 56. An act to authorize the Postmaster General to issue receipts to senders for ordinary mail of any character and to fix the fees chargeable therefor;

H. R. 57. An act to enable the Postmaster General to authorize the establishment of temporary or emergency star-route service from a date earlier than the date of the order requiring such service;

H. R. 6864. An act to authorize the Postmaster General to require steamship companies to carry the mail when tendered;

H. R. 10441. An act to amend section 217, as amended, of the act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909;

H. R. 12415. An act to grant freedom of postage in the United States domestic service to the correspondence of the members of the Diplomatic Corps and consuls of the countries of the Pan American Postal Union stationed in the United States;

H. R. 13114. An act to amend section 197 of the Criminal Code (sec. 320, title 18, U. S. C.); and

H. R. 15386. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bill and joint resolution, and they were signed by the Vice President:

S. 4302. An act to authorize the Secretary of Commerce to convey the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., as a memorial to commemorate the Battle of Fort Fisher; and

S. J. Res. 167. Joint resolution limiting the operation of sections 198 and 203 of title 18 of the Code of Laws of the United States.

SENATOR FROM PENNSYLVANIA

Mr. CURTIS presented the credentials of DAVID A. REED, chosen a Senator from the State of Pennsylvania for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

IN THE NAME AND BY AUTHORITY OF THE
COMMONWEALTH OF PENNSYLVANIA,
EXECUTIVE DEPARTMENT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 6th day of November, 1928, DAVID A. REED was duly chosen by the qualified electors of the State of Pennsylvania a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1929.

Witness: His Excellency our Governor, and our seal here to affixed at the city of Harrisburg, this 18th day of December, A. D. 1928.

JOHN S. FISHER.

By the governor:

[SEAL.] CHARLES JOHNSON,
Secretary of the Commonwealth.

(The credentials were accompanied by a certificate showing the returns of votes cast at the said election.)

THE CUMBERLAND FALLS PROJECT (S. DOC. NO. 189)

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, chairman of the Federal Power Commission, transmitting, in response to Senate Resolution 279, of December 15, 1928, a report on what is known as the Cumberland Falls project, together with other allied projects in that vicinity, which was referred to the Committee on Commerce and ordered to be printed with illustrations.

WITHDRAWALS AND RESTORATIONS OF PUBLIC LANDS

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a report from the Commissioner of the General Land Office of withdrawals and restorations of public lands, etc., which was referred to the Committee on Public Lands and Surveys.

EXPENDITURES, FIVE CIVILIZED TRIBES

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a report showing the expenditures for the Five Civilized Tribes Agency during the fiscal year ended June 30, 1928, from the appropriations "Support and civilization of Indians, 1927 and 1928," which was referred to the Committee on Indian Affairs.

REPORTS OF THE DEPARTMENT OF AGRICULTURE

The VICE PRESIDENT laid before the Senate a communication from the Secretary of Agriculture, transmitting, pursuant to law, a report for the fiscal year ended June 30, 1928, concerning the appropriations for the construction of rural post roads in cooperation with the States, the Federal administration of that work, and the survey, construction, and maintenance of roads and trails within or only partly within the national forests, which was referred to the Committee on Post Offices and Post Roads.

He also laid before the Senate a communication from the Acting Secretary of Agriculture, transmitting, pursuant to law, reports on receipts and expenditures for the Center Market in the District of Columbia, and on the sale and disposition of useless papers in the Department of Agriculture, which were referred to the Committee on Appropriations.

RADIO CORPORATION OF AMERICA, GENERAL ELECTRIC CO., ETC.

Mr. COPELAND. Mr. President, I have no inclination to delay action upon any pending business, but I am under the necessity of leaving the Chamber before the end of the day's session. Before doing so I desire to introduce into the RECORD a statement made yesterday by the Federal Trade Commission regarding the dismissal of the charges against the General Electric Co., the Radio Corporation of America, and others.

I do this without voicing at all any views I may hold regarding a controversial question, but I think in the interest of fairness the Senate should know what has happened after five years of consideration and the taking of 10,000 pages of evidence. Yesterday or day before yesterday the Federal Trade Commission dismissed the charges. This action of the Federal Trade Commission was practically unanimous.

I desire to have inserted at this point in my remarks the release given out yesterday by the Federal Trade Commission relating to this particular matter.

Mr. DILL. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Washington?

Mr. COPELAND. I yield.

Mr. DILL. I call the Senator's attention to the fact that the chairman of the Federal Trade Commission made a notation to the effect that he concurred in the action of the majority for the reason that the commission was without jurisdiction to make an effective order.

Mr. COPELAND. Yes; that is too true. That was his view. In the final vote there was but one dissenting vote. It is a fact and it is a matter of record that the Federal Trade Commission, by a vote of 4 to 1, dismissed the case. I think that fact speaks for itself.

Mr. DILL. The Senator knows that the Federal Trade Commission has no right under the law to continue a case when the facts show that it is without jurisdiction.

Mr. COPELAND. I have no desire, as I said in the beginning, to enter upon any controversy in regard to the matter, but I do think the Senate should be advised as to what action was taken by the Federal Trade Commission. It is a fact, as the Senator from Washington points out, that the case was dismissed.

Mr. DILL. Yes; but I do not want the RECORD to give the impression that it was dismissed because there was no violation of any law of the United States, but rather because it was a violation of the law over which the Federal Trade Commission has no jurisdiction.

Mr. COPELAND. I ask that the RECORD may show the facts as stated in the release issued by the Federal Trade Commission and that it be referred to the Committee on Interstate Commerce, and Senators may form their own conclusion as to the merits or demerits of the matter.

The VICE PRESIDENT. Without objection, the request of the Senator from New York is granted.

The matter was referred to the Committee on Interstate Commerce, as follows:

[Immediate release Wednesday, December 19, 1928]

FEDERAL TRADE COMMISSION,
Washington.

Dismissal of its complaint against General Electric Co., Radio Corporation of America and others, charging unfair competition in monopolizing the manufacture and sale of radio devices and monopolizing radio communication, was announced to-day by the Federal Trade Commission.

Prior to the commission's decision to-day the last action taken in the case was in June when arguments were heard on motions of respondents to dismiss the complaint because of lack of sufficient proof and because the subject matter of the charges was not in the commission's jurisdiction.

Respondents other than General Electric Co. and the Radio Corporation were: American Telephone & Telegraph Co., Western Electric Co. (Inc.), Westinghouse Electric & Manufacturing Co., the International Radio Telegraph Co., United Fruit Co., and Wireless Specialty Apparatus Co.

Specifically, the complaint charged that respondents combined and conspired with the effect of restraining competition and creating monopoly in the manufacture, purchase, and sale of radio apparatus and other electrical devices and monopolizing radio communication.

Another complaint, under the Clayton Act, in the matter of contracts in connection with the sale of tubes for radio sets, is now pending.

Chairman Myers noted for the record that he concurred in the action of the majority for the reason that the commission was without jurisdiction to enter an effective order.

PETITIONS

Mr. COPELAND presented a petition of sundry citizens of New York City, N. Y., praying for the passage of the so-called Porter narcotic bill, which was referred to the Committee on Interstate Commerce.

Mr. SHIPSTEAD presented numerous petitions, and papers in the nature of petitions, from sundry citizens and civic and religious organizations in the State of Minnesota, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. HALE presented a petition of sundry citizens of Eastport, Me., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was ordered to lie on the table.

Mr. KEYES presented resolutions adopted by the Woman's Club, of Exeter, and the Department Committee of the Department of Women's Work, New Hampshire Congregational Conference, at Manchester, in the State of New Hampshire, favoring the ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. SHEPPARD presented petitions and papers in the nature of petitions numerously signed by sundry citizens of Canyon, Amarillo, Houston, Brady, Rochelle, Port Arthur, Cameron, San

Antonio, Fort Worth, Sherman, Austin, El Paso, and Corsicana, all in the State of Texas, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. FRAZIER presented the petition of Charles A. Severinson and 13 other citizens of Fargo, N. Dak., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was ordered to lie on the table.

He also presented a petition of the Rotary Club of Fargo, N. Dak., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was ordered to lie on the table.

Mr. CAPPER presented petitions numerously signed by sundry citizens of Lawrence, Kans., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

He also presented resolutions adopted by the Women's Bible Class, the Young Woman's Home Missionary Society, the Woman's Relief Corps, the Parent-Teacher Association, the League of Women Voters, the Woman's Christian Temperance Union, the Daughters of the American Revolution, and League of Women Voters, Ladies Auxiliary to the Brotherhood of Locomotive Engineers, the Business and Professional Women's Club, and Betty Bonney Chapter of Daughters of the American Revolution, all of Arkansas City; the Young Women's Christian Association and the board of directors of the Young Women's Christian Association, of Parsons; the Friends Church, College Hill Woman's Christian Temperance Union, Sunday School Class of College Hill Methodist Episcopal Church, the Sibbitt Woman's Christian Temperance Union, and the Kansas Adult Guidance Council of the Young Women's Christian Association, all of Wichita; the Young Women's Christian Association, of Burrton; the Community Young Women's Christian Association of Buhler, the Community Young Women's Christian Association, the Woman's Home Missionary Society, and the Woman's Club, of Haven, all in the State of Kansas, favoring the ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

REPORT OF THE COMMITTEE ON PUBLIC BUILDINGS AND GROUNDS

Mr. KEYES, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 12897) to provide for the acquisition of a site and the construction thereon of a fireproof office building or buildings for the House of Representatives, reported it without amendment and submitted a report (No. 1356) thereon.

PRINTING OF DATA RELATIVE TO THE COLORADO RIVER

Mr. SHIPSTEAD, from the Committee on Printing, reported a resolution (S. Res. 282), which was considered by unanimous consent and agreed to, as follows:

Resolved, That certain data and information relating to the Colorado River investigation, water storage, and power development, Grand Canyon of the Imperial Valley, be printed, with illustrations, as a Senate document.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that to-day that committee presented to the President of the United States the following enrolled bill and joint resolution:

S. 4302. An act to authorize the Secretary of Commerce to convey the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., as a memorial to commemorate the Battle of Fort Fisher; and

S. J. Res. 167. Joint resolution limiting the operation of sections 198 and 203 of title 18 of the Code of Laws of the United States.

BILLS INTRODUCED

Bills were introduced, read the first time and, by unanimous consent, the second time, and referred as follows:

By Mr. MOSES:

A bill (S. 5040) to amend the act entitled "An act reclassifying the salaries of postmasters and employees of the Postal Service, readjusting their salaries and compensation on an equitable basis, increasing postal rates to provide for such readjustment, and for other purposes," approved February 28, 1925; to the Committee on Post Offices and Post Roads.

A bill (S. 5041) granting a pension to Georgia A. Swett (with accompanying papers); and

A bill (S. 5042) granting an increase of pension to Frances M. Tripp (with accompanying papers); to the Committee on Pensions.

By Mr. HALE:

A bill (S. 5043) granting a pension to Elizabeth H. Harriman (with accompanying papers); to the Committee on Pensions.

By Mr. NEELY:

A bill (S. 5044) granting a pension to Clark Huggins; to the Committee on Pensions.

By Mr. GREENE:

A bill (S. 5045) authorizing Jed P. Ladd, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Lake Champlain from the town of Alburgh, Vt., to the town of Swanton, Vt., the said right and privilege to extend across Lake Champlain along the shore line 1 mile each way, northerly and southerly from the Central Vermont Railway Co.'s bridge on the Swanton shore and 1 mile northerly from said bridge and southerly from said bridge to the south end of McGregors Point, so called, on the Alburgh shore, at a point at or near East Alburgh; to the Committee on Commerce.

By Mr. DILL:

A bill (S. 5046) to relinquish all right, title, and interest of the United States in certain lands in the State of Washington; to the Committee on Public Lands and Surveys.

By Mr. WATSON:

A bill (S. 5047) to amend section 10 of the act to regulate commerce, as amended; to the Committee on Interstate Commerce.

By Mr. CURTIS:

A bill (S. 5048) granting a pension to Annie McKinnie (with accompanying papers); to the Committee on Pensions.

By Mr. SHIPSTEAD:

A bill (S. 5049) granting a pension to A. C. Weatherstone (with an accompanying paper);

A bill (S. 5050) granting an increase of pension to Isabell J. Rogers (with accompanying papers);

A bill (S. 5051) granting an increase of pension to Samuel H. Anderson (with accompanying papers); to the Committee on Pensions.

A bill (S. 5052) for the relief of Edwin Lockwood MacLean; and

A bill (S. 5053) for the relief of Henry G. Young; to the Committee on Military Affairs.

By Mr. REED of Missouri:

A bill (S. 5054) granting a pension to William A. Cox; (with accompanying papers); to the Committee on Pensions.

A bill (S. 5055) for the relief of De Witt & Shobe (with accompanying papers); to the Committee on Claims.

By Mr. BAYARD:

A bill (S. 5056) for the relief of William B. Thompson; to the Committee on Claims.

By Mr. KENDRICK:

A bill (S. 5057) granting a pension to Mary Leeder (with accompanying papers); to the Committee on Pensions.

By Mr. McNARY:

A bill (S. 5058) for the relief of George A. Hormel & Co.; to the Committee on Agriculture and Forestry.

By Mr. ROBINSON of Indiana:

A bill (S. 5059) granting the consent of Congress to the Chicago South Shore & South Bend Railroad to construct, maintain, and operate a railroad bridge across Grand Calumet River at East Chicago, Ind.; to the Committee on Commerce.

A bill (S. 5060) to aid the Grand Army of the Republic in its Memorial Day services May 30, 1929; and

A bill (S. 5061) to correct the military record of G. W. Gilkison; to the Committee on Military Affairs.

A bill (S. 5062) granting a pension to Vance K. Stewart;

A bill (S. 5063) granting a pension to Clarence W. Jones;

A bill (S. 5064) granting an increase of pension to Anna P. Vesey; and

A bill (S. 5065) granting a pension to Silas Overmier (with an accompanying paper); to the Committee on Pensions.

AMERICAN TRANSATLANTIC CO.

Mr. BRUCE submitted an amendment intended to be proposed by him to the bill (S. 2364) for the relief of the American Transatlantic Co., a corporation duly incorporated under the laws of the State of Delaware, which was referred to the Committee on Claims and ordered to be printed.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred to the Committee on Post Offices and Post Roads:

H. R. 56. An act to authorize the Postmaster General to issue receipts to senders for ordinary mail, of any character, and to fix the fees chargeable therefor;

H. R. 57. An act to enable the Postmaster General to authorize the establishment of temporary or emergency star-route service from a date earlier than the date of the order requiring such service;

H. R. 6864. An act to authorize the Postmaster General to require steamship companies to carry the mail when tendered;

H. R. 10441. An act to amend section 217, as amended, of the act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909;

H. R. 12415. An act to grant freedom of postage in the United States domestic service to the correspondence of the members of the diplomatic corps and consuls of the countries of the Pan American Postal Union, stationed in the United States; and

H. R. 13114. An act to amend section 197 of the Criminal Code (sec. 320, title 18, U. S. C.).

The bill (H. R. 15386) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

JOHN COSTIGAN

Mr. REED of Missouri. Mr. President, I desire to make a request for unanimous consent which I think will meet with no opposition. On the 9th of April, 1928, the Senate approved an adverse report on the bill (H. R. 3192) for the relief of John Costigan, and the bill was indefinitely postponed. I now ask unanimous consent to set aside the order indefinitely postponing the bill, and that it may be rereferred to the Committee on Military Affairs.

Mr. SMOOT. What is the nature of the bill?

Mr. REED of Missouri. It is a private bill and it is thought that a mistake has been made about it. I merely wish it to go back to the committee.

The VICE PRESIDENT. Is there objection? The Chair hears none. The order indefinitely postponing the bill will be vacated and the bill will be referred to the Committee on Military Affairs.

JUDICIAL SALARIES (S. DOC. NO. 188)

Mr. OVERMAN. I ask unanimous consent to have published as a Senate document the report of the special committee on judicial salaries, submitted at the meeting of the American Bar Association at Seattle, Wash., July 25, 1928.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Is there objection to the request of the Senator from North Carolina? The Chair hears none, and the matter referred to will be printed as a Senate document.

INTERIOR DEPARTMENT APPROPRIATIONS

Mr. SMOOT. Mr. President, I ask——

Mr. HEFLIN. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Alabama?

Mr. SMOOT. I desire first to get the appropriation bill before the Senate.

Mr. HEFLIN. Mr. President, just a moment.

Mr. WARREN. Mr. President, let the bill be taken up first and then the Senator from Alabama can obtain the floor.

Mr. SMOOT. I desire to have the bill taken up before yielding. I ask unanimous consent that the Senate proceed to the consideration of the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. SMOOT. Mr. President, I ask that the formal reading of the bill may be dispensed with and that it be read for amendment, the amendments of the committee to be first considered and the amendments of individual Senators to be offered later.

The VICE PRESIDENT. Without objection, it is so ordered.

DISTRIBUTION OF THE CONGRESSIONAL RECORD

Mr. HEFLIN. Mr. President, there is on the calendar a bill which I introduced some time ago to increase the number of copies of the CONGRESSIONAL RECORD allotted to Senators and Members of the House and other Government officials. It has been before the Committee on Printing and unanimously reported. It is now ready for action by the Senate, and I ask unanimous consent for its present consideration.

Mr. SMOOT. If it shall lead to any discussion whatever, I shall have to object.

Mr. HEFLIN. I am sure that it will lead to no debate.

Mr. ASHURST. How many copies does it give us?

Mr. HEFLIN. It gives to Senators 150 copies.

The VICE PRESIDENT. Is there objection?

Mr. SMOOT. Let the title of the bill be stated.

The VICE PRESIDENT. The bill will be stated by its title.

The CHIEF CLERK. A bill (S. 5022) to amend sections 183 and 184 of chapter 6 of title 44 of the United States Code, approved June 30, 1926, relative to the printing and distribution of the CONGRESSIONAL RECORD.

Mr. KING. Mr. President, I should like to ask the Senator what change it makes in existing law.

Mr. HEFLIN. It increases the number of copies allowed to each Senator to 150 and the number of copies allowed to each Member of the House to 100. Each Senator now has only 88 copies for his entire State, and that apportionment was made 35 years ago. The population of the country has greatly increased, and the requests for the CONGRESSIONAL RECORD have been largely augmented.

Mr. SMOOT. What will it cost, I will ask the Senator?

Mr. HEFLIN. It will cost something more, but I am sure that the increased amount will be money well spent.

Mr. SMOOT. I think the extra cost will be over half a million dollars, will it not?

Mr. HEFLIN. The Committee on Printing has worked it all out, and the bill ought to be passed before Christmas, so that we may put the additional RECORDS on our list.

Mr. SMOOT. I should like to ask the chairman of the Committee on Printing if he has any estimate as to the increased cost which will be involved by the bill?

Mr. SHIPSTEAD. Mr. President, it is difficult to say what the increased cost will be, because there will not be 100 copies of the RECORD printed for each Member of the House or 150 for each Senator unless they make the call for them.

Mr. SMOOT. They will undoubtedly make the call.

Mr. SHIPSTEAD. If they shall do so, there will be involved the extra time for running the presses and extra time for the printers.

Mr. SMOOT. And for the paper and mailing; so that I think it will cost the Government half a million dollars in addition to the present expenditure for this purpose.

Mr. SHIPSTEAD. I can not be certain as to the additional cost.

Mr. SMOOT. In the past we have appropriated $485,000 for the number now being distributed. It is proposed by the bill to increase the number considerably, and I am quite sure it will cost over a half a million dollars. Mr. President, I ask that the bill go over until I can find out exactly what the additional cost will be.

The PRESIDING OFFICER (Mr. MCNARY in the chair). Under objection, the bill will go over.

Mr. HEFLIN. Mr. President, I do not want it to go over until I may make a statement.

The PRESIDING OFFICER. If there is objection made to the request for unanimous consent the joint resolution must go over if the objection is persisted in. Does the Senator from Utah persist in his objection?

Mr. SMOOT. I will know by to-morrow exactly what the additional cost will be and I think the Senate ought to know as to that before the bill shall be passed.

Mr. HEFLIN. I do not know of any Senator who would oppose it if he knew what it would cost. We are appropriating millions of dollars to print and send out other literature to the people over the country. They are asking for the CONGRESSIONAL RECORD in order that they may know what is going on in Congress, and we are withholding the information from them if we refuse them access to the CONGRESSIONAL RECORD.

Mr. SMOOT. I ask that the bill go over. I shall find out what the additional cost will be by to-morrow.

Mr. HEFLIN. Then I shall ask on to-morrow that the bill may be taken up and passed.

The PRESIDING OFFICER. Under objection, the bill will be passed over.

FREDERICK D. SWANK

Mr. JONES. Mr. President, a few days ago there was entered a motion to reconsider the vote by which the bill (S. 584) for the relief of Frederick D. Swank was passed. That motion was adopted and the bill was brought back. The questions involved have been referred to the Senator from Nebraska [Mr. HOWELL], who is ill in the hospital, and the claimant, and it has been agreed that some amendments shall be offered to the bill. I take it, therefore, that there will be no objection to reconsidering the bill at this time, and I am willing to have the motion to reconsider put.

Mr. MCKELLAR. What is the nature of the bill.

Mr. JONES. It is a claim for additional compensation growing out of the raising of a vessel. It was reported by the committee and passed the Senate some days ago, but the changes to which I have referred have been agreed upon between the claimant and the Senator from Nebraska. So I ask that the vote whereby the bill was passed may be reconsidered.

The PRESIDING OFFICER. Without objection, the votes by which the bill was ordered to a third reading, read the third time, and passed will be reconsidered.

Mr. JONES. I now ask that the Senate proceed to the consideration of the bill.

There being no objection, the Senate proceeded to consider the bill (S. 584) for the relief of Frederick D. Swank.

Mr. JONES. I offer the amendments which have been agreed upon. They are indicated on the bill, on the first page in lead pencil and on the second page in typewriting.

The VICE PRESIDENT. The amendments will be stated.

The CHIEF CLERK. On page 1, line 12, after the word "extra," it is proposed to insert the words "time and"; and after the word "services," in the same line, to insert the word "required."

The amendment was agreed to.

The next amendment was, on page 2, to strike out all of section 2 of the proposed committee amendment, lines 9 to 24, and in lieu thereof insert the following:

SEC. 2. That jurisdiction is hereby conferred upon the District Court of the United States for the Northern District of California to hear, determine, and render judgment upon the claim of said Frederick D. Swank against the United States for the reasonable value of all services and materials furnished by him for which the United States is found legally liable under his contract with the United States for the removal of the wreck of the oil tanker *Alden Anderson*, except that there shall be deducted from any such judgment all sums paid prior to the approval of this act to said Frederick D. Swank with respect to such removal. Such claim shall be instituted prior to January 1, 1930. Appeals from any judgment rendered upon such claim shall be had as in the case of claims over which such court has jurisdiction under paragraph 20 of section 24 of the Judicial Code, as amended.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ROCHDALE COOPERATIVE SOCIETY

Mr. BROOKHART. Mr. President, to-morrow is the natal day of the Rochdale Cooperative Society. I give notice that I shall speak briefly to-morrow on that subject.

APPROPRIATIONS FOR THE INTERIOR DEPARTMENT

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes.

The PRESIDING OFFICER (Mr. MCNARY in the chair). The Secretary will read the bill.

The Chief Clerk proceeded to read the bill.

The first amendment of the Committee on Appropriations was, under the heading "Bureau of Indian Affairs—Industrial assistance and advancement," on page 24, line 20, before the word "available," to strike out "only" and insert "immediately," so as to read:

For the purpose of encouraging industry and self-support among the Indians and to aid them in the culture of fruits, grains, and other crops, $450,000, or so much thereof as may be necessary, which sum may be used for the purchase of seeds, animals, machinery, tools, implements, and other equipment necessary, and for advances to Indians having irrigable allotments to assist them in the development and cultivation thereof, in the discretion of the Secretary of the Interior, to enable Indians to become self-supporting: *Provided*, That the expenditures for the purposes above set forth shall be under conditions to be prescribed by the Secretary of the Interior for repayment to the United States on or before June 30, 1935, except in the case of loans on irrigable lands for permanent improvement of said lands, in which the period for repayment may run for not exceeding 20 years in the discretion of the Secretary of the Interior: *Provided further*, That $125,000 shall be immediately available for expenditures for the benefit of the Pima Indians and not to exceed $25,000 of the amount herein appropriated shall be expended on any other one reservation or for the benefit of any other one tribe of Indians:

The amendment was agreed to.

The next amendment was, under the subhead "Irrigation and drainage," on page 33, after line 3, to insert:

For the construction of a drainage system for lands of the Sac and Fox Indians in Iowa, $10,000: *Provided*, That said amount, or so much thereof as may be used in the construction of the drainage system, shall be reimbursed to the United States from the proceeds of leases covering the Indian lands benefited by the drainage work, and the Secretary of the Interior is hereby authorized to lease such lands for periods not in excess of five years, and the proceeds derived therefrom shall be used for payment of the cost of said work and the balance placed in the Treasury to the credit of the Indians, to bear interest at the rate of 4 per cent per annum: *Provided further*, That there is hereby created against such lands a first lien, which lien shall not be enforced during the period that the title to such lands remains in the Indians but that in case of sale of any such lands said lands shall be sold subject to the first lien herein created, and a recital of said lien shall be made in all patents or deeds issued for any lands benefited under the drainage ditch.

The amendment was agreed to.

The next amendment was, under the subhead "Education," on page 43, after line 6, to insert:

For repair, improvement, replacement, or construction of additional public-school buildings within Indian reservations in Arizona attended by children of employees of the Indian Service, $25,000.

The amendment was agreed to.

The next amendment was, on page 43, line 17, after the figures "$6,400," to strike out "in all, $92,400" and insert "for warehouse, $7,000; in all, $99,400," so as to read:

For support and education of Indian pupils at the following boarding schools in not to exceed the following amounts, respectively:

Fort Mojave, Ariz.: For 250 pupils, $65,000; for pay of superintendent, drayage, and general repairs and improvements, $15,000; for addition to hospital, $6,000; for lavatory annexes, $6,400; for warehouse, $7,000; in all, $99,400.

The amendment was agreed to.

The next amendment was, on page 44, line 19, before the word "pupils," to strike out "850" and insert "900"; in line 20, after the word "paper," to strike out "$212,500" and insert "$225,000"; and at the end of line 24 to strike out "$264,500" and insert "$277,000," so as to read:

Haskell Institute, Lawrence, Kans.: For 900 pupils, including not to exceed $1,500 for printing and issuing school paper, $225,000; for pay of superintendent, drayage, purchase of water for domestic purposes, and general repairs and improvements, including necessary drainage work, $27,000; for remodeling engineering plant, $25,000; in all, $277,000.

The amendment was agreed to.

The next amendment was, on page 49, line 16, to change the appropriation for Indian boarding schools from "$3,850,000" to "$3,869,500."

The amendment was agreed to.

The next amendment was, under the subhead "Conservation of health," on page 52, line 3, after the word "diseases," to strike out "$2,646,600" and insert "$2,718,600," so as to read:

For conservation of health among Indians (except at boarding schools supported from specific appropriations, other than those named herein), including equipment, materials, and supplies; repairs and improvements to buildings and plants; compensation and traveling expenses of officers and employees, and renting of quarters for them when necessary; transportation of patients and attendants to and from hospitals and sanatoria; returning to their former homes and interring the remains of deceased patients; not exceeding $3,000 for expenses (not membership fees) of physicians and nurses when officially detailed, in the interest of health work among the Indians, to attend meetings of medical and health associations; and not exceeding $1,000 for circulars and pamphlets for use in preventing and suppressing trachoma and other contagious and infectious diseases, $2,718,600, including not to exceed the sum of $1,508,100 for the following-named hospitals and sanatoria.

The amendment was agreed to.

Mr. SMOOT. Mr. President, at this time I am instructed by the committee to offer the amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 52, lines 4 and 5, it is proposed to strike out "$1,508,100" and to insert "$1,520,100."

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 54, line 1, after the name "Shawnee Sanatorium," to strike out "$48,000" and insert "$60,000," so as to read:

Oklahoma: Cheyenne and Arapahoe Hospital, $25,000; Choctaw and Chickasaw Hospital, $45,000; Shawnee Sanatorium, $60,000; Claremore Hospital, $25,000; Seger Hospital, $7,000.

The amendment was agreed to.

The next amendment was, on page 54, line 23, after the figures "$50,000," to insert "for construction of an addition to the hospital building, including refrigerating and other equipment; for employees' quarters; and for general repairs and improvements at the Kiowa Hospital, Lawton, Okla., $60,000"; and on page 55, at the end of line 6, to strike out "$515,000" and insert "$575,000," so as to read:

Provided further, That this appropriation shall be available for construction of hospitals and sanatoria, including equipment, as follows: Colorado River Hospital and physician's cottage, Arizona, $50,000;

Oraibi Sanatorium, Arizona, $65,000; Fort Belknap Hospital, Montana, $50,000; Tongue River Hospital, Montana, $55,000, including water and sewer systems in connection therewith; Turtle Mountain Hospital, North Dakota, $50,000; for construction of an addition to the hospital building, including refrigerating and other equipment; for employees' quarters; and for general repairs and improvements at the Kiowa Hospital, Lawton, Okla., $60,000; Pawnee and Ponca Hospital, Oklahoma, $60,000; Pine Ridge Hospital, South Dakota, $65,000; Cheyenne River and Standing Rock Sanatorium, South Dakota, $70,000; Hayward Hospital, Wisconsin, $50,000; in all, $575,000.

The amendment was agreed to.

The next amendment was, on page 55, after line 15, to strike out:

For construction of an addition to the hospital building, including refrigerating and other equipment; for employees' quarters; and for general repairs and improvements at the Kiowa Hospital, Lawton, Okla., $60,000, payable from funds on deposit in the Treasury to the credit of the Kiowa, Comanche, and Apache Indians of Oklahoma.

The amendment was agreed to.

The next amendment was, under the subhead "General support and administration," on page 56, line 17, after the word "employees," to strike out "$925,000" and insert "$985,000," so as to read:

For general support of Indians and administration of Indian property, including pay of employees, $985,000: *Provided*, That a report shall be made to Congress on the first Monday of December, 1930, by the Superintendent of the Five Civilized Tribes through the Secretary of the Interior showing in detail the expenditure of all moneys from this appropriation on behalf of the said Five Civilized Tribes.

The amendment was agreed to.

The next amendment was, on page 56, line 23, after the name "Five Civilized Tribes," to strike out the colon and the following additional proviso:

Provided further, That the position of Superintendent of the Five Civilized Tribes is hereby included within the competitive classified civil service and shall be subject to civil service laws and rules.

Mr. HAYDEN. Mr. President, the language proposed to be stricken out by the committee amendment reads as follows:

Provided further, That the position of Superintendent of the Five Civilized Tribes is hereby included within the competitive classified civil service and shall be subject to civil service laws and rules.

Before the Senate adopts the committee amendment I think a statement should be made as to just what the effect of that action would be.

I was a member of the House Committee on Indian Affairs in 1914 when this position was created. A provision contained in an act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs approved August 1, 1914, read as follows:

Provided, That effective September 1, 1914, the offices of the Commissioner of the Five Civilized Tribes and Superintendent of Union Agency, in Oklahoma, be, and the same are hereby, abolished, and in lieu thereof there shall be appointed by the President, by and with the advice and consent of the Senate, a superintendent for the Five Civilized Tribes, with his office located in the State of Oklahoma, at a salary of $5,000 per annum, and said superintendent shall exercise the authority and perform the duties now exercised by the Commissioner to the Five Civilized Tribes and the Superintendent of the Union Agency, with authority to reorganize the department and to eliminate all unnecessary clerks, subject to the approval of the Secretary of the Interior.

Objection is made to the inclusion of an item in a general appropriation bill abolishing the office of Superintendent of the Five Civilized Tribes. I beg to direct the attention of the Senate to the fact that the office was created by an item in a general appropriation bill. Anything that could be done in that matter can be properly undone in the same manner.

One reason urged for consolidating the two then existing offices, and establishing one official to perform the duties of both as Superintendent of the Five Civilized Tribes, was that there were many matters of a minor nature which should not be referred to the Commissioner of Indian Affairs in Washington—matters that could be better disposed of in Oklahoma. In was, therefore, recommended that this position be created, that a salary of $5,000 per annum be attached thereto, and that the official thus appointed should be confirmed by the Senate of the United States.

In a subsequent Indian appropriation act his jurisdiction was enlarged. I read from a proviso:

That hereafter no undisputed claims to be paid from individual moneys of restricted allottees, or their heirs, or uncontested agricultural and mineral leases (excluding oil and gas leases) made by individual restricted Indian allottees, or their heirs, shall be forwarded to the Secretary of the Interior for approval, but all such undisputed claims or uncontested leases (except oil and gas leases) heretofore required to be approved under existing law by the Secretary of the Interior shall hereafter be paid, approved, rejected, or disapproved by the Superintendent for the Five Civilized Tribes of Oklahoma.

I favored the enactment of that legislation, and would have given the superintendent even more authority. Under authority of the law creating this office there was appointed a most excellent gentleman, Mr. Gabe E. Parker, who served for nearly eight years in that office without scandal of any kind. Mr. Parker came up from the Indian Service. He was a man thoroughly familiar with the administration of Indian affairs, and his administration of the office was entirely satisfactory. Nevertheless, it was a political appointment made under an item in the Indian appropriation bill which changed it from a civil-service position to a political appointment.

However, subsequent political appointees have not conducted themselves in so satisfactory a manner. We have the testimony of Mr. Meritt, the Assistant Commissioner of Indian Affairs, before the Senate Committee on Appropriations to the effect that one superintendent, Mr. Victor Locke, was removed from office for misconduct; that his successor, Mr. Shade E. Wallen, was likewise removed and was indicted by a grand jury for irregularities in the conduct of that office. It is, therefore, highly desirable to restore the original status. It seems to me it is entirely proper to do that on a general appropriation bill, inasmuch as the original position was created in that manner.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). Does the Senator from Arizona yield to the Senator from Tennessee?

Mr. HAYDEN. I yield.

Mr. McKELLAR. Has the President appointed a civil-service employee who now holds the place?

Mr. HAYDEN. The acting superintendent, Mr. Charles S. Ellis, who is a civil-service employee, has been in charge of the office, so I am informed, for the past two years.

Mr. McKELLAR. Did the President send his appointment in to the Senate or not?

Mr. HAYDEN. I do not know. I imagine not.

Mr. McKELLAR. The President has the right to do that if he desires, has he not?

Mr. HAYDEN. Certainly. There is no dispute about that; but that has not been done.

I hold in my hand the Annual Report of the Board of Indian Commissioners for the Fiscal Year Ending June 30, 1926. That board is made up of 10 distinguished citizens of the United States, whose names are as follows:

Warren K. Moorhead, Andover, Mass.; Samuel A. Eliot, Boston, Mass.; Frank Knox, Manchester, N. H.; Daniel Smiley, Mohonk Lake, N. Y.; Malcolm McDowell, Washington, D. C.; Gen. Hugh L. Scott, Princeton, N. J.; Clement S. Ucker, Savannah, Ga.; Flora Warren Seymour, Chicago, Ill.; John J. Sullivan, Philadelphia, Pa.; Mary Vaux Walcott, Washington, D. C.

The members of this board serve without pay, and their point of view is entirely disinterested.

In the report of this board for the year 1924 I find this statement in respect to the Superintendent for the Five Civilized Tribes:

CIVIL-SERVICE STATUS FOR SUPERINTENDENT

The Superintendent for the Five Civilized Tribes is the only superintendent in the Indian Service who has not a civil-service status. He is appointed by the President, with the advice and consent of the Senate, by virtue of an act of Congress approved in 1914. All other reservation superintendents are appointed by the Secretary of the Interior under civil service laws and regulations. Before 1914 this jurisdiction was ably managed by two officials appointed in conformity with the civil service law, and under them the great task of allotment and organization was practically completed.

It is quite evident that the radical change in the status of the superintending official was effected 12 years ago as a matter of political expediency. There were no unusual conditions existent at the time which required the setting apart of this agency as a unique exception to the long-established and time-tested practice that placed the field management of Indian affairs in the hands of civil-service employees. There then were a number of competent, experienced field officials having the civil-service status—as there are now—any one of whom could have effectively superintended the agency for the Five Civilized Tribes.

This office is frankly regarded as a rightful perquisite of the political party in power. No other superintendency is so regarded. There is no valid reason why the Five Civilized Tribes superintendent should be unique in this respect. It certainly is a sad commentary on our vaunted American civilization that the happiness, welfare, and progress of sev-

eral thousands of human beings, who happen to be the Indian wards of a great Government, should be made secondary to the political fortunes of a few white persons who happen to live in Oklahoma.

Mr. WALSH of Montana. Mr. President, may I ask the Senator from what document he reads?

Mr. HAYDEN. I am reading from the Annual Report of the Board of Indian Commissioners for the Year Ending June 30, 1926. [Reading:]

For the past 12 years, no matter which of the major parties were in power, and irrespective of the personality of the incumbent of this office, there has been a constant atmosphere of suspicion, of charge and countercharge, of factional jockeying, of favoritism and discrimination surrounding the office of the Superintendent for the Five Civilized Tribes. The incumbent not only has been subjected to attacks from the party in opposition but also by the faction of his own party to which he did not belong and which vehemently wanted to get him out in order to get its man in.

If these political maneuverings did not affect the Indians, this matter perhaps might be passed over as of minor consequence. But the injection of practical politics into the administration of the affairs of this group of tribes has been most injurious to the welfare of the Indians and has brought discredit to the Nation and the State of Oklahoma.

The sole cure for this evil situation is the repeal of the law which changed the office of superintendent from a civil-service status, making it a political appointment.

Such action would make this office similar in all respects to that of other superintendencies in the Indian Service. Whenever this suggestion has been offered it was promptly met by the argument that the great importance of this superintendency, the large number of its Indian population, and the vast wealth evidenced by their valuable land properties made it necessary to have a superintendent who was appointed by the President.

That argument no longer has any force, if it ever had any. As a matter of fact this agency has lost the standing it once held as the most important superintendency in the Indian Service. Its present apparent importance is due to the presence of some opulent Indian estates owned by less than 5 per cent of the total enrolled restricted Indians. By placing these estates in the charge of trustee banks and trust companies, as we are recommending, the population, financial, and land-holding statistics of this agency would dwindle down to those of a fair-sized jurisdiction.

We are recommending that the agency be subdivided into two jurisdictions, each with a civil-service superintendent. The natural division would seem to group the Cherokee, Creek, and Seminole, with a population of restricted enrolled allottees of about 11,000 or more, into one jurisdiction, and the Choctaw and Chickasaw, with a population of restricted enrolled allottees of about 5,000, into another.

Quite recently, at your request, the President, by an Executive order, placed all employees of the tribal school in this agency under the civil service. We beg to urge you to do what you properly can do to secure legislation which will enable you to subdivide the agency for the Five Civilized Tribes into two or more Indian Service units, in your discretion, with superintendents and all employees having a civil-service status.

That, Mr. President, is the recommendation of the Board of Indian Commissioners. I want to follow it by reading a brief letter from the representative of the Indian Rights Association addressed to me, dated to-day, as follows:

INDIAN RIGHTS ASSOCIATION (INC.),
Washington, D. C., December 20, 1928.

Hon. CARL HAYDEN,
United States Senate.

DEAR SENATOR HAYDEN: We have consistently and continuously urged that the selection and appointment of the Superintendent of the Five Civilized Tribes in Oklahoma should be within the competitive classified civil service. This legislation is most desirable so as to remove as far as possible the management of our Indian wards from the evils resulting through political favoritism.

We trust you will lend your support to the provision in the pending act providing for appropriations for the Interior Department, which includes the provision that the Superintendent of the Five Civilized Tribes shall be included within the classified civil service.

Very cordially yours,

S. M. BROSIUS,
Representative Indian Rights Association.

I shall detain the Senate but a moment longer, and to direct attention to the planks in the platforms of the two great political parties adopted this year on the subject "Civil service." The Democratic platform reads:

CIVIL SERVICE

Grover Cleveland made the extension of the merit system a tenet of our political faith. We shall preserve and maintain the civil service.

The Republican national platform reads, under the heading "Civil service":

The merit system in Government service originated with and has been developed by the Republican Party. The great majority of our public-service employees are now secured through and maintained in the Government-service rules. Steps have already been taken by the Republican Congress to make the service more attractive as to wages and retirement privileges, and we commend what has been done as a step in the right direction.

The next step to take, so far as the Indian Service is concerned, is presented to the Senate by the House provision in the pending bill, which provides that the position of Superintendent of the Five Civilized Tribes shall be in the classified civil service.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 59, line 8, after the word "Indians," to strike out the semicolon and the following: "for the construction of a drainage system for lands of the Sac and Fox Indians in Iowa, $10,000: *Provided*, That said amount or so much thereof as may be used in the construction of the drainage system shall be reimbursed to the United States from the proceeds of leases covering the Indian lands benefited by the drainage work, and the Secretary of the Interior is hereby authorized to lease such lands for periods not in excess of five years, and the proceeds derived therefrom shall be used for payment of the cost of said work and the balance placed in the Treasury to the credit of the Indians, to bear interest at the rate of 4 per cent per annum: *Provided further*, That there is hereby created against such lands a first lien which lien shall not be enforced during the period that the title to such lands remains in the Indians, but that in case of sale of any such lands said lands shall be sold subject to the first lien herein created, and a recital of said lien shall be made in all patents or deeds issued for any lands benefited under the drainage ditch; in all, $10,600;" so as to read:

Iowa: Sac and Fox, $600: *Provided*, That no part of this appropriation shall be available for the payment of taxes on any lands held in trust by the United States for the benefit of said Indians.

The amendment was agreed to.

The next amendment was, on page 60, line 21, after the figures "$3,000," to strike out "Kiowa, Comanche, and Apache, $60,000"; and at the end of line 23, to strike out "$84,600" and insert "$24,600," so as to read:

Oklahoma: Ponca (Otoe, $1,200; Ponca, $2,600; Tonkawa, $700), $4,500; Sac and Fox, $3,000; Cheyennes and Arapahoes, $17,100; in all, $24,600.

The amendment was agreed to.

The next amendment was, on page 61, at the end of line 24, to change the total appropriation for general support and administration of Indian affairs from "$1,447,550" to "$1,387,550."

The amendment was agreed to.

The next amendment was, under the heading "Bureau of Reclamation," on page 79, line 5, after the word "construction," to strike out "$213,000; in all, $233,000" and insert "$500,000; in all, $520,000," so as to read:

Sun River project, Montana: For operation and maintenance, $20,000; continuation of construction, $500,000; in all, $520,000.

The amendment was agreed to.

The next amendment was, on page 79, line 9, after the word "appropriated," to strike out the colon and the following additional proviso:

Provided further, That on or before July 1, 1929, notice shall be given by the Secretary of the Interior requiring the water users to assume the control of the constructed works on January 1, 1931, and to commence payment of construction charges in accordance with the contract of June 22, 1926, between the United States and the Greenfields irrigation district.

The amendment was agreed to.

The next amendment was, on page 79, after line 22, to insert:

Newlands project, Nevada: That such portion as may be necessary of the unexpended balance of the appropriation of $50,000 for the survey and examination of water storage reservoir sites on the headwaters of the Truckee and Carson Rivers, made available under the provisions of the second deficiency act, 1928 (Public, No. 563, Session Laws, 1st sess. 70th Cong., p. 902, Newlands project, Nevada), shall also be available for the boring of test wells in the Truckee Meadows, Washoe County, near the city of Reno, Nev.

The amendment was agreed to.

The next amendment was, on page 81, line 6, after the figures "$6,000," to insert: "Continuation of construction, $644,000, of

which amount not more than $130,000 shall be available for the purchase of a proportionate interest in the existing storage reservoir of the Warm Springs project; in all, $650,000: *Provided*, That the unexpended balance of the appropriation of $744,000 for the continuation of construction for the fiscal year 1929 shall remain available during the fiscal year 1930," so as to read:

Vale project, Oregon: For operation and maintenance, $6,000; continuation of construction, $644,000, of which amount not more than $130,000 shall be available for the purchase of a proportionate interest in the existing storage reservoir of the Warm Springs project; in all, $650,000: *Provided*, That the unexpended balance of the appropriation of $744,000 for the continuation of construction for the fiscal year 1929 shall remain available during the fiscal year 1930.

The amendment was agreed to.

The next amendment was, on page 82, line 9, after the name "Washington," to strike out "For operation and maintenance, $20,000; for continuation of construction, $862,000: *Provided*, That the unexpended balance of $138,000 of the appropriation of $1,500,000 contained in the act making appropriations for the Department of the Interior for the fiscal year 1929 (45 Stat. p. 277), shall remain available during the fiscal year 1930 for such continuation of construction; in all, $882,000" and in lieu thereof to insert: "For continuation of construction and operation and maintenance, $1,500,000: *Provided*, That the unexpended balance of the appropriation of $1,500,000 contained in the act making appropriations for the Department of the Interior for the fiscal year 1929 (45 Stat. p. 227) shall remain available during the fiscal year 1930," so as to read:

Yakima project (Kittitas division), Washington: For continuation of construction and operation and maintenance, $1,500,000: *Provided*, That the unexpended balance of the appropriation of $1,500,000 contained in the act making appropriations for the Department of the Interior for the fiscal year 1929 (45 Stat. p. 227) shall remain available during the fiscal year 1930.

The amendment was agreed to.

The next amendment was, on page 86, line 7, to increase the total appropriation from the reclamation fund from $7,211,000 to $8,760,000.

The amendment was agreed to.

The next amendment was, under the heading "Geological Survey—General expenses," on page 88, after line 7, to insert:

For a topographic survey of the boundaries of the proposed Shenandoah National Park in the State of Virginia, for expenditure by the Geological Survey under the direction of the Secretary of the Interior, including personal services in the District of Columbia and elsewhere; the computation and adjustment of control data; the office drafting and publication of the resulting maps; the purchase of equipment, not to exceed $700 for the purchase and not to exceed $1,000 for the hire, maintenance, repair, and operation of motor-propelled passenger-carrying vehicles for field use; and for the securing of such aerial photographs as are needed to make the field surveys, to be immediately available, $45,000.

The amendment was agreed to.

The next amendment was, on page 90, at the beginning of line 1, to strike out "$165,000" and insert "$150,000," so as to read:

For gauging streams and determining the water supply of the United States, the investigation of underground currents and artesian wells, and the preparation of reports upon the best methods of utilizing the water resources, $225,000; for operation and maintenance of the Lees Ferry, Ariz., gauging station and other base-gauging stations in the Colorado River drainage, $50,000; in all, $275,000, of which amount not to exceed $90,000 may be expended for personal services in the District of Columbia: *Provided*, That no part of this appropriation shall be expended in cooperation with States or municipalities except upon the basis of the State or municipality bearing all of the expense incident thereto in excess of such an amount as is necessary for the Geological Survey to perform its share of general water-resource investigations, such share of the Geological Survey in no case exceeding 50 per cent: *Provided further*, That $150,000 of this amount shall be available only for such cooperation with States or municipalities.

The amendment was agreed to.

The next amendment was, on page 92, at the end of line 25, to change the total appropriation for United States Geological Survey from $2,040,800 to $2,085,800.

The amendment was agreed to.

The next amendment was, under the heading "National Park Service," on page 94, line 9, after the word "improvements," to strike out "$31,400" and insert "$37,400"; in line 12, after the word "mechanic," to insert "$6,000 for a residence for the United States Commissioner"; and at the end of line 18, to strike out "$214,400" and insert "$220,400," so as to make the paragraph read:

Glacier National Park, Mont.: For administration, protection, and maintenance, including necessary repairs to the roads from Glacier Park Station through the Blackfeet Indian Reservation to various points in the boundary line of the Glacier National Park and the international boundary, including not exceeding $800 for the maintenance, operation, and repair of motor-driven passenger-carrying vehicles for the use of the superintendent and employees in connection with general park work, including $15,000 for fire prevention, $183,000; for construction of physical improvements, $37,400, including not exceeding $13,860 for the construction of buildings, of which not exceeding $3,235 shall be available for a residence for the chief mechanic, $6,000 for a residence for the United States commissioner, $4,055 for fire caches and three fire lookout towers, $310 for the completion of a bunk house, $200 for the completion of a mess house, $600 for the completion of a duplex cottage, and $10,350 for one-third of the cost of constructing a telephone line partly outside the park boundary; in all, $220,400.

The amendment was agreed to.

The next amendment was, on page 101, after the figures "$412,360," to insert a colon and the following proviso:

Provided, That the unexpended balance of the appropriation of $65,000 for the construction of water supply and camp-ground facilities at Glacier Point contained in the Interior Department appropriation act for the fiscal year 1929 shall remain available until June 30, 1930.

The amendment was agreed to.

The next amendment was, on page 105, line 14, after the word "monuments," to strike out "by purchase, or by condemnation under the provisions of the act of August 1, 1888 (U. S. C. p. 1302, sec. 257), whenever in the opinion of the Secretary of the Interior acquisition by condemnation proceedings is necessary or advantageous to the Government," so as to read:

For the acquisition of privately owned lands and/or standing timber within the boundaries of existing national parks and national monuments, $250,000, to be expended only when matched by equal amounts by donation from other sources for the same purpose, to be available until expended: *Provided*, That in addition to the amount herein appropriated the Secretary of the Interior may incur obligations and enter into contracts for additional acquisition of privately owned lands and/or standing timber in the existing national parks and national monuments not exceeding a total of $2,750,000 as matching funds from outside sources are donated for the same purpose, and his action in so doing shall be considered contractual obligations of the Federal Government.

Mr. WALSH of Montana. Mr. President, I want to inquire of the Senator in charge of the bill whether the words "by purchase" in line 14 should not be left. Is there not a little more excised there than is necessary to be excised?

Mr. SMOOT. The committee thought not. The committee thought that that should be, "For the acquisition of privately owned lands and/or standing timber within the boundaries of existing national parks and national monuments, $250,000."

Mr. WALSH of Montana. The Senator has not caught the point I am making. I take it that the committee simply wanted to take away the right to condemn under this, leaving the right to purchase.

Mr. SMOOT. Under the existing law.

Mr. McKELLAR. Under existing law. That is the idea; that we just leave the law as it is. That is the argument that was made.

Mr. WALSH of Montana. That does not help the situation. As this stands now, it is for the acquisition of these lands, and that would permit the acquisition in any way by which they can be acquired under the law, if we appropriate this money.

Mr. SMOOT. That is true.

Mr. WALSH of Montana. They can acquire these lands either by purchase or by condemnation. That is not what the committee intended to do. They intended to give the power to get the lands by purchase, but did not intend to make any appropriation so that they could use it for condemning the land.

Mr. SMOOT. That was the decision of the committee.

Mr. WALSH of Montana. Mr. President, then this becomes a most serious matter, and I shall be obliged to take some time in discussing it. I can not think that the committee intended anything of the kind.

Mr. CURTIS. Mr. President, I understood it to be stated by one of the Senators, the junior Senator from Montana, that this land could be purchased, but that if for any reason it could not be purchased at a reasonable price, then the department would have the right to condemn under existing law.

Mr. WALSH of Montana. Yes.

Mr. McKELLAR. But it was argued further than that. It was stated before the committee that the department itself was

in very grave doubt about whether it had the right now to condemn in such cases as this, and it was said that it had not exercised that right in any such case. It was assumed by the committee—it was by me, at any rate—that under those circumstances it would not proceed to condemnation because the alleged law under which they might condemn had been in force since 1883, I think——

Mr. WALSH of Montana. Eighteen hundred and eighty-eight.

Mr. McKELLAR. Since 1888; so that under those circumstances the committee just took out the word "acquisition."

Mr. WALSH of Montana. This is the situation, if I may be permitted to give my view about the matter: The law of 1888 authorized the condemnation of land desired by the Government for any particular purpose, but there is no appropriation. They may go on and institute proceedings to condemn if they desire to do so, but if they did condemn there would be no money appropriated by which they could pay the price fixed in the condemnation proceedings.

Mr. SMOOT. That will be taken care of at the next session of Congress.

Mr. WALSH of Montana. Let it be taken care of at the next session of Congress then.

Mr. SMOOT. I will say to the Senator that the Senator from Tennessee has stated the exact position the committee took, but if the Senator desires we will amend the amendment by leaving in the words "by purchase."

Mr. WALSH of Montana. Leave in the words "by purchase."

Mr. SMOOT. And let it go to conference. Then the whole thing will be in conference.

Mr. WALSH of Montana. I move, then, to amend the amendment of the committee by restoring the words "by purchase" in line 14.

Mr. SMOOT. I have no objection.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 107, line 5, after the word "boundary," to insert "and for the continuance of construction of the transmountain road in said Glacier National Park," so as to read:

Construction, etc., of roads and trails: For the construction, reconstruction, and improvement of roads and trails, inclusive of necessary bridges, in national parks and monuments under the jurisdiction of the Department of the Interior, including the roads from Glacier Park Station through the Blackfeet Indian Reservation to various points in the boundary line of the Glacier National Park and the international boundary, and for the continuance of construction of the transmountain road in said Glacier National Park, and the Grand Canyon Highway from the National Old Trails Highway to the south boundary of the Grand Canyon National Park as authorized by the act approved June 5, 1924 (43 Stat. p. 423), and including that part of the Wawona Road in the Sierra National Forest between the Yosemite National Park boundary 2 miles north of Wawona and the park boundary near the Mariposa Grove of Big Trees, and that part of the Yakima Park Highway between the Mount Rainier National Park boundary and connecting with the Cayuse Pass State Highway, to be immediately available and remain available until expended, $5,000,000, which includes $4,000,000, the amount of the contractual authorization contained in the act making appropriations for the Department of the Interior for the fiscal year 1929, approved March 7, 1928 (45 Stat. pp. 237, 238).

The amendment was agreed to.

Mr. SMOOT. Mr. President, the committee has two other amendments. In behalf of the committee, I send to the desk the following amendment:

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 22, line 20, after the word "practicable," to insert a colon and the following additional proviso:

Provided also, That the amounts paid to matrons, foresters, farmers, physicians, nurses, and other hospital employees, and stockmen provided for in this act shall not be included within the limitations on salaries and compensation of employees contained in the act of August 24, 1912 (U. S. C., p. 692, sec. 58).

The amendment was agreed to.

Mr. SMOOT. I offer also the following amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 40, line 3, after the word "prescribe," to insert a comma and "but formal contracts shall not be required, for compliance with section 3744 of the Revised Statutes (U. S. C., p. 1310, sec. 16), for payment of tuition of Indian children in public schools or of Indian children in schools for the deaf and dumb, blind, or mentally deficient."

The amendment was agreed to.

Mr. SMOOT. I also offer the following amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 119, line 17, after the name "Secretary of the Interior," to insert a colon and the following additional proviso:

Provided further, That the practice of allowing quarters, heat, light, household equipment, subsistence, and laundry service to the superintendent and other employees who are required to live at St. Elizabeths Hospital may be continued without deduction from their salary, notwithstanding the act of March 5, 1928 (45 Stat. 193).

The amendment was agreed to.

Mr. CURTIS. Mr. President, I offer the following committee amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 44, line 24, after the figures "$25,000," add the following:

For the construction of a new dormitory and gymnasium for girls, $70,000.

The amendment was agreed to.

Mr. CURTIS. I also offer the following amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. After the amendment just adopted add the following:

For purchase of additional lands, $20,000.

The amendment was agreed to.

Mr. CURTIS. I ask that the totals be corrected by the clerk.

The PRESIDING OFFICER. Without objection, the clerk will be instructed to correct the totals.

Mr. SMOOT. That completes all committee amendments.

The PRESIDING OFFICER. The bill is still as in the Committee of the Whole and open to amendment. If there be no further amendment to be offered, the bill will be reported to the Senate as amended.

The bill was reported to the Senate as amended.

Mr. McMASTER. Mr. President, are we about to vote on the passage of the bill?

Mr. SMOOT. Yes; unless the Senator has an amendment to offer.

Mr. McMASTER. I want to ask a question as to page 54, line 5, the provision for the Rapid City Sanatorium School, $94,600. What does that mean?

Mr. SMOOT. It means that in South Dakota the Crow Creek Hospital will get $10,000, the Pine Ridge Hospital $14,000, the Rosebud Hospital $20,000, and the Rapid City Sanatorium School $94,600.

Mr. McMASTER. Has there not been a new policy inaugurated in reference to that school? The Rapid City School is an Indian school, but there is no sanatorium there.

Mr. SMOOT. That is true. It was recommended by the department that we change it to a sanatorium school. The Senator will remember the same question arose a year ago. I do not think there is any objection to it. I have not heard any objection on the part of anybody.

Mr. McMASTER. I wish to say that this inaugurates a new policy there in reference to the Rapid City Indian School; that is, it converts it into an institution for tubercular patients.

I want to call the attention of the Senate to the fact that it seems to me the time ought to have passed when the Federal Government should seize upon some old school building for the purpose of constructing a sanatorium. There are 600 or 700 tubercular Indian children in the State of South Dakota. The purpose of the amendment, as I understand it, is to house and school those children. It seems to me where there is a population of six or seven hundred Indian children who are afflicted with that disease, we having a total Indian population of 25,000, they ought to have the best modern-equipped institution that can be given to them. The only way to cure a tubercular trouble is through sunshine and fresh air. These buildings ought to be constructed with that idea in mind. Taking these six or seven hundred children who are afflicted with tuberculosis and housing them in these old buildings at Rapid City is simply condemning them to death, and it is certainly doing hardly anything to alleviate the trouble.

I am not criticizing the committee, but I am criticizing the policy of treating the Indians in this manner. It seems that in many of the States wherever there has been an old military fort or post, we have gone and taken the stables and old build-

ings and converted them into hospitals and schools for Indians. We have hardly given the Indians any consideration in the days gone by. We have merely utilized every old building possible for the purpose of schools and hospitals for the Indians.

Mr. SMOOT. I want to read to the Senator just what Mr. Meritt said on this question. It was upon this basis that we acted, first in the House and later in the Senate. In speaking of the convenience of the situation Mr. Meritt said:

> The item would read "Rapid City, S. Dak., for sanatorium school, $94,600." We want to convert that into a sanatorium school because we have between 500 and 700 children of school age in the State of South Dakota alone who are not in school, but who either have been returned to their homes from schools because they have tuberculosis, or who have not been received in schools because of tuberculosis. I visited that State this summer, and visited every agency and every school in the State of South Dakota. I was somewhat alarmed about the tuberculosis situation in that State. Practically every superintendent told me that tuberculosis was on the increase because of an epidemic they had there a few years ago, and they were not able to control tuberculosis with the present facilities. It is not fair to those tubercular children to keep them in the average Indian home, which is a miserable affair, without sanitary conditions. A child in those homes does not receive proper shelter, proper food, proper clothing, or proper medical attention. In a school of this kind they would receive all those things and more. They would have the opportunity of recovering their health. It is one of the serious needs of South Dakota. I made this recommendation to Commissioner Burke after my return from my trip there this summer, and he approves the recommendation.

Mr. McMASTER. Everything that the Senator has read from the statement made by Mr. Meritt is absolutely correct. There is a pressing need for an institution of that kind. The State of South Dakota for its own people has an institution located in this vicinity because of the ideal location, the mountain location, air, water, and so on. It is conducive to the curing of tubercular troubles. But when the State of South Dakota built its institution it did not take some old school buildings for the purpose. It constructed new buildings that were properly ventilated and properly lighted so the patients could have the benefit of the sunshine and fresh air. What I am objecting to is that to meet a pressing need by taking old buildings for the purpose instead of constructing new buildings is not in the interest of the welfare of the Indians. Instead of taking an old building and attempting to reconstruct it or refit it, such institutions ought to be new construction and modernly equipped in every way.

Mr. SMOOT. For the satisfaction of the Senator I want to read the following from Mr. Meritt's statement so as to show what the department has in mind:

> We are starting this sanatorium school in a modest way for the first year and we hope to get materially increased appropriations for the remodeling and enlargement of the plant. As stated in the hearings we hope ultimately to make this an institution of 500 capacity, because we now have between 500 and 700 children in South Dakota of school age who have tuberculosis and who are in their homes, transmitting the disease to other members of their family.

In other words, this is only the beginning. The Bureau of Indian Affairs recognize that this is not enough.

Mr. McMASTER. I realize that, but does not the Senator think that the way to begin anything like that is to begin at the bottom and not to begin by housing tubercular patients in old school buildings?

Mr. SMOOT. This is a decided improvement over what they have had.

Mr. McMASTER. Certainly it is going to be a decided improvement. What objection would the committee have to changing that wording a little in this paragraph and giving the $94,600 for the Indian school alone and $300,000 for the sanatorium and starting them out right?

Mr. SMOOT. That was not considered by the committee.

Mr. McMASTER. But the Senator will agree with me that that is the proper way to begin an institution of that kind. We ought to begin building from the bottom, and we ought not to house these tubercular children in an old building.

Mr. McKELLAR. What amendment would the Senator suggest?

Mr. McMASTER. The provision now creates a new institution at Rapid City by converting an old Indian school into a tubercular institution for the housing of 500 or 600 tubercular Indian children. What I want to do is just to change that wording so that we may give $94,600 to the school and then begin building a real institution for the tubercular children by the appropriation of $300,000.

Mr. McKELLAR. The Senator wants to add $300,000?

Mr. McMASTER. Yes; to start a new program.

Mr. WARREN. But that can not be done under the rule.

Mr. McMASTER. I am not violating any rule. There is so much money appropriated for a school and a sanatorium. I am simply proposing to segregate the two items.

Mr. SMOOT. The only question involved is that it has not been estimated for and it has not been reported by the committee. If the Senator had come before the committee, perhaps we would have been able to do what he asks and at least let it go to conference. That at least would give notice of the sentiment of the Congress on the question.

Mr. McMASTER. Could not that be inserted now?

Mr. SMOOT. We could change the $94,600 to $394,600, and then we can discuss it and have it before us in conference.

Mr. McMASTER. Will not the Senator do that?

Mr. SMOOT. I shall be glad to accept that amendment and let it go to conference.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 54, line 5, strike out "$94,600" and insert "$394,600."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. ASHURST. Mr. President, I ask permission to have printed in the RECORD an address by Hon. Edgar B. Meritt, Assistant Commissioner of Indian Affairs, before the Navajo Council at the Leupp Indian School, Arizona, November 12, 1928.

The PRESIDING OFFICER. Without objection, it is so ordered.

The speech referred to is as follows:

ADDRESS BY EDGAR B. MERITT, ASSISTANT COMMISSIONER OF INDIAN AFFAIRS, BEFORE THE NAVAJO COUNCIL HELD AT THE LEUPP INDIAN SCHOOL, ARIZONA, NOVEMBER 12, 1928

Members of the Navajo Council, ladies and gentlemen, it is a pleasure to call to order the sixth annual session of the Navajo Tribal Council. I bring you greetings from Washington and the best wishes of high officials of the Interior Department, including Hon. Charles H. Burke, Commissioner of Indian Affairs, for a successful meeting of this council.

I am sure that I speak the views of all members of this council and the superintendents of the other Navajo jurisdictions in expressing thanks to Superintendent Hunter and the employees of the Leupp Indian school and agency for their kind invitation to hold the Navajo Council at this place and for the splendid arrangements that have been made for our convenience and comfort while here.

We are holding this council for the purpose of meeting you personally and learning direct from you your views on various matters and problems affecting the Navajo judisdictions and the Navajo people. It is our hope that this will be a constructive and informative meeting so that we may take back to Washington a better conception of the problems of your several jurisdictions and be in a position to render greater service and assistance to the Navajo Indians. We also want this council to be a medium through which you may know what the Government is trying to do for the Navajos and what is possible to be done by the Federal Government. It is also quite desirable for the Navajo Indians to learn what they can do to help themselves.

Since the ratification of the Fort Sumner Treaty of 1868 the Navajo Indians have made remarkable progress along educational and industrial lines and along other lines of human endeavor. At that time there were estimated to be 9,000 Navajo Indians, and there are now approximately 40,000, a gain of 400 per cent. At that time the Navajos owned approximately 25,000 sheep and goats. To-day they are in possession of approximately 1,100,000 sheep and goats, and are recognized as the greatest and most successful sheep raisers of any Indians in the United States.

In 1868 the Navajo Indians owned but a few head of cattle; to-day they own 65,000 head of cattle and about 45,000 horses. Then there were practically no Navajo Indian children in school; to-day there are 4,923 of your children attending school, 3,220 of whom are in schools on the several Navajo reservations, and 1,696 are attending schools off the reservations, principally nonreservation boarding schools supported by the Federal Government. Practically no money was being appropriated at that time for the education of the Navajos; during the fiscal year 1928 the Government expended $768,599.24 for the education of Navajo children, exclusive of additional expenditures for the education of Navajo children enrolled in Government nonreservation schools. Then only a few thousand dollars was being expended in behalf of the Navajo Indians, but to-day we are expending considerably in excess of $1,000,000 annually for the benefit of the Indians within the six Navajo jurisdictions, the amount expended during the fiscal year 1928 being $1,312,678.98.

In 1868 there were no doctors, nurses, or hospitals for the benefit of the Navajo people; to-day we have 13 doctors, 16 nurses, and 10 hospitals and sanatoria, with a total bed capacity of 345, available for the benefit of the Navajos. During the recent past we have constructed new hospitals at Western Navajo, Leupp, Chin Lee, Tohatchi; a 100-bed sanatorium is now being constructed at Fort Defiance; a small hospital

has been remodeled and enlarged at the Toadlena School; the Marsh Pass School has been converted into a tuberculosis sanatorium; and we hope to obtain at the next session of Congress an appropriation for a sanatorium for the benefit of the Hopi and Leupp jurisdictions.

Article 3 of the treaty of 1868 reads as follows:

"The United States agrees to cause to be built, at some point within said reservation, where timber and water may be convenient, the following buildings: A warehouse, to cost not exceeding $2,500; an agency building for the residence of the agent, not to cost exceeding $3,000; a carpenter shop and blacksmith shop, not to cost exceeding $1,000 each; and a schoolhouse and chapel, so soon as a sufficient number of children can be induced to attend school, which shall not cost to exceed $5,000."

I think you will agree that this program of construction for the Navajo Indians seems insignificant indeed when compared with the many hundreds of thousands of dollars that have been expended in the construction of school buildings, hospitals, and agency quarters within the six jurisdictions covering the Navajo country.

In 1868 there was set aside for the use of the 9,000 Navajos approximately 3,000,000 acres of land in what is now the States of Arizona and New Mexico. Through the persistent efforts of the Indian Bureau this acreage has been gradually increased until to-day the Navajo Indians have in their possession approximately 13,000,000 acres of land. A tribe of 9,000 uneducated and frequently waring Navajos miserably existing in 1868 has increased in number to more than 35,000, a large number of whom are educated and speak the English language. This tribe is now industrious and self-supporting and is occupying in peaceful possession an area of approximately 13,000,000 acres of land, title to which can not be questioned under the law. These same Navajos are now voluntarily sending their children to school, accepting modern medical and hospital facilities, are wearing citizens' clothes, are driving their own automobiles, are able to conduct business on equal terms with their white neighbors, are improving their home conditions, and have secured for themselves a definite place in the social and economic life in the States of Arizona and New Mexico, of which they are full-fledged citizens and are a credit and a distinct asset to their communities, their States, and to their Federal Government.

I have endeavored to make a comparison between conditions existing in 1868 and conditions as they exist to-day with the Navajo Indians, and it is believed that you will all agree that there has been a most remarkable progress. However proud we may be of past splendid accomplishments and growth in population, wealth, improved home conditions, and social status in general, yet we recognize that there are vast opportunities for still further improvement.

Speaking generally of Indians throughout the United States, in 1868 there were 298,528 Indians; seven years ago, at the beginning of Commissioner Burke's administration of Indian affairs, there were 340,838 Indians; to-day, this number has been increased to 355,901.

In 1868 there were 4,713 Indian children attending schools, many of which were conducted by various church organizations; seven years ago this number had been increased to 62,764, and to-day we have an attendance of Indian pupils in schools of 66,958.

Seven years ago the total Indian property was valued at $716,705,501, and to-day this property is estimated to be worth $1,648,075,274.

In 1868 there was approximately no money being expended for health work among Indians, and there were no hospitals or sanatoria. At the beginning of the administration of Commissioner Burke seven years ago there was appropriated specifically for health work $375,000, and there were 81 hospitals and sanatoria. This year the direct appropriation for health work is $1,440,000 and the number of hospitals and sanatoria have been increased to 92 in actual operation and several more are under construction at the present time.

No record of the death rate among Indians was kept in 1868. According to the census of 1920, the death rate was 29.3 per thousand and to-day it has been reduced to 21.8 per thousand.

In 1868 there were practically no doctors or nurses working among Indians. Seven years ago there were 181 doctors and 106 nurses. This force of employees has been increased over a 7-year period so that we now have 195 doctors and 204 nurses.

In 1868 there was appropriated for the Indian Service $2,837,907.09; seven years ago the annual appropriations for the Indian Service totaled $10,042,554.67. For the current fiscal year the annual appropriations amount to $14,284,509.

In 1868 most of the Indians of the United States were living in tents, hogans, or wikiups, with few permanent homes. To-day there are over 40,000 Indian families living in permanent homes, and during the last year more than 1,000 new permanent homes have been erected, and repairs and improvements have been made to an approximate similar number.

During the administration of Commissioner Burke there have been obtained from the War Department two Army posts which have been converted into Indian boarding schools and are now being used almost exclusively for the education of Navajo Indian children. I refer to the Theodore Roosevelt School, in Arizona, with an enrollment of 400, and the Charles H. Burke School, in New Mexico, formerly Fort Wingate, with an enrollment of 609.

We plan in the near future, and as soon as appropriations can be obtained from Congress, to increase the capacity of the Western Navajo boarding school from 300 to about 500; we have recently completed the construction of a new day-school plant at Nava, and we hope as soon as funds can be obtained to construct other day-school plants in the Navajo country.

In recent years we have drilled 304 wells in the Navajo country, and 147 of these wells are now in operation furnishing water for domestic and stock purposes for the Navajo Indians. We have also spent considerable money and have been quite successful in increasing the water supply for the Navajo Indians through the development of springs. This work has resulted in increasing the grazing area in the Navajo country. We believe it is also possible, in some communities, to provide additional water through the building of earthen dams. We are spending this year more money than ever before in the development of water for your use, approximately $100,000 having been authorized for this purpose.

Two years ago the first exclusive trachoma school for Indians in the United States was established at Fort Defiance, and another school has been converted into a trachoma school this fall at the Northern Navajo agency. The trachoma problem in the Navajo country has been given special and vigorous attention in recent years, and many Navajo Indians have been cured of this disease.

We recognize the need for additional land for the 5,000 Navajos now living off the reservation on the public domain, and at the last session of Congress we were successful in procuring an appropriation of $200,000 for the purchase of lands for those Indians out of tribal funds, with an authorization for the expenditure of an additional million dollars for this same purpose. The item in the second deficiency appropriation act of May 29, 1928, reads as follows:

"For purchase of additional land and water rights for the use and benefit of Indians of the Navajo Tribe (at a total cost not to exceed $1,200,000, which is hereby authorized), title to which shall be taken in the name of the United States in trust for the Navajo Tribe, fiscal years 1928 and 1929, $200,000, payable from funds on deposit in the Treasury of the United States to the credit of the Navajo Tribe: *Provided*, That in purchasing such lands title may be taken, in the discretion of the Secretary of the Interior, for the surface only."

We are now engaged in negotiating for the purchase of certain lands for the benefit of the Navajo Indians out of the available appropriation.

Under the administration of Commissioner Burke oil leases were approved on the Navajo Reservation, and the first well was brought in on October 1, 1922. Since then there has been produced within the borders of the Navajo Reservation approximately 1,773,203 barrels of oil, with an income to the tribe of approximately $656,426.71. Last year the income from this source for the benefit of the Navajo Tribe amounted to $71,511.77. Oil production has been reduced because of overproduction throughout the country and the low price of oil.

We wish to congratulate the Navajo Indians on their cooperation with our local superintendents in partly ridding the range of practically worthless horses that have heretofore been using the grass and water that should be made available for cattle and sheep, thus yielding a larger income to the Indians.

The Navajo Indians have also cooperated closely in helping us to eradicate dourine among your stock.

It is my desire to make this council meeting a constructive and helpful one, and I am taking the liberty of suggesting the following as some of the subjects that should be discussed by members of the council as well as by the representatives of the Government, including your superintendents, who are here to give you information and assistance:

1. Overgrazing in the Navajo country and steps necessary for proper conservation of the range.

2. The question of eventually limiting the number of sheep, horses, goats, and cattle for any one Indian, so that benefits of the range may be more equitably distributed among all Navajos.

3. Further ridding the range of surplus horses so as to provide more range for sheep and cattle.

4. Purchase of additional lands to provide for Navajo Indians now on the public domain.

5. Further water development by reclaiming springs, impounding water by means of earthen dams, and drilling additional wells where other means of developing water are impossible.

6. Best means of providing additional school facilities in the Navajo country, so that young children may be educated near their homes and so that there may be school facilities for every Navajo child of school age.

7. What additional hospitals, sanatoria, physicians, and nurses, and health centers are needed to provide adequate medical facilities for all Navajo Indians.

8. Present status of oil development and suggestions for future development work.

9. Improvement of roads in the Navajo country, what roads are most needed by Indians at this time, and what are most practical methods of building same.

10. Trachoma schools and best methods of handling the trachoma problem in the Navajo country.

11. Tuberculosis among Navajo Indians, facilities needed for meeting situation, and where sanatoria are most needed,

12. Improving home conditions among Navajo Indians and best methods of getting more and better sanitary Indian homes.

13. Best means of improving grade of cattle and sheep owned by Navajo Indians.

14. Sale of Navajo timber and best use of proceeds for benefit of Navajo Indians.

15. The liquor problem in the Navajo country and the best means of controlling same.

16. The dourine problem on the Navajo Reservation and what further steps are necessary to be taken.

17. The returned-student problem on the Navajo Reservation and the best way of finding employment for returned students both on and off the reservation.

This is your council and we want you to discuss frankly not only these questions but any other matters that you may wish to bring up and we want you to make the best possible use of this opportunity.

During the past two years it has been my pleasure to make two visits to the Navajo country, and I have submitted to the Commissioner of Indian Affairs a number of recommendations which have been approved by him, and which we are carrying out as funds become available. I want you to know of the personal interest of Commissioner Burke and myself in the welfare of the Navajo Indians. We in Washington are interested in your problems, sympathetic to your needs, and will cooperate to the limit of our ability and with the funds available to assist you in every way possible.

In conclusion, permit me to say that while the foregoing statements are convincing proof of the progress that has been made in Indian affairs among the Navajo Indians in particular, and among the Indians of the entire country generally, yet I wish to make it perfectly clear that many things need to be done that can not now be done with the limited appropriations available. Instead of the annual appropriations of between twelve and fifteen million dollars now authorized by Congress we need approximately $25,000,000 per year for several years to come if we are to meet the actual requirements of the situation. We need more doctors, more nurses, more hospitals and sanatoria, more sanatorium schools, better school facilities, and at least $300 per capita to operate our schools. We need a large reimbursable appropriation to improve bad home conditions among Indians, more money to provide trained women field demonstration agents with social service ideals, to improve home and living conditions. We need more trained agricultural and industrial leaders to teach Indians to make better use of their industrial opportunities. We need more funds to provide a larger variety and better balanced food for our Indian school children, and we need a trained force of well-paid employees to bring the Indians generally to a better realization that, after all, the Indian problem is their problem, and that it is the duty of the Indians of this country to become, by their own efforts, industrious, progressive, self-supporting, and law-abiding citizens of this great Republic.

Mr. FRAZIER. Mr. President, I want to make a very brief statement at this point. During the last session of Congress I introduced a bill which was passed by the Senate, authorizing an appropriation to build an Indian school on the Turtle Mountain Reservation at Belle Fourche. On that reservation are some 250 Indian children of school age who are not in school and never have been, because there is no school available for them, either on the reservation or off the reservation. There is an urgent need for such a school. The understanding was that instead of the House passing the bill which had been passed by the Senate, the item would be included in the present appropriation bill, but for some reason it was not reached and was left out. I have been assured, however, that an authorization for the appropriation will be made in the deficiency appropriation bill which is to come along later.

Mr. SMOOT. That question was brought to our attention and I understand that is the program to be carried out.

Mr. FRAZIER. For that reason I did not go before the committee to make any protest in regard to putting the item in the present bill, but I shall expect it to be put in the deficiency bill.

Mr. NORRIS. Mr. President, I have an amendment that I desire to submit.

I want to say frankly that the amendment is subject to a point of order and, therefore, I desire briefly to explain it before I offer it, because I think when it is understood there will be no possible objection.

In the northwestern part of Nebraska, in an irrigated portion of the State, there is a reclamation project getting its water from the Pathfinder Dam in Wyoming. Under this ditch is an older ditch known as the Farmers' ditch, put in before the Pathfinder Dam was built. Several years ago the owners of the private ditch made an agreement with the Department of the Interior by which they were to be supplied with storage water which the Government reclamation ditch stored at the Pathfinder Dam. That agreement has been carried out. It means that the Farmers' ditch is to pay to the Government of the United States the stipulated amount provided for in the contract.

There was a piece of the ditch, as I understand it, 9 miles long that was under sort of joint supervision between the Government reclamation ditch and the Farmers' ditch. It needed considerable work on it. It was a sort of connecting ditch, as I understand it. The Farmers' Irrigation Co., the owners of the private ditch, had the necessary machinery and so forth to do the work. The contract between the Government and the Farmers' ditch provided that this kind of work, in this particular place, was to be a 50-50 proposition. Each ditch paid half of the cost of the repairs.

Since the Farmers' ditch had the machinery the Government officials entered into a contract with the privately owned ditch and employed them to do this work, agreeing to pay them one half of the contract price. They had to stand the other half. The work was completed and everything was satisfactory on both sides and there was no question about the facts, as I understand it, but the private ditch owed the Government, of course, for water, and what they undertook to do was to give the Government credit for one-half of the cost of the improvement and pay the Government the balance, assuming that if the Government paid what they owed, then the Farmers' ditch would owe nothing to the Government. In other words, one-half of the cost of the construction was to be borne by one ditch and one-half by the other ditch, but the one ditch that did the work paid what they owed to the Government and kept out one-half of the cost of the improvement.

Mr. SMOOT. Under an agreement?

Mr. NORRIS. Yes; under an agreement. The Comptroller General refused to allow that to be done, however.

Mr. McKELLAR. There is no question between the two States of Wyoming and Nebraska?

Mr. NORRIS. Oh, no; there is no such question involved. I had my secretary telephone to Doctor Mead, head of the Reclamation Bureau, telling him what I had in the shape of an amendment prepared and asked him if it was true that it was satisfactory to the Reclamation Bureau. He said that it was and that he hoped we would be able to have the item included in this bill. It simply directs the Reclamation Service to give to the Farmers' ditch credit for one-half of the construction.

Mr. SMOOT. If that be the case, we can let it go in.

Mr. WARREN. Mr. President, I should like to say a word on this matter, as it is one in which I am very much interested.

Mr. SMOOT. Very well.

Mr. WARREN. For a great many years water has been provided for that ditch under what was called the Warren law. I disown it, except that I did, on account of a request from the Interior Department, present a bill providing that in the case of farmers' ditches on land which they owned or which they had taken up under claims, when the irrigation project had a surplus it would furnish water at certain figures. So the farmers had no right at all originally to the water of the irrigation system. According to the last information I had, they refused to pay the amount and they were behind to a considerable extent in their payments.

Mr. NORRIS. Let me read to the Senator the summary of facts which I am told are undisputed. If the conferees find that the statements are not correct, of course, they will reject the amendment. I will read the summary, as it is short:

No. 1. The United States—

By the way, I ought to correct what I said a few moments ago. I said then it was a ditch; it was a drain. It was necessary to put in a draining system in order to drain the land under both of these ditches. The Government ditch is here and the private ditch here, and further down is the draining system which drains both of them.

SUMMARY

No. 1. The United States could not successfully have reclaimed interstate division Government lands without the construction, operation, and maintenance of the Nine Mile Drain.

No. 2. The operation and maintenance of this drain by the farmers' irrigation district is under the close supervision and approval of Government representatives and engineers.

No. 3. The Farmers' Irrigation District is not now delinquent in any of its payments to the United States except $2,376.45—

That is, one-half of the cost of the improvement—

withheld as an offset to the payment due by the United States.

No. 4. No money is to be expended by the United States. The charge off is to be made against the Pathfinder irrigation district construction. (See P. I. D. resolution.)

I have that resolution here.

No. 5. Cases of this kind with the necessary offset payment have been allowed by the board of claims, title 28, paragraph 774.

No. 6. The contract of June 16, 1917, is the only contract with the United States in which section 10 is included, and this has been entirely eliminated by the formulating and execution of a new contract between the parties dated July 15, 1927, so that the authority to offset this amount by charging same to the construction fund of the Pathfinder irrigation district by the United States would not in any way complicate matters or establish a precedent.

No. 7. Double penalty, 6 per cent, 10 per cent, and operation and maintenance during delinquency. See letter to Bureau of Reclamation July 12, 1927.

Mr. WARREN. Mr. President——

Mr. NORRIS. If the Senator will permit me for a moment, this has been agreed to by the Government engineers, and it has been agreed to by Doctor Mead and also by the representatives of the Farmers' ditch.

Mr. WARREN. Has the Senator the statement to that effect?

Mr. NORRIS. I have one statement from all of those interested.

Mr. WARREN. I am asking in a friendly spirit, of course——

Mr. NORRIS. I understand that.

Mr. WARREN. But I should like to know why the Senator delayed until this moment in presenting the matter. Why did he not go before the committee?

Mr. NORRIS. I only got the information this morning.

Mr. WARREN. I have no objection to letting the amendment go in, with the understanding that it may be stricken out later if that course should be deemed wise. I want some information about it. There has been trouble there for some years, and I want to have everything right, as I know the Senator does.

Mr. NORRIS. Certainly.

The VICE PRESIDENT. The amendment of the Senator from Nebraska will be stated.

The LEGISLATIVE CLERK. At the end of the bill, on page 121, it is proposed to insert the following:

That the Secretary of the Interior be, and he hereby is, authorized and directed to credit the Farmers' Irrigation District with the sum of $2,376.45, as of January 1, 1927, which represents 50 per cent of the expenses incurred by said district in operating and maintaining the Nine Mile Drain from January 1 to June 30, 1926, under contract with said district, dated June 16, 1917, in connection with the North Platte project, Nebraska-Wyoming.

Mr. SMOOT. Mr. President, the proper place to insert the amendment is on page 85, after line 4, because that is the proper heading under which the amendment should come.

Mr. NORRIS. I drew the amendment before I even saw the bill, as a matter of fact. I ask that the amendment be inserted at the place indicated by the Senator from Utah, on page 85, after line 4.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). The question is on the amendment offered by the Senator from Nebraska.

The amendment was agreed to.

Mr. NORRIS. Mr. President, for the information of the conferees I should like to have printed in the RECORD, without reading, the documents to which I have referred.

Mr. SMOOT. Why not give them to me?

Mr. NORRIS. Very well; I will give them to the Senator.

Mr. McKELLAR. Would it not be better to let them go in the RECORD, so that all Senators may read them?

Mr. SMOOT. They are too long for that.

Mr. McKELLAR. Very well.

Mr. BRUCE. Mr. President, I want to say just a word with regard to what has been said by the Senator from Michigan with reference to the census bill. I want to say to the Senator from Washington that there is another reason why I would like to have that bill go over, and that is that I have offered an amendment to it, a very important amendment, bringing many of the census employees within the scope of the Federal classified service. That amendment is now lying on the table.

Mr. JONES. That, of course, will be considered when the bill is up for consideration.

The bill was reported to the Senate as amended and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

NATIONAL CAPITAL PARK AND PLANNING COMMISSION

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 4126) authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights reserved, and limited rights in land, and authorizing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances, which were, on page 2, line 5, after the word "rights," to insert "but not for business purposes"; and on page 3, line 5, after the word "lease," to insert "subject to such approval."

Mr. SACKETT. I move that the Senate concur in the House amendments.

The motion was agreed to.

SUPREME COURT BUILDING

Mr. KEYES. Out of order, I ask unanimous consent to present a report from the Committee on Public Buildings and Grounds.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. KEYES. From the Committee on Public Buildings and Grounds I report back favorably, with an amendment, the bill (H. R. 13665) to provide for the submission to the Congress of preliminary plans and estimates of cost for the construction of a building for the Supreme Court of the United States. I ask unanimous consent for the immediate consideration of the bill. I will say that the bill has been reported unanimously by the committee.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. HEFLIN. Mr. President——

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Buildings and Grounds with an amendment, on page 2, section 2, line 16, before the word "for," to strike out "authorized" and insert "acquired," so as to make the bill read:

Be it enacted, etc., That there is hereby created a commission to be known as the "United States Supreme Court Building Commission," and to be composed of the Chief Justice of the United States, an associate justice of the United States to be designated by the Supreme Court of the United States, the chairman and the ranking minority member of the Committee on Public Buildings and Grounds of the Senate, the chairman and the ranking minority member of the Committee on Public Buildings and Grounds of the House of Representatives, and the Architect of the Capitol. Notwithstanding the expiration of a Congress, any Representative who is a member of the commission, if reelected, shall continue to serve thereon until a successor is selected by the House of Representatives. The Architect of the Capitol shall serve as executive officer of the commission and shall perform such services under this act as the commission may direct.

SEC. 2. The commission is authorized to procure, by contract or otherwise, preliminary plans and estimates of costs for the construction, and the furnishing and equipping, of a suitable building (including approaches, connections with the Capitol power plant, and architectural landscape treatment of the grounds), for the accommodation and exclusive use of the Supreme Court of the United States; such building to be erected upon the site heretofore acquired for that purpose, and such building to be so situated, and the exterior thereof to be of such type of architecture and material, as to harmonize with the present buildings of the Capitol group. The amount to be expended in procuring such plans and estimates shall be determined by the commission, but shall be within the limits of appropriations made therefor, and shall be disbursed by the disbursing officer of the Department of the Interior, under the direction of the executive officer of the commission. The commission shall make a report to the Congress on or before March 1, 1929, including a detailed statement of such plans and estimates of costs.

SEC. 3. There is authorized to be appropriated the sum of $10,000, or so much thereof as may be necessary, to carry out the provisions of section 2.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. HEFLIN. Mr. President——

The PRESIDING OFFICER. The question is, Shall the bill pass? Without objection, the bill is passed.

Mr. HEFLIN. Mr. President, I object. I have been trying to get recognition of the Chair in order to say something on the bill.

The PRESIDING OFFICER. The Chair heard no objection before the bill was put upon its passage.

Mr. HEFLIN. I was trying two or three times to get recognition from the Chair while he was putting the question.

The PRESIDING OFFICER. Will the Senator ask unanimous consent that the vote whereby the bill was read the third time and passed may be reconsidered? Is there objection to the reconsideration of the votes?

Mr. NORRIS. Mr. President, so as not to establish a precedent here, I wish to say that the Senator from Alabama was trying to get recognition, and I think, as a matter of right, he is entitled to recognition and not by unanimous consent to be recognized.

The PRESIDING OFFICER. The Chair twice asked was there any objection.

Mr. NORRIS. I am not criticizing the Chair. The Chair did not hear the Senator from Alabama; notwithstanding that he was demanding recognition.

Mr. McKELLAR. There is no doubt about the fact that the Senator from Alabama was asking for recognition.

Mr. BRUCE. Mr. President, I know the Senator from Alabama addressed the Chair.

The PRESIDING OFFICER. Without objection, the votes whereby the bill was read the third time and passed will be reconsidered.

Mr. HEFLIN. Mr. President, I am heartily in favor of constructing a building in which the Chief Justice and Associate Justices of the Supreme Court may have their offices; I think they need offices in which to work, but I do not want to see the Supreme Court moved out of the Capitol. I should like to see the judges continue to sit in the old temple of justice in the Capitol. I think there is so much sentiment attaching to that old court room that the people would like to see the Supreme Court kept there. I do not think Congress ought to go to the expense of erecting a building for a court when we already have such a splendid place in this fine old building. I think the Supreme Court ought to be retained in the Capitol, but I think we ought to have a building for the justices, where they can have their offices and their library and have ample space in which to work. I do not, however, want to see the court itself taken out of the Capitol. I do not see any necessity for it. There is ample room in the Supreme Court room for the trial of all the cases that come before the court and for those who want to attend those trials. They are not overcrowded there. I see no good reason for moving the court and I see many good reasons for keeping it there. I want to ask some Senator familiar with the measure, is it necessary to have the court established at some other place?

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Utah?

Mr. HEFLIN. I do.

Mr. SMOOT. Mr. President, I wish to say to the Senator from Alabama that there is no room in the Capitol Building for the Supreme Court of the United States. There is not actually sufficient room for their library.

Mr. HEFLIN. I have stated that I desire they shall have offices for that purpose.

Mr. SMOOT. Nearly every justice of the Supreme Court has a library at home. In fact, they have to do much of their work at home. There is no place but a cubby-hole or two here in the Capitol Building for the Supreme Court of the United States. It would be unthinkable to say that all of their work, in consultation and study and the preparation of opinions, shall be done in a separate office building, that they shall have their library in that building, but that they shall hold court in their present little room in the Capitol. I can not think of any necessity that is more pressing upon the Government than providing a proper place for the Supreme Court of the United States. At present there is no adequate place for people who wish to go into the court room. There are but a few seats there. When there is a hearing, no matter how important it may be, no matter how many people wish to hear the arguments, there are merely a few seats. I pass there whenever the court is in session time and time again, week after week, and month after month and year after year, and see people standing outside the door, blocking the hallway, so that we can hardly get through.

The present court room was ample at the time it was first occupied, but there is not a little justice's court anywhere in any of the States that does not have a larger space than we provide for the Supreme Court of the United States in the Capitol Building.

Of course, I did not agree with some of the ideas as to closing Maryland Avenue and buying the next block to the north and spreading the Supreme Court from the Library to B Street; I thought that was perfectly silly; I thought that there was no necessity for it at all, but in view of the size of the lot which has been purchased, and the character of the building designed, I wish to say to the Senator it will be an honor to America when it shall have been erected.

Mr. HEFLIN. Where is the new building to be erected?

Mr. SMOOT. On the block just north of the Library of Congress.

Mr. McKELLAR. Mr. President, will the Senator from Alabama yield to me?

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Tennessee?

Mr. HEFLIN. I yield.

Mr. McKELLAR. As I understand, the construction of a building for the Supreme Court has already been authorized by Congress by regular act.

Mr. SMOOT. It has been authorized.

Mr. McKELLAR. And the property itself has already been condemned.

Mr. SMOOT. It has been condemned.

Mr. McKELLAR. This bill is merely to authorize the commission to go on——

Mr. SMOOT. Not only has it been condemned but it has been paid for.

Mr. McKELLAR. Has it been paid for?

Mr. SMOOT. It has been paid for; so it seems to me the Senator from Alabama is making a mistake now in calling this bill back. It provides an appropriation of $10,000 for the purpose of preparing the plans and specifications and providing for advertising for bids for this building.

Mr. McKELLAR. If the Senator will permit me again, it may be that the Senator from Alabama will come to the same conclusion about this matter that I have come to in reference to the change of the Senate Chamber. Some time ago we authorized by law a change in the Senate Chamber; and although we were about to let a contract the other day, I am not so sure but that the committee, after very careful consideration will refuse to make any change in the Chamber, and I do not think any change ought to be made in the Chamber.

Mr. HEFLIN. Well, I am in favor of having the Senate refuse to make the change.

Mr. McKELLAR. But it has already passed the Senate. The question is whether the committee will let the contract; and I doubt very much whether the committee will let the contract, because apparently there is no necessity for it.

The same air can be obtained in the present Chamber that can be obtained in the new Chamber. The same pure-air service will have to be secured for the new Chamber that is now secured in the House Chamber. The House has already put in its pure-air system; it is working well, and I see no reason for the vast expenditure of money that is involved in the proposed reconstruction of the Senate Chamber.

Mr. BARKLEY. Does the Senator say the House has put in a pure-air system?

Mr. McKELLAR. It has already put in a pure-air system, and I understand that it is working well.

Mr. BARKLEY. I want to go over that way, then.

Mr. SMOOT. Every Member of the House that I have spoken to about it says that the system is almost perfect. The air is washed before ever it goes into the Chamber; it is taken to the top of the Chamber; it is forced down through the Chamber; it escapes out of the exhaust just as soon as it is breathed.

Mr. HEFLIN. The air that we get here should be washed and we should get more of it.

Mr. SMOOT. We will when we get that system put in.

Mr. McKELLAR. I think possibly it is because there is so much hot air used in the Senate Chamber.

Mr. SMOOT. I hope the Senator will not seek to recall the bill.

Mr. HEFLIN. Mr. President, I am not going to hold up the passage of this bill; but I desire to state my opposition to moving the Supreme Court out of the Capitol. I think it ought to be kept here. If it is necessary for the Senate to take any action to recall a portion of the bill that it has enacted, I will support it, and stop the construction of a court building separate and apart from the Capitol.

The tourists of the Nation who come here come over to the Senate and view this body in action; they go by and see the Supreme Court, and then over to the House of Representatives, all in the great Capitol of the Nation. Now you are going to move out the Supreme Court and put it off over here in a building to itself, separate and apart from the Capitol, removing one of the ancient landmarks of the Capitol; and I do not see

any good reason for it. It is going to cost money, and we do not need the space.

The Senator from Utah says that he does not know a justice of the peace who has not more room than the Supreme Court have out yonder. I never have seen a justice of the peace holding court in such palatial quarters as they have there.

Mr. McKELLAR. At all events, the Senate of the United States occupied that chamber for about 50 years.

I want to say to the Senator from Alabama that I do not want him to be misled. If the Senator wants further time to look into the matter he had better object to this bill, because if this bill passes it gives this commission authority to enter into the contract; and so it depends on this bill. If the Senator wants further time to consider the matter, he ought to object to this bill. It will not do for him to make the request hereafter.

Mr. SMOOT. Let me say to the Senator that it is true that people visit the Capitol and go from here over to the House and pass the door of the Supreme Court. It is also true that nearly everyone who comes to Washington as a visitor visits the Congressional Library, one of the most magnificent buildings in the world. Every American is proud that there is such a building. When they go there they will see, across the street, the Supreme Court, a most beautiful building, and they will go in there; and every American's heart will be filled with pride to know that the United States Supreme Court—the greatest body in the world for the administration of law—is housed in a building that will do honor to any country in the world, I do not care what country it is.

I am sure that after that building is erected and completed the Senator from Alabama himself will be just as proud as any other American citizen that it is done.

Mr. HEFLIN. Mr. President, as I said before, I am in hearty agreement with the program to build offices for the Supreme Court justices. I think they ought to have rooms for their libraries, and each one of them ought to have all the space he needs to enable him to carry on his work efficiently and conveniently. Personally, however, I do not think the Supreme Court ought to be moved out of the Capitol. I think money is being expended for that purpose that should be saved by the Government; but I do not seem to have any support from the other Senators on the matter of rescinding action so far as the construction of a building for the court outside the Capitol is concerned, and therefore I will not interpose any objection.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). The question is on the passage of the bill.

The bill was passed.

ORLA W. ROBINSON

Mr. BARKLEY. I ask unanimous consent for the present consideration of a bill on the calendar, H. R. 7324, for the relief of Orla W. Robinson.

Mr. KING. Let the bill be read.

The PRESIDING OFFICER. The bill will be read.

The Chief Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers Orla W. Robinson, who was a member of Company L, Third Regiment United States Artillery, which later became the Thirty-third Company, Coast Artillery, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a corporal of that organization on the 9th day of May, 1901: *Provided,* That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

Mr. McKELLAR. Mr. President, will the Senator make a statement about the bill?

Mr. BARKLEY. Mr. President, this is a bill to correct the military record of Orla W. Robinson. Mr. Robinson enlisted in the Spanish-American War and served through an entire enlistment. Later he enlisted again in the Army and served for over two years. While on guard one night at an Army supply station some small articles of property were stolen, and he was charged with the theft of these articles. Rather than, as they say in the Army, "squeal" on somebody else he simply accepted punishment, which was meted out to him in the form of a dishonorable discharge. He was not imprisoned or punished in any way, except that he was given a dishonorable discharge. Later on he enlisted in the Marine Corps and served four years in the Marine Corps with distinction and honor, and was given an honorable discharge.

Mr. Robinson is a citizen of the highest integrity and one of the best citizens of the community. He is a Methodist preacher, and his record, I think, according to the statements I have received and the information I have, ought to be corrected. It is simply a case where he suffered punishment rather than tell on somebody else.

The House Committee on Military Affairs investigated the matter and reported the bill unanimously, the House passed it in the same way, and the Senate committee has reported it here. I think the bill ought to be passed, and I should like to have it passed before Christmas.

Mr. KING. I suppose the primary purpose is to get a pension for this man?

Mr. BARKLEY. No, sir; it is not. It is simply to correct his record.

Mr. KING. That will be one of the results, however.

Mr. BARKLEY. I do not think so. Of course, I can not guarantee that; but that is not the object of the bill. This man does not need a pension. He does not intend to ask for one, but he simply does not want dishonor to remain against his record.

Mr. BRUCE. Mr. President, may I ask the Senator whether there was any special reason why this soldier should sacrifice himself for the sake of another soldier?

Mr. BARKLEY. No; I do not know of any. The Senator is familiar with the fact that frequently in the Army and in college life there is a spirit of that sort which impels men to keep silent rather than to tell the truth on others.

Mr. BRUCE. Does any such disposition exist to such an extent that a man will permit himself to be set down as a thief when he is not guilty of the theft at all, and some one else is?

Mr. BARKLEY. I am not sure that that feeling would go to that extent in most cases; but it seems to have been the motive in this case.

Mr. BRUCE. I ask just as a matter of curiosity.

Mr. BARKLEY. There was no special reason.

Mr. BRUCE. All the Senator states is that this soldier was charged with a theft, and that rather than let a person who was really guilty suffer the just measure of punishment, he, without having any special motive at all for his generous altruism, arising out of relationship or the like, allowed himself to be placed in the category of a thief. That sounds to me rather improbable.

Mr. BARKLEY. The testimony of his comrades, in the form of affidavits which were filed with the committee in the House, and the report of the House committee on this measure show that he is just the type of man who would do that.

Mr. HEFLIN. Mr. President, will the Senator from Kentucky use his good offices to get this preacher to write fully to our friend from Maryland?

Mr. BRUCE. No; it may not be necessary. I want to know the nature of the affidavits. I believe the pension roll should be a roll of honor; and because of that conviction I paid quite a penalty here a year ago, when I was made the subject of the grossest misrepresentations and of mendacious slanders because I insisted that a soldier who had been court-martialed for a theft and had been imprisoned for some nine months and dishonorably discharged from the Army should not be placed on the pension roll along with honorable pensioners.

Mr. BARKLEY. I will say to the Senator that this verdict carried with it no punishment. There was no punishment inflicted; and that in itself shows that there must have been doubt of his guilt in the minds of the members of the court-martial. He was simply dishonorably discharged.

Mr. BRUCE. What was the article that was stolen?

Mr. BARKLEY. Oh, just a few trivial articles from the supply station; and he happened to be on guard at the time they were taken. This bill is not offered for the purpose of obtaining any pension. The man is an honorable man. He is a man of integrity. He stands well. He simply desires to have his record corrected.

Mr. BRUCE. Yes, I know; and I suppose he feels that he gave proper evidence of repentance by becoming a Methodist minister afterwards. What I want to find out is the nature of these affidavits which were deemed by the committee to be sufficiently exculpatory in character to justify placing this man on the pension roll.

Mr. BARKLEY. The Senator seems to emphasize the pension feature of the bill. I will say to him again that while probably incidentally the man might have the right to apply for a pension, that is not the object of this bill. It would only follow incidentally.

Mr. BRUCE. Well, I know; but my observation has been that when the record of a soldier is corrected under these circumstances and he is reinstated an application for pension follows as a matter of course.

Mr. BARKLEY. Not necessarily; and even if it did in this case he could be paid nothing prior to the date of the passage of the bill.

Mr. BRUCE. I want to vote for the Senator's bill, but I want him to let me know what there was in those affidavits that tended to create a just impression that this man in point of fact had not been guilty of theft at all but had deliberately

sacrificed himself from generous motives for the sake of somebody else.

Mr. BARKLEY. The affidavits of two of his comrades are very positive that he obtained nothing; that he obtained no property whatever; that he happened to be in a position of responsibility on the occasion when the articles were taken, and that he refused to exculpate himself simply in order not to inform on his comrades.

Mr. BRUCE. I withdraw my objection.

The PRESIDING OFFICER. The Senator from Kentucky asks unanimous consent for the immediate consideration of House bill 7324. Is there objection?

Mr. BLEASE. Mr. President, I am not going to object to the consideration of the bill, but I voted against the bill in committee, and I want to state why; that is all. I am not against the bill at all. I simply voted against it in the committee, and I think it is proper for me to make my statement here.

This man, it seems, was convicted of a theft many, many years ago. The other man is now dead, and it looks a little bit hard to take the stain off of the living man, because he has some witnesses living who swear that it was not he who was guilty, and switch the responsibility and the disgrace over to the children of the dead man.

Mr. BARKLEY. I will say to the Senator that since this matter was up the other day I have ascertained that the man who is, by implication, referred to in these affidavits, is still living.

Mr. BLEASE. Then it looks to me as if he ought to be given a chance to present his side of the case. That is the only objection I have, and that is why I voted against the bill in the committee; by myself, however. I have made no minority report. It looks hard to me to switch the disgrace off one man to another man after about 30 years.

Mr. KING. Without giving him a chance.

Mr. BLEASE. Yes. I do not object to the bill, but I wanted to be clear.

Mr. BARKLEY. The affidavits merely mention another man inferentially; they do not make him out guilty of a crime. They merely mention him as being in a position of responsibility at the same time, but they make no effort whatever to shift the burden of this offense from the man who is relieved by this bill onto the shoulders of the sergeant, or anybody else. They merely mention him incidentally, inferentially, in their affidavits.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a question?

Mr. BARKLEY. Yes.

Mr. REED of Pennsylvania. In the meeting of the committee the impression was given to the committee that evidence of this other man was unavailable because of his death.

Mr. BARKLEY. I did not seek to create that impression.

Mr. REED of Pennsylvania. I do not mean that the Senator from Kentucky intentionally misled the committee, or that anybody else did; but that was the belief the committee had, and it seems to me that if the man is now discovered to be living, in fairness to the committee, it ought to have some affidavit from him.

Mr. BARKLEY. I do not know where he is. I got this information from the Member of the House who introduced the bill there, that the man is not dead, and the reason I went to the trouble to ask about it was that the Senator from South Carolina seemed to think that the mere fact that he was mentioned in the other affidavits created the presumption that he was dead, and that now that he was dead an effort was being made to shift the responsibility onto him. That is not the case at all.

Mr. REED of Pennsylvania. I do not know about the other members of the committee, but I had the impression that evidence from him was unobtainable because of his death.

Mr. BARKLEY. That was an unfortunate impression, and there was no intention to create such an impression. I do not know whether his evidence would be available or not, but in view of the whole circumstances, the character of this man, his record, his enlistment, and service for four full years, when the sergeant who took his enlistment knew all about these circumstances, and knew about this charge, and in view of his honorable discharge from the Marine Corps after four years' service, with the commendation of the Marine Corps, certainly these facts ought to wipe out any suspicion that might exist that this man is trying now to take advantage of somebody else in order to get his record corrected.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FIFTEENTH DECENNIAL CENSUS

Mr. JONES. Mr. President, I desire to call up House bill 393, an act to provide for the fifteenth and subsequent decennial censuses. I take this action because the junior Senator from Michigan [Mr. VANDENBERG] has to leave the city to-morrow, and I know he is going to object to the consideration of the bill, and desires to make probably a 5-minute statement.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Washington?

Mr. VANDENBERG. Mr. President, reserving the right to object, I desire to make a statement to the chairman of the Committee on Commerce, in charge of this census bill, in the hope that it will appeal to his sense of constitutional fidelity and result in a postponement of the consideration of this matter.

This is the proposition to seek to present: A census bill, under the Constitution, has but one function; it has had but one function ever since the Constitution was written, and if anybody doubts this plain mandate in the instrument itself he merely has to consult Mr. Randolph's language as he proposed the census provision in the Constitutional Convention of 1787. He said its purpose was "to redress inequalities in representation."

In other words, the Constitution, directly, by its own unmistakably mandatory language, and by the purport and aim of its authors, gives a census just this one constitutional function, namely, provide a basis for the reapportionment of the House of Representatives.

Mr. President, in the face of the fact that the 1920 census has not yet been validated under the Constitution in this fundamental constitutional function, I submit to the judgment of the Senate and my distinguished friend, the senior Senator from Washington, that it would be a travesty on good faith, a travesty on congressional consistency, and a travesty upon constitutional integrity, for us to pass still another census bill, except as we make sure, in the same connection and at the same time, that this constitutional function shall not be continuingly emasculated. There has been no reapportionment since August 8, 1911. This lapse is a gross contempt of the Constitution and a violent trespass upon the right of representation. It must not continue. I propose to submit that we should take our stand upon this 1930 census bill.

From 1790 to 1910, from the First to the Thirteenth Censuses, Congress never permitted more than two years to elapse between the counting of the people and the use of that basic constitutional arithmetic for the reapportionment of the House of Representatives. As a result of eight years of failure, however, to sustain this rule since the census of 1920 was completed, many great constituencies have been victimized. My own State of Michigan, for example, has over 2,000,000 people in three of our congressional districts, and many other States are similarly victimized. The electoral college is victimized, because it is exposed to the hazard of a legal question as to its constitutional sufficiency, in case of a close election. But the main challenge is that the Constitution itself is victimized, and in the very House of those who are foresworn to its special and particular defense.

This is the thought I submit to the Senator from Washington: The Senate, unfortunately, holds a primary responsibility for the situation in which we find ourselves, because the House of Representatives did validate the census of 1920. It did pass a reapportionment measure on January 19, 1921. The bill did come to this body. It was sent to a committee of the Senate, but from that committee it never came back alive. Therefore the Senate particularly is challenged by these eight years of constitutional lapse. It is challenged to take up its tragically interrupted defense of our constitutional institutions.

Therefore I am suggesting that unless a reapportionment measure comes into this Chamber from the honorable gentlemen who compose the other body of our parliament within the next few weeks, I propose to attach to this 1930 census bill a reapportionment measure as an amendment. There is ample precedent for such a course. Precisely, this thing was done in 1850 under the so-called Vinton amendments. This process brought the census and reapportionment together in the law. They are together in the Constitution. They have been together in 120 years of congressional precedent and practice—up to 1910. They have got to resume this sacred relationship. The Senate can not escape its share of responsibility to this end because we are constitutional partners with the House in the maintenance of this fundament.

Therefore I am asking the chairman of the committee to withdraw his request for the present consideration of this census bill for the present, and to withhold it until we can be sure what

steps must be taken here by way of reapportionment which shall protect our constitutional responsibility for an honest validation of the census law under the Constitution. Mr. President, we must validate our oaths.

I would like to ask my generous and considerate friend from Washington if he does not concur in my point of view.

Mr. JONES. Mr. President, I desire to say to the Senator that I think I am in full accord with his suggestion, and sympathize with the attitude he takes. I do think this, that while it is true that the Senate failed to act on this legislation a good many years ago, it has in fact had no opportunity to act since that time, because it is generally understood that another body of the Congress is essentially interested in these apportionment bills, and while I can see no excuse for the Senate not acting when the other body did act several years ago, yet neither House, in my judgment, is without blame for not acting during the last six or seven years. There has been full opportunity to comply with the plain and express mandate of the Constitution. I can see no excuse for either House of Congress for failure to do that, and I hope that before this session of Congress shall expire, the delayed action will be taken, and that we will not be in the position hereafter of neglecting the plain mandate of the Constitution in this regard.

I had hoped that the Senator would not object to the consideration of this bill, but I appreciate his position, and I appreciate his purpose in rising and making the remarks he has made. I can make no complaint at his suggestion that this measure should go over until at least after the holidays. So I withdraw my request for the consideration of the bill at this time.

PROMOTIONS IN THE AIR CORPS

Mr. BINGHAM. Mr. President, yesterday a bill granting a separate promotion list to the Air Corps, which has been referred to at various times in the conventions of the American Legion and in the meetings of the National Aeronautical Association as the Furlow bill, which came over from the House in the shape of an amendment to another bill, with other amendments, instead of being sent to conference was referred to the Committee on Military Affairs. The same bill passed the House of Representatives on the 7th of last May, came over to the Senate, was referred to the Committee on Military Affairs, and was amended and is now on the calendar as Order of Business 1138.

In view of the fact that we have already sent one form of this bill back to the Committee on Military Affairs for consideration, it seems only fair that the original bill, known as the Furlow bill, should be sent back to that committee also, and I ask unanimous consent that House bill 12814, to increase the efficiency of the Air Corps, be rereferred to the Committee on Military Affairs.

Mr. McKELLAR. Mr. President——

Mr. REED of Pennsylvania. I object.

The PRESIDING OFFICER (Mr. McNARY in the chair). Objection is made.

Mr. McKELLAR. I was just going to say that the junior Senator from Alabama [Mr. BLACK] is greatly interested in this matter, and in his absence I would hope that it might go over.

The PRESIDING OFFICER. Objection has been made, and the bill will go over.

CONSTRUCTION AT WEST POINT

Mr. REED of Pennsylvania. Mr. President, in order that certain Budget estimates may be prepared and transmitted in sufficient time to go into the second deficiency bill, the War Department is anxious to obtain action on a House bill making authorizations for certain very necessary quarters at West Point, quarters for noncommissioned officers and officers of the teaching faculty, who are now on rental status, at a place far from West Point, where they have to get allowances and all that to enable them to live, and where they are only able to live with great discomfort, and with much difficulty in the winter in getting to West Point.

The authorization bill is Order of Business 1379. As Senators will see, the total authorization is $672,000. It will take care of a very large number of officers and noncommissioned officers who at present are without quarters in the reservation. I ask unanimous consent for the present consideration of the bill (H. R. 11469) to authorize appropriations for construction at the United States Military Academy, West Point, N. Y.

Mr. McKELLAR. Mr. President——

Mr. REED of Pennsylvania. It was unanimously reported.

Mr. McKELLAR. I was just going to ask the Senator whether the report was unanimous.

Mr. REED of Pennsylvania. The committee was unanimous in its report.

Mr. KING. Mr. President, if the Senator from Pennsylvania will give me his attention for a moment, my recollection is that at the last session a very large appropriation was made for buildings at West Point; and at the session preceding that, and at the session preceding that, we made very large appropriations, amounting to millions of dollars, for West Point during the past five or six years. While what I am about to say now would not particularly refer to this, we have in addition made general appropriations for buildings under the direction of the Army. I was wondering, with all these appropriations, rather lavish and rather generous, why it is necessary.

Mr. REED of Pennsylvania. The Senator is right. Congress has been liberal to West Point in the matter of the erection of additional barracks and accommodations, and additional buildings for mess hall and class rooms. But this is an authorization that takes care, not of the students or cadets there, but of some of the teaching staff and some of the noncommissioned officers who get no benefit whatever from the appropriations heretofore made.

Conditions there, if the Senator were to see them, would be described by him as shocking. There are noncommissioned officers in frame buildings built away back almost to the time of the Civil War, where the married noncoms and their families are herded together in a way that is really disgraceful, where several families with grown children have to use one common bathroom. More than 20 people were found belonging to different families using the same bathroom and toilet. The only place the women of those families can cook the meals for the families is in the cellar, and it is not easy for a family living on the third floor of a fire trap like that to use a kitchen in a dark cellar room. I was up there three weeks ago and went through the quarters which it is proposed to replace under the bill. The Senator from South Dakota [Mr. McMASTER] was with me. Both of us were shocked at the conditions we found there.

Mr. NORRIS. Mr. President, may I ask the Senator a question?

Mr. REED of Pennsylvania. Surely.

Mr. NORRIS. It may be it has been answered, because I was called out of the Chamber and just returned. I understand, and it seems to be conceded, that Congress has been very liberal with West Point with appropriations heretofore in the general appropriation bills. Why is it that the money we have appropriated heretofore has been expended exclusively for officers' quarters?

Mr. REED of Pennsylvania. Oh, it has not been. It has been expended, as the appropriation bills required, for the construction of a new mess hall, a new classroom, and additional barracks, made necessary for cadet quarters because of the increase in the number of cadets.

Mr. NORRIS. What particular class of people connected with the Government are going to be provided for by this item?

Mr. REED of Pennsylvania. These are the noncommissioned officers of the enlisted troops that are stationed there to help in the teaching of these young men as cadets. Most of the beneficiaries of this program will be the enlisted men, the married noncommissioned officers. They are not cadets. None of the cadets is married. These are the regular enlisted men stationed there as a part of the program for the training of the cadets.

Mr. NORRIS. Let me ask the Senator another question. Will the additional appropriation interfere with the President's economy program?

Mr. REED of Pennsylvania. I am inclined to think the President's program is sufficiently flexible to stand it.

Mr. McKELLAR. That is a mythical term, anyway.

Mr. NORRIS. Oh, is it mythical?

Mr. McKELLAR. Oh, yes.

Mr. NORRIS. I do not want to be led into the predicament of putting our country, as the President's message described, in a digraceful financial position by having a deficit.

Mr. McKELLAR. I do not think the Senator need have any trouble about that. May I ask the Senator from Pennsylvania a question?

Mr. REED of Pennsylvania. Certainly.

Mr. McKELLAR. I see there is a statement made by the Secretary of War that the sum stated for officers' quarters is to provide an apartment suitable for 36 married officers as recommended by the 1927 board of officers. Does he refer to the noncommissioned officers?

Mr. REED of Pennsylvania. No; that has reference to the commissioned officers.

Mr. McKELLAR. The Senator said a moment ago these buildings were to be built for noncommissioned officers and I was wondering whether the 36 were really noncommissioned officers. I imagine they are Regular Army officers stationed there now and who at this time have inadequate quarters.

Mr. REED of Pennsylvania. That is true with reference to the first item. They are commissioned officers. The second item is for noncommissioned officers of the group I have described.

Mr. McKELLAR. I agree with the Senator from Pennsylvania. I think the buildings ought to be constructed.

Mr. JONES. Mr. President, may I ask the Senator from Pennsylvania how much of this money goes for the use of noncommissioned officers?

Mr. REED of Pennsylvania. As we have provided it, $507,000 goes for quarters for the 36 married commissioned officers and their families.

Mr. JONES. Does not the Senator think that is pretty high for 36 families?

Mr. REED of Pennsylvania. Oh, no; I do not. Fifteen thousand dollars for a house for an officer with a family is not too much.

Mr. JONES. These are not very high-class officers, I take it?

Mr. REED of Pennsylvania. Oh, I beg the Senator's pardon.

Mr. McKELLAR. They are regular officers of the Regular Army.

Mr. JONES. Regular commissioned officers?

Mr. REED of Pennsylvania. Yes; and in addition to that we have increased the appropriation for noncommissioned officers' quarters to $165,000, which will provide 25 sets to take care of the noncommissioned officers who at present are living in the fire traps I have described. Then I might say, to complete the explanation, that we have cut out an item which the House put in for a veterinary hospital, because the old one seemed to us on examination to be quite sufficient.

Mr. NORRIS. We have reached the stage now where instead of a veterinary hospital we had better put in a garage.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill H. R. 11469, as requested by the Senator from Pennsylvania?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 11469) to authorize appropriations for construction at the United States Military Academy, West Point, N. Y., which had been reported from the Committee on Military Affairs with amendments.

The amendments of the Committee on Military Affairs were, on page 1, line 4, to strike out "$609,000" and insert "$672,000"; same page, line 8, strike out "$384,000" and insert "$507,000"; same page, line 9, strike out "$150,000" and insert "$165,000"; same page, lines 9 and 10, and page 2, line 1, to strike out the words "for veterinary hospital, $25,000; for alterations to the West Academic Building, $50,000," so as to make the bill read:

Be it enacted, etc., That there is hereby authorized to be appropriated not to exceed $672,000 to be expended for the construction and installation at the United States Military Academy, West Point, N. Y., of such buildings, utilities, and appurtenances as may be necessary, as follows: For officers' quarters, $507,000; for noncommissioned officers' quarters, $165,000: *Provided*, That the Superintendent of the United States Military Academy, West Point, N. Y., with the approval of the Secretary of War, is authorized to employ architects to draw the necessary plans and specifications from funds herein authorized, when appropriated.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

EXECUTIVE SESSION

Mr. CURTIS. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to consider executive business. After 25 minutes spent in executive session the doors were reopened; and (at 4 o'clock and 32 minutes p. m.) the Senate adjourned until to-morrow, Friday, December 21, 1928, at 12 o'clock meridian.

CONCILIATION WITH ALBANIA

In executive session this day the following treaty was ratified and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

To the Senate:

To the end that I may receive the advice and consent of the Senate to its ratification, I transmit herewith a treaty of conciliation between the United States and Albania, signed at Washington on October 22, 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 8, 1928.*

The PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approve thereof, a treaty of conciliation between the United States and Albania, signed at Washington October 22, 1928.

Respectfully submitted.

FRANK B. KELLOGG.

DEPARTMENT OF STATE,
Washington, December 1, 1928.

The President of the United States of America and His Majesty the King of the Albanians, being desirous to strengthen the bonds of amity that bind them together and also to advance the cause of general peace, have resolved to enter into a treaty for that purpose, and to that end have appointed as their Plenipotentiaries:

The President of the United States of America:

Mr. Frank B. Kellogg, Secretary of State of the United States of America; and

His Majesty the King of the Albanians:

Mr. Faïk Konitza, Envoy Extraordinary and Minister Plenipotentiary of Albania in the United States of America;

Who, after having communicated to each other their respective full powers, found to be in proper form, have agreed upon and concluded the following articles:

ARTICLE I

Any disputes arising between the Government of the United States of America and the Government of Albania, of whatever nature they may be, shall, when ordinary diplomatic proceedings have failed and the High Contracting Parties do not have recourse to adjudication by a competent tribunal, be submitted for investigation and report to a permanent International Commission constituted in the manner prescribed in the next succeeding Article; and they agree not to declare war or begin hostilities during such investigation and before the report is submitted.

ARTICLE II

The International Commission shall be composed of five members, to be appointed as follows: One member shall be chosen from each country, by the Government thereof; one member shall be chosen by each Government from some third country; the fifth member shall be chosen by common agreement between the two Governments, it being understood that he shall not be a citizen of either country. The expenses of the Commission shall be paid by the two Governments in equal proportions.

The International Commission shall be appointed within six months after the exchange of ratifications of this treaty; and vacancies shall be filled according to the manner of the original appointment.

ARTICLE III

In case the High Contracting Parties shall have failed to adjust a dispute by diplomatic methods, and they do not have recourse to adjudication by a competent tribunal, they shall at once refer it to the International Commission for investigation and report. The International Commission may, however, spontaneously by unanimous agreement offer its services to that effect, and in such case it shall notify both Governments and request their cooperation in the investigation.

The High Contracting Parties agree to furnish the Permanent International Commission with all the means and facilities required for its investigation and report.

The report of the Commission shall be completed within one year after the date on which it shall declare its investigation to have begun, unless the High Contracting Parties shall limit or extend the time by mutual agreement. The report shall be prepared in triplicate; one copy shall be presented to each Government, and the third retained by the Commission for its files.

The High Contracting Parties reserve the right to act independently on the subject matter of the dispute after the report of the Commission shall have been submitted.

ARTICLE IV

The present treaty shall be ratified by the President of the United States of America by and with the advice and consent of the Senate thereof, and by Albania in accordance with its constitutional laws.

The ratifications shall be exchanged at Washington as soon as possible, and the treaty shall take effect on the date of the exchange of the ratifications. It shall thereafter remain in force continuously unless and until terminated by one year's written notice given by either High Contracting Party to the other.

In faith whereof the respective Plenipotentiaries have signed this treaty in duplicate in the English and Albanian languages, the English text to have authority in case of conflict between the two texts, and hereunto affixed their seals.

Done at Washington the twenty-second day of October, in the year one thousand nine hundred and twenty-eight.

FRANK B. KELLOGG [SEAL]
FAÏK KONITZA [SEAL]

CONCILIATION WITH CZECHOSLOVAKIA

In executive session this day the following treaty was ratified and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

To the Senate:

To the end that I may receive the advice and consent of the Senate to its ratification, I transmit herewith a treaty of conciliation between the United States and Czechoslovakia, signed at Washington on August 16, 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 8, 1928.*

THE PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view of its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approve thereof, a treaty of conciliation between the United States and Czechoslovakia, signed at Washington on August 16, 1928.

Respectfully submitted.

FRANK B. KELLOGG.

DEPARTMENT OF STATE,
Washington, December 1, 1928.

The President of the United States of America and the President of the Czechoslovak Republic, being desirous to strengthen the bonds of amity that bind them together and also to advance the cause of general peace, have resolved to enter into a treaty for that purpose, and to that end have appointed as their Plenipotentiaries:

The President of the United States of America:

Mr. Frank B. Kellogg, Secretary of State of the United States of America; and

The President of the Czechoslovak Republic:

Mr. Zdeněk Fierlinger, Envoy Extraordinary and Minister Plenipotentiary of the Czechoslovak Republic at Washington;

Who, after having communicated to each other their respective full powers, found to be in proper form, have agreed upon and concluded the following articles:

ARTICLE I

Any disputes arising between the Government of the United States of America and the Government of Czechoslovakia, of whatever nature they may be, shall, when ordinary diplomatic proceedings have failed and the High Contracting Parties do not have recourse to adjudication by a competent tribunal, be submitted for investigation and report to a permanent International Commission constituted in the manner prescribed in the next succeeding Article; and they agree not to declare war or begin hostilities during such investigation and before the report is submitted.

ARTICLE II

The International Commission shall be composed of five members, to be appointed as follows: One member shall be chosen from each country, by the Government thereof; one member shall be chosen by each Government from some third country; the fifth member shall be chosen by common agreement between the two Governments, it being understood that he shall not be a citizen of either country. The expenses of the Commission shall be paid by the two Governments in equal proportions.

The International Commission shall be appointed within six months after the exchange of ratifications of this treaty; and vacancies shall be filled according to the manner of the original appointment.

ARTICLE III

In case the High Contracting Parties shall have failed to adjust a dispute by diplomatic methods, and they do not have recourse to adjudication by a competent tribunal, they shall at once refer it to the International Commission for investigation and report. The International Commission may, however, spontaneously by unanimous agreement offer its services to that effect, and in such case it shall notify both Governments and request their cooperation in the investigation.

The High Contracting Parties agree to furnish the Permanent International Commission with all the means and facilities required for its investigation and report.

The report of the Commission shall be completed within one year after the date on which it shall declare its investigation to have begun, unless the High Contracting Parties shall limit or extend the time by mutual agreement. The report shall be prepared in triplicate, one copy shall be presented to each Government, and the third retained by the Commission for its files.

The High Contracting Parties reserve the right to act independently on the subject matter of the dispute after the report of the Commission shall have been submitted.

ARTICLE IV

The present treaty shall be ratified by the President of the United States of America by and with the advice and consent of the Senate thereof, and by Czechoslovakia in accordance with its constitutional laws.

The ratifications shall be exchanged at Prague as soon as possible, and the treaty shall take effect on the date of the exchange of the ratifications. It shall thereafter remain in force continuously unless and until terminated by one year's written notice given by either High Contracting Party to the other.

In faith whereof the respective Plenipotentiaries have signed this treaty in duplicate in the English and Czechoslovak languages, both texts having equal force, and hereunto affixed their seals.

Done at Washington the sixteenth day of August in the year of our Lord one thousand nine hundred and twenty-eight.

CONCILIATION WITH POLAND

In executive session this day the following treaty was ratified and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

To the Senate:

To the end that I may receive the advice and consent of the Senate to its ratification, I transmit herewith a treaty of conciliation between the United States and Poland, signed at Washington on August 16, 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 8, 1928.*

THE PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approve thereof, a treaty of conciliation between the United States and Poland, signed at Washington on August 16, 1928.

Respectfully submitted.

FRANK B. KELLOGG.

DEPARTMENT OF STATE,
Washington, December 1, 1928.

The President of the United States of America and the President of the Republic of Poland, being desirous to strengthen the bonds of amity that bind them together and also to advance the cause of general peace, have resolved to enter into a treaty for that purpose, and to that end have appointed as their Plenipotentiaries:

The President of the United States of America

Mr. Frank B. Kellogg, Secretary of State of the United States;

The President of the Republic of Poland

Mr. Jan Ciechanowski, Envoy Extraordinary and Minister Plenipotentiary of Poland to the United States;

Who, after having communicated to each other their respective full powers, found to be in good and due form, have agreed upon the following articles:

ARTICLE I

Any disputes arising between the Government of the United States of America and the Government of Poland, of whatever nature they may be, shall, when ordinary diplomatic proceedings have failed and the High Contracting Parties do not have recourse to adjudication by a competent tribunal, be submitted for investigation and report to a permanent International Commission constituted in the manner prescribed in the next succeeding Article; and they agree not to declare war or begin hostilities during such investigation and before the report is submitted.

ARTICLE II

The International Commission shall be composed of five members, to be appointed as follows: one member shall be chosen from each country, by the Government thereof; one member shall be chosen by each Government from some third country;

the fifth member shall be chosen by common agreement between the two Governments, it being understood that he shall not be a citizen of either country.

The expenses of the Commission shall be paid by the two Governments in equal proportions.

The International Commission shall be appointed within six months after the exchange of ratifications of this treaty; and vacancies shall be filled according to the manner of the original appointment.

ARTICLE III

In case the High Contracting Parties shall have failed to adjust a dispute by diplomatic methods, and they do not have recourse to adjudication by a competent tribunal, they shall at once refer it to the International Commission for investigation and report. The International Commission may, however, spontaneously by unanimous agreement offer its services to that effect, and in such case it shall notify both Governments and request their cooperation in the investigation.

The High Contracting Parties agree to furnish the Permanent International Commission with all the means and facilities required for its investigation and report.

The report of the Commission shall be completed within one year after the date on which it shall declare its investigation to have begun, unless the High Contracting Parties shall limit or extend the time by mutual agreement.

The report shall be prepared in triplicate; one copy shall be presented to each Government, and the third retained by the Commission for its files.

The High Contracting Parties reserve the right to act independently on the subject matter of the dispute after the report of the Commission shall have been submitted.

ARTICLE IV

The present treaty shall be ratified by the President of the United States of America by and with the advice and consent of the Senate thereof, and by the President of the Republic of Poland in accordance with Polish constitutional law.

The ratifications shall be exchanged at Warsaw as soon as possible, and the treaty shall take effect on the thirtieth day after the date of the exchange of ratifications. It shall thereafter remain in force continuously unless and until terminated by one year's written notice given by either High Contracting Party to the other.

In faith whereof the respective Plenipotentiaries have signed this treaty in duplicate, each in the English and Polish languages, both texts having equal force, and hereunto affixed their seals.

Done at Washington the 16th day of August in the year of our Lord one thousand nine hundred and twenty-eight.

HOUSE OF REPRESENTATIVES

THURSDAY, *December 20, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father God, we thank Thee that there are many sorrows and disappointments which we have never experienced. At times prompted by anger, by passion, by wicked motive, oh, we thank Thee for the words we did not speak; continue to bless us with the grace of repression. Give us gladness and contentment concurrent with our cares and duties. With eager certainty help us to measure ourselves against the tasks of to-day. Fill our souls with a calm assurance, and may every word and every act flow forth from the unstained and unsullied fountains of conscious rectitude and uprightness. Our Heavenly Father, make us tender toward the erring and forbearing with the forms of human weakness. In the holy name of Jesus, our Savior, we pray. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed the following resolution:

Senate Resolution 281

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. CHARLES L. FAUST, late a Representative from the State of Missouri.

Resolved, That a committee of six Senators be appointed by the Vice President to join the committee appointed on the part of the House of Representatives to attend the funeral of the deceased Representative.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased, the Senate do now adjourn.

The message also announced that, pursuant to the foregoing resolutions, the Vice President had appointed Mr. HAWES, Mr. FESS, Mr. THOMAS of Oklahoma, Mr. BROOKHART, Mr. BARKLEY, and Mr. VANDENBERG members of the committee on the part of the Senate to attend the funeral of the deceased Representative.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H. R. 7729. An act to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases; and

H. R. 15089. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1920, and for other purposes.

RESIGNATION FROM A COMMITTEE

The SPEAKER laid before the House the following communication:

WASHINGTON, D. C., *December 20, 1928.*

Hon. NICHOLAS LONGWORTH,
Speaker, House of Representatives,
Washington, D. C.

MY DEAR MR. SPEAKER: I herewith tender my resignation as a member of the Committee on Elections, No. 2, to become effective immediately.

Sincerely and respectfully yours,

JOE CRAIL.

The resignation was accepted.

THE LAND EXCHANGE ACT

Mr. MORIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a letter from the Secretary of War.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. MORIN. Mr. Speaker, under leave granted to extend my remarks in the RECORD I insert the following letter of the Secretary of War:

WAR DEPARTMENT,
Washington, D. C., May 29, 1928.

Hon. JOHN M. MORIN,
Chairman Committee on Military Affairs,
House of Representatives.

DEAR MR. MORIN: In the CONGRESSIONAL RECORD of May 7, 1928, on page 8321, in the discussion relative to H. R. 11847, "To authorize the acquisition of land in Hawaii," there appear certain remarks which are critical of Army officers in general, and in a letter from the Governor of Hawaii to a Member of Congress which is inserted in the remarks of this Member are statements criticizing a former commanding general of the Hawaiian Department.

I feel it my duty to come to the defense of these officers, and with that object in view I shall present herein certain facts taken from the War Department records in refutation of the criticisms which have been directed against them. I believe that consideration of the data which I shall present will show that the officers concerned were carrying out their duties in accordance with War Department policies and the will of Congress as expressed in the act approved by the President on January 31, 1922.

The act to which reference is made, known as the land exchange act, was first introduced in Congress by the Hon. Julius Kahn in November, 1919. This bill was prepared by the War Department and was introduced at its request in the interest of economy for the purpose of securing the authority of Congress to exchange public lands in Hawaii for privately owned lands which were urgently needed. The specific tracts to which reference is made in the letter from the Governor of Hawaii are those known as the Kalena tract, consisting of approximately 254 acres located in the heart of the Schofield Barracks Military Reservation and owned by Mr. L. L. McCandless, and the Makua tract, which was Territorial property. It was indispensable that the Government should acquire the Kalena tract, as it was located on the target range of the Schofield Barracks Reservation and had been constantly used by the troops since the occupancy of that post. An effort was made to obtain it by purchase, and funds to the amount of $30,300 were appropriated in 1917 and 1920. The owner, however, valued the land at $60,000 and it was believed that condemnation proceedings would award at least that amount for the property. In view of the necessity for the most rigid economy in appropriations for the Army, an effort was made to effect its acquisition by exchanging other land therefor.

At the same time the acquisition of other needed tracts was proposed by this same method. Abundant evidence as to the need for these transfers, with the estimated value of the property concerned, was furnished to the Senate and House Military Committees and to the Committee on Territories. It was supported by the then governor, Hon. C. J. McCarthy, as shown by the following extract from a letter from him dated December 22, 1922:

"This bill remained before Congress for three years, until I came to Washington, and upon explaining the matter to the Military Committees of both the House and the Senate it finally became law January 31, 1922."

The Committee on Territories reported the bill favorably in Report No. 49, Sixty-seventh Congress, first session. After repeated efforts, the bill was finally passed and was approved by the President January 31, 1922.

The War Department records show that preliminary negotiations with reference to the acquisition of the Kalena tract by the War Department prior to the passage of the act were carried on between Maj. Gen. C. G. Morton, commanding general Hawaiian Department, Hon. C. J. McCarthy, Governor of the Territory of Hawaii, and Mr. L. L. McCandless, owner of the Kalena tract. It appears that General Morton, Gov-

ernor McCarthy, and Mr. McCandless were all agreed as to the consummation of the following exchanges:

"The Kalena tract to the War Department.

"Part of the Waimanalo tract to the Territory of Hawaii.

"The Makua tract to Mr. McCandless."

The valuations placed upon these tracts of land then and later underwent great changes.

In the letter from Governor McCarthy, to which reference has been made above, the transfer of Sand Island, a very valuable part of Honolulu Harbor, from the War Department to the Territory of Hawaii, was emphasized. This tract was worth vastly more than the Makua tract or any other tract under consideration. On September 19, 1923, the commanding general Hawaiian Department proposed in a letter to the Governor of Hawaii to transfer Sand Island, subject to certain rights of the War Department to be agreed upon, to the Territory of Hawaii for the Kalena tract or other property for which the Kalena tract might be acquired.

In his reply, dated September 24, 1923, the governor objected to any transfer of Territorial land for privately owned land, and contended that such land should be obtained by condemnation. He stated that he would revise a verbal proposal of Governor McCarthy so that the exchange for the Makua land would include Sand Island and the Keaahala tract of 218 acres, and all of the Waimanalo lands, 1,510 acres. His proposal was not favorably considered because most of the Waimanalo tract and the Keaahala tract were required for military purposes. His objection to the transfer of the Makua tract to private ownership would have nullified the intent of the law. Thereupon, the commanding general Hawaiian Department reported to the War Department that the counterproposals were not favorably considered and that no further recommendation as to this exchange could be made, and on April 16, 1924, requested that the Kalena tract be acquired by condemnation and purchase.

The records of the War Department show that as no agreement could be reached, the Governor of Hawaii came to Washington with the intention of carrying out the wishes of the Hawaiian Legislature to have various tracts of land owned by the War Department transferred to the Territory. He reiterated in conference with representatives of the War Department his attitude as expressed to the department commander. He then requested the transfer to the Territory, without anything in exchange, of about 100 acres of the Keaahala Reservation upon the representation that it was needed for an insane asylum. His efforts were successful, and on June 26, 1924, an Executive order was issued transferring such a portion to the Territory together with the valuable water supply known as the Spring Reserve Lot.

There are no further records of negotiations between the Governor of Hawaii and the commanding general Hawaiian Department. It is thus seen that the statement of the Governor of Hawaii, that "General Summerall when first assuming command down here at the beginning of my administration tried his best to force me to carry out a land exchange which would have resulted in the Territory giving up control of over 2,000 acres to private interests in order that the Army might secure 254 acres of the Kalena tract" is not in accord with the records at the War Department.

With reference to the statement that "the Army officers in Hawaii have been reckless in their waste of the public domain," and the specific mention of Mr. Dillingham, the records of the War Department show that at a conference with the Chief of Staff of the Army November 17, 1923, the Governor of Hawaii stated that he was not opposed to the exchange of Government-owned lands for privately owned lands, except the Waimanalo and Sand Island Reservations. These reservations were not involved in any such exchanges. On April 11, 1924, the commanding general Hawaiian Department recommended to the War Department the following land exchanges: The Federal Government to acquire—

(a) A tract of approximately 105.46 acres situated on the north shore of Oahu for camping and training purposes.

(b) A fire-control position on Pupukea Plateau.

(c) A battery position on Pupukea Plateau.

(d) A fire-control site on the slope of Mount Kaala.

(e) A fire-control site and battery position indicated on a map.

The Federal Government to relinquish to private ownership 9.2 acres on the Fort Ruger Military Reservation and 62 acres of the Lualualei Military Reservation.

The proceedings of the board of appraisers provided for in the land exchange act were forwarded to the War Department, showing the following values:

Private land to be acquired by the War Department	$30,823.85
War Department land to be transferred to private ownership	30,800.00

There is no evidence that the relative values unfavorable to the Government have changed. There were other land exchanges under the act, all of which were fair and reasonable in value and of far-reaching importance to the mission of the Army in that Territory. All were carefully examined and approved by the War Department.

I have addressed this communication to you, with the hope that you will have it introduced in the CONGRESSIONAL RECORD should an opportunity for such action be presented.

Sincerely yours,

DWIGHT F. DAVIS,
Secretary of War.

PRISON-MADE GOODS

Mr. ROWBOTTOM. Mr. Speaker, at the request of the gentleman from Iowa [Mr. KOPP], who is ill, I ask unanimous consent that the bill H. R. 7729, an act to divest goods, wares, and merchandise manufactured and produced or mined by convicts or prisoners of their interstate character in certain cases, may be taken from the Speaker's desk and the Senate amendments agreed to.

The Clerk read the Senate amendments.

Mr. GARNER of Texas. What committee does this come from?

Mr. SNELL. From the Labor Committee.

Mr. GARNER of Texas. When the bill was before the House there was some opposition to it, and if there was opposition to it then there may be opposition to a material amendment placed on it in the Senate. I do not see any member of the Labor Committee here.

Mr. SNELL. I think if the gentleman would let the gentleman from Indiana explain it he would find that it is more acceptable to those who made the opposition than it was before.

Mr. GARNER of Texas. I can not say as to that, as I do not know what the basis of the opposition was.

Mr. RAMSEYER Mr. Speaker, reserving the right to object, I know there was an attempt made to amend the bill in this body to exempt prison farms and the same attempt was made in the other body. What effect this amendment just read has I can not determine by merely listening to it as it was read by the Clerk. Whether it has the effect of exempting from operation of the law things produced on penal farms I can not say. I think the gentleman should let this go over a while, so we can study the effect of the amendment.

Mr. SNELL. Let the gentleman from Indiana explain the bill.

Mr. CRAMTON. I would like to ask if these amendments have had the consideration of the committee in charge of the bill.

Mr. ROWBOTTOM. The gentleman from Iowa [Mr. KOPP] called me this morning and asked me to have the bill taken from the Speaker's desk and Senate amendments agreed to. He said that the committee was in favor of the amendments. Senator MCNARY, from the Committee on Agriculture in the Senate had the amendment in regard to penal farms put on, and it is agreeable to him.

Mr. CRAMTON. What emergency is there for mixing up this bill with a happy Christmas? [Laughter.]

Mr. RAMSEYER. Reserving further the right to object, Mr. Speaker, I think the Committee on Labor should have a meeting and consider these amendments so that the House can have the benefit of the mature judgment of that committee. The amendments may be all right; I do not know. I feel impelled for the present to object.

The SPEAKER. Objection is heard.

ELECTION TO COMMITTEES

Mr. TILSON. Mr. Speaker, on yesterday I presented a resolution for the election of Members to certain standing committees in the House. There were two sheets of the resolution. In some way or other one of the sheets failed to reach the reading clerk, so that only a portion of the list was read. I have prepared a new resolution, including the omitted Members, and will send it to the Clerk's desk for immediate consideration.

The Clerk read as follows:

House Resolution 274

Resolved, That the following-named Members be, and are hereby, elected to the standing committees of the House, viz:

FRANKLIN W. FORT, of New Jersey, Committee on Rules.

JOSEPH W. MARTIN, Jr., of Massachusetts, Committee on Rules.

HARRY L. ENGLEBRIGHT, of California, Committee on the Census.

The SPEAKER. Is there objection to the present consideration?

There was no objection.

The resolution was agreed to.

LEAVE OF ABSENCE

Mr. BLAND. Mr. Speaker, I ask unanimous consent that leave of absence be granted my colleague [Mr. TUCKER] until after the recess, on account of illness in his family.

The SPEAKER. Without objection, it will be so ordered.

There was no objection.

POINT OF NO QUORUM

Mr. GARNER of Texas. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER pro tempore (Mr. TILSON). The gentleman from Texas makes the point of order that there is no quorum present. The Chair will count.

Mr. GARNER of Texas (interrupting the count). Mr. Speaker, I withdraw the point of no quorum.

APPROPRIATION BILL FOR DEPARTMENTS OF STATE AND JUSTICE, THE JUDICIARY, AND FOR DEPARTMENTS OF COMMERCE AND LABOR

Mr. SHREVE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15569) making appropriations for the Departments of State and Justice, and for the judiciary, and for the Departments of Commerce and Labor for the fiscal year ending June 30, 1930, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15569, with Mr. LEAVITT in the chair.

The Clerk read the title of the bill.

Mr. OLIVER of Alabama. Mr. Chairman, I yield one hour to the gentleman from New York [Mr. SIROVICH].

Mr. SIROVICH. Mr. Chairman, I respectfully ask the Members of the House not to interrupt me until I have concluded my remarks, at which time I shall be pleased to answer any questions that may be propounded.

Mr. Speaker and fellow Members of the House, when Greece was the mistress of the world and Athens the center of all the world's activities it was the custom of the sister republic of Sparta to expose upon Mount Olympus any child that was born into the world that was likely to become a public charge.

There upon that mountain top were left these unfortunate children until the ravages of the tempest and the vultures of the air destroyed their very existence. Since that time civilization has marched slowly onward, upward, and yet progressively forward.

In the year 1215 the barons, the lords, the clergy, and the common people of England wrung from the unyielding bosom of King John at Runnymede that immortal document known as the Magna Charta, or the great charter of rights, giving to the Anglo-Saxon people the inalienable right to the pursuit of life, liberty, and happiness, and, above all, the right to trial by a jury of their peers. Six hundred and fifty years later in this great country of ours that gracious and illustrious President, Abraham Lincoln, signed another immortal document, the Emancipation Proclamation, which forever put a stop to involuntary servitude and brought liberty and freedom to the black race of our country.

The nineteenth century, from 1800 to 1900, will always be remembered as the great era in which intellectual man subjugated the forces of science through the medium of nature to serve the will of man.

What a glorious array of inventive genius this period produced. An era that made it possible for human ingenuity to elaborate and perfect mechanical devices to make human life more congenial and pleasant to live.

Behold the cotton gin of Eli Whitney, the development of the steamboat by Fulton, and of the locomotive by Stevenson. The anguish and pain of the scalpel assuaged by the utilization of anesthesia discovered by Doctor Morton. The miraculous and marvelous contribution of rapid communication through the use of the telephone and telegraph invented by Morse and Bell.

The wonderful entertainment brought about by motion pictures perfected by Edison. The amazing ramification in the field of the wireless and radio invented by that Italian genius, Marconi.

And last but not least the magnificent, epochal accomplishments of the two great Wright brothers in the development of the airplane.

These extraordinary contributions by inventive genius, plus countless other devices, have made it possible for mankind to live happier, healthier, better in our country than was the privilege of our forebears to enjoy ere we came to this world.

In the twentieth century of civilization two men have left their indelible impress upon the hearts and minds of our citizens. One is that aggressive and militant figure, the heroic Theodore Roosevelt; the other is that profound intellectual student of the philosophy of government, the brilliant and scholarly Woodrow Wilson. These two ex-Presidents of the United States have inspired our citizens to think in terms of social justice for the benefit of the great producing classes of our people, and thus put human rights on a parity with property rights.

It was the teachings and the inspirations of their ideals and principles that helped to place upon our statute books in various States of the Union such humanitarian legislation as universal suffrage, widows' pensions, child welfare, workingmen's compensation, employer's liability, the minimum wage laws, the limitation of hours of labor, and last, but not least, the subject of my address, "Old-age pensions," which has been found in operation in every civilized nation of the world with the exception of China, India, and the United States. [Applause.]

What is the purpose of old-age pensions? The fundamental principle behind old-age pensions is the preservation of the home. The home is the unit upon which the superstructure of our Government is reared. If you destroy the home you destroy society and government. The home is the place that symbolizes, to my mind, the monarchial principle of government, in which the father is the king, the mother is the queen, and the children the subjects. In any home wherever you go you will find an inscription upon the wall, "God bless our home." Yea, be it ever so humble, there is no place like home.

The two weakest links in the chain of home life are the young and the old. A generation ago one out of every three or four children born into the world would die ere it had an opportunity to develop into childhood and adolescence. To-day, through the medium of science and medicine, through serum and antitoxins and the countless contributions of prophylactic treatment, coupled with hygienic regulations and legal restrictions placed upon the exploitation of childhood, we are enabled to raise children to the extent that the mortality table shows only one out of eight dying before it had a chance to evolve into young life.

The laws of our country and society have developed the young children of the present generation by prolonging childhood to the age of 16, which is the compulsory educational period required by law.

A soldier fighting in the trenches of France, with bullets and bombs exploding over him, with poisoned gas about him, has a better chance to escape with his life than has a child coming into the world with the desire to live and to reach young adult life.

While we have given the child a better chance to live, thrive, and prosper, scientific medicine has made it possible for mankind to live longer than formerly. Two generations ago the average age of man would be about 40; to-day the average man lives until he is 58, and the same scientific appliances that have been utilized for children to grow and develop have been placed around the old father and the mother, so that old age and longevity have been increased. Formerly, out of a total of 100,000 people, 41,000 would reach the age of 65. To-day 52,000 of such an original number will live to be 65. Because of the increased expectancy of life, the number of persons 65 years of age and over in the United States has been steadily increasing, and the consequences are that while those fathers and mothers are living longer than before the economic and industrial conditions that confront them in our Nation has made it impossible for them to find work, and the only way they can subsist and save themselves from penury, hunger, and want, is for them to join the great caravan that finally wends its way over the hill to the poorhouse and almshouse. [Applause.]

Only 6 per cent of all the old people employed in private industries can expect pensions in their old age, while the balance, or 94 per cent, of them can expect nothing, depending only upon their savings. If, unfortunately, their income did not permit them to save for old age, or they lost their money through unfortunate investments, then modern industry throws them back upon the community as human driftwood and wreckage that is useless for wear and tear. Thus we behold our wage earners transformed from a group of hopeful independent citizens into that of a class of helpless poor. In some States of the Union it is a crime to turn out old horses to starve, still society lets its old men and women starve in their old, unemployed age unless they take the last pilgrimage upon the road that leads them pathetically to the almshouse and poorhouse.

How many old men and women have we? The statistics which were gathered through the State of Massachusetts Old Age Pension Commission show that there were 1,250,000 old fathers and mothers prior to the year 1915 in the United States, all of whom were dependent in part or in whole on public or private charity. And that the Nation's annual cost of our dependent population amounted to over $200,000,000.

Later estimates of 1927 by Dr. A. Epstein showed almost 2,000,000 dependents maintained in public and private institutions at a total cost of over $500,000,000.

There are to-day over five and a half million people past 65 years of age in the United States. Two millions are between the age of 65 and 70, a million and a half between the ages of 70 and 75, and a million between 75 and 80, and there are three-

quarters of a million people 80 and over, until life finally terminates. The number of old people in our country is now greater than the original population of the entire 13 colonies. In a study made by the United States Department of Labor in 1925 that investigated 2,183 of these almshouses of the United States, which represent 93 per cent of the total, it was found that in those almshouses there were 85,889 old fathers and mothers who were past the age of 65. The total cost of these almshouses, so far as the land, the buildings, and equipment and the furniture was concerned represented an investment of $200,000,000.

The total maintenance cost of all these institutions amounted to $28,740,535, which represented a per capita investment of $1,752.09 and a food maintenance of $439.76 for each inmate. Of the 2,183 almshouses studied 1,909, or 87 per cent of them, had less than 100 inmates. To determine how this money was spent study disclosed that 32 per cent went as administrative expense, 38 per cent for operation of the plant, while 30 per cent went for inmates' maintenance. In other words, out of every dollar contributed to the almshouse 70 cents went for administrative and operative expense, the so-called overhead, while 30 cents went directly for the old fathers and mothers.

Every State of the Union, with the exception of New Mexico, has almshouses for the poor. In 40 of our States the almshouses are county institutions. Here in these almshouses are huddled together the feebleminded and the epileptic, the cripple and the maimed, the idiot and the imbecile, the abandoned child of the prostitute, the broken-down criminal, the chronic drunkard, the victim of loathsome and contagious diseases and venereal infections, and last but not least the superannuated toilers of labor and industry, our fathers and mothers. Veterans of dissipation and veterans of peace and industry living together under one roof. Is it fair? Is it just? Is it humane? To me it is a pitiful and tragic indictment of the civilization of our times. [Applause.]

What are the causes of old-age dependency? First and foremost is the impairment of health. Sickness and disease exacts a terrible toll. In old age the resistance of a person is diminished and he becomes susceptible very easily to the ravages that come in the wake of vocational and industrial pursuits. Tuberculosis among the miners. Pneumonia amongst the steel and mill and factory workers. Rheumatism and heart lesions from working in damp and wet occupations. Asthma, bronchitis, and skin lesions amongst fur workers. Lead poisoning amongst painters, and countless other maladies too numerous to mention. Unfortunate business investments, alluring advertisements, high-pressured salesmen have ruined many an old father and mother. Bank failures have sent many an elderly couple to the almshouse, when the savings of a lifetime were lost. When the waning earning power of old age in competition with young age and machinery manifests itself, ambition collapses, hope is transformed into despair, and, with relatives and friends gone, death or the almshouse is welcomed as the final relief. The greatest curse of old age, however, is unemployment which has lately increased through the productivity of machinery. Everywhere discrimination is practiced against the older employee in favor of youth. In modern industry today we see the exemplification of the principle "equal opportunity for all, except those past the age of 45."

Another factor driving older men and women toward pauperism is the lack of family connections. One-third of the almshouse paupers throughout the United States have never been married, another third are widowed, and one-third are still married. The great majority of aged dependents in almshouses and infirmaries are childless.

Other causes for dependency are the victims of the ingratitude of children who have forgotten the divine injunction given to Moses upon Mount Sinai, when God gave him the great commandment which says: "Honor thy father and thy mother: that thy days may be long upon the land which the Lord thy God giveth thee."

Loss of wife, husband, or children very easily brings about the transition from independence to dependence.

Last but not least the greatest cause of dependency in old age is the terrible toll that industrial accidents take in human and economic values.

During the period from 1910 to 1920, a period of 10 years, there were more men and women maimed and crippled in the industries of the United States than were lost in all the wars of our Nation from the time of the American Revolution down to the World War. In the years 1917 and 1918, when our expeditionary forces went across the ocean to fight to make the world safe for democracy, there were more men and women killed in the industries of our country than there were American soldiers and sailors killed and wounded by the hostile forces fighting in Europe. In the year 1919, according to the report of the Federation of American Engineers, in this country 23,000 people were killed in our industries and 3,570,000 workers were crippled and injured in the performance of their duties, so that they had to stay off for four weeks or more from their employment. If the prevailing rate of wages, according to the National Employers' Association, amounted to $27.25 per week for the year 1927, it would mean $4 a day for 300,000,000 days, or a loss to labor and industry of $1,200,000,000 a year.

It was these frightful conditions, ladies and gentlemen, that prompted the people of this country of ours to interest themselves in the subject of old-age pensions. In 10 years the principle of old-age pensions has been approved in 11 States of the Union. The States of Wisconsin and Montana and the Territory of Alaska to-day are operating under old-age pensions. Eight States have passed legislation on the subject—such States as Colorado, Nevada, Arizona, Kentucky, Maryland, Pennsylvania, and Massachusetts, and in the State of California the legislature passed a bill in favor of old-age pensions, but the governor vetoed it.

In the State of Pennsylvania, where the most thorough investigation upon the subject ever conducted was made, just as the commission was about to put into operation in that great Commonwealth the old-age pension provisions, the supreme court of the State declared the act to be unconstitutional on the ground that the constitution of the State did not permit the contribution of public money to private individuals.

In the State of Arizona, the supreme court also declared the bill unconstitutional because the bill was not properly drafted and its language was too ambiguous.

Mr. Chairman, ladies, and gentlemen, 14 States outside of those enumerated have already appointed commissions to investigate the subject of old-age pensions.

I am proud to say that 13 of these States have recommended in toto the principles and ideals upon which old-age pensions are founded.

What do the facts show in the States which have put this system into operation? In the State of Montana and in the State of Wisconsin, when an individual is given the privilege of going to the almshouse or staying in his own home, in every instance the individual prefers to stay in his own home. It costs the counties in Montana $65.98 a month to take care of an old inmate. You can take care of four men in their own homes for that amount. The average amount of money which these States contribute to the maintenance of an old man in his own home is the sum of $16. In Pennsylvania it was found that they can take care of three old mothers and fathers in their own homes, for the amount of money that it costs to take care of one person in an institution.

In the States of Montana and Wisconsin it was found that out of every 1,000 in the population no more than a minimum of 2 and a maximum of 3 have sought old-age pensions. The total amount of taxes placed upon each man and woman in the States of Montana and Wisconsin in order to provide comforts for old fathers and for old mothers in their own homes instead of almshouses was the sum of 2 cents a month.

Mr. Chairman, ladies, and gentlemen, we now come to the subject of old-age pensions in foreign countries. Of all the civilized nations of the world, 42 have adopted the principle of old-age pensions. There are three forms of old-age pensions operating throughout Europe, South Africa, South America, Canada, Australia, and New Zealand. The first is called the compulsory contributory form of old-age pensions. This system consists of compelling each workingman from 16 to 65 to contribute a part of his income to a general national fund, the amount to be contributed being anywhere from 2 to 5 per cent. The employers contribute a like amount, and the Government contributes a third portion. This amount stays in the coffers of the nation until the man becomes old and enfeebled and arrives at the age of 65, when he becomes the beneficiary of his labor and effort. Twenty-eight nations of Europe have adopted the principle of the compulsory contributory form of insurance, and amongst them are the three great nations—England, France, and Germany.

Germany was the first to start this movement, under the influence of the Iron Chancellor, Bismarck, in 1889. To-day there are 20,000,000 workers enrolled who, when their time comes, will be the recipients of an old-age pension, which will make them love and respect their fatherland and make them realize that they are receiving the kind of protection and security which it is the duty of every civilized government to provide for its citizens.

Germany also provides its citizens with invalidity insurance, widows and orphans' pensions, as well as sickness and unemployment insurance.

In 1908 that conservative and great nation, England, under the leadership of Lord Asquith, introduced the noncontributory form of insurance. Three years ago greater modifications were made in the bill to conform with Germany's system, so that England to-day stands upon the same pedestal in old-age security legislation as Germany. It adopted in toto the entire theory of compulsory contributory insurance. Out of 17,000,000 workers in England, 16,000,000 have subscribed to the principle of old-age pensions.

France has 7,500,000 of its working people enrolled under the roster of the compulsory contributory form of old-age pensions.

The second system, under which 10 nations operate, is called the noncontributory form of old-age pensions and is colloquially known as the straight pension system. This system provides for no contribution by any toiler, but when a workingman arrives at the age of 65 he receives his pension as an evidence of the interest which his government maintains in him. Industry can not throw him away as a wreck, upon the ocean of life.

The nations which have adopted this noncontributory form of old-age pensions, or straight pensions, are such countries as Denmark, Canada, New Zealand, Australia, and Iceland.

The third form of old-age pensions is the kind known as the voluntary savings type, under which an individual puts away every week in one of the postal savings of the government, a certain amount of money from his allowance and the government contributes a subsidy to equal it. The individual, however, can not use it until he arrives at the age of 65. The nation which started this principle was Spain, and to-day Japan is operating under that system.

There are 1,900,000,000 men and women in this world, and 600,000,000 of them have subscribed to the different forms of old-age pensions. They will be the beneficiaries of an old-age pension system in the declining years of their life. So we have the wholesome spectacle of 42 nations of the world interested in the preservation of human life. The only three nations of the whole world that have not adopted the principle of old-age pensions are China, India, and the United States. I am making the plea to have our country withdraw from the company it is keeping with China and India and march onward with the civilized nations of the world. [Applause.]

Mr. Chairman, the other day I heard the distinguished gentleman from Illinois [Mr. BRITTEN], the chairman of the Committee on Naval Affairs, rise in this historic forum and plead the cause of a mighty naval armament, based upon the compact of 5-5-3, by which our country was to emulate the example of England and France in their militaristic standards. When you consider that 15 cruisers, submarines, and battleships that Mr. BRITTEN pleaded for involve expenditures of millions and millions of dollars, I say it is a shame that this the greatest Nation of the world, the most prosperous and at the same time the most civilized country in the world, must build great armaments to match these nations. If we have to prepare in times of peace for war, let us do so. But let us not forget our obligations to the veterans of peace in their hour of need, and so I say if we must match England, France, and Germany, then let it be on the basis of humanitarianism.

If we are to march with these nations along the lines of great naval armaments, we should also march side by side with them to protect our old people as they have protected theirs. The true patriots of our country are not only the men who bared their breasts to shot and shell and were ready to give their lives upon the battle fields of our country, so that our Nation should be preserved, but there are also the veterans of peace, men who have worked in the quarries of life, in season and out of season, and have contributed everything that they hold near and dear in life to the peace and prosperity of our country in times of peace.

Just as we pension the veteran for his patriotism in time of war we should pension through the principle of old-age security the old father and mother who have battled for our happiness and our success in time of peace. [Applause.]

I want to see America marching with England, with France and Germany, not only on the basis of an agreement for naval and military armament but on the basis of humanitarian armament, that would make the world safe for humanity to live in peace, tranquillity, and happiness until Divine Providence calls them to rest in eternal sleep. [Applause.]

Often have I sat in the House and listened to resolutions put through by some of the distinguished men of this historic forum. The other day a bill was passed appropriating $50,000 to determine why fishes do not enter the harbors of certain sections of our country. Recently another appropriation passed the House spending thousands of dollars to determine the cause of death of old trees in the forests of our Nation. At the last session of Congress thousands of dollars were appropriated to determine the cause of disease among cattle. I have seen thousands of dollars spent to conserve our oil resources; but this is the first time in the House that I am pleading and asking the distinguished Rules Committee, composed of the most eminent gentlemen of the House, the most powerful group of our membership, to let a bill of mine come out that would appropriate the sum of $50,000 so that this great Nation of ours may determine the causes of old-age dependency, and to find out how many of our fathers and mothers are in need, and ascertain the best way to take care of the American toiler, so as to protect him in his hour of adversity and misfortune and, above all, when he can no longer work.

This bill has been sleeping quietly in the Rules Committee. It is an American bill. It is a humanitarian bill. It is in consonance and in conformity with the teachings and the preachment of the great Savior. It is in harmony with the greatest commandment of all commandments. Mr. Speaker, ladies, and gentlemen, the time has come, the hour has struck, and the moment has arrived, when the United States has got to declare whether it shall fall behind the cultured and civilized nations of the world or is willing to march side by side with those nations that have put human rights on the same parity as property rights. [Applause.]

Mr. Chairman, ladies, and gentlemen, we have had 70 Congresses of the United States since the inception of our Government. What man in Congress here can state to me which Congress stands out preeminent? What Member can tell me the Congress that has done the greatest good?

All I know is that the Twelfth Congress was the Congress that declared war against England. The Twenty-ninth Congress was the Congress that declared war against Mexico because of Texas. The Thirty-seventh Congress was the Congress that brought about the Civil War——

Mr. BOX. Will the gentleman yield for just a question?

Mr. SIROVICH. In just a moment.

Mr. BOX. The gentleman is cognizant of the fact that Texas had already established her independence?

Mr. SIROVICH. I understand that. Pardon my mistake for the moment.

The Thirty-seventh Congress was the Congress that declared war to free the negro. The Fifty-fifth Congress was the Congress that brought about the freedom of Cuba, which involved us in the Spanish-American War. The Sixty-fifth Congress was the Congress that declared war against the Central Powers of Europe, and the Sixty-third Congress was the Congress that brought about the Federal reserve system that protected the rights of money in banks against financial collapse so that our material wealth would be protected as the years go by.

I would like to see the Seventieth Congress of the United States, ere we make our exodus from this historic forum, declare war against the obsolete treatment of our elders so that they may continue to live in their own homes that have been hallowed with sweet memories, tender with pleasant reminiscenses. Home, where the prattle of children has been music to the ears of the parents. Home, that has always been dedicated to God and consecrated to the love of family life.

In the name of humanity I appeal to the membership of this House for the preservation of the home and all that it means, so that the gracious prayers of our older generation will pray for the life and happiness of the membership of the Seventieth Congress of the United States for having given of their to-day that others might have their to-morrow. [Applause.]

Mr. Chairman, I shall now be pleased to answer any questions that anyone is anxious to ask me.

Mr. BOX. Will the gentleman yield?

Mr. SIROVICH. Yes.

Mr. BOX. Does the gentleman's bill propose that this activity shall be carried on by the Federal Government?

Mr. SIROVICH. To answer my distinguished friend from Texas [Mr. Box] I would like to say I have put in two bills. One is an old-age security act, a bill that I worked out in conjunction with Prof. Joseph Chamberlain, of Columbia University, that follows the principle of the Smith-Lever Act, the Smith-Hughes Act, the Smith-Sears Act, and the Sheppard-Towner Act.

My bill is designed to have the Government of the United States give a certain sum of money as a contribution to any State that is willing to apply the principle of old-age pensions to its citizens, which is optional with the State to accept. If the State accepts it, it means it has agreed to the minimum requirements given by our country. The Supreme Court of the United States in the case of Frothingham against Mellon, in which the Sheppard-Towner Act was fought in the Supreme

Court, declared the Sheppard-Towner Act constitutional. The important features of that bill are the same as mine.

The Supreme Court declared there was no involvement of sovereign rights of the States, since the State did not give up its sovereign rights, as it was optional with the State to take the money or not.

Second, that so long as the appropriation was given for the general welfare of all the people, Congress was within its rights.

And, third, there was no jeopardy of property rights of any taxpayer, as the payment of the taxpayer's proportional tax was so small that it did not deprive him of any property rights.

It was upon the basis of this decision by the Supreme Court of the United States that Professor Chamberlain and myself felt that the bill that I have introduced for old-age security in the United States would stand the constitutional test of the Supreme Court.

I am pressing a second bill which I introduced, a bill simply designed to appropriate the sum of $50,000 to appoint a commission of 15 men, 4 to be appointed by the Speaker from the membership of this House, 4 to be appointed by the Vice President of the United States from the Senate, and 7 to be appointed by the President of the United States, 2 representing capital, 2 representing labor, and 3 disinterested social workers; that they shall have the privilege of gathering together all the available statistics and information, a fact-finding commission, with full powers to subpœna witnesses and records, and then come back and report to us. I bespeak the splendid cooperation of the distinguished Representative of the State of Texas [Mr. Box] and my fellow associates, to talk to the distinguished gentleman who is the chairman of the Rules Committee, Mr. BERTRAND SNELL, one of the finest men we have in this House, and ask him if he will not be kind enough to allow this little resolution to come out, which is simply fact finding in its purpose.

Ladies and gentlemen, just as I was coming in the Chamber—I am glad to see my friend, Mr. SNELL here—I received the following telegram:

> The American Association for Old Age Security heartily indorses your great work in behalf of human justice in America. We stand behind you in your efforts and hope that the United States Congress will create a commission to study the present problem of old-age dependency and pensions, so that our Nation in meting out greater justice to our fathers and mothers, will be placed at least in the same category in which every important and civilized nation in the world is to-day.

This is signed by Bishop Francis J. McConnell, president of the American Association for Old Age Security, and the president of the Federal Council of Protestant Churches of Christ in America, embracing over 22,000,000 Protestants who live in the United States. [Applause.]

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. SIROVICH. Certainly.

Mr. WAINWRIGHT. I want to ask the gentleman what has been done in the State of New York, which was one, if not the pioneer, in workmen's compensation, in the field of old-age pensions?

Mr. SIROVICH. I shall be glad to answer the distinguished gentleman from New York. Seventeen years ago there was appointed a commission in the State of New York known as the commission to inquire into the subject of widows' pensions and other relief for widowed mothers. It was my good fortune to be appointed by the Governor of New York on the original commission. I served with Governor Smith; James J. Walker, the present mayor; ROBERT WAGNER, present United States Senator; Sophia Irene Loeb; Senator Martin McCue; Judge Aaron J. Levy, of the New York Supreme Court; Senator Anthony J. Griffin, and others. The commission worked three years investigating the problem and principle of widows' pensions and child welfare.

In the old days when a father died and left a widow and dependent children behind it was the custom to put the children in an orphan asylum. The mother could see the children once a week for half an hour. The ties that bound a mother to her children were severed. We thought that was an obsolete and inhuman method of treating a widowed mother and her innocent children. We were determined to preserve the home, to unite the family, and to give the money to the mother that we gave to the orphan asylum. This we did in 1913. To-day if a father dies, the children, instead of being taken to an orphan asylum, are put in the custody of the mother. It cost the State of New York more to put the children in an asylum than it did to put them in the custody of the mother. It cost on an average of from $50 to $80 to maintain the children in an orphan asylum, whereas it only costs $20 to maintain these children in the care of their mother. Forty States of the Union have now adopted the principle of widows' pensions and child welfare.

Mr. WAINWRIGHT. My question was what progress the movement for old-age pensions is making in the State of New York.

Mr. SIROVICH. There is a commission investigating the subject of old-age pensions in the State of New York which is expected to report at the next session of the legislature. I am proud to tell my friend that Franklin Roosevelt, the newly elected Democratic Governor of the State of New York, has gone on record in favor of old-age pensions; and the principle of old-age pensions was incorporated in the platform of the Democratic Party in New York.

Mr. WAINWRIGHT. The workman's compensation act was adopted during the governorship of Charles E. Hughes.

Mr. SIROVICH. I want to correct the distinguished gentleman from New York on that. If I were a lawyer, I would take exceptions to his remark. The gentleman who fathered and sponsored the resolution which brought about the workman's compensation and employers' liability act was a member of a commission appointed by Governor Glynn, of which the present United States Senator, ROBERT WAGNER, was the chairman.

Mr. WAINWRIGHT. I do not desire to bring in anything of a personal nature, but I happened to have been chairman of the State commission on the employers' liability and workman's compensation. We made exhaustive study of the subject and our report and legislation recommended was adopted, and that was in the administration of Governor Hughes.

Mr. SIROVICH. That may be possible; nevertheless the important work that brought the act into full operation was done by ROBERT WAGNER and the factory commission, of which he was the guiding spirit in the person of its chairman.

Mr. WAINWRIGHT. The workman's compensation act was based upon the report of this commission and during the administration of Governor Hughes.

Mr. SIROVICH. When did the act go into effect?

Mr. WAINWRIGHT. The bill was declared unconstitutional. May I say that the question of the constitutionality of the act was always in doubt. It was known that the constitution might have to be amended.

Mr. SIROVICH. The bill sponsored by Senator WAGNER was never declared unconstitutional.

Mr. WAINWRIGHT. But what I say to my friend is that the first act which was passed by the Legislature of the State of New York was in the year 1909 or 1910—before the gentleman entered the legislature.

Mr. SIROVICH. I am glad to take the statement of the gentleman from New York, and will appreciate his kindly cooperation in this cause, so that we Democrats and Republicans may unite together for the common good of the old fathers and mothers of the country.

Mr. WAINWRIGHT. And I will say that the gentleman has made a very interesting speech.

Mr. SIROVICH. I thank the gentleman from New York.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. SIROVICH. Yes.

Mr. McKEOWN. I am very much interested in the gentleman's statement. In the first session of this Congress, like the gentleman, I introduced a bill along the lines of old-age pensions. Does the gentleman also take into consideration those who are injured in industry, who are disabled, so as not to be able to earn a living?

Mr. SIROVICH. For people who are injured in the performance of their work, as the gentleman has just heard, we have the workman's compensation laws, and the employers' liability laws, and perhaps in time, just as in England, France, and Germany, we will have an all-embracing compulsory-contributory form of old-age pensions to take care of invalidity, injury, and so forth.

Mr. McKEOWN. The old thought was that the States would take a part of this burden, and on the whole that it will be less expensive to the people generally. That is, the States will care for part of this.

Mr. SIROVICH. Exactly.

Mr. McKEOWN. And the National Government will carry part.

Mr. SIROVICH. Yes.

Mr. McKEOWN. And that as a whole it will cost less?

Mr. SIROVICH. Yes, sir; all students of the subject agree to that.

Mr. BLACK of Texas. Mr. Chairman, will the gentleman yield?

Mr. SIROVICH. Yes.

Mr. BLACK of Texas. Has the resolution which the gentleman speaks of received a favorable report from a committee?

Mr. SIROVICH. I might tell my distinguished friend from Texas that I wrote a letter to my good friend from New York,

Mr. SNELL, the chairman of the Committee on Rules, but I guess that Mr. SNELL has been so busy in other work that he has been engaged in that he has allowed the days to go by without even acknowledging its receipt.

Mr. BLACK of Texas. And the resolution is before the Rules Committee?

Mr. SIROVICH. Yes; and I think it would be a fine Christmas gift to the old fathers and mothers of our country if we went as a solid phalanx to our good friend, Mr. SNELL, and asked him to be kind enough to allow the Rules Committee to report this innocent resolution of simple fact finding.

Mr. SNELL. Mr. Chairman, will the gentleman yield?

Mr. SIROVICH. Yes.

Mr. SNELL. What would a lot of our good friends do if they did not have somebody on whom to lay the blame for all of the bad things that happen in Congress?

Mr. SIROVICH. I would not lay any bad thing at the feet of my friend, Mr. SNELL. The gentleman is as fine a gentleman as there is in the Congress.

Mr. SNELL. But always there must be someone to lay everything on, to give as an excuse, and I suppose it might as well be me as someone else.

Mr. SIROVICH. I remind the gentleman that there is an old French proverb which says, that "He who excuses himself, accuses himself."

Mr. SNELL. I do not offer any excuses.

Mr. SIROVICH. Mr. Chairman, I shall take this opportunity of thanking the membership of this House for their graciousness and courtesy which they have extended to me while presenting this subject to the American people through this great historic forum. I sincerely trust that as you all go home you may all remain constant in good health, constant in strength and in good deeds, constant in benign influence and human achievement, and that you may all have a merry Christmas and a happy New Year. [Applause.]

Mr. Speaker, I wish to insert in the RECORD a letter written by Mr. George W. Wickersham, former Attorney General of the United States under President Taft, to the editor of the New York Times on November 30, 1928.

A HOME FOR THE AGED—AN INSTITUTION MINISTERING TO A PATHETIC AND GROWING NEED

To the EDITOR OF THE NEW YORK TIMES:

Announcement was made recently that building operations intended to double the capacity of the Home for Old Men and Aged Couples, situated opposite the Cathedral of St. John the Divine, on Amsterdam Avenue, will start shortly. This, in my opinion, is of unusual significance and worthy of especial note by all those interested in the progress of old-age security.

Fifty-six years ago last Sunday a group of members of the Episcopal Church, headed by Bishop Horatio Potter, met and evolved a plan for the founding of a home "where old men and aged couples of known respectability might pass their remaining days in bodily comforts and spiritual privileges and freed from temporal anxieties." Performing a distinguished and humane service for more than a half century, the admirable foresight and broad sympathies of these gentlemen and the wisdom of that policy are only now coming into recognition as the problem of old-age dependency lays increasing claim to public attention.

The recent report of the welfare council, showing that 13,000 aged persons are being cared for in the 82 homes in New York and that another 6,000 are without such care while they remain on an ever-growing waiting list, had a salutary effect on the public mind which was reflected in the widespread comment these figures promoted in the press. That the Home for Old Men and Aged Couples, in advance of this report, should have taken steps not only to keep abreast of this problem, but to anticipate its future requirements, is a singular tribute to the institution itself and to those charged with its direction.

The home to which I refer has taken the lead in providing its residents with not only the necessaries of life but also with as many of the comforts and pleasures as possible. The warm and tender atmosphere of a real home has been preserved, the restrictive regulations common to most charitable institutions have been reduced to a minimum, and the peculiarities of old age are recognized and met with sympathetic and intelligent understanding.

I can conceive of no sadder fate than that of the old couple who have faced life's problems together and who have known no greater happiness than the joy of their mutual companionship being forced to separate at the time when they have no one but each other, the man to wither away in an institution for men and the woman to grieve out her heart in a home for women. Experience has shown that one or the other usually passes away after a few months of such separation. The Home for Old Men and Aged Couples is one of the few institutions in New York in which elderly couples may spend their last years together.

As this home has led, I firmly believe other institutions will follow. It is making a noble effort to obtain the $188,000 necessary to complete a fund of $700,000 required for the new building and endowment. A pathetically long waiting list makes it imperative that the fund be in hand by December 15. Contributions should be sent to the Equitable Trust Co. of New York, assistant treasurer, 11 Broad Street, New York City.

GEORGE W. WICKERSHAM.

NEW YORK, *November 30, 1928.*

Mr. OLIVER of Alabama. Mr. Chairman, I yield five minutes to the gentleman from Missouri [Mr. COMBS].

Mr. COMBS. Mr. Chairman and members of the committee, whatever there may be of impropriety in the remarks I am about to make, I accept full responsibility for, and if there be unwisdom in post-morteming, then the blame is upon my own shoulders. There is no man in the House for whom I have a deeper respect, or who has rendered an abler or more conscientious public service, than the gentleman from Kentucky [Mr. GILBERT], who addressed the House last Monday. In view of his devotion to the Democratic Party I can not resist the belief that he did himself a serious injustice in the speech which he made from the floor on that occasion. You know that Democrats have a sort of genius for fratricidal war. There is no Democrat who would not rather stick a knife between the ribs of a fellow Democrat than insert it in the back of our traditional foes. Those who are disgruntled as a result of the outcome of the last election have followed the fashion of taking a pot shot at the chairman of the Democratic National Committee as a vent for their spleen. While I have no belief that he needs defense, I ask the indulgence of the House for a brief survey of his activities, and the activities of the Democratic Party during the recent campaign.

For eight years we have been wobbling along without leadership and without any clearly visioned policy. For the first time in eight years the Democratic Party has had vitality, it has had aggressiveness, it has had that which makes for an intelligent and for an effective campaign leadership. I do not believe that any of us feel that the business man has any monopoly on virtue, or that a man taken from the ranks of business is necessarily holier or more pious than the man who comes from the ranks of politics, yet I do know that we shall be rendering this country a tremendous disservice if we penalize every business man who seeks to render an honorable and disinterested service by criticizing him for those acts which he undertakes solely in the public weal.

I do not know of any campaign which has been conducted on a higher moral level, which had in it less recrimination, mud slinging, and vilification than the campaign conducted under the direction of Chairman Raskob of the Democratic Party. I do not know of any campaign leadership in the history of our party which has been more positive in its convictions or which has presented as clear cut an issue as the one from which we have emerged. Whatever you may say of the leadership it certainly was both courageous and aggressive. Then, too, it supplied the Democratic Party with the sinews of war. [Applause.] I will tell you when a man puts up any money for the Democratic cause it is an act of high faith. The high moral tone was maintained even in the face of a campaign of abuse. I happen to be reasonably familiar with the way this campaign was conducted and being a low and raffish fellow myself I saw no reason why we should not with perfect propriety dispute the citizenship of the President elect, then candidate for office on the Republican ticket. It was, however, contrary to the wishes on the part of the leadership of our party to indulge in anything that might be construed as mud slinging or invoking of unfair tactics. If this be lack of political wisdom, if this be political blundering, we as a party should be proud of the fact that we have blundered at least in the right direction. I heard with profound regret one statement made by the gentleman from Kentucky which I am going to take opportunity to quote:

> Kentucky is overwhelmingly Protestant, is overwhelmingly dry, has the smallest per cent of aliens, and even her wets are opposed to wines and beer.

The gentleman can go back to Kentucky and assure his constituents that God still reigns in the heavens, but that He is a dry, Nordic, and strictly Protestant God; that there is no possibility we shall again be plagued with the same situation which arose in this campaign. I believe that any further reference to this troublesome question of religion is something that we should avoid as we would avoid the scurvy. Protestant myself, and the son of a Protestant minister, I feel I can say with perfect propriety that the Catholic Church in this campaign conducted itself with the utmost dignity and restraint. [Applause.]

I will go further and say I do not believe for a moment that the people of Kentucky voted against Governor Smith for the reasons the gentleman from Kentucky has assigned. I believe, while they may have opposed him on the grounds of prohibition, that they were not sufficiently weighed down by intolerance as to have voted on the other ground which he assigned. And may I say now, while I am on this subject, that if a few gentlemen, if a few evangelical clergy whooped themselves into gurgling hysteria, if a few lost their sense of proportion, then it is indubitably true that they are in no sense representative of the intelligent minority of the Protestants of this country, and the sooner we as a people and a party forget about the question of religion the better off we will be. Prohibition? Why should not we have it as an issue? What have we sacrificed by junking some of our obsolete shibboleths and making an issue of a question of vital public concern? For the last eight years our platforms have been an anemic reflection of the Republican platform. We have expounded the doctrine of State rights and have repudiated it whenever it inconveniences or embarrasses us. We invoke the doctrine of State rights to justify our opposition to the child labor laws, and yet when it comes to matters of other human rights we withhold it from proper application.

State rights! It has become the laughing stock of every intelligent and well-informed man and woman in this House to-day. We profess in lush and voluptuous terms to believe in the inviolability of the Constitution of the United States, and——

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. COMBS. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. COMBS. And yet, believing in the sanctity of the Constitution as it concerns the eighteenth amendment, we wink at the infraction of other amendments to the Constitution. We as a party have proclaimed our allegiance to the austere policy of not interfering with private business, contending that "that government is best which governs least"; and yet in the face of that profession we accept with rapture every crack-brained idea that is tagged with a humanitarian label and which puts the Government in business in competition with private enterprise.

What has this Congress done, and what has our party done, to redeem our professions and confirm the fundamental and time-honored policy that our Government shall abstain from interference in private business affairs?

What has our party lost in principle by urging new issues? We have changed its ambiguous policy with regard to the tariff. What heretofore has been equivocal has been made positive and clearly stated.

I do not believe that as a party we have surrendered a single important or authentic tenet of faith. Finally we had the courage to accept a candidate who stands for certain specific principles. Let us hope that out of the record there will come a new spirit to our party so that we will interpret in terms of a coherent legislative program our philosophy of government. So far as the Democratic Party is concerned, and so far as the man whom we sought to place in the White House is concerned, they need no defense in this House or in any other forum. They fought a hard and gallant fight. We Democrats, instead of backbiting and snarling and expressing our bitterness over the catastrophe, ought to take pride in the fact that it was a good fight, valiantly waged, and fought under gallant leaders. [Applause.]

Mr. BUSBY. Does the gentleman stand as the spokesman of the Democratic Party now?

The CHAIRMAN. The time of the gentleman from Missouri has again expired.

Mr. BUSBY. I understood you condemned the gentleman from Kentucky [Mr. GILBERT], who spoke the other day, and that you speak for the party.

Mr. COMBS. No; I am not so presumptious.

Mr. SHREVE. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. HOCH].

The CHAIRMAN. The gentleman from Kansas is recognized for five minutes.

Mr. HOCH. Mr. Chairman and ladies and gentlemen of the committee, the remarks of the gentleman who has just spoken suggest a very alluring subject, but I do not rise to indulge in any postelection diagnosis. I rise for the purpose of making a few additional observations upon what I think is a great national question, which I discussed briefly in this House a few days ago, namely, the basis of representation of the various States in this body.

Yesterday afternoon the gentleman from Wisconsin [Mr. SCHAFER] put into the RECORD a letter from a certain gentleman from New York in the effort, apparently, to inject into this question the wet and dry issue and the religious question. It seems to me unfortunate that there is scarcely a question discussed on this floor but some gentleman with a wet and dry complex thinks he must interject that question into the proceedings. I do not think that the apportionment question has anything to do with the wet and dry question or with the question of religion.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. HOCH. Yes.

Mr. SCHAFER. Nothing was said about the religious issue.

Mr. HOCH. The gentleman said this came from Protestant sources and stressed that point and then sought to bring in certain other organizations in this country in an effort to becloud the issue. So far as I know, there has been no propaganda of the sort suggested. I have no knowledge whatever as to the attitude of any of the organizations mentioned. I have no sympathy whatever with the injection of prohibition or religion into this question. But let us get at the merits, which some gentlemen seem to wish to avoid.

Let me discuss another phase of the question which I did not have the time the other day to go into fully. The question I raised is whether it is reasonable and right that any State in this Union should have an increase in membership in this House solely for the reason that there is within the boundary of that State a large body of aliens—that is, unnaturalized foreign born.

I raised the question whether it is reasonable or right that the vote of any State in this Union should be increased upon this floor upon any one of the great American questions that arise, including even a declaration of war, solely because of the fact that there is in that State a great body of aliens. I assert that by every test of logic, of governmental theory, and of sound Americanism the answer to that question must be in the negative.

I now propound a second inquiry, which I did not get time to discuss the other day. What is it? It is a question, I think, of equal or even greater importance. Is it reasonable, is it right, that the electoral vote of any State in this Union in the election of a President of the United States should be increased solely by the fact that there are within that State a great body of aliens; that is, unnaturalized foreign born? Of course, all who are familiar with our Constitution understand that the electoral vote of any State is determined by the total of the number of Senators and Members of the House from that State. Let me give you an illustration. Suppose in the recent election Herbert Hoover or Governor Smith had been elected by an electoral vote of one majority. What would that mean, so far as this proposition is concerned?

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. SHREVE. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. HOCH. It is difficult to cover this in such a short time. I called attention to the fact that upon the basis of the 1920 census a reapportionment, excluding aliens from the count, would mean a shifting of nine electoral votes from five States. Therefore if either Herbert Hoover or Governor Smith had been elected by a majority of one in the Electoral College, counting the votes of these five States, that would mean that if the aliens had been excluded from the basis of representation in any one of these five States it would have changed the presidential result.

Now, the gentleman from New York the other day said that this situation would cure itself, after denying that there was any situation that needed to be cured. I deny that proposition. The record of our history shows that it does not cure itself. This is no new question. Let me say in passing that I never heard of the proposal of the New York gentleman whose letter was inserted in the RECORD yesterday, and frankly am not interested in his contention that he is the originator of the idea. Of course, anyone familiar with American constitutional history knows that it is absurd for anyone now living to claim that he originated the idea that aliens should not be counted in making congressional apportionment. In introducing my resolution the other day I certainly made no such claim and had never heard of this New York gentleman's proposal. I am led to say this by the resentment I feel that anyone on either side should inject outside issues into a discussion of this sort. So much for that.

I was calling attention a few moments ago to the result that might happen in any presidential election by the inclusion of aliens in the count. I do not believe there will be any census

for many years, if ever, where the exclusion of the aliens would not shift at least 5 to 10 electoral votes from States where such votes are based on alien population to other States where they would be based on citizen population. And the shifting of just one electoral vote might mean a different presidential result, just as in the House it might mean a different decision on matters of vast importance.

I assert again on this second proposition that by every test of a sound theory of government and of American doctrine the election of a President of the United States should rest entirely upon a foundation of citizenship, and not upon a foundation of foreign or divided allegiance. [Applause.]

I am not at the moment discussing the matter of suffrage. Any student of the Constitution—and, of course, that includes us all—knows that the matter of suffrage, outside the limitations in the Constitution, principally the fourteenth, fifteenth, and nineteenth amendments, still resides within the individual States and is not a matter of Federal jurisdiction. But that is aside from what I am discussing. I am discussing the sole question of whether the residence of aliens in a State, not citizens either by birth or naturalization, should have such a far-reaching effect not only upon the membership of this body, but upon the vastly important matter of the election of a President of the United States.

Mr. BANKHEAD. Will the gentleman yield?

Mr. HOCH. Yes.

Mr. BANKHEAD. I am not assuming to discuss the merits of the gentleman's proposition, but what does he think about the provision in the Constitution which provide that—

> Representatives shall be apportioned among the several States which may be included within this Union, according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed.

Mr. HOCH. If the gentleman had been present the other day he would know that I discussed that and discussed it upon the basis of the constitutional amendment which I have offered in the House, which proposes to add to the very sentence the gentleman reads the two words "and aliens," so that aliens would be excluded as a basis of representation in this body.

Mr. BANKHEAD. I regret that I did not hear the gentleman's former statement.

The CHAIRMAN. The time of the gentleman from Kansas has again expired.

Mr. OLIVER of Alabama. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. HOCH. There are many angles to this proposition, and I do not want to impose upon the House too much. However, I want to call attention, as briefly as I can, to a matter of American history. When the Constitution was framed we had no uniform naturalization laws. The Constitution provided a grant of power to the Federal Government, to enact a uniform naturalization law.

The different States had a different basis of naturalization as well as a different basis of suffrage, and so it was impracticable at the time the Constitution was adopted to exclude aliens from the count. However, as the years went on the question assumed increased importance, and at the time of the adoption of the fourteenth amendment, following the Civil War, it is interesting to know that the same question I am presenting was debated upon the floor of this House. I have before me a speech made by Thaddeus Stevens, of Pennsylvania, on January 31, 1866. He, as the spokesman of the House Members on the Joint Committee on Reconstruction, which was appointed after the war, and was the committee from which came the fourteenth amendment and some other measures, discussed this question, and I want to read just a sentence or two from his statement. I now quote:

> If I have been rightly informed as to the number, there are from 15 to 20 Representatives in the Northern States founded upon those who are not citizens of the United States. In New York, I think, there are three or four Representatives founded upon the foreign population, three certainly. And so it is in Wisconsin, Iowa, and other Northern States.

Now, listen. He says further:

> Let us try to be practical. On the 5th day of December last I introduced a proposition to amend the Constitution founding representation upon the voting basis and excluding the foreign population, as the proposition of my friend from Ohio does. It was dear to my heart, for I have been gestating it for three months. [Laughter.] But when I came to consult the Committee of Fifteen and found that the States would not adopt it, I surrendered it.

In other words, he surrendered not as a matter of principle, but solely for the very practical reason that he found upon his committee of 15 he did not have enough votes to get the proposal out of the committee, all of which sounds very modern in the light of certain discussions we have had from time to time in this House.

I rest the proposition again solely upon this sound governmental doctrine, as I believe it to be: The basis of representation in the popular branch of Congress should be upon a basis of citizenship and not upon a basis of alien population.

Think of it! Here we have in the State of New York, by way of illustration, four electoral votes and in Massachusetts two votes cast upon the election of the President of the United States solely because there are several million aliens in those States. And so with the other States where the seven or eight million aliens in America principally reside. And yet the great body of American citizens in Alaska are without any vote at all in the Electoral College. We have the District of Columbia with its citizens, we have in the Territory of Hawaii, American citizens, and they have no voice in this House and no voice in the election of a President of the United States. But as a result of this thing which I do not believe can be squared by any sound governmental reasoning, we have nine votes in this House, nine votes in the Electoral College, based solely upon the existence of large alien populations in a few States. The 1930 census may show an even greater inconsistency.

Mr. LOZIER. Will the gentleman yield?

Mr. HOCH. I yield.

Mr. LOZIER. Is it not reasonable to assume that the members of the Constitutional Convention presumed there would be no large body of foreigners come to this country and remain for a long period of years without becoming citizens?

Mr. HOCH. I think it is fair to assume that, and as I said a moment ago, it is easy to understand when the new Government was being formed, when the States had all the various differences with reference to naturalization and there was no uniformity, that it was impracticable at that time to exclude the aliens from the count. [Applause.]

Mr. OLIVER of Alabama. Mr. Chairman, I yield five minutes to the gentleman from Georgia [Mr. LANKFORD].

Mr. LANKFORD. Mr. Chairman, to my mind there is danger of the passage of a so-called farm relief bill, which will be only a delusion and a snare. The farmers are entitled to a good bill. While we are about it let us pass a real farm relief measure. Will the so-called stabilization corporations set up under the proposed farm board render a real service to the farmers? Well, maybe so, but I doubt it. At Government expense and with Government aid it will add a few more gigantic speculators to the already overcrowded field of middlemen.

There is danger of the creation of great concerns which will buy larger amounts of farm products from the farmers at low prices and elevate prices, if at all, after most of the particular commodity is out of the hands of the real producers. The farmers' products eventually sell for a good price, but the enhancement is after they leave the hands of the farmer, and not enough of the real value of the products is received by the farmer.

I want farm relief for the individual farmer and for all farmers and not for those who possess the farmers' products after he has lost the ownership of them. The farmers need legislation which will enable each and all of them to hold their products off the market and sell them only when there is a reasonable demand for them at a fair price.

Let us pass a bill which will help the poorest of the poor as much as it will help the richest of the rich, and which will enable the small producer to hold his commodity until there is a good price and he shares in the benefits of the legislation. I brand as unfair and vicious any bill that provides for the establishment of a corporation or corporations with public funds to be used in exploiting the farmer of small means who is not able to hold his commodity for a better price.

I certainly hope there will be no serious effort to pass any such bill. Let us pass legislation so definite and helpful in its terms that each farmer who has for sale a bale of cotton, a few pounds of tobacco, or other commodity, will understand fully the exact financial benefit he is receiving therefrom.

It is clear to my mind that this can only be done to the fullest extent by the creation of a Government agency with power and capital to help all and every producer of cotton or tobacco, for instance, hold their commodities until there is a demand for them and then sell them in wholesale quantities at a fair price. The farmers will never get a fair price for their products as long as they are rushed on the market, as cotton and tobacco are sold in my section at the present time.

It is a tragedy for tobacco to be sold at a sacrifice, such as I saw so many times last summer, when it should have netted the

farmers, in many instances, more than twice what they received. This thing must stop and I, for one, will not approve or be content with a bill which is only a makeshift and does not render real personal relief to the producers of the country. The farmers' problem can be permanently solved by the Government offering to help them get a square deal, provided the farmers give a square deal to themselves and to the Government.

I have a bill pending which will provide for this sort of thing, and I propose making myself heard often and fully concerning this bill during the next few months.

We have just passed a bill to construct the great Boulder Canyon Dam across the Colorado River. Why? Simply because the people to be benefited are to do certain things in return, so as to make desirable the expenditure. Great irrigation projects are undertaken because it is made clear that the Government is to render a certain service and receive in return a commensurate service. All great enterprises, private and public, are undertaken for the same reason. Therefore, why not the Government say to the farmers, "We will make you independent, enable you to name within reason the price of the products of your toil, and place you on a parity with other businesses and enterprises, provided you will in return by proper organization control your production and marketing"?

My bill goes into detail as to how this can be done, and later I hope to discuss it more fully with individual Members, before the committees, and on the floor of the House. [Applause.]

Mr. SHREVE. Mr. Chairman and gentlemen of the committee, the subcommittee of the Committee on Appropriations which conducted the hearings on the bill now before you for your consideration (H. R. 15569) making appropriations for the Departments of State, Justice. and the judiciary, and the Departments of Commerce and Labor take pleasure in informing you that they have examined with unusual care this year the requirements of these four great departments for the fiscal year ending June 30, 1930, and the recommendations presented to you in the form of this bill represent the committee's best judgment. In this connection, I think it apropos at this time to state that the membership of the subcommittee handling this bill has been intact for the past six years, and, year after year, their interest, instead of flagging, has only increased, and I take this occasion to congratulate and compliment my confreres, Messrs. ACKERMAN, OLIVER of Alabama, TINKHAM, and GRIFFIN for the wonderful spirit of help, cooperation, and advice that has always been manifest during all these years of committee association.

In discussing the bill with you this afternoon, I shall dwell briefly on the figures for the bill as a whole and endeavor to give you a picture of the action taken by the committee in figures covering the four departments combined and then shall be glad to discuss the recommendations covering the more important features of each department separately.

The total appropriations under which these departments are now operating during this present fiscal year, 1929, is $90,573,935.89. The committee examined estimates for the next fiscal year amounting to $111,874,347.43, and the total of the bill recommended by this committee for the conduct of these departments for the next fiscal year, 1930, is $111,772,887.43. This represents a gross increase of $21,198,951.54 over the current year, and a decrease of $101,460 under the Budget estimates.

The total increase in the bill for 1930 over 1929, which, if I may repeat, is $21,198,951.54, standing by itself would be indicative of numerous increases of considerable importance, but, as a matter of fact, the amount is a net increase accounted for very largely by consideration of four factors, namely: The amendment to the classification act of 1923, passed at the last session (Welch Act), the special act increasing the pay of immigration inspectors, the presence in the bill of the largest of the increments of appropriation for the taking of the Fifteenth Census, and the elimination from the bill of a number of appropriations for the fiscal year 1929 which do not recur for the fiscal year 1930.

The increase in the bill for the four departments on account of the Welch Act is $2,754,374, and the increase on account of the pay of immigration inspectors is $244,620, making the bill carry on account of pay increases authorized at the last session, $2,998,994. The increase carried on account of the largest of the increments for the Fifteenth Census is $16,951,800. The nonrecurring 1929 items account for a decrease of $2,521,200. Considering these broad factors of increase or decrease between 1929 and 1930 and eliminating them from consideration, the net increase of 1930 over 1929 on all other items for the four departments is $3,776,357.54. I am inserting a table at this point of the RECORD which shows these factors of difference graphically set forth for each department and in the aggregate:

Department	Appropriations for 1929, including sums in deficiency act	Budget estimates, 1930	Amount recommended in bill for 1930	Increase (+) or decrease (−), bill compared with 1929 appropriations	Increase (+) or decrease (−), bill compared with 1930 Budget estimates
State	$14,325,003.39	$14,603,598.43	$14,600,478.43	+$275,475.04	−$3,120.00
Justice	26,808,062.50	28,103,570.00	27,937,370.00	+1,129,307.50	−166,200.00
Commerce	38,372,530.00	58,456,749.00	58,519,609.00	+20,147,079.00	+62,860.00
Labor	11,068,340.00	10,710,430.00	10,715,430.00	−352,910.00	+5,000.00
Total	90,573,935.89	111,874,347.43	111,772,887.43	+21,198,951.54	−101,460.00

REALLOCATION OF POSITIONS

The committee recommends in the bill a paragraph similar to that included in the Interior Department appropriation bill and approved by the House permitting transfers between bureau or office appropriations to meet increases of compensation resulting from the reallocation of positions by the Personnel Classification Board pursuant to the classification act of 1923. It frequently happens that after the annual appropriations have been made reallocations are approved by the board adding burdens to the appropriations that could not be foreseen at the time they were under preparation in the departments or under consideration in the Budget Bureau and in Congress, and the paragraph included in the bill is to enable the departments to meet such contingencies without upsetting the allocations of funds that were made prior to the certification of any such reallocations. The committee is of the opinion that that paragraph will be an effective aid in administration and at the same time is sufficiently safeguarded to prevent any possible abuse in its operation.

DEPARTMENT OF STATE

I shall give you now the changes and recommendations in connection with Title I of the bill, the Department of State.

We have recommended for the department a total of $14,600,478.43, which is an increase of $275,475.04 over the current appropriations and a decrease of $3,120 under the Budget estimates. In the appropriations for 1929 there were items aggregating the sum of $693,000 which will not be required in 1930 and which, therefore, have been omitted from the estimates for that year, thus leaving an amount equivalent to this sum for new items and increases in other items for 1930, which, together with the increase of $275,475.04 over the appropriations for 1929 gives an aggregate of $968,475.04 for new items and increases for the fiscal year 1930, of which $115,720 is due to the Welch Act.

Group	Appropriations, 1929 (including second deficiency act of 1928)	Budget estimates, 1930	Amount recommended for 1930	Increase (+) or decrease (−), bill compared with 1929 appropriations	Increase (+) or decrease (−), bill compared with 1930 Budget estimates
(1) Department in Washington, including passport bureaus	$1,462,365.00	$1,685,955.00	$1,692,835.00	+$230,470.00	+$6,880.00
(2) Foreign Service	9,374,600.00	9,214,640.00	9,214,640.00	−159,960.00	----------
(3) Foreign Service buildings and retirement funds	1,513,000.00	2,216,000.00	2,216,000.00	+703,000.00	----------
(4) International obligations	1,916,288.39	1,429,753.43	1,419,753.43	−496,534.96	−10,000.00
(5) Judicial	58,750.00	57,250.00	57,250.00	−1,500.00	----------
Total, regular annual appropriations	14,325,003.39	14,603,598.43	14,600,478.43	+275,475.04	−3,120.00
(6) Permanent and indefinite appropriations	141,233.00	141,233.00	141,233.00	----------	----------
Grand total	14,466,236.39	14,744,831.43	14,741,711.43	+275,475.04	−3,120.00

SALARIES, SECRETARY'S OFFICE

The committee has recommended a total of $1,340,000 for the salary appropriation under the Secretary's office, an increase of $194,240 over the current year and a decrease of $9,820 under the amount recommended in the Budget estimates. The increase in the salaries for the Department of State resulting from the Welch Act, exclusive of the fund "Immigration of

aliens," accounts for $108,220 of the increase carried in the bill. The balance is made up of new positions in the treaty division, index bureau, publications division, and stenographic section, and the replacement of two Foreign Service officers as chiefs of the Mexican affairs division and Latin American affairs division by civilian appointments.

The estimates contained a recommendation for the increase in the salary of the Undersecretary of State from $8,000 to $12,000 to conform to the action recommended in the Budget increasing the salaries of the Undersecretary of the Treasury, the Solicitor General, the Director of the Budget, and the Comptroller General, each from $10,000 to $12,000. General committee action having eliminated all these increases from $10,000 to $12,000, the two applicable to this bill are accordingly rejected. The committee, however, in the case of the Undersecretary of State recommends that the salary be increased from $8,000 to $10,000, to be comparable with the present salary paid to the other official positions with which it is classified in importance. The present incumbent of the position of Undersecretary of State is a recent appointee and under the operation of the restriction on promotions under the "average" provision he was necessarily placed at $8,000, the minimum salary of his grade, which carries rates of $8,000, $8,500, and $9,000. His salary at the present time is $1,000 lower than that of the other Assistant Secretaries of State, whom he outranks, and each of whom receives $9,000. The committee, therefore, feels that in real justice to the present situation the salary should be made $10,000 per annum.

CONTINGENT EXPENSES

The amount recommended for contingent expenses for the department in Washington is $70,705, an increase of $17,100 over the current year and an increase of $15,000 over the Budget estimates. The committee allowed $5,000 additional for a new automobile for the Secretary's office, to be immediately available, and the balance of the increase will be used in providing additional equipment, furniture and fixtures for the department, some additional desks, and the replacement of worn-out typewriters and equipment.

PRINTING AND BINDING

The appropriation for printing and binding recommended for 1930 is $210,000, an excess of $10,000 over the expenditures estimated for the current year, the major portion of which is to be expended in an endeavor to carry out the department's schedule in bringing its issues of Foreign Relations current. I might say right here that there are now several volumes in various stages of preparation, and the department is working upon a program which contemplates the publication of a total of 27 volumes by June 30, 1934, which will cover all of the diplomatic correspondence down to and including the year 1927.

PASSPORT BUREAUS

We have recommended for the passport agencies of the department in the United States a total of $72,130, an increase of $9,130 over the current year and an increase of $1,700 over the Budget estimates. Of this difference, $4,860 represents the increase caused by the Welch Act, $2,570 for additional personnel of two employees, and, in addition, $1,700 for electrifying the sealing press and the purchase of machines to be used in connection with affixing photographs to passports that will greatly help in eliminating fraudulent transfers of pictures on passports.

CONTINGENT EXPENSES, UNITED STATES CONSULATES

We have included in the bill the Budget estimate of $1,063,000 for contingent expenses at the United States consulates, an increase of $28,000 over the 1929 figure. Increases in rentals at some of the consulates abroad account for $7,000 of this increase. In order to protect passports and to prevent illegal entry into the United States of alien applicants for visas, it was found desirable that some means of marking passports and visas to prevent counterfeits and fraud should be adopted. A "protectograph" has been found which will serve this purpose, and a sufficient number to supply the various offices can be obtained at a cost approximating $9,500. The balance that goes to make up the increase of $28,000 will be used for furniture, furnishings, and labor-saving devices.

FOREIGN SERVICE BUILDINGS FUND

As the House will no doubt recall, Congress has appropriated, under section 4 of the act approved May 7, 1926, for the acquisition of buildings and grounds for the use of the Government in foreign countries a total of $2,435,000, from which expenditures have been made amounting to $1,661,569.20. The Foreign Service Buildings Commission has decided upon projects which will call for an expenditure during the fiscal year 1929 amounting to a total of $1,784,265.33. Thus, not only will all of the unexpended balance of existing appropriations be required, but the appropriation for expenditure during the present fiscal year of an additional sum of $1,010,834.53. The projects mentioned and others decided upon by the commission will require an expenditure of $1,425,815.78 during the fiscal year 1930. In addition to this amount the commission has practically decided upon one important project which will cost not less than $1,000,000 and have in contemplation the authorization of other projects costing approximately $2,200,000. It is expected that at its approaching meeting the commission will definitely decide upon the acquisition of the last-named properties. This will make outstanding projects to be financed amounting in all to $3,625,815. It will therefore be necessary, so that the work of the commission may continue unabated, to appropriate $2,000,000 for the next fiscal year. This amount has been recommended by the committee.

MIXED CLAIMS COMMISSION, UNITED STATES AND GERMANY, AND UNITED STATES, AUSTRIA AND HUNGARY

The appropriation for the current year for this commission is $178,762. The amount in the bill for 1930 is $132,927, a decrease of $45,835. There has been presented to the German Claims Commission a total of 12,425 claims, aggregating approximately $1,479,000,000. Of this number all of the claims have been disposed of except 203. Of these 203, the decision on 57 will determine the remainder of them, work on which it is expected will be finished by the end of this fiscal year. With reference to the Austrian and Hungarian claims, known as the tripartite claims, there have been presented 1,631 cases, of which number all have been disposed of except 149, and it is expected that these will be settled by the end of the present fiscal year. In the settlement of war claims act, passed at the last session, the President was asked to negotiate with Germany for an extension of the commission's jurisdiction to include the consideration of claims that were filed after April 9, 1923, which, under the original agreement, was the date when all claims had to be filed. The President has submitted the proposition to the German Government, which has taken it under consideration. While nothing definite is known as yet it is anticipated that the German Government will acquiesce in the extension of the jurisdiction of the commission to these additional cases, of which there are 5,889. The estimate approved by the committee is to continue the work of the commission for another year in the event of the presentation to it of these additional cases.

DEPARTMENT OF JUSTICE

The total appropriation we have recommended for the Department of Justice and the judiciary is $27,937,370. This is a reduction of $166,200 under the Budget estimates. The current appropriations of the department total $26,808,062.50. The recommendations which I have mentioned, therefore, are $1,136,307.50 more for 1930 than for 1929. The increases allowed under the application of the Welch Act account for $771,774 of this increase. In addition to the Welch Act salary increase, there is also an increased amount of $65,500 for salaries of judges. The balance of the department's larger increases are $107,500 in the item for marshals and their deputies, $86,000 in the fund for district attorneys, $93,400 for regular assistants to district attorneys, $123,000 for clerks of courts, and a total increase for the different Federal penal and correctional institutions of $395,321.

Object	Appropriations, 1929	Budget estimates, 1930	Amount recommended in the bill, 1929	Increase (+) or decrease (−), bill compared with 1929 appropriations	Increase (+) or decrease (−), bill compared with 1930 Budget estimates
Department of Justice proper	$4,443,050.00	$4,684,790.00	$4,675,590.00	+$232,540.00	−$9,200.00
Judicial	16,839,702.50	17,441,149.00	17,341,149.00	+501,446.50	−100,000.00
Penal and correctional institutions	5,525,310.00	5,977,631.00	5,920,631.00	+395,321.00	−57,000.00
Total	26,808,062.50	28,103,570.00	27,937,370.00	+1,129,307.50	−166,200.00

SALARIES, ATTORNEY GENERAL'S OFFICE

In the office of the Attorney General, or, I might say, for the salary roll covering the majority of positions in the Department of Justice in Washington for legal work, we have recommended a total of $1,228,300. This is an increase of $121,400 over the current figure and a decrease of $9,200 under the 1930 Budget estimate. The increase for 1930 is due in the main to Welch Act increases, amounting to $97,000, and the transfer of two positions from an appropriation heretofore carried separately entitled "Enforcement of acts to regulate commerce." In addition there is an increase in positions of two attorneys and one stenographer to aid in increased taxation work.

PROTECTING INTERESTS OF THE UNITED STATES UNDER SETTLEMENT OF WAR CLAIMS ACT OF 1928

We have recommended $75,000 for protecting the interests of the United States which work grew out of the settlement of the war claims act of 1928. This act provided that as to certain German ships which had been taken over, and radio stations, and for certain situations with reference to patents, an arbiter should be appointed who should make certain determinations and awards. There were 1,181 claims filed before the arbiter; 1,081 being patent claims, involving 6,201 patents, and 440 trade-marks. This work of presenting the United States' side of the claims is now progressing, and it is estimated by the legal division in charge of the ship litigation and also the division in charge of the patent litigation, that it can not be completed prior to January 1, 1930, and possibly will continue for several months after that date. The estimate is based upon the theory that it will be necessary to continue substantially a force of 16 attorneys and 4 stenographers for a period of at least six months during the fiscal year 1930. The appropriation has been made immediately available so that it may be used to reimburse the regular appropriations for the fiscal year 1929 to the extent that they have been used for this claim work. We have inserted a clause in the bill limiting the salary of any individual paid out of this found to $9,000.

PENAL AND CORRECTIONAL INSTITUTIONS

As the House no doubt knows, the Federal Government, under the Department of Justice, has six penal and correctional institutions; namely, the penitentiaries at Leavenworth, Atlanta, and McNeil Island, the Federal Industrial Institution for Women at Alderson, W. Va., the United States Industrial Reformatory at Chillicothe, Ohio, and the National Training School for Boys at Washington, D. C. The total we have recommended for the conduct of these institutions (including also the probation system, support of prisoners in other than Federal institutions, and the inspection of prisons and prisoners) amounts in the aggregate to $5,920,631. This is an increase over the current year of $395,321, and is accounted for in the main by increased personnel and maintenance costs due to the steadily increasing populations at these different places of incarceration.

DEPARTMENT OF COMMERCE

We have recommended for the Department of Commerce for the fiscal year 1930 a total of $58,519,609, an increase of $20,147,079 over the current year and an increase of $62,860 over the Budget estimates. There is recommended $19,000,000 for the largest increment of the appropriations for the taking of the Fifteenth Census, which represents an increase of $16,951,800 over the current census appropriations. The increase involved on account of the Welch Act is $1,343,760. The 1929 appropriations contained items totaling $512,200, which do not recur for 1930. Taking into consideration the increase on account of the Welch Act, the Fifteenth Census, and the decrease on nonrecurring items, the remainder of the items for the department show a net increase of $2,363,719, which is largely accounted for by additions under the aeronautics branch, the Bureau of Foreign and Domestic Commerce, and the Bureau of Fisheries.

Bureau	Appropriations, 1929	Budget estimates, 1930	Amount recommended in bill for 1930	Increase (+) or decrease (−), bill compared with 1929 appropriations	Increase (+) or decrease (−), bill compared with 1930 Budget estimates
Secretary's office	$7,181,950	$9,354,460	$9,320,820	+$2,138,870	−$33,640
Foreign and Domestic Commerce	4,257,357	4,436,423	4,524,923	+267,566	+88,500
Census	2,048,200	19,000,000	19,000,000	+16,951,800	
Steamboat Inspection	1,114,060	1,187,220	1,187,220	+73,160	
Navigation	330,880	352,040	352,040	+21,160	
Standards	2,246,055	2,506,746	2,506,746	+260,691	
Lighthouses	11,145,250	11,349,980	11,349,980	+204,730	
Coast and Geodetic	2,404,535	2,515,860	2,515,860	+111,325	
Fisheries	2,010,748	2,170,550	2,178,550	+167,802	+8,000
Patent	3,091,415	3,333,800	3,333,800	+242,385	
Mines	2,542,080	2,249,670	2,249,670	−292,410	
Total	38,372,530	58,456,749	58,519,609	+20,147,079	+62,860

CONTINGENT AND MISCELLANEOUS EXPENSES

I call your attention to the fact that for the department's contingent and miscellaneous expense fund the bill carries a total of $290,000, which, when there is taken into account a transfer of $33,100 formerly carried in this lump-sum amount to the Bureau of the Census's regular $19,000,000, represents an increase of just the amount of the transfer. This increase has been allocated generally to the different bureaus in the department.

PRINTING AND BINDING

The same I might say is true of the printing and binding item, where a transfer of $114,000 has been made and the fund reduced by only $100,000, showing a net increase to the department of $14,000.

THE AERONAUTICS BRANCH

I know the House will be very much interested in the 1930 program for commercial airways and the wonderful work that has been done and is contemplated by the department along this line. Since the establishment of the aeronautics branch of the department under the air commerce act of 1926 appropriations therefor have been made in two separate funds, "Aircraft in commerce" and "Air navigation facilities." I shall explain the program under each one of these heads separately. First, for aircraft in commerce the appropriation recommended of $935,000 covers expenses of administration and the cost of the following special work required by the air commerce act:

1. The inspection and licensing of aircraft; the examination and licensing of pilots and mechanics; the enforcement of the air-traffic rules; the inspection and rating of airports; and other regulatory functions.

2. The dissemination of information relative to commercial aeronautics; the promotion of trade; and the encouragement of local governments in the establishment of air ports.

3. Research and experimentation looking to the improvement of materials used in the construction of airplanes; the testing of new types of aircraft engines and propellers.

4. The mapping of civil airways.

The amount allowed by us for 1930 for these activities is an increase over the current year of $160,500.

Activity	1929 appropriations	1930 Budget estimates	1930 committee recommendations	Increase (+) or decrease (−), recommendations over appropriations	Increase (+) or decrease (−), recommendations under estimates
Administration	$58,400	$63,880	$63,880	+$5,480	
Air regulations	476,200	705,730	672,090	+195,890	−$33,640
Air information	41,500	44,380	44,380	+2,280	
Airway mapping (Coast and Geodetic Survey)	18,400	21,200	21,200	+2,280	
Research (Bureau of Standards)	125,000	60,000	60,000	[1] −65,000	
Purchase of airplanes	55,000	55,000	55,000		
Welch Act increases		18,450	18,450	+18,450	
	774,500	968,640	935,000	+160,500	−33,640

[1] This is not a decrease but a transfer of this amount to the fund "Air navigational facilities."

This increase is distributed as follows:

Administration: There has been recommended under this heading an increase of $5,480. This is for additional office employees, made necessary by the large increase in the work of the Washington office. The additional employees will be assigned to the administrative section, which has charge of the mail and files, accounts, and other similar routine office matters.

Air regulations division: An increase of $195,890 has been carried in the bill over 1929. This is intended to cover the personnel and equipment to establish a licensing unit on the west coast; the salaries of 20 field clerks for assignment to headquarters of inspection districts, and rent and equipment of field district headquarters offices; salaries and traveling expenses of additional airplane, engine, and factory inspectors, maintenance and operating expenses of additional airplanes requested; purchase of special flying equipment, and some additional clerical help in Washington. The committee decreased the Budget estimate somewhat, it being of the opinion that the estimate for additional inspectors was somewhat excessive.

Airway mapping section: The increase of $2,800 is for the salary of an additional topographic draftsman.

Aeronautical research division: The apparent decrease of $65,000 is due to the fact that items for research in connection with radio communication, lighting, and other aids to air navigation have been estimated for under the heading "Air navigation facilities."

AIR NAVIGATION FACILITIES

The second appropriation which I wish to discuss briefly is to cover the actual setting up, establishing, and maintaining of the civil airways, equipped with intermediate landing fields, boundary and beacon lights, telegraphic, telephonic, and radio communications, and weather reporting service. We have rec-

ommended for this purpose for 1930 a total of $5,458,620, an increase over 1929 of $798,770. The recommendation I have just called your attention to will maintain 11,500 miles of airways at $195 a mile and 44 radio stations at $12,000 per annum, and in addition will construct 3,900 miles of additional airways at $315 a mile and construct 19 additional radio stations at $24,000 each.

Expenditures	Fiscal year 1929	Fiscal year 1930
Administration:		
Salaries, departmental service	$65,360	$72,540
Salaries, field service	272,750	275,000
Travel and subsistence	162,700	170,000
Office expenses and supplies	28,700	34,000
Operation of airplanes	75,000	21,643
Total, administration	604,510	573,183
Maintenance:		
Lighted airways—		
Fiscal year 1929, 7,512 miles, at $195 per mile	1,464,840	
Fiscal year 1930, 11,500 miles, at $195 per mile		2,242,500
Radio stations—		
Fiscal year 1929, 24 radio stations, at $12,000 per annum	288,000	
Fiscal year 1930, 44 radio stations, at $12,000 per annum		528,000
Total maintenance	1,752,840	2,770,500
Construction and maintenance on additional airways:		
Fiscal year 1929, construction of 4,000 miles, at $315 per mile	1,260,000	
Maintenance, 4,000 miles, 6.5 months, at $195 per mile	422,500	
Fiscal year 1930, construction of 3,900 miles, at $315 per mile		1,228,500
Maintenance, 3,900 miles, 4 months, at $195 per mile		285,187
Radiobeacon and communication stations, construction and maintenance:		
Fiscal year 1929, construction of 20 stations, at $24,000 each	480,000	
Maintenance of 20 stations for 7 months, at $12,000 per annum	140,000	
Fiscal year 1930, construction of 19 stations, at $24,000 each		456,000
Maintenance of 19 stations for 5 months, at $12,000 per annum		95,000
Total, new construction and maintenance	2,302,500	2,064,687
Research and experimental work:		
Salaries, departmental service		10,000
Salaries, field service		15,000
Travel and subsistence		10,000
Purchase of supplies and equipment		15,250
Total, research and experimental		50,250
Grand total	4,659,850	5,458,620

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

We increased the Budget figures in several instances for the Bureau of Foreign and Domestic Commerce by an amount totaling $88,500. This gives the bureau, including a $20,000 increase contained in the Budget, a net increase over 1929 of $108,500, which is exclusive of the Welch Act increases. The increases are as follows:

Promoting commerce in South America	$25,000
District offices	50,000
Export industries	3,500
Directory of foreign buyers	30,000

CENSUS BUREAU

I have called attention to the fact before, I believe, that we are carrying $19,000,000 in the bill for the Census Bureau as the first increment of a 3-year program for the taking of the Fifteenth Decennial Census. This census, as authorized in legislation that is pending, is to cost in the aggregate $39,940,000. I might say right here that the last decennial census that was taken, as most of us know, was by far from being as accurate as it should have been, due in the main to lack of the proper amount of appropriations. The director of the bureau has assured this committee, however, that if the full amount of $39,940,000 is appropriated over a 3-year period this census will be efficiently taken in every respect, and we have confidence in this statement.

BUREAU OF MINES

We have included in the bill for the Bureau of Mines a total of $2,249,670, which is an increase of some $148,000 for 1930. While some of this is absorbed by the Welch Act increases, nominal increases have been allowed in four or five of their funds.

HELIUM PLANTS

As the House no doubt is well aware, this committee started in on a 3-year helium program two years ago in conjunction with legislation that was then passed for the conservation and processing of helium. The Fort Worth field was fast petering out and it became necessary to acquire other helium-yielding gas lands. This was done at what is known as the Cliffside structure, Texas, and negotiations have been under way and will be completed whereby the Government will obtain a vast acreage of gas land containing an enormous quantity of 1.75 helium-bearing gas. A plant has been built at Soncy, Tex., and on January 10, 1929, will start efficient operation. I am glad to say to the House that we have been reliably informed that this will settle the helium question for a long time in the future. It was estimated that the original 3-year program was to cost $2,060,000. We have appropriated all but about $500,000 of this, and, while this amount is not contained in this bill, contract authorization is included, and the bureau's representatives can go ahead and tie up the balance of this structure by contract and, when necessary, the money will be appropriated.

OTHER BUREAUS

With the exception of the Bureau of Fisheries, which we increased over the Budget estimates by $8,000, the rest of the department's bureaus remain about the same as the current year with few exceptions, exclusive of the Welch Act increases.

DEPARTMENT OF LABOR

We have recommended for the Department of Labor for the fiscal year 1930 a total of $10,724,430, an increase of $5,000 over the Budget estimates submitted for the committee's consideration. Comparing the 1930 recommendations to the current appropriations there is a gross decrease for 1930 under 1929 of $352,910. When there is taken into consideration, however, the total of $1,316 which is contained in the current appropriations, covering the amount of $208,000 for construction and repairs to immigration stations and $1,108 for the welfare and hygiene of maternity and infancy, no estimate for which has been submitted for 1930 and hence should not be considered as an amount to reflect a comparison between the two fiscal years, a net increase is shown for the department for 1930 over 1929. The total increases in the recommendations due to increases brought about by the Welch Salary Act and immigration inspectors' pay act, which I think I have already called the attention of the Membership of the House to, is $767,800. Combining this amount with the gross reduction of $352,910 and comparing the total with the amount of $1,316,000 for appropriations for 1929 which do not recur for 1930, a net increase for the department of $195,290 is shown.

Mr. SNELL. I want to ask the gentleman a few questions, but perhaps I had better wait until he has finished his general statement.

Mr. SHREVE. No; I yield to the gentleman.

Mr. SNELL. I am especially interested in the appropriation for the Immigration Service. I notice in the present bill there is an increase of $805,000, but in looking up the report I find this is practically all taken up with increases in wages under the Welch Act and under other provisions, and there is only a small amount provided for added immigration inspectors, I am informed by the department that the committee has recommended an appropriation for about 75 additional inspectors.

Mr. SHREVE. I will state to the gentleman just what we have recommended.

The amount we have included for regulating immigration, including the border patrol, is $7,915,000, an increase over the current year of $805,000. Of this increase $585,000 is due to salary promotions, leaving a balance of $220,000 as a net increase for this purpose for 1930. This will be divided equally between the regular immigration and deportation work and the border patrol, making available $6,046,560 for immigration and deportation work and $1,868,440 for the border patrol.

This $220,000 is about all they can absorb with their present machinery. There is only a certain amount of work that can be done.

Mr. SNELL. That is just the point I want to inquire about, Mr. Chairman, and I think it is very important. They inform me at the Department of Labor that all the new men provided for under this act will be assigned to two or three new bridges and to one or two new roads that are direct thoroughfares and will be opened up during the coming year, and there will be practically no new men to be provided for the northern border. The situation there is this: During the last few years, with the opening up of the direct roads to Montreal and Ottawa, there is a tremendous amount of travel. There came in through Rouses Point last year 325,000 and through Trout River nearly as many. We have practically no provision for looking after or inspecting this immigration. The man at Trout River called me up one day last summer and said he had been working for

18 hours a day until he was played out and that there were 500 cars there that day, and asked me what he should do about them. I told him that I had no authority over him, but that I would let them go through, and that is what they are doing.

Our country is being flooded with Chinese who are coming in across the border because there is no one there to look after the work, and our jails are being filled with them.

There is one thing we really ought to do, and that is provide enough ordinary inspectors there to look after the immigration that is coming across the northern border at the present time, or admit that we are paying no attention to enforcing the law in that section.

The increase carried in this bill really amounts to nothing. The department says with the increase allowed in the present bill this year they do not see how they can get any additional men. I think it is unfair to the service and to the people who use the service.

Mr. SHREVE. I am quite familiar with the situation.

Mr. ACKERMAN. If the gentleman will yield, over the telephone we have been informed that the amount appropriated is for 75 immigration inspectors, 35 clerks, and $35,000 for administration expenses, making a net increase of $240,000 over the appropriation for 1929, exclusive of the Welch Act.

Mr. SNELL. That is just as I understand it, and 75 inspectors will be taken up by the new bridge at Detroit and new bridge at Brownsville, Tex., and one or two new roads. There is no provision for additional men on the New York border, where there is a tremendous travel every day during the summer season.

Mr. SHREVE. It is a question of the allocation of the men.

Mr. SNELL. If they do not have them they can not put them on this border.

Mr. SHREVE. They do not have to put them all in these two places.

Mr. SNELL. They say that they have to man these two new bridges. They say that the new bridges and the new roads will take practically all of these inspectors that will be allowed under this appropriation bill. We do not see where we are to get any new men. We ought to appropriate enough so that they can take care of the situation, and it should be done now in this bill.

Mr. SHREVE. I would like to ask the chairman what he would suggest.

Mr. SNELL. We ought to have $100,000 additional to take care of the border places, some on the southern and some on the northern boundary. The Labor Department asked for it.

Mr. SHREVE. No; the Labor Department gave us to understand that they are getting along pretty well as it is.

Mr. SNELL. They tell me that they asked for this. Of course, I take the word of the gentleman from Pennsylvania, but we can not fool with this matter any longer—we are going to have more inspectors or we are going to let the people come through.

Mr. OLIVER of Alabama. I think the gentleman from New York is correct in his statement that the Labor Department did ask for an amount that would have justified the employment of many more inspectors. Assistant Secretary White stated that over and above the amount allowed by the Bureau of the Budget an appropriation of approximately $585,000 had been estimated for. Mr. White further explained that in making up that estimate he thought it was well they should have $300,000 to meet emergencies, even though it might not be used. So I would say the difference between the amount allowed and the amount estimated for as actually needed was approximately $300,000.

Mr. SNELL. That is just as I understand it. Here is a cement road leading to Montreal, and one man on there for 24 hours or 18 hours service, and 500 automobiles a day coming through. Now that is absolutely senseless. We either ought to put enough men on there or say, "Come along, boys, and go through." They understand that they can get through the northern border because it is not well guarded.

Mr. SHREVE. The gentleman says $100,000, but would not he limit the amount to something less?

Mr. SNELL. We need not put them all there. I imagine that 15 or 20 extra men would be sufficient.

Mr. SHREVE. That would amount to about $50,000. Would the gentleman be satisfied with $50,000?

Mr. SNELL. Yes; I do not want to be unreasonable, but I want the travel and the public accommodated.

Mr. SHREVE. I am very familiar with the situation.

Mr. SNELL. Well, that would be satisfactory to me.

Mr. ARENTZ. Will the gentleman yield?

Mr. SHREVE. Yes.

Mr. ARENTZ. I think it would be well if the committee took under consideration proper housing facilities for automobile passengers going back and forth from Canada.

Mr. SHREVE. The gentleman is right.

Mr. ARENTZ. Take the matter of the customs port just above Seattle. They take the men, women, and children off these automobiles and put them on the sidewalk in the rain, with absolutely no place to go for shelter. It seems to me that this committee ought to consider the advisability of providing some quarters where the men and women and children could be examined by the customs officials instead of exposing them to the elements and compelling American citizens and others to open their luggage at the curbs.

Mr. SHREVE. That is very true, but the same argument might apply to many places. I myself have seen wagons draw up in front of these offices and men and women have to get out in the rain, and it is a shame, but we can not do these things all at once; it takes a little time. Improvements are being made all of the time. We have increased the appropriation more than a million dollars for the border control. We are getting along just as fast as possible.

Mr. ARENTZ. But you could pick out at the prominent points some building or residence that could be rented, next to the customhouse, and let that serve as a place where these people may be examined.

Mr. SHREVE. Yes; that might be so.

EMPLOYMENT SERVICE

We increased the United States Employment Service $5,000 over the Budget estimate, bringing their total increase over the current year to about $17,000, and making available for this service for 1930, $217,000. In the application of the Welch Act the service lost about $5,000, and the committee felt justified in restoring this amount.

Mr. CRISP. Mr. Chairman, will the gentleman yield?

Mr. SHREVE. Yes.

Mr. CRISP. The gentleman stated that some increase has been made for the Bureau of Foreign and Domestic Commerce, for increasing its agents abroad. Can the gentleman tell me how many new agents the increase contemplates?

Mr. SHREVE. I can not say. We have given them somewhere about $280,000 increase this year.

Mr. NEWTON. Mr. Chairman, will the gentleman yield?

Mr. SHREVE. Yes.

Mr. NEWTON. I want to ask the gentleman something about the appropriations under the Labor Department for deportation. Information has come to me that during the past year men have been arrested and seized and are ready for deportation, but that because of lack of funds the department has had to release them and has not deported them.

Mr. SHREVE. That is the same old story. Last year we were told that there was just enough money to keep the men who have charge of that in operation for eight or nine months in the year. We very promptly gave them enough money to keep that organization working all of the time.

That means that they are deporting about a thousand a month, from twelve to fourteen thousand a year. That organization is not constructed as a unit so that it can carry on any greater amount of work. They are in fact doing all that they can with that organization now. If you want to go out and set up an entire new unit, it will take time to do it. I have heard no complaint about deportations during the last year since we gave them money to work the whole year round.

Mr. NEWTON. I am sure the gentleman will agree with me that if there are men arrested and seized and kept in custody, who are subject to deportation, and who then are released and not deported, because of lack of funds, that there is something wrong.

Mr. SHREVE. Absolutely, but this is the first that I have heard of any such condition. Nothing came out in the hearings of that nature.

Mr. NEWTON. The department made no statement of anything of that kind to the gentleman's committee?

Mr. SHREVE. No.

Mr. NEWTON. I thought that the gentleman would agree with me that if that was the case, it should be remedied.

Mr. SHREVE. We want to appropriate all of the money that is necessary to carry on this work and do it as satisfactorily as it can be done.

Mr. NEWTON. There ought to be some way so that if they get to running near the end of their funds, they can at least deport those whom they have spent the money on, and seized.

Mr. SHREVE. Congress will be in session soon again.

Mr. BOX. Mr. Chairman, will the gentleman yield?

Mr. SHREVE. Yes.

Mr. BOX. In connection with the question just propounded by the gentleman from Minnesota [Mr. NEWTON], I note with interest what the chairman of the subcommittee says, and I am not engaging in any criticism of the subcommittee. However, I think the facts are as stated by the gentleman from Minnesota [Mr. NEWTON]. I note what the gentleman in charge of the bill says to the effect that the appropriations are sufficient to take care of the present organization. My information is that the law as now existing would authorize an increase of this organization, and that this organization is not adequate; but that the funds provided by the committee are sufficient to take care of the present organization.

Mr. SHREVE. That is correct.

Mr. BOX. But do not authorize an increase. The chairman of the subcommittee will remember that some of us presented amendments trying to increase this appropriation a year ago, and the gentleman and his associates were successful in making the argument that he makes now. Does the information coming into the gentleman's committee from the Labor Department indicate that they have all of the men they need or that they have all of the funds that they need for the present force?

Mr. SHREVE. The latter statement is nearer correct; they have all of the funds necessary to take care of their present force. Of course, we realize that they could use more men, but there is not a department in Washington that could not use more men. We must equalize things. We are doing the best we can, but we hope that between now and a year from now we may make a further study of this situation so that when the new Congress comes in next fall we can approach this problem intelligently and constructively and carry out a program that will meet with the approval of everyone.

Mr. BOX. When the question was discussed on the presentation of this item in the appropriation bill before, it was suggested that the Committee on Immigration and Naturalization ought to report legislation providing for any additional organization. That should be done. I have introduced and sought to have the Committee on Immigration and Naturalization report such legislation. The passage of such a bill would be a legislative mandate to the Labor Department to make the organization adequate, and to the Appropriations Committee to report the appropriations necessary to the maintenance and work of an organization which would better enforce the immigration and deportation laws. I would be gratified if the committee would report and the House would pass such a measure.

My studies have convinced me that the law now authorizes the increase of this force, and my opinion, gathered as carefully as I could gather it, indicates there are a great many cases of men who ought to be deported, who have to be deported, but are not deported because they have not the amount of money—that is, they have the money for the number of men they have, but not enough men to carry it on.

Mr. SHREVE. The chairman of the subcommittee will be pleased to go over the situation with the gentleman some time again and look up the laws.

Mr. STOBBS. Will the gentleman yield?

Mr. SHREVE. I will.

Mr. STOBBS. I was quite interested in talking at times with members of the Department of Justice and the Department of State, and the question has come up whether or not they have opportunity of coming before the subcommittee of the Committee on Appropriations and saying what they needed, or whether they are allowed only to state what the Director of the Budget thought they should be allowed to have.

Mr. SHREVE. We go over it rather carefully with the information we have, and if the gentleman will look at page 13 of the Department of State hearings he will find it all set out, what the Budget allowed, and so forth, and what they think they can do it for; there is nothing concealed.

Mr. STOBBS. I do not say as far as the gentleman is concerned or the subcommittee that there is anything concealed. Take the Department of Justice with which I am more or less familiar. The question comes up, Do the Committee on Appropriations ask them what they feel they want or do they get what the Director of the Budget tells them he thinks they are entitled to?

Mr. SHREVE. I will say they are getting just exactly what the Committee on Appropriations think they ought to have, which may be higher or less than the Budget.

Mr. STOBBS. Do they talk perfectly frankly; do they ask for more than the Budget Director allows?

Mr. SHREVE. They talk very frankly. I think every man tells the exact truth, and the truth is what we are seeking.

Mr. STOBBS. Mr. Olds, the former Undersecretary of the State Department, before he severed connection with the State Department, in a statement made before the Foreign Relations Committee, said that the State Department submitted itself to the Budget Director.

Mr. SHREVE. It is all in the book.

Mr. STOBBS. Whatever the Budget Director approves then, that is the only thing they ask for?

Mr. SHREVE. We will get all the information; it is easy to find out.

Mr. STOBBS. The gentleman says this informal talk before the gentleman's committee does not preclude an additional estimate because of the disapproval of the Budget Director. That does not amount to anything.

Mr. SHREVE. No; we simply want to get the facts, and they give them.

Mr. STOBBS. My point is, would the Budget Director approve or disapprove?

Mr. SHREVE. The Budget is the leveling institution pointing out how much money we can spend in the course of the year. We try to conform in reference to the money that is available for these definite propositions, and by so doing the country has saved millions of dollars.

Mr. MOORE of Virginia. Will the gentleman yield right there? I do not understand the report of the Bureau of the Budget presented at the beginning of the session of Congress includes the estimates made by the departments. It only includes the estimates presented to Congress by the Budget, that is all.

Mr. SHREVE. I think that is correct, but the various departments have information which we try to obtain in order to come to a conclusion.

Mr. MOORE of Virginia. I quite understand; but the report does not include the estimates put up to the Bureau of the Budget by the various departments?

Mr. SHREVE. My recollection is it does not.

Mr. OLIVER of Alabama. The committee handling these appropriations has all of that information, all of which is included except two matters in which the House may be interested. I have just called Mr. SNELL'S attention to the fact in reference to immigration which you will find in reference to the State Department. You will find that was brought out also when the Secretary was before us. As we read these items in the bill under the 5-minute rule, if Members are interested, the members of the committee will be glad to give that information to Members inquiring.

Mr. MOORE of Virginia. I understand that. But the report of the Bureau of the Budget which comes in here in a large volume does not include the estimates made by the departments. I think, as a supporter of the Budget plan, it would be well to give to the House a full picture, including the estimates made by the departments.

Mr. SHREVE. Does the gentleman think that would throw very much light on the situation? Remembering the old way when bills used to come in largely padded up in the hope by those who prepared the estimates that they would, even after reduction, get what they really required, does the gentleman think that would be a good idea?

Mr. MOORE of Virginia. Yes. I do not think the departments do that now. I think they estimate now only according to their necessities. I think if we adopted the plan suggested we would avoid such controversies as we have had here in the last 24 hours by having a full showing of what was estimated by the particular departments whose items are being considered.

Mr. SHREVE. I can see no objection.

Mr. OLIVER of Alabama. Mr. Chairman, I had promised the gentleman of New York [Mr. BLACK] some time, but he was not here at the moment. I waive that time, and with the permission of the gentleman from Pennsylvania I would like to extend to him 10 minutes.

Mr. SHREVE. All right.

Mr. OLIVER of Alabama. Mr. Chairman, I yield to the gentleman 10 minutes.

The CHAIRMAN. The gentleman from New York is recognized for 10 minutes.

Mr. BLACK of New York. Mr. Chairman, I ask unanimous consent to extend as part of my remarks the true version of the song made familiar to the country in the last campaign, entitled "The Sidewalks of New York."

Mr. TILSON. May I inquire if it is a new publication?

Mr. BLACK of New York. No; it is the second national anthem, the first being the Star-Spangled Banner.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BLACK of New York. Commenting on the reapportionment bill a Kansas Democrat said that under the new apportionment bill Kansas would lose one Congressman, and that

Kansas was entitled to a greater reduction than that. After the gentleman from Kansas [Mr. HOCH] made his remarks I thought I would look in a rather superficial fashion into the question of the alien population in the United States. I find that the States having the greatest alien population are mostly Republican States, so that the Democratic Southern States under the proposed amendment to the apportionment will gain representation, while other States will lose it.

Mr. BACON. That shows that the gentleman from Kansas is not playing politics.

Mr. BLACK of New York. No; neither am I. If the gentleman coming from Long Island, the port of entry of the bootleggers, the first district of New York, is reconciled to the speech of the gentleman from Kansas, I for one am not; because I am tired of hearing these attacks upon our State. The fellows from back in the woods make a practice of getting up and pointing at New York as representing everything that is terrible.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield there?

Mr. BLACK of New York. Yes.

Mr. MOORE of Virginia. Is the gentleman referring to the gentleman from New York [Mr. BACON] as coming from the backwoods?

Mr. BLACK of New York. Yes; but he is coming out gradually. Having contact with New York City there is hope for him. [Laughter.]

New York is not asking Federal subsidies. It is not going around with its hat in its hand begging the Federal Government to put it on its feet. It is able to keep its own footing. New York aliens and New York citizen troops marched off to the war gallantly, and I believe they performed fully as well as the jayhawkers of Kansas. [Laughter.] Kansas, as you know, was a part of the Louisiana Purchase and New York helped pay for it, and I am not yet certain that it was an unprofitable investment. [Laughter.]

New York provides a much better type of citizenship in Alfred E. Smith than does Kansas in the person of the mudslinging William Allen White. Let us have peace within the borders of the Nation. Let us stop these attacks on New York State. To my mind these attacks are founded on economic jealousy, and nothing else. Kansas and other States can stand a liberal sprinkling of aliens, and if they did they would come out of their medieval holes.

I want to warn the Members of this House that any time a drinking dry gets on this floor and makes an attack on New York it will not be healthy in my presence. They have either got to stop drinking or they have got to stop abusing New York. Indiana is always finding fault with New York's governor and all the while Indiana has two governors working for the State, one in the capital of the State and the other in jail. [Laughter.]

Now, Mr. Chairman, I want to insert the Sidewalks of New York.

THE SIDEWALKS OF NEW YORK

Song and chorus by Charles B. Lawlor and James W. Blake

VERSE I

Down in front of Casey's old brown wooden stoop
On a summer's evening we formed a merry group;
Boys and girls together, we would sing and waltz,
While the "Ginnie" played the organ
On the sidewalks of New York.

VERSE II

That's where Johnny Casey and little Jimmy Crowe,
With Jakey Krause, the baker, who always had the dough,
Pretty Nellie Shannon, with a dude as light as cork,
First picked up the waltz step
On the sidewalks of New York.

VERSE III

Things have changed since those times; some are up in "G,"
Others they are on the hog, but they all feel just like me,
They would part with all they've got could they but once more walk
With their best girl and have a twirl
On the sidewalks of New York.

CHORUS

East side, west side, all around the town,
The tots sang "Ring a Rosie," "London Bridge Is Falling Down";
Boys and girls together, me and Mamie Rorke,
Tripped the light fantastic
On the sidewalks of New York.

Mr. BLACK of New York. My advice is to keep preachers out of politics. Run your own organization. Do not allow your politics to be run by evangelists and people of that kind. We of New York, people of all nationalities, go on the basis of the golden rule, and through cooperation we have erected the most glorious city of the ages. We have proved that all of God's children can live happily together.

Now, with your permission, gentlemen, I would like to read a little poem which I wrote some 10 years ago. It is as follows:

NEW YORK

The living life, the life that leads the way,
All human heart and sharply vital soul,
A body tingling thru the night and day
A mind imperial, a will of world control;
A purse unclosed, a manner grandly gay,
A purpose dwarfing Tyre's or Athen's goal;
Her riches wavelike swell beyond survey,
Though earthling, near defying Heaven's toll.
Her past and present barely flecked with dross.
The grand ne'er stays the paltry as its mate;
The mean but glimmers briefly on the great.
Her future, New York prompts a world worth while,
Omnipotence, welding in a dazzling gloss,
Pray heaven and weary hell here reconcile.

The CHAIRMAN. The Clerk will read the bill.

The Clerk read as follows:

FOREIGN SERVICE BUILDINGS FUND

For the purpose of carrying into effect the provisions of the "Foreign Service building act, 1926" (U. S. C. p. 1953, sec. 295), and for each and every object thereof, including the initial alterations, repair, and furnishing of buildings heretofore acquired under specific authorization of Congress for the use of the diplomatic and consular establishments in foreign countries, $2,000,000, to remain available until expended.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the subcommittee as to the status of the acquisition of foreign buildings by the United States embassies and legations abroad.

Mr. SHREVE. The building fund is going on. We are appropriating about $2,000,000 every year now. The building commission is working with us and we have carried appropriations for everything they have recommended this year.

Mr. BRIGGS. About how many buildings have been acquired already?

Mr. SHREVE. I think there are about 30—that is, all over the world—but, of course, they are not being started. The gentleman will find it all set out in the hearings. I think there is a list of them in the hearings.

Mr. MOORE of Virginia. Will the gentleman yield?

Mr. BRIGGS. Yes.

Mr. MOORE of Virginia. I would like to bring this point to the attention of the chairman. I have been wondering why it is there is no annual report made by the Secretary of State as by the other Cabinet officers. This bill indicates that he is charged, as we all know he is, with very important functions; we all know questions have been raised, some raised recently, with reference to the organization of the State Department and the need of some reorganization, and it is conceivable that an annual report by the Secretary of State might present to us facts that ought to be considered and recommendations that ought to have attention. I have frequently inquired for the annual report of the Secretary of State and I have been surprised to discover that he makes no such report. We can not find, therefore, in any one place the facts which probably we should have in order to legislate more intelligently. I think, for instance, there should be a report detailing all that is done with reference to carrying out the building program. I think there ought to be a report detailing what is being done in the way of promoting people in the Foreign Service, and so forth, and yet we have no annual report from him.

Mr. SHREVE. The reason of that, the gentleman understands, is because there is no authorization by law; that is, the statute does not require it. Further than that, many things which take place in the Department of State are of such a nature that they must be kept within the two countries that are effecting some settlement and you can not broadcast it, from the very nature of the thing.

Mr. MOORE of Virginia. The gentleman understands, as I understand, that there are many matters to which secrecy should attach and which should not be included in a report; nevertheless, I think that a report with respect to other matters might prove of very great value.

Mr. SHREVE. No doubt that is true, but it is within the discretion of the Secretary of State.

Mr. MOORE of Virginia. I do not think all of the other Cabinet officers are required by statute to make such report.

I made some little examination this morning and I am not certain there is such a specific requirement.

Mr. SHREVE. I think there is.

Mr. MOORE of Virginia. It would seem it is done as a matter of practice—as a matter of custom. However, I think it should be done by the head of the State Department, as well as by the heads of the other departments.

Mr. SHREVE. It is my understanding it is required of all the other Secretaries except the Secretary of State.

Mr. MOORE of Virginia. Can the gentleman be sure that there is a definite statutory requirement which compels the other Cabinet officials to file annual reports? I am not sure on that point.

Mr. SHREVE. That is my recollection.

Mr. BRIGGS. Without interrupting too much, the gentleman from Virginia apparently has availed himself of the privilege of using some of the time at my disposal.

Mr. MOORE of Virginia. I did not think the gentleman wanted all of his time.

Mr. BRIGGS. I just wanted to ask the gentleman from Pennsylvania whether under the law it is contemplated that the United States Government is going to acquire consulates in practically all the places of importance that the United States has consuls, especially before it attempts to acquire buildings in the various national capitals. I notice that in one or two instances the acquisition of consulates has begun, and I was wondering whether that was contemplated to be done before the embassies and legations in the national capitals are undertaken.

Mr. SHREVE. No; I think there is no distinction drawn between the two. They are carrying on the work as seems to them most necessary.

The CHAIRMAN. The time of the gentleman from Texas has expired.

The pro forma amendment was withdrawn.

The Clerk read as follows:

To enable the President to perform the obligations of the United States under the treaty between the United States and Great Britain in respect of Canada, signed February 24, 1925; for salaries and expenses, including the salary of the commissioner and salaries of the necessary engineers, clerks, and other employees for duty at the seat of government and in the field; cost of office equipment and supplies; necessary traveling expenses; commutation of subsistence to employees while on field duty not to exceed $4 per day each; for payment for timber necessarily cut in keeping the boundary line clear, not to exceed $500; and for all other necessary and reasonable expenses incurred by the United States in maintaining an effective demarcation of the international boundary line between the United States and Canada and Alaska and Canada under the terms of the treaty aforesaid, to be disbursed under the direction of the Secretary of State, $29,525, of which sum $5,000 shall be immediately available: *Provided*, That when the commissioner, or the engineer to the commissioner, shall be absent from Washington or their regular place of residence on official business they shall be allowed actual and necessary expenses of subsistence not to exceed $8 per day each.

Mr. BLACK of Texas. Mr. Chairman, I reserve a point of order on the proviso in the paragraph just read. If the gentleman will refer to the paragraph he will find it reads:

Provided, That when the commissioner, or the engineer to the commissioner, shall be absent from Washington or their regular place of residence on official business they shall be allowed actual and necessary expenses of subsistence not to exceed $8 per day each.

Why should not this read the same as the provision for all other similar Government activities?—

Provided, That when the commissioner, or the engineer to the commissioner, shall be absent from Washington or their regular place of residence on official business they shall be allowed their traveling expenses in accordance with the provisions of the subsistence expense act of 1926.

The way the paragraph now reads introduces an exception to the general law which is not introduced as to any other activity, so far as I have seen in the bill, and the purpose of the enactment of the subsistence expense act of 1926 was to have uniformity, and the only way to have uniformity is to have it, and not make exceptions.

Mr. SHREVE. The law is very uniform, let me say to the gentleman, because there is only one man in this class.

Mr. BLACK of Texas. You have a commissioner and an engineer commissioner, both of whom you would except.

Mr. SHREVE. And he gets no compensation for the services rendered in the performance of this work and this is only adding an extra dollar to pay for his traveling expenses.

Mr. BLACK of Texas. Is not the engineer a paid officer?

Mr. SHREVE. No; and this is only for one man, Colonel Jones.

Mr. BLACK of Texas. If they serve without compensation I shall not press the point of order. If they were paid officers of the Government, I should certainly press the point of order.

Mr. SHREVE. That is correct.

Mr. BLACK of Texas. I withdraw the point of order.

The Clerk read as follows:

For salary of the one member of the permanent committee of the International Institute of Agriculture for the calendar year 1930, $5,000;

For the cost of translating into and printing in the English language the publications of the International Institute of Agriculture at Rome, $5,000;

For clerical assistance and traveling and office expenses, $3,660;

Total, $58,000.

Mr. MOORE of Virginia. Mr. Chairman, I move to strike out the last word in order to ask the gentleman whether or not Congress receives any information from this commission as to its work?

Mr. SHREVE. Oh, yes. The reports are made to the Department of Agriculture, but they go through the State Department, of course.

Mr. MOORE of Virginia. I find there are quite a number of commissions that do not seem to be required to make a report to any one.

Mr. SHREVE. That is true; but this one does make a report.

Mr. MOORE of Virginia. But there are commissions that do not make reports.

Mr. SHREVE. Well, it seems so, I am sorry to say.

Mr. MOORE of Virginia. And that is a case of bureaucracy uncontrolled.

Mr. SHREVE. Yes.

Mr. O'CONNOR of Louisiana. Mr. Chairman, I move to strike out the last two words for the purpose of asking the chairman of the subcommittee a question.

On yesterday the gentleman from New Jersey [Mr. ACKERMAN] made a very interesting speech, but some of the statements in the speech, if left unexplained, would probably lead to misleading and erroneous conclusions. The gentleman stated that all the worth-while countries, particularly Great Britain, France, and Japan, are appropriating considerably more money for their departments of foreign and domestic commerce than our own country, and I know if that statement is left unexplained, as I have said, it will probably lead to some misleading conclusions. Has the gentleman explained that in the course of general debate?

Mr. SHREVE. I have already explained that; and let me state to the gentleman that they have only one fund for this purpose, while we have a very large number of such funds, and the appropriations when compared properly, are not very much in excess of those made by our Government.

Mr. O'CONNOR of Louisiana. That is, the total amount of the appropriations made to the Departments of State, Agriculture, and Commerce for this particular purpose?

Mr. SHREVE. Yes. We started this work with an appropriation of $850,000 and we are now appropriating almost $5,000,000 for this one bureau.

Mr. O'CONNOR of Louisiana. And the appropriations that are made are adequate to cover the field?

Mr. SHREVE. Yes.

Mr. WINGO. Mr. Chairman, just what real benefit do we get out of this $58,000 expenditure for the Institute of Agriculture at Rome?

Mr. SHREVE. It is for the constant dissemination of information about agriculture. I remember that a few years ago there was a total failure of the lemon crop in Sicily. This information was communicated by way of the Paris office and was here within 24 hours. It was broadcast to the Western States where they grow lemons and made a great difference in the marketing of the lemon crop that year. They are very quick in furnishing such information. I only mention this as one character of information, but information affecting all branches of agriculture is passed through the Paris office to Washington and then on to the various localities.

Mr. WINGO. Take the case which the gentleman has just cited, that information would have been broadcast even if we had not had this institute in existence?

Mr. SHREVE. Oh, no; I think not.

Mr. WINGO. A failure of the lemon crop of Italy would not have been broadcast?

Mr. SHREVE. In time, the information would get here, of course, but it was not a conspicuous matter of news. Let me read to the gentleman this statement about the work:

The American farmer is afforded information concerning the production, distribution, and marketing of all agricultural staples with reliable and imperial data in connection with the factors which determine the

formation of the prices of these staples in the world's markets. In this way this institute acts as a world clearing house for information on economic, scientific, and technical problems as they affect the agricultural industry of the world. By adherence to this institute the proper persons are able to obtain the statistical and economic information regarding farming, plant, and animal products, with the prevailing prices throughout the world. They are informed of the wages paid for farm work throughout the world. They also learn the nature of diseases which affect crops and plants throughout the world, are shown the territories affected, and are thus able to take measures for the prevention of the spread of these diseases. American adherence enables the interested agricultural units to learn of any new projects for the development of agriculture in any one country in the world. Besides being important to the farmer, American adherence benefits those interested in vegetable fat products, seed oils, coffee production, rubber growing, tea and tobacco production, fertilizing tests, cotton growing, etc.

This states a few of the things that the Institute of Agriculture at Rome was established for, and it is a work that they have been carrying on for many years.

Mr. COLE of Iowa. Will the gentleman yield?

Mr. WINGO. I yield to the gentleman.

Mr. COLE of Iowa. We should also bear in mind that this institute is of American origin. Mr. David Lubin was the originator of the idea. The idea was rejected in this country, but the King of Italy interested himself in it, and that is how this organization happens to operate from Rome. I have visited the institution, and for us not to participate in it would break off certain international associations and relations that we now have that I think are profitable to us, far and beyond any mere statistics we may get from this source. It is an international institution that all the countries of Europe, as well as other countries of the world, participate in; and I think it would be very bad form for us not to share in the work and also share the expense of the work.

Mr. WINGO. Mr. Chairman, I am very familiar with the organization, I will say to my friend from Iowa [Mr. COLE]. I knew Mr. Lubin quite well. I heard him many years ago before our committee, and I submit in all fairness there is nothing that has been stated in response to my inquiry which would show any practical benefit that the American farmer has gotten.

It is quite interesting to note the time when we get these statistics. I presume the gentleman has not thought of that. There is not a single fact that has been disseminated that is of practical benefit to the American farmer that would not have been disseminated by another agency in existence.

Mr. COLE of Iowa. I think in connection with the new farm legislation they will be very much interested in production—as to what crops are profitable.

Mr. WINGO. I will say that the little bunch of pink-tea officials seated in a drawing room can furnish no information or advice, even to the Republican Party, which will be of benefit to it in solving the farm problem. I will say to my friend that I listened to the same argument in relation to rural credits. We brought Mr. Lubin over the seas before our committee, and we might as well have had the statement from a Hottentot in South Africa, as far as the benefit it was to myself or the committee of the House in solving that problem.

Statistical data is furnished by other governmental agencies. The crop data is furnished by news and commercial agents already in existence. I venture the assertion that 99 per cent of the statistics they disseminate they get from other agencies and facts already made public, and all on earth they do is to compile them.

There are a few rare things; but what are they worth? Not a thing to the wheat growers of the West, or the cotton growers of the South. I am not going to object to it, because we seem bound by treaty.

I mention this to accentuate the fact that I am not going to agree to any new expenditures of this kind, however beautiful it may be in theory. What we need in American agriculture is a method of orderly marketing of the surplus products. We have furnished ample credit agencies. During the 16 years I have been on the Banking and Currency Committee we have given them every kind of credit agency they asked. The only practical proposition unsolved is the marketing of surplus products of the United States. How this group of elegant gentlemen stationed in Rome can give any information of benefit to me or the gentleman from Iowa I do not see. I think the gentleman from Iowa knows more about the American farmer than these gentlemen in Rome ever knew.

Mr. COLE of Iowa. They are supposed to know as much as the good American farmer, and are supposed to furnish us with statistics as to surplus products in all parts of the world.

Mr. WINGO. We get those from the consular agencies and the commercial agencies and the news agencies. There is not a single news agency in the world that if there is an extraordinary event that effects the estimated volume of cotton in the United States that that will furnish it quicker than it can be furnished from Rome. You may have some calamity that will destroy the cotton crop in Kenya and the news will get to the world quicker than the Prince of Wales got to the coast, and the news agencies of the United States would get it quicker than the agency in Rome.

Mr. COLE of Iowa. This agency in Rome collects the data and tabulates it.

Mr. WINGO. What is the tabulation worth after you have received it and considered it?

Mr. COLE of Iowa. This is an official tabulation.

Mr. WINGO. The Department of Agriculture gets the tabulation first. The estimates of world cotton production by the Department of Agriculture we get a long time before the institute at Rome sends it out. As a matter of fact, the institute at Rome bases its statistics on world production of cotton largely upon the statements given out by the Department of Agriculture here in Washington. I shall not object, but if you want real economy start cutting off these things that take $50,000 here and $50,000 there and simply furnish salaries for people who are serving the farmer in name only.

The Clerk read as follows:

To enable the Secretary of State to pay to the Government of Panama the eighteenth annual payment, due on February 26, 1930, from the Government of the United States to the Government of Panama under article 14 of the treaty of November 18, 1903, $250,000.

Mr. WINGO. Mr. Chairman, I move to strike out the last word in order to get some information. The past two items that I endeavored to get information on were on page 19. What actual connection have we with the International Bureau of the Permanent Court of Arbitration? I mean officially.

Mr. SHREVE. That is a treaty obligation.

Mr. WINGO. In other words, we entered into a treaty to help support something.

Mr. SHREVE. Yes.

Mr. WINGO. Officially what have we to do with it. They elect a member from the United States sometimes, do they not?

Mr. SHREVE. The gentleman is referring to the International Bureau of the Permanent Court of Arbitration?

Mr. WINGO. Yes.

Mr. SHREVE. Our appropriation is to meet the share of the United States for the expenses for the calendar year 1928, which amounts to $2,000. That is the same amount that was appropriated some years past.

Mr. WINGO. That is not the World Court?

Mr. SHREVE. No. This item is authorized by an international treaty for the specific settlement of international disputes, signed at The Hague on October 18, 1907. This bureau is a record office for the Permanent Court of Arbitration at The Hague.

Mr. WINGO. And the gentleman is getting that information out of the hearings?

Mr. SHREVE. Yes.

Mr. WINGO. This does not affect this so-called Kellogg treaty, if it is ratified? It does not do away with the necessity for that?

Mr. SHREVE. I think not. This is simply an office where the records are kept.

Mr. WINGO. Certainly, at The Hague.

Mr. SHREVE. Yes.

Mr. WINGO. If they can not settle a dispute, then the League of Nations will try, and if they can not, then perhaps the Pan American Conference will try, and then if they can not, who next takes it up?

Mr. SHREVE. I suppose this court here.

Mr. WINGO. Do you provide here for the expenses of this Pan American Conference?

Mr. SHREVE. No.

Mr. WINGO. Let us take the next bureau, the Bureau of Interparliamentary Union for the Promotion of International Arbitration. That seems to be a duplication in work. We propose to spend $6,000 for that. What connection do we have officially with that?

Mr. SHREVE. This is to take care of our expenses for this Interparliamentary Union for the Promotion of International Arbitration. This was another thing that was authorized on May 6, 1910.

Mr. WINGO. And my friend is reading from the hearings. Do the hearings disclose whether they ever made a report to us?

Mr. SHREVE. I am not prepared to state. This deals with all matters of international law which are concerned with the maintenance of peace, and its principal object is to bring before the various national parliaments questions concerning the amelioration of international relations.

Mr. WINGO. This is different from The Hague Tribunal which was in the preceding paragraph?

Mr. SHREVE. Yes.

Mr. WINGO. Does the gentleman recall a single instance where this Bureau of Interparliamentary Union settled any one thing, any one specific case, like the one in South America that the Pan American Conference prevented a conflict on lately? Can the gentleman give such an instance where this Bureau of Interparliamentary Union ever promoted world peace by taking care of any specific case?

Mr. SHREVE. I would refer the gentleman to Senator BURTON. I am not informed on that subject.

Mr. WINGO. I am not complaining about the gentleman's lack of information. Mine is just as great. I am not asking these questions in an argumentative spirit, but I hesitated to make the point of order. I suspect that some time, in a moment when we wanted to make another gesture for peace, we entered into an international agreement by which Uncle Sam would dig up his hard coin to support some of these tea hounds over there in some kind of an organization that would give them some prestige in diplomatic society. It is a wonder to me that we ever settle any disputes with all of these different, conflicting organizations, each with a high-sounding name, and each purporting to do the same thing. The gentleman is one of the best-informed members of the great Committee on Appropriations, and he can not recall a single instance where anything has been done in a specific way, and I venture to assert that there is not another man on the floor of the House who can do it, and I doubt that even Senator BURTON could recall an instance like that to which I refer. But the American taxpayer is patient. He believes in these gestures for peace. Every time he makes one he just digs up a little more coin and permits somebody else to sneer at him and insist that we did not have anything to do with the World War except to make money out of it—and then ask us for another loan.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

The Clerk read as follows:

INTERNATIONAL BUREAU OF THE UNION FOR THE PROTECTION OF INDUSTRIAL PROPERTY

For the share of the United States in the expense of conducting the International Bureau of the Union for the Protection of Industrial Property, at Berne, Switzerland, $1,700.

Mr. WINGO. Mr. Chairman, I move to strike out the last word. I would like to have the attention of the gentleman from Pennsylvania or the gentleman from New Jersey [Mr. ACKERMAN]. On page 21, lines 6 and 8, under the heading "Pan American Sanitary Bureau," I see we are called upon to contribute annually $28,597.92 to help support this Sanitary Bureau. What particular sanitation does this group do? Can the gentleman state that without referring to the hearings?

Mr. ACKERMAN. No; I can not, but I can refer to the books. [Reading:]

The Sanitary Bureau, through correspondence, through its collection, publication, and distribution of data with regard to contagious diseases, of laws and regulations for their control, of methods of combating diseases, and in other ways fosters the spirit of cooperation in the Americas and stimulates health authorities to greater and more effective effort. Also the bureau stimulates the carrying out of ideas which are developed in the sanitary conventions and announces the existence of any plague-affected area to the adherent members so that they may take precautionary measures to isolate and quarantine those areas. The International Sanitary Bureau is distinct from the International Office of Public Health in that it is composed solely of American republics and is directly connected with the work of the Pan American Union in fostering more clearly relations between North and South American countries and in aiding those countries in the adoption of sanitary measures which in turn benefits United States trade and decreases the risk of infections and diseases being brought into this country. The International Sanitary Bureau aids in enforcing sanitary regulations in seaports hitherto shunned by merchant-marine vessels because of the danger of life attending the landing of goods or merchandise and the loading of vessels with return cargo.

Payment is made by the special disbursing officer of the department assigned to the Pan American Union by check drawn on the Treasurer of the United States. The expenses of the bureau are apportioned among the various members on the basis of population and the quotas received are used to defray the cost of clerical assistance, translations, preparation of reports, and transactions in Spanish and English. The Pan American Union has charge of the disbursement of the whole fund.

Mr. WINGO. Now, Mr. Chairman, the gentleman has read a statement from the Assistant Secretary of State, as I recall. Of course, we have to pay this bill, because we are bound by an international agreement which the Senate ratified, but this bureau does not do a single thing along the line or purpose expressed in the testimony of the Assistant Secretary of State that is not either done or could be done by the Public Health Service of the United States acting through the State Department dealing with the other Pan American States. But, of course, we can not defeat one more junket. Why Webster once in a burst of eloquence, in referring to the stretch of the domain of the British Empire, said that the sun never sets upon it, and talked about the morning air being filled with one continuous strain of martial airs of England. The sun never sets on international junkets, the expenses of which the Congress of the United States takes from the taxpayers of the United States. On them the sun never sets. There is one on the high seas all the time. I want to move to strike out, in line 22, page 25, the last section read, so as to get some information, as I see my time has about expired. Here is another one of international bureaus, page 25. This is the International Bureau of the Union for the Protection of Industrial Property. This is a meeting at Berne, Switzerland, and calls for an expenditure of $1,700; evidently the amount of industrial property that needs protection is very small, as the amount asked for is very little. Evidently, there is only one man who indulges in going over there, and I doubt even if there is one, but I expect it is taken up in office expenses at Berne, Switzerland.

I do not know of anything that they are doing that could not be done here in Washington that is actually done over in Switzerland. But we are bound to this by one of our international treaties. It is an extraordinary week when the Senate of the United States does not bind the taxpayers of the United States to some additional expenditure by reason of some treaty whereby the taxpayer will be deprived by expenditure either upon land or upon the high seas by a junket or some gentleman's office position and salary in some foreign land to do something that any consul in a consular office can do. But that might interfere with some of their other activities, so the American taxpayer, at a time when we are facing a deficit of some thirty-odd million dollars, will have to pay for these extraordinary international "excresences" or whatever you might call them, who are the beneficiaries.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. WINGO. Certainly.

Mr. MOORE of Virginia. A great many of these activities, or perhaps a majority of them, are carried on under statute, as I understand. Attention has been called to the fact that there seems to be a lack of necessity for some of them and more or less duplication. Would not the gentleman be able to get results, since he has undertaken the leadership in criticism of the existing condition, by offering a resolution and having it referred to the Committee on Foreign Affairs, to bring about some investigation to ascertain what statutes should be modified or repealed? The Committee on Appropriations has no alternative except to provide for executing the statutes. It strikes me that there really ought to be a look-over of the commissions and bureaus which the gentleman is talking about, so as to eliminate those that can be profitably dispensed with.

Mr. WINGO. I hope the gentleman will not understand me as criticizing the committee. The committee is not at fault. The gentleman says most of these matters are founded upon a statute. The moral obligation is upon the committee, as it is upon the Congress, to go ahead and meet the pledged obligations of the United States.

I had a purpose—not an idle purpose—in directing attention to these things, because I hope that somebody having greater influence than I will do what the gentleman from Virginia has suggested. It might be well to have an inventory made of these activities and to take stock and see if we can not impose upon our diplomatic officers or representatives abroad these duties, so that these burdens will be saved upon our taxpayers.

Take, for instance, the Interparliamentary Union. I think there has been some consternation in the State Department over the action of an American member of the Interparliamentary Union who is dissatisfied with the handling of international affairs by our State Department, and who has openly announced in the newspapers that he has cabled to the officials of another nation, "Just wait until we get together in the Interparliamentary Union and we will supersede these admirals and diplomats." He seems not to be content to abide by the action of

the President, the State Department, and the Senate, but says, "Just wait until we get there and we will do away with all this red tape." Of course, the gentleman fails to recognize that we have not given him a commission to represent the House of Representatives.

The CHAIRMAN. The time of the gentleman from Arkansas has expired. The pro forma amendment is withdrawn, and the Clerk will read:

The Clerk read as follows:

For the expenses of determining the amounts of claims against Germany by the Mixed Claims Commission established under the agreement concluded between the United States and Germany on August 10, 1922, and subsequent agreement between those Governments, for the determination of the amount to be paid by Germany in satisfaction of the financial obligations of Germany under the treaty concluded between the Governments of the United States and Germany on August 25, 1921, for the expenses of determining the amounts of claims against Austria and Hungary by the Tripartite Claims Commission established under the agreement concluded between the United States and Austria and Hungary on November 26, 1924, for the determination of the amount to be paid by Austria and Hungary in satisfaction of the financial obligations of Austria and Hungary under the treaties concluded between the Governments of the United States and Austria on August 24, 1921, and between the Governments of the United States and Hungary on August 29, 1921, and/or the treaties of St. Germain-en-Laye and Trianon, respectively, including the expenses which under the terms of such agreement of August 10, 1922, and the agreement of November 26, 1924, are chargeable in part to the United States; and the expenses of an agency of the United States to perform all necessary services in connection with the preparation of claims and the presentation thereof before said mixed and tripartite commissions, including salaries of an agent and necessary counsel and other assistants and employees, rent in the District of Columbia, employment of special counsel, translators, and other technical experts, by contract, without regard to the provisions of any statute relative to employment, and for contract stenographic reporting services without regard to section 3709 of the Revised Statutes (U. S. C. p. 1309, sec. 5), law books and books of reference, contingent expenses, traveling expenses, and such other expenses in the United States and elsewhere as the President may deem proper, $132,927.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word of the last paragraph.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. BRIGGS. I would like to ask the chairman what is the status of the extension, which I think the Congress requested here in a recent act, of the time for filing claims before the Mixed Claims Commission? I understood that is to be taken up with the Government of Germany. I was wondering whether an agreement had been reached.

Mr. SHREVE. The agreement has not yet been reached. It is expected it will be reached within the year.

Mr. BRIGGS. The reason I am asking is that there are several claimants in my district who were apparently barred by not knowing that they could present claims. Those negotiations between the United States and Germany have continued for some time.

Mr. SHREVE. We are expecting a report at any time now.

Mr. BRIGGS. Is it probable that the extension will be granted? Does the gentleman know that?

Mr. SHREVE. Yes. We were so assured.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

GENERAL AND SPECIAL CLAIMS COMMISSION, UNITED STATES AND MEXICO

For the expenses of the settlement and adjustment of claims by the citizens of each country against the other under a convention concluded September 8, 1923, and of citizens of the United States against Mexico under a convention concluded September 10, 1923, between the United States and Mexico, including the expenses which, under the terms of the two conventions, are chargeable in part to the United States, the expenses of the two commissions, and the expenses of an agency of the United States, to perform all necessary services in connection with the preparation of the claims and the presenting thereof before the said commissions, as well as defending the United States in cases presented under the general convention by Mexico, including salaries of an agent and necessary counsel and other assistants, and employees and rent in the District of Columbia and elsewhere, law books and books of reference, printing and binding, contingent expenses, contract stenographic reporting services, without regard to section 3709 of the Revised Statutes (U. S. C. p. 1309, sec. 5), the employment of special counsel, translators, and other technical experts, by contract, without regard to the provisions of any statute relative to employment, traveling expenses, and such other expenses in the United States and elsewhere as the President may deem proper, $350,000.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. BRIGGS. I would also like to ask, in connection with this Mexican Claims Commission, whether that commission is functioning or likely to function in the near future? I understand that for some time past the commission has been marking time, awaiting the appointment of a commissioner by the Republic of Mexico, and that no assurances have been received, unless very recently, that there was in contemplation the appointment of one of these officials, so that the commission could function.

Mr. SHREVE. I will say to the gentleman that the commission is now functioning to the extent that it is getting these cases ready. The third commissioner is not yet appointed.

Mr. BRIGGS. If the commission has not yet been completed, how can it proceed with its work?

Mr. SHREVE. The answer to the gentleman's inquiry is contained in the following extract from the hearings, which I will read:

The examination and development or attempted development of 1,950 special claims from November 1, 1927, to November 15, 1928.

Up to date, the General Claims Commission has disposed of 76 American claims, in which the amount claimed was $4,366,208.66.

The awards rendered are in the sum of $2,301,573.09, which does not include a sum by way of interest, running with those awards in which interest was granted of, in the amount of $400,690.65.

Nine Mexican claims have been heard by the commission. The amount claimed was $320,455, and the amount awarded was $39,000.

There have been no further claims heard by the Special Claims Commission. That, of course, was bound to be so because there was no presiding commissioner. All the time which was taken up in Mexico City at the recent meeting was devoted to hearing the 25 claims before the General Claims Commission.

Mr. BRIGGS. What is the total number of claims filed up to date?

Mr. SHREVE. Nineteen thousand five hundred.

Mr. BRIGGS. And what is the aggregate amount?

Mr. SHREVE. Something over $4,000,000. I can not give the gentleman the exact figures, and the figures are not here because they were not certain.

Mr. BRIGGS. My recollection is that the number that have been adjudicated is comparatively small.

Mr. SHREVE. It is small.

Mr. BRIGGS. Compared with the vast amount involved in the claims that have been filed?

Mr. SHREVE. That is correct. Nine Mexican claims have been heard by the commission. The amount claimed was $320,455 and the amount awarded $39,000.

Mr. BRIGGS. Have any of these claims been paid?

Mr. SHREVE. No.

Mr. BRIGGS. And there is no indication as to when they will be paid?

Mr. SHREVE. On page 166 of the hearings it appears:

An agreement as to the appointment of a new presiding commissioner involved the appointment of a commissioner for both the general and special commissions, so that now both the General and Special Claims Commissions have a presiding officer, Dr. K. Sindballe, of Denmark.

That information was just handed to me by the Clerk.

Mr. BRIGGS. And the commission will begin to function again and adjudicate claims?

Mr. SHREVE. Yes.

The pro forma amendment was withdrawn.

The Clerk read as follows:

For salaries of clerks of United States circuit courts of appeals and United States district courts, their deputies, and other assistants, travel expenses pursuant to the subsistence expense act of 1926 (U. S. C., pp. 1888, 1889, secs. 821–833), and other expenses of conducting their respective offices, $1,943,400.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. Has the committee any information on the question of the so-called duplication of legal activities in the various departments of the executive branch of the Government? I noticed not long ago that the attention of the House was called to the fact that there was a great deal of duplication with reference to the legal work and that there ought to be some consolidation of that work. Did the committee go into any matter of that kind?

Mr. SHREVE. The effort naturally is to have the Department of Justice finally pass on all these matters, but each and every department has its own attorneys and has its own legal advisers; but it is expected that everything should clear through the Department of Justice. I do not know of any overlapping and I have not heard of any.

Mr. BRIGGS. I noticed that a question arose with respect to the oil leases between the Department of the Interior and the Attorney General's department. We had two sets of counsel advising the Government there, and finally the Attorney General's opinion was sought; and, of course, prevailed. That opinion required the cancellation of the leases that had already been entered into, and we might have avoided much that was involved there if the advice of the Attorney General had been obtained in the first place. Then I have noticed there is a growing tendency to impose upon the Government a large expense for special counsel, or alleged specially qualified practitioners, to represent different bureaus and different commissions of the Government. I have wondered why the Department of Justice could not fulfill those requirements and officiate rather than to require the Government to turn so much to the employment of special counsel.

Mr. SHREVE. Well, the department finds it is necessary sometimes to employ special counsel, men particularly qualified to carry out a certain line of investigation. Of course, the gentleman must remember that salaries in the Department of Justice are low and that many of the young men over there are just beginners and possibly have not had the ripe experience that older lawyers have had, so that the experienced branch of the service finds itself overwhelmed with work and it is necessary sometimes to go out and get special counsel.

Mr. BRIGGS. I appreciate there are instances where special counsel are required; but it occurred to me that perhaps by some expansion of the Department of Justice, along the lines intimated by the gentleman, whereby it can be thoroughly equipped with a capable and competent staff, the Government would be able to obviate a very large part of the expense that it is now necessary to meet by the employment of special counsel for different agencies of the Government, separate and apart from the Department of Justice.

Mr. SHREVE. Well, that is a matter that is worth considering, I will say to the gentleman.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Probation system, United States courts: For salaries and actual expenses of probation officers, as provided by section 3 of the act entitled "An act to provide for the establishment of a probation system in the United States courts except in the District of Columbia," approved March 4, 1925 (U. S. C. p. 516, sec. 726), $25,000.

Mr. MOORE of Virginia. Mr. Chairman, I move to strike out the last word simply to ask the chairman of the subcommittee a question. Was a suggestion made of a larger appropriation for this service?

Mr. SHREVE. Not by the department; no. There has been quite a difference of opinion about this appropriation. We have taken the pains to write the judges and we find that some judges are not in favor of the system while many others are. The law is going to require some changes before it is going to be universally satisfactory to the judges.

Mr. MOORE of Virginia. I was prompted to ask the question because I have had a good deal of information, as doubtless other Members have, from judges who approve this system but say the present appropriations are insufficient.

Mr. SHREVE. They did not use all the money that was appropriated last year. The trouble with it is, I will say to the gentleman from Virginia, that these men are under civil service, and the judge does not want to pick out a member of his official family from a list of three names sent to him, and this will have to be changed before the system is a complete success.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Air-navigation facilities: For the establishment and maintenance of aids to air navigation, including the equipment of additional air mail routes for day and night flying; the construction of necessary lighting, radio, and other signaling and communicating structures and apparatus; repairs, alterations, and all expenses of maintenance and operation; investigation, research, and experimentation to develop and improve aids to air navigation; for personal services in the District of Columbia and elsewhere (not to exceed $82,540); purchase, maintenance, operation, and repair of motor-propelled passenger-carrying vehicles, including their exchange; maintenance, operation, and repair of airplanes, including accessories and spare parts and special clothing, wearing apparel, and suitable equipment for aviation purposes; and for the acquisition of the necessary sites by lease or grant, $5,458,620: *Provided*, That no part of this appropriation shall be used for any purpose not authorized by the air commerce act of 1926.

Mr. HUDSON. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the subcommittee a question. In the report I notice this department has been cut down in its appropriation something like $34,000. Is this in any way curtailing the activities of the Aircraft Bureau?

Mr. SHREVE. No; not at all. It may curtail somewhat their local force, but it does not affect their general operation.

Mr. HUDSON. It seems to me the work of this bureau is so important that they should be granted the largest amount possible.

Mr. SHREVE. We have been very liberal with them, and this will not affect their field work at all.

Mr. HUDSON. I would like to ask the gentleman another question. In the matter of granting Federal licenses for pilots, are there any fees returned to the department or the Treasury? Is any fee charged in the granting of these Federal licenses?

Mr. SHREVE. There is a small fee charged and, of course, as all other moneys so collected, it is turned into the Treasury.

Mr. HUDSON. If there is a fee charged, of course, it probably goes back into the Treasury.

Mr. SHREVE. Of course, it has not been going on long enough for us to tell what it will amount to in the future.

Mr. HUDSON. I wondered if any particular revenue was produced from this source.

Mr. SHREVE. Not yet; no.

The pro forma amendment was withdrawn.

The Clerk read as follows:

District and cooperative office service: For all expenses necessary to operate and maintain district and cooperative offices, including personal services in the District of Columbia and elsewhere, rent outside of the District of Columbia, traveling and subsistence expenses of officers and employees, purchase of furniture and equipment, stationery and supplies, typewriting, adding, and computing machines, accessories and repairs, purchase of maps, books of reference, and periodicals, reports, documents, plans, specifications, manuscripts, not exceeding $1,200 for newspapers, both foreign and domestic, for which payment may be made in advance, and all other publications necessary for the promotion of the commercial interests of the United States, and all other incidental expenses not included in the foregoing, $620,000: *Provided*, That the Secretary of Commerce may require as a condition for the opening of a new office or the continuation of an existing office that commercial organizations in the district affected provide suitable quarters without cost to the Government or at rentals at lower than prevailing rates. The Secretary may, at his discretion, refuse to open a new office or continue an existing office where such assistance from local commercial organizations is not provided;

Mr. BRIGGS. Mr. Chairman, I would like to ask the chairman of the subcommittee if the amount provided in this bill is regarded by the department as sufficient to enable it to carry on all the essential activities of the bureau in an efficient way?

Mr. SHREVE. Of course, the amount is not sufficient to carry on all the activities, possibly, they would like to carry on, but it is sufficient to carry on the activities which should be conducted this year.

Mr. BRIGGS. All the essential ones?

Mr. SHREVE. We made a general increase affecting this department following our usual policy. We have tried to treat everybody alike. Of course, the other bureaus have to have appropriations, but we have given this bureau about what is usual.

Mr. BRIGGS. As I understand it the committee has increased somewhat the appropriation for the Bureau of Foreign and Domestic Commerce over and above the Budget estimate?

Mr. SHREVE. Yes; about $88,000.

Mr. BRIGGS. In order that the bureau may have an opportunity to function properly?

Mr. SHREVE. Yes; that is right.

Mr. BRIGGS. As I understand it, the committee is thoroughly in sympathy with the splendid work which this organization is doing to promote trade not only in the domestic field, but in the foreign field.

Mr. SHREVE. That is true, as shown by the increased appropriations we have given them every year.

Mr. BRIGGS. And it may be said that this agency of the Government is probably contributing as much in its service for the upbuilding of the prosperity of the country as any other agency of the Government service?

Mr. SHREVE. I think the gentleman is quite right about that.

Mr. BRIGGS. To bring to the attention of the people generally some concrete idea of what excellent work this bureau is doing under the leadership of its capable and highly efficient director, Hon. Julius Klein, I take this opportunity of including herein a portion of some remarks made by me lately before the Committee on Appropriations for adequate appropriations for this valuable service:

I know that you gentlemen have had stated to you the general value of this service to the American people, and you have shown a rather liberal and broad spirit in endeavoring to give to this service the consideration that it deserves. The value of the returns for this service is emphasized in the records of the department, which show, for instance, that the trade opportunities developed by this department increased from 571,766 in 1926–27 to 708,964 in 1927–28, or an increase of 24 per cent in the trade opportunities for the industrial interests of the United States during that period of time.

The number of visitors who came to the department for information rose from 73,781 in 1926–27 to 103,694 in 1927–28, an increase of 40 per cent. That shows the growing interest in the service and it shows that they are providing the people with a splendid service. Further, their records show that the number of letters handled in 1926–27 was 177,307, while in 1927–28 the number rose to 241,099, an increase of 36 per cent. Over the same period, or from 1926–27 to 1927–28, the number of telephone calls increased from 71,006 to 95,009, or an increase of 33 per cent. The overtime for employees in these offices, or in the district office service, is now 16.8 days per year, that being the average overtime per man employed. Another thing, of course, which has always been the real test, is what are the people getting out of this service in dollars and cents? These 29 district offices are now serving 21,696 firms. The value of the service rendered is emphasized by this statement, that 851 firms reported in 1925–26 to the Department of Commerce that they received on account of this service results amounting to $7,319,323, or an average of $8,608 per firm.

In the period 1926–27 there seemed to be a decline in the number of firms using the service, or at least reporting to the department. The number decreased to 405, but the total results showed business obtained of the value of $9,718,330, or an average per firm of $23,995. That shows an increase of about $2,500,000 for that year. Then in the period 1927–28, 819 firms reported total results of $14,506,913, or an average of $17,712 per firm, or nearly $5,000,000 more in business than was reported for the year before. You can see from that the progression that obtains in this service and the constantly increasing service that is performed for the people. If the average benefit per firm of $17,712 were applied to the 21,696 firms served by the bureau during 1927–28, the total results would be $384,279,552. The total for 1927–28, $14,506,913, is thirty-three times the amount spent by the Government in furnishing the services that resulted in this business, the appropriation for that year being only $435,000.

Of course, nobody knows out of all these firms using the service but not reporting just how much they are making if they do not report. Many of them do not report the figures, and the increase disclosed here is shown by those who do report.

Briefly, I would like to call your attention to the way our export trade has been developed. In 1914 the total export trade of the United States amounted, in round figures, to $2,434,000,000, and in 1927 our export trade amounted to, in round numbers, $5,056,000,000, an increase of 107 per cent. Since 1922, when the total was a little over $3,000,000,000, there has been a steady increase. The United States exports to Latin America have increased from 1910–1914 average of $340,000,000 to $845,000,000 in 1927, an increase of 180 per cent. In 1914 the United States furnished 24 per cent of the total Latin-American imports, and was second to Great Britain. In 1927 the United States furnished 37 per cent of the imports, followed by the United Kingdom with 16 per cent. That shows you how our trade has increased with Latin-American countries, and it has been done largely through this service.

Now, in all those years there has been created an increasing demand for this service, and there must necessarily be some need for expansion. I want to indicate to you right here something that transpired the other day. It so happened that representatives of the southwestern flour mills, including those engaged in Kansas City, southern Missouri, Kansas, and Oklahoma, and Colorado, came to me with reference to some flour extension service they wanted dealt with by the Department of Agriculture, which was already handling it. They wanted some increase in the service, and they said to me, "Congressman, we want to report to you that as a result of efforts made last year, with the aid of the Department of Commerce, there was established a port service to the east coast of Brazil from the port of Galveston, and as a result we are intrenching ourselves in Brazil as great flour dealers." They said, "We export now down there probably more flour than any other country, perhaps even including Argentina."

They said that a large part of the Argentine flour is being blended with American flour, and some of it is now being brought into this country. They are developing this business, and they are developing it very largely with the assistance of the service of the Bureau of Foreign and Domestic Commerce, both at home in the district offices and at the offices in Brazil.

The export-trade representative for the southwestern millers further said: "The other day I was in Denver talking to one of the large wholesale grocers there, and he said to me, 'Since the Brazilian service from Galveston has been started by the Shipping Board we are able to import our coffee with a saving of from 65 cents to 67 cents per 100 pounds.'" They claim that could be saved to their trade all through the West. They are using the trade service of the Department of Commerce. I want to call attention to the fact that the department has recently stationed at the port of Galveston Mr. Long as district manager. He had been the trade commissioner in Brazil and is a man of experience and capacity. He possesses a high order of ability and is well qualified to serve this particular trade. I know that you gentlemen are interested in the development of trade, and feel sure that is one reason why Mr. Hoover is making his good-will trip to South and Central America. It is to promote good feeling between those countries and our own and also to establish greater trade with them. All of us were for the new South and Central American air mail services on that account. That may be expensive to begin with, but they will result in large returns to the United States.

Mr. BRIGGS. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mrs. ROGERS. Mr. Chairman, I move to strike out the last two words. It is my understanding that in 1921 each service of the Department of Commerce cost the taxpayer $2.65. At the present time it is costing the taxpayer only $1.35 for each service, and these services are very important.

I should like to pay my tribute to the gentleman from Pennsylvania [Mr. SHREVE] for the really very great work that he and the members of his committee have done in making possible through the appropriations that they have given to the Bureau of Foreign and Domestic Commerce the great development of the commerce of the United States. You and your committee a number of years ago had the vision to see the great need of this country finding a market for its products to take up the slack between supply and demand.

President Coolidge and Mr. Hoover, the Secretary of Commerce, have been heartily in accord with your plan, and the work of directing the expenditure of your appropriations has been most efficiently carried on by Dr. Julius Klein, the able Director of the Bureau of Foreign and Domestic Commerce, of the Department of Commerce.

In 1921 the bureau had 700 requests a day for services. At the present time the bureau is averaging 11,000 requests per day. In other words, the work has increased sixteen times since 1921.

Last year the bureau received 30 per cent more than it received the year before.

In 1921 the appropriation for the Bureau of Foreign and Domestic Commerce was $900,000. This last year it was approximately $4,300,000.

In 1921 each service rendered by the bureau cost the taxpayer $2.65. At the present time it costs the taxpayer only $1.34 for each service. These services are much improved as the actual information has become more accurate since 1921. In 1921 the reports of trade conditions abroad, and so forth, were more or less guesswork, as at that time they did not have the highly trained specialists, such as trade commissioners and experts, to gather specialized information.

At this time everything points to a value of over $5,000,000,000 in our export trade for the current year. Last year the exports for the whole year amounted to $4,865,375,000. This year for the first 10 months our exports have been $4,113,592,000.

The increase in our export trade has benefited the small shippers and companies as well as the big shippers and companies. The services rendered have been of particular benefit to the small manufacturers and merchants, as they can not possibly afford to send some one to foreign countries to secure information that is furnished almost immediately by the Department of Commerce.

Mr. SHREVE. There has been great improvement during the last year, let me say to the gentlewoman from Massachusetts, and we hope to keep up this improvement right along.

Mrs. ROGERS. And it is the intention of the gentleman to increase the appropriations, I understand?

Mr. SHREVE. Every year we hope to give them a little more money.

Mrs. ROGERS. And with the lowered cost we are getting very much better service, and it seems to me very constructive, effective, Coolidge economy and shows Hoover business ability.

Mr. SHREVE. Yes.

Mrs. ROGERS. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD. I am overjoyed that this committee has increased the appropriations for our trade development at home and abroad.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

SATURDAY, *December 8, 1928.*

TRADE COMMISSIONERS, BUREAU OF FOREIGN AND DOMESTIC COMMERCE

Statement of Hon. EDITH NOURSE ROGERS, a Representative in Congress from the State of Massachusetts

Mrs. ROGERS. Mr. Chairman and members of the committee, I have appeared before your committee every year asking for appropriations to develop our foreign and domestic trade, and you have given those appropriations.

I know that in my own State of Massachusetts there is very great satisfaction over the results achieved by the Department of Commerce in developing sales abroad and at home of various commodities made in Massachusetts.

Speaking first of the domestic part of it, we have a branch office, as you probably know, in Boston. They are very much overworked there. They need at the present time a liaison officer between the Boston office and the manufacturers all over New England.

The more directly, as I understand it, the work can be accomplished in actual sales, by information as to what foreign countries wish to buy and as to what we make and where we make the various commodities in this country, the better the results achieved.

JAPAN

I am going to tell you a story about what Japan is doing in the line of trade commissioners, because I think it is quite significant. I asked your committee for a trade commissioner to go to Singapore, and you granted that request. The trade commissioner was making a survey of the various industries in this country before going, talking with various selling agents, taking samples of materials made in our mills to Singapore, and just two or three weeks before he was to sail he discovered that Japan had found out that we were sending a trade commissioner there and that Japan's trade commissioner had already arrived in Singapore. Japan is doing much to expand her foreign trade.

Japan, principally because of long hours and low cost of labor and the encouragement given to the industry by the Government in pursuance of its policy to stimulate the industrialization of Japan, has been able to increase her production and distribution of cotton textiles in a very substantial manner.

It is not necessary to go into the details of production or even to submit figures as a growth of the industry can be clearly demonstrated by pointing to the increase in her exports of cotton piece goods. These export figures are not readily available on the yardage basis for certain comparative years but even considering the increased value of cloth exported, the fact is that in 1903 her exports of cotton piece goods came to nearly 7,000,000 yen in value; in 1913, 43,000,000 yen; in 1923, 234,000,000 yen; and since 1923 have been running at a value of between 250,000,000 and 350,000,000 yen a year. (Value of a yen, about 50 cents.)

One comparison in yardage exports will be sufficient. In 1923 her exports amounted to about 748,000,000 yards, while in the calendar year 1928, based upon the figures for the seven or eight months now available, they are running at the rate of about 1,500,000,000 yards for the year.

This large increase in Japanese cotton piece goods exports has been attributable not alone to the fact that Japan produced under conditions of long hours and low labor costs, but also to the fact that the Government has extended many aids and encouragements. Some of these aids take the form of shipping subsidies, credit facilities, and the like which enable the Japanese to lay down large quantities of piece goods in consuming markets at prices which have made heavy inroads into the business formerly held by Great Britain, the United States, and other countries. So far as such competition with the United States is concerned it has been most keenly felt in Africa, the Near East, Persian Gulf, and Red Sea territories and to a considerable extent in India, China, and other far eastern territories on staple piece goods which the United States used to supply in quantities.

There is another reason I want to give for the necessity and advisability of having a liaison man. A good many of the manufacturers, I find, at first are a little bit afraid of having the Government have any connection with their business, and sometimes you have to explain the matter to them. They must be shown that the Department of Commerce is an aid to business; that it so operates and does not dictate or interfere.

I am very much interested in the development of trade in South America and I am perfectly delighted that Mr. Hoover has gone there. I remember in 1914, during the war, the various diplomatic representatives here used to say to my husband and me over and over, "Why don't you develop your trade with South America? We would like to trade with you, but you do not make it easy for us. You do not tell us what you have in a way that makes it easy for us to deal with you. You have not yet learned that we know what we want to buy. You tell us what you want to sell and what we must buy."

TRADE COMMISSIONER FOR ARGENTINA

I am very anxious to have a textile and boot and shoe trade commissioner go to Argentina. They tell me there is a big market for our textiles there and the manufacturers tell me that they feel there is a very big market in Central and South America and in other countries for the sale not only of our goods by yards—that is, yardage—but garments actually made up, such as pajamas, underwear, dresses, etc.

Practically all of the countries of South and Central America have been growing markets for American cotton textiles. Argentina is our largest market in South America and perhaps offers the best possibilities for further development.

In 1926, the last year for which figures are available, there were imported into Argentina a total of 28,388 metric tons of cotton piece goods from all countries. Of this, the United States shipped 2,530 tons, or almost 9 per cent of the total. (Argentina import figures are not available on a yardage basis.)

That our own exports to Argentina are steadily increasing is evidenced by the fact that in 1913 we exported to that country 1,529,000 yards, valued at $180,000, while in 1927 we exported nearly 25,000,000 yards, valued at $4,345,000.

In shipments of cotton yarn to Argentina the increase has been even more pronounced, for, while in 1922 we exported to Argentina 15,500,000 pounds of various kinds of cotton yarns, their takings from us amounted to about 28,000,000 pounds in 1927.

Our textile business in Argentina is diversified and complicated. A great many American firms do business there and it is done in various ways ranging from having one's own sales office or salaried representative to the appointment of local agents on a commission basis. Customers range from the retail merchant to the wholesaler and manufacturer. Even some mail-order and house-to-house business is undertaken on American goods.

Because of the diversity of American textile products being sold in Argentina and the many methods of distribution it would be very desirable to have a textile trade commissioner on the spot to aid American manufacturers and merchants in extending their business. He could engage in all kinds of cooperative effort short of actually executing the orders.

Argentina is interesting to American manufacturers and merchants not alone as a market for cotton piece goods and yarns but as a growing customer for such textile articles as certain items of knit goods, garters and arm bands, corsets and brassières, waterproofed outergarments, silk dresses, collars and cuffs, etc.

The business to Argentina in certain classes of hosiery, underwear, and outerwear has fallen off with American manufacturers due to the fact that local production is increasing under the higher tariff rates assessed against imports. However, American merchandise of the sort is liked, and it is possible to maintain some branches of this business in spite of handicaps if proper aid and encouragement is given to American manufacturers and merchants.

Indeed, exports from the United States to all countries of some items such as knit goods garments, haberdashery, corsetry, etc., are increasing substantially, and it is desirable to encourage this development for in so doing we export not alone the textile fabric incorporated in the article but the further developed product of American skilled labor.

TRADE COMMISSIONER FOR CARIBBEAN SEA AREA

Then in the Caribbean Sea area, I am very anxious to have a boot and shoe and textile trade commissioner. They also tell me that there is opportunity in India.

India is a very interesting and important buying and selling market for American textile interests from several points of view:

1. As a large producer of raw cotton entering into competition with American cotton.

2. As a manufacturer of cotton piece goods, some of which enter the world's markets in competition with American cotton piece goods.

3. As a producer of jute and burlap, enormous quantities of which are used in the United States and regarded here by many as competing as a substitute with American cotton piece goods.

4. As a large importer of cotton piece goods.

Every one of these subjects is of vital interest to various branches of the American textile industry and an American trade commissioner specially trained and qualified to analyze the situation and supply American interests with essential information would be very valuable.

Perhaps his most important work would be in developing the market for American cotton piece goods although he would give considerable attention to developing markets for various items of clothing such as underwear and hosiery, shirts and other haberdashery, the sale of which in India has increased modestly.

To get a picture of the importance of India as a market for cotton piece goods let us look into the years 1914, 1923, and 1928. These are the fiscal years ending March 31.

[Quantities in millions of yards]

Fiscal year ended Mar. 31	Indian imports of cotton piece goods, including fents			
	From all countries	From United Kingdom	From Japan	From United States
1914	3,197	3,104	9	10
1923	1,593	1,453	108	8
1928	1,973	1,543	323	25

From this it will be seen that the total imports of cotton piece goods from all countries has diminished considerably. This is due principally to the increased domestic production of cotton piece goods.

Great Britain's shipments to India in the 18-year interval have declined to approximately one-half of the more than 3,000,000,000 yards shipped in 1914.

The exports of cotton piece goods from the United States to India have increased slowly but steadily since 1914, being now at the rate of about 25,000,000 square yards a year or two and one-half times the amount shipped in 1914.

It is Japan, however, which has made the most remarkable strides, for her exports to India increased from a bare 1,000,000 yards in 1912 and 9,000,000 yards in 1914 to over 323,000,000 yards in the fiscal year ending March 31, 1928.

Of the 25,000,000 yards shipped to India from the United States in the Indian fiscal year ending March 31, 1928, a large proportion were remnants. Indeed there was a time several years back when, with the exception of a few lines of staple branded gray goods about all we could sell to India were remnants. Now, however, the situation is considerably changed and there is a general falling off in our shipments to India of so-called stable gray goods and we are increasing shipments of regular lines of colored and fancy goods to that market.

India is a long way off, is favorably disposed to American merchandise, and it is believed that our textile shipments to that country could be increased steadily if some one or more specialists were located on the spot to aid American interests.

You all know that during the war we overexpanded, and we have got to have something to take up the slack between the supply and the demand.

My own textile industries have suffered very much. Some of them at the present time, fortunately, are doing very well, and they are doing well because they know how to sell the articles that they make and they have learned to make what the people want.

The only thing that we can do to keep ahead of other countries in the kind of things we make and in their quality is to be constantly and ably represented abroad, have people who will study conditions there, who will tell us what they are making in foreign markets, what the cost of production is, and how they sell. They must tell us what other countries will buy.

At the present time we have one of our trade commissioners studying production in England; studying, so far as possible, costs; studying how their market goes; finding out exactly what they make.

MACHINERY SURVEY

I am very anxious to have a further appropriation for a machinery survey. You let us have a small appropriation last year for that. I understand that at the present time they are utilizing that for a survey of knitting machines for the manufacture of sweaters. The sweater manufacturers are delighted to have that done and feel that a great deal can be accomplished.

The machine-tool people are very much interested in this survey and I have had a great many letters about it. The following letter has been received from the publishers of the American Machinist:

AMERICAN MACHINIST,
New York, N. Y., December 4, 1928.

MRS. EDITH N. ROGERS,
House Office Building, Washington, D. C.

MY DEAR MRS. ROGERS: Word has just reached me that you are to appear before the Appropriations Committee to-morrow on behalf of the proposed survey to determine the percentage of obsolete industrial equipment in use. I want to take this opportunity to express the sincere hope that you will be successful in convincing the members of the Appropriations Committee that such a survey is well worth while. At the same time I want to indorse all that was said by Mr. L. C. Morrow, at that time managing editor of the American Machinist, when the previous hearings on this appropriation were held.

You know, of course, and I presume that the members of the Appropriations Committee know also, that such a survey was conducted in the machine-tool using industries by the American Machinist three years ago. The results of that survey showed that 44 per cent of the equipment in use in those industries was more than 10 years old. In other words, that it was obsolete.

The survey attracted considerable attention at the time and the mission it endeavored to accomplish was backed up by further editorial efforts on the part of the American Machinist's staff and by the makers of that type of equipment through their advertising pages.

Many of the machine-tool builders with whom I have talked in recent months attribute the unusual activity in their business to the fact that the metal-working industries in general are taking drastic steps to replace their obsolete production equipment. In spite of the fact that very few new plants or plant extensions are in progress, sales of machine tools are now being made at a higher rate than at any time since the war, and a few of the more progressive companies are doing more business now than they did at any time during the war.

It is at least reasonable to believe that somewhat similar results would follow a survey of obsolete equipment in other industries, and I earnestly hope that you will be able to secure the funds necessary to conduct such a survey.

With best regards, I am,

Yours sincerely,

K. H. CONDIT, *Editor.*

AIRPLANE INDUSTRY IN SOUTH AMERICA

If I may have a minute or two more, Mr. Chairman, I want to speak a little about the work that is being done in South America with reference to the sale of our airplanes there, and if I may extend my remarks in your hearings, I have quite a number of statements showing what has been accomplished in the development of our trade along that line.

Mr. SHREVE. We shall be very pleased to have you extend your remarks by inserting in the hearings those statements in which you think the committee will be interested.

Mrs. ROGERS. A year ago, just about this time, I discovered that I had forgotten there was an embargo on airplanes into Mexico, and I took the matter up with the State Department, and the embargo was lifted. I had a great many letters from airplane manufacturers expressing their pleasure, and I became very much interested in the future of the airplane industry in Central and South America.

I have had a great deal of communication with different airplane manufacturing plants, talked with people that came up from South America, and found out what was being done down there.

The Department of Commerce has been doing very constructive work in South America, and as a result they have sold a good many planes of our manufacture there.

Aeronautic developments in Latin America have come rapidly during recent months. It is significant and important that more than 10,500 miles of air services are in regular operation in the southern Republics. There are approximately 100 aircraft in use on those air lines, and approximately one-half of the machines were made in the United States.

It was recalled that European aeronautic missions visited South and Central America and the West Indies repeatedly following the war. This prolonged activity resulted in the introduction of aircraft from Europe, and in the general belief that this equipment was superior to any other. The peoples in the area decided to cooperate with Europeans in providing air services within Latin-American territory and between South America and Europe. A French company extended its France-to-Africa service across the Atlantic (using steamers) and along the east coast of South America. German interests have succeeded, in varying degrees, with air services in Colombia, Brazil, and Bolivia.

With a view to increasing the sale of American aeronautic products abroad, the Department of Commerce sent a well-prepared aeronautics trade commissioner to South and Central America in August, 1927. A similarly equipped assistant aeronautics trade commissioner followed in August, 1928. These and other representatives of the Departments of Commerce and State have been able to interest American manufacturers in the southern markets and assist them in introducing their equipment there. Satisfaction was expressed in regard to the recent sale of 36 planes by an American company to Chile. It was stated, too, that American passenger and mail planes were shipped recently to Mexico, Guatemala, Colombia, Peru, Argentina, and Cuba.

According to figures of the transportation division, Bureau of Foreign and Domestic Commerce, the total value of aeronautic products exported from the United States to Latin-American countries during the first nine months of 1928 was $723,280, or nearly as much as that for the year 1927. Twenty-four aircraft, worth half a million dollars, were exported to these markets in 1927, and 55, valued at $558,577, followed up to October 1, 1928. The total value of our aeronautic exports in 1927 was $1,903,560. This figure for the first nine months of 1928 is $2,931,721. A large part of the increase was in larger exports to Canada.

Reference was made to the progress of the Pan American Airways (Inc.), who have extended their Habana-to-Key West daily service to Miami and announced that two flights each way will be made daily, beginning shortly. The same company has a three-times-a-week seaplane service, recently inaugurated, between Miami and Nassau, and they will start one between Habana and San Juan, P. R., in January. According to reports, the company will soon open a daily service between Habana and Panama via Central American capitals and Merida, Mexico. An associated company in Peru has been operating a highly successful and thoroughly reliable service between Lima and seaports along the north coast of Peru. They plan to extend their services to Chile, to

Panama, and across the north coast of South America to San Juan. I am of the belief that our aeronautic manufacturers and operating companies who have become interested in southern countries have made a thoroughly worth-while effort with highly satisfactory results and that they may be expected to compete successfully with European interests. The necessity for businesslike and fair practices and the sale of superior equipment is recognized as of the utmost importance.

I am told that England very shortly is sending a fleet of planes there and other countries are increasing their trade activities. One reason I became so vitally interested is because I realized the protection that is needed in Central America, for instance. The Panama Canal must be protected.

Very few people in this country seem to realize how far ahead of us other countries have gone in air commerce in Latin America. It is humiliating that the pioneer aeronautical move in Latin America was started by the Curtiss Co. in 1914; but since then, foreign countries have left us so far behind that until recently we have not been real competitors. I have been told that the advantage of this rapid system of communication between the commercial centers of western Europe and the east coast of South America can not be overemphasized. Ever since 1914 people from those countries have said, "Why does not America develop her trade in our country?" The development of the air mail service is undoubtedly a necessary part of our preparedness program. The transmission of orders, remittances, quotations, specifications, and other business correspondence will give our European competitors a tremendous advantage in this trade arrangement. The factor of interest savings and the multiplication of activities of capital employed in this trade alone will place our exporters at a handicap compared with European firms.

PANAMA CANAL

One of the vital factors of our defense system is, of course, the Panama Canal and its complement of railways and military defenses. Without these the coordination of our Atlantic and Pacific Fleets will be well-nigh impossible, and closely related with this phase are our lines of communication and intelligence in the Caribbean area and the east and west coasts of South America.

This, in turn, is bound to be closely related in the future with military, naval, and commercial air services in these areas. Unfriendly aviation units of any of the above three classifications dominating these areas will react unfavorably on the above-mentioned communications and intelligence service in a time of actual or threatened hostilities. One of the presumptions of our national-defense system is that an attack against us could be only launched by a strong naval power. Unquestionably sound strategy would be an attempt by such a power to cut off our trade and communication with the American countries to the south of the United States. Unfriendly air forces of the above three classifications would be an invaluable aid in any such tactical plan, particularly in the case of a European power.

These things being apparent, it is advisable to consider the present aeronautical situation in the Latin-American countries to-day and this situation is, to say the least, highly unfavorable to the United States. To begin with, there are elements of foreign (European) personnel connected with the Mexican air services in various responsible positions. Secondly, commercial aviation in Colombia is dominated by a German-Colombian air transportation company, and Colombia's military aviation is in charge of a Swiss instructor. Passing down the east coast of South America we next come to Venezuela, where military aviation is administered by French instructors, as is also the case in Brazil, where an exceptionally strict control is exercised by a French military mission. Argentina maintains a permanent military mission of its own in Europe, which is very responsive to European influence and can not in any way be regarded as susceptible to American. A British naval mission acts as advisor to the Chilean naval and aviation operations, and high officers of German birth and former German rank and citizenship dominate the Peruvian army. The same situation exists in Bolivia as in Peru, and protests against both these missions were made by countries signatory to the Versailles Treaty without effect as the provisions against German military missions contained in this treaty were defeated in this instance by transfers of citizenship.

The relatively small aeronautical activities of Ecuador are regulated by Italian instructors. It can thus be seen that European influence predominated almost entirely in military aviation affairs in South America and this influence is strengthened by the presence of the operations of the French Compagnie Aeropostale with air-mail lines in Brazil, Uruguay, and Argentina, and the German air interests such as the Kondor Syndicat, operating in Brazil, the Aero Lloyd Boliviano operating in Bolivia, and the "Scadta" in Colombia. Other concessions for air lines in South America are now being sought by European interests and these, if secured, will still further weaken our influence in aeronautical affairs in South America.

The above summary shows very clearly the need for action upon the part of this country at an early date and it is believed that this action should take the form, at least, of the establishment of air mail and commercial lines to Central and South America.

Mr. OLIVER. Germany, I assume, is making sales of planes.

Mrs. ROGERS. Yes; and France is making sales. They also have a line on the west coast in South America. While we were the first country to go into South America with the airplane, other countries up to the present time have exceeded what we have accomplished. I am getting figures from the Department of Commerce on that point, if I may put those in the record.

EXPENDITURES BY FOREIGN COUNTRIES FOR TRADE PROMOTION

America's expenditures on her foreign trade promotion are not as large as those of our principal trade rivals. On a per capita basis, our Canadian neighbors will spend nearly twice as much as we will during the present fiscal year. If the appropriations of the Bureau of Foreign and Domestic Commerce were on the same basis as those of the Canadian Commercial Intelligence Service, the United States would spend $8,196,888 instead of $4,257,357.

On the basis of current appropriations and 1927 export figures, American expenditures on trade promotion are only 76 per cent of those of the British Department of Overseas Trade. In other words, it would require an increase of $1,310,000—from $4,257,357 to $5,567,357—to make the appropriations of the Bureau of Foreign and Domestic Commerce equivalent to those of its British rival.

Even Japan is spending more proportionately than the United States. Considered on the same basis as Great Britain, it would be necessary to increase the bureau's appropriations by $763,000—from $4,257,357 to $5,020,357—to make them equivalent to the Japanese expenditures.

Germany has no separate funds that can be definitely identified as comparable to the appropriations for the Bureau of Foreign and Domestic Commerce, but from all we know of her great efforts to regain her lost trade we have every confidence that the American expenditures taken on a comparable basis are considerably less than those of Germany, possibly by as much as 25 per cent.

These figures do not tell the entire story by any manner of means. Take Great Britain, as an example. The British Government has undertaken to spend approximately $48,500,000—or at the rate of $4,850,000 a year for 10 years—on the promotion of the sale of Empire products within the Empire. Although this is primarily a domestic sales campaign, it has a direct bearing on American trade, not only in the British Isles but also throughout the British Dominions and Colonies, which, taken as a unit, constitute our most important single market. In fact, 42 per cent of our total foreign commerce is with the Empire.

Again, the British Government will spend in their fiscal year 1928–29 the sum of $437,500 on the Export Credits Guarantee Department, an increase of $185,000 over the 1927–28 appropriation. Since 1920 a revolving fund of $126,000,000 has been set up to take care of the commitments guaranteed under this single piece of legislation which is directly concerned with British trade expansion.

Another example of British promotion activities that may be cited in the British Empire Exposition, held at Wembly in 1924 and 1925. In 1924 the British Government spent $875,000, while five sections of the Empire, to mention only a part of the participating countries, contributed about $3,000,000. These figures represent, it may be assumed, only a small part of the total expenditures and are exclusive of an operating deficit of $7,500,000. This undertaking and its succeeding follow-up efforts are but part of a large trade-promotive program.

Another type of indirect trade promotion on behalf of British trade is found in the East African loan act, under which a revolving credit of $48,600,000 has been created for the development of transportation facilities, such as railroads, roads, and harbors in British East Africa. A large part of these credits will, it is expected, be utilized in the development of commerce in British machinery and equipment.

The growing importance of promotion activities in international trade is further emphasized by other examples. France is proposing to spend in 1929 over 25,000,000 francs on certain phases of her export drive. This does not tell the whole story, as this represents only part of the official expenditures. Due to the interlocking relations between the French trade promotion bureau and French chambers of commerce, there are other expenditures which are not in the official budget.

Italy will spend in her fiscal year 1928–29 nearly seven and a half million lire for some of her trade activities. This does not include semiofficial items, such as are represented by the recent floating fair of Italian products which toured Latin America, displaying the best Italy could supply in many lines, the total value of the exhibits alone being 5,000,000 lire.

Australia furnishes another interesting example. In London and Paris this enterprising Dominion is spending, according to the 1927 Australian Yearbook, about $125,000 a year at each post for trade promotion. In the fiscal year ending June 30, 1929, the Bureau of Foreign and Domestic Commerce will spend $99,750 in the United Kingdom and $90,025 in France. Even the Union of South Africa is in some respects spending more money than the United States. For instance, at Milan, Italy, where both countries have offices, South Africa has a budget of $55,000, as compared with an American expenditure of $7,310.

Our New England council, I know, is extremely pleased with what has been accomplished by your committee and by the Department of Commerce. I do not hear any criticism. I hear nothing but praise about what is being done. This trade promotion not only affects one

part of the country but it affects the entire country. Of course, I can not help feeling the greatest interest in my own section of the country.

We have certain geographical handicaps and we have certain handicaps in our hours of labor and wages, so that it makes selling pretty difficult sometimes for our Massachusetts industries.

I thank you very much, Mr. Chairman, for this opportunity.

The Clerk read as follows:

BUREAU OF THE CENSUS

For salaries and necessary expenses for preparing for taking, compiling, and publishing the Fifteenth Census of the United States and for carrying on during the decennial census period all other work authorized and directed by law (U. S. C. pp. 329–338, secs. 1–112), at a total cost of not to exceed $39,490,000, including rent of office quarters in and outside the District of Columbia; salaries of employees in the District of Columbia and elsewhere, including temporary employees in the District of Columbia who may be appointed by the Director of the Census, under civil-service rules, for any period not extending beyond June 30, 1932, at rates of pay to be fixed by the Director of the Census, without regard to the classification act: *Provided*, That such temporary employees in the District of Columbia may be allowed leave of absence with pay at the rate of two and one-half days per month; the employment by contract of personal services for the preparation of monographs on census subjects; per diem compensation of special agents and expenses of the same and of detailed employees, whether employed in the District of Columbia or elsewhere: *Provided further*, That employees of the bureau may be paid in lieu of all transportation expenses not to exceed 7 cents per mile for the use of their own automobiles or not to exceed 3 cents per mile for the use of their own motor cycles when used for necessary travel on official business; expenses of attendance at meetings concerned with the collection of statistics, when incurred on the written authority of the Secretary of Commerce; the purchase of supplies and equipment, including books of reference, periodicals, maps, manuscripts, punch cards and materials, and other contingent expenses; the maintenance, operation, and repair of a passenger-carrying automobile to be used on official business; the purchase, rental, repair, and exchange of typewriters, calculating machines, punching, tabulating, and sorting machines, and other office appliances; the construction of punching, tabulating, and sorting machines, including technical, mechanical, and other services in connection therewith, whether in the District of Columbia or elsewhere; and printing and binding at the Government Printing Office, $19,000,000, to continue available until June 30, 1932, of which sum $100,000 may be immediately available: *Provided further*, That existing law shall not operate to prevent the use of such portion of this appropriation as may be necessary for the purchase of supplies, printing and binding, and other contingent expenses: *Provided further*, That the Secretary of Commerce is authorized, in his discretion, to suspend during the decennial census period such work of the Bureau of the Census, other than the Fifteenth Census, as he may deem advisable.

Mr. BLACK of Texas. Mr. Chairman, I reserve the point of order on page 63, lines 6 and 7, to this language:

at rates of pay to be fixed by the Director of the Census, without regard to the classification act.

The paragraph under consideration authorizes the expenditure of $39,000,000. What is the reason for providing that the Director of the Census fix the rates of pay without regard to the classification act?

Mr. SHREVE. I will say that this paragraph is undoubtedly subject to a point of order, but if it is made it will cost the Government $5,000,000 more to do it under the classification act than if the language is left in the bill.

Mr. BLACK of Texas. I am glad to have that explanation. I read the hearings on that item and there did not appear to be any explanation why it was done. Of course, if the gentleman from Pennsylvania can give us the assurance that that language will work economy in this expenditure, I shall certainly take his assurance and withdraw the point of order.

Mr. SHREVE. We are assured by the different bureau heads that that is the fact.

Mr. BLACK of Texas. Mr. Chairman, I withdraw the point of order.

Mr. O'CONNELL. Mr. Chairman, I move to strike out the last word. Is it the understanding of the committee that $39,490,000 is necessary to take the census?

Mr. SHREVE. That is the 10-year census—the authorization will be for $39,700,000.

Mr. O'CONNELL. This is the census we are going to take?

Mr. SHREVE. Yes; it takes two or three years' preparation for it.

Mr. O'CONNELL. And it costs this immense sum to obtain it.

Mr. SHREVE. It does.

Mr. O'CONNELL. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

Contingent expenses: For the payment of fees to witnesses; for traveling and other expenses when on official business of the Supervising Inspector General, Deputy Supervising Inspector General, supervising inspectors, traveling inspectors, local and assistant inspectors, and clerks; for instruments, furniture, stationery, street-car fares not to exceed $25, janitor service, and every other thing necessary to carry into effect the provisions of title 46, chapter 14, page 1488, United States Code, $153,000.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. Can the committee give us any information with reference to whether or not it entered upon any investigation as to whether or not there are enough inspectors in the Steamboat Inspection Service to enable it to work efficiently? It seems that there was a great deal of criticism at the time of the *Vestris* disaster as to alleged insufficiency in the number of inspectors; and I have heard it urged again and again that there is not a sufficient number to enable this service to discharge its duties efficiently.

Mr. SHREVE. The head of the bureau has not completed the investigation and he was not prepared to say that they did not have enough inspectors. The matter needs further investigation, and later on he will have the information so that we will be in a position to pass upon it intelligently.

Mr. OLIVER of Alabama. It is fair to say that they contemplate some legislation on this subject.

Mr. BRIGGS. I understood that there had been a request by the inspection service for additional inspectors, and I wanted to know whether the committee had dealt with the matter by granting additional ones.

Mr. SHREVE. The gentleman must have been misinformed; there was no application for an increase in the number of inspectors. I think the gentleman from Alabama will corroborate me.

Mr. OLIVER of Alabama. My recollection is that it was stated that the plans to which the gentleman has referred might be so worked out that they could ask for additional legislation in this Congress, and probably they might require additional inspectors.

Mr. BRIGGS. The conclusion reached, then, was that additional legislation would be required before they had additional inspectors?

Mr. SHREVE. There must be an authorization of law.

Mr. BRIGGS. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

Utilization of waste products from the land: For the survey of the possibilities of the industrial utilization of waste products from the land, including cooperation with colleges, other institutions, and manufacturers, including personal services in the District of Columbia and in the field, $52,700.

Mr. COLE of Iowa. Mr. Chairman, I move to strike out the last word. I think it was three years ago that the first appropriation for this purpose was made, if I remember correctly.

Mr. SHREVE. Yes.

Mr. COLE of Iowa. This small expenditure of $50,000 three years ago, two years ago, and what is now continued here, has already resulted in great good. We have one or two institutions that are based on the developments made through this small appropriation enabling the Bureau of Standards to cooperate with various institutions, especially the college at Ames, Iowa. Newpaper publishers have informed me that these developments, especially the making of print paper from the pulp of cornstalks, is already beginning to affect newsprint paper prices, and that they are able to make lower contracts. They attribute it to the beneficial results of this investigation. I believe the time is coming when we will have many factories utilizing these raw materials, and I think the beginning was made when this first appropriation was made by this subcommittee three years ago.

Mr. SHREVE. I thank the gentleman. The committee will be glad to have that information.

The Clerk read as follows:

Public works: For constructing or purchasing and equipping lighthouse tenders and light vessels for the Lighthouse Service as may be specifically approved by the Secretary of Commerce not to exceed $1,155,000; and for establishing and improving aids to navigation and other works as may be specifically approved by the Secretary of Commerce, $485,000; in all $1,640,000.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. Is there any provision in this item for any new lighthouse vessels?

Mr. SHREVE. Yes.

Mr. BRIGGS. If so, whether there is any special designation of where they will be located?

Mr. SHREVE. We never designate in the bill where they shall be located. There are items in the bill covering both lighthouses and lighthouse vessels.

Mr. BRIGGS. How many new light ships are provided for? I do not mean tenders.

Mr. SHREVE. The authorization, I think, was made a couple of years ago, and we are just carrying it out now. It strikes me there are three.

Mr. BRIGGS. Is it the committee's purpose to carry on that appropriation until the authorization has been carried through?

Mr. SHREVE. Yes.

Mr. BRIGGS. So that the Lighthouse Bureau will be equipped with a sufficient number of vessels to meet the existing demand?

Mr. SHREVE. That is the intention; yes. I can tell the gentleman now just where these vessels are to be located. There will be a lightship at Brenton Reef, *No. 39*, which is in the third district, and a lightship, at Hen and Chickens, *No. 42*, second district, a relief lightship, *No. 3*, third district, and there will be a new tender to replace the tender *Pansy* in the third district. It takes two or three years from the time the appropriation is made before we can get these vessels into service.

Mr. BRIGGS. It is the purpose of the committee to go forward with this authorization in subsequent bills to satisfy the needs of the bureau?

Mr. SHREVE. That is the present plan of the committee.

The Clerk read as follows:

The appropriation of $30,000 for the fiscal year 1928 for a fish-cultural station as an auxiliary to the station at Leadville, Colo., is continued available for such purposes during the fiscal year 1930.

Mr. NEWTON. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. NEWTON: Page 88, after line 6, insert:

"For construction, repair, alteration, and improvements to buildings and walls at the fish-cultural station at La Crosse, Wis., $10,000."

Mr. SHREVE. Mr. Chairman, the committee will accept the amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

For furniture and filing cases, $60,000.

Mr. O'CONNELL. Mr. Chairman, I move to strike out the last word for the purpose of getting some information from the committee about this Patent Office item. May I ask if anything has been done in the Patent Office about arranging some method of taking care of the patent papers in that building? I have had occasion to go there several times on patent matters, and I have found that priceless information in the way of original records are left there and in case of fire we would lose them all. There are no duplicates. I have had occasion several times also to ask the men in charge if steel cabinets or safes of any kind are provided to take care of that material. They could not be duplicated in case of loss, and the thing is very serious.

Mr. SHREVE. Mr. Chairman, we realize that situation, and that is one of the reasons for the Archives Building. Eventually all of these things will be taken care of in fireproof buildings. We are going at the matter as fast as we can. We did enable the Patent Office to get some steel filing cabinets, and we tried in that way to help them.

Mr. O'CONNELL. Have those patent records been taken off the floors and off the top of these wooden structures?

Mr. SHREVE. Many of them. A number of them were taken off last year. We gave them $65,000 for that one item.

Mr. O'CONNELL. We ought to do something about it, because the matter is very serious. Those things could not be duplicated in case of fire.

Mr. SHREVE. That is true.

Mr. O'CONNELL. I withdraw the pro forma amendment.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Regulating immigration: For enforcement of the laws regulating immigration of aliens into the United States, including the contract labor laws; cost of reports of decisions of the Federal courts, and digests thereof, for the use of the Commissioner General of Immigration; salaries and expenses of all officers, clerks, and employees appointed to enforce said laws, including not to exceed $178,160 for personal services in the District of Columbia, together with persons authorized by law to be detailed for duty at Washington, D. C.; traveling expenses; maintenance expenses of insane alien deportees detained abroad while en route to the country of destination; enforcement of the provisions of the act of February 5, 1917, entitled "An act to regulate the immigration of aliens to and the residence of aliens in the United States" (U. S. C. pp. 133–143, secs. 138–178), and acts amendatory thereof and in addition thereto; necessary supplies, including exchange of typewriting machines, alterations and repairs, and for all other expenses authorized by said act; preventing the unlawful entry of aliens into the United States by the appointment of suitable officers to enforce the laws in relation thereto; expenses of returning to China all Chinese persons found to be unlawfully in the United States, including the cost of imprisonment and actual expenses of conveyance of Chinese persons to the frontier or seaboard for deportation; refunding of head tax, maintenance bills, and immigration fines upon presentation of evidence showing conclusively that collection was made through error of Government officers; all to be expended under the direction of the Secretary of Labor, $7,915,000: *Provided*, That $1,868,440 of this amount shall be available only for coast and land-border patrol: *Provided further*, That the purchase, exchange, use, maintenance, and operation of motor vehicles and allowances for horses, including motor vehicles and horses owned by immigration officers when used on official business required in the enforcement of the immigration and Chinese exclusion laws outside of the District of Columbia may be contracted for and the cost thereof paid from the appropriation for the enforcement of those laws, under such terms and conditions as the Secretary of Labor may prescribe: *Provided further*, That not more than $150,000 of the sum appropriated herein may be expended in the purchase and maintenance of such motor vehicles, and of such sum of $150,000 not more than $125,000 shall be available for the purchase and maintenance of motor vehicles for coast and land-border patrol.

Mr. BOX. Mr. Chairman, I move to strike out the last word. It is not my purpose to raise any issue with the Committee on Appropriations concerning this appropriation. I do, however, want the House to understand the fact as I believe it to be. First, I will say the organization for the enforcement of the immigration and deportation laws is not adequate. It has been presented to the House time after time. Members of the Committee on Appropriations have urged that the Committee on Immigration and Naturalization ought to report some further legislation dealing with the subject. I believe the reporting of such legislation would constitute a congressional mandate which would authorize and require the department to extend the organization, and that they would gladly do it. The appropriation of such additional funds ought to be made. I will not undertake to say to the House just what is needed. It is an important and rather serious undertaking. I certainly would have to have further advice as to specific details and directions before undertaking to specify the exact amount required. The amount needed is large. This work is suffering. I regret that the Committee on Immigration and Naturalization has not reported the legislation mentioned. I hope that it can and will be done soon, and that when the matter comes up again it will have the sympathetic consideration of the Committee on Appropriations. I would like it very much if something could be done now, even if the measure of relief granted is small.

Mr. OLIVER of Alabama. Mr. Chairman, the needs for an increased appropriation were also called attention to by the gentleman from New York [Mr. SNELL], and I recognize that the gentleman from Texas [Mr. Box] entertains the same views. The committee have felt that we should have more inspectors, but, in view of the pendency of legislation which we think may greatly aid the department in carrying out this work in an economical way, we hesitated about increasing the amount of the appropriation. However, there are some emergency needs, as the gentleman from New York has pointed out, and as the gentleman from Texas states. After consultation with the chairman I have offered an amendment to increase this appropriation by $50,000, and I will ask the chairman if it meets with his approval?

Mr. SHREVE. I am very much pleased to join with the gentleman from Alabama in authorizing this money, because I am quite familiar with the situation described by Mr. SNELL to-day, and I know they need the money.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. OLIVER of Alabama: Page 110, line 14, strike out the figures "$7,915,000" and insert in lieu thereof the figures "$7,965,000"; and, in line 15, strike out the figures "$1,868,440" and insert in lieu thereof the figures "$1,918,440."

Mr. TILSON. Mr. Chairman, I wish to ask a single question of the gentleman in charge of the bill. Under the item, "Bureau of Immigration," the increase in appropriation for salaries alone is very material, the percentage of increase over last year being very large. I am wondering what is the reason for this?

Mr. SHREVE. I am very glad the gentleman mentioned that, because it is all occasioned by the Welch Act; not quite all.

Mr. TILSON. From what we learn from the papers nobody had an increase under the Welch Act. At any rate, everybody seems dissatisfied with the bill. Who gets this increased sum?

Mr. O'CONNELL. All the employees of the department receiving more than $7,500.

Mr. TILSON. Those employees certainly do not get the amount appropriated here. There are only a few of these employees——

Mr. SNELL. Five hundred and eighty-five thousand dollars.

Mr. TILSON. It is a tremendous increase for salaries alone. Is it all due to the Welch bill?

Mr. OLIVER of Alabama. The gentleman will be interested to know that the committee made an appropriation which they felt would be used to increase the pay of some of the border patrol and some of the inspectors. However, before it was effective the Welch bill was passed, and the department took the money with which it was expected to increase pay and used it in the employment of additional inspectors. The Welch bill carried the increase of salary.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

General expenses: For compensation, to be fixed by the Secretary of Labor, of officers, clerks, and employees appointed for the purpose of carrying on the work of the Bureau of Naturalization, as provided in the acts authorizing a uniform rule for the naturalization of aliens throughout the United States, and establishing the Bureau of Naturalization, approved June 29, 1906, and March 4, 1913, and subsequent acts (U. S. C., pp. 157–166, secs. 351–416), including not to exceed $74,420 for personal services in the District of Columbia, of which amount $10,000 shall be available only for compensation of temporary employees; traveling expenses, including not to exceed $400 for expenses of attendance at meetings concerned with the naturalization of aliens when incurred on the written authority of the Secretary of Labor; streetcar fare, telegrams, verifications of legal papers, telephone service in offices outside of the District of Columbia; necessary supplies and equipment for the Naturalization Service; not to exceed $25,000 for rent of offices outside of the District of Columbia where suitable quarters can not be obtained in public buildings; and for mileage and fees to witnesses subpœnaed on behalf of the United States, the expenditures from this appropriation shall be made in the manner and under such regulations as the Secretary of Labor may prescribe, $790,030: *Provided*, That no part of this appropriation shall be available for the compensation of assistants to clerks of United States courts.

Mr. BOX. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. BOX. I do this, Mr. Chairman and gentlemen, for the purpose of calling attention to the facts stated here in the discussion this afternoon in connection with naturalization and the laws within the respective States giving the right of suffrage to unnaturalized aliens. My information is that very few of the States confer that right under their present statutes. Formerly a great many States did not allow any declarant alien the privilege of voting. Among those were my own State, Texas, and several others, which I do not recall at this moment, but Texas has during recent years ended that practice and now requires that the foreign born be naturalized in order to vote. My information is that every State which formerly permitted declarants to vote has amended its laws in that respect, so that none of them now allows declarants the right of suffrage. If there are any States which now permit declarant aliens to vote, I will thank the gentlemen from such States to correct me.

Mr. HOCH. Mr. Chairman, will the gentleman yield there?

Mr. BOX. Yes.

Mr. HOCH. It was formerly true in Kansas. A foreigner was allowed to vote when he had declared his intention to become a citizen, but that right is not allowed now. I understand it is allowed in a few other States.

Mr. BOX. I shall not attempt to contradict the statement that it is allowed in some States, but I think the statutes of such States have been amended so that that can not now be done. Certainly not more than one or two States allow it. I believe that none of them do.

Mr. SNELL. It ought not to be done anyway.

Mr. O'CONNELL. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New York moves to strike out the last word.

Mr. O'CONNELL. I move to strike out the last two words.

Mr. Chairman and gentlemen, I have made this pro forma motion for the purpose of asking the distinguished chairman of the subcommittee in charge of this bill what, if anything, has been done with respect to making a larger appropriation for the conduct of the naturalization bureau in the city of New York? I have occasion repeatedly to call at that office in the interest of applicants for final papers toward citizenship, and I want to take this opportunity to say a word to the House in appreciation of the resident commissioner of immigration, Hon. Merton A. Sturgis, one of the most painstaking and hard-working officials in the service of the country. At one time, a year or two ago, his office was behind 25,000 cases. It was impossible to handle them for lack of help due to inadequate appropriation, perhaps by this committee, or due to the recommendation of the Director of the Budget. In this case we have a penny-wise and pound-foolish policy. There are 25,000 applicants at that one office who are anxious to pay the United States the sum of $4 each, a total of $100,000, which we are unable to receive because of the shortage of office assistants. This committee will never receive any complaint of these conditions from Mr. Sturgis or any of his hard-working assistants, whose loyalty to the service induces them voluntarily to struggle against insuperable odds to make the office function. But I personally know the situation and it is my duty to bring to the attention of my colleagues of the House the real facts as I know them to exist in the New York Naturalization Bureau. Has the chairman and his committee considered a large appropriation?

Mr. SHREVE. Yes. We have increased that appropriation by $100,000.

Mr. O'CONNELL. That silences me. It is a wise and salutary as well as a business appropriation.

Mr. BOX. I would like to inquire of the gentleman if the State of New York permits declarants to vote before they become naturalized?

Mr. O'CONNELL. So far as I know, it does not permit it.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For traveling expenses of officers, special agents, and other employees of the Children's Bureau; experts and temporary assistants, to be paid at a rate not exceeding $6 a day, and interpreters to be paid at a rate not exceeding $4 a day when actually employed; purchase of reports and material for the publications of the Children's Bureau and for reprints from State, city, and private publications for distribution when said reprints can be procured more cheaply than they can be printed by the Government, $59,200: *Provided*, That appropriations herein made for the Children's Bureau shall be available for expenses of attendance at meetings for the promotion of child welfare when incurred on the written authority of the Secretary.

Mr. COCHRAN of Missouri. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Missouri moves to strike out the last word.

Mr. COCHRAN of Missouri. I rise to call your attention to the proviso at the end of the paragraph. Part of this appropriation is made available for officials of the Children's Bureau for expenses of attendance at meetings for the promotion of child welfare. A short time ago the director of the bureau appealed to Congress for an extension of the maternity and infancy act, asserting if the time was extended to July 1, 1929, the objective, that of stimulating the States to activity, would be accomplished.

As soon as Congress passed the law granting this extension officials of the bureau increased their activity to have the law reenacted. Speaking before women's clubs the officials picture a situation that arouses indignation among the uninformed because of the repeal of this act. It has been done in my city and I have received appeals from organizations immediately after the departure of the propagandists.

The last conference I had prior to my departure for Washington to attend the opening of this session was with a committee of ladies representing a league that is very active along this line. There were four ladies, as I recall, each a chairman of a separate committee. I was asked to support treaties when I had no voice in such matters, was questioned as to my attitude on foreign affairs, as to my views on the infancy and maternity act, and numerous other matters properly of interest to State legislatures, but having no place before the United States Congress.

I told the ladies of my views, which I had expressed time and again during the campaign. My opposition to all Federal-aid projects is pronounced. River and harbor improvement is a proper charge upon the Treasury of the United States, but the

many projects authorized by Congress, for agriculture and other activities, are simply to compel State legislatures to appropriate money if they desire to share in Federal aid, which is nothing more than taking money from the taxpayers by the Federal Government and sending it back to the States from which it is collected. In some instances, however, more money is taken from a State than is returned, because the larger or richer States provide funds for such activities in the smaller States.

Connecticut, Illinois, and Massachusetts have never availed themselves of Federal aid under the infancy and maternity act. The money collected from the tax payers of those States for this purpose has gone to others. If money from this appropriation is to be used to permit officials of the Children's Bureau to attend meetings the Secretary of Labor should not only scrutinize carefully every request but he should serve notice upon those connected with the bureau that in the future Government funds, and time that belongs to the Government, are not to be used for the purpose of inducing individuals and organizations to urge upon their members of Congress the advisability of enacting legislation that would enlarge the activities of this bureau. For 20 years the United States Bureau of Public Health has issued and distributed bulletins dealing with the care of infants and diseases of infants. The Children's Bureau issues pamphlets along the same line. Take the bulletin, Infant Care. The Children's Bureau has distributed millions of copies of this publication while the Bureau of Public Health continues to print and enlarge its bulletin Care of the Baby, which it has been distributing for over 20 years. Originally a four-page pamphlet, Care of the Baby, has grown to manhood and is now over 100 pages. Infant Care has likewise grown until now we find the revised issue contains 118 pages. I admit both are valuable publications, but I do not see the necessity of the Government issuing two bulletins at the taxpayers' expense upon the same subject. The Children's Bureau is a statistical-gathering bureau, work that properly belongs to the Census Bureau, and work that can be done more economically by the Census Bureau.

If we are to have an extra session of Congress let us hope that some attention will be paid to the necessity of repealing some of the hundreds of useless laws now upon the statute books, including the ones creating useless bureaus and commissions. Then, and not until then, will Government expenditures be reduced so as to enable a reduction of any moment in the taxes of the overburdened taxpayers of the country.

Under the infancy and maternity act $50,000 of the million appropriated annually was used for administration purposes. The employees lose their positions July 1. The hearings show the bureau desires to retain them, for they requested $50,000 to start a study of juvenile delinquency. I want to compliment the committee for declining to authorize the appropriation.

I am in favor of my State appropriating a sufficient amount, an amount the officials think is necessary to carry out the purposes of the maternity and infancy act and all other welfare measures, but I am opposed to the Federal Government exercising any supervision over this work. The people of Missouri and the legislature of my State are capable of handling all such matters without interference from the Federal Government. They are on the scene and know better than either the legislative or executive branch of the Federal Government what is necessary for the welfare of the men, women, and children of their community. You will find that our women and children will not be neglected.

I believe that all Federal-aid projects advocated solely for the purpose of stimulating the States to appropriate money should be repealed, and I will even go so far as to say that I am ready now to vote to set a date to discontinue Federal aid for roads, say, in 1933 or 1934. The States are entitled to notification in advance, and I think four or five years is sufficient. The policy of Federal aid is not sound and unless a great emergency exists can not, in my opinion, be defended.

Mr. OLIVER of Alabama. Will the gentleman yield?

Mr. COCHRAN of Missouri. Yes; with pleasure.

Mr. OLIVER of Alabama. I wish to say, in reply to what the gentleman from Missouri has said, that I do not think he will find very strong sentiment in the House to support any bill denying appropriations for good roads, nor will he find very sympathetic interest in the House to the denial of other appropriations to which the States are asked to contribute.

In so far as maternity legislation is concerned, that matter has been before the House a number of times. It was only contemplated by the original act that help should be extended for a few years, and it is interesting to note that 46 States accepted it and report excellent results therefrom. The law has been well administered by the bureau having it in charge, according to the information submitted to our committee.

Mr. COCHRAN of Missouri. Let me call the gentleman's attention to the fact that after the original law was passed it was learned that the legal definition of an infant was a boy or girl until it had reached its majority, and if you will go over the allocations of money made by this bureau to many States you will find that the money has not been spent on infants in some of the States, but that it has been used to take care of children in school, up to the age of 16 and 17 years, and it has also been spent in making all kinds of investigations affecting grown children. The money has not been spent all these years, as Congress intended, for the care of the mother and child at time of birth. I have the facts in my office if the gentleman desires to see them. As to the sentiment in Congress, it will change when the sentiment back home changes, as it has done here time and again, and when the people are properly informed on the subject of Federal aid he will see a change in sentiment both here and at home.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

The Clerk concluded the reading of the bill.

Mr. SHREVE. Mr. Chairman, I ask unanimous consent that the Clerk may correct the totals.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. SHREVE. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to, and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and Mr. TILSON having assumed the chair as Speaker pro tempore, Mr. LEAVITT, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 15569) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1930, and for other purposes, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to, and that the bill as amended do pass.

Mr. SHREVE. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gross. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER pro tempore. The question is now on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SHREVE, a motion to reconsider the vote by which the bill was passed was laid on the table.

INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 15089, the Interior Department appropriation bill, disagree to the Senate amendments, ask for a conference, and appoint conferees.

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent to take from the Speaker's table H. R. 15089, the Interior Department appropriation bill, disagree to the Senate amendments, ask for a conference, and appoint conferees. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, may I ask the gentleman whether he has consulted with the gentleman from Colorado [Mr. TAYLOR], the ranking Democratic member of the subcommittee, or the gentleman from Oklahoma [Mr. HASTINGS], who is on the subcommittee?

Mr. CRAMTON. I have consulted with the gentleman from Colorado [Mr. TAYLOR], who is the ranking minority member, and my action is in accord with his wishes.

Mr. GARNER of Texas. Was an amendment placed on the bill by the Senate touching an irrigation project at El Paso?

Mr. CRAMTON. I think there is no such amendment in the bill. My information is that no amendment has been put in the bill affecting that matter. I know this, that no such amendment was put in the bill by the Senate committee. What action was taken on the floor of the Senate this afternoon, I do not know.

What the gentleman has in mind is the Rio Grande reclamation project. The people there were disturbed because our committee reduced the cash appropriation for 1930, $50,000, if I remember aright, and provided a larger reappropriation of unexpended construction funds from this year. Their informa-

tion was that there would not be available as large an amount of unexpended funds as we proposed to reappropriate. When it was pending in the House I made that statement. Request was made by the bureau officials in the field, and information has been received that the amount we proposed to reappropriate, $125,000, will be available for this purpose; and this being true, the total that would be available for 1930 for operation and maintenance would be $375,000, and, so far as I know, the situation is satisfactory to those who are interested.

Mr. GARNER of Texas. In other words, the $375,000 will be sufficient to carry on the project for the next fiscal year?

Mr. CRAMTON. As I understand it, that is satisfactory to all concerned. It is the amount recommended by the Budget, but arranged a little differently, and now that they are assured that the $125,000 will be available, I think that removes any objection.

Mr. WELCH of California. Will the gentleman yield?

Mr. CRAMTON. I yield.

Mr. WELCH of California. Is there anything involved in the conference with reference to the city of San Francisco and the grant in Hetch Hetchy and Yosemite National Park?

Mr. CRAMTON. My information is that the only amendment affecting Yosemite at all is an amendment with reference to the appropriation for development of a water supply on Glacier Point. I am sure there is nothing involved in the conference with reference to the Hetch Hetchy controversy with San Francisco.

Since the gentleman from California has mentioned this subject, perhaps this would be as good a time as any for me to make a statement to the House about this general subject, which I discussed at some length at the last session of Congress, and in that discussion the gentleman from California [Mr. WELCH] and the lady from California [Mrs. KAHN] also joined. I may say there were three matters then under discussion. As to two of them my information is that the controversy is on the way to an entirely satisfactory termination.

In the matter of roads, as I understand, although I have not definite and positive information, which the city of San Francisco was to build under the terms of the Raker Act, the city has manifested its purpose to comply with the requirements of the Interior Department.

In the matter of the administration of the park, the enforcement of proper sanitary arrangements, the city this season has manifested a willingness to leave such administration in the hands of the park authorities, where it belongs, and there appears to be no continuance of this controversy.

As to the third matter, the sale of power to the Pacific Gas & Electric Co. by the city of San Francisco, which I have contended is in conflict with the provisions of the Raker Act, where it is set forth that none of the power developed shall be sold to any person or corporation for resale, with certain drastic penalties provided in the act, I am not so well advised as to the situation.

Personally, I feel strongly that the explicit conditions of the Raker Act, which the city of San Francisco accepted, must be complied with by the city. I think, however, no one has any desire to require the impossible or to ask the city to throw away power while acquiring a proper distribution system. Personally, I would feel much more at ease about the situation if I were satisfied as to the good faith of the government of San Francisco in their efforts to acquire a proper distribution system. One thing the city could do to reassure those of us who have this feeling would be to do that which is in their power to do now, and that is to arrange to deliver to itself in San Francisco enough of this electricity to meet its own needs, instead of continuing as now to sell at a very low price to the Pacific Gas & Electric Co. and immediately buy back at a much higher price. As I understand, the proper connections could be made so that it would use this amount of electricity itself at a fairly small cost. If it would do this and then proceed as rapidly as conditions permit to acquire a sufficient distribution system—and this does not mean they have to buy all the power companies of San Francisco and vicinity and thereby possibly make the proposition so big they can not carry it through—the power situation would look much different to Congress. But at present it carries potentialities of serious complications.

I am pleased to make this statement in connection with my answer to the question of the gentleman from California.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER pro tempore appointed as conferees on the part of the House Mr. CRAMTON, Mr. MURPHY, and Mr. TAYLOR of Colorado.

SENATE BILL 1710 TO CREATE A HYDRAULIC LABORATORY IN THE BUREAU OF STANDARDS

Mr. O'CONNOR of Louisiana. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill S. 1710, a bill of Senator RANSDELL'S, and to publish a letter from the engineering council on the subject.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. O'CONNOR of Louisiana. Mr. Speaker, the reports of our Army engineers on river and harbor projects are generally believed to be expressed in technical terms and a phraseology as puzzling to the average layman as the hieroglyphics or cuneiform inscriptions on a Babylonian brick. And a discussion by engineers, both civilian and Army, of a bill, the purpose of which is to create a hydraulic laboratory in the Bureau of Standards, would prove about as attractive to the ordinary American, who roots for the home baseball team and yells for his favorite prize fighter, as a visit to the Smithsonian Institute or being a member of a coroner's jury. In other words, engineering subjects are left by an overwhelming majority of Democrats and Republicans, male and female, to the solemn-looking folk who believe they are pundits, and, perhaps, maybe they are correct in this assumption.

If a person believes he is a member of the sublimated Esoterics, encourage him and assure him that there is a land fairer than this, is the attitude of the twice-a-week movie man American, and I am one of them and strong for the bloc. But every now and then even the highest priests of every profession will fling temporarily into the discard learned jargon and terrible, exhausting efforts to look superior and will talk our language and go after one another in such a fashion and gusto as to excite the plaudits of the "bleachers."

But, seriously, the discussion of Senate bill 1710, introduced by Senator JOSEPH E. RANSDELL, and which passed the Senate without opposition, before the Rivers and Harbors Committee of the House, by the foremost engineers of the United States was undoubtedly one of the most interesting legislative controversies I ever had the good fortune to hear and words used could be easily understood by the unpretentious toiler who wears a blue jumper or overall and a woolen hat.

The claims made by the civilian engineers of the wonderful results that would flow from the creation and establishment in the Bureau of Standards of a hydraulic laboratory took on a coloring that gave the subject a romantic aspect and hue, while the recital by Gen. Edgar Jadwin of the accomplishments and the triumphs of the Army Engineers here and "over there," who were content to go unnoticed, unheralded, and in many cases unknelled, was sufficiently inspiring to make a fellow look at the flag and shout "Hurrah for the Engineers!"

Senate 1710 has not been reported out by the committee. It looks like it may not be reported out and it looks like the rivers and harbors bill reported out at the last session will not be considered by the House, in view of the attitude of the President, because be it remembered that when the President sneezes most Republicans get the flu. The rivers and harbors bill carries a provision which some fellows who are in danger of blowing the gas out, say is analogous to the proposed S. 1710, the Ransdell bill.

Therefore, the letter which I give below may look like a postmortem or, what is worse, a postprandial address. But who can tell? It may galvanize the corpse and stimulate and motivate and actuate the Rivers and Harbors Committee into reporting out a bill, the proponents of which claim would do more for the inventive genius of America than has been done legislatively since the formation of the Union by providing a channel in which the spirit, the divine afflatus of invention could move unobstructed, unhindered, and unlock the gates of what is still mystery:

AMERICAN ENGINEERING COUNCIL,
Washington, D. C., December 18, 1928.

Hon. JAMES O'CONNOR,
House Office Building, Washington, D. C.

DEAR SIR: American Engineering Council is an organization, the membership of which is made up of 24 engineering and allied technical professions of the United States, which organizations have a combined membership of approximately 43,000 professional engineers. Council functions for the purpose of expressing the views of the engineering profession in regard to national questions of an engineering character.

In keeping with the objects and purposes of American Engineering Council, it has supported ever since its inception the idea of the establishment in the Bureau of Standards of a national hydraulic research laboratory such as embodied in Senate bill 1710. Last April, representatives of American Engineering Council, in conjunction with

eminent hydraulic engineers from many parts of the United States, appeared before the Committee on Rivers and Harbors and submitted testimony showing the desirability and need for establishing a national hydraulic research laboratory under the Bureau of Standards.

Subsequent to these hearings, your committee has taken no action concerning Senate bill 1710. It has, however, in H. R. 14066, section 7, incorporated a provision authorizing the establishment of a hydraulic laboratory under the direction of the War Department.

May we respectfully state that this provision does not satisfy the need for a national hydraulic research laboratory nor the wishes of those most interested and concerned.

We have the following thought regarding the entire matter:

1. Section 7, H. R. 14066, authorizes the Chief of Engineers to carry on work which he now has sufficient authority to do. In fact, he is now engaged in such work. He has recently employed Prof. W. B. Gregory, Tulane University, New Orleans, to conduct researches on models in connection with the Bonnet Carre spillway near New Orleans.

2. A national hydraulic-research laboratory is needed not only for the purpose of conducting experiments for river and harbor projects but also for the purpose of conducting scientific hydraulic experiments for any citizen who submits a plausible problem and is willing to pay for the work involved in conducting the experiments.

3. Such a laboratory is also needed for the purpose of aiding in the solution of hydraulic problems of such Federal agencies as the Geological Survey, Federal Power Commission, Reclamation Service, and others.

4. The hydraulic laboratory should be under the direction and control of the Bureau of Standards, because through the years it has developed a scientific attitude and technique requisite for the handling of such projects as may be undertaken in such a laboratory. Furthermore, it has on its staff men trained in the several sciences, knowledge of which would be required of the staff of such a laboratory if it is to function with the greatest efficiency and effectiveness.

5. We direct your attention to the testimony of President-elect Hoover as it appears on pages 36–37 of the hearings wherein he gave 10 excellent reasons why this laboratory should be in the Bureau of Standards.

6. The Director of the Bureau of the Budget has reported that the bill, S. 1710, is not in conflict with the President's financial policy.

7. The bill has been passed by the Senate.

We do not desire to take from the Corps of Engineers any authority to conduct whatever researches it may deem necessary in prosecuting its work of flood control. However, for the reasons set forth by our representatives at the hearings and in view of the facts herein stated, we earnestly and respectfully request that you recognize the widespread and pronounced sentiment in favor of this bill by favorably reporting it to the House of Representatives at an early date. We wish to assure you that the action requested will be greatly appreciated by all those thoroughly conversant with and earnestly concerned with the development of the hydraulic science and practice of the Nation. It is an important matter, because without its proper development the Nation will not realize to the fullest degree the potential value of its hydraulic possessions.

Respectfully yours,

L. W. WALLACE, *Executive Secretary.*

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

Mr. THATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the bill just passed and include a statement made by myself before the subcommittee having in charge the hearings on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. THATCHER. Mr. Speaker, it is undoubtedly true that the splendid service rendered to the American people during the past eight years by the Department of Commerce largely contributed to the nomination and election of Herbert Hoover as President of the United States. One of the most important arms or divisions of the Department of Commerce is that of the Bureau of Foreign and Domestic Commerce, operating under the supervision and direction of one of the ablest men in public life to-day, Dr. Julius Klein. This bureau is performing for the American manufacturer, farmer, and business man a service of the most invaluable character. As a Member of Congress, and also as a member of the House Appropriations Committee, it has been my pleasure to cooperate in every way possible with the Department of Commerce in general, and with the Bureau of Foreign and Domestic Commerce in particular, touching the work of the department and the bureau. I have seen the work of this bureau grow from year to year, and the extent of its effective usefulness increase many fold.

Two or three years ago I aided in securing the establishment of some additional branch offices of this bureau, one of which was located in Louisville, within my congressional district. During the present session I also joined in an effort to secure further extension of the work of this bureau, and to that end on December 8, 1928, appeared before the subcommittee of the House Committee on Appropriations, conducting hearings on the Department of Commerce appropriation bill for 1930, and made a statement in behalf of such further extension, and included therewith some data concerning the work of the Louisville office of the bureau. The Louisville office is performing a very fine service in the Kentucky and southern Indiana region, and is considered one of the most progressive and efficient branch offices of the entire bureau service.

Under the leave granted me therefor, I include as a part of these remarks the statement made by me before the subcommittee referred to. It is as follows:

SATURDAY, *December 8, 1928.*

EXTENSION OF ACTIVITIES OF DISTRICT OFFICES, BUREAU OF FOREIGN AND DOMESTIC COMMERCE

STATEMENT OF HON. MAURICE H. THATCHER, A REPRESENTATIVE IN CONGRESS FROM THE STATE OF KENTUCKY

Mr. SHREVE. We shall be pleased to hear you, Mr. THATCHER.

Mr. THATCHER. Mr. Chairman and gentlemen, I hesitate, as a member of the Appropriations Committee, to suggest any increase of any item of appropriation. I know your problems. I do not know what your Budget totals are and what you have to consider, but I do believe that this branch of the Government's work is one of greatest value to the country.

Two or three years ago, when I came before this subcommittee in conjunction with some other Members to secure the establishment of some additional branch offices, the subcommittee was very kind and granted the appropriation, after we had gotten the Budget to make a supplemental estimate, after further consideration by the Budget, and by the President himself, as a matter of fact.

So far as I know, those offices have functioned very efficiently. I know that one of those offices has been located in my own city of Louisville, and the increased trade done by the merchants and the manufacturers in the Louisville region is running about $400,000 a year, and now, during the current fiscal year, it probably will run over $500,000.

There is need for some expansion there, and I take it that there is the like reason for the request on behalf of some of the other offices in the country.

My understanding from the Department of Commerce is that after the establishment of about 8 or 10 more branch offices in the country at large, they will have, perhaps, a sufficient number of branch offices, and that thereafter the work in this line should be restricted generally to the matter of expansion.

Of course, the offices that have already been established are rendering efficient service. A number of them, at least, need help. They have to grow, and unless they are allowed some legitimate expansion, it means that the demands will be very insistent for the establishment of other offices, and it will be really much cheaper to expand these offices which are strategically located, where they will serve the various sections in the best possible way. It would be better to give them a reasonable expansion than to assume the overhead of new offices.

I am speaking generally for the entire service. I feel that if a reasonable increase could be made in this item, with the discretion vested in the Department of Commerce to allocate or to distribute the amount in such a way as to serve the purpose of trade in the best possible manner, this would be the wise way to handle it.

I know that, as a member of the Subcommittee on Appropriations for the Treasury and Post Office Department, I was very glad to vote the other day with Mr. BACON, also a member of that subcommittee—who is here with me to-day—and all of the subcommittee members, in fact, for the full amount of appropriations asked by the Budget for the Post Office Department for the extension of these air mail routes to Latin America.

One of the objects of the extension of the air mail service to Latin America is to increase our trade there, and help our trade relations in that portion of the world.

To foster our trade relations effectively we must have these branch offices functioning in the most efficient manner possible.

It was brought out in those subcommittee hearings that Germany is trying to establish all through Latin America—Central and South America—air mail routes. France is putting on an air line from the West Coast of Africa to Brazil, and is anxious to extend its air mail service through South America. Of course, we have to meet that situation. The trade of Latin America in the future must depend largely upon, or be determined by, air-mail contracts; but these contracts will not be of themselves sufficient—so far as we are concerned—unless we are able to supply our merchants and our manufacturers with first-hand definite information, so that they may avail themselves of the business conditions in these countries, and in that way enable them to get that trade.

It seems to me, therefore, gentlemen, that there is a real vital need for an increase in this item; $19,000, I believe, is what has been sug-

gested in the Budget figure. That does not seem to me at all to be adequate. I do not see how it will allow any expansion that amounts to anything.

I think that the service these branch offices are rendering—most of them, at least—is of such a character as fully to justify favorable consideration by this committee of this branch of the work.

Take the Panama Canal; that is a great agency of our Government. It gives us a contact with Latin America that nothing else could give. We should fully utilize it. The canal, the establishment of these air mail routes, and the visit of the President elect to Latin America—which, while primarily one of good will, carries in its train the incidental consideration of trade development—these are the things that are going to help us. The trade with Latin America must in large measure constitute the foreign trade of our country in the future. It is a great, undeveloped country, and I believe that through the agency of these branch offices we can get more for the amount of money invested than, perhaps, through any other agency of the Government.

With the permission of your committee, I should like to include a short statement of the business of the Louisville office, as typical of the other offices.

If you can see your way clear to make it, I believe that there should be a substantial increase in this item for this purpose. The sum of $100,000 has been suggested as an appropriate amount for this purpose.

The statement above referred to is as follows:

LOUISVILLE DISTRICT OFFICE

The number of current clients of this office during the fiscal year 1927–28 was 330.

In 1926–27, 11 firms reported voluntarily that sales made and savings effected through the services of the district office totaled $87,960, or an average of $7,995 per firm. In 1927–28, 35 firms reported a total of $392,626, or an average of $11,217 per firm. Both years a large number of firms reported that it was not possible to give a dollars-and-cents statement on the business resulting through the office, but stated that definite benefits had been obtained. During the current fiscal year the increased business through the Louisville office should run over a half million dollars.

Services rendered: 1926–27, 34,794; 1927–28, 39,583; increase, 14 per cent.

Services rendered consist of outgoing letters, inquiries made by visitors and telephone calls, and the furnishing of trade opportunities, trade lists, and bureau reports.

In order to continue the same high-grade service of previous years the daily overtime of the five employees totaled 13¼ days during the fiscal year 1927–28. The personnel of this office consists of a manager, an assistant manager, two clerks, and a messenger.

There is urgent need for additional personnel in order that the amount of overtime be reduced and at the same time the service to exporters be improved. Additional office equipment, such as filing cabinets and bookcases, are needed, so that with proper and convenient filing, furnishing of requested information may be expedited.

Increased travel funds are needed. It has been learned through experience that the exporter is best served through personal contact with the district office, and for this reason the manager should have sufficient travel funds, so that he may personally cover his territory at least once a year. Under present conditions this is impossible.

Louisville is one of the great industrial centers of the South. With nine trunk railroads and all-year river transportation, it is a natural distributing center. The leading industry is tobacco. Exports of tobacco from Kentucky in 1927 totaled $11,816,000. Louisville is the greatest manufacturing city in the United States south of the Ohio and Potomac Rivers and is rapidly growing in wealth and population.

LEAVE OF ABSENCE

Mr. JACOBSTEIN, by unanimous consent, was given leave of absence indefinitely on account of illness.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and under the rule referred, as follows:

S. 4461. An act to provide for the policing of military roads leading out of the District of Columbia; to the Committee on Military Affairs.

ADJOURNMENT

Mr. ACKERMAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock p. m.) the House adjourned until to-morrow, Friday, December 21, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Friday, December 21, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

First deficiency appropriation bill.
Independent offices appropriation bill.

COMMITTEE ON FOREIGN AFFAIRS

(10 a. m.)

Requesting the President to propose the calling of an international conference for the simplification of the calendar, or to accept, on behalf of the United States, an invitation to participate in such a conference (H. J. Res. 334).

SUBCOMMITTEE OF THE COMMITTEE ON INDIAN AFFAIRS

(10 a. m.)

For the relief of J. F. McMurray (H. R. 10741).

EXECUTIVE COMMUNICATIONS, ETC.

706. Under clause 2 of Rule XXIV, a communication from the President of the United States, transmitting supplemental estimate of appropriation for the Department of the Interior, Bureau of Indian Affairs, for the fiscal year 1929, amounting to $30,000 (H. Doc. No. 488), was taken from the Speaker's table and referred to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. HOWARD of Oklahoma: Committee on Indian Affairs. H. R. 13507. A bill to amend section 3 of Public Act No. 230 (37 Stat. L. p. 194); without amendment (Rept. No. 1967). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. LEAVITT: Committee on Indian Affairs. H. R. 14761. A bill for the relief of Clarence Stevens; with amendment (Rept. No. 1968). Referred to the Committee of the Whole House.

Mr. LEAVITT: Committee on Indian Affairs. H. R. 14981. A bill for the relief of Josephine Laforge (Sage Woman); with amendment (Rept. No. 1969). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. PARKER: A bill (H. R. 15621) to regulate interstate commerce by motor vehicles operating as common carriers of persons on the public highways; to the Committee on Interstate and Foreign Commerce.

By Mr. BACHMANN: A bill (H. R. 15622) to provide for the erection of a public building at New Martinsville, W. Va.; to the Committee on Public Buildings and Grounds.

By Mr. WILLIAMSON: A bill (H. R. 15623) providing for the erection of a summer White House in the Black Hills, S. Dak.; to the Committee on Public Buildings and Grounds.

By Mr. BYRNS: A bill (H. R. 15624) to restore Fort Negley, at Nashville, which was used and occupied by Federal forces during the Civil War; to the Committee on Military Affairs.

By Mr. CRAIL: A bill (H. R. 15625) to amend the act of May 24, 1928, entitled "An act making eligible for retirement, under certain conditions, officers and former officers of the Army, Navy, and Marine Corps of the United States, other than officers of the Regular Army, Navy, or Marine Corps, who incurred physical disability in line of duty while in the service of the United States during the World War"; to the Committee on World War Veterans' Legislation.

By Mr. ROY G. FITZGERALD: A bill (H. R. 15626) to provide compensation for members of the civilian military training camps who are injured in line of duty; to the Committee on the Judiciary.

By Mr. MACGREGOR: Resolution (H. Res. 275) to provide for the services of an assistant shipping clerk in the Doorkeeper's department; to the Committee on Accounts.

Also, resolution (H. Res. 276) to provide $200 per month for additional clerical assistance to the Committee on Accounts; to the Committee on Accounts.

Also, resolution (H. Res. 277) to provide for the services of an additional assistant clerk to the Committee on Accounts; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BYRNS: A bill (H. R. 15627) for the relief of Mary Frances McConnell; to the Committee on Claims.

By Mr. CRAIL: A bill (H. R. 15628) granting a distinguished service cross to James C. Burke; to the Committee on Naval Affairs.

By Mr. DAVENPORT: A bill (H. R. 15629) granting a pension to Sarah E. Butler; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 15630) granting a pension to Minnie V. Stahl; to the Committee on Pensions.

By Mr. ROY G. FITZGERALD: A bill (H. R. 15631) for the relief of William Dean; to the Committee on Military Affairs.

By Mr. FREE: A bill (H. R. 15632) granting a pension to Francis F. Beale; to the Committee on Pensions.

By Mr. GUYER: A bill (H. R. 15633) granting a pension to Fannie Neff; to the Committee on Invalid Pensions.

By Mr. HAUGEN: A bill (H. R. 15634) granting an increase of pension to Mattie M. Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15635) for the relief of George A. Hormel & Co.; to the Committee on Agriculture.

By Mr. HUGHES: A bill (H. R. 15636) granting a pension to Harriett Green; to the Committee on Invalid Pensions.

By Mr. JENKINS: A bill (H. R. 15637) granting a pension to Elizabeth Taylor Haskins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15638) granting a pension to Maywood Spence; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15639) granting a pension to Alban D. Philson; to the Committee on Pensions.

By Mr. KEARNS: A bill (H. R. 15640) granting a pension to Mary Lukemiers; to the Committee on Invalid Pensions.

By Mr. KNUTSON: A bill (H. R. 15641) to correct the military record of Vernon S. Ross; to the Committee on Military Affairs.

By Mr. LINTHICUM: A bill (H. R. 15642) for the relief of Matthew Edward Murphy; to the Committee on Claims.

Also, a bill (H. R. 15643) for the relief of Mary A. Cox; to the Committee on Claims.

Also, a bill (H. R. 15644) granting a pension to Carola M. Tonry; to the Committee on Pensions.

By Mr. O'BRIEN: A bill (H. R. 15645) granting an increase of pension to Amanda Bean; to the Committee on Invalid Pensions.

By Mr. STOBBS: A bill (H. R. 15646) granting an increase of pension to Elvira L. Aldrich; to the Committee on Invalid Pensions.

By Mr. STROTHER: A bill (H. R. 15647) granting a pension to Nancy Darling; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Tennessee: A bill (H. R. 15648) granting a pension to Hiram M. Graves; to the Committee on Pensions.

By Mr. TILSON: A bill (H. R. 15649) granting a pension to Ellen E. Hart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15650) granting an increase of pension to Emma M. Woodbury; to the Committee on Invalid Pensions.

By Mr. YON: A bill (H. R. 15651) for the relief of Leonidas L. Cochran; to the Committee on the Public Lands.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

8075. By Mr. CRAIL: Petition of Admiral Glass Camp, No. 36, United Spanish War Veterans, Los Angeles, Calif., favoring additional hospital facilities at the Soldiers' Home, Pacific Branch, Los Angeles County, Calif.; to the Committee on Military Affairs.

8076. By Mr. CULLEN: Preamble and resolutions unanimously adopted by the board of directors of the Maritime Association of the port of New York, at meeting held on December 12, 1928, stating that theft and pilferage of merchandise prevails to an alarming extent on the piers and generally in the harbor of New York, and serious and needless losses are thereby sustained, and that Congress should adopt such amendments to the laws as it may be found necessary to make through which to clothe our courts with power adequately to punish all parties found guilty of the charge of theft and pilferage; to the Committee on the Judiciary.

8077. By Mr. GARBER: Petition of J. G. Puterbaugh, president the McAlester Fuel Co., McAlester, Okla., urging support of the Pittman-Newton recapture bill; to the Committee on Interstate and Foreign Commerce.

8078. Also, petition of J. S. Flautt, secretary and sales manager of the Majestic Milling Co., Aurora Mo., indorsing House bill 15267, a bill to amend the tariff act of 1922; to the Committee on Ways and Means.

8079. Also, petition of W. R. Franklin, McLoud, Okla., member of the executive counsel of the Oklahoma Pharmaceutical Association, urging support of the Capper-Kelly bill; to the Committee on Interstate and Foreign Commerce.

8080. Also, petition of National Wheat Pool Committee, representing States of North Dakota, South Dakota, Minnesota, Indiana, Nebraska, Colorado, Kansas, Texas, and Oklahoma, urging passage of Senate bill 4602; to the Committee on Agriculture.

8081. By Mr. MORROW: Petition of the Bar Association of the State of New Mexico, indorsing House bill 13567, dividing the eighth judicial circuit and creating a new circuit to be designated as the tenth circuit; to the Committee on the Judiciary.

8082. By Mr. PEAVEY: Petition from members of the faculty and student body of the Superior State Teachers' College, at Superior, Wis., protesting against the proposed appropriation of $289,000,000 for 15 cruisers for the Navy, as suggested by the President; to the Committee on Naval Affairs.

8083. Also, petition by the members of district No. 4 of the Wisconsin Cooperative Creamery Association, petitioning that the tariff on casein be at least 5 cents per pound; to the Committee on Agriculture.

SENATE

FRIDAY, *December 21, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Almighty God, who dost fill us with yearnings of an infinite desire, with longings insatiable, with groanings that can not be uttered, abide with us this day as a Silence behind the voices of the world, as the Truth within its illusions. Purify our vision, that we may know as we are known; increase our faith, that we may lean wholly on Thee. May the spirit of duty and service ennoble all our work, and do Thou lift us far above the tyranny of detail into the larger freedom and fuller life of discovery which Thou hast revealed in Jesus Christ Thy Son, our Lord. Amen.

The Chief Clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes; requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. CRAMTON, Mr. MURPHY, and Mr. TAYLOR of Colorado were appointed managers on the part of the House at the conference.

The message also announced that the House had passed a bill (H. R. 15569) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1930, and for other purposes, in which it requested the concurrence of the Senate.

APPROPRIATIONS FOR STATE AND OTHER DEPARTMENTS

Mr. JONES. I ask that the appropriation bill just messaged from the House be laid before the Senate and referred.

The bill (H. R. 15569) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1930, and for other purposes, was read twice by its title.

Mr. JONES. Mr. President, I desire to say with reference to the Departments of State, Justice, Commerce, and Labor appropriation bill that I have called a meeting of the Subcommittee on Appropriations for half past 1 this afternoon. I have taken the matter up with the various department representatives. There will be only two or three small amendments to propose to the bill; so I hope to have the full committee act on the bill this afternoon in order that we may report it at once, that it may be called up to-morrow for consideration.

The VICE PRESIDENT. The bill will be referred to the Committee on Appropriations.

SENATOR FROM WYOMING

Mr. WARREN presented the credentials of JOHN B. KENDRICK, chosen a Senator from the State of Wyoming for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

CERTIFICATE OF ELECTION

THE STATE OF WYOMING,
EXECUTIVE DEPARTMENT.

Whereas, according to the official returns of a general election, held in the State of Wyoming on the 6th day of November, A. D. 1928, regularly transmitted to the office of the secretary of state and duly canvassed by the State board of canvassers, it appears that JOHN B. KENDRICK was lawfully elected United States Senator of the State of Wyoming.

Therefore, I, Frank C. Emerson, Governor of the State of Wyoming, do hereby certify that JOHN B. KENDRICK is duly elected United States Senator of the State of Wyoming for the term of six years, from the 4th day of March, A. D. 1929.

In witness whereof, I have hereunto set my hand and caused the great seal of the State to be hereunto affixed. Given at Cheyenne, the capital, this 12th day of December, A. D. 1928, and of the independence of the United States the one hundred and fifty-third.

FRANK C. EMERSON.

By the governor:
[SEAL.] A. M. CLARK, *Secretary of State.*

SENATOR FROM MONTANA

Mr. WALSH of Montana presented the credentials of BURTON K. WHEELER, chosen a Senator from the State of Montana for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

IN THE NAME AND BY THE AUTHORITY OF THE STATE OF MONTANA

To all to whom these presents shall come, greeting:

Know ye that I, J. E. Erickson, Governor of the State of Montana, do hereby certify that at a general election held in the State of Montana on the 6th day of November, A. D. 1928, pursuant to section 531 of the Revised Codes of the said State, BURTON K. WHEELER was duly elected to the office of United States Senator in and for the State of Montana, he having received the highest number of votes for said office as appears from a certified copy of the abstract of votes cast at said election now on file in my office.

And by virtue of the power vested in me by the Constitution and in pursuance of the laws I do hereby commission him, the said BURTON K. WHEELER, to be United States Senator hereby authorizing and empowering him to execute and discharge all and singular the duties appertaining to said office, and enjoy all the privileges and immunities thereof for a period of six years, beginning March 4, 1929.

In testimony whereof I have hereunto subscribed my hand and caused the great seal of the State of Montana to be affixed at Helena, Mont., the 10th day of December, A. D. 1928, and in the one hundred and fifty-third year of the independence of the United States of America.

By the governor: J. E. ERICKSON.
[SEAL.] JOHN W. MOUNTJOY,
Secretary of State.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a telegram in the nature of a petition from the Liga Social Sufragista, of San Juan, P. R., praying for the passage of the so-called Kiess bill, granting woman suffrage for Porto Rico, which was referred to the Committee on Territories and Insular Possessions.

He also laid before the Senate a telegram in the nature of a petition signed by ministers of Greensboro, N. C., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was ordered to lie on the table.

Mr. EDGE presented resolutions, which were referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

THE MARITIME ASSOCIATION OF THE PORT OF NEW YORK,
New York, December 18, 1928.

Hon. WALTER E. EDGE,
United States Senator, Washington, D. C.

DEAR SIR: We have the honor to transmit herewith preamble and resolutions unanimously adopted by the board of directors of the Maritime Association of the Port of New York, at a regular monthly meeting held on December 12, 1928:

"Whereas theft and pilferage of merchandise prevails to an alarming extent on the piers and generally in the harbor of New York, and serious and needless losses are thereby sustained; and

"Whereas notwithstanding the efforts of the department of police, instigated and supported by the bureau for suppression of theft and pilferage, these deplorable conditions still persist and the lawless element appears to be in the ascendency; and

"Whereas these conditions reflect discredit and opprobrium upon the facilities of the port of New York and are being quoted by those of other seaport cities who seek advantages to themselves at the expense of New York: Therefore be it

"*Resolved*, That the members of the board of directors of the Maritime Association of the Port of New York in the regular monthly meeting assembled this 12th day of December, 1928, beseech the mayor of the city of New York to proceed forthwith to organize a separate department of the police which shall have supervision of the water-front section of the city, and the waters of the harbor, and to designate as commissioner in charge of such department a man familiar with harbor conditions, whose appointment would meet with the approval of the important marine interests involved; and be it further

"*Resolved*, That our Representatives in Congress be called upon to support in Congress such proposed amendments to the laws as it may be found necessary to make, through which to clothe our courts with power adequately to punish all parties found guilty of the charge of theft and pilferage; and be it further

"*Resolved*, That a copy of these resolutions be sent to the mayor and all other members of the board of estimate of the city of New York and to the Senators representing the States of New York and New Jersey in the Senate of the United States, with an urgent request for their unanimous cooperation in this effort to suppress this growing menace to order and law observance."

We will appreciate whatever action you may take in the furtherance of our desires as expressed in the resolutions, and thanking you, we remain

Yours very truly,

J. C. REICHERT, *Secretary.*

Mr. EDGE also presented the petition of George S. Harris, dean of the New Jersey Law School, of Newark, together with petitions numerously signed by sundry sitizens of Newark and vicinity, all in the State of New Jersey, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

He also presented petitions of sundry citizens of Summit and vicinity, in the State of New Jersey, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. WARREN presented petitions from various churches, societies, and sundry citizens of Cheyenne, Guernsey, Torrington, Veteran, Lusk, Manville, Lance Creek, Node, Keeline, Jireh, Flattop, Lost Spring, Saratoga, Encampment, and Hanna, all in the State of Wyoming, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. CAPPER presented petitions of students of the Kansas State Agricultural College, at Manhattan, Kans., praying for the prompt ratification of the so-called Kellogg treaty for the renunciation of war, which were ordered to lie on the table.

Mr. JONES presented petitions of sundry citizens of Seattle, Spokane, Olympia, Tacoma, Sequim, Elwha, Everett, Garfield, Bothel, Enumclaw, and Portage, all in the State of Washington, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. KENDRICK presented numerous petitions from civic and religious organizations and sundry citizens of Sheridan, Buffalo, Big Horn, Kaycee, Gillette, and Douglas, all in the State of Wyoming, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. BURTON presented a petition of members of the faculty and staff of Ohio Wesleyan University, of Delaware, Ohio, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war and the rejection of the proposed naval building program, which was ordered to lie on the table.

He also presented petitions of sundry citizens of Dayton, Springfield, Ashtabula, Winona, Salem, and Lisbon, all in the State of Ohio, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. BLAINE presented a memorial of members of the faculty and students of Superior State Teachers College, at Superior, Wis., remonstrating against the adoption of the proposed naval building program, which was ordered to lie on the table.

He also presented petitions of sundry civic and religious organizations and citizens in the State of Wisconsin, praying for the prompt ratification of the so-called Kellogg multilateral

treaty for the renunciation of war, which were ordered to lie on the table.

He also presented petitions of sundry citizens of Barron and Racine, Wis., praying for the adoption of the so-called Shipstead resolution (S. Res. 242) inquiring as to the appropriateness of amending article 231 of the treaty of Versailles for the purpose of establishing the World War guilt, which were referred to the Committee on Foreign Relations.

Mr. FLETCHER. Mr. President, I present brief resolutions on the subject of the multilateral peace treaty, which I ask may be printed in the RECORD and lie on the table.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Resolutions on multilateral peace treaty

Whereas the multilateral peace treaty, originating in our National Capital, is now before the United States Senate; and

Whereas it is now proposed that this treaty be assented to by the Senate only on condition that numerous reservations be first attached thereto; and

Whereas to date no other nation has demanded the attachment of reservations to said treaty: Therefore be it

Resolved, That this Sunday-school class hereby strongly recommends that this treaty be assented to at once by the United States without reservation.

Resolved, That this resolution be sent to our senior Senator, Hon. DUNCAN U. FLETCHER, for use in the Senate.

R. M. FISHER,
President Men's Sunday School Class,
Park Street Methodist Episcopal Church, Fort Lauderdale, Fla.

(Moved by Thomas E. Will, seconded by C. W. Oakes, and unanimously carried, December 16, 1928.)

Mr. FLETCHER. I also present a telegram from Morgan H. Grace, president of the Phosphate Export Association, with respect to goods manufactured by prison labor, which I ask may be printed in the RECORD and lie on the table.

There being no objection, the telegram was ordered to lie on the table and to be printed in the RECORD, as follows:

NEW YORK, N. Y., *December 20, 1928.*

Senator DUNCAN U. FLETCHER:

Noticing that Senate yesterday passed H. R. 7729, which bars from interstate commerce goods manufactured, produced, or mined by prison labor, I strongly recommend on behalf of American phosphate miners that an amendment be passed by the House barring from importation to the United States goods manufactured, produced, or mined by a foreign entity that employs convict labor. Such an amendment would greatly assist in blocking the importation of Moroccan phosphate, which is produced by Government monopoly in Morocco employing prison labor in part. Section 307 of the present tariff act does not afford protection necessary for American labor because it bars only manufactured goods, although ex-President McKinley's speeches in the debates in the House clearly show that the intent of Congress was to bar any goods with the production of which prison labor had any part. Can you put this in motion?

MORGAN H. GRACE,
President Phosphate Export Association.

MULTILATERAL PEACE TREATY

Mr. BLEASE. Mr. President, I present and ask to have printed in the RECORD a petition to the Senate from certain citizens of Clemson College, S. C. I ask that "The Proposal to Renounce War," as printed on the back of the petition, be also published along with the petition; and, at the same time, an abstract from a Flag Day speech delivered by Woodrow Wilson in 1915, and also a quotation from the noted French writer, Jean Le Rond D'Alembert, in his analysis of "The Spirit of Laws," by Baron de Montesquieu.

There being no objection, the petition was ordered to lie on the table and, with the accompanying papers, to be printed in the RECORD, as follows:

Petition to the Senate

We, the undersigned citizens of Clemson College, S. C., believing that the conclusion of the general pact for the renunciation of war will constitute a long step toward the elimination of the war method of settling international differences, do hereby request of the Senate of the United States the prompt ratification of the treaty without qualification or reservation, and of the Senators from the State of South Carolina that they use all their influence to that end.

E. W. TIKES.
G. H. HODGES.
CAPERS SATTERLEE.
WADE H. BRYANT.

These are the names of the president and three of the four pastors on duty at Clemson.

WILLIAM W. HARRIS, Jr.

THE PROPOSAL TO RENOUNCE WAR

The general pact for the renunciation of war is now before the world. All responsible nations have been invited to agree in a solemn treaty to renounce war as a way to settle their disputes.

It was signed in Paris on August 27, 1928, by representatives of the United States and 14 other nations. Forty-nine additional nations have also been invited to adhere, and up to November 24, 44 of these have officially signified their intention of doing so.

Its essential features are contained in the following articles:

1. The high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies and renounce it as an instrument of national policy in their relations with one another.

2. The high contracting parties agree that the settlement or solution of all disputes or conflicts of whatever matter or of whatever origin they may be, which may arise, among them, shall never be sought except by pacific means.

It is understood that the President will submit this treaty to the Senate for ratification promptly after the convening of Congress. In order to convince that body of the strong popular demand for its early ratification,

1. Please sign and ask all your friends to sign two petitions in duplicate.

2. When you have obtained as many signatures as possible send at once to each of your two Senators at the United States Senate, Washington, D. C.

Woodrow Wilson, in a Flag Day speech in 1915, said:

"The lines of red are lines of blood, nobly and unselfishly shed by men who loved the liberty of their fellow men more than they loved their own lives and fortunes. God forbid that we should have to use the blood of America to freshen the color of the flag. But if it should ever be necessary, that flag will be colored once more, and in being colored will be glorified and purified."

Jean Le Rond D'Alembert, in his analysis of The Spirit of Laws, by the noted Frenchman, Baron De Montesquieu, has the following to say:

"Men in the state of nature, abstracted from all religion, in those disputes which they may have, know no other law than that of all animals, the right of the strongest; the establishment of society ought to be regarded as a kind of treaty against this unjust title—a treaty destined to establish a sort of balance between the different divisions of the human race.

"But it happens in the moral, as in the physical equilibrium, that it is seldom perfect and stable, and the treaties of the human race are like treaties among our princes—perpetual sources of dispute. Interest, necessity, and pleasure made men associate together. The same motives urge them continually to desire the advantages of society without the burdens of it; and it is in this sense that we may say with our author that men from the time they enter society are in a state of war. For war supposes in those who make it if not an equality of strength, at least an assumption of this equality, whence arise the mutual desire and hope of conquest."

And Montesquieu himself has this to say of war:

"The life of governments is like that of man. The latter has a right to kill in case of natural defense; the former have a right to wage war for their own preservation.

"In the case of natural defense I have a right to kill, because my life is in respect to me what the life of my antagonist is to him; in the same manner a state wages war because its preservation is like that of any other thing.

"With individuals the right of natural defense does not imply a necessity of attacking. Instead of attacking they need only have recourse to proper tribunals. They can not, therefore, exercise this right of defense, but in sudden cases, when immediate death would be the consequence of waiting for the assistance of the law. But with states the right of natural defense carries along with it sometimes the necessity of attacking; as for instance, when one nation sees that a continuance of peace will enable another to destroy her, and that to attack that nation instantly is the only way to prevent her own destruction.

"The right, therefore, of war is derived from necessity and strict justice."

UNEMPLOYMENT CONDITIONS

Mr. WAGNER. Mr. President, I ask to have printed in the RECORD a number of letters which I have received from distinguished citizens indorsing pending legislation introduced by me on the subject of unemployment, and that, after printing in the RECORD, the letters be referred to the Committee on Education and Labor.

There being no objection, the letters were referred to the Committee on Education and Labor and were ordered to be printed in the RECORD, as follows:

THE LEHIGH COAL & NAVIGATION CO.,
Lansford, Pa., August 15, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: I have read and reread with great interest the three bills which you sent me dealing with the problem of unemployment. Subject only to reservations which relate to details, it seems to me that the three measures constitute a constructive program of great importance. I will, however, point out some questions to which the text of the several measures may give rise.

S. 4158, dealing with the collection of statistics, should certainly be above criticism on the score of public policy. In addition to aiding in the understanding of unemployment, statistics of the character as suggested by the bill should be valuable as an index to purchasing power, which would, of course, further the economic understanding of many problems of distribution.

There is one possible danger to be avoided in such statistical work and that is the duplication of agencies gathering figures from private business concerns and, in fact, the actual duplication of material. In the comparatively near future I suppose there will be a reorganization of Government bureaus and functions, and that in due time such duplications will be ironed out. It is very important, furthermore, that statisical data such as is provided for in this bill should be under the direction of exceedingly competent technical statisticians. There is no body of statistical data that is more easily distorted, both intentionally and unintentionally, than labor data. In other words, if labor statistics are not exceedingly well done, they should not be done at all.

I have a few comments on bill 4157. The chief question I would raise in connection with this bill is as to whether population provides the most practical basis of distribution for the Federal fund to be allotted to public employment offices. Some sections of the country and some industries are far more sensitive to the phases of the business cycle than others and also to seasonal influences. For example, I believe that the Pacific coast in the course of a few years will be far less subject than the agricultural Middle West or the industrial East to acute employment problems. To a certain extent your bill takes care of these differences in the fact that Federal appropriation is not to exceed the State appropriation. This may be a sufficient answer to the question I have raised, but, on the other hand, it may suggest possible further thought.

Bill 4307 raises two or three interesting questions. The acceleration of public works in times of depression is, I believe, a sound proposal, but if the Federal building program is to be used to iron out the peaks and troughs of the business cycle it is also necessary that in periods of great activity in private business the Federal program should be retarded. I believe that your bill does not specifically recognize that consideration.

In section 5 of this bill I think that there is a possible implication that the Government would embark upon a policy of "making work" for the unemployed. I do not believe that this objection is inherent in the substance of the bill, but possibly it is not clear that what is attempted is simply a speeding up of a necessary program of public expenditure in times of depression. I think that there will be considerable difficulty in working out the program of public works outlined in this bill so as to accomplish the desired ends. The greater public works, such as flood control, are not only of a vast extent but are sometimes of an emergency nature and must be treated as a unit. These features would make it difficult in many cases to start and stop in such a way as to balance the depressions and excessive activities in business and employment.

Another implication that might be drawn from section 5 is that the Federal Government in prosecuting a program of public works in periods of unemployment would take advantage of the situation to pay less than the prevailing rate of wages. Possibly, this subject should be specifically dealt with in your bill. Personally, I should not believe in the Government cutting wages, inasmuch as such a policy would limit purchasing power and slow up by that much the recovery from a period of depression.

Finally, treating the series of propositions as a whole, I should like to add an opinion as to the limitations of any system of public employment offices, however well conducted they may be. Any system is apt to be conceived in the idea that labor is mobile. As a matter of fact, I believe that only a very small percentage of the working population is in a position to take advantage on short notice of opportunities to work in distant places. I say this in spite of the fact that during the long strikes in the anthracite field many of the miners do find work in other localities and eventually, of course, almost any kind of labor does move. Of course, this observation does not bear directly upon your bills, but perhaps it is a thought worth bearing in mind when they are up for discussion.

Thank you very much for sending me these measures. I trust these comments will be of some slight value to you. If I can be of any further assistance to you, I shall be very glad to have you let me know.

Very truly yours,

H. S. GILBERTSON,
Director of Personnel.

AMERICAN FEDERATION OF LABOR,
METAL TRADES DEPARTMENT,
Washington, D. C., August 13, 1928.

Hon. ROBERT F. WAGNER,
Senate Office Building, Washington, D. C.

DEAR SENATOR WAGNER: I appreciate your letter of August 10 and copies of S. 4157, 4158, and 4307, dealing with the general question of unemployment, which you inclosed.

I was exceedingly interested in your discussion of unemployment during the session of Congress just adjourned. It was heartening to see an honest, intelligent, fearless effort being made to uncover the causes and provide legislative remedies.

I will give my closest attention to the three bills you introduced. I feel, however, that it would be unwise on my part to attempt to point out those portions or features of the bill which I approved or which I felt might be altered in some respect so as to more thoroughly accomplish the measure's purpose.

In matters of Federal legislation it is the province of the American Federation of Labor and the legislative committee of the American Federation of Labor to define the views of the American trade-union movement.

I shall be very glad at any time when you would care to see me to discuss the problem of unemployment, but as a representative of the metal trades department of the American Federation of Labor, my position will be to actively support whatever program of attitude the American Federation of Labor takes on the question of unemployment legislation.

Assuring you of my very warm appreciation of the interest which you have always shown in the welfare of the wage earner, I remain,

Cordially and respectfully yours,

J. P. FREY, *Secretary-Treasurer.*

LAW SCHOOL OF HARVARD UNIVERSITY,
Cambridge, Mass., August 1, 1928.

DEAR SENATOR WAGNER: 1. Thank you for letting me see your three bills aimed at the investigation of unemployment. All three measures seem to me expressive of the best economic thought on the subject. I heartily agree that "the elimination of unemployment" lies at the core of a decent society, and we in America ought to demonstrate to the world that we can wisely use our economic resources and intelligence to that end. I rejoice that you are making this problem your special concern.

2. I have had sent you the Cornell Law Quarterly for June, in which I have a paper giving support inter alia to your bill S. 4491.

Very sincerely,

FELIX FRANKFURTER.

EVANSTON, ILL., *September 14, 1928.*

Mr. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SIR: About a month ago you sent me copies of three bills introduced by you, with a request for comment. Vacation and other matters have intervened since then and this has been my first opportunity to read and think about them.

Of the three, S. 4158 and S. 4307 should have the unqualified indorsement of all thoughtful men, I believe. Statistics on employment are very necessary and the use of public works as stabilizers has long been advocated and is a most sensible measure toward the securing of which the bill should help.

There is much also to be said in favor of S. 4157, the bill establishing centralized labor exchanges. I find myself uncertain of its advisability, however, for two reasons. One of these is the fear that it would under certain circumstances prove itself a dangerous leverage in the hands of organized blocs, as I believe it did during the war to some extent. The other doubt is as to the wisdom of adding this substantial burden of expense and enterprise to the already heavy burden of State-performed activities. For these reasons I do not find myself personally in favor of this bill.

With your general attitude on these questions of giving enlightened and organized help in the orderly operation of industry and protection of the worker I am in hearty sympathy.

Very truly yours,

H. P. DUTTON.

YALE UNIVERSITY SCHOOL OF LAW,
New Haven, Conn., August 17, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I have your letter of August 10, with the three bills introduced by you for the purpose of dealing with the unemployment situation. I think the situation a serious one and am heartily in favor of such steps as may be taken by governmental action to meet the situation. I think there is a great deal of merit in the proposal to adjust public construction work to periods of unemployment.

I feel that too much may be expected of free employment offices and to Federal subsidies in aid of such offices. Free employment offices established in a large number of States have not proved very effective aids in the adjustment of the labor conditions.

I notice that one of your bills (S. 4157) contains a good deal of detail regarding matters of organization. My own experience leads me to the feeling that it is wise to leave to the heads of departments the discretion as to the form of organization within a department for the purpose of exercising the specific additional powers dealt with by means of legislation. Somewhat the same objection applies, in my opinion, to Senate bill 4307.

Very truly yours,

WALTER F. DODD.

NORTHWESTERN UNIVERSITY,
COLLEGE OF LIBERAL ARTS,
Evanston, Ill., October 8, 1928.

The Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I regret to be so slow with my reply to your request for comment and criticism of the bills relating to unemployment which were introduced by you during the last session of Congress. Your letter did not come to my attention until I returned to Evanston from my vacation the middle of September, and the routine work attendant upon the opening of a new academic year prevented my giving the matter the careful consideration it deserves until recently.

Let me say at the outset that I am heartily in sympathy with the objectives at which you are aiming in the proposed legislation. There is no doubt in my mind that the general plan of attack upon the problem of unemployment which you propose would result in materially alleviating the condition in time of crisis, and would be of considerable value in adjusting the distribution of labor throughout the country at all times. Your plan would, I think, render it decidedly less likely that we would have the very severe periods of unemployment which come from time to time, subjecting the country to serious social and moral strain and economic stress. In its graver forms the problem is surely a national one, and the Federal Government certainly has the resources to give considerable relief, and should do so. However, I am not at all satisfied that the Federal Government can constitutionally carry out in full the program which you have planned for it, but I will come to that later.

Certainly there can be no constitutional objection to S. 4158, and it seems to me altogether desirable and practicable. The first step dealing with the unemployment problem is surely to gather, analyze, and distribute accurate information as to the amount of unemployment that exists at any given time, and the Bureau of Statistics of the Department of Labor is obviously the proper instrument for the performance of that task.

I would, however, make the following suggestions relating to the wording of the bill:

Page 1, line 10, strike out the word "persons" and substitute "men, of women, and of minors."

It seems to me that the distinction between men, women, and minors should be specifically required for two reasons: (1) In time of business depression there might be a tendency in some industries or some localities to substitute women employees for men, or minors for either men or women, in order to lower the wage item in the cost of production. So it is possible that a fairly large number of men or women might in some cases be thrown on the market without making any appreciable change in the total number employed. (2) It is important to know whether a labor surplus consists mostly of adult men laborers or in large part of women or children, because of the greater mobility of the former.

Page 2, line 3, strike out "and"; after "quarrying" add "and oil production"; line 5, after "agriculture," add "and lumbering."

I think the number of men employed in oil production and in lumbering operations is sufficiently large and the fluctuation in these two industries sufficiently marked to justify this special mention in the act, even though you do give the Secretary of Labor the power to extend the collection to such other industries as he might choose.

Neither do I see any constitutional objections to S. 4307, which merely directs the doing, in a somewhat different way, of what the Government already does and unquestionably has the right to do. It would put into effect one of the most obvious devices available to the Federal Government for relieving a condition of unemployment, and though this device would doubtless not meet the needs of the situation if the unemployment were on a very large scale, that is not a reason for neglecting to use it to the limit of its value.

You will want, I presume, to insert on page 4, line 18, the date of the flood control act of 1928. It is not a matter of any particular importance, but I might suggest that sections 7 and 8 of the act seem to have a more immediate relationship to S. 4158 than to the rest of S. 4307.

I wish I were equally satisfied of the constitutionality of S. 4157, for I think that as a matter of policy the measure is highly to be desired. In times of depression, when unemployment is widespread, the problem is national in its aspect, and the logic of the situation would amply justify the development of a national system of public employment offices, to supplement and cooperate with the existing State public employment offices or occupy the fields where the latter are nonexistent. I must confess, however, to some doubt as to the power of Congress to enact the bill in its present form. It is not, on its face, an exercise of any power expressly granted Congress by the Constitution, nor is it "necessary and proper" to the exercise of such a power.

Of course, we already have a number of examples of Federal-aid legislation. However, there are important differences between all of them and the bill under consideration. In the first place, S. 4157 contemplates more than the giving of Federal aid to State agencies. It provides affirmatively for the erection of a national governmental agency. A second point, which is one of practical politics, is that S. 4157 would set up a governmental agency which would do work commonly performed by private enterprise and which might, in some cases, seriously compete with private enterprise and interfere with the profits of the latter. There is the probability, then, that the bill, if it became law, would affect private interests adversely, so that it is very likely that it would not escape attack in the courts. In this respect it is different from the other Federal-aid legislation that we have had which has either been in a noncommercial field, such as education, or has been of such a nature as to make possible profits for private enterprise rather than take them away, such as the aid given to highways.

In order to increase the defensibility of the measure, if attacked on constitutional grounds, I would suggest the following changes:

Alter the title to read: "To provide for the establishment of a national employment system to promote the interchange of unemployed labor among the several States and for cooperation with the States in the promotion of such system and to regulate the expenditure of moneys that shall be appropriated for such purposes."

Page 1, line 3, strike out "promote" and substitute "further."

Page 1, line 4, after "offices," add "for the purpose of promoting the interchange of unemployed labor among the several States."

Page 2, line 19, after "workers," add "from one State"; after "places" add "in another State."

I need not explain to you that my purpose in making these changes is to bring the measure within the commerce clause of the Constitution. If the bill were amended in this way, then a very strong argument for its constitutionality could be presented. The objection to these changes is that they would somewhat restrict the activities of the national system and possibly limit the benefits that might be derived therefrom. However, in practice I do not think the limitation would be a serious one.

It is to be hoped that the operation of Federal aid would cause most of the States to set up public employment offices, if they do not have them already, and if that came to pass the chief activities of the Federal system would really be interstate in character. Of course, for reasons I have already pointed out, if the measure goes into effect, we may get a direct constitutional attack on the Federal-aid feature as such.

I hope I have not wearied you by this detailed discussion of the bills which you are fathering. I have given some time to it because of my interest in the whole problem and because of my feeling that the legislation you are proposing would be very helpful in dealing with it. I hope that you may find something helpful in my suggestions.

Very sincerely yours,

A. R. ELLINGWOOD.

EMORY UNIVERSITY,
DEPARTMENT OF ECONOMICS,
Emory University, Ga., August 18, 1928.

Senator ROBERT F. WAGNER,
Washington, D. C.

MY DEAR SIR: I have your letter of August 10, inclosing the unemployment bills which you have introduced. I am glad to add mine to the other voices that are indorsing these bills. Students of labor in this and other countries are realizing more and more keenly the intensity of the problem of unemployment. In periods of prosperity as well as in periods of depression unemployment brings genuine suffering to multitudes of our population and creates situations which result in a serious degeneration of a part of our civilization. It is a matter of amazement and concern that a society as complexly organized as ours has neglected the problem for so long.

Many measures have been proposed to bring relief. Some have attempted to strike at the causes of unemployment and some have attempted to alleviate the suffering resulting from it. The first group of measures is, of course, the more important; the second group, however, should not be ignored, at least for the present.

Among the proposals might be listed:

1. All measures attempting to eliminate or decrease the intensity of the business cycles. Included here would be such measures as Prof. Irving Fisher's proposal for a stabilized dollar and the proposal to have the Federal Reserve Board attempt stabilization through open-market dealings, etc.

2. The establishment of a clearing house for unemployed men and unoccupied jobs.

3. Research, forecasting, planning by private concerns and the Government. This necessarily involves the Government as the only agency qualified to extensively and intensively gather statistics.

4. The long-range planning of public works.

5. Unemployment insurance, offering rewards to business enterprise for the elimination of unemployment and relieving the unemployment problem after it exists.

To all five of these proposals most of the students of labor economics lend their indorsement. There have been differences of opinion as to the details of the various plans, but it is generally recognized, I think, that the development of each one of these general proposals will be of considerable benefit.

It is the second, third, and fourth of these proposals which your bills plan to develop. They are of importance, it seems to me, in the order listed. The easiest and the most practical thing the Government can do is to establish a clearing house for men and jobs. The principle is similar to that involved in the clearing functions of the Federal reserve banking system. Almost continuously unemployed men are at various places in our country and vacant jobs which these men could fill are in other places. Various agencies are now at work to bring the two together. But they are wholly inadequate. Very few State systems of any value have been developed, and those in existence are inadequate even for those States. Furthermore, no State system is able to clear men or jobs outside of the State; and since the organization of our industries is not on a state-wide basis, a state-wide organization is not an adequate clearing agency. This is even more true concerning employment than it is concerning banking. Private agencies similarly are not sufficiently extensive in their scope and, unfortunately, they have frequently proven more disserviceable than serviceable because of their profit-seeking management. They need to be regulated, if not abolished.

Incidentally, I think the systems should be required to give full information about jobs which they propose to applicants, particularly with reference to strikes, etc. This rule would probably be promulgated by the Department of Labor; but if it should neglect to do so, a law should later be passed requiring that such a policy be followed.

The bill to provide for the collection of statistics seems to me to be next in importance. It is of less importance than the above, I think, only because of the value of the employment system in the collection of statistics. Some such system of registration is almost a necessity to the collection of full statistics. The collection of unemployment data will be absolutely necessary to the most intelligent attack on the unemployment problem. It will aid governments in the passage of laws, businesses in the planning of production and distribution, research students of economics in analyzing and solving our economic mysteries, and, of course, it will be essential to the long-range planning of public works.

The third bill seems to me to be of less importance than the other two, but it should be of great value. Many theories of the business cycle have been developed, and economists are still in a furor as to the causes and characteristics. On a number of points, however, they are pretty well agreed. One of these is, I think, that the circulation of wealth is temporarily interrupted, or slowed down. Production is forced to slow down, employment is decreased, and the circulating wealth in the hands of the masses of the population is decreased. The masses are unable to buy because they have no money; they have no money because they have no jobs and the receipt of their wages has been stopped. On the other hand, the employers, because the retailers are unable to sell their goods, are forced to cut down production, and are therefore unable to offer employment or pay out wages. The complete cause, explanation, and solution of this dilemma is still a matter of debate. Regardless of this mystification, however, I think most of the economists agree that if some nonprofit-seeking agency could start the flow of wealth again, the period of depression would be shortened and its intensity lessened. If, when unemployment is increasing and wage receipts are decreasing (and buying is diminishing and production being curtailed), some agency could offer employment to some of the unemployed, and increase the total payments in wages (over what they otherwise would be), then the downward trend of buying would be halted or slowed down, production would halt its downward trend, and the "valley" of the business cycle would be partially filled up. For the wages of a small group will create a demand for goods which will call for employment of another group, and the wages of this group will call into employment another group, and so on. This is the theory. As to how large an expenditure in wages will be necessary to make itself felt and to start the processes leading to a new equilibration of the economic system, is a matter of conjecture. With an average production of say $75,000,000,000 and a cyclical fluctuation of not over 10 per cent, a reserve fund of 2 or 3 per cent of the fluctuation ought to provide an excellent "tonic" for the economic system. If this fund came either from the sale of bonds or from taxation of large incomes it would probably amount to the transference of a certain portion of fixed wealth into circulating wealth, which is a significant point. A transference of circulating wealth from private to governmental hands for expenditure would not be of as much significance in this regard.

Objections may be raised, of course, such as: That the funds will be used by political powers for political purposes. As far as possible precaution should be made against that, and I am not sure that Senate bill 4307 has sufficient safeguards in this connection. It might be better to have a nonpartisan advisory board, constituted of recognized economists and statisticians. I would also suggest the addition of these industries: Construction of land and naval armaments; reclamation work—reforestation, drainage, irrigation, and construction of such works as Boulder Dam (if, when, and as authorized); the undertaking of new Government industries (if, when, and as authorized), e. g., munition plants, railways, etc.

I hope that this letter may be of some value. I have written at some length on the supposition that you wish a "mass of evidence" to present to the committee.

Very truly yours,

MERCER G. EVANS.

NEW YORK CITY, *August 29, 1928.*

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SIR: I have your letter of August 10, 1928, inclosing a set of three bills introduced by you in the last session of Congress and asking my comments and criticisms. I am very glad to have you bring these to my attention. I should like to tell you that those of us who are interested in social measures for the improvement of the great mass of the people feel strongly that you are one of the leaders in Congress who may be depended upon to take a constructive attitude. I hope that you will continue to show the interest in such problems that you have indicated in the past. The last person I talked with—I believe it was Dr. Ernest F. Johnson, of the Federal Churches of Christ—stated that he had been impressed with your humane interest when last he spoke with you.

The three bills which you are proposing are all of the greatest importance in the solution of the unemployment problem. I hope to study these a bit more and perhaps to write you about them later. I may say, however, that in connection with the first two of these, namely, the one calling for unemployment statistics, and the other setting up employment exchanges, there have been organized groups which have been making special studies of this subject. For example, you doubtless know that Dr. Bryce M. Stewart, Industrial Relations Counselors (Inc.), 165 Broadway, New York City, has been secretary of a large group of statisticians and economists who have been engaged in drawing up unemployment statistics. Either he or Miss Mary Van Kleeck, of the Russell Sage Foundation, can tell you more about this. Similarly the Russell Sage Foundation has published a thorough study of employment exchanges.

The measure providing for a stabilization board seems very well thought out; however, I wonder whether it would not be wise to provide for a revolving fund and for an annual appropriation so that in time of depression the amount of money available for public works would be big enough to make some impression on the situation. One of the men who is most familiar with drafting problems of this character is Prof. Joseph P. Chamberlain, Columbia University, whom I should strongly urge you to put on your list if you have not done so already.

With very best wishes for your success in these bills, I am,

Most sincerely yours,

HERMAN FELDMAN.

NEW YORK CITY, *September 5, 1928.*

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I have just returned to my desk after a holiday otherwise I should have responded at once to your letter of August 11 soliciting comment and criticism of the three bills introduced by you during the last session of Congress and designed to assist in the prevention and alleviation of unemployment. I will venture some brief comment despite the certainty that it will be inferior to much of critical judgment you have no doubt already received.

Bill S. 4158 seems to me to meet an obviously important need. Any highly organized industrial State, such as ours, which does not make the required effort to secure reliable and detailed employment statistics, indicates indifference to the fact of unemployment. I would raise two questions in regard to the actual bill:

1. Unless I am greatly mistaken the appropriation provided would be greatly inadequate to carry out the task properly, especially during the initiatory period when forms would have to be devised and studied, conferences held with associations, travel undertaken, results analyzed, etc. In the field of agriculture office employment a technique for gathering the required information would have to be developed. Education work among employers would have to be conducted in order to secure reliable and reasonably uniform information.

2. The search for and presentation of this information would bring to the fore various questions of method (in the keeping of plant records and the making of returns) and of substance (e. g., whether it is desired that the periodic return should be an average for the period covered or as of the end of the period, whether absentees should be included, what classes of employees should be included, etc.).

I am not sure that the information desired is adequately described in lines 9 and 10 (p. 1) and line 1 (p. 2). It might be better to make these instructions more precise or more general.

With bill S. 4307 I am likewise wholly in sympathy and convinced of the soundness of its general purpose. By way of suggestion I would, however, raise the following points in regard to it:

1. If any alternative can be devised, I think it would be preferable not to throw upon the President the duty of final decision. But perhaps there is no constitutional alternative.

2. Page 3, lines 17 and 18, "in the United States or any area thereof." This seems to be too sweeping a phraseology. Do you mean to have the act applied in comparatively small local areas; for example, would you invoke it to meet the unemployment situation in certain textile towns at the present time? I doubt its practicability and soundness for that purpose. Would you invoke it in the event of a depression in the automobile industry in Detroit?

3. Should not the act provide some sort of clause dealing with the wage policies to be followed in the expenditure of these emergency appropriations?

4. Can not the principle of "grants in aid" to States or cities be extended further than is done in the act to other works than public planning?

5. Section 10 would prove to be a most important element. Can not the ways and means of advance planning be further defined?

6. The act should require periodic reports upon action taken and results.

These are but a few comment out of many that might be made as regards the best way of working out the idea. It is impossible to be exhaustive in short space. I feel that this act needs further consideration and analysis.

S. 4157 seems, as far as first reading permits a judgment, desirable and workable as written.

I would suggest that there be associated with the system of employment offices local committees of employers, workers, and professional people with advisory powers.

Please forgive the somewhat authoritative tone of these remarks which have been expressed under pressure of haste.

I wish you all good fortune in your efforts to carry through the purposes of these bills.

Yours very sincerely,

HERBERT FEIS,
Formerly Head of Economics Department, University of Cincinnati.

BOSTON, MASS., *August 15, 1928.*

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I am in receipt of yours of August 10, inclosing copies of bills S. 4157, S. 4158, and S. 4307, the combined purpose of which is designed to meet a phase of the unemployment situation.

In my mind the passing of these bills would constitute an important step in the right direction, and should have the support of every intelligent citizen.

You ought to be commended for initiating this step, and I hope that your efforts will meet with the unqualified success that they deserve.

Very truly yours,

RICHARD A. FEISS.

SEATTLE, WASH., *August 23, 1928.*

Hon. ROBERT F. WAGNER,
Senate Building, Washington, D. C.

MY DEAR MR. WAGNER: It will give me pleasure to lend a hand locally in building up support for the program of coping with unemployment which you are sponsoring through the three bills introduced by you, copies of which came with your letter of August 10.

Because my work centers largely on efforts to regularize employment in longshoring and related fields, perhaps I tend to emphasize unduly the value of efforts in this direction. However, anyone close to the vicious wastage of unemployment, and anyone familiar with the meager efforts to know and meet problems of unemployment, can not but feel grateful to those of you who are leading nationally in these efforts. Needless to add I am thoroughly committed to the work of aiding in employment fact finding, the development of a National-State-municipal employment service, and public works as a stabilizer.

We are especially cursed in the Pacific Northwest with casual labor problems, since all of our basic industries are highly casual, such as logging and lumbering, fishing, mining, agriculture, and shipping.

Sincerely yours,

F. P. FOISIE.

THE NEW YORK SCHOOL OF SOCIAL WORK,
New York, August 13, 1928.

Hon. HOBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR MR. WAGNER: I have your letter of August 10 together with copies of bills introduced by you embodying proposals for more adequate gathering of statistics of employment, establishment of a Federal public employment service, and the planning of public works so as to provide employment in times of business depression.

I am heartily in sympathy with the spirit of all of these proposals. As you say, they are not political in character and they should be supported by everyone who is concerned about social well-being.

Sincerely yours,

JOHN A. FITCH.

UNIVERSITY OF MICHIGAN,
DEPARTMENT OF ECONOMICS,
Ann Arbor, September 10, 1928.

The Hon. ROBERT WAGNER,
United States Senate, Washington, D. C.

MY DEAR MR. SENATOR: Thank you very much for sending me your three bills on unemployment. I find myself in hearty agreement with all of them. Certainly there is great need for more adequate statistics on unemployment. A local committee appointed by the mayor of Ann Arbor has just investigated unemployment here and has reported an average of 8 per cent unemployment with the remark that, as far as we know, this is not out of line with the rest of the country. If that is so, the problem is a very serious one, but in any case it ought to be possible to know whether it is or not. I thoroughly agree, as do most other scholars in the field, with the principles of a Federal employment service and of the advance planning of public works for periods of depression. The only doubts expressed in my classes on those subjects have to do with the dangers of inefficient administration; but you will know better than I how to provide against that. In my opinion, one of the most promising attacks upon the problem is that of the incentive or penalty type of unemployment insurance in force in the Cleveland garment trade and intended to give the employer a strong inducement for regularizing work. I am afraid, however, that it will be a long time before it is practical to talk about introducing that principle into legislation.

Sincerely yours,

CARTER GOODRICH,
Associate Professor of Economics.

CONNECTICUT AGRICULTURAL COLLEGE,
Storrs, Conn., August 20, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SIR: I have received copies of Senate bills of the last session of Congress, as follows: S. 4157, S. 4158, S. 4307, and your letter asking for comments on these bills. Anyone acquainted at all with business cycles and movements and with the resulting distress among the workers' families at times of depression will approve the purposes of the bills.

I also think that for the most part the details of organization are good. However, I have a few suggestions to make.

In bill S. 4157, section 6, should not all persons so employed by the Secretary of Labor be subject to the provisions of the classification act of 1923? Perhaps this is otherwise provided, but it does not appear in the section.

In bill S. 4158 it seems to me that the employment statistics so collected should be made definitely available to all other governmental and private agencies which are interested in improving labor conditions.

In bill S. 4307, section 4, I do not see why the secretary of the Federal unemployment stabilization board should be assigned to the Department of Commerce instead of to the Department of Labor. Unless there is good reason for such a division, it seems to me he should be under the Department of Labor.

I thank you for sending me copies of these bills. I am especially interested in such legislation, and believe it is aimed to improve labor conditions. Should it appear that I can be of further service in these matters I shall be glad to write again.

Yours very truly,

EDWARD H. GUMBART,
Assistant Professor of Economics.

THE OHIO STATE UNIVERSITY,
COLUMBUS, *August 13, 1928.*

Hon. ROBERT F. WAGNER,
Senate Office Building, Washington, D. C.

DEAR SENATOR WAGNER: I am glad to reply to your request for an opinion concerning the three bills introduced by you in Congress, designed to meet the unemployment situation in this country.

I thoroughly approve all three of the bills and earnestly hope that you will succeed in convincing Congress of the need of their passage.

In regard to bill S. 4157, I am wondering why the bill does not require that all employees under the director general be required to secure their positions under the civil service law.

May I say that during the years 1913–1915 I was a member of the Industrial Commission of Ohio and had the employment offices of this State directly under my supervision. The employees, up to that time,

had been appointed for purely political reasons, and the State had never had an effective system of employment exchanges. It is particularly difficult to get good employees under the political system of appointments for this line of work, because organized labor soon comes to feel that such positions belong to it.

I am free from having any opposition to organized labor; in fact, I have always been a strong supporter of the principle of organization among laborers and have, myself, been a member of a central labor union. The fact remains that, as you well know, the education of members of our labor classes is frequently weak and the business experience of such men is likely to be limited, so that unless the employees of the employment service are selected by civil-service methods, we are likely to get unusually incapable men. I think this, more than anything else, has discredited the employment offices in the various States in past years.

In regard to bill S. 4158, it seems to me that it is highly desirable that employers be required to report the information called for in that bill. I can readily see a difficulty here, due to the fact that the majority of such employers are not considered to come under the regulation of Congress; possibly some method could be devised, however, by which employers could be induced to furnish the information in a manner prescribed by law, in the same way that railroads are required to report concerning their finances and traffic.

It has always been a matter of great regret to me that Congress did not see fit to continue the Federal employment service, established during the war. I was, for a short time, connected with that service. In spite of the fact that it was far from meeting the ideals which good management would establish, it was constantly improving, and I have never been associated with a group of young people who felt more enthusiasm for the work in which they were engaged than many of the people whom I have met in this service.

The existence of a Federal employment service seems to be the first step needed in the solution of our unemployment problem, and I earnestly hope that your bills will be passed at the coming session of Congress.

Sincerely yours,

M. B. HAMMOND.

STANFORD UNIVERSITY,
GRADUATE SCHOOL OF BUSINESS,
Stanford University, Calif., September 18, 1928.

Senator ROBERT F. WAGNER,
Senate Office Building, Washington, D. C.

DEAR SENATOR WAGNER: Your letter of August 10 inclosing Senate bills 4517, 4518, and 4307 has just come to my attention. I had the pleasant task a year or two ago of reviewing the report on business cycles and unemployment for the bulletin of the Taylor Society, and had become much interested in the subject of unemployment before that time.

Your notice has perhaps been called to the joint system of unemployment insurance set up by the Amalgamated Clothing Workers and the Men's Clothing Manufacturers in 1923. For the contingency that the matter has not been brought to your notice, I am sending you a printed copy of the agreement. The brief preliminary agreement drafted by Leo Wolman and myself contains most of the essential points. This arrangement has recently been extended to the Rochester and New York markets.

From all this you will realize that I am deeply interested in the subjects to which the three bills are addressed. I am keenly aware of the need for (a) more adequate employment statistics, (b) a national system of public employment offices, (c) the scheduling of public work so as to help smooth out the curve of employment.

I trust the purposes of these bills may be speedily realized. Thank you for sending them to me.

Very truly yours,

W. E. HOTCHKISS.

LEEDS & NORTHRUP CO.,
Philadelphia, Pa., September 24, 1928.

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: Your letter of August 10, and the three bills which accompanied it, came during my absence on a rather extended vacation, and I did not see them until a few days ago. I am heartily in favor of legislation to accomplish the purposes aimed at by these bills, namely, that the Federal Government should set up machinery to gather and circulate statistics and to control its own actions in such a way as to stabilize industry and employment. I am not sufficiently expert in regard to the subject as a whole and the present organization of Government departments to make any critical comments on these particular bills.

I hope you may have success in pressing for legislation of this character, because I believe that the general subject is one of the most important before the country.

Very truly yours,

MORRIS E. LEEDS.

WASHINGTON, D. C., *November 7, 1928.*

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: Replying to your letter of August 10, which, as I previously advised you I would answer after the election, and commenting on the three bills which you have sent me, S. 4158, S. 4157, and S. 4307:

The basis for these bills was laid in the recommendations of the President's Conference on Unemployment of 1921 under the chairmanship of Mr. Hoover. I was secretary of that conference and have been secretary of the various committees set up by it to examine into methods of stabilizing employment. The first of these committees, that on business cycles and unemployment, under the chairmanship of Mr. Owen D. Young, reported in 1923 and had very important results in curbing the beginnings of a dangerous boom in that year, as well as in modifying general industrial policy in the direction of stabilization. The second committee, that on seasonal operation in the construction industries, under the chairmanship of Mr. Ernest Trigg, reported in 1924, and had striking influence in lengthening the building year, cutting down the summer seasonal peak and filling up the trough of winter construction. A third committee, that on recent economic changes, under the chairmanship of Mr. Hoover, is to report next year. It covers an examination of our postwar economic experience and the policies which should be derived from that experience.

Turning to the question of legislation, I should think some such bill as S. 4158 to strengthen our statistics on employment is desirable. S. 4157 contains certain provisions about which I am not so clear, such as those in section 7 and section 9. I have made no independent estimate and am not informed of the adequacy or inadequacy of the amount which it is proposed to appropriate to carry out the provisions of S. 4157. With its general aim, of course, I am in sympathy.

S. 4307, which you have sent me, seems to me less efficiently drawn than the other bills and calls for the creation of another Federal board, a thing which in general I should like to avoid. The policy of long-range planning and construction of public works in periods when private business is slack is a well-recognized policy of the present administration. That policy can be further strengthened by legislative recognition, and I favor some such legislation as this: That the designated authority "shall take into consideration the effect which may be exterted by governmental construction policy upon general employment and industrial activity and shall report to Congress with recommendations whenever the volume of construction in the United States during any period falls one-third below the volume of the corresponding period of 1925."

I am deeply interested in this great problem and shall be glad to have your comments on these views.

Yours very sincerely,

E. E. HUNT.

STANFORD UNIVERSITY,
GRADUATE SCHOOL OF BUSINESS,
Stanford University, Calif., August 17, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: It is a pleasure indeed to respond to your communication of August 10. Unemployment is one of the subjects to which I have directed my attention on numerous occasions. This is a vital problem, and I have only commendation for the efforts you are making to provide a continuing and helpful corrective influence.

It is, I believe, generally recognized that scheduling of public construction is one of the logical means of lessening the seriousness of an unemployment period.

With reference to section 10 of your bill S. 4307, it seems to me that effective advance planning is possible only through the establishment of a Federal department of public works. As you are well aware, the engineers of this country, as well as other groups, have been assiduously working for such a centralized direction of Federal construction. May I at this time bespeak your support of this project, not alone in the economic soundness of its purpose but also as an aid to your unemployment program. Sound businss policy demands centralization of the engineering and construction activities of the Federal Government.

In the establishment of the Federal unemployment stabilization board and also the United States employment service, as contemplated in bills S. 4307 and S. 4157, it is hoped that these agencies will be directed to give constructive study to attacking the problem of casual and chronic unemployment. While the several bills which you have introduced primarily are to relieve cyclical unemployment, the casual and chronic unemployment presents an equally serious problem. Obviously the latter is essentially a community problem, but consideration of it as such demands direction and guidance by interested Federal agencies.

Allow me to express my appreciation of this opportunity to read the bills which you have introduced and to again express my commendation of your efforts.

Sincerely yours,

P. E. HOLDEN,
Professor of Industrial Management.

COLLEGE OF INDUSTRIAL ARTS,
THE TEXAS STATE COLLEGE FOR WOMEN,
Denton, Tex., August 28, 1928.

Hon. ROBERT F. WAGNER,
Washington, D. C.

MY DEAR MR. WAGNER: With considerable interest I have read carefully the three bills pertaining to unemployment introduced by you during the last session of the Congress. In the outset, as a student of economics, I desire to assure you of my sincere sympathy with any feasible attempt to ameliorate unemployment and its attendant disasters.

It is an axiom in social science that no nation can rise above the economic status of its citizenship. It is but idle prattle to expatiate upon our cherished ideals of democracy without recognizing the fundamental fact that these ideals have their inspiration and incipiency in a desire for economic betterment. An employed, prosperous, intelligent citizenry is the bulwark of democracy; but an idle, despairing proletariat is the natural enemy of all government and all social order. Employment is the steadying, stabilizing factor in the life of every nation. I therefore wish to congratulate you upon your statesmanlike vision in framing these three bills. They are basic in their political significance and in their economic implications.

Technically, I would not presume to offer criticisms; but you will permit me to say that from some quarters you shall hear the cry of "paternalism," "bureaucracy," "centralization," etc. And, I think, perhaps the bills may be endangered by this sentiment. However, we all recognize the fact that unemployment is now a pertinent problem in America, and it is high time for us to get down off of the pedestal, cease dealing in mere platitudes, and make some wise and efficient provision to take care of the great army of men and women who, by no act of theirs, are out of employment. Frankly, I can see nothing in the bills that should arouse the antagonism of any student of economics. I wish you success in ultimately getting these bills passed by the Congress.

Yours sincerely,

L. D. JUDD.

FRIENDSHIP FARM,
Stony Hill, R. D. 2, Bethel, Conn., September 1, 1928.

MY DEAR SENATOR WAGNER: Although I have been prevented from more than the most cursory study of the three bills on unemployment you were good enough to submit for my comment, I feel that I ought not longer to delay reply to your request. The bills seem to me admirable in principle. The success of their application will depend entirely on the character of the administrative personnel, and if it were possible the bills should be strengthened by a closer definition of such personnel, especially at the top. There is always the danger that a machinery and technique such as these bills provide for may become simply another instrument of graft and patronage like the Volstead Act. I should myself be inclined to call for the cooperation of the great industrial bodies—the labor organizations, the chambers of commerce, and the like—that have an industrial and not a political stake in the administration of an unemployment service.

* * * * * * *

Yours, etc.,

H. M. KALLEN.

NEW YORK, *September 6, 1928.*

Senator ROBERT F. WAGNER,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR WAGNER: This will acknowledge receipt of your letter of August 10 inclosing the three bills which you introduced dealing with the subject of unemployment.

I am in entire accord with the proposals contained in each one of these bills. The only concrete suggestion I have to offer is that S. 4157 might be strengthened by containing a present appropriation for a possible future emergency. It is especially difficult to get Congress to approve an appropriation when times are hard and the money is most needed to alleviate the suffering incident to unemployment.

I feel confident, however, that all three of your measures taken together would fall far short of relieving the situation. What we need is to face the problem squarely which S. 4158 should help to make possible, and then, with a clear knowledge of the facts, to apply some of the best minds in the country to a fundamental solution of the question. This was Governor Smith's proposal for the relief of agriculture. At present it is the only thing I feel competent to suggest with reference to unemployment. It might be possible to have some economists especially qualified to investigate this problem attached to the proposed Federal unemployment stabilization board. But it would probably be more satisfactory to call together "those best equipped on the particular subject at hand"—to use Governor Smith's phrase—to formulate and examine plans to meet the unemployment evil. We should begin to appreciate that unemployment is not a sporadic, temporary condition, but a problem which we have with us permanently and must solve in a fundamental way rather than be satisfied with palliatives to carry us over temporary emergencies.

I am sorry that I can not offer anything more helpful. But I should like to take this occasion to express my approval of your service to your constituents in bringing before Congress the issue of unemployment, and to express the hope that your efforts may be successful in working out a permanent solution of this vexing question, which I believe to be the greatest single cause of our present economic maladjustment.

Respectfully yours,

CAROL WEISS KING.

THE PENNSYLVANIA STATE COLLEGE,
DEPARTMENT OF ENGINEERING EXTENSION,
State College, Pa., November 22, 1928.

Hon. ROBERT F. WAGNER,
United States Senator from New York,
Washington, D. C.

MY DEAR SENATOR WAGNER: Your letter of August 10 reached my desk while I was in Europe, and owing to the press of other matters I have just reached the pile of mail that greeted me upon my return.

The three bills that you inclosed, namely, S. 4157, S. 4158, and S. 4307, all for the first session of the Seventieth Congress, and relating directly and indirectly to our unemployment situation, contained very excellent ideas. I regret, however, that I am not enough of an economist to criticize the details of the bills themselves.

I feel strongly, however, that one of the bills aims to give the Federal Government jurisdiction over functions which I believe properly belong to the respective State governments. But I am convinced that economic situations will sometimes work themselves out without the passage of laws. I approve heartily, however, of your desire to take care of a situation that has been deplorable in the past and which may arise again in the future unless we take proper measures to prevent it.

Very truly yours,

J. O. KELLER,
Head, Department of Engineering Extension.

AMERICAN STATISTICAL ASSOCIATION,
New York, N. Y., August 15, 1928.

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I have read with interest your three bills relating to employment in the United States, and wish to congratulate you upon your effort to prevent the recurrence of unemployment. I am sure that in this respect you will have the support of most of the economists of the United States.

In connection with bill 4158, you probably know that the American Statistical Association has a standing committee which has been working for several years with considerable success in an effort to standardize the employment statistics of the various States. This committee is composed of the statisticians of the bureaus of labor in the various States and also has a representative from the United States Bureau of Labor Statistics. The members of this committee are the persons best qualified to advise you intelligently as regards bill 4158. I am therefore referring this bill to that committee for consideration. I may say that at the present time employment statistics as regards manufacturing are sufficiently abundant to give a very good picture of what is happening to employment in the manufacturing field. I believe that the Bureau of Agricultural Economics is now collecting some data on agricultural employment. Information concerning employment in other fields has been far too scanty, and it is certainly desirable to have much more information than we at present possess concerning employment in fields other than manufacturing.

I have not had sufficient experience with the workings of public employment offices in the past to be able to express any definite opinion as to their success. Among those who have had experience in this field and are able to give you valuable advice along this line I would suggest the names of Dr. Shelby M. Harrison, of the Russell Sage Foundation, 130 East Twenty-second Street, New York City; Prof. Don Lescohier, of the University of Wisconsin; and W. M. Leiserson, 2343 Warren Street, Toledo, Ohio. I am referring bill 4157 also to our committee on employment statistics, as several of the members are very familiar with the workings of employment offices.

As regards bill 4307, I am of the opinion that this important measure should be pushed. I have given this matter considerable attention in the past, and, while I am by no means of the opinion that emergency construction of public works will solve the whole difficulty of unemployment, I believe that it is distinctly a step in the right direction which has everything in its favor and practically nothing against it. I believe that most of the economists who have given much attention to this matter will agree with me in this point of view.

With hearty good wishes for your success, I remain,

Very sincerely yours,

WILLFORD I. KING, *Secretary-Treasurer.*

WASHINGTON, *August 16, 1928.*

Senator ROBERT F. WAGNER,
Senate Office Building, Washington, D. C.

DEAR SENATOR WAGNER: I have your letter of the 10th instant and shall be very glad, indeed, to study your three bills and to send you a statement in connection with them. When I do this I shall also send you some matter which I have recently written, but not as yet published, relative to the unemployment problem and its solution.

I shall be very glad to cooperate with you in any way possible.

Very truly yours,

W. JETT LAUCK.

BANKERS TRUST CO.,
Paris, France, September 12.

DEAR SENATOR WAGNER: Please send me a copy of your bill to plan public works in advance for expansion during periods of employment. I am familiar with Senator JONES'S bill, S. 2479, having a similar purpose. It requires good statesmanship to realize this sound purpose. Everybody approves it, but no one has had the punch to carry through a practical program. I have looked over what has been done abroad, notably in Germany, and think we can improve on it.

Faithfully yours,

OTTO J. MALLERY,
9006 Crefeld Street, Philadelphia.

YALE UNIVERSITY SCHOOL OF LAW,
New Haven, Conn., October 1, 1928.

The Hon. ROBERT F. WAGNER,
Senate Building, Washington, D. C.

DEAR SENATOR: Thank you for sending to me at Cos Cob your three bills designed to alleviate unemployment. Though I am strongly sympathetic with their intention, I can not claim to be qualified to express an opinion about them. A doubt occurs to me as to the constitutionality of the proposed national employment system, unless its connection with interstate commerce is more thoroughly expressed—perhaps with more limitation. And I doubt the policy of a Federal subsidy to State agencies—though perhaps that is the only way your plan could be put through without danger of useless duplication of State and Federal departments. Before forming an opinion of the desirability of the scheme in general, I should want to know much more than I know now about the way public employment agencies work or have worked.

Yours very sincerely,

WALTER NELLES.

THE ILLINOIS STATE FEDERATION OF LABOR,
Chicago, Ill., August 28, 1928.

Hon. ROBERT F. WAGNER,
United States Senator, New York City, N. Y.

DEAR SIR: With further reference to your letter of August 7, previously acknowledged by this office during my vacation absence, let me say that I shall read the three bills, S. 4157, S. 4158, and S. 4307, relating to the question of unemployment, and after I have looked them over I shall be glad to write you my views concerning those measures. However, I need only to glance at S. 4158 to see that it is designed to require that the Department of Labor compile and publish unemployment statistics.

Certainly all must agree that the first essential in dealing with the unemployment problem is to know exactly what the extent of unemployment is from time to time. The creation of a definite employment service bureau in the department, as proposed in S. 4157, also seems essential to a proper study of the problem. However, that bill is of some length and I have not had time as yet to read all of its provisions, nor have I had as yet time to examine S. 4307.

Thank you very much for sending me the copies.

Very truly yours,

VICTOR A. OLANDER,
Secretary-Treasurer.

PURDUE UNIVERSITY,
DEPARTMENT OF HISTORY AND ECONOMICS,
La Fayette, Ind., August 21, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR MR. WAGNER: I have read with interest your three bills relating to unemployment.

As a means of attacking the problem scientifically it is certainly necessary to provide machinery for the collection of information on the subject which you propose to do by your bill S. 4158. Then, in order to reduce unemployment as far as is possible, by connecting the man with the job, you plan to accomplish through labor exchanges which seems to be the next logical step.

Public works as a way of alleviating the suffering caused by unemployment is at least worthy of a trial. In theory, public works will not only make for immediate employment of a limited number of men but will also set in motion machinery for reviving depressed industry. This revival of business will come about, it is said, through an accumulation of reactions. The employment of several thousands of men by the Federal Government will in turn create a demand for capital equipment and consumption goods which will again set those industries engaged in making the capital equipment and the consumption goods in operation, and so on down the line. The process once started (as it would be by public works) accumulates employment as a snowball accumulates snow as it is rolled along the snow-covered ground.

With a realization of the legislative difficulties I suggest that the time to provide the funds for emergency public works is during prosperity instead of relying on appropriations after depression has shown its ugly head. Time used in acquiring funds means that depression is becoming more and more difficult to check as confidence wanes and failures increase.

With the hope that these remarks are not too irrelevant, I am

Very truly yours,

W. V. OWEN.

COLUMBIA UNIVERSITY SCHOOL OF LAW,
New York, August 16, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SIR: Replying to your letter of August 10, I appreciate your invitation to offer suggestions regarding the three bills inclosed with your letter, and I commend your efforts to devise constructive legislation to relieve unemployment. The subject is certainly no less worthy of governmental support and effort than is the tariff or merchant shipping, for instance.

I am not an economist, nor am I a specialist in labor law. Hence my comments upon your specific proposals will be of little value.

Bill No. S. 4157, providing for the establishment of Federal employment offices, or, in the alternative, for Federal aid to support State employment offices, strikes me as a thoroughly useful project. A dozen or more States now have such offices, and the proposal to give Federal aid would undoubtedly lead to the establishment of many others. By leaving this public service to be performed by the State whenever the State is willing to accept Federal aid and Federal supervision the bill avoids the objections of "State rights" theorists (personally I do not rate these objections very highly), and at the same time it is designed to secure uniformity and efficiency in the administration of the State offices. Since the unfortunate decision of the United States Supreme Court in Ribnik *v.* McBride (No. 569, October term, 1927), I see no alternative to the establishment of governmental employment offices, and your proposal, in view of that decision, seems very timely. The bill should perhaps include a provision bringing the Federal employment offices under the civil service laws.

Bill No. 4307 raises economic problems which I can not answer. I doubt that it is wise to spend money on public works merely in order to relieve unemployment; but your proposal does not go that far. As I read it it is limited to the acceleration of projects already undertaken for other reasons, and thus will not, if properly administered, lead to the undertaking of useless public works merely to provide unemployment doles. Even if your scheme does in some measure provide a subsidy for laborers, it is, in view of the serious social and economic consequences of unemployment, as justifiable as are the tariff and the ship subsidies. I take it there is nothing in your bill or in existing laws requiring the Government to pay the union scale or any other fixed scale of wages; the insertion of an express provision to this effect would make it clear that the Government is to be in a position to effect economies by speeding up public works during periods of excessive unemployment.

S. 4158, providing for the monthly publication of statistics of unemployment, seems to me unobjectionable, though I do not know how it affects existing laws. It is very hard, I suspect, to get an impartial estimate of unemployment. The purveyor of pessimistic news is apt to be an unwelcome guest, especially in the business world. Statistics can be juggled, and sometimes are. However, I believe with our late President Wilson in facing the "facts," and certainly accurate and timely information as to unemployment would be desirable if it could be obtained.

In conclusion, I heartily approve of measures to prevent labor troubles before they arise rather than to attempt to deal with strikes and lockouts by judicial or arbitral methods.

Sincerely yours,

EDWIN W. PATTERSON,
Professor of Law.

THE UNIVERSITY OF NEBRASKA, COLLEGE OF BUSINESS,
OFFICE OF THE DEAN,
Lincoln, September 26, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR MR. WAGNER: I have examined the bills which you sent me some time ago, S. 4157, S. 4158, and S. 4307, and I think that they are all very meritorious measures which I hope will soon be passed and be put into effect.

There is no question that we have too long delayed action in regard to unemployment, a situation quite discreditable to a great and prosperous country like ours.

With best wishes for the success of your efforts, I am

Yours faithfully,

J. E. LEROSSIGNOL.

THE UNIVERSITY OF WISCONSIN,
Madison, September 25, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: Your letter inclosing three bills to mitigate unemployment awaited me on my return from my vacation and I have read the bills with interest and approval. You address me as an economist, but I can not qualify. I have a warm interest in the legal phase of relations between employer and employee, but I don't see that I can add any wisdom to that which you have put into your bills. I like them thoroughly.

It was a pleasure to hear your excellent speech before the Democratic platform covention here last week. Governor Smith's forthright speeches in the West are stirring people hereabouts. I expect to join the big procession which is going to Milwaukee to hear him Saturday.

Very truly yours,

WILLIAM GORHAM RICE, Jr.

CHICAGO, *August 22, 1928.*

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: I have tried to give careful consideration to the three bills which you introduced during the last session of Congress and sent to me in your letter of August 10 for comment. Under pressure of work, I find myself unable, at the present time, to give these bills the detailed study which they deserve. I can state that I am in sympathy with their objects and that I think they are well designed to relieve unemployment.

(1) There can be no question concerning the desirability of the collection of unemployment statistics. They are absolutely essential to an understanding of the problem as it exists from time to time and essential to any intelligent measures for relief.

(2) The establishment of a national employment system in cooperation with the States is, to my mind, also essential. I assume that the details of this bill have been worked out upon the advice of those familiar with the mechanics of establishing adequate employment agencies and I would not feel competent to criticize the mechanical features of the bill. There is undoubtedly need for an extension and coordination of public employment agencies. Private employment agencies, unless carefully regulated, are productive of many evils and can not in the nature of things cover the territory necessary to provide for the transfer of surpluses of labor to places of scarcity. This is a problem which I think must be dealt with in a national way through the governmental agencies, which at least supplement, if they do not exclude, private agencies.

(3) Provision for public works to relieve unemployment during periods of business depression seems to me the natural and best means of stimulating improved business conditions. A war, although it drains the resources of the country, produces at the same time a certain business revival owing to the expanded use of public purchasing power and tapping the resources of public credit. It is to me logical that the same resources should be called upon to put men at work and to start the current of prosperity again when our haphazard industrial system gets out of gear. Purchasing power declines and men are thrown out of work, thereby further decreasing purchasing power, and it is clearly desirable both to create new lines of work and at the same time to revive the purchasing power of the masses of the workers. The danger in hasty consideration of the details of a measure (which I desire to avoid) may be indicated by my referring to the second line on page four of this bill. I think the phrase "lower cost of construction" is unfortunate. It implies that men will be put to work at reduced wages upon Government projects, whereas it would seem to me the sentence should read somewhat as follows. "And permit the Government to avail itself, so far as practicable in the prosecution of public works, of the opportunity for speedy, efficient, and economical construction during any such period." There may be a decline in wages during periods of depression, but a Government policy should seek to sustain, so far as possible, existing standards of living and therefore seek to use the quantity of efficient labor available to speed up construction of public works without interfering with private industry. It seems to me that this should be the ideal rather than "lower cost of construction."

Realizing that I might find other matters of detail concerning which I would like to offer suggestions, I hope you will accept this letter rather as a cordial indorsement of your program than as a careful review of the details of the proposed legislation.

Finally, permit me to express my opinion that the elimination of unemployment is one of the great and vital obligations of government. It can not be ignored, nor can it be dealt with effectively in times of depression. Preparedness in advance is the only sensible program.

Very sincerely yours,

DONALD R. RICHBERG.

NEW YORK EMPLOYING PRINTERS' ASSOCIATION (INC.),
New York City, August 16, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I appreciate the opportunity to send you my comments and criticisms on the three bills inclosed with your letter to me of August 10, S. 4158, S. 4157, S. 4307.

The means of working out a practical, effective program of action which will anticipate and relieve, as far as possible, ofttimes individually tragic and industrially costly effects of unemployment can hardly be overestimated. It is no second-rate problem, for its far-reaching reflex effects ramify into almost every phase of industrial and social life.

In my opinion your three bills cover the major essentials of any constructive program of approach to the problem. They provide, as I understand them, first, for a specific appropriation to supplement the funds now appropriated for the Bureau of Statistics of the Department of Labor in order to make it possible for this bureau to collect adequate unemployment statistics; second, to make more effective coordination of the existing State and Federal employment agencies by Federal appropriations on the same principle as now done under such legislation in the Smith-Hughes Act for education; third, for the setting up of a board with sufficient authority to start public works in the places where they do the most good to relieve unemployment.

The three bills are broadly flexible enough to accomplish the purposes for which they are designed.

The recent variations in the estimates of unemployment, approximately 1,800,000 to over 4,000,000, show the very definite need of getting more accurate statistics on unemployment. The bill gives the Secretary of Labor sufficient latitude to make whatever cooperative arrangements he finds necessary with the States or other governmental agencies to secure the information.

The information should be of two kinds; first, data which will give a quick barometer of changing conditions so that probable unemployment can be anticipated and relief measures set in motion sufficiently ahead of time to be of some value; and, second, statistics of a more permanent character which will give a measure of the volume of unemployment for comparison from year to year.

The criticism of most of the statistical data on unemployment is that they are post-mortem, and it is for this reason that I emphasize that in any administrative machinery emphasis should be placed on getting out reasonably accurate statistics of a current character. I see no modification of the bill necessary to accomplish this. It is a matter of administrative competency and also adequate funds to make the necessary help available to the Department of Labor. I am inclined to think that the appropriation of $100,000 will be found inadequate for this purpose. It will be necessary for the board who have the responsibility for allocating public works to base their judgment to a considerable extent on these statistics. Considering the size of the country and the complexity of its industrial structure, it seems to me that the Department of Labor would have to have as a starter at least $250,000 to properly organize this work.

During the war an attempt was made to coordinate the activities of the National Employment Service with the various State services. I had occasion to undertake this work for the National Employment Service for both the States of New York and Massachusetts. I found both the national and the local agencies for the most part depressingly mediocre. Though I am quite convinced that the modification of these two services is a vital move in meeting this problem, I am also as thoroughly convinced that unless the whole plan is much more competently administered than it has been in the past it will fall very far short of its opportunity.

I realize it is quite impossible in a general bill to do anything else than to set up a general structure, and I think the bill does just that. I can not help believing, however, after having had a year's experience with the National Employment Service during the war, that unless some big, capable man is put at the head of it and the service put under civil service, with adequate standards in salaries, the results hoped to be obtained through a medium of these employment agencies will prove very disappointing.

I should be glad to tell you some of my experiences more in detail if the opportunity arises. I might suggest as a partial measure to meet the difficulty I pointed out that there be appointed an advisory board, similar to the one you have set up on the allocation of public works, to advise the Secretary of Labor in the administration of the employment agencies, the Secretary of Labor's decision, of course, to be the determining decision in the operation of such bureau. I should also suggest that the bill provide for setting up local advisory boards made up of representative organizations in the community headed by a man of outstanding character and public spirit, to give his time to locally checking up

some of the work of these bureaus and also to invite the community's cooperation. This was one of the essential features of the cooperative plan worked out between the State and the Federal Governments during the time of the war.

The major difficulty in using the construction of public works as a relief for unemployment during periods of depression is that there has been in the past no machinery authorized to meet emergencies. By the time a project was put through the procedure necessary to protect public interests the need for the project had passed. Your bill makes it possible to meet this need. Personally I have had the experience of expending some twenty million dollars of public money and I know how essentially important it is to protect the public interests in such expenditures. I also realize that within such protection it takes time to get a project underway. This can be overcome by planning ahead and having any project undertaken under such an emergency bill a part of a general plan. This bill covers the problem of advance planning quite fully. It provides for the administrative body to act upon the projects and it recognizes the various channels of organization through which expenditures are usually made. With an appropriation of $150,000,000 it makes it possible for the board to put into effect, in the most badly needed places with reasonable celerity, some relief.

I see no modifications necessary to the three bills. My personal opinion is that if passed by Congress it will be a very definite step ahead in recognizing the unemployment problem as one that must be constructively handled as a matter of far-reaching public interests.

Some time I should like to have the opportunity of talking over with you the whole situation more in detail and the working out in practice the proposals set forth in the bill and I should be glad to be of any service I can by appearing before the congressional committee if you so desire and giving any information I have which might help in the passage of the bill.

Let me again thank you for the opportunity of commenting on the three bills submitted.

Yours very sincerely,

F. A. SILCOX,
Director Bureau of Industrial Relations,
New York Employing Printers' Association (Inc.).

UNIVERSITY OF VIRGINIA,
University, Va., September 21, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I regret very much that my reply to your letter of August 10, relative to the set of bills introduced by you in Congress on the unemployment situation, has been delayed so long. The delay has occurred because of my absence on the Pacific coast during the summer.

The bills introduced by you have my hearty support and approval. I have read them and find no objectionable feature in any of them. That there should be established a United States employment service in conjunction with the Bureau of Labor, which, in turn, will cooperate with the various State departments of labor whenever possible, is, I think, beyond question. The rapidity of the labor turnover in this country and the seasonal unemployment, together with the bad results of business cycles, make it both desirable and necessary for the Federal Government to aid in the solution of these problems. For example, I have spent the past summer in Los Angeles. I was told by various business men and building contractors that at least 100,000 people were unemployed in that city and were daily seeking employment without success.

I trust that you will receive the support and encouragement which you deserve in your efforts to have these bills passed at the next session of the Congress.

Yours very sincerely,

TIPTON R. SNAVELY,
Professor of Economics.

THE OHIO STATE UNIVERSITY,
Columbus, August 30, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SIR: Permit me to thank you for the privilege of examining the bills which you sent relative to the unemployment situation. I am deeply interested in your efforts in that direction and realize, I think, something of the importance of the problem. However, I have not made a sufficient study of it to offer any constructive criticism of value at this time. Bills S. 4157 and S. 4158 strike me, on casual examination, as decidedly helpful. Whether bill S. 4307 is a step in the right direction is a question on which I have more doubt, though I should not express myself as definitely opposed to it without further study of the subject.

Very truly yours,

LEWIS M. SIMES.

NEW YORK UNIVERSITY,
DEPARTMENT OF ECONOMICS,
New York, September 20, 1928.

Senator ROBERT F. WAGNER,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR WAGNER: Your letter of August 10 and the unemployment bills inclosed just came to my hand. I am delighted that you have introduced these bills and that they tackle problems which have been greatly neglected in this country. An industrial nation which prides itself on the efficiency of its business methods should certainly be able to see that it is "good business" for employers and employees to have in existence instrumentalities which help to coordinate the demand for and supply of labor.

In connection with the bill providing for the collection of data I am wondering whether it will be necessary, ultimately, if not now, to include a clause giving the Department of Labor power to require employers to furnish the necessary data.

In section 4, page 4, lines 5 to 7, of the bill establishing an employment service I am wondering why the words "and shall not be less than the amount so appropriated by such State for public employment offices in the year 1918" were included. I was not aware, as section 7 seems to indicate, that there were unexpended balances of appropriations made for war emergency employment service which may be utilized now.

In section 5, line 19, of the bill providing for emergency construction of public works, why should it not read, "he (the President) shall transmit to Congress by special message," rather than leave it to his discretion?

Do you not think that the Federal unemployment stabilization board should be called the Federal employment stabilization board, as being more appropriate to its real functioning? As I see it, the board is to help stabilize employment.

These bills should have the support of all people who desire to help relieve poverty through providing employment. They should appeal also to all who are interested in the stabilization of business in general. For to provide as many people as possible with work is one of the most effective means of coordinating production and consumption throughout the economic system.

Wishing you success in your efforts to enact these bills into law, I remain,

Yours sincerely,

ARTHUR E. SUFFERN.

UNIVERSITY OF NEW HAMPSHIRE,
Durham, N. H., September 10, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: In response to your letter of August 10, in which you inclosed the copies of the three bills introduced by you in the last session of Congress, concerning which you invited my comment and criticism, will say that I have just gone through these bills and should like to place myself on record as favoring all three in principle.

Bill S. 4158 would be valuable in giving to the general public and those especially concerned with labor an authoritative knowledge of the labor turnover and hours of employment. I hope you may be successful in securing its passage.

Bill S. 4157 provides for a very much needed national employment system. For the last seven or eight years I have given some time in my labor lectures to my classes in economics to the need for the establishment of such a system. I am pleased to know that you have taken the initiative in Congress for this needed measure.

The third bill, S. 4307, provides for the emergency construction of certain public works for the relief of unemployment. In the general provisions of this bill I find myself in hearty accord. The principles of the bill should be enacted into law.

Very sincerely yours,

H. W. SMITH,
Professor of Economics.

THE NEW REPUBLIC,
New York City, August 28, 1928.

Senator ROBERT S. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I have read carefully the three bills which you have drafted to deal with unemployment, and I am heartily in sympathy with the objects of all three. As far as I can see, without a more exhaustive study than I have been able to make, they are well adapted to accomplish the purpose you have in mind. Of course, I am not an expert in drafting, nor have I made a careful enough study of the administrative features to be able to say whether any changes would be desirable.

Sincerely yours,

GEORGE SOULE.

NEW YORK, N. Y., *September 12, 1928.*

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: Your letter of August 10, sending me for consideration three bills introduced by you into the last Congress, reaches me after my return to New York.

I have read all of these with great interest and sympathy. You are at liberty to use my personal name as very distinctly indorsing and approving of these three measures.

I sincerely hope that your efforts will lead to their adoption in the early future.

Cordially yours,

ORDWAY TEAD,
Economic and Business Books.

UNIVERSITY OF PITTSBURGH,
SCHOOL OF BUSINESS ADMINISTRATION,
Pittsburgh, Pa., October 17, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I have examined copies of Senate bills 4157, 4158, and 4307, which you kindly forwarded to me. I find myself in general agreement with all three measures and feel that you are to be congratulated in taking a special interest in this fundamental problem, which has recently been intensified by the rapid technical progress of American industry and resultant increase in man-hour productivity.

May I ask whether you have been in touch with Mr. Otto T. Mallory, of Philadelphia, who has given so much time and effort to the idea of a prosperity reserve and public-works planning to stabilize employment, and whether bill 4307 has the backing of his national group? No doubt you have been in touch with Dr. John B. Andrews, of the American Labor Legislation Association. I shall be glad to learn whether the association has approved and will back these measures in the next Congress.

Sincerely yours,

FRANCIS TYSON,
Professor of Economics.

THE CORNELL LAW SCHOOL,
Ithaca, N. Y., September 11, 1928.

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: I beg to acknowledge receipt of your letter of August 10, together with the inclosed copies of Senate bills Nos. 4157, 4158, and 4307, introduced by you with respect to the creation of a Federal system to aid in the solution of the problem of unemployment.

I have read the copies of the bills and approve the coordination of the proposed Federal employment service with such State agencies as now exist or which may be hereafter established. I also approve the provision in bill 4307 for emergency construction of certain public works to relieve unemployment during business depressions by means of a Federal unemployment stabilization bureau.

The creation of such a national employment system would seem to provide an opportunity for nation-wide uniformity with respect to child labor laws. Whether this should be brought about by specific provision in the bills or left to be worked out in the administration of the act under the clause providing for "establishing and maintaining uniform standards, policies, and procedure" (sec. 2, bill No. 4157) is a matter upon which judgments may differ. Personally I favor the inclusion in such a bill of an enumeration of the legal qualifications governing employment to juniors in gainful occupations, and granting Federal appropriation only to those States which conform thereto.

I note that these bills do not make any provision for payment by those who receive the service. It would seem only reasonable that the employee and employer who are benefited by those services should pay a reasonable fee therefor. To provide for the payment of such a fee would seem in harmony with the recent decision of the United States Supreme Court in Ribnik *v.* McBride (48 Sup. Ct. Rep. 545 (1928)), which held the New Jersey employment act unconstitutional, so far as it empowered the State commissioner of labor to regulate the fees charged by employment agencies, since the provision requiring those assisted by the Federal system to pay the reasonable value of the service would tend to mitigate competition by the Government with the private business of operating employment agencies. I assume that the employee or employer will be required to reimburse the Government for advances of transportation charges. My observation has led me to feel that this is an essential requirement, because even under the present system of private employment agencies many persons will take a job and have their transportation paid, then disappear or leave before they have worked out the amount of transportation. Some method should be adopted to eliminate this shiftless class of employees from the advantages of the service, since obviously there is no method by which they can be legally compelled to remain on the job sufficiently long to earn the necessary wages to reimburse the transportation charges.

Very truly yours,

GEORGE J. THOMPSON.

NORTHWESTERN UNIVERSITY,
DEPARTMENT OF SOCIOLOGY,
Evanston, Ill., August 20, 1928.

Hon. ROBERT F. WAGNER,
United States Senate Building, Washington, D. C.

MY DEAR SENATOR WAGNER: The three bills which you introduced during the last session of Congress would, if enacted into legislation, go far toward realizing a dream I have had for many years. I am deeply impressed by the fact that somebody is at last beginning to take genuine interest in the problem of unemployment, and I sincerely hope that your interest will not prove a mere flash in the pan.

As I read over the three bills I can find only good in S. 4158, as it proposes only an extension of a working arrangement by the Federal and State statistical authorities which has already proved practicable.

From the standpoint of administration in S. 4157, I should only raise the question as to whether the provision for appointing the director general of the United States bureau of employment service by the President would create difficulties within the Department of Labor. It is such a vital element in the department's activities that real team work should be assured. Perhaps this is just an excess of caution on my part. Nevertheless I mention it.

The other question I have in connection with this bill carries with it a much deeper implication of principle. For nearly 20 years I have been convinced that our policy of immigration should be tied up with our problem of employment. I have advocated for a long time a sliding scale of immigration based upon what I have called the real demand for labor, as evidenced by employment statistics and a sense of the business situation as revealed by the activities of a coordinated system of Federal employment bureaus. I can quite see that it would be unwise to mix the two matters in one bill. May I venture to hope, however, that you might address your mind to the problem of coordinating the public employment service, contemplated by your bill, with the immigration service? I shall be glad to put this in more detailed form if you consider it worth while.

With the purposes of S. 4307 I am heartily in sympathy, for I believe that the stabilizing effect of such a long-range policy of public works would be much greater than the stipulated maximum of a hundred and fifty millions a year implies. If it is true that business depressions are psychological and if there is anything in the principle of morale building, the very knowledge of such a definite construction policy, captained by the Federal Government and perhaps followed by States and municipalities, would go a long way toward stiffening the fiber and increasing the stamina of business leaders. In other words, it ought to have a preventive as well as an ameliorative effect. Because I feel so strongly the good possibilities in such a measure, I should want to be sure that it had been safeguarded against the inroads of mere pork-barrel politicians without so many restrictions as to hamstring the measure and limits its effectiveness. All the safeguards you can throw around it in the aspect I have noted will assist in solving our unemployment problem.

Sincerely yours,

ARTHUR J. TODD.

COLUMBIA UNIVERSITY,
New York City, August 13, 1928.

MY DEAR SENATOR WAGNER: So far as I know, you are the only person whose mind and heart are genuinely troubled about our grave unemployment problem and who is in a position to get action. I have watched your efforts with approval. In public print and private effort I hope to uphold your hand.

Sincerely,

R. G. TUGWELL.

AMERICAN ENGINEERING COUNCIL,
Washington, August 17, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I appreciate very much, indeed, your courtesy in requesting our comment on the set of three bills introduced by you during the last session of Congress.

I have given the three bills a careful reading and find myself in full accord with the principles involved. A more detailed study might cause me to suggest certain changes as to operation, but nothing as to primary objectives.

American Engineering Council has been interested in the matters covered in the three bills. We have supported legislation looking toward such general ends. For instance, we supported the Kenyon bill of a few years ago and the recent Jones bill on the question of prosperity reserve.

I am taking the liberty of sending copies of your bills to the members of the committee on public affairs of American Engineering Council and asking comment thereon. Through this means in due time you will receive from us a somewhat official statement of our point of view.

For these reasons I prefer that you consider this as a letter of acknowledgment. Be assured, however, that in the course of a relatively short time you will receive from us a more comprehensive discussion.

I appreciate your courtesy in calling this matter to our attention.

Very sincerely yours,

L. W. WALLACE,
Exectiuve Secretary.

WESLEYAN UNIVERSITY,
DEPARTMENT OF ECONOMICS AND SOCIAL SCIENCE,
Middletown, Conn., September 8, 1928.

Senator ROBERT F. WAGNER,
Washington, D. C.

MY DEAR SENATOR WAGNER: I am in complete sympathy with the three bills on unemployment introduced by you during the last session of Congress.

As I see it, your bills cover the matter in a thorough and practicable way, making provision for securing and publishing information, employment agencies for the distribution of the mobile labor surplus, and Government program of construction when and where it is most needed to stimulate industry.

I am in no position to criticize the bills in detail, but they seem to me to embody sound and important measures for the treatment of the most difficult and least regarded problem of social welfare.

I sincerely hope that your efforts will be successful and that all three bills will pass.

Respectfully yours,

N. J. WARE,
159 Broad Street, Middletown, Conn.

KNOXVILLE LODGE, No. 160, B. P. O. E.,
Knoxville, Tenn., August 29, 1928.

The Hon. Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SIR: I have read with interest the copies of Senate bills 4307, 4157, and 4158 which you inclosed in your letter of the 10th instant for my criticism and comment.

I refrain from criticizing your bills, because my field of special study and research in economics has been confined to the problems of marketing and merchandising. However, as a student and teacher in the general field of economics, I have long held to the conviction that our Federal Government ought to make a determined effort to obviate and mitigate, in so far as possible, the frequently recurring cyclical periods of business depression, with their concomitant evils of widespread or local unemployment. The economic losses from unemployment in the United States since the Civil War period have aggregated a greater total of dollars than the combined losses suffered by the people of the United States from grasshoppers, boll weevil, chinch bugs, San Jose scale, cedar rust, and other insect and fungi diseases of fruit trees and truck crops, as well as hail storms and tornadoes and floods.

As you well know, our Federal Government has expended millions of dollars in research, experiments, and "extension work" in a generally praiseworthy attempt to control or obviate and mitigate the suffering and losses resulting from most of the above-indicated causes.

My admittedly cursory study of your three bills inclines me to express the tentative opinion that they, all three of them, are altogether consistent with the general trend of the development in the nature and scope of governmental supervision and control of business affairs that are fraught with vital and great social importance. I know of no other practicable way of mitigating the evils of general unemployment or of obviating them on a large scale.

Very truly yours,

GUSTAV PAUL WARBER,
Professor of Economics, University of Tennessee.

ONTARIO, CANADA, *August 20, 1928.*

The Hon. ROBERT F. WAGNER,
Washington, D. C.

MY DEAR SENATOR WAGNER: I have looked through your bills on unemployment. They contain sound proposals which are recognized by all students of this subject as essential to any national program on this subject. It is a disgrace that this country has not put them into force before this, and I trust they may speedily be enacted.

Very sincerely yours,

HARRY F. WARD.

CORNELL UNIVERSITY,
Ithaca, N. Y., September 18, 1928.

Hon. ROBERT E. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: A reply to your letter of August 10 has been delayed until now by my absence on vacation.

I am much interested in the bills which you have introduced. I believe that there is a great need that the Federal Government should make more energetic efforts to secure at frequent intervals information about the amount and character of unemployment in various parts of the United States. I believe also that it is desirable to distribute work done by the Federal Government, either through its own employees or under contract, in such a way as to increase the amount of such work wherever possible when the amount of unemployment increases. In other words, I am cordially in favor of Senate bills 4158 and 4307. Whether the situation also calls for the establishment of a national employment service as provided in Senate bill 4157 I am not so clear.

If these opinions are of any help to you, you are at liberty to use them in any way you see fit.

Yours sincerely,

W. F. WILLCOX.

WASHINGTON AND JEFFERSON COLLEGE,
DEPARTMENT OF ECONOMICS,
Washington, Pa., September 14, 1928.

The Hon. ROBERT F. WAGNER,
Senate Office Building, Washington, D. C.

DEAR MR. WAGNER: Your letter of August 10 came to hand during my absence from here on a vacation. That accounts for the delay in answering your communication. I have read the bills which you have submitted, and I am substantially in sympathy with their provisions.

The problem of unemployment is of sufficient importance to justify the enactment of sound legislation aimed to eliminate its evil effects. By the very nature of our present industrial organization the injurious effects of unemployment upon the wage earner are greatly accentuated. Obviously a depreciated purchasing power on the part of the wage earner due to unemployment will tend to depress business, whereas employment and the means to satisfy the demand of the worker for consumptive goods will stimulate business conditions and thus reduce unemployment. In lecturing to college students enrolled in my courses I have repeatedly stressed the need of measures which in the main correspond to the proposals embodied in your bills. Construction of public works during periods of depression and unemployment, a Federal employment exchange operating in cooperation with the State and local governments, and provision for the collection of statistical data dealing with employment conditions, if employed on a sufficiently wide scale, would doubtless go far toward eliminating unemployment and minimizing the bad effects of the business cycle.

I am of the opinion that the legislation called for in your bills is economically justified, and if in effect would meet a real social and economic need. I sincerely hope that Congress will see fit to pass these bills. Even though I am a Democrat I assure you that my judgment in this matter is not influenced by any political consideration, but is the result of a careful study and mature deliberation of the economic issues involved.

I cheerfully make this comment in behalf of your efforts to relieve the unemployment situation, feeling that this cause is worthy of promotion and deserves the encouragement of liberal-minded individuals who have the welfare of the people at heart.

Very sincerely,

M. C. WALTERSDORF.

WISCONSIN FREE LIBRARY COMMISSION,
Madison, August 15, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

Re: Employment bills.

MY DEAR SENATOR WAGNER: Pursuant to your letter of August 10, I have gone over the three bills dealing with phases of the unemployment problem and can say that I regard them as representing collectively the most hopeful attack upon this problem that has ever been presented in Congress.

Taking up these bills in turn, I would like to offer the following suggestions for your consideration:

S. 4157—NATIONAL SYSTEM OF EMPLOYMENT OFFICES

I like the feature of your bill that the State shall have control of the employment offices if they are willing to cooperate. Close contact with the United States employment offices in this State during the war time has led me to the conclusion that any attempt at centering control (other than the determination of general policies) from Washington will not do. The States must have primarily control and responsibility for the employment offices; and this, I understand, is the plan you propose.

With regard to desirable amendments, I would suggest that provisions be made for the formal acceptance of the act by the State legislatures in a manner similar to the acceptance provisions of the vocational education law and of the Sheppard-Towner Act on maternity and infant welfare. Pending the meeting of the legislature, it should be provided that the governor of any State may temporarily accept the provisions of the act. Such formal acceptance by the legislature, I feel, has great value in definitely committing the State to a program of cooperation.

I would suggest consideration of the advisability of writing into the law provisions for advisory committees to be composed of representatives of the employers and the labor unions. The work of the employment offices is of such vital interest to employers and labor unions that every possible effort should be made to insure neutrality in industrial disputes. This was, as you know, one of the great criticisms of the United States Employment Service in the war time, and everything that can be done to remove any fear that a national employment service will necessarily be partisan seems to me worth while.

S. 4158—EMPLOYMENT STATISTICS

Upon this bill I have only the question whether it authorizes the allotment of any part of the $100,000 appropriation to States cooperating in the collection of employment statistics. This seems to me desirable as a fair deal to the States which enter into such cooperative arrangements and also as a method of securing the best results.

S. 4307—EMERGENCY CONSTRUCTION OF PUBLIC WORKS FOR RELIEF OF UNEMPLOYMENT

Upon this bill I have no suggestions whatsoever to offer. It seems to me to utilize every possibility for using public works, financed by the Federal Government, to stabilize private employment.

If there is anything further that I can do to assist you, I trust that you will so advise me.

Very truly yours,

LEGISLATIVE REFERENCE LIBRARY,
By EDWIN E. WITTE, *Chief*.

THE IOWA STATE COLLEGE OF
AGRICULTURE AND MECHANIC ARTS,
DEPARTMENT OF ECONOMICS, HISTORY, AND SOCIOLOGY,
Ames, Iowa, September 13, 1928.

Senator R. F. WAGNER,
New York City, N. Y.

DEAR SIR: Your letter of August 10, 1928, addressed to Prof. J. E. Brindley, has been referred to me as the one who teaches labor in this college.

If it is practicable for you to include in bill S. 4158, line 10, the words "total turnover" or their equivalent, I should suggest your doing so. I think you can perceive the value of it.

I have no other suggestions to make at present. The three bills taken together seem to provide adequately for at least three years the three fundamental requirements of public treatment of the unemployment problem: (a) The statistical basis for foretelling the course of employment; (b) permanent machinery for connecting men with normal employment; (c) provision betimes of emergency employment.

Yours truly,

GRACE S. M. ZORBAUGH,
Associate Professor of Economics.

LONDON SCHOOL OF ECONOMICS,
HOUGHTON STREET, ALDWYCH,
London, W. C. 2, August 25, 1928.

MY DEAR SENATOR WAGNER: I have read the three bills inclosed with your letter of August 10 with much interest. It is hardly profitable at this distance to discuss details, but I am happy to say that I believe each to be, in principle, a wise piece of legislation. Lest this should seem too vague, let me say that if I were a Member of Congress I should vote for all three. The most controversial issues are contained, of course, in S. 4307. I have long held that the principle now embodied in this bill is sound. The only problem would be that of getting a thoroughly efficient and scrupulously unbiased and nonpartisan administration of its provisions.

You will have observed, I may assume, that the efficacy of the remedy depends in large measure upon there not being an equal or offsetting increase of taxation in the year or period within which the remedy is applied. It will help little if the Government merely spends money which the taxpayers might otherwise have spent for themselves, for in such case there would be no effective increase in the aggregate demand for labor. I am inclined to the opinion that if the expenditure from the $150,000,000 appropriated for any year exhausted or more than exhausted the funds available, the best way to handle the matter would be in connection with the management of the public debt. That is, in case of need, the rate at which the debt was being paid off should be reduced. In short, the thing should be so managed that, so far as possible, the money spent by the Government should be a net addition to the aggregate money income of the people of the country. Personally, I would wish that it were politically wise (as it would be economically wise) to raise the maximum expenditure for a single year to $300,000,000.

Sincerely yours,

ALLYN A. YOUNG,
Professor of Economics in Harvard University,
and Professor of Political Economy in the University of London.

ADDITIONAL JUDGES IN NEW YORK

Mr. NORRIS. Mr. President, there have come to me from the Committee on Legislation of the Federal Bar Association, New York branch, some resolutions relating to several proposed items of legislation. I ask unanimous consent that these resolutions may be printed in the RECORD and that they be referred to the Committee on the Judiciary.

There being no objection, the resolutions were referred to the Committee on the Judiciary and were ordered to be printed in the RECORD, as follows:

The committee on legislation of the Federal Bar Association, New York branch, respectfully submits the following resolutions which have been approved by the association for the consideration of the respective committees of the Congress:

"Whereas there is now pending before the Congress of the United States a bill for additional district and circuit judges to be appointed in the Southern and Eastern Districts of New York and Second Circuit; and

"Whereas said additional judges are necessary for the proper administration of justice within those districts: Be it

"*Resolved*, That the Federal Bar Association hereby approves the passage of said bill; and be it further

"*Resolved*, That the committee on legislation and the president of the association be directed to take all proper steps toward presenting its recommendation and approval before the appropriate committees of Congress, * * *.

"Whereas there is now pending before the Congress of the United States a bill authorizing the judges of the United States Circuit Court of Appeals to employ law assistants or law secretaries in circumstances similar to those whereby such assistants are appointed by the Justices of the Supreme Court; and

"Whereas it is the opinion of the association that the appointment of such law assistants is desirable: Now therefore be it

"*Resolved*, That the Federal Bar Association approve the passage of the bill now pending before Congress for the appointment of law assistants or law secretaries to the judges of the circuit courts of appeals; and be it further

"*Resolved*, That the committee on legislation and the president of the association be directed to take all proper steps toward presenting its recommendation and approval before the appropriate committee of Congress.

"Whereas the facilities in the old post-office building have long been inadequate for the proper disposition of the work of the United States District Court for the Southern District of New York and the Circuit Court of Appeals for the Second Circuit; and

"Whereas for several years the Government has been required to rent space in private office buildings to provide offices and chambers for the judges of the United States District Court for the Southern District of New York and for certain rooms for holding court, entailing thereby inconvenience to judges, litigants, and their attorneys, and great expense to the Government; and

"Whereas the inadequate and unsanitary conditions under which the judges and courts must function in the United States Circuit Court of Appeals for the Second Circuit and District Courts for the Southern District of New York are notorious: Be it

"*Resolved*, That Congress be petitioned to provide for the erection of a new Federal courthouse within the Southern District of New York for the business of the United States Circuit Court of Appeals for the Second Circuit, the District Court for the Southern District of the United States and of the United States attorney; and be it further

"*Resolved*, That the committee on the new Federal court building and the president of the association be directed to present this petition to the appropriate committees of the Congress and to take all proper steps toward attaining the passage of the bill looking to a remedy of the conditions herein described.

"Whereas the salaries of the judges of the circuit court of appeals and the district courts, although recently increased, are inadequate, considering the nature and importance of the business involved and of the dignity of the courts: Now therefore be it

"*Resolved*, That the Federal Bar Association urge upon Congress the passage of new legislation whereby the judges of the Federal courts, inferior to the United States Supreme Court, receive, in the case of the district judges, a salary equal to that of the salary paid by the State in which the court is located to the judges of the corresponding State court, and, in the case of the judges of the Circuit Courts of Appeals, equal to the salary paid to the judges of the highest appellate court for that State wherein the court of the circuit court of appeals is located, except that in no case the salary of the judges of the Federal courts inferior to the Supreme Court be less than the compensation at present provided for them by Congress; and be it further

"*Resolved*, That the committee on legislation of the Federal Bar Association and its president be authorized to present this resolution to the proper committees of Congress and to take appropriate steps toward securing its enactment in a bill.

"In accordance with the recommendations by Judges Hughes and Manton, the following resolution was also adopted: Be it

"Resolved, That it is the opinion of the association that a bureau or division be organized in the Department of Justice to have charge of details of administration in all Federal courts. In view of the existence of the Council of Federal Judges organized under act of Congress, it is the view of the association that the duties of that council should be extended to include matters of detail of administration to the end that the United States judges shall have the same administrative authority over their own courts as is now possessed by the judges of the courts of the State of New York."

PRESENTATION OF A HOOVER GAVEL

Mr. DENEEN. It is a great pleasure to present to you, Mr. President, a gavel fashioned from a tree grown in the yard of the Hoover home in Iowa.

I ask the privilege of having the accompanying correspondence printed in the RECORD.

There being no objection, the accompanying matter was ordered to be printed in the RECORD, as follows:

FIRST NATIONAL BANK OF HAMILTON,
Hamilton, Ill., December 8, 1928.

Hon. CHARLES S. DENEEN,
United States Senator, Washington, D. C.

MY DEAR FRIEND: By separate mail, registered, I am sending you a gavel made of wood from a tree planted by Mr. Hoover's father in the front yard of his home in West Branch, Iowa, in the shade of which tree Mr. Hoover as a little boy must have played. Mrs. Scellars, who now owns and occupies the house in which Mr. Hoover was born, handed me the wood and assured me that she superintended the cutting, and she knows, from the apparent age of the tree, that it was there when Mr. Hoover was a little boy.

Will you please be so good as to present this gavel to the Vice President on my behalf, and ask that it be presented at the proper time to his successor and, if proper, with appropriate ceremony?

A determined effort has reduced the history and sentiment to the fewest possible words, and I will feel proud, since I have worked so hard on the language, if the same can be made a part of the official record of the Senate.

Assuring you of my high personal regard, I am

Yours very truly,

ROBERT REED WALLACE.

If this bit of wood could speak our language it would tell of the beginning of the journey of a care-free little boy from a 2-room house on a frontier prairie in Iowa to the White House in Washington, D. C.—to the greatest office in the gift of men and women—to the greatest responsibility that can rest on any one man in the world.

* * * * * * *

A sturdy blacksmith set up his forge and shop on the west branch of a little stream on the western prairie, and across the ox-cart road he established his home, and in the front yard of that home he and his good wife planted a tree and that tree grew in the rich soil and pure air of Iowa—a little boy came and played under the friendly branches of that tree—the scythe of time took the father and mother and the relatives took the little boy and taught him the ways of the farm and the little country school, on which there is no better foundation to build a man; and that man is now the President elect of the United States, the highest office in the gift of men and women, and the greatest possible responsibility that can rest on any man in the world.

This gavel was fashioned of wood out of the tree planted by Mr. Hoover's father and mother—intrinsically it has little value, while, inspirationally, it has immeasurable value if we will allow it to epitomize what can be accomplished by a boy who will apply the very best that is in him to every physical, mental, moral, social, political, and humanitarian problem that presents itself to him; and it is with that inspirational value in mind that the gavel is now presented to the President of the United States Senate.

The people of the United States and of the world are expecting much of Mr. Hoover and his accomplished wife, and I have faith that they will measure up as far as it is possible for human beings to measure up; and I know we will have for our President a man well born, well educated, well seasoned, and widely experienced; a diligent, conscientious, humble, Christian gentleman.

ROBERT REED WALLACE,
Hamilton, Ill.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CARAWAY:

A bill (S. 5066) extending the times for commencing and completing the construction of a bridge across the St. Francis River at or near St. Francis, Ark.; to the Committee on Commerce.

By Mr. McKELLAR:

A bill (S. 5067) granting an increase of pension to Susan C. Kuykendall; to the Committee on Pensions.

By Mr. WAGNER:

A bill (S. 5068) to provide for the presentation of distinquished-service medals to certain persons; to the Committee on Military Affairs.

A bill (S. 5069) to provide for the appointment of two additional judges of the District Court of the United States for the Eastern District of New York; to the Committee on the Judiciary.

By Mr. SMITH:

A bill (S. 5070) for the relief of George Rivers; to the Committee on Commerce.

By Mr. McMASTER:

A bill (S. 5071) to provide for a sanatorium in South Dakota for tubercular Indian children; to the Committee on Indian Affairs.

By Mr. LA FOLLETTE:

A bill (S. 5072) granting a pension to Matilda Spain; to the Committee on Pensions.

By Mr. JONES:

A bill (S. 5073) to amend the act of Congress of June 26, 1906, entitled "An act for the protection of the fisheries of Alaska, and for other purposes"; to the Committee on Commerce.

By Mr. BROUSSARD:

A bill (S. 5074) for the relief of Harrison H. Bradford; to the Committee on Military Affairs.

By Mr. HARRIS:

A bill (S. 5075) to provide for the erection of monuments at Dalton, Resaca, Cassville, and New Hope Church, in the State of Georgia, in commemoration of these historic points and battle fields of the Sherman-Johnston campaign in 1864, and to provide for the erection of markers at other points of historic interest along the Sherman-Johnston line of march; to the Committee on Military Affairs.

By Mr. GREENE:

A bill (S. 5076) granting an increase of pension to Mary F. Mudgett; to the Committee on Pensions.

By Mr. HALE:

A bill (S. 5077) granting an increase of pension to Joseph A. Libby (with accompanying papers); to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 5078) for the relief of Maude E. Mayer (with an accompanying paper); to the Committee on Foreign Relations.

By Mr. THOMAS of Oklahoma:

A bill (S. 5079) for the relief of William Sheldon; to the Committee on Claims.

A bill (S. 5080) granting a pension to Blaine E. Davis (with accompanying papers); to the Committee on Pensions.

By Mr. WALSH of Massachusetts:

A bill (S. 5082) for the relief of William H. Connors; to the Committee on Military Affairs.

A bill (S. 5083) for the relief of Henry Dewey Bennett; to the Committee on Claims.

A bill (S. 5084) to correct the naval record of Daniel V. McKendry; to the Committee on Naval Affairs.

By Mr. WATSON:

A bill (S. 5085) to regulate interstate commerce by motor vehicles operating as common carriers of persons on the public highways; to the Committee on Interstate Commerce.

VIOLATION OF TRAFFIC REGULATIONS BY OFFICIALS

Mr. SACKETT. Mr. President, I introduce a bill for reference to the Judiciary Committee and a resolution which I request be referred to the Committee on Foreign Relations. It is my thought that after these matters have been considered by the Committee on the Judiciary the bill ought then to be considered by the Committee on Military Affairs and the resolution by the Foreign Relations Committee.

If I may be indulged by the Senate but a moment, the purpose of these two measures is to promote the public safety. The bill seeks to secure the dismissal from Government service of any employee of the United States or the District of Columbia who shall have been legally convicted of operating a motor vehicle or automobile while under the influence of liquor. The resolution seeks to declare the sense of the Senate that the President should request the recall of anyone connected with a diplomatic mission who pleads his immunity in response to charges of operating an automobile while under the influence of liquor or who is convicted of doing so.

I wish to say to the Senate that these measures are not prohibition bills. They are not introduced in response to sugges-

tions of any interested groups. At the same time, it is perfectly apparent to all men that since the tremendous increase in motor traffic there has come into general use an instrument of danger and hazard which results in the death or maiming of thousands of people annually. The danger of the operation of motors on highways or in city streets is abundantly disclosed in the daily list of accidents, even when operated by those who are as skilled and capable as our present-day necessities of transportation will permit their operation to be confined. When this same dangerous equipment is guided by drunken drivers they become a menace to every law-abiding citizen and to the members of their families, against whose irresponsible driving there can be no protection whatever.

Based on the declared policy of the country in outlawing the liquor traffic, it would seem that the Federal Government should take the lead purely in the interest of public safety in eliminating the menace of the intoxicated driver of these instruments of danger. There is surely no excuse for the continued employment of individuals in the public service who have so conducted themselves as to produce this danger. The bill seeks to make the dismissal from Federal service after conviction mandatory and avoids the influences which would often gather to produce leniency on the part of the employment official. It applies with equal force to the civil service and to the Military and Naval Establishments. It is purely in the interest of the public safety. It is in response to the frequent notice in the public press of the numerous accidents ascribed to the propensity to mix alcohol and gasoline.

It is my hope that such action by the Federal Government will lead to similar action by States and municipalities and lead to similar dismissals by business enterprises as showing one method by which they can definitely assist in the movement of the safety councils, whose efforts are directed to rendering the operation of motors in the United States as safe and sane as circumstances will permit.

Mr. KING. Mr. President, I wish to inquire of the Senator if he has offered a resolution or bill carrying out the purposes outlined by him?

Mr. SACKETT. I offer a bill and a resolution.

Mr. KING. To which committee does the Senator ask that they be referred?

Mr. SACKETT. I ask that the bill be referred to the Judiciary Committee first, and that afterwards the bill be referred to the Committee on Military Affairs, to make sure that the provisions thereof would be properly applied. The resolution I desire to have referred to the Committee on Foreign Relations.

The bill (S. 5081) to provide that no salary or wages shall be paid to certain officers and employees convicted of operating motor vehicles while under the influence of intoxicating liquor, and for other purposes, was read twice by its title and referred to the Committee on the Judiciary.

Mr. SACKETT submitted the following resolution (S. Res. 283), which was referred to the Committee on Foreign Relations:

Resolved, That it is the sense of the Senate that the President should request the recall or dismissal of any diplomatic agent or member of the official or nonofficial suite of a diplomatic mission of a foreign country, who asserts his immunity from arrest or prosecution for the offense of operating a motor vehicle while under the influence of intoxicating liquor, or who is convicted of such offense in any court of competent jurisdiction.

STONEWALL JACKSON (S. DOC. NO. 173)

Mr. OVERMAN. Mr. President, some time ago the junior Senator from South Carolina [Mr. BLEASE] made an address in the Senate in which he included a short section of the life of Stonewall Jackson, by Miss Anna Jackson Preston, the granddaughter of Stonewall Jackson. There has been a great demand for it. We are unable to furnish copies of the RECORD containing it. Therefore I ask that it may be printed as a public document.

The VICE PRESIDENT. Without objection, it is so ordered.

THE BOULDER DAM ACT

Mr. ASHURST. Mr. President, I ask to have printed in the RECORD the Boulder Dam bill as it passed the Senate. I do this because requests for copies of the bill are so numerous that I am unable to comply with them.

Mr. SMOOT. Mr. President, I suggest to the Senator that he do not make that request. If it is for the purpose of sending copies of the bill to the public, it ought to be printed as a public document and not in the RECORD, which would require the Senator to send out a complete copy of the RECORD.

Mr. ASHURST. I do not care to ask that it be printed as a public document.

Mr. SMOOT. I ask the Senator not to have it printed in the RECORD.

Mr. ASHURST. Very well; I shall not press the request.

SAFETY AT SEA

Mr. VANDENBERG. Mr. President, I am in receipt of a letter from Mr. Felix Riesenberg, who is a very famous and internationally known expert on questions of safety at sea, in which he challenges Congress to make an inquiry into this problem and declares that it inevitably would result in great advantage. I want to make the suggestion that Mr. Riesenberg should be called as a witness in the event of such an inquiry. I present an excerpt from his letter and from his article for the RECORD, and ask that the paper may lie upon the table and be printed in the RECORD.

There being no objection, the matter referred to was ordered to lie on the table and to be printed in the RECORD, as follows:

[Excerpts from letter to Senator VANDENBERG from Felix Riesenberg, of New York City, dated December 15, 1928. Mr. Riesenberg is the author of a standard work entitled "Standard Seamanship," which is recognized throughout the world as a textbook on the subject]

The whole subject of safety at sea goes far beyond that of merely the type of equipment. We are paying some attention at least to equipment and practically none at all to the training of the men who are intrusted with our lives in the handling of the ship. I would like to see a thorough-going investigation by the Government impressing the important question of our lack of adequate facilities for training men in the very difficult profession of the sea. Our condition is almost as bad as it would be ashore if the hospital authorities devoted all their attention to the equipment of hospitals, let us say, and nothing whatever to the training of surgeons.

We have three small school ships, supported very largely by Federal funds, but limiting their admission to boys of the States of Massachusetts, New York, and Pennsylvania. These ships, on the whole, are indifferently managed, and in some instances that I know of by persons totally unfit to have anything to do with the training of youth.

I think this is a most fruitful field for serious senatorial investigation in order that a national school ship act may come into being, with school ships under the Federal Government commanded by active naval officers with an approved curriculum suitable to merchant marine service training, particularly in the handling of boats loaded with passengers, such training to be open to every American boy desiring a career at sea, either on deck or in the engine room. Should such an investigation start, I would be in a position to give the committee a great deal of practical information of a constructive nature, and I know of many sources from which further help could be obtained.

[Excerpt from an article in The Nation of November 28, 1928, dealing with the subject of the steamship *Vestris,* and written by Felix Riesenberg]

The lifeboats are lifted from their chocks and lowered in port, to comply with the letter of the law, but in no adequate way does this assure any degree of skill in their handling. Certificated lifeboat men are created by some mysterious method not directly connected with the actual handling of lifeboats in a sea. Boats themselves, after certain statutory requirements have been met, vary greatly. No tests have been made to determine and insist upon the staunchest form of construction. Boats called "lifeboats"—and more properly death boats—are built in the cheapest way of sheet metal, easily punctured, and impossible to repair in an emergency. Other boats are simply planked, easily stove in, and are difficult to keep tight when drying out on the boat deck of a ship. The best boats are those built of two thicknesses of stout oak planking, crossed in diagonal laps, riveted together, and strengthened by heavy waterproof canvas laid between the layers. These boats can not be stove in except by some extreme force, but they are expensive equipment. Costs and safety to life are often balanced with the scale inclining toward economy.

And with all of the boat equipment cluttering the upper works of steamers, how little of it can be used. The crews of steamers constantly change, the men never have practice in lowering boats in a heavy sea, they seldom have organized practice in rowing, and almost never lower all boats at one time. Such precautions are too much trouble.

The safety of the million or so of passengers on the sea to-day is largely a matter of chance. Knowing the terrible risks, the almost insurmountable difficulties, shipmasters alive to their responsibilities grow prematurely old through worry.

CHANGE OF REFERENCE

On motion of Mr. WARREN, the Committee on Appropriations was discharged from the further consideration of the bill (S. 5025) providing an appropriation for the reconditioning of the frigate *Constitution,* and it was referred to the Committee on Naval Affairs.

APPROPRIATIONS FOR THE INTERIOR DEPARTMENT

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SMOOT. I move that the Senate insist on its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. SMOOT, Mr. CURTIS, and Mr. HARRIS conferees on the part of the Senate.

PANAMA AND NICARAGUAN CANALS

Mr. EDGE. Mr. President, I ask unanimous consent that the leading editorial in the Washington Post of to-day may be printed in the RECORD. The editorial is commendatory of the proposal contained in Senate Joint Resolution 117, for a survey of the Nicaraguan and Panama Canals facilities.

The VICE PRESIDENT. Without objection, it is so ordered.

The editorial is as follows:

PAVING THE WAY FOR NICARAGUA

The Senate has before it a resolution offered by Mr. EDGE, calling for a complete survey of the proposed Nicaraguan canal. New shipping facilities across Central America are not needed immediately, but the problem is one that should have attention to clear the way for future development.

Increases in traffic through the Panama Canal have exceeded all estimates. In 1915 only 1,075 ships, carrying 4,888,454 tons of cargo, passed through the canal. By 1928 the number of ships had increased to 6,456 and the tonnage to 29,630,709, an increase of more than 500 per cent. However, the present traffic is only 45 to 50 per cent of the canal's capacity. At the present time the Government is spending approximately $12,000,000 on the Alhajuela project to increase the water supply of the canal. Its capacity can be further increased by nearly 70 per cent by the installation of a third set of locks. These improvements, with some additional dredging work at a total cost of from $125,000,000 to $150,000,000, will increase the capacity of the canal to 100,000,000 tons per year.

It can not be expected that shipping through the canal will increase as fast during the next 10 years as it has in the past decade. With the improvements contemplated, the present canal will serve the needs of the world for many years to come. The United States need not invest in a new interoceanic route as long as the present facilities are adequate.

However, this does not alter the fact that the Nicaraguan Canal is an economic necessity of the future. It is perhaps safe to assume that the capacity of the Panama Canal will be reached before 1960. The United States should be ready with the Nicaraguan canal before that time.

The United States has paid Nicaragua $3,000,000 for the right to construct the canal and establish necessary naval bases for its protection. The recent visit of President-elect Hoover brought out the fact that both President Diaz and President-elect Moncada are in favor of the project. They are urging that their country contribute to building the canal, on the ground that it would be economically advantageous to Nicaragua.

Construction of the canal involves the consent of Honduras and Costa Rica. The diplomatic phase of the problem may take years to iron out. Now is the most propitious time to begin this work. Since the canal is an economic necessity of the future, and since the United States could not countenance its construction by another nation, the Government can not begin too soon to pave the way for its ultimate completion. Actual construction of the project would require a number of years. The Senate can well afford to begin collecting up-to-date data and the Government should take advantage of this favorable time for eliminating international difficulties in the way of the project.

THE WRIGHT CEREMONIES AT KITTY HAWK, N. C.

Mr. FESS. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Washington Star entitled "The Wright Ceremonies," in which the writer deals with the unfortunate controversy between the Wright brothers and the Smithsonian Institution. It is an editorial which ought to have wide circulation.

The VICE PRESIDENT. Without objection, it is so ordered.

The editorial is as follows:

THE WRIGHT CEREMONIES

Air-minded America yesterday doubtless went through a complexity of emotion when the entire world, figuratively, gathered on a bleak, wind-swept waste at Kitty Hawk, N. C., to do honor to the Wright brothers, Wilbur and Orville, who 25 years ago made man's first flight into the sky. Ever since that historic day when a hatless Coast Guardsman burst into a rural tavern near Kitty Hawk with the enthusiastic declaration, "They've did it; they've did it! Danged if they ain't been and flew." Wilbur and Orville Wright, the former now dead, but the latter modestly the recipient of international honors, have been acclaimed as the first humans to go aloft in heavier-than-air flight. The mixture of emotions, however, with which America viewed yesterday's impressive ceremonies at Kitty Hawk is due to the fact that while unequivocally the Wright brothers were the first to go aloft, their machine, the pride of this country to-day as it was 25 years ago and the symbol of America's parenthood and sponsorship of aviation, rests in a British museum instead of on the soil of the United States, where it was conceived and where it began to function to create a new era in the present-day civilization.

There is no one in this or any other country who will deny that the proper place for the first machine to fly successfully is in the United States. The controversy which has raged for years between Orville Wright, to whom the world gave felicitations yesterday, and the Smithsonian Institution, and which finally sent the first plane to England, should never have been begun.

With the institution insisting that a label should be affixed to the Langley plane, which slightly antedated the Wright machine, that it was believed "capable" of flight, and Orville Wright contending that the inscription was unfair to him and his brother, who actually made the first flight, the unhappy condition reached its crisis when the Wright airplane was sent across the water.

Unquestionably, each side of the controversy has its supporters, but in view of the momentous event which was celebrated yesterday at Kitty Hawk the time would seem propitious to begin a movement to bring back the plane to this country. The first step in this direction should be taken by the Smithsonian, which, regardless of the strength of its feeling that the Langley plane could fly, should make its peace with the inventor of the plane that did fly. It is simply a case of fact and theory. It is a theory that, if properly launched, the Langley machine was capable of flight. It is a fact that the Wright machine, which was properly launched, made the first ascent into the air carrying a passenger. Mr. Wright undoubtedly takes the position that it detracts from the prestige of his and his brother's accomplishment to place their plane beside a ship which dropped into the Potomac River on its attempt to get into the air, and which did not actually fly until 1914, 11 years later, after it had been thoroughly reconditioned through the advanced knowledge of aeronautics that had been acquired by that time. It would indeed be a graceful move on the part of the Smithsonian and one that would be gratifying to millions of Americans if it would end once and for all the unfortunate bickering that has robbed this country of one of its choicest treasures.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had agreed to the amendment of the Senate to the bill (H. R. 13665) to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States.

The message returned to the Senate, in compliance with its request, the bill (S. 584) for the relief of Frederick D. Swank.

ENROLLED BILL SIGNED

The message announced that the Speaker had affixed his signature to the enrolled bill (H. R. 13665) to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States, and it was signed by the Vice President.

GOVERNMENT REPORT OF COTTON GINNED

Mr. SMITH. Mr. President, I send two telegrams to the desk, which I ask may be read. They are typical of numerous others which I have received. After they shall have been read I desire to call the attention of the Senate to the question involved, which is a matter of great importance to us in our section of the country and to the public at large.

The VICE PRESIDENT. The telegrams will be read.

The telegrams were read, as follows:

GREENSBORO, N. C., *December 20, 1928.*

Hon. E. D. SMITH:

With the small ginnings to-day it is absolutely positive that the Government has overestimated this crop. Can't you get the Secretary of Agriculture to issue some statement and enable the farmer to get a fair price for the cotton he will sell before Christmas? I think this should be attended to immediately.

Kindest regards,

PIERCE C. RUCKER.

ST. MATTHEWS, S. C., *December 21, 1928.*

Hon. E. D. SMITH:

Reports every county entire Cotton Belt show total crop nearest ginned any crop last five years. Five-year average ginning 94 per cent. Ginning yesterday presents proof crop overestimated. Minimum half million bales overestimate, added to effect of manipulation, in basis and differences, causes farmers stupendous loss. Urge you immediately issue statement pointing out overestimate crop; also that your committee immediately take action to prevent continued manipulation of basis statement from you showing overestimate. Action concerning manipulation basis vitally necessary save part losses on small amount unsold cotton on farmers' hands.

J. S. WANNAMAKER,
President American Cotton Association.

Mr. SMITH. Mr. President, on yesterday the semimonthly report as to cotton ginned up to December 13 stated that the total amount up to that date was 13,148,000 bales. For the half month preceding only 500,000 bales had been ginned. All of us who are acquainted with cotton production and its preparation for the market know that from now until the end of the season ginning will steadily decrease, until the final report shall be made about the last of January, which indicates that if the averages run as they have heretofore the crop will fall perhaps more than half a million bales short of the Government estimate.

This is particularly unfortunate at this time. What I rose to call attention to, Mr. President, is to two unfortunate blunders on the part of the Government in relation to the price of cotton. We had an investigation as to the cause of the disastrous drop in the price of cotton in 1927, and the consensus of opinion was that responsibility should be placed on the unfortunate statement by the Bureau of Economics in September, when the cotton was made and no more could be added to the crop, which was a comparatively small crop. At the time the statement was made cotton was selling around 24 and 25 cents, but the statement issued by the bureau that the price of cotton was likely to fall in the following month precipitated such a decline that the price went to 17 cents per pound, and something like $35 to $40 a bale was lost on every bale of cotton remaining unsold at the time of the official statement.

After a thorough investigation by the committee, which disclosed some facts which I hope will be the basis of action hereafter in this body, cotton began to rise to the price to which it should have gone, that is, to a point showing a reasonable profit above the cost of production. Having just about again reached the 23, 24, and 25 cent level, the Bureau of Crop Estimates comes out with the statement that the increase in acreage for 1928 over the acreage for 1927 was 12.9 per cent, or practically 13 per cent. That statement, in which the board figured the crop as ultimately being 14,373,000 bales, precipitated another decline, from which the price of cotton has not recovered.

I am going to act in my own capacity first, and then if I can not get a satisfactory reply—which I do not doubt I will get—I will take further steps. I am going to ask them to give me in detail the names of the persons who reported to them the amount of increase and what methods they used in arriving at the estimate. I am as morally certain as that I am standing here that it was practically doubly overestimated, for 13 acres to every hundred acres is a tremendous increase in the cotton planted in 1928. Of course, if there had been a disastrous season, with that enormous increase the total volume would have been equal to or in excess of a normal year. So disgusted did different parties become that they practically left the market to the farmer himself without any support.

Now there comes an estimate as of December 31 of 14,373,000 bales. Up to December 13 there had been ginned only 13,148,000 bales, so that in order to reach the estimate predicted by the department there will have to be ginned from December 13 to the end of the season 1,225,000 bales. There is not a man from the Cotton Belt who believes that much more than half of that amount will be ginned from now on. There were ginned from November 13 to December 1 some 800,000 bales of cotton; from November 1 to November 13 there were ginned in excess of a million bales; so that the rate of decrease in ginning is rapidly progressive after the 1st of December is past, as indicated by the fact that from December 1 to the 13th there were only ginned 587,000 bales. From December 13 to January 1 it is not likely that there will be ginned in excess from 350,000 to 400,000 bales and from then on it is not likely that there will be ginned more than a half a million bales all together. I have the figures for 10 years before me and they bear out my statement, except for two years of excessive production when we did not have enough hands to pick the cotton.

In 1927 we made 17,755,000; we made so much cotton that the force available for the gathering of it could not gather it as efficiently and as rapidly as it could in the case of a normal crop; but taking the normal crops there is a rapid winding up of the ginning from December 1 to the end of the season.

I charge here and now that the Agricultural Department, by its statement along about the 1st of August that there was an increase of 13 per cent, or 13 acres in each 100 acres, precipitated the stagnant condition in the cotton market and added untold loss to those who produce it.

This has been the psychological effect: In 1927 the department issued a statement through the Bureau of Economics that cotton would decline. It did decline. In August, 1928, it issued a statement that the increase in acreage had more than trebled any previous increase, being 13 per cent, and all the friends of cotton who believed it ought to bring at least a price sufficient to remunerate the grower quit the market and left it in the hands of those who were unfriendly.

I shall take occasion, Mr. President, immediately after the holiday recess to ask the committee to take up the question as to the reliability of the source of the increased estimate. I want the names of the individuals, by States, and their postoffice addresses and those who were appointed to do this work by the Government, their qualifications, and what methods they used in estimating an increase of 13 per cent. Then I want to find out just what effect, if any, on prices the Textile Institute—which to me, at any rate, seems to be gathering in all the industries engaged in the spinning of yarn and the manufacturing of cloth—is having upon prices, and also whether or not any one great firm is being used or any great firms are being used for the purpose of furnishing the cotton to the spinners of the world to the exclusion of others. I wish to get those facts, in conjunction with acquainting the public with just what has been the effect of the statement and what is the credibility of the sources of the information back of it as to the increase of acreage, and, as suggested by the Senator from Louisiana [Mr. RANSDELL], where these alleged increases occurred.

Mr. HEFLIN. Mr. President, just a moment.

I am in hearty agreement with the Senator from South Carolina [Mr. SMITH]. I have received a number of telegrams on the same subject; and I had printed in the RECORD just a few days ago a telegram from the commissioner of agriculture of the State of Georgia. He said that the crop in Georgia was overestimated by 58,000 bales. This information was gathered by the agricultural agents of the State of Georgia. The commissioner's telegram concludes:

If the Federal bureau has overestimated the crop in other States as has been done in Georgia, Senator HEFLIN, of Alabama, is very conservative in his statement that the crop for the entire Cotton Belt has been overestimated 500,000 bales.

Mr. President, the storm and flood in South Carolina and in the southern part of Georgia destroyed a great deal of the cotton crop. As I said the other day, the boll weevil has been very destructive in some of the States; and in many other States where some of the cotton was rank and well fruited and promising the continuous rain rotted the bolls; and as far as the alleged increase of the acreage is concerned, I think the Senator from South Carolina is entirely right.

I take it that the Members of Congress from all the States of this Union are interested in seeing that the farmer has a fair deal. The Government's estimates ought to be scrutinized very carefully; and if any injustice has been done to the producer in any section, we ought to be prompt in going to his rescue.

The Senator from South Carolina is right. I think that the chief of this bureau or the Secretary of Agriculture ought to make a statement that in view of the facts that have now been developed he thinks the estimate too large.

A great deal of damage has already been done. The estimate that was made broke the price of cotton more than $5 a bale. That meant a good deal on a crop of between thirteen and a half and fourteen million bales. So I am ready to cooperate with the Senator from South Carolina, and I know the other Senators from the South are, in taking the steps necessary to have absolute justice done the cotton producers of the United States.

ADJOURNMENT

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and (at 12 o'clock and 35 minutes p. m.) the Senate adjourned until to-morrow, Saturday, December 22, 1928, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

FRIDAY, *December 21, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Thou who dost possess the sweetest passions of the human heart and in infinite measure, we praise Thee; Thou whose boundless skill has made the worlds and shapes their destiny, we bless Thee. By every tenderest title of human affection, Thou dost make Thyself known to the heart that loves and aspires. O blessed Lord God, we would chant the psalm of thanksgiving and seek to grow wiser and purer. May our faith not become blind; may the anchor of our hope not break, nor our love become frozen in the chill embrace of a worldly life. By Thy providence overrule our ignorance and mistakes; save us from defeat by Thy knowledge and wisdom. Permit us not to fail our country nor sin against our own souls. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 7324. An act for the relief of Orla W. Robinson.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H. R. 11469. An act to authorize appropriations for construction at the United States Military Academy, West Point, N. Y.; and

H. R. 13665. An act to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States.

The message also announced that the Senate agrees to the amendments of the House of Representatives to the bill (S. 4126) entitled "An act authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights reserved, and limited rights in land, and authorizing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances."

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S. J. Res. 182. Joint resolution for the relief of farmers in the storm and flood stricken areas of southeastern United States.

The message also announced that the Senate insists upon its amendments to the bill (H. R. 15089) an act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes, disagreed to by the House of Representatives, agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SMOOT, Mr. CURTIS, and Mr. HARRIS to be the conferees on the part of the Senate.

FREDERICK D. SWANK

The SPEAKER laid before the House the following order of the Senate, which was read:

Ordered, That the House of Representatives be respectfully requested to return to the Senate the bill (S. 584) entitled "An act for the relief of Frederick D. Swank."

The SPEAKER. Without objection, the request will be granted.

There was no objection.

RULE XIII

Mr. RAMSEYER, from the Committee on Rules, submitted the following report, for printing, which was referred to the House Calendar and ordered printed.

Mr. RAMSEYER, from the Committee on Rules, submitted the following report, to accompany House Resolution 278:

The Committee on Rules reports House Resolution 278 to the House with the recommendation that the resolution be adopted. The resolution provides for the amending of Rule XIII of the House of Representatives.

House Resolution 278

Resolved, That Rule XIII of the Rules of the House of Representatives be amended by inserting a new paragraph following paragraph 2, which shall be known as paragraph 2a, and shall read as follows:

"2a. Whenever a committee reports a bill or a joint resolution repealing or amending any statute or part thereof it shall include in its report or in an accompanying document—

"(1) The text of the statute or part thereof which is proposed to be repealed; and

"(2) A comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices, the omissions and insertions proposed to be made."

A SUMMER WHITE HOUSE IN OREGON

Mr. KORELL. Mr Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the subject of a summer White House, and to incorporate therewith a brief editorial from the Spectator.

The SPEAKER. The gentleman from Oregon asks unanimous consent to extend his remarks in the RECORD upon the subject of a summer White House. Is there objection?

There was no objection.

Mr. KORELL. Mr. Speaker, when the decision to establish the National Capital in the District of Columbia was made, the population of the United States was confined almost entirely to the Atlantic coast. In those days methods of transportation were crude and very slow. New York, Boston, Richmond, Philadelphia, and other points within the original thirteen States were many days and weeks apart. However, as the District of Columbia was near the center of population it was without doubt, but without reference to climatic conditions, a logical selection.

Since the establishment of the National Capital in the District of Columbia the center of population has steadily shifted westward. At the present time it is located somewhere in the Mississippi Valley, probably west of the Mississippi River. But western migration has not stopped there. It has gone far beyond this point. To-day a large and rapidly growing population has spread along the Pacific coast. Many thriving cities and communities have sprung up. Others are coming into existence. The whole territory teems with nascent ideas and potential accomplishment. Without doubt many of the Nation's most important activities will soon be concentrated there.

It appears almost idle for me to add to what I have already said, that the great settlement and development of the Pacific coast has been in a large measure due to improved methods of transportation. In the lifetime of many now living this continent has been spanned with steel rails and ribbons of hard-surface roads. Airways are being laid out and transcontinental air travel is just beginning. All of this means that the distance between the Atlantic and Pacific coasts has been reduced so that with the inauguration of 24-hour air service, which we will have shortly, the relative distances between Washington, D. C., and any one of the major Pacific coast cities will not be as great as the distance between Washington and Philadelphia in the days of Washington, Adams, and Jefferson. In fact, the telephone and telegraph make connection between the Atlantic and Pacific coasts almost instantaneous.

I take this occasion to call this matter to the attention of the House because I have recently observed considerable agitation in some quarters for the establishment of a summer White House "somewhere in the West," and I am anxious that the claims of my native city, which are great from the standpoint of health, beauty, convenience, and accessibility, shall not be overlooked in connection with any deliberations of the members having this proposal in charge.

To supplement my remarks upon this subject I take pleasure in incorporating and placing in the RECORD an editorial written by Hugh Hume, editor of the Spectator, a weekly paper printed and published in Portland, Oreg.:

[Editorial from the Spectator of Saturday, December 15, 1928]

LOCATION FOR SUMMER CAPITAL

There was a time when a proposal to establish the Capital of the Nation on the western side of the Mississippi would have evoked more smiles of derision than of sympathy. Now the proposal to place the National Capital nearer the center of population, where it would be easy of access to a large proportion of our citizens, is discussed in sober earnest by speakers and publicists. All whose opinion of the subject is not affected by the view they get of Washington from their front verandas agree that it was a monumental blunder to build the Capital where it now stands; and everybody knows that while the blunder was, under the circumstances, pardonable when it was made, it is now irreparable. We shall not move the Capital—unless there should happen to be a repetition of the incident of 1812, which the World Court and League of Nations may be expected to make impossible.

But while with the aid of international peacemaking agencies with which we do not choose to associate, the Capital may be considered reasonably safe from foreign attack and pillage, its climate is so variously insalubrious that those only who can not possibly escape from its miasmatic atmosphere have the hardihood to make it a place of permanent residence. In winter Washington's climate is insufferable, and in summer it is deadly.

President Coolidge, than whom there is no public official better versed in the employment of euphony, tells us in one of his infrequent bursts of confidence that while the White House is the place in which all good American citizens should aspire to reside, Washington is quite a bit short from filling the requirements of an ideal summer resort. He has found it so intolerable that he suggests the establishment of a summer capital.

His choice is Bluemont, Va. (about 85 miles from Washington), where the Department of Agriculture established a meteorological observatory that is to be abandoned.

The Spectator takes the liberty of thinking that if this country is to have a winter capital and a summer capital, at least one of them should be located where the fresh, balmy, and healthful all-the-year climate gives zest to labor and makes life so much worth living that officials might be willing to forego part of their salaries merely for the privilege of enjoying it. The Spectator knows the very place where the summer capital should be established. It is in the garden spot of the world. From the windows of the private office of the President, five glittering snow peaks could be seen; in the foreground two glorious rivers meet in a mighty flood that flows majestically to the Pacific Ocean, carrying the commerce of a new empire to all the ports of the seven seas. For the relaxation, recreation, and pleasure of the officials, nature has provided the finest fishing and hunting on the continent; before breakfast, the officials could enjoy swimming, canoeing, or golf; and between tea and dinner, skiing and snowshoeing. Portland is the ideal location for the summer capital—that is, if we are to have two capitals.

Perhaps it would not be either just or judicious to establish the proposed summer capital so close to Washington; our officials should get out and see this great country, and the people of this great country should see them. The strong belief that the capital is too far removed from the center of all except the political activities of the Nation will not be abated by the establishment of a summer capital so near Washington.

SUPREME COURT BUILDING

Mr. ELLIOTT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 13665) to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States, with a Senate amendment thereto, and concur in the Senate amendment.

The SPEAKER. The gentleman from Indiana asks unanimous consent to take from the Speaker's table the bill H. R. 13665, with a Senate amendment thereto, and concur in the Senate amendment. The Clerk will report the title of the bill.

The Clerk reported the title of the bill.

The Clerk read the Senate amendment.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

PRODUCTION OF LIVESTOCK IN CONNECTION WITH IRRIGATED LANDS

Mr. COLTON. Mr. Speaker, by direction of the Committee on Public Lands I ask unanimous consent that the bill (S. 1131) to encourage and promote the production of livestock in connection with irrigated lands in the States of Wyoming, Montana, and New Mexico be rereferred to that committee. The bill was reported out by the committee and the committee desires to give the bill further consideration.

The SPEAKER. The Clerk will report the bill.

The Clerk reported the title of the bill.

Mr. GARNER of Texas. Mr. Speaker, do I understand that this is at the request of the committee itself?

Mr. COLTON. Yes.

Mr. GARNER of Texas. Was there any objection to the suggestion?

Mr. COLTON. None at all. The committee by a unanimous vote requests that this bill be rereferred to it.

The SPEAKER. The gentleman from Utah asks unanimous consent that the bill be rereferred to the Committee on the Public Lands. Is there objection?

There was no objection.

PAY OF CERTAIN EMPLOYEES FOR MONDAY, DECEMBER 24, 1928

Mr. WILLIAMSON. Mr. Speaker, I ask unanimous consent for the present consideration of House Joint Resolution 357, entitling all employees of the United States Government in the District of Columbia to pay for Monday, December 24, the same as any other holiday.

The SPEAKER. The gentleman from South Dakota asks unanimous consent for the present consideration of House Joint Resolution 357, which the Clerk will report.

The Clerk read as follows:

Resolved, etc., That all employees of the United States Government in the District of Columbia and employees of the District of Columbia, who come within the provisions of the Executive order making Monday, December 24, 1928, a holiday, shall be entitled to pay for said holiday the same as on other days.

The SPEAKER. Is there objection?

Mr. FRENCH. Mr. Speaker, I reserve the right to object, and shall make a short statement as to the reasons why I feel compelled to object to this measure going through by unanimous consent. Members of the House should realize that the President's Executive order of December 14 granted a holiday leave at pay to all Government employees excepting those who are on a per diem basis. This resolution would have the effect of granting the leave with pay to the employees who are on a per diem basis of employment. There are some 4,200 employees so affected. If the resolution shall pass, it will mean that those employees will be paid between $20,000 and $30,000 as a sort of bonus for a day in which they will not be expected to work.

Most of those employees are in the navy yard, and I want to direct attention to the way in which the situation differentiates itself from most of the employees in the several departments. The employees in the several departments are on a salary basis, a monthly basis of pay. If the work gets behind, they must bring up the work. That is not true on per diem work. I know departments where employees work overtime. I know one section where one of the employees told me that throughout the year he and others had done so much overtime work that during the year employment ran nearly 5 per cent over the regular work required. In the navy yards the employees in the mechanical lines under per diem pay are paid 50 per cent more for all time over the regular time, so it would seem that the two services are not parallel. This includes most of the employees. True enough, during these days there is little overtime work and rightly so. On the other hand, many employees in the departments frequently work overtime and with no extra pay.

Mr. COLTON. Will the gentleman yield for a question?

Mr. FRENCH. Just one moment. Another reason why I think the resolution should not pass is this: We have something like 35,000 or 40,000 employees doing navy-yard work throughout the United States who are on a per diem basis. I understand the Secretary of the Navy has granted authority to the commandants of the several yards to grant a holiday on Monday without pay. What shall we say about the parallel that will be drawn if this legislation shall pass between the employees of the navy yard at Washington and the employees in the numerous yards throughout the United States? This resolution will affect possibly one-tenth of the employees in the United States in the various navy yards. Then will not these other employees have cause for complaint?

There is another reason why this resolution should not pass. The Federal employees affected by the President's proclamation are on a salary basis that does not necessarily increase if private employers increase the salaries of employees doing comparable work. On the other hand, in the navy yards the adjustment board meets from time to time, fixes the compensation of the employees on a per diem basis that the board believes will correspond to the compensation paid by private employers of labor for similar work in the section of country where the navy yards are located. Private employers of labor, I understand, do not pay employees who are working on a per diem basis for days—even holidays—when they do not work.

Mr. SNELL. They are on a preferred basis which they asked for themselves, as I understand.

Mr. FRENCH. It is a preferred basis and it has been the law for a great many years.

Mr. COLTON. Will the gentleman yield?

Mr. FRENCH. I will.

Mr. COLTON. I understood the gentleman's remarks to apply to navy yards only. What about the Government Printing Office? I am informed there are a good many employees there who are on a per diem basis, and if this resolution does not pass they would be deprived of their pay for that day.

Mr. FRENCH. I understand they are on a basis of extra pay for extra time.

Mr. COLTON. The information brought before the committee is not to that effect as I understand it. I may be mistaken.

Mr. FRENCH. I think the gentleman will find that employees doing mechanical labor are the same as mechanical employees in the navy yard.

Mr. COLTON. However, the gentleman's argument as to other plants in different parts of the United States would not apply to the Government Printing Office.

Mr. FRENCH. No; but most of the employees under the pending resolution are in the navy yard.

Mr. WILLIAMSON. Not only employees in the Government Printing Office, but employees in the Bureau of Engraving and Printing are on a per diem basis.

Mr. FRENCH. Do they receive extra for overtime?

Mr. WILLIAMSON. I am not able to inform the gentleman. This resolution is intended to put the employees in the navy yards on the same basis with respect to pay for holidays created by Executive order as the other employees throughout the District. If the President had granted a two-thirds or a three-fourths holiday they would have received full pay; but by reason of the fact that a day is used as the basic period of time in the calculation as to their pay they must, under existing law, lose a full day's pay.

The sole purpose of introducing this resolution was to place these navy-yard employees on exactly the same basis as the employees in the Government Printing Office and those in the Bureau of Engraving and Printing.

Mr. FRENCH. I think nine-tenths of the navy-yard employees of the Government are employed outside of the District of Columbia.

Mr. WILLIAMSON. That is true; but everybody else employed by the Government in the District of Columbia get their full pay.

Mr. FRENCH. It would make quite a sizable sum of money if we were to grant the same to the employees in all the navy yards in the United States, and I think the employees in the other navy yards are entitled to it just as much as those employed in this one.

Mr. HOWARD of Oklahoma. Mr. Chairman, will the gentleman yield there?

Mr. WILLIAMSON. Yes.

Mr. HOWARD of Oklahoma. Does this include or apply only to those employed in the District of Columbia and not to those employed in the Government navy yards outside?

Mr. WILLIAMSON. It applies only to those employed in the District of Columbia.

Mr. HOWARD of Oklahoma. Then why discriminate and make a comparison between the two classes?

Mr. FRENCH. I must object, and if there is a real sound reason for passing this legislation it can come up after the holidays just as well as now.

The SPEAKER. Objection is heard.

ORDER OF BUSINESS

Mr. GARNER of Texas. Mr. Speaker, will the gentleman from Connecticut tell us about our agreement pertaining to legislation for the balance of the week?

Mr. TILSON. As the gentleman from Texas well knows, the program for the remainder of this week was concluded with the consideration of the appropriation bill for the Departments of State, Justice, Commerce, and Labor. It was expected that this bill would occupy the rest of the week, or at least all of to-day. As a matter of fact, by rushing along pretty rapidly that bill was completed yesterday. Many of the Members of the House, believing that no other bills of large importance would be considered except the appropriation bill, left for their homes. In talking things over with the acting minority leader [Mr. GARNER] it seemed to us fair to agree that no controversial matter requiring the full attendance of Members of the House should be called up in the House during these two days.

Mr. CRAMTON. Mr. Speaker, if the gentleman will yield——

Mr. TILSON. Certainly.

Mr. CRAMTON. I do not understand that the agreement would interfere with action on the conference report on the Interior Department appropriation bill if we should be able speedily to arrive at an agreement on that bill.

Mr. GARNER of Texas. Let me say to the gentleman from Michigan that I agreed last evening that we should go to conference on the bill if agreeable to the ranking Democratic conferee, the gentleman from Colorado [Mr. TAYLOR]. I have heard three gentlemen express regret that the consent was given, on account of the amendment respecting the housing expenses of Doctor White, the superintendent of St. Elizabeths Hospital. I believe that if gentlemen leave the city and go to their homes in consequence of their understanding that no action would be taken on any subject whatever, we should not agree to conference reports that may have material matters agreed to in which they were particularly interested.

Mr. CRAMTON. Mr. Speaker, will the gentleman yield?

Mr. GARNER of Texas. Certainly.

Mr. CRAMTON. The fact that those three gentlemen have been talking to the gentleman from Texas to express their regret would indicate that they have not left the city, and I imagine that no one who has left the city would have regret. Whether we act on the report before the holidays or not, I think it is in the public interest that the conferees should have the opportunity to act during the recess.

Mr. GARNER of Texas. I do not think the gentleman should take a swipe like this.

Mr. CRAMTON. I do not intend to make any kind of a swipe.

Mr. GARNER of Texas. I think it might be deemed a hardship for those who are opposed to the proposals of the committee to stay here until 5 o'clock in order to be assured of protection.

While I am on my feet, I wish to say that if the White amendment in the Senate is, as I understand it, legislation, the conferees would be compelled to bring that conference report back for a separate vote under the rules of the House.

Mr. CRAMTON. The White amendment could not be agreed to in conference unless the Senate would recede in conference. Let me say to the gentleman from Texas that I had no intention of voicing any criticism whatever. On the contrary, I would rather commend their action in that they have not left the city.

CLASSIFICATION OF FEDERAL AND STATE WATER POWER FUNCTIONS

Mr. HULL of Tennessee. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a statement on the water power bill.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD by inserting a statement on the water power bill. Is there objection?

There was no objection.

Mr. HULL of Tennessee. Mr. Speaker, there is urgent need to clarify Federal and State water-power policy so as to make definite the duties, rights, and responsibilities of the Federal Government and the States, respectively. The Federal Government and the States should establish at the earliest opportunity comprehensive laws and agencies within the limits of their respective rights and functions for water-power development. Uniformity of legislation and cooperative action in given instances are important to keep in mind.

The several States of the Union in most instances are each primarily the proprietors of, and have the sovereignty over, the beds, banks, and waters of the navigable streams within their respective borders. Such sovereignty and proprietorship antedates the Federal Constitution, and such properties are held in trust for the people by the States. They are subject, however, to the authority of the Federal Government, granted to it by the Federal Constitution, Article I, section 8, paragraph 3, known as the interstate commerce clause, to regulate, improve, and control navigation. The Federal Government also has certain other rights and authority under Article II, section 3, paragraph 2, of the Constitution, which gives Congress power—

to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States.

This paramount authority given the Federal Government primarily relates to the public lands.

It is safe to say that in all instances the States, where they have not expressly surrendered it, have exclusive title and proprietorship in trust to the flowing waters of navigable streams within their borders for purposes of water power development. This statement naturally would not embrace instances wherein such property interests had never vested in the State in the first place.

It followed that during the early history of our Federal Government, the individual States took the only steps to develop waterways for purposes of navigation. Congress some years later came to their assistance without any serious attempt to exercise the Federal authority to regulate and control navigation. Finally the Federal Government, about 1884, commenced to assert its authority over navigation. The States in the meantime had virtually abandoned and drifted away from the entire problem of navigation improvement and from any serious thought of water-power development.

It was in these circumstances of neglect by the States that Congress by special act in 1884 authorized the first power project on a navigable stream. This power authority was perpetual and subject to no restrictions save the one proviso that Congress could later alter, amend, or repeal the original act. Some 30 special acts of this character passed Congress during the 22 years ending in 1906. Congress in 1906 passed a further and more general act embracing certain restrictions and reserv-

ing to the Federal Government greater authority, including that of requiring the grantee to construct locks and other navigation facilities, if later called upon to do so. The act of 1906 otherwise extended the power granted in perpetuity, except that it might be repealed at any time by act of Congress. During the 10 years that followed, 20 special acts were passed by Congress, subject to these general provisions. The States in the meantime continued dormant and wholly inactive with respect to their functions, duties, and rights. These Federal enactments, however, were not very practical or workable, either from the standpoint of the Government or the grantee. They provided no time limit, no comprehensive plan of utilization, and the grantee was hindered in his financing by the uncertainties of possible future Government demands for the construction of locks for navigation.

The result was that an amendatory act passed Congress in 1910, limiting grants to 50 years and reserving to the Government the right to revoke at any time upon payment of the value of the works constructed. From 1910 to 1912 16 new grants were authorized by Congress, but the entire Federal scheme of water-power development as thus built up one-sidedly during previous years was still seriously unsatisfactory and unworkable. The States continued wholly inactive, with the result that their consent to these experimental efforts at power development through sole permission of the Federal Government was treated as at least implied. The entire movement of water-power development slowed down through lack of even a comprehensive and practical Federal policy.

It was in these circumstances that an earnest and hurried effort was put forth with the object of bringing about an improved and more desirable power policy on the part of the Federal Government. The Federal water power act of 1920 was the outcome. The States having defaulted for generations, and most of them having no laws or agencies for carrying out their functions and preserving their rights, the natural result was that most of the laws, regulations, and practices relating to water power and its development were inserted indiscriminately and in mass in the Federal water power act. No serious attempt was made to classify and set forth the respective rights, functions, and duties of the Federal Government and the States. The assumption seemed to be that since the States were wholly inactive, and since water-power development should not be longer delayed, the Federal Government, willingly in some instances and unwillingly in others, felt justified in assuming at least for the time being the authority to perform all needful functions—both State and Federal—pertaining to the supervision and control of water-power development.

During the years that have followed a few of the States have awakened and endeavored to assert some of their responsibilities and rights. The fact that the Federal power act, as stated, blended and confused State and Federal functions and rights, has greatly complicated the general movement of water-power development. Misunderstanding and controversy relating to the construction of Federal water power law, and especially to the problem of just what constitutes the responsibilities and functions of the States, has tended to slow down and handicap the most important steps and efforts to carry forward our system of power development.

It was in these circumstances that even the Federal Power Commission, which, if biased at all, would be prone to view power policy rather from the Federal standpoint, has more than once directed attention to these and numerous other serious complications, and urged upon the States the importance of assuming their individual responsibilities. In their third annual report they say:

> What is lacking is a sane and settled policy of uniform application. * * * A Federal policy alone is not sufficient. There is need of harmonious action between the Nation and the States and between State and State, not only in matters of water-power development but in the whole field of public-utility relations. The determination of a policy is, however, a responsibility of the States themselves. Common action between the States and the Federal Government is desirable; the Federal Power Commission is too thoroughly convinced of the desirability of maintenance of State sovereignty within its legitimate sphere and of the exercise of individual State responsibility to have any intention of dictating a domestic policy for any State.

In their first annual report the Federal Power Commission frankly states that it is limited to the licensing of such projects as are undertaken in compliance with the laws of the State with respect to beds, banks, to the appropriation, diversion, and use of water for power purposes, and to the right to engage in any business necessary to effect the purpose of the license.

In most respects, apart from its naked authority to control or improve navigation, the power of the Federal Government through its power commission is merely supplementary to similar powers possessed by the States in relation to water-power development. The Federal Power Commission in its first annual report, referring to the failure of the States to function, stated that—

> it reserved the right to take initial action in any matters not covered by State statutes, and also reserved the right to add to State requirements, if such requirements did not substantially meet those imposed by the Federal statute.

The commission further added that "few States appear to have taken any effective measures toward requiring the full economic development of the resources of their streams or toward passing upon the adequacy of the plans proposed for such purposes." The commission then adds that the commission itself will assume responsibility and perform the functions thus neglected by the States. A long list of recitals of duties, responsibilities, and functions properly resting upon the States, but which are being assumed by the Federal Power Commission in the absence of State action, could here be made.

The Federal power authorities cheerfully agree that—

> power development after all is primarily a State problem with respect to which the States should assume the major responsibility.

In their annual report for 1927 this commission says:

> The Federal Power Commission would welcome the passage by the States of laws under which the States would take a far greater part than any of them are now taking in the control and regulation of water-power development and use. The commission has no desire to enter the field of rate or service or securities regulation in any cases where the States can act. It would prefer that the States should assume primary responsibility for inspection of construction and for auditing of accounts. It would welcome the determination by the States of the projects to be developed and the agencies by which it should be done, etc. * * * It finds, however, but few States in a position to do this, and it therefore urges the passage of comprehensive State water power laws based on the policy of full public control over this most important of natural resources.

The proposed bill undertakes to deal with the complicated, confused, and rather demoralized policy of power development by attempting to clarify, classify, and more clearly define the responsibilities, rights, and practices properly pertaining to the States on the one hand and the Federal Government on the other. It is clear that the water-power policy of the Nation thus far has been developed haphazardly, fragmentarily, lopsidedly, and by sporadic acts of Congress and an occasional court decision endeavoring to carry out the policy of such acts. This is especially true of the period prior to 1920. And it was but natural that the Federal power act would be made the vehicle on which was thrown indiscriminately most of the combined duties and responsibilities of both the Federal Government and the States, without any attempt to separate and define each, or to indicate proper instances of joint or cooperative action by both.

The proposed bill, in a spirit of fairness both to the Federal Government and the State, and in the light of the Constitution, the laws, and judicial decisions, attempts to classify many of these functions and duties at present in a state of confusion and threatened controversy. The first section specifies the items of property contributed to a dam and power project respectively by the Federal Government and a State. The question of its control, operation, and division of interest in it is left open.

Section 2, following the court decisions to the effect that the rights of riparian owners in the waters of a navigable stream are subject to the laws of the State, provides that the beneficial use of such waters by a riparian owner do not include their use for water-power purposes without the affirmative authority of the State. Waters on the public lands are excluded from this section.

The United States unquestionably has jurisdiction over a proposed dam or other structure in nonnavigable streams, but only to the extent of determining whether the structure would substantially diminish the navigability of portions of the stream that is navigable in its natural state. This view is declared in section 3.

Since the courts allow Congress to be the sole judge of whether the erection of a dam by the Federal Government is primarily for navigation purposes, section 4 provides that the Chief of Engineers shall first report the full facts pro and con without any opinion to Congress in order that Congress may be fully advised as to whether a proposed dam project is primarily for navigation purposes or for power purposes, which latter would be without the jurisdiction of Congress.

Section 5 declared the paramount right of the States to recapture water-power projects licensed under the Federal power act. This is in accordance with sound legal opinion.

Section 6 classifies and declares the acknowledged functions and rights of the State with respect to taxation, regulation, control of distribution, and so forth, which are blended and confused at present with certain less paramount Federal regulations and functions.

Section 7 clarifies the Federal power act by providing that no power project shall be undertaken under the terms of that act until the State first gives its permission. This restores the acknowledged rights and functions of the State, which in a number of instances have been ignored.

Section 8 redeclares the authority of the States to locate and construct power projects without Federal interference except in the valid exercise of its authority over navigation, and it is further provided that in case the Federal Government from this viewpoint does not give its consent for the structure within 12 months the same shall be considered as granted.

Section 9 recites and classifies many State functions and duties pertaining to regulation, supervision, inspection, and so forth, which have been hopelessly blended and obscured in the provisions of the Federal power act, and many of them improperly exercised by the Federal Government.

Section 10 would permit States by joint agreement to regulate power transmitted in interstate commerce, but upon their failure or inability to do so, certified to the United States Interstate Commerce Commission, the latter is given jurisdiction.

The purpose of the bill, in brief, is by clarifying and classifying the laws, regulations, and practices properly applicable to water-power development, under the joint and separate jurisdiction of the States and the United States, to aid in the speedy development of water power in this country with a minimum of waste and paramountly in the interest of the general public.

I append hereto copy of H. R. 15575:

A bill (H. R. 15575) to amend the Federal water power act and to more clearly define and declare Federal and State water-power policy

Be it enacted, etc., That the States, by virtue of their ownership and control of the banks, beds, soils, the flowing waters, and their uses, of rivers within their borders, as and to the extent defined by their constitutions, statutes, and judicial decisions, have in trust definite proprietary rights to, and corresponding control over, all hydroelectric power projects, plants, or developments constructed by the United States or any creature or agency of the United States, whether primarily for navigation or national-defense purposes. The share of ownership of a State in a hydroelectric power project so constructed is the proportion which the value of the properties of the State bears to the total value of the project, which total value shall be computed by adding to the fair value of the properties of the State (excluding that portion of the value of the bed of navigable streams properly applicable to navigation or national defense, also the value of the use of the waters for navigation purposes) the cost of construction and equipment of the project constructed by the United States, or by any agency created by it, including the expenses of preliminary surveys or examinations, less that portion of the total costs that is properly applicable to navigation or national-defense purposes as distinguished from power purposes. In case the State and the United States or its creature or agency constructing such project can not agree upon the fair value of the said proportion of the State or the amount of the cost properly applicable to navigation or national-defense purposes, original jurisdiction is hereby conferred upon the United States district court in closest proximity, and appellate jurisdiction upon the United States Circuit Court of Appeals, for the purpose of determining such amount: *Provided,* That this provision shall not be construed to affect the power of the United States to control or use such waters for purposes of navigation: *Provided further,* That when any storage dam is constructed within the meaning of this section, for whatever purpose, which would permit the release of water for the benefit of power projects or developments below, the title to the waters so released is in the State aforesaid, subject, however, to the right of the United States to impose a license to defray the cost of administering the Federal power act, and also to retain control over pool levels and the discharge of water for purposes of navigation and flood control; but such storage waters shall be released at such times and in such manner as will best facilitate navigation and the development of hydroelectric power on the river or rivers below: *And provided further,* That under any of the provisions of this section, when a dam and power or storage water structure or project has been constructed by the United States or its agency or creature, the United States or such other agency, by agreement with the State as to terms, methods, and agencies of operation, shall have the right to amortize all construction costs aforesaid from the net proceeds derived from power operation, including the sale of primary power to plants on the river or rivers below, to the extent that such costs of construction are properly applicable to water-power purposes or to storage waters to be released for the benefit of power projects below, including interest charges on such net amount at the rate of 4 per cent per annum; and after such costs have been thus fully amortized the exclusive sovereign and proprietary rights and ownership of the State in such power project and storage waters shall be recognized, subject alone to the exercise of navigation or flood-control authority by the United States.

SEC. 2. Rights to the use of the waters of navigable streams for power purposes by any person, association, or legal entity, including owners of lands adjacent to the stream, shall be subject to, and determined by, the constitutions, statutes, and decisions of the States: *Provided,* That the beneficial use of such waters by a riparian owner does not include their use for water-power purposes, except by affirmative authority of the State: *Provided further,* That the provisions of this section shall not apply to waters on the public lands.

SEC. 3. That the jurisdiction of the United States over nonnavigable streams or rivers is limited to the right to approve or veto any proposed dam or other structure according to whether the same, if constructed, would or would not substantially diminish the navigability of the portions of a stream or streams which are navigable in their natural state.

SEC. 4. The United States has the right to place any dam or like structure on the bed of a navigable stream for the primary and essential purposes of navigation or national defense, and to the use of its waters for these purposes, without compensation: *Provided,* That the Chief of the Department of United States Engineers shall first investigate and make unbiased report of all the facts that would shed light on the question of whether the proposed structure would be primarily and essentially for purposes of navigation or for power purposes.

SEC. 5. That the authority of the States alone to recapture, or to take over, maintain, and operate or lease any water-power project or projects, licensed in whole or in part under the Federal water power act, is fully recognized.

SEC. 6. When any dam and water-power project has been developed by private enterprise and operated under permit, grant, or license issued jointly by the State and the United States, or by authority of the United States alone, the exclusive right of the State wherein the project is located to exact revenue for the use of the waters or from the power and other physical properties, to control distribution, use, and sale of power, and to expropriate any excess profits earned by the licensee under the terms of the license, is expressly recognized: *Provided,* That when such structure or development has been constructed by a person or corporation which is a creature or agency of the United States, the State can not impose a tax upon its franchise nor upon its operation, but only upon its physical properties and their uses.

SEC. 7. The United States shall not approve a permit or license, either preliminary or permanent, for the construction and operation of a water-power project until the duly authorized agency of the State in which the proposed project is located has first given its approval and permission: *Provided,* That in the event such State has no law or authorized agency to enable it to act on such application, the United States shall give to the governor of the State notice of the application for license, and in the event of the continued failure or inability of the State through lack of laws or agencies to act, the United States shall take no further action.

SEC. 8. That the authority of the States to locate and construct dam and water-power projects situate wholly within their boundaries and to operate the same, or to control their operation, for power purposes, shall not be interfered with by the United States except in the valid exercise of its authority to improve and control navigation, and the granting or the refusal to grant a permit by the United States for the construction and operation of a power project by a State, municipality, or private agency shall be based alone upon a valid exercise of its authority to regulate or improve navigation: *Provided,* That in the event the United States has not given its consent or disapproval within 12 months after full plans and specifications have been laid before its proper officials and after the grant of a permit or license by the State, its consent to the construction of such dam and power project shall be considered as granted.

SEC. 9. The reserved rights, powers, and functions of the States with respect to granting permits and licenses to private enterprise for the construction and operation of water-power projects, and their location, and their paramount authority with respect to transfers of licenses, the selection of licensees, inspection of construction, supervision of accounting methods, securities, reserves, protection of public health, and adequate maintenance of structure, shall in no wise be abridged by the Federal water power act.

SEC. 10. The public utilities commission, board, official, or other agency, duly authorized by the State, shall have jurisdiction within that State, or in cooperation with like commissions, boards, or agencies of other States, by agreements entered into, to supervise and regulate public-service corporations, persons, associations, or corporations owning or operating any water-power project, and developing, transmitting, or distributing power for sale or use in public service, to the extent that said power or any part thereof shall enter into commerce between such States: *Provided,* That when the duly authorized official or agency of each State thus vested with the authority of joint regulation, shall certify to the United States Interstate Commerce Commission the failure or inability of such States thus to exercise such regulation and control, the jurisdiction of such State agencies shall cease and jurisdiction is hereby conferred upon the

United States Interstate Commerce Commission, in such cases and in all respects to supervise and regulate persons, companies, and corporations transmitting or distributing power for sale or use in public service to the extent that the same or any part thereof enters into interstate or foreign commerce. The rates charged and the service rendered by any such person, corporation, or association, or by any subsidiary of the same, or by any person, corporation, or association purchasing power from either for sale and distribution or use in public service, shall be reasonable, nondiscriminatory, and just to the customer, and all unreasonable, discriminatory, and unjust rates or services are hereby prohibited and declared to be unlawful.

The administration of the provisions of this section by the Interstate Commerce Commission, so far as applicable, shall be according to the procedure and practice in fixing and regulating rates, charges, and practices of railroad companies as provided in the act to regulate commerce, approved February 4, 1887, as amended, and that the parties subject to such regulations shall have the same rights of hearing, defense, and review as said companies in such cases.

In any valuation of the property of any corporation, person, or association operating such water-power project, or distributing power, for purposes of rate making, no value shall be claimed by such producer or distributor or allowed by the commission for any water-power project or projects in excess of the value or values prescribed in section 4 of the Federal water power act, but there shall be included the cost of the construction, and no value shall be claimed or allowed for the rights granted under the terms and provisions of the Federal water power act. Complete and exclusive jurisdiction is hereby conferred upon the United States Interstate Commerce Commission for the purposes, duties, and functions aforesaid, and the Federal water power act is amended and modified according to the provisions of this entire section.

SEC. 11. This act only refers to and embraces power projects or developments wholly within the States, excluding waters on the public lands.

SEC. 12. That all acts and parts of acts, including the Federal water power act, that are in conflict with this act, in whole or in part, be, and to that extent are hereby, repealed.

ORDER OF BUSINESS

Mr. MOORE of Virginia. Mr. Speaker, may I ask the attention of the gentleman from Connecticut, to inquire if he can tell us what the program will be when the House reconvenes after the holidays—what subject will be taken up during the early part of the January session?

Mr. TILSON. It is my purpose to offer as the program for the first three days of the session after the holiday recess one or the other, or possibly both, of two appropriation bills. These appropriation bills are the first deficiency bill and the War Department appropriation bill. If the first deficiency bill is ready when we reassemble on January 3, then it will have the right of way. If it is not ready, then the War Department appropriation bill, which, I understand, is practically ready now, will go ahead.

Mr. SNELL. Mr. Speaker, will the gentleman yield there?

Mr. TILSON. Certainly.

Mr. SNELL. There are three or four small matters pending before the Committee on Rules which I would like to bring forward after Congress convenes after the holidays. We hope to take up the New York judgeship bill during the second week after the holidays.

Mr. TILSON. I see no reason why these rules to which the gentleman refers may not be brought up at almost any time.

Mr. SNELL. I do not think there is objection to any one of them.

Mr. TILSON. I was speaking, however, of the larger matters that would probably occupy the time of the House during the first three days after the holidays.

Mr. CRAMTON. Mr. Speaker, I want to act entirely in harmony with any agreements made and in harmony with the desires of the House. At the same time I have some responsibility in protecting the interests of the Government in matters with which I happen to be in touch. It is desirable, if it is possible, that the Interior Department appropriation bill become a law as early as possible, because of some obligations which have matured and should be paid. So far as I know, the only matter of controversy that might be involved on any return of the conference report to the House would be the matter that the gentleman from Texas has referred to; and that, when it comes back, if it comes back at all, has to come back for a separate vote, and the objection of one individual would stop action to-morrow. I do not know at all what the action of the conferees will be; but I would like to submit this unanimous-consent request, that I may have until 12 o'clock to-night to file the conference report for printing, if it is agreed upon; and I am by no means sure it will be agreed upon. With that would go the understanding that its consideration to-morrow would not be proceeded with if any gentleman objected to the action of the conferees on the St. Elizabeths matter.

Mr. GARNER of Texas. On its face that looks like a very fair statement; but there may be gentlemen who have gone home, and are not here because they have acted under the agreement that was circulated on this side, and if they were here they might object. Now, it seems to me that a matter of as great importance as the reporting of a partial agreement——

Mr. CRAMTON. I will say to the gentleman that there will be no partial conference report filed. I do not desire to file the report unless it is a complete agreement, in so far as the rules permit an agreement. I will say to the gentleman that I think I am pretty familiar with the items involved. I know of no controversy in the House as to any item, unless it might be one or two subject to a point of order, and I think there the only serious objection might be to the item relating to St. Elizabeths, and one objection would result in holding up the matter. Mr. Speaker, I submit that request.

The SPEAKER. The gentleman from Michigan asks unanimous consent that he may have until 12 o'clock to-night to file a conference report on the Interior Department appropriation bill for printing under the rule. Is there objection?

There was no objection.

EXTENSION OF REMARKS

Mrs. KAHN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting an article from the Western Journal of Education on the pioneer teacher in the Philippines.

The SPEAKER. The gentlewoman from California asks unanimous consent to insert the article described. Is there objection?

Mr. UNDERHILL. Mr. Speaker, as my sword knows no brother, neither can it recognize a sister, so I must object.

ORDER OF BUSINESS

Mr. McDUFFIE. Mr. Speaker, I would like to have the attention of the majority leader. A great many iniquiries have come to members of the Committee on Rivers and Harbors endeavoring to ascertain whether or not during this session of the Congress we would pass the river and harbor bill now pending on the calendar, and for the benefit of the Members on this side who are members of the committee, I would like to know if the policy of the leadership of the majority will be to pass such a bill or will they let it die without any action during the present session?

Mr. TILSON. In response to the gentleman from Alabama I have to say that if such a bill is ready and it is pressed by the Committee on Rivers and Harbors the House leadership and the House would undoubtedly give great weight to their wishes in the matter, especially in view of its great importance.

Mr. McDUFFIE. It is ready, sir, and it has been on the calendar since May. It is quite an important bill. I am of the opinion we are going to suffer a great disadvantage throughout the country if it is not passed. It contains many important projects, including many projects on the Great Lakes. It is not a large bill from the standpoint of the amount proposed to be authorized. I have seen many larger bills, but it is a very important bill. Many projects need modification and if we do not pass it at this session it goes over until possibly an extra session, and maybe with no action then, and it will be more than 12 months before we can consider the subject at all. For this reason I was anxious to ascertain the attitude of the leadership as to whether or not we would pass the bill.

Mr. CHALMERS. Will the gentleman yield to me on that subject for a moment?

Mr. TILSON. Yes.

Mr. CHALMERS. I had a telegram, Mr. Speaker, this morning from the secretary of the Chamber of Commerce of Toledo, urging the passage of this rivers and harbors bill at this session. As my colleague on the committee has said, there are a good many very important projects in the bill. The secretary of the chamber, of course, being particularly interested in the port of Toledo and the commerce on the Great Lakes, refers to the deeper channels bill for the Great Lakes and its annual earning power. This project which I introduced in a special bill January 28, 1926, has an annual earning capacity of between $20,000,000 and $25,000,000. It seems to me it is poor business policy to put that off for another year.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 13665. An act to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 33 minutes p. m.) the House adjourned until to-morrow, Saturday, December 22, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Saturday, December 22, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

First deficiency appropriation bill.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

707. A letter from the executive officer of the National Capital Park and Planning Commission, transmitting annual report of the commission for the fiscal year ended June 30, 1928; to the Committee on Public Buildings and Grounds.

708. A communication from the President of the United States, transmitting supplemental estimate of appropriation amounting to $12,500 for the Department of Agriculture, fiscal year 1929, for an additional amount for the maintenance of insular experiment stations to enable the Secretary of Agriculture to repair or restore property damaged or destroyed at the Porto Rico and Virgin Islands stations by the hurricane of September 13, 1928; to the Committee on Appropriations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. RAMSEYER: Committee on Rules. H. Res. 278. A resolution amending Rule XIII of the House of Representatives; without amendment (Rept. No. 1970). Referred to the House Calendar.

Mr. WILLIAMSON: Committee on Indian Affairs. S. J. Res. 139. A joint resolution for the relief of the Iowa Tribe of Indians; without amendment (Rept. No. 1971). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRITTEN: A bill (H. R. 15652) to provide for the elimination from the active list of the Navy of certain officers of the Staff Corps who have not been selected for promotion; to the Committee on Naval Affairs.

By Mr. HULL of Tennessee: A bill (H. R. 15653) to repeal the duty on Christmas trees; to the Committee on Ways and Means.

By Mr. MANLOVE: A bill (H. R. 15654) to increase the membership of the Tariff Commission, to provide for nonpartisan regional representation thereon, and to make more flexible the operations under section 315 of the tariff act of 1922; to the Committee on Ways and Means.

By Mr. MONTAGUE: A bill (H. R. 15655) to provide for the study, investigation, and survey, for commemorative purposes, of battle fields in the vicinity of Richmond, Va.; to the Committee on Military Affairs.

By Mr. TARVER: A bill (H. R. 15656) to provide for the erection of monuments at Dalton, Resaca, Cassville, and New Hope Church, in the State of Georgia, in commemoration of these historic points and battle fields of the Sherman-Johnston campaign in 1864, and to provide for the erection of markers at other points of historic interest along the Sherman-Johnston line of march; to the Committee on Military Affairs.

By Mr. THATCHER: A bill (H. R. 15657) to provide for the improvement and preservation of the land and the buildings of the Abraham Lincoln National Park or Reservation; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 15658) granting a pension to Mabel Clare Hickman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15659) granting an increase of pension to William T. McCrindle; to the Committee on Pensions.

By Mr. BOWMAN: A bill (H. R. 15660) granting a pension to Wesley Borror; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15661) granting an increase of pension to Mary E. McLane; to the Committee on Invalid Pensions.

By Mr. CARTER: A bill (H. R. 15662) granting a pension to Herman Lucken; to the Committee on Pensions.

Also, a bill (H. R. 15663) granting an increase of pension to May E. Clark; to the Committee on Invalid Pensions.

By Mr. FENN: A bill (H. R. 15664) granting a pension to Maurice Masur, alias Charles Mason; to the Committee on Pensions.

By Mr. FLETCHER: A bill (H. R. 15665) granting a pension to Mary Sacks; to the Committee on Invalid Pensions.

By Mr. GAMBRILL: A bill (H. R. 15666) for the relief of Judson Stewart; to the Committee on Naval Affairs.

By Mr. JOHNSON of Illinois: A bill (H. R. 15667) granting an increase of pension to Nellie W. McAndrews; to the Committee on Pensions.

By Mr. JOHNSON of Indiana: A bill (H. R. 15668) granting an increase of pension to Florinda Harris; to the Committee on Invalid Pensions.

By Mr. JOHNSON of Oklahoma: A bill (H. R. 15669) for the relief of Gertrude Lustig; to the Committee on Claims.

By Mr. KERR: A bill (H. R. 15670) granting a pension to Leah B. Robbins; to the Committee on Invalid Pensions.

By Mr. McSWAIN: A bill (H. R. 15671) for the relief of D. B. Traxler; to the Committee on War Claims.

By Mr. PERKINS: A bill (H. R. 15672) granting compensation to Thomas Peraglia; to the Committee on Claims.

By Mr. REECE: A bill (H. R. 15673) granting a pension to Jane Wolverton; to the Committee on Invalid Pensions.

By Mr. SHALLENBERGER: A bill (H. R. 15674) granting a pension to Alice J. Bridwell; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

8084. By Mr. CARTER: Petition of Barret Camp, No. 29, United Spanish War Veterans, of Alameda, Calif., urging the passage of House bill 6523 and Senate bill 1986, increasing the allowances of the retired men of the Army, Navy, and Marine Corps; to the Committee on Military Affairs.

8085. By Mr. JOHNSON of Texas: Petition of Guy M. Gibson, secretary-treasurer of Texas Reclamation and Drainage Association, of Corsicana, Tex., and Eugene Brown, president of the Illinois Valley Protective Association, of Peoria, Ill., indorsing Senate bill 4689; to the Committee on Irrigation and Reclamation.

8086. By Mr. MICHENER: Petition of E. C. Boylan and others, of Washtenaw County, Mich., protesting against the enactment of House bill 78, known as the compulsory Sunday observance bill; to the Committee on the District of Columbia.

8087. By Mr. STRONG of Pennsylvania: Petition of citizens of Jefferson County, Pa., in favor of the Lankford Sunday rest bill for the District of Columbia; to the Committee on the District of Columbia.

SENATE

SATURDAY, *December 22, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Eternal Father, who makest us glad with the yearly remembrance of the birth of Thine only Son, Jesus Christ, at whose first coming Heaven disclosed its dazzling minstrelsies to the soft silence of the listening night: Thou hast clothed Him with the robe of our humanity, and from the heart throb of an infant's life the thrill of human destiny has pulsed throughout the world. Thou hast consecrated motherhood as the tender channel of Thy grace and touched with mystic insight the hearts of simple folk.

Grant to us, therefore, so to prepare for this holy Christmastide that at the coming of the Christ to the inn of our hearts He may find His servants ready, waiting for no new master but for one long known and loved.

O holy Child of Bethlehem!
Descend to us, we pray;
Cast out our sin, and enter in,
Be born in us to-day.
We hear the Christmas angels
The great glad tidings tell;
Oh, come to us, abide with us,
Our Lord Emmanuel!

Amen.

The Chief Clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had approved and signed the following acts:

On December 12, 1928:

S. 3171. An act providing for a Presidents' plaza and memorial in the city of Nashville, State of Tennessee, to Andrew Jackson, James K. Polk, and Andrew Johnson, former Presidents of the United States; and

S. 3325. An act for the relief of Horace G. Knowles.

On December 20, 1928:

S. 3844. An act amending the fraternal beneficial association law for the District of Columbia as to payment of death benefits; and

S. 4127. An act to provide for the appointment of an additional justice of the Supreme Court of the District of Columbia, and for other purposes.

THEODORE F. SHUEY

The VICE PRESIDENT. Members of the Senate will be pleased to be reminded of the fact that 60 years ago to-day our friend, Mr. Shuey, joined the reporting staff of the Senate.

MR. JUSTICE HOLMES AND HIS FATHER, OLIVER WENDELL HOLMES

Mr. HEFLIN. Mr. President, the Vice President has just called attention to the fact that this is the anniversary of the sixtieth year that Mr. Theodore F. Shuey, the active and efficient dean of the official reporters of debates, has served this body. This refutes the doctrine of Osler, who said that a man ought to be chloroformed when he was 50 years of age.

Mr. President, one of the most capable and active men in the public service at the Capitol to-day is Mr. Shuey, who has served this body faithfully and continuously for 60 years. He is deservedly popular with all the Senators and with all who come in contact with him. I congratulate him, and I believe I voice the sentiments of all Senators when I say we wish for him and his a merry Christmas and a happy New Year and many more years of health and happiness in his country's service.

In this connection I want to say that one of the most popular, useful, active, and efficient Members of the Senate has in the vigor and activity of his mind and body refuted the Osler theory. I refer to the senior Senator from Wyoming [Mr. WARREN] who has served here longer than any other member of this body.

A member of the Supreme Court of the United States, who is now the oldest man in years who has ever served as a Justice of the Supreme Court of the United States is Oliver Wendell Holmes. I send to the clerk's desk a poetic tribute to this able and distinguished jurist and to his great father. Mr. Justice Holmes was a Union soldier and the author of this poetic tribute is a southerner, Horace C. Carlisle, and the son of a Confederate soldier. I ask that the clerk may read first the poem entitled "The Jurist's Father," and then the one entitled "The Poet's Son."

Before that is done, Mr. President, I want to repeat from memory a portion of the poet Holmes's beautiful poem to "The Boys":

You hear that boy laughing?—You think he's all fun;
But the angels laugh, too, at the good he has done;
The children laugh loud as they troop to his call,
And the poor man that knows him laughs loudest of all!
Then here's to our boyhood, its gold and its gray!
The stars of its winter, the dews of its May!
And when we have done with our life-lasting toys,
Dear Father, take care of Thy children, the boys.

I ask that the clerk may now read the two poems which I have sent to the desk.

The VICE PRESIDENT. The clerk will read as requested.

The Chief Clerk read as follows:

THE JURIST'S FATHER

O–nly the great have grown greater in death,
L–eaving their dust to return to its dust.
I–n the new state—independent of breath—
V–irtue and honor are treasures of trust.
E–very great poet, through self-sacrifice,
R–eaches his climax long after he dies.

W–hile Holmes to many has long been endeared,
E–verywhere, all along life's winding way,
N–ever has he been so fondly revered,
D–own through the years, for his works, as to-day.
E–very great poem that Holmes ever penned—
L–ovingly cherished by many a friend—
L–ives, and will live, on down to the end.

H–olmes in the homes makes diviner the homes—
O–ften a volume of Holmes may be found
L–ongside the Bible, that whoever comes
M–ay find the twain there, the happy year round.
E–very great poem from Holmes's peaceful pen
S–erves as a real inspiration to men.

THE POET'S SON

O–liver Wendell Holmes, poet and sage,
L–eaves a rare picture on history's page,
I–n which the excellence in him that shone,
V–ested anew, lives again in his son—
E–very high mark in his character is
R–eached yet again in this namesake of his.

W–orld-renowned jurist and scholar, his fame
E–verywhere honors his father's great name.
N–owhere in history father and son
D–itto each other as these twain have done—
E–ach one pursuing his own mental bend—
L–ovingly cherished by many a friend—
L–ogical, loyal, and true to the end.

H–olmes, when the courts fall for graft's ridicule,
O–ffers relief through the Christ's Golden Rule,
L–ove's simple statute of practical law,
M–ade without error or technical flaw.
E–very great statute from this statute comes,
S–ays the immortal, upright Justice Holmes.

INTERIOR DEPARTMENT APPROPRIATIONS

Mr. SMOOT. Mr. President, I ask that the Senator from Kansas [Mr. CURTIS], on account of other duties, be relieved from serving as a conferee on the Interior Department appropriation bill, and that the Senator from New Hampshire [Mr. KEYES] be appointed in his place.

The VICE PRESIDENT. Without objection, it is so ordered.

PRESIDENTS' PLAZA IN THE CITY OF NASHVILLE, TENN.

The VICE PRESIDENT. Pursuant to Senate bill 3171, providing for a Presidents' plaza and memorial in the city of Nashville, State of Tennessee, to Andrew Jackson, James K. Polk, and Andrew Johnson, former Presidents of the United States, the Chair appoints as Senate members on the commission Senators TYSON, FESS, and MCKELLAR.

FINAL ASCERTAINMENT OF ELECTORS

The VICE PRESIDENT laid before the Senate communications from the Secretary of State transmitting, pursuant to law, the final ascertainment of electors for President and Vice President in the States of Georgia, Washington, South Dakota, Michigan, West Virginia, Virginia, Wisconsin, Wyoming, Utah, New Jersey, Montana, Idaho, Kentucky, and Massachusetts at the election held November 6, 1928; which were ordered to lie on the table.

REPORT OF NATIONAL CAPITAL PARK AND PLANNING COMMISSION

The VICE PRESIDENT laid before the Senate a communication from the executive and disbursing officer of the National Capital Park and Planning Commission transmitting, pursuant to law, the annual report of the commission for the fiscal year ending June 30, 1928, which was referred to the Committee on the District of Columbia.

REPORT OF PERRY'S VICTORY MEMORIAL COMMISSION

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on the Library:

To the Congress of the United States:

I transmit herewith for the information of the Congress the Ninth Annual Report of the Perry's Victory Memorial Commission for the year ended December 1, 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 22, 1928.*

ON BILLS NOT SIGNED BY THE PRESIDENT

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and ordered to lie on the table:

To the Congress of the United States:

I am transmitting herewith for the information of the Congress a memorandum prepared in the office of the Attorney General regarding bills presented to the President less than 10 days before the adjournment of Congress and not signed by him.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 22, 1928.*

[NOTE.—Memorandum accompanied similar message to the House of Representatives.]

Mr. WALSH of Montana subsequently said: Mr. President, I am advised that the message from the President of the United States laid down by the Vice President a few moments ago was accompanied by an opinion from the Attorney General.

The VICE PRESIDENT. The Chair will say to the Senator that the opinion referred to went to the House of Representatives.

Mr. WALSH of Montana. That is a very important matter, and I think it should be read and referred to the Committee on the Judiciary. I ask that it may be read.

The VICE PRESIDENT. The message contained a note stating that the document referred to was sent to the House of Representatives accompanying a similar message to that body. So that the memorandum is not in the possession of the Senate at the present time.

COOPERATIVE ECONOMICS

Mr. BROOKHART. Mr. President, on day before yesterday I gave notice that I would speak on yesterday on the subject of cooperation, the 21st of December being the natal day of the Rochdale Cooperative Society. However, our distinguished leader, the Vice President elect, evidently not being aware of my intention, moved an adjournment before I had an opportunity to speak. So I give notice that at the conclusion of morning business I will deliver that delayed speech.

PETITIONS

Mr. FESS presented numerous petitions of various civic and religious organizations and sundry citizens (signed by over 15,000 citizens of the State of Ohio) in the State of Ohio and other States, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. FESS. Accompanying the petitions is a letter from the secretary of the commission on international justice and good will, which I ask to have printed in the RECORD.

The VICE PRESIDENT. Without objection, the letter will be printed.

The letter is as follows:

FEDERAL COUNCIL OF THE
CHURCHES OF CHRIST IN AMERICA,
Washington, D. C., December 11, 1928.

HON. SIMEON D. FESS,
Senator from the State of Ohio.

SIR: I have the honor to convey to you memorials in support of the general pact of Paris.

This memorial was issued by the commission on international justice and good will of the Federal Council of the Churches of Christ in America and was first circulated last spring. Slightly changed, it was circulated again during the past autumn. There are, we believe, no duplications. Certain individuals in signing made a few changes, but all heartily support the appeal for prompt ratification of the pact.

The total number of signatures is 180,182, from all the States. I am conveying to the senior Senator the memorials signed by citizens of your State, and inclose also a list of the signatures classified by States.

Respectfully yours,

SIDNEY L. GULICK,
Secretary Commission on International Justice and Good Will.

Mr. BURTON presented petitions of members of the Center Friends Church, of West Milton, and sundry citizens of Zanesville, South Zanesville, and White Cottage, all in the State of Ohio, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. JONES presented petitions of sundry citizens of Spokane, Olympia, Chehalis, Kelso, and White Salmon, all in the State of Washington, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. OVERMAN presented petitions of members of the American History Class of the Hendersonville High School and sundry citizens of Greensboro, in the State of North Carolina, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. LA FOLLETTE presented numerous petitions of various civic and religious organizations and sundry citizens, all in the State of Wisconsin, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. WALSH of Montana presented numerous petitions of sundry citizens of Glasgow, Glendive, Huntley, Worden, Polson, Shelby, Fromberg, Joliet, Edgar, Fairview, Sidney, and Sioux Pass, all in the State of Montana, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. McMASTER. Mr. President, I present petitions to the Senate which have been transmitted to me by the heads of various organizations in South Dakota, praying for the prompt ratification of the Kellogg peace pact, which I ask may lie on the table and the names and organizations be printed in the RECORD.

Petitions presented by Mr. McMASTER from the following citizens and organizations in the State of South Dakota, praying for the ratification of the so-called Kellogg multilateral treaty for the renunciation of war, were ordered to lie on the table, as follows: Mrs. J. E. Marshall, president, Mrs. Rhoda Marshall, vice president, Laura Will, treasurer, Mrs. Mattie Kieser, recording secretary, and Mrs. Ada Clark, corresponding secretary, Wessington Springs (S. Dak.) Pioneer Woman's Christian Temperance Union; Mrs. Nellie Frank, chairman peace and arbitration treaty department, Woman's Christian Temperance Union, Huron, S. Dak.; Mrs. Lydia F. Lowthian, president, and Mrs. Alma Archer, secretary, Milbank (S. Dak.) Woman's Christian Temperance Union; Mrs. Alma H. Thurston, president, and Mrs. Ed. Newcomb, secretary, Woonsocket (S. Dak.) Women's Foreign Missionary Society; Mrs. C. R. Miller, president, and Mrs. B. Fillingsner, secretary, Beresford (S. Dak.) Women's Foreign Missionary Society; Mrs. E. E. Hatfield, president, and Mrs. J. B. Jacobson, secretary, Scotland (S. Dak.) Women's Foreign Missionary Society; Mrs. Ella Ketchum, president, and Mrs. Nellie Warner, secretary, Vermilion (S. Dak.) Women's Foreign Missionary Society; Mrs. F. L. Mease, president, and Mrs. C. E. Sherwood, secretary, Madison (S. Dak.) Women's Foreign Missionary Society; W. S. Morehead, R. A. Marshall, H. W. Clark, Mrs. H. W. Clark, William Hammond, H. S. Welch, John Lubber, J. E. Hougland, J. H. Winegar, Oscar Schubert, R. M. Dill, Nick Anton, sr., C. McDonald, J. E. Marshall, N. C. Snart, J. W. Snart, and Grace Morehead, Wessington Springs, S. Dak.; J. H. McGregor, Alpena, S. Dak.; Mabelle A. Bridgman, chairman of legislative committee, Alfalfa Grange, No. 157, Viewfield, S. Dak.; Mary Green, department president Women's Relief Corps, Flandreau, S. Dak.; R. R. Bowker, 62 West Forty-fifth Street,

New York, N. Y.; Rev. H. W. Jamison, Newell, S. Dak.; Bert L. Hall, Pierre, S. Dak.; Ira S. Burnett and Mrs. Elizabeth C. Burnett, Armour, S. Dak.; Prof. Daniel J. Gage, Huron, S. Dak.; W. R. Ronald, Mitchell, S. Dak.; Katharine Potter, secretary University of South Dakota, Vermilion, S. Dak.; Don C. Westerfield, chairman Dayton World Court Committee, Dayton, Ohio; Mrs. J. L. Norris, president, and Mrs. O. H. Miller, secretary, Groton (S. Dak.) Women's Foreign Missionary Society; Della M. Haft, president Rapid City Branch, A. A. U. W., Rapid City, S. Dak.; Rev. Clarence Carr, Clark, S. Dak.; Mrs. Skaro, secretary Sioux Falls (S. Dak.) Woman's Christian Temperance Union; T. F. Ruehrig, C. H. Farrington, E. E. Austin, D. M. Voorhees, Ned Zink, W. M. McGregor, Charles Short, H. F. Janson, J. E. Ziebach, W. C. Bidleman, Alice McDonald, J. E. Rhodes, Orville Barber, Louise Tierney, and W. E. Hanson, Wessington Springs, S. Dak.; Mabel E. Clark, Edna M. Clark, Alice Blakely, Bernice Potter, Bertha Apland, Mrs. Will Van Woert, Clara Graham, Mrs. Annie Halgerson, Inez DeKramer, Mrs. G. F. Watson, Mrs. Walter Watson, Anna Haas, Bertha Blohm, S. S. Clark, W. C. Clark, Dorothy Fluegel, and Louila Williams, Canistota (S. Dak.) Woman's Christian Temperance Union; Mrs. F. L. Brewer, De Smet, S. Dak.; Flora Wilson, corresponding secretary Woman's Christian Temperance Union, Mitchell, S. Dak.; Abbott Little, Wagner, S. Dak.; Mrs. Kathryn M. Coxe, corresponding secretary the Round Table Club, Mitchell, S. Dak.; Rev. Ralph C. Shearer, Edith Bowman, Mrs. H. A. Pike, Mrs. C. Sturtevant, Miss J. Radak, Vernon McKann, J. J. Nedland, Robert W. Wick, Mrs. Henry Halla, W. W. Byers, Mrs. W. W. Byers, Eleanor Collins, Franklin Bussey, Mrs. Fred T. Koth, Mrs. C. E. Bixby, Mrs. R. C. Shearer, and W. F. Zelman, Tyndall, S. Dak.; Clara L. Towne, Huron, S. Dak.; Miss Anna Heckenlaible, Menno, S. Dak.; Miss Helen Petersen, president, and Miss Mae Jackson, secretary, the Wesleyan Service Guild, Huron, S. Dak.; G. W. Collins, H. G. Tilton, F. V. Reaney, H. F. Reaney, L. A. McDonald, W. H. Over, Frank Miller, N. N. Sipe, A. E. Atwood, T. M. Risk, V. M. Warner, M. W. Davidson, J. M. Spensley, E. H. Fulmider, William J. Thompson, L. P. Brewster, E. E. Collins, D. B. Heller, H. E. Sheltz, Robert Spensley, William Nelson, H. M. Anderson, William R. Russell, M. B. West, William R. Cleland, and E. J. Spensley, Vermilion, S. Dak.; members of the Huron Beta Delphian Chapter, of Huron, S. Dak.; members of Alpha Delphian Society, South Dakota; the Business and Professional Women's Club of Rapid City, S. Dak.; and Wesleyan Service Guild, of Huron, S. Dak.

REPORTS OF COMMITTEES

Mr. REED of Pennsylvania, from the Committee on Military Affairs, to which was referred the bill (H. R. 12449) to define the terms "child" and "children" as used in the acts of May 18, 1920, and June 10, 1922, reported it with amendments and submitted a report (No. 1359) thereon.

Mr. KEYES, from the Committee on Public Buildings and Grounds, to which was referred the joint resolution (S. J. Res. 171) granting the consent of Congress to the city of New York to enter upon certain United States property for the purpose of constructing a rapid-transit railway, reported it with an amendment and submitted a report (No. 1360) thereon.

Mr. DALE, from the Committee on Commerce, to which was referred the bill (H. R. 13826) authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Union, Nebr., reported it without amendment and submitted a report (No. 1361) thereon.

He also, from the same committee, to which was referred the bill (S. 4778) authorizing the Moundsville Bridge Co. to construct a bridge across the Ohio River from a point at or near the city of Moundsville, Marshall County, W. Va., to a point opposite in Belmont County, Ohio, reported it with an amendment and submitted a report (No. 1362) thereon.

He also, from the same committee, to which were referred the following bills, reported them severally with amendments and submitted reports thereon:

S. 4616. An act granting the consent of Congress to the Pittsburgh, Cincinnati, Chicago & St. Louis Railroad Co. for the maintenance and operation of a bridge across the Ohio River at Steubenville, Ohio (Rept. No. 1363);

S. 4721. An act to extend the time for commencing and completing the construction of a bridge across the Potomac River and to authorize the use of certain Government land (Rept. No. 1364);

S. 4744. An act granting the consent of Congress to the city of Aurora, State of Illinois, to construct, maintain, and operate a bridge across the Fox River within the city of Aurora, State of Illinois (Rept. No. 1365);

S. 4745. An act granting the consent of Congress to the city of Aurora, State of Illinois, to construct, maintain, and operate a bridge across the Fox River within the city of Aurora, State of Illinois (Rept. No. 1366);

S. 4787. An act to revive and reenact the act entitled "An act granting the consent of Congress to the State of Illinois and the State of Iowa, or either of them, to construct a bridge across the Mississippi River, connecting the county of Carroll, Ill., and the county of Jackson, Iowa," approved May 26, 1924 (Rept. No. 1367); and

S. 4793. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct a bridge across the Cumberland River in the vicinity of Harts Ferry, in Wilson and Trousdale Counties, Tenn. (Rept. No. 1368).

Mr. BROOKHART, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

H. R. 3041. An act for the relief of Alfred St. Dennis (Rept. No. 1369); and

H. R. 8798. An act for the relief of William Lentz (Rept. No. 1370).

Mr. ROBINSON of Indiana, from the Committee on Military Affairs, to which was referred the bill (H. R. 13033) authorizing the Secretary of War to convey certain portions of the military reservation at Monterey, Calif., to the city of Monterey, Calif., for the extension of Alvarado Street, reported it without amendment and submitted a report (No. 1371) thereon.

He also, from the Committee on Pensions, to which was referred the bill (H. R. 14800) granting pensions and increase of pensions to certain soldiers, sailors, and marines of the Civil War and certain widows and dependent children of soldiers, sailors, and marines of said war, reported it with amendments and submitted a report (No. 1372) thereon.

Mr. SHEPPARD, from the Committee on Military Affairs, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

H. R. 10472. An act to authorize the appointment of Master Sergt. August J. Mack as a warrant officer, United States Army (Rept. No. 1374); and

H. R. 12538. An act for the benefit of Morris Fox Cherry (Rept. No. 1375).

BENICIA ARSENAL MILITARY RESERVATION

Mr. SHEPPARD. I am directed by the Committee on Military Affairs, to which was referred the bill (S. 4712) to authorize the Secretary of War to grant a right of way to the Southern Pacific Railroad Co. across the Benicia Arsenal Military Reservation, Calif., to report it favorably without amendment, and I submit a report (No. 1357) thereon. Inasmuch as it is very important that the bill should pass immediately, I ask unanimous consent for its immediate consideration.

Mr. CURTIS. Mr. President, may I ask the Senator from Texas if it is a unanimous report from the committee?

Mr. SHEPPARD. It is a unanimous report and the bill contains the usual provisions for such a right of way.

The VICE PRESIDENT. Is there objection to the request of the Senator from Texas?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been introduced by Mr. SHORTRIDGE December 5, 1928, and it was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to grant to the Southern Pacific Railroad Co., a corporation incorporated and consolidated under the laws of the States of California, Arizona, and New Mexico, its successors and assigns, under such terms and conditions as may be approved by the Secretary of War, a right of way over and across the Benicia Arsenal Military Reservation, Calif., for railroad purposes, with full power to locate, construct, and operate railroad tracks, structures, telegraph, telephone, or signal wires and other railroad appurtenances, appendages, and adjuncts, the location and width of such right of way to be determined by the Secretary of War: *Provided*, That the land shall not be used for other than railroad purposes, and when the property shall cease to be so used it shall revert to the United States.

Mr. KING. Mr. President, may I ask the Senator from Texas if this is the measure in which a servitude or easement is granted over certain lands of the United States and in consideration of that easement the railroad company conveys to the United States a large area of territory which will be necessary for a munitions depot and also expends a considerable sum in removing one or two that now exist?

Mr. SHEPPARD. That is very true. The United States Government profits to a large extent by the transaction. The acquisition of the additional land deeded to the Government in return for the right of way was recommended by a survey

which Congress authorized in order to safeguard the locations of our ammunition supplies.

Mr. KING. I am familiar with the matter and am in favor of the passage of the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

APPROPRIATIONS FOR THE STATE AND OTHER DEPARTMENTS

Mr. JONES. From the Committee on Appropriations I report back favorably with amendments the bill (H. R. 15569) making appropriations for the Departments of State and Justice, and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1930, and for other purposes, and I submit a report (No. 1373) thereon.

I had hoped to call the bill up to-day, there being only three or four minor amendments to it, but some of the Senators have asked to have the bill go to the calendar. So I ask that that disposition be made of it.

The VICE PRESIDENT. The bill will be placed on the calendar.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent the second time, and referred as follows:

By Mr. GOFF:

A bill (S. 5086) granting an increase of pension to Launa Dickens (with accompanying papers); to the Committee on Pensions.

A bill (S. 5087) to authorize further consideration of recommendations for decorations for service rendered in the World War; to the Committee on Military Affairs.

By Mr. LA FOLLETTE:

A bill (S. 5088) granting an increase of pension to Andrew Kinney; to the Committee on Pensions.

A bill (S. 5089) to amend certain laws relating to American seamen, and for other purposes; to the Committee on Commerce.

By Mr. WATERMAN:

A bill (S. 5090) for the relief of Lewis H. Easterly; to the Committee on Pensions.

A bill (S. 5091) for the relief of Edward C. Dunlap; to the Committee on Claims.

By Mr. THOMAS of Oklahoma:

A bill (S. 5092) to correct the military record of James Luther Hammon; to the Committee on Military Affairs.

By Mr. BLEASE:

A bill (S. 5093) to authorize the issuance of certificates of admission to aliens, and for other purposes; to the Committee on Immigration.

A bill (S. 5094) making it a felony with penalty for certain aliens to enter the United States of America under certain conditions in violation of law; to the Committee on Immigration.

By Mr. JONES:

A bill (S. 5095) to amend section 1, rule 3, subdivision (e), of an act to regulate navigation on the Great Lakes, and their connecting and tributary waters, enacted February 8, 1895, as amended May 17, 1928; to the Committee on Commerce.

A bill (S. 5096) for the relief of Presly Holliday, captain, Quartermaster Reserve Corps, on the retired list, and for other purposes; to the Committee on Military Affairs.

A bill (S. 5097) for the relief of William Smith (with accompanying papers); to the Committee on Claims.

By Mr. JOHNSON:

A bill (S. 5098) granting a pension to John P. Classi (with accompanying papers); and

A bill (S. 5099) granting a pension to Ward D. Flinn; to the Committee on Pensions.

By Mr. GREENE:

A bill (S. 5100) granting an increase of pension to Celestia Edwards; to the Committee on Pensions.

By Mr. HAYDEN:

A bill (S. 5101) granting a pension to Burel E. Pollard; to the Committee on Pensions.

By Mr. FESS:

A bill (S. 5102) granting a pension to Irma Crow; and

A bill (S. 5103) granting an increase of pension to Aurelia M. Power; to the Committee on Pensions.

By Mr. SCHALL:

A joint resolution (S. J. Res. 183) to provide for the printing of the CONGRESSIONAL RECORD on paper made from waste products of field crops on American farms; to the Committee on Printing.

FEDERAL COMMUNICATIONS COMMISSION

Mr. WATSON. I desire to introduce a bill to create a Federal communications commission. I do not introduce this bill for the purpose of creating an entirely new commission but for the purpose of enlarging the powers of the present Radio Commission or of supplanting it with another. I do not expect any action at the present session of Congress, of course, and am introducing the bill only as a basis of discussion for those who may be interested in the subject.

The bill (S. 5104) to create a Federal communications commission, and for other purposes, was read twice by its title, and referred to the Committee on Interstate Commerce.

ENLISTMENTS OF SUBJECTS OF TURKEY AND BULGARIA DURING WORLD WAR

Mr. BLAINE. Mr. President, during the World War a number of subjects of Turkey, principally Armenians, and subjects of Bulgaria, joined the military and naval forces of the United States. According to an order promulgated by the War Department in October, 1918, in circular No. 43, the subjects of two nations were to be discharged as alien enemies; that is, to be given undesirable discharges. It will be understood that there was no declaration of war on the part of the United States against either Turkey or Bulgaria. I will not go into the situation with relation to those nations as concerns the Central Powers, but I desire to state that these men served in good faith. They fall into two classes; those who were discharged subsequent to November 11, 1918, whether under the order promulgated by the War Department or upon their own application; the other class are those who were discharged prior to November 11, 1918, not, however, upon their own application. Under those circumstances these men are burdened with certain handicaps.

I therefore desire to introduce a bill the effect of which will be not to direct either the War Department or the Navy Department to issue honorable discharges, but to relieve these men from the present status of an undesirable discharge and place them in whatever their status was prior to their enlistment. I ask that the bill may be referred to the Committee on Military Affairs.

The bill (S. 5105) for the relief of certain subjects of Turkey and of Bulgaria who served in the military or naval forces of the United States during the World War, was read twice by its title and referred to the Committee on Military Affairs.

AMENDMENT TO APPROPRIATION BILL FOR STATE AND OTHER DEPARTMENTS

Mr. FLETCHER submitted an amendment proposing to increase the appropriation to enable the Bureau of Foreign and Domestic Commerce to investigate and report on domestic as well as foreign problems relating to production, distribution, and marketing, in so far as they relate to the important export industries of the United States, etc., from $923,500 to $943,500, intended to be proposed by him to House bill 15569, making appropriations for the State and other departments, which was referred to the Committee on Appropriations and ordered to be printed.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 4126. An act authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights reserved and limited rights in land, and authorizing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances; and

H. R. 7324. An act for the relief of Orla W. Robinson.

FIRST CAROLINAS JOINT STOCK LAND BANK

Mr. BLEASE. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the Greenville News, of South Carolina, announcing the resignation of the president of the Joint Stock Land Bank of Columbia, S. C., Mr. A. F. Lever. Mr. Arnold resigned a few days ago. Mr. Lever is now resigning.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LEVER RESIGNS AS BANK HEAD—A. P. SPENCER NAMED NEW PRESIDENT OF CAROLINAS JOINT STOCK LAND BANK

COLUMBIA, December 20.—S. R. Spencer, who since September 1 has been active vice president of the First Carolinas Joint Stock Land Bank, has been elected president of the institution, succeeding A. F. Lever. Mr. Lever, who has just returned from a business trip to New York, stated to-day that at a recent meeting of the board of directors of the First Carolinas Bank he tendered his resignation as president that he might enter other fields of activity. The nature of his future plans, he said, would be announced later.

Mr. Spencer, the new president of the bank, came to Columbia from Rock Hill in May, 1925. In Rock Hill he was vice president of the national bank and served in that capacity until his recent election to the vice presidency of the First Carolinas Joint Stock Land Bank.

OUR EXPANDING UTILITIES

Mr. BLEASE. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the New Leader, of New York City, of December 22, 1928, entitled "Our Expanding Utilities."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

Herbert Hoover's visit to Central and South America is regarded by the public-utilities crowd as an aid to their interests in that part of the world. Hoover has been an interpreter of the philosophy of this crowd and some of his speeches have been distributed by utility corporations. They regard him as a scout who is looking over the field to see what he can do for their "rugged individualism" when he takes the oath of office next March.

The chief American corporation with Latin-American properties is the American & Foreign Power Co. (Inc.), a subsidiary of the Electric Bond & Share Co. The countries included in the public utilities empire are Panama, Cuba, Brazil, Argentina, Guatemala, Ecuador, Colombia, and Venezuela, while certain properties in Chile and Mexico will come into their hands this year.

Here is a great and expanding interest extending over vast areas of territory and affecting millions of human beings. Considered in relation to other American investments in this field one gets some idea of the economic conquest of these peoples. One news story declares that in many of these nations "legislation will be required" to assist the programs of the utilities expansionists.

That item rounds out the story. Economic conquest brings with it the desire for legislation and this in turn leads to increasing interest in politics and control of the governments of these nations. Political supremacy follows economic power, while the Army and Navy follow both when the interests of the American expansionists require it. Thus we reach imperialism for the masters and mobilize workers for a march into these nations when "duty calls."

ADDRESS BY DONALD W. STEWART—UNIVERSAL CONSCRIPTION

Mr. CAPPER. Mr. President, Mr. Donald W. Stewart, of Independence, Kans., a young service man who served his country in our Army during the World War and whose service has been no less patriotic during the years since, has recently delivered a very fine address on universal conscription of resources in time of war which I believe should be read and studied by every loyal citizen of this country and which I ask unanimous consent to have printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE UNIVERSAL OBLIGATION—A PLAN FOR THE CONSCRIPTION OF CAPITAL AND LABOR IN THE EVENT OF WAR

[This address advocating universal conscription was first delivered by me to the department convention of the American Legion Auxiliary, Department of Kansas, Dodge City, Kans., June, 1924. Since then I have used the same address at least 50 times before legion gatherings, civic clubs, chambers of commerce, and so forth. The largest groups to which the address has been given are the eighth district conference of International Rotary at Salina, Kans., in 1926 and the Kansas State Bar Association annual convention in Wichita in 1927.]

The American Legion, born of war but dedicated and devoted to the cause of international peace, has adopted as one of its major objects the enactment of the Capper bill for universal conscription. It is my purpose to present to you briefly, and I hope logically, the existence of a recognized evil, profit in war, and the merits of our proposed remedy, universal conscription.

I advocate and present for your thoughtful consideration the justice and practicability of conscripting in time of war men, material, and money. I advocate the equity and the necessity of devoting every national resource, without profit, to the national defense. My discussion will therefore necessarily involve a discussion of your individual obligations as citizens of this country.

We have in this complex life we live a great variety of obligations. I appreciate that to be reminded of them is not always pleasant. Our obligations arise out of every conceivable relationship. They may be moral, social, civic, financial, or of many other types. It is some consolation to know, however, that all of them may be generally grouped under one of three main heads. There are, I believe, just three cardinal obligations.

In thus grouping them we find, first, our obligation to the Creator, in whose faith this country was founded and by whose grace and bounty it has attained its present position of eminence among the world powers. This obligation I need not urge upon you. It was taught you in your infancy by more worthy teachers than I. It is an obligation taught by the mothers of men, whose hopes follow us through the many vicissitudes of life and finally precede us in intercession at the feet of the Maker.

The second of these three obligations is that owed by each of us to our fellow men as individuals. That obligation was most aptly expressed by the Carpenter of Nazareth, when he said in the Sermon on the Mount, "As ye would that others should do unto you, do ye likewise unto them." This obligation needs neither emphasis nor explanation to any group with ideals of service.

The third obligation is that owed by each individual to his fellow men collectively, to society, and to the Government that I ask you to consider. In these three obligations, covering in a general way all of the duties of citizenship, may again be grouped together and constitute "the universal obligation," an obligation of service. In this light we have, then, the obligation of service to God, service to fellow man, and service to Government.

It is the last of these, the obligation of service to the Government, that I ask you to consider. In this Republic of ours we are, at least theoretically, endowed with equal rights, liberties, and opportunities, and the enjoyment of them imposes or should impose an equal obligation of service. This obligation is a continuous one, owed in the stirring stress of war and in the less romantic service of peace.

Much could profitably be said of the peace-time obligations of citizenship. It is my purpose, however, to discuss only the obligations owed by each citizen in time of war. The obligation of defending our country, the source of our rights and opportunities, is one that should rest with equal weight upon every citizen. In the past it has not done so. To verify this statement, which is true of our entire national history, we need go back no further than the recent World War. I do so, not to offer destructive criticism of our past but to offer a constructive suggestion for the future.

In the spring of 1917 you will recall that our Government was confronted with the necessity of engaging in a great conflict. That conflict was not of our own choosing, nor of our own making, but our participation in it was made seemingly unavoidable by the grim course of events. Having entered upon it, our immediate necessity was to terminate it successfully and as rapidly as possible. In this situation we can well imagine our Government taking stock of its national resources and determining its war-time needs. Wars demand of a nation unusual efforts and unaccustomed expenditures.

It is and was evident, of course, that in order to successfully prosecute any war the Government needs fighting men. Man power alone, however, can not achieve victory. There was a time in the development of the art of war when nations conquered by the sheer force of man power alone. It was by this strength that the barbarian hordes overthrew the Roman Empire. In this day of modern warfare, however, man power alone is insufficient. Men must be equipped for fighting.

A vast quantity of material is required to equip a fighting army, and this material includes guns and ammunition, airplanes and automobiles, ships, food, clothing, and every conceivable implement or aid to warfare.

This material, so urgently needed, does not come ready made. No nation has ever had at the outset of a war a sufficient quantity to supply its needs. Labor is therefore necessary to put raw material into serviceable form, and money is needed in great quantities to pay for all the manifold activities of war.

These four needs, then, of fighting men, material, labor, and money confronted our Government in those trying days of preparation. All of these elements were present in considerable quantities in the possession of our citizens, and the obligation of furnishing them rested, or should have rested, with equal force on all of us.

Let us consider for a moment how these needs were met and how that obligation was enforced. The Government filled its need for fighting men by proclaiming the principle, which we recognize as just, that in time of war the life, liberty, and service of every young man is at the disposal of the Government. The Government took its youths, 4,800,000 of them, and impressed them into service in the defense of our country. Such men were paid whatever the Government chose to allow them and were used when, where, and as the Government desired to use them. The common soldiers serving in this country in preparation for the ordeal of foreign service were paid $1 a day. In view of the extra hazard involved in crossing the submarine-infested waters and in meeting the enemy at more or less close quarters, pay for overseas service was increased to the extent of 10 cents a day, that apparently being the congressional estimate of the increased hazard. With this principle of compulsory and equal service those who served had no fault to find. This method of meeting the need of fighting men was proper and just.

In meeting the other needs of material, labor, and money the Government adopted a different and, in our judgment, a less equitable method. Materials were bought on the open market at highly inflated prices. One branch of the Government bid against another. Materials were purchased from contractors on what is known as the cost-plus method, wherein the Government agreed to pay to the contractor all that the material cost to manufacture plus 10 per cent for profit. It

required little intelligence on the contractor's part to realize that his profit increased as efficiency in manufacturing decreased. This resulted in profligate waste.

Having need of labor to build cantonments or ships, for instance, the Government hired laborers who in most instances worked in civilian clothes side by side with the soldier, the former drawing $15 or more per day to the soldier's $1 and keep.

The need for money was met in a similar way. The Government begged money from its citizens. Upon this money the Government had the same right to call as it exercised in calling its manhood. Both owed their existence—past, present, and future—to governmental protection. You men pleaded for money and sent your wives to cry for it. In return for the loan of this money the Government gave its security bearing a fair rate of interest and with tax-exempt features so attractive that to-day we find much of the great wealth of the country invested in this manner.

In all of this, we contend, there was inequality and injustice. The principle of the universal obligation of service was submerged in the selfish principle of profit. To the widow who possessed but one son, on whom she was dependent for support, the Government said:

"Give him to us. We will use him for our purposes and in the national defense during this emergency. So much of him as may be left after he has served our purpose will be returned to you. If, perchance, the fortunes of war should demand the expenditure of his life, you may be compensated with the thought of the sacrifice that you have been privileged to make in your country's cause. You may be gratified at the opportunity of placing your all upon the altar of patriotism."

To the wealthy bachelor, on the other hand, who had no son and was not himself of an age to serve, the Government turned. He had amassed worldly wealth, which was assuredly no more sacred to him nor so highly treasured by him as the widow's son. Did the Government say to him:

"You have no son to give, but you have something necessary to the defense of your country. Give us your wealth that we may devote it to our cause. So much of it as is left after it has served our purposes we will return to you. Should the fortunes of war demand the loss of your all, you, too, may be compensated and may take pride in your contribution to the safety of the Nation."

Your experience answers that question.

The people of this country can not soon forget the profiteering in the recent war. It has been truthfully said, I believe, that for every white cross that stands over the grave of some mother's son in France there stands in America a mansion built by some of our war millionaires out of the profits wrung from the Nation in its time of adversity. This should not be.

We should not unduly condemn all profit made in the past war. Much of it resulted from the spirit of the time and grew up by force of example. In future wars, however, we should devote our every effort to the entire elimination of this problem of profit. There is not now and never has been and never can be any logical justification for profit in war.

War is notoriously unsound and unprofitable. No new wealth is created and much of the old is expended. Millions of men are turned from productive activity to organized destruction. The Nation as a whole loses. It therefore follows that profit made by any individual in time of war is made at the expense of the less fortunate and less selfish, and such profits are added to their tremendous losses. No individual should be permitted to profit from a common calamity.

At every national convention held by the American Legion, for whom unofficially I presume to speak, this subject has been discussed. At the convention held in New Orleans in 1922 a report was rendered to the Legion by a special committee appointed for the purpose of studying this evil. In that report this language was used:

"'Equal rights for all and special privileges for none' was said long ago as a protest of our people against the same influence in our public life that, during the World War, profited on every side and developed a war strength division of millionaires. We are not here to criticize our country for its failure to protect itself against the attack of selfishness and greed, but the American Legion is looking our Nation in the face to-day and saying that in any future emergency our national motto must be 'Equal service for all and special profit for none.'"

Shortly after that report was made there was introduced in the Senate of the United States by Senator ARTHUR CAPPER, of Kansas, a bill which has come to be known as "The universal conscription bill." At the same time there was introduced in the House of Representatives a similar bill by Representative ROYAL C. JOHNSON. This bill, prepared by the Legion, is brief, and provides in addition to the draft heretofore authorized that the President shall in case of war, or when, in his judgment, war is imminent, conscript material resources, industrial organizations, and services in the cause of the common defense. Briefly, then, this bill places capital and labor on an equal footing with the fighting men and devotes all to the common defense.

The justice of such an act needs no explanation here. It meets with the unqualified approval of all who are thoroughly conscious of the obligation of service. Such opposition as is raised to it comes from the profiteer who desires that others may serve the Nation while he serves himself. It comes from those who think it right that while one man is fighting for one dollar a day others should be striking for sixteen.

It may be said that such a bill would transcend the limits of our Constitution, yet the ablest lawyers, who have given the matter consideration, have no such fears.

There is nothing more sacred than life and liberty. The great Government that has the power in times of national emergency to demand both life and liberty, and devote them to the common defense should experience no difficulty in taking property or services of any kind. In time of war all private property and wealth of every description should be dedicated to the public use to such extent as is necessary to provide adequately for the public defense. It is not just that some should freely give all they have while others reserve the right to select what they will give and the price at which they will give it. War is a common emergency, and the defense of our national institutions and liberties is a common defense in which all should engage, without reservation, on an equal footing. That is in keeping with our best traditions of American patriotism and is the highest expression of democracy. I should make clear, however, that it is not proposed to take either labor, material, or capital without just compensation; fixed, however, by the Government.

It is not the Legion alone that advocates this. Great men in all walks of life have joined their voices and their influences to that of the Legion in procuring the speedy passage of such a measure. This plan had been indorsed by the political conventions of our two major parties, by Presidents Harding and Coolidge, all of the principal patriotic societies, the War Department, and innumerable leaders in public life.

The finest argument that can be advanced for the adoption of such legislation is that it will undoubtedly be the strongest incentive to peace. There is no group of people who know more of the horrors of war and who have a greater dread of its coming than those men who learned of its hardships by personal experiences, unless it be the mothers and the wives and daughters of such men who mentally suffered more than those who served. There is no physical pain comparable to mental anguish, and there is no mental anguish that approaches that of an anxious mother. To this class of people such legislation will be welcome.

There may be no truth in the statement that wars are purposely engendered and people are purposely inflamed by capital with a view to profiting in the resulting catastrophe. It is true that if the element of profit is entirely removed from war, and the realization implanted in the minds of all of the people that in the event of war they will all have to suffer sacrifice comparable at least to those of fighting men, wars will only be undertaken under the gravest of circumstances. Unfortunately men are frequently willing to encourage and applaud manifestations of the fighting instinct in others, particularly if they can see a financial profit in it for themselves. If the promise of personal profit in war or in the threat of war could be wholly removed, a great step would be taken toward the destruction of incentive to war. If every citizen, however rich, however eminent, however venerable in station or years, should feel himself liable to be called upon for sacrifices commensurate with the sacrifices of our comrades whose lives ebbed out in the wire entanglement on the field of battle, there would be less inclination to preach war among our citizens and less inclination to vote for it among our lawmakers.

We have been confronted in this country for the past 20 years with the constant possibility and menace of war with Mexico. When that war comes the youth of America will go forth to battle with colors flying and bands playing. They will go forth, in theory at least, to protect our national honor. You and I know, however, that it is not entirely our national honor that is endangered by turbulent conditions in Mexico, and the preservations of our national honor will not in all probability be the underlying cause of that war. American capital has tremendous investments in that neighboring country and the unsettled political conditions have adversely affected the dividends expected from these investments. This future war will be fought to a great extent to protect these dividends and this invested capital. I do not mean that they should not be protected and have no personal objection to participating in such a war. However, it is only just and equitable that those for whose special benefit a war is fought should take an equal part in the conflict and bear an equal share in the resulting loss, not only of life but of labor, material, and money. Legislation of the proposed type will tend to insure that participation and to the extent that it is efficient and does insure, it will tend to minimize such conflicts.

The proposed plan is not a shifting of responsibilities but is rather an equalization of them. It is not selfishness on the part of the young men who took an active part in the recent war. Since others profited in the war that they fought, the selfish course would be for them to seek profit in any war that succeeding generations may fight. By urging the conscription of capital and labor as well as fighting men we of the Legion are, in effect, pledging ourselves to serve in the next war. We are all fast passing the fighting age. Each year removes us further from that class of youth so essential to the activities of war. The war of the future will find us occupying the same relative positions

in society as were occupied by those who made immense personal profits during the past emergency. We are relinquishing our opportunity for profit in the cause of justice, peace, and the national defense.

The enactment of the proposed bill will tend, we believe, to bring about an ardent desire for peace on the part of the American people and on the part of any nation who might contemplate an attack upon us. It may well be that the time may eventually come when, through international understanding or harmony we may have international peace. I have no thought, however, that my children or my children's children will live to see that day. Pending its arrival we advocate, therefore, this type of preparedness. If it became known that this great Government of ours, in the event of war, was prepared to throw into the conflict and devote to the winning of it all of its resources, all of its men, all of its labor, and all of its industries, nations would hesitate before undertaking war with States so thoroughly united. It has been demonstrated once what this liberty-loving people of ours can do in the unfamiliar game of war. That demonstration was given under conditions not altogether favorable. That war was won not because of our efficient war plans but in spite of their inefficiency. It was won not by that whole-hearted devotion of the entire resources of the Nation to the cause, such as would be given under the proposed plan. It was won by a great majority of the people freely giving their all and in spite of the efforts of the minority to profit by the Nation's misfortune. The spread of this doctrine of universal service among the nations of the earth would appear to me to be the greatest incentive to international peace.

The plan which we are proposing not only will work successfully but has worked in the past. The nearest approach that we have to it is found in the war-time experience of France. France had long had compulsory service on the part of her soldiers. During the recent war she had virtual conscription of both labor and capital. Her munition factories, shipyards, railroads, and other great war-time industries were manned not by civilian labor but by auxiliary branches of the army. Having need of material and supplies she did not bargain with the owner and buy on the open market. What she needed for the national defense she took, and what she took in due course of time she paid for at what appeared to her to be a fair price without profit. What France has done this and other nations can do.

The conscription of capital is not the difficult radical thing that we might at first suppose. There has always been in every civilized government conscription of capital. Persons have always been required to give of their resources to maintain organized government. Taxation of any species is nothing more or less than a conscription of capital. That taxation we are familiar with, and to it we have become accustomed. We had, to a great extent, conscription of capital during the past war in our excess-profits taxes. Those who made excessive profits were required to refund the greater portion of them to the Government through the operation of the income tax law. Excessive profits were recognized as being unjust and refund of them exacted. This was but a roundabout way of accomplishing what we propose to do by a more direct method. Why permit a man or corporation to make a greater profit than he or it is permitted to keep? Why not prohibit, in the first instance, profit which is conceded to be excessive?

The practical operation of the proposed plan will, we recognize, necessitate a complete system of price control. Labor can not be expected to work for a nominal wage if the cost of living is permitted to reach unattainable heights. The elimination of profit in order to be equitable and satisfactory must be complete. Just compensation must be paid to all, and more than that to none.

The plan presented by the Legion and embodied in the pending bill is the only plan that has thus far been offered to remedy a recognized evil. Much has been said of it in the past and much need be said until Congress comes out of the lethargy of the past five years. Our national tendency seems to be to defer preparation for war until the emergency is upon us. Our past experience should have demonstrated the folly of this course. Now is the time to advocate this reform. Upon the declaration of war fault finding with existing method ceases to be a virtue. During the recent emergency men were confined in Leavenworth, and properly so, for advocating the plan that I have presented to you to-day.

Those in favor of the adoption of the Legion bill can render, we believe, an inestimable service to America and the cause of international peace by urging upon their Representatives the necessity of its prompt enactment.

In leaving this subject for your consideration I desire to present to you a contrast which, I believe, embodies all that I have tried to say.

In many places in this country there arose as a result of the war great industrial centers, whose streets still resound to the clang of the forge and anvil and whose heights are adorned with beautiful homes built from the profits of war.

I can not help but contrast such cities with another city with which I am familiar. I refer to a city in France, to my mind the dearest city in the world. The fortunes of war permitted me to see this city at the time of its establishment and permitted me to observe from time to time, in the long months that followed the armistice, its relentless growth. It is the only city that I ever watched grow where each new inhabitant as he came in to take up his eternal abode, filled my heart with a mingled sense of sorrow and pride. Its growth has ceased now. It is a city that has no industry. Through its quiet streets the voices of little children are never raised in play. From the heights of the city in all directions the white crosses stand row on row, marking the last resting place of our comrades. To quote and slightly paraphrase the poet Gray:

"There 'neath foreign sod and yew trees shade,
Where heaves the earth in many a moldering heap,
Each in his narrow cell forever laid,
The valiant sons of America sleep.
For them no more the blazing hearth shall burn;
Nor busy housewife ply her evenings care,
No children run to lisp their sire's return,
Nor climb his knees the envied kiss to share."

There in hallowed ground sleep America's valiant sons. There Romaigne—a city of the dead. Its inhabitants realized and fulfilled the universal obligation of which I have spoken. God speed the day when all of us may be equally conscious of that obligation—equally willing and eager to meet it. With the dawning of that day will come, we believe, the looked-for and prayed-for day of universal peace.

DISTRIBUTION OF THE CONGRESSIONAL RECORD

Mr. HEFLIN. Mr. President, I gave notice on day before yesterday that I would call up the bill relating to the reapportionment of CONGRESSIONAL RECORDS to Members of the House and Senate and Government officials. Yesterday I agreed with the Senator from Utah [Mr. SMOOT] that the bill might go over until after the Christmas holidays.

Mr. SMOOT. I will say to the Senator that I have asked for all the information that I told him I would ask for, and I am quite sure I will have it here when the Senate reconvenes after the holiday recess.

FERDINAND YOUNG, ALIAS JAMES WILLIAMS

Mr. TYSON. Mr. President, from the Committee on Military Affairs I report back favorably without amendment the bill (H. R. 10093) for the relief of Ferdinand Young, alias James Williams, and I submit a report (No. 1358) thereon.

Mr. EDGE. Mr. President, I should like to secure the indulgence of the Senate and be permitted to have unanimous consent for the immediate consideration of the bill just reported by the Senator from Tennessee.

I will state briefly the object of the bill and the reason for the request which I make. This bill straightens out the military record of an old veteran in the Civil War, who is now 85 years of age. The bill passed the House unanimously, and, as indicated, has been reported favorably by the Committee on Military Affairs of the Senate.

The facts are that Ferdinand Young enlisted in a Missouri regiment during the war and served for three years, meeting all the requirements of a soldier. He was given a leave of absence, but overstayed his leave. Realizing, as a young man at the time, that he had technically deserted, he failed to return to his old regiment, but enlisted in another regiment, a West Virginia regiment, as I recall, and served throughout the remainder of the war in that West Virginia regiment. However, when he enlisted in the West Virginia regiment he enlisted under an assumed name, that of James Williams, in place of his real name, which was Ferdinand Young, still fearing some possible punishment for his failure to report to his first regiment.

I may say that in his second enlistment he served in two or three engagements and stayed with the regiment until the close of the war. Technically, however, he was recorded in the military archives as a deserter.

The facts have all been carefully examined, the House has passed the bill, and I can not conceive of a Christmas gift that would be more gratefully appreciated by an old soldier than straightening out his record. I ask unanimous consent for the immediate consideration of the bill.

Mr. REED of Missouri. Mr. President, I presume it will be understood that this Missourian was away when there was no fighting going on.

Mr. EDGE. He served, I think, a total of four years and some days during the war, which lasted some five years; and at the age of 85, I think, it is a testimonial that the Senate and Congress can well bestow. I trust that unanimous consent will be granted for the consideration and passage of the bill.

Mr. KING. I wish to ask the Senator whether or not an application had heretofore been made to remove the charge of desertion and denied by the Senate or the House?

Mr. EDGE. Absolutely not. This is the first effort that has been made in behalf of securing a correction of the military record of this soldier. The bill was introduced in the House, the House requested a report from the War Department, and the War Department recommended the passage of the bill.

The VICE PRESIDENT. Is there objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Ferdinand Young, alias James Williams, formerly a private of Company K, Fourteenth New York State Militia, subsequently the Eighty-fourth New York Volunteer Infantry, and Company D, Eleventh Regiment Maryland Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably January 20, 1863, from the military service of the United States as a member of Company K, New York Volunteer Infantry: *Provided,* That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FREDERICK D. SWANK

Mr. JONES. Mr. President, on Thursday last the Senate reconsidered the votes by which the bill (S. 584) for the relief of Frederick D. Swank was read the third time and passed by the Senate on a previous occasion. By a motion to reconsider, the bill, which had previously passed the Senate, had been held up. I assumed at the time on Thursday that the request made by the Senate of the House a week or 10 days ago for the return of the bill had been complied with and that the bill was here. I am advised, however, that it had not been returned by the House; but it has been returned now and is on the Vice President's table, I understand, and I should like to reconsider the vote by which the bill was passed and have the amendments which were put on the bill on Thursday adopted. So I ask unanimous consent that the vote whereby the bill was read the third time and passed may be reconsidered, that it may be amended as it was amended on Thursday, and may be again passed.

The VICE PRESIDENT. Is there objection?

Mr. BRUCE. What did I understand the Senator to say is the object of the bill?

Mr. JONES. It is a bill for the relief of a man named Swank.

Mr. BRUCE. I have no objection.

There being no objection, the votes by which the bill was ordered to a third reading, read the third time, and passed were reconsidered.

The Senate proceeded to consider the bill.

The VICE PRESIDENT. The amendments agreed to on Thursday will, in the absence of objection, be considered as being presented again and agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

COOPERATIVE ECONOMICS

The VICE PRESIDENT. Morning business is closed.

Mr. BROOKHART. Mr. President, economics is studied and taught in all our schools as a system of competition. For the purpose of this address I shall rename it "competitive economics."

The law of supply and demand has been the basis of competitive economics in every line of business. This basis has been torn up, distorted, and broken by artificial laws and combinations, but in spite of all these disturbances it continues as the polar star in the logic of competitive economics. Not long ago a distinguished United States Senator said that 92 per cent of the people who go into business in the United States ultimately fail. Another distinguished United States Senator put the statement in the RECORD that these failures were 96 per cent. The lowest estimate I have ever seen was 80 per cent. Taking any of these percentages, there is but one conclusion—competitive economics is a failure. It is a stupendous and disastrous failure. It fails in its own household. Any system which results in such a percentage of failures is without defense, and must be rated a failure per se.

Is there any other system of economics in the world which gives promise of greater success, and one which is founded more distinctly upon principles of justice and humanity? I think there is, and I have designated this rival system as "cooperative economics." I do not mean cooperation in the usual and sporadic sense in which it is commonly used. I mean cooperation in production and in processing, in distribution, in marketing and in transportation, in credit and in education. I mean cooperation as a complete economic system that will do everything in human civilization that competition is now doing. I mean business organized on the principles of the Sermon on the Mount, and specifically practiced under the specific terms of the golden rule itself. Such a vision is not a dream, but already a world-wide reality, and I shall describe it in brief detail.

It was in 1843 that 28 poor flannel weavers at Rochdale, England, organized the first cooperative society which has already surpassed all like business enterprises in Great Britain. These poor weavers saved their pennies for a year and a half, and with a pound each on the 21st of December, 1844, the shortest, darkest day of the year, 84 years ago yesterday, they opened up the little Rochdale store. It carried four articles of food. They tended it turn about and kept it open two nights a week. It was the scorn and joke of the neighborhood, but these weavers had persistence, intelligence, and even genius. They invented three little principles of business operation:

First. One man, one vote. Capital does not vote.

Second. Earnings of capital are limited. They never paid capital more than 5 per cent.

Third. Twenty-five per cent of all the earnings of the enterprise were kept in the business so it might grow and become prosperous and sound. The other net earnings were distributed back to the members in proportion to the business they transacted with the enterprise. This was known as the trade dividend.

These principles contained the germ and the genius of success. They persisted, and finally their little store gained a large membership and became the pride of the community. Their ideas then spread to other communities, and other like enterprises were organized until several hundred were in operation. They then met in convention and decided that they could do better with a wholesale of their own. The capital for the wholesale was subscribed by the stores. The vote for its control was in proportion to the membership of the store. The earnings of capital were limited as in the store; but 25 per cent of the net earnings were kept in the wholesale so it, too, might grow and become sound and prosperous. The other earnings were distributed back to the stores in proportion to the amount of business transacted with the wholesale. After a time this wholesale decided it could do better with a soap factory of its own. It organized one upon these same principles, now the greatest in the world. In all, these institutions have grown until in 1923 it had 158 of the greatest factories in Great Britain. Its business has spread around the world. It is to-day more truly representative of the world-wide English Empire than any other institution. It now embraces over 1,200 societies, and the Scottish Wholesale Society, its little brother, embraces 272 more. It operates vast estates of farm land in England, in Canada, in Ceylon, in India, and in West Africa. Its banking department had a turnover of two and a half billion dollars in 1922. It is next the Bank of England in fiscal importance. It writes half of the industrial life and accident insurance in Great Britain, at a cost of one-fourth charged by the profit-making companies. In spite of all the millions and billions of money and property which it handles, there is not a millionaire in its organization. It never made a millionaire and it never made a pauper. Its great convention in 1923 voted unanimously to join an international cooperative exchange upon the same simple principles. It has a great school for teaching cooperative principles and for training its business men and leaders in every enterprise.

It has the 11 biggest flour mills in Great Britain and is the biggest individual buyer of wheat for export in the United States or in Canada. It will pay the market price for wheat at Minneapolis, pay the freight to the seaboard, pay the transfer charges to the ship—sometimes its own ship—pay the freight across the ocean, grind this wheat in its own cooperative mills, bake the bread in its own cooperative bakeries, and sell the bread at a profit—not a reasonable but a cooperative profit—to its members in Great Britain, at a fraction of a cent less than half paid by the laboring people of Minneapolis for bread made out of the same wheat. The basis of the success of this great cooperative institution is cooperative credit. It has its own deposit banks in every enterprise, and its own reserve bank as a department in the great wholesale.

There is no competition in this system. Its only competition is outside and with competitive economics itself. It is found in a very high degree in all the countries of Europe. Its growth since the war has been so great as to lead me to say that cooperative economics is the only system that has survived the war. In the United States last year the farmers transacted more than two and a half billion dollars of cooperative business. Its growth in the United States, although not organized as in Europe, is still the outstanding economic development of our country and it is succeeding.

It has reached a stage of permanent success in most of the countries where it has long been established. Its success in

Great Britain, compared with the failure of competitive economics in the United States, is an argument that staggers. There are almost no failures in Great Britain. The whole system is so well organized, so interdependent, and so bound together in mutual support that failure is a rare possibility. In the United States the failures are about like other business because cooperatives are not federated together and are not supported by their own credit systems as in other countries. In other words, cooperation in America has not reached the state of a complete system of cooperative economics.

What is necessary to develop this great system successfully in our country? The first thing needed is a cooperative banking law. There is no such thing in the United States. Competitive and commercial banking systems have a monopoly upon the deposits of the farmers and laboring people of the United States. There are credit union laws, but none of them provide for a credit system for the transaction of big business. We are the only civilized country in the world that prohibits its working people from the farm, in the factory, and at the desk from organizing their own savings in a cooperative credit system with a reserve bank and all under their own control.

The logical basis of cooperative economics is cooperative credit. It is the starting point and the sure forerunner of success. A single cooperative bank can start and succeed when a cooperative store or other enterprise would fail. If the law would permit their organization into a system, the success would be unquestioned. The power of our Federal reserve system for competitive and especially speculative business is too great. This is now admitted by all. The only safe way to check that power is to pass a cooperative reserve-system measure and invest it with the powers of the commercial or competitive reserve. With this credit system organized, it would be possible then to organize successfully producers and consumers' cooperative enterprises of every kind. They would have the best financial advice of their own friends before starting, and could then depend upon the necessary financial support. They would not be started unless they measured up to the requirements of cooperative soundness and success. Cooperative banks are the soundest and the safest in the world because they never lend money for speculative purposes. They develop the soundest and the safest business in the world. They end profiteering. They end the waste of competition, the greatest waste in modern civilization. They can safely join an international exchange upon the same simple principles and end the economic causes of war between nations. Cooperative economics promises more for civilization than any other economic theory ever devised by the mind of man.

In conclusion, Mr. President, I desire to read the names of the 28 persons who founded this cooperative system at the little town of Rochdale in England, in a store on a street named Toad Lane. That little store building is to-day the only purely economic shrine that has ever existed in this world. It is the only place where people gather from all over the world because of the purely economic things done at that place.

Here are the names:

James Smithies, Charles Howarth—

I might say that Howarth was perhaps the genius of these 28 persons. He invented the third principle of cooperation, the trade dividend, which made cooperation succeed where it had failed before, when it tried to do business at cost—

William Cooper, David Brooks, John Collier, Samuel Ashworth, Miles Ashworth, William Mallalieu, George Healey, James Daly, James Twgedale, Samuel Tweedale, John Kershaw, James Maden, John Scrowcroft, John Hill, John Holt, James Standring, James Manock, Joseph Smith, William Taylor, Robert Taylor, Benjamin Rudman, James Wilkinson, John Garside, John Bent, Ann Tweedale, and James Bamford.

You will notice the name of one woman in the list; and perhaps this is the first recognition of women on equal terms with men in economic business.

MULTILATERAL PEACE TREATY

Mr. FRAZIER. Mr. President, we are about to adjourn for the Christmas holidays. It is a time of good fellowship and good cheer. It is a sacred and hallowed time—the time when the world celebrates the anniversary of the coming of the Prince of Peace, the great Master who taught "Peace on earth, good will to men."

When we reassemble on the 3d of January we will, by unanimous-consent agreement, take up the peace treaty—a treaty for world peace; a treaty which, if honestly carried out, will tend to promote "peace on earth and good will to men."

I know of nothing more fitting and appropriate at this time than the poem entitled "Christmas Bells," by America's most dearly beloved poet, Henry Wadsworth Longfellow.

Mr. President, I am going to read the poem, and I trust that the spirit of it—peace on earth, good will to men—may touch the heart of every Member of the United States Senate:

CHRISTMAS BELLS

I heard the bells on Christmas Day
Their old, familiar carols play,
And wild and sweet
The words repeat
Of peace on earth, good will to men!

And thought how, as the day had come,
The belfries of all Christendom
Had rolled along
The unbroken song
Of peace on earth, good will to men!

Till, ringing, singing on its way,
The world revolved from night to day,
A voice, a chime,
A chant sublime
Of peace on earth, good will to men!

Then from each black, accursed mouth
The cannon thundered in the South,
And with the sound
The carols drowned
Of peace on earth, good will to men!

It was as if an earthquake rent
The hearthstones of a continent,
And made forlorn
The households born
Of peace on earth, good will to men!

And in despair I bowed my head;
"There is no peace on earth," I said;
"For hate is strong,
And mocks the song
Of peace on earth, good will to men!"

Then pealed the bells more loud and deep:
"God is not dead; nor doth He sleep!
The Wrong shall fail,
The Right prevail,
With peace on earth, good will to men!"

DECLINE IN COTTON PRICES IN 1927 (REPT. NO. 1376)

Mr. CAPPER. Mr. President, a few months ago a subcommittee of the Committee on Agriculture and Forestry was appointed to investigate the 1927 decline in cotton prices. I was informed that a majority report was filed at the close of the last session, and I wish to submit a report embodying my own views on the investigation made at that time.

The PRESIDING OFFICER (Mr. STECK in the chair). The report will be received.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

ADJOURNMENT

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and the Senate (at 12 o'clock and 50 minutes p. m.) adjourned, the adjournment being, under the concurrent resolution of the two Houses, until Thursday, January 3, 1929, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate December 22, 1928

COLLECTOR OF CUSTOMS

Kyle Elam, of Port Arthur, Tex., to be collector of customs for customs collection district No. 21, with headquarters at Port Arthur, Tex., to fill an existing vacancy.

APPOINTMENTS IN THE REGULAR ARMY

GENERAL OFFICERS

To be brigadier general

Col. George Henson Estes, General Staff Corps (Infantry), from January 2, 1929, vice Brig. Gen. Henry C. Smither, to be retired from active service January 1, 1929.

To be chief of branch

Col. Francis LeJau Parker, Cavalry, to be Chief of the Bureau of Insular Affairs, with the rank of brigadier general, for

a period of four years from date of acceptance, with rank from January 6, 1929, vice Maj. Gen. Frank McIntyre, Chief of the Bureau of Insular Affairs, to be retired from active service January 5, 1929.

[NOTE.—Under provisions of section 14, act of June 4, 1920, rank of major general ceases with termination of tenure of office of incumbent.]

POSTMASTERS

CALIFORNIA

Gladys B. Evans to be postmaster at Knights Landing, Calif., in place of G. B. Evans. Incumbent's commission expires January 5, 1929.

Mamie L. Royce to be postmaster at Pittsburg, Calif., in place of M. L. Royce. Incumbent's commission expires January 5, 1929.

Clement J. Nash to be postmaster at San Mateo, Calif., in place of C. J. Nash. Incumbent's commission expires January 5, 1929.

GEORGIA

George E. Youmans to be postmaster at Adrian, Ga., in place of G. E. Youmans. Incumbent's commission expired December 10, 1928.

John H. Boone to be postmaster at Hazlehurst, Ga., in place of J. H. Boone. Incumbent's commission expired December 10, 1928.

ILLINOIS

Emma L. Enders to be postmaster at Cherry Valley, Ill. Office became presidential July 1, 1928.

IOWA

Gay S. Thomas to be postmaster at Audubon, Iowa, in place of G. S. Thomas. Incumbent's commission expires December 29, 1928.

Samuel A. Garlow to be postmaster at Avoca, Iowa, in place of S. A. Garlow. Incumbent's commission expires December 29, 1928.

Homer C. Thompson to be postmaster at Bayard, Iowa, in place of H. C. Thompson. Incumbent's commission expires December 29, 1928.

William W. Gundrum to be postmaster at Casey, Iowa, in place of W. W. Gundrum. Incumbent's commission expires December 29, 1928.

KANSAS

Maud Williams to be postmaster at Lenexa, Kans., in place of Maud Williams. Incumbent's commission expired December 9, 1928.

LOUISIANA

Amy B. Griffin to be postmaster at Gilbert, La., in place of E. F. Kelly, resigned.

MAINE

Lawrence A. Brown to be postmaster at Brunswick, Me., in place of L. A. Brown. Incumbent's commission expires January 5, 1929.

Frank P. Freeman to be postmaster at Harrison, Me., in place of F. P. Freeman. Incumbent's commission expires January 5, 1929.

MASSACHUSETTS

Andrew J. Maguire to be postmaster at Randolph, Mass., in place of A. J. Maguire. Incumbent's commission expires January 5, 1929.

MONTANA

Andrew K. Resner to be postmaster at Ronan, Mont., in place of A. K. Resner. Incumbent's commission expires December 29, 1928.

NEBRASKA

Edgar T. Lay to be postmaster at Seneca, Nebr., in place of E. T. Lay. Incumbent's commission expired December 19, 1927.

Murry K. Holley to be postmaster at Waverly, Nebr., in place of M. K. Holley. Incumbent's commission expired December 11, 1928.

NORTH CAROLINA

Roger V. Phillips to be postmaster at Grifton, N. C., in place of W. H. McCotter, resigned.

OHIO

Lucy M. Robson to be postmaster at Grafton, Ohio, in place of F. W. Howard, deceased.

William A. Campbell to be postmaster at Oakharbor, Ohio, in place of W. A. Campbell. Incumbent's commission expired April 7, 1928.

Rhody E. Campbell to be postmaster at Toronto, Ohio, in place of W. S. Paisley, resigned.

OREGON

William R. Anderson to be postmaster at Milton, Oreg., in place of W. R. Anderson. Incumbent's commission expires January 5, 1929.

PENNSYLVANIA

Walter C. Alcorn to be postmaster at Avonmore, Pa., in place of W. C. Alcorn. Incumbent's commission expires January 5, 1929.

Adah E. Pettis to be postmaster at Saegerstown, Pa., in place of A. E. Pettis. Incumbent's commission expires January 5, 1929.

Mary M. Kite to be postmaster at Pocono Manor, Pa., in place of E. A. Hoopes, resigned.

TENNESSEE

Parks L. Hayes to be postmaster at Lynchburg, Tenn., in place of M. L. Hayes, resigned.

WASHINGTON

Albert Maurer to be postmaster at Kelso, Wash., in place of Albert Maurer. Incumbent's commission expires January 5, 1929.

Pearl B. Burrill to be postmaster at Snoqualmie Falls, Wash., in place of P. B. Burrill. Incumbent's commission expires January 5, 1929.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 22, 1928

INTERSTATE COMMERCE COMMISSIONERS

Claude R. Porter to be an interstate commerce commissioner.

Clyde B. Aitchison to be an interstate commerce commissioner.

Patrick J. Farrell to be an interstate commerce commissioner.

APPOINTMENTS IN THE REGULAR ARMY OF THE UNITED STATES

ASSISTANT CHIEF OF BRANCH

Col. Winthrop Samuel Wood, Quartermaster Corps, to be assistant to the Quartermaster General, with the rank of brigadier general, for a period of four years from date of acceptance, with rank from February 2, 1929.

MEDICAL CORPS

To be first lieutenants

First Lieut. John Larkin Gallagher, jr.
First Lieut. Robert Eugene Bitner.

MEDICAL ADMINISTRATIVE CORPS

To be second lieutenants

Staff Sergt. Orion Victor Kempf.
Staff Sergt. Kindrick Ownby.
Staff Sergt. Robert Lee Black.
Pvt. Paul Estabrooke Zuver.

CHAPLAIN

Rev. Walter Hilary Paschal to be chaplain with the rank of first lieutenant.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY

QUARTERMASTER CORPS

Capt. John Bryce Casseday, Cavalry.
First Lieut. Charles Franklin Fletter, Field Artillery.
First Lieut. Charles Speir Lawrence, Infantry.

FINANCE DEPARTMENT

First Lieut. James Robert Manees, Infantry.

CHEMICAL WARFARE SERVICE

Maj. Theodore Barnes, Cavalry.

FIELD ARTILLERY

Capt. William Wayne Murphey, Ordnance Department.

SIGNAL CORPS

First Lieut. Donald Campbell Kemp, Cavalry.

AIR CORPS

Second Lieut. Walter Sylvester Lee, Infantry.
Second Lieut. Julius Theodore Flock, Signal Corps.
Second Lieut. Bernard Cecil Rose, Infantry.
Second Lieut. Robert Lewis Easton, Infantry.

PROMOTIONS IN THE REGULAR ARMY

To be colonel

Lieut. Col. Gustave Rudolph Lukesh, Corps of Engineers.

To be lieutenant colonels

Maj. John Charles French, Infantry.
Maj. John Walter Downer, Field Artillery.

Maj. Charles Bernadou Elliott, Infantry.
Maj. John Bunyan Corbly, Infantry.
Maj. Joseph Lybrand Topham, jr., Quartermaster Corps.
Maj. Charles Lewis Sampson, Infantry.
Maj. John Marshall True, Quartermaster Corps.

To be majors

Capt. Richard Bruce Webb, Coast Artillery Corps.
Capt. Moses Goodman, Coast Artillery Corps.
Capt. Arthur Henry Truxes, Cavalry.
Capt. Gordon Joseph Fred Heron, Cavalry.
Capt. Thomas Seelye Arms, Infantry.
Capt. Raymond Duffield Bell, Infantry.
Capt. Archelaus Lewis Hamblen, Infantry.
Capt. Paul Whitten Mapes, Infantry.
Capt. Robert Chauncey Macon, Infantry.
Capt. Oron Allston Palmer, Cavalry.
Capt. Stanley Bacon, Field Artillery.

To be captains

First Lieut. Frederic Bernard Wieners, Air Corps.
First Lieut. Frank Richards, Coast Artillery Corps.
First Lieut. Ralph Harry Woolsey, Quartermaster Corps.
First Lieut. Richard Francis Lussier, Infantry.
First Lieut. Jack Roy Gage, Infantry.
First Lieut. Raymond Peter Lavin, Infantry.
First Lieut. Henry Wyatt Isbell, Infantry.
First Lieut. Willis Stanley Bryant, Field Artillery.
First Lieut. Harland Clayton Griswold, Infantry.
First Lieut. Ralph Edmund Powell, Infantry.
First Lieut. Perry Wainer, Air Corps.
First Lieut. Krauth Whitson Thom, Infantry.
First Lieut. Guy Malcolm Kinman, Infantry.
First Lieut. John Francis Somers, Infantry.
First Lieut. LeRoy Moore Wightman, Cavalry.
First Lieut. Harry Ruhl Lebkicher, Chemical Warfare Service.
First Lieut. Ernest Stratton Barker, Infantry.
First Lieut. William Seymour Gravely, Air Corps.
First Lieut. Harlan Ware Holden, Air Corps.

To be first lieutenants

Second Lieut. Felix Nicholson Parsons, Coast Artillery Corps.
Second Lieut. Ben Early Cordell, Coast Artillery Corps.
Second Lieut. Dalies Joshua Oyster, Field Artillery.
Second Lieut. George Phillips Privett, Field Artillery.
Second Lieut. Richard Howell Dean, Air Corps.
Second Lieut. Carl Adam Kugel, Infantry.
Second Lieut. William Lindsay McPherson, Coast Artillery Corps.
Second Lieut. William Vincent Gray, Infantry.
Second Lieut. Rowland Kieburtz, Air Corps.
Second Lieut. Daniel Peter Norman, Infantry.
Second Lieut. John Mitchell England, Coast Artillery Corps.
Second Lieut. Floyd Cornelius Devenbeck, Ordnance Department.
Second Lieut. William Black Forse, Infantry.
Second Lieut. William Brown Short, Coast Artillery Corps.
Second Lieut. John Wallace Homewood, Infantry.
Second Lieut. James Vestie Collier, Field Artillery.
Second Lieut. Edwin Kennedy Wright, Infantry.
Second Lieut. Clint Leroy Taylor, Field Artillery.
Second Lieut. Richard Herbert Torovsky, Infantry.

PROMOTIONS IN THE NAVY

To be captains

Gordon W. Haines.
John W. Wilcox, jr.

To be commander

James R. Barry.

To be lieutenant commanders

Harrison Avery.
Thomas R. Cooley.

To be lieutenants

William B. Cranston.
Paul H. Wiedorn.
Carl F. Espe.
Edward C. Metcalfe.
William F. Jennings.
John P. Whitney.
Joyce C. Cawthon.
Thomas B. Dugan.
John A. Hollowell, jr.

To be lieutenants (junior grade)

Redfield Mason.
Hubert T. Waters.
Donald A. Bush.
Herman E. Schieke.
William H. Shahan.
Julian B. Jordan.
James A. McNally.
Theodore Wolcott.

To be medical inspectors

George C. Rhoades.
John C. Parham.

To be passed assistant surgeon

John M. Woodard.

To be pay inspector

Hervey B. Ransdell.

To be chief pharmacist

Maurice W. Throckmorton.

To be chief pay clerk

William D. Wilkinson.

To be naval constructors

George Helms.
Timothy E. Kiley.
John P. Yates.
Thomas W. Richards.
Joseph M. Simms.
Frederick C. LePine.
Matthew B. Pollock.
Walter W. Toles.
William C. Hardie.
William F. Hamberger.
John A. Lord.
William O'Neill.
Frederick M. Kirchmier.
George A. Lazar.
Lawrence A. Maaske.
Harry E. Cooper.
Albert Tucker.
Clifton Greenwell.
Joseph Feaster, jr.
Harry T. Newman.
Peter Treutlein.
James W. Costello.
Robert H. Lake.
Brandt W. Wilson.
Stuart P. Mead.
Joseph J. Redington.
Francis X. Maher.
Robert Velz.
Louis Haase.
Caleb Whitford.
Robert Morgan.
Joel A. Davis.
James P. Shovlin.
Robert H. Neville.
John A. Price.
Tony L. Hannah.
Herbert Duthie.
James G. McPherson.
Albert G. Merrill.
Frederick B. Britt.
Robert B. Pick.
John H. Jack, jr.
Clarence W. Chaddock.
Thomas F. O'Brien.
Irving B. McDaniel.
George T. Paine.
William A. Sullivan.
Harold Larner.
Carl B. Harper.
Ralph S. Barnaby.
Clem H. Congdon.
Raymond D. MacCart.
Walter S. Diehl.
William F. Twitchell.
Michael C. Faber.
Lucien M. Grant.
Antonio S. Pitre.
Joseph M. Kiernan.
George V. Whittle.
Hugh W. Gokey.
Roland G. Mayer.
William W. Hastings.
George W. Henderson.
Gerald W. Thomson.
William Neidert.
Cornelius V. S. Knox.
Virgil V. McKenna.
Wendell P. Roop.
Charles Hibbard.
Karl Schmidt.

To be civil engineers

Robert L. McLellan.
Harold W. Johnson.
Charles L. B. Anderson.
Dow H. Nicholson.
Allen Hoar.
Harry LeG. Hilton.
Collins L. Macrae.
Edmund B. Keating.
Robert R. Yates.
Albert A. L. Ort.
Clyde W. Coryell.
Edward D. Graffin.
Robert E. Hancock.
William W. Schneider.
Thomas J. Brady, jr.

POSTMASTER

LOUISIANA

Clem S. Clarke, Shreveport.

HOUSE OF REPRESENTATIVES

SATURDAY, *December 22, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, our Jehovah Father, we wait—waiting for the burst of sacred silence. How beautiful upon the mountains are the feet of Him that bringeth good tidings, that publisheth peace. In the Judean twilight, out of the loins of the Hebrew maiden, Thou art to bring forth a Saviour, who is to set the theme of the world's thought. We shall soon hear the stroke of the purest heart that ever beat, see the tenderest eyes that ever glowed in love, and listen to the most wonderful words that were ever uttered. Down through the long isles of the past, up to the vaulted roof of the skies, will come the angels' chorus: Glory to God in the highest, on earth peace, good will toward men. We praise Thee that earth's temples are to be no longer empty and lonely. The mighty Son of Israel is to come

to restring the harps of men and attune them to the harmony of His own beautiful life. Oh let the incense of His holy altar envelope us and fill the whole temple of our Republic, bless the hearthstones of our homes and circle forth over land and sea. Father, take our confined hearts, grasp our selfish lives, and use these poor treasures in earthen vessels. Reunite all lands in the bonds of peace and brotherhood, that they may know the greater fullness of our Father's house. O river of God, O heavenly Christmas tide, flow on and become wider and deeper, touching, blessing, saving this teeming world. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Latta, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On December 15, 1928:

H. R. 11983. An act to provide for issuance of perpetual easement to the Department of Fish and Game, State of Idaho, to certain lands situated within the original boundaries of the Nez Perce Indian Reservation, State of Idaho;

H. R. 13606. An act for the relief of Russell White Bear;

H. R. 13824. An act authorizing L. L. Montague, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Columbia River at or near Arlington, Oreg.;

H. J. Res. 76. Joint resolution for the relief of Leah Frank, Creek Indian, new born, roll No. 294;

H. J. Res. 260. Joint resolution for the relief of Eloise Childers, Creek Indian, minor, roll No. 354;

H. J. Res. 261. Joint resolution for the relief of Effa Cowe, Creek Indian, new born, roll No. 78;

H. J. Res. 346. Joint resolution authorizing the payment of salaries of the officers and employees of Congress for December, 1928, on the 20th day of that month; and

H. R. 12533. An act to authorize the Secretary of Commerce to dispose of certain lighthouse reservations and to acquire certain lands for lighthouse purposes.

On December 17, 1928:

H. R. 12312. An act for the relief of James Hunts Along; and

H. R. 7346. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment thereon in claims which the Winnebago Tribe of Indians may have against the United States, and for other purposes.

On December 18, 1928:

H. R. 13990. An act to authorize the President to present the distinguished flying cross to Orville Wright, and to Wilbur Wright, deceased.

On December 20, 1928:

H. R. 14801. An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes.

On December 21, 1928:

H. R. 5773. An act to provide for the construction of works for the protection and development of the Colorado River Basin, for the approval of the Colorado River compact, and for other purposes;

H. R. 13665. An act to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States; and

H. J. Res. 352. Joint resolution for the relief of Porto Rico.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 7324. An act for the relief of Orla W. Robinson.

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 4126. An act authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights reserved, and limited rights in land, and authorizing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances.

BILL PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee did on December 21, 1928, present to the President for his approval a bill of the House of the following title:

H. R. 13665. An act to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States.

AMENDMENT OF THE RETIREMENT ACT

Mr. SMITH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on a bill which I have introduced amending the retirement act affecting the employees in the classified civil service.

The SPEAKER. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. SMITH. Mr. Speaker, I wish to invite the attention of the House to a bill which I have introduced amending the retirement act affecting the employees in the classified civil service by providing that the rate of retirement shall be based upon the average salary for any period of five consecutive years, at the option of the employee, instead of the last 10 years of service, as provided under the existing law.

The reasons for such amendment are as follows:

First. The amendment of the law would increase the annuity of many a little, of few some, and of a very few a great deal, without lessening the annuity of anyone.

Second. It would increase the efficiency of the civil service in two ways: (a) By encouraging every employee, especially those in the lower grades, to strive always to do his or her best in order to advance, and thus reach the high five consecutive years of service before becoming less efficient, on account of age, when reductions would occur; and (b) by allowing the chiefs of bureaus to reduce inefficient employees, without reducing their annuities, when they come to retire; otherwise no chief will likely reduce an old and faithful employee, however inefficient on account of age, if at the same time he reduces his annuity for the rest of his life.

Third. As a consequence of basing the annuity on the last 10 years of service (as in the present law) there are now in scattered bureaus many employees drawing good salaries who render inefficient service on account of age or other infirmities.

Fourth. There are employees whose salaries have been reduced during the last few years before retirement on account of inefficiency, due to old age, or sickness, or accident, or dislike of chief or other cause, who otherwise would have received the full amount under the present law. Should a person have his pension reduced the remainder of his life because of a reduction in salary, due to accident or other causes which made it necessary to reduce his salary? This often occurs under the present law.

Fifth. It is true of clerical and other simple work that after the age of 60 or 65 a clerk is usually less efficient, and where distinctly inefficient should be reduced, so that a younger person may be promoted to his place, but this is not liable to be done, as it at the same time reduces the annuity under the present law.

Sixth. Making the annuity depend on the average of any five consecutive years of service does full justice and injures no one, helps many, and makes the service much more efficient.

If a clerk's salary is $1,600 and he renders inefficient service on account of age or illness, the Government loses full service annually until he retires under the present law, for he may not be reduced, as it reduces his retired compensation the rest of his life. But if the law is amended as proposed he could be reduced and a younger and more efficient clerk be promoted to the $1,600 place, and the Government would be the gainer and the employee's retired pay not be affected. In every case of reduction in salary on account of old age or inefficiency under the proposed amendment the Government will save much, increase efficiency greatly, and do no injustice to anyone.

The bill I have introduced is as follows:

A bill amending an act to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof.

Be it enacted, etc., That section 4 of the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof, be, and is hereby, amended to read as follows:

"SEC. 4. The annuity of an employee retired under the provisions of the preceding sections of this act shall be computed by multiplying the average annual basic salary, pay, or compensation, not to exceed $1,500 per annum, received by such employees during any five consecutive years of allowable service, by the number of years of service, not to exceed 30 years, and dividing the product by 45. In no case, however, shall the annuity exceed $1,000 per annum. For the purposes of this act all periods of service shall be computed in accordance with section 5 hereof, and the annuity shall be fixed at the nearest multiple of 12.

EXTENSION OF REMARKS

Mr. CRAIL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the emergency officers' retirement bill and to incorporate therein an editorial from the Los Angeles Times.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. UNDERHILL. I object.

ORVILLE WRIGHT

Mr. COLE of Iowa. Mr. Speaker, if the gentleman from Massachusetts [Mr. UNDERHILL] will not object, I would like unanimous consent to insert in the RECORD a little incident in the lives of the two Wright boys. I am sure that we are all interested in preserving all the Orville and Wilbur Wright data that is available, especially for future biographers and historians.

It so happened that for a few years the Wright family lived in Cedar Rapids, Iowa, my home city, where their father was pastor of the United Brethren Church. Two of the teachers who came into contact with these boys are still living. The teacher of Orville Wright, who was then in the second grade, is now Mrs. Ida M. Ballheim. In connection with the celebration at Kitty Hawk, this teacher throws light on the origin of the idea of flight in his mind. The idea must have been born with him. Orville came into the schoolroom one day with the model of a "toy flying machine." That incident is quite historic now. It shows that the boy was thinking of what the man afterwards developed. The teacher in effect told him to take it away and forget it, because many people had wasted their time on the same subject. The little boy assured his teacher that "Some day we are going to make a flying machine," referring to his brother and himself.

How fortunate that the boy did not take the advice of his teacher and forget about it, but instead kept on thinking about it until 25 years ago at Kitty Hawk they solved the quest and the problem of the ages. If instead of giving that advice the teacher had kept that boyish model of a future great invention, what a precious relic it would be now. That "toy flying machine" would now be placed under glass by the side of the real machine that made the historic ascent at Kitty Hawk.

I will not relate the story in full, but I ask leave to insert the newspaper account of it as part of my remarks, and I do this to conserve the time of the House.

Mr. UNDERHILL. Reserving the right to object, the RECORD is neither a history of aviation nor a history of the life of the Wright brothers. Undoubtedly, at the proper time and place, that will be written up. The gentleman has so splendidly and perfectly told the story that I think there is no necessity of further putting it in the RECORD, so I must object.

Mr. COLE of Iowa. Mr. Speaker, then I will ask unanimous consent to speak for five minutes more.

The SPEAKER. The gentleman from Iowa asks unanimous consent to speak for five minutes. Is there objection?

There was no objection.

Mr. COLE of Iowa. In my time, Mr. Speaker, I will ask the Clerk to read the clipping which I send to the desk.

There was no objection, and the Clerk read as follows from the Cedar Rapids (Iowa) Gazette and Republican, of December 17:

The national celebration to-day of the twenty-fifth anniversary of the first flight in a heavier-than-air machine recalls to the mind of Mrs. Ida M. Ballheim, 2220 Mount Vernon Avenue, the days when she taught Orville Wright, a student then in the Cedar Rapids schools and the man who is being feted as the inventor of the airplane.

Orville, then a lad in the second grade of Jefferson School, showed to his teacher even at that early age that he was thinking of the invention that was destined to make him famous. Mrs. Ballheim says she remembers that Orville brought a toy flying machine to school one day and remarked to her that he and his brother "some day were going to make a flying machine." Mrs. Ballheim, as she stood by his desk, smiled and said that probably he had "better not waste his time on that," because so many other people had tried and could not make them work.

"You would just know by the way Orville walked across the floor that he was going to amount to something," said she. "He showed that he was a genius, even as a boy."

Mrs. Ballheim taught Orville and Miss Emma Fordyce taught Wilbur in the third grade. Mrs. Ballheim is now in charge of the library at McKinley School and Miss Fordyce is librarian at Washington High School.

Mr. COLE of Iowa. I submit that that is a very interesting and a very human item, and should properly go into the RECORD, where it will be preserved. I ask unanimous consent for leave to revise my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. UNDERHILL. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. UNDERHILL. I would ask of the Speaker if that is not an infraction of the rules of the House as laid down with regard to the RECORD? I have no objection to the matter going in, although it is more of an advertisement for the school-teacher than it is for Orville Wright. I think we might as well have the thing settled at this session and determined as to matters that should appear in the RECORD.

The SPEAKER. The Chair thinks that the only rule is as to unanimous consent. If any gentleman objects, that is sufficient to exclude it.

Mr. COLE of Iowa. It is not my intention, Mr. Speaker, to add to my remarks; I simply want to see that I have it in proper form.

COLORADO RIVER BASIN

Mr. MORROW. Mr. Speaker, I ask unanimous consent to extend and revise my remarks on the Boulder Dam bill.

The SPEAKER. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. MORROW. Mr. Speaker, the upper-basin States are interested in the legislation for the development of the lower Colorado River Basin and the signing of a 7-State compact in order to secure protection by this compact of a future water supply to the four upper-basin States, and for the removal of the danger of a future lack of water in development of the lands suitable for irrigation.

This fear naturally arises on account of the interstate character of the stream and the latest decision of the United States Supreme Court in the case of Wyoming *v.* Colorado (259 U. S. 419). This decision establishes the rule, somewhat modified, that waters are to be divided between States which maintain the appropriation system of water by State statute; under this system the first users in their order of use by seniority, no matter where located upon the stream, have the right to water in the order of priority of use to the extent of their uses, as established and those coming later to take what is left. This rule does not respect State lines. So therefore, the energetic State and its people who have been diligent in filing and perfecting their water rights, have the advantage over the State that has lagged in its activity of looking after this vital necessity, for future growth. This applies directly to the State of New Mexico.

Although irrigation started in the southwestern part of the United States centuries ago among the Pueblo Indians of New Mexico and Arizona, and was carried on by the Spanish settlers, they failed to perfect and establish their rights by the law of appropriation, until within the period of the past one-quarter of a century. It is stated that the law of appropriation applies to about one-third of the water of the seven basin States, and about equally to each division, the upper and lower basins.

Unless a high dam is built at Black Canyon, the great bulk, or nearly two-thirds of the water of this vast water-shed during the flood season, will be lost entirely for utility in the United States. Therefore, the necessity of the high dam for impounding the water for the lower basin, not only for domestic use and irrigation, but for the development of hydroelectric power as well is apparent. The hydroelectric power developed will repay the Government and promote a great natural resource in the power.

This same principle of impounding dams must be applied at a later period in the four upper basin States so that all the drainage waters may be impounded for use. When that time arrives and the waters are so impounded in great dams, the use of all this impounded water means not only an increased water supply for the whole area in the upper and lower basins, but it means a stream regulation flow as well; because, as the water is used for the growth of vegetation in irrigation, the vegetation protects the evaporation and the water thus employed in irrigation percolates through the soil and again returns to the stream to be again employed and returned. Thus through impounding and use the stream flow is greatly regulated and increased by the law of nature applying the water to use and returning it back again to the stream.

The dam to be built in Black Canyon, on the Colorado River, which project has been in the press of the Nation and thoroughly discussed for the past several years as to the feasibility of legislation, and also before Congress of the United States for eight years, has at last passed in a much modified form, which apparently must suit the large power companies at least

to a degree, because after many amendments in the Senate the amended bill had but little opposition. The bill was returned to the House and those most vitally interested in the legislation appeared to acquiesce in the Senate amendments; President Coolidge promptly approved the legislation when it was presented to him.

The steps necessary to agree to its terms by the seven States remain yet before the legislation can be put into operation, and such steps must be finally worked out and a successful solution not long delayed is asked for by the States that still adhere to the original compact.

LOCATION OF THE DAM

The dam, when constructed, will be on the Arizona-Nevada line. This dam is to hold the great volume of water that will be carried from the watershed of this great mountain country, where its waters are gathered from the drainage of the high mountains of Utah, Wyoming, Colorado, a drainage area of 240,000 square miles, largely in the four upper basin States; these waters gathered from the drainage into this basin find their way to the channel of this mighty river (the Colorado), which starts at the headwaters of the Green River in the high mountain peaks of Wyoming, some as high as 29,000 feet, and carries its great volume of water and mud to the Gulf of California. The length of the river is given as 1,750 miles.

The dam to be erected at Black Canyon is to fill in the canyon a width of 350 feet at the low-water line and 880 feet wide at the crest and to impound not less than 20,000,000 acre-feet of water to serve the irrigation and domestic use in Imperial Valley, California, the irrigation in Nevada and Arizona, and also to care for a settlement of the demands of Mexico upon this river for irrigation and water usage.

ALLOCATION OF WATER

The hope of this legislation is to fix and to reserve to seven of the arid States of the basin of this river their respective right to a part of the annual flow for the future needs of each State, as its requirements for an equitable part of the water arises in the development of each State.

The survey would indicate that if the allocation heretofore made by the compact signed at Santa Fe, N. Mex., November 24, 1922, were now ratified by all seven States and approved by the terms of the bill recently signed by the President, that this is a decided step in equitable legislation for the protection of the water of each of the seven States.

The terms of the legislation, if finally ratified, mean that Arizona, Nevada, and California have already been allocated their part of the water, both individually and as to the amount that has been determined by the legislation, as going to the lower basin. In this determination it would appear that Congress was careful to apportion to each of the lower States a fair and just amount of water in proportion to their immediate and future needs and limiting California to an annual use of 4,400,000 acre-feet to include all uses, contracts to be made under the act passed and in pursuance of Article III of the Colorado River compact, plus not more than one-half of any excess or surplus waters unapportioned by said compact, and in such use to conform to the compact. It would appear very definitely and specifically that California is well bound by this legislation as to what her water rights are in the Colorado River after the water is impounded in the dam.

The bill provides further authority by which under the terms of Article III of the original compact Arizona and Nevada are directed to enter into a compact by which Nevada shall have 300,000 acre-feet of water and Arizona 2,800,000 acre-feet for exclusive, beneficial, and consumptive use in perpetuity annually. Arizona, like California, may annually use one-half of the excess or surplus waters unappropriated by the Colorado River compact. To this is added the exclusive beneficial and consumptive use of the Gila River and its tributaries within the boundaries of said State; also that the waters of the Gila River and its tributaries except return flow after same enters the Colorado River shall never be subject to any diminution that may be the result of a treaty or otherwise with the United States of Mexico, except as provided in Article III of the Colorado River compact; it shall be necessary to supply water to the United States of Mexico from waters over and above the surplus as defined by said compact; then the States of California and Arizona each shall mutually agree to supply out of the main stream of the Colorado one-half of any deficiency which must be supplied to Mexico by the lower basin.

This would appear to be a fair and equitable division of the water between the three lower basin States of Arizona, California, and Nevada, according to their needs and future uses. If the terms of the original compact are agreed to by all seven States, the three lower basin States have by the terms of the bill (H. R. 5773) as amended, settled forever the water question of Wyoming, Utah, Colorado, and New Mexico. Concerning the four upper basin States the division of water between the four States ought also to be promptly taken up by State legislation and settled now and not wait for future controversy and expensive litigation.

The executives of these respective States can employ their powers very beneficially in behalf of the people in each of the States by recommendations for the necessary authority, funds, and provisions that do not now exist in the law of each State and to see that such legislation is enacted.

The 7,500,000 acre-feet allocated by compact to the upper basin States should be apportioned equitably to meet the needs of each State along the line of beneficial use by proper division of said water as was contemplated in the original compact signed at Santa Fe, N. Mex., on November 24, 1922, pursuant to an act of Congress approved August 19, 1921. Arizona, California, and Utah still have to ratify said compact. In order to place the Boulder Dam act of Congress into operation there is required the approval of five of the States and California.

By ratifying the Colorado River compact California by legislative act shall have agreed irrevocably and unconditionally with the United States and for the benefit of the six other States of the basin not to apply to annual consumptive use within the State of California for any and all purposes more than 4,400,000 acre-feet of the water apportioned to the lower basin, plus one-half of any excess or surplus waters unappropriated by said compact, subject to the terms of the compact.

Provision is made for the construction of the main canal and appurtenant structures located entirely within the United States, connecting the Laguna Dam, or other suitable diversion dam, which the Secretary of the Interior is hereby authorized to construct if deemed necessary, after due and proper engineering and economic investigation, by contract with the Imperial and Coachella Valleys in California. The expenditures are to be reimbursable, as provided in the reclamation law, and shall not be paid from revenues derived from the sale of water power or electrical energy. This will throw the burden of cost of building the main canal, if built within the United States, upon the people of the Imperial and Coachella Valleys and clear up the indefiniteness of the original bill by fixing clearly this charge. If the all-American canal should be built, although there will be no charge for use, storage, or delivery of said water to the valleys, Imperial and Coachella must stand the cost. In other words, if the valleys do not provide the necessary security for building the all-American canal, the same will not be built, at least not by the law passed and approved December 21, 1928.

The provision that follows on page 23 of the amended bill contains an estimate of $165,000,000 made by the committee and accepted by Congress as the proper cost of the dam structure and incidental structures necessary for the development of electrical energy and the building of the main canal, which last part is to be reimbursable.

FLOOD-CONTROL PROVISION

Some of the important features of the bill are contained in paragraph (b) of section 2, page 24, of the amended bill; that is, that $25,000,000 of the $165,000,000 provided for in the bill for all purposes shall be allocated to flood control and shall be repaid the United States out of 62½ per cent of revenues, if any, in excess of the amount necessary to meet periodical payments during the period of amortization; that is, the Secretary, under paragraph (b) of section 4 of the act as passed, must make provision for revenue by contract adequate, in his judgment, to insure payment of all expenses of operation and maintenance of said works incurred by the United States, and the payments within 50 years from the date of the completion of the said works of all amounts advanced to the fund under subdivision (b) of section 2 for such works, together with interest thereon made reimbursable under this act.

THREE USES OF BOULDER DAM

The dam and reservoir shall have three uses: First, river regulation, improvement of navigation, and flood control, indicating that the first use is the primary one; second, for irrigation and domestic use and in satisfaction of present perfected rights in pursuance of article 8 of the Colorado River compact, which provides specifically that present perfected rights to the beneficial use of waters of the Colorado River system are unimpaired by this contract. Whenever storage capacity of 5,000,000 acre-feet shall have been provided on the main Colorado River within or for the benefit of the lower basin, then claims of such rights, if any, by appropriators or users of water in the lower basin against appropriators or users of water in the upper basin shall attach to and be satisfied from water that may be stored not in conflict with article 3.

All other rights to beneficial use of waters of the Colorado river system shall be satisfied solely from the water apportioned to that basin in which they are situated. The third use is for power.

RATIFICATION OF COLORADO RIVER COMPACT

The act to provide for the construction of works for the protection and development of the Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, known now as Public Law No. 642 (70th Cong.), permits a period of six months for the ratification by all of the seven States of the Colorado River compact. If the seven States—Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming—do ratify the compact, then the act as passed becomes operative as to all seven States. If seven States do not ratify the compact within the period of six months, then the approval of the compact by six States makes the terms of the legislation apply to the division of water and other regulations therein according to the terms of the original Colorado River compact, save and except as to Article XI, which required that each of the seven States approve the compact. A waiver as to the approval by the seven States is required from each of the six States approving. The acceptance of the terms of the legislation and the ratifying of the compact as prepared at Santa Fe, N. Mex., on November 24, 1922, now rests with Arizona and Utah. The Arizona representative signed the original draft of the articles of the 7-State compact when prepared, but its legislature failed to approve the same.

Arizona remained outside the compact and became active in filing upon all water rights available within the boundaries of her State, and that flowing into the State of Arizona, and applying same to beneficial use, including much water furnished from the watershed of her neighboring State, New Mexico. Also all available sites for power purposes were filed and located by Arizona. As to her activity in thus protecting her rights she can not be censured, except to this extent: That this great stream, produced by the watershed of the States, belongs to all seven arid States of the Colorado River Basin, and each is justly entitled to an equitable division and those that have acquired rights for beneficial use, as California and Arizona, are entitled to full and complete protection and the remaining rights should be equitably divided according to the terms of the legislation enacted. Utah, in my opinion, can not complain to any great extent as to the legislation enacted; the re-signing or approval of the compact as originally signed at Santa Fe, N. Mex., by that State insures its part of the water allocated to the upper basin.

The proper rule for the upper basin States to follow, if they desire their water rights fully protected for the future, is to approve and ratify the compact. Should Arizona fail to approve the compact the effort of each of the other six States should be in the interest of the entire seven States, so that the future rights to the water be not sacrificed by the question of a strict interpretation of the rule of priority, regardless of State lines.

The question of future controversy and litigation will be largely disposed of under the Colorado River compact and by the building of the Black Canyon Dam provided for in the legislation recently enacted. The high dam is necessary in order to impound the water needed for use in Arizona, California, and Nevada, and in order that the silt, which the river carries each year to the extent of about 100,000 acre-feet per year, will not in a few years fill the dam. This dam will no doubt remain with a sufficient supply of water for a century or more.

Under the alternates of the bill the Secretary of the Interior can construct the necessary plant and incidental structures suitable for the fullest economic development of electrical energy from the water discharged from said reservoir or he can cause to be constructed a complete plant.

CONSTRUCTION OF THE POWER PLANT

The question as to who shall build and equip the power plant rests with the Secretary of the Interior under section 6. The title to said dam, reservoir, plant, and incidental works shall forever remain in the United States and be controlled, managed, and operated by the United States, except as herein otherwise provided: That the Secretary of the Interior may, in his discretion, enter into contracts of lease of a unit or units of any Government plant, with right to generate electrical energy, or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy as herein provided, in either of which events the provisions of section 5 of this act, relating to revenues, term, renewals, determination of conflicting application, and joint use of transmission lines under contracts for the sale of electrical energy shall apply.

It is perfectly clear, then, in construing the provisions of sections 5 and 6 that the Government can permit the building of necessary structures for generating electrical energy to private corporations or individuals, of one or all units of any Government plant for that purpose, with the right to generate electrical energy, or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy. This, of course, would allow independent ownership of the structure by the corporation or company constructing the plant and the purchase of the water for the power purposes, subject to the provisions of section 5 of the law as to revenue, terms, renewals, determination of application, and joint use of transmission lines.

The only question to be clearly determined in the operation by the Government, then, is the building of the dam to store the required amount of water, the distribution of same, and the leasing of water to companies or individuals in generating hydroelectric power and to receive sufficient revenue for this water so used to repay the Government under the terms of the bill.

The charge to the ultimate consumer for electric power will depend entirely upon the corporations and individuals who operate the hydroelectric plant.

The House amendments, known as the Davenport amendments and incorporated in the bill passed by the House, were stricken from the bill as passed in the Senate and as finally approved; the amendments should have remained in the bill as a protection to the ultimate consumer of electricity. The Davenport amendments to H. R. 5773 were as follows:

The Secretary of the Interior in making any lease of said hydroelectric plant or contract for the sale of power therefrom, and/or any lease of water for the generation of electrical energy shall deal only with agencies or corporations which are delivering power directly to consumers.

Any lease of said hydroelectric plant, any contract for the sale of power therefrom, and/or any lease of water for the generation of electrical energy shall provide that the rate or rates at which power obtained under such contract or lease may be sold by the vendee or lessee shall be subject to the regulation or control of the Federal Power Commission or of the appropriate authority of any State or States in which such power is transmitted, distributed, sold, or used, according to the respective jurisdiction of said commissioner or of said State or States, as provided in section 19 or 20 of the Federal water power act; that such vendee or lessee shall not charge or present any claim or request to any commission or other authority to fix a rate or rates which yield in the aggregate an amount greater than required to reimburse the vendee or lessee for actual operation expenses and taxes and to yield a fair return upon the actual, legitimate cost as determined under the provisions of the Federal water power act of the works and property owned by the vendee or lessee and used or useful in the transmission and distribution of such power, and that the making of any such charge or the presentation of any such claim shall render void any such contract or lease.

The protection to the public who use the electrical power will, in my opinion, come from the person who is Secretary of the Interior during the period of construction, and especially in the making of the contracts for electrical power generated from the sale of water from the dam. Should the Secretary be a believer in the doctrine that the Government should not go into business, then the Government will not build or operate the structures for generating electric power.

I have always maintained the position that this was a great natural resource—the water and the power to be generated from the Colorado River. This power that will be used in the future among some of these States, municipalities, corporations, and individuals, and which have much to do with the development of the southwestern part of our country, belongs to the whole region included in these seven States of the Colorado River Basin, and no one in my opinion should fix the charges to be paid or control the same to the consumer except by direct authority of the Government. In other words, the Government should hold its protecting hand in the interest of the consuming public. Will this be the result of the legislation passed? I am of the belief that the development of power should remain directly under control of the Government and directly in the interest of the people and not be conveyed by long-term leases or passed by the sale of water for the purpose of generating power, as right then to control the price of electric power to the ultimate consumer will not be under Government control or supervision.

The State of New Mexico has the following provision in its State constitution:

The unappropriated water of every natural stream, perennial or torrential, within the State of New Mexico is hereby declared to belong to the public, and to be subject to appropriation for beneficial use in accordance with law of the State. Priority shall give the better right. (Art. XVI.)

This water that falls upon New Mexico's watershed is approximately 8 to 10 per cent of the entire water of the Colorado River. This is needed for the future development of the State, as 1,000,000 acres of land can eventually be irrigated from this amount. Protection is given to New Mexico in the final approval of either a six or seven State compact as provided under the terms of the act passed. This is the principal benefit that will accrue to New Mexico. The whole Southwest will have a wonderful development under the final working out of this legislation.

CONSTITUTION DAY ADDRESS

Mr. RAMSEYER. Mr. Speaker, on the 17th of last September I delivered the Constitution Day address before a joint meeting of the service clubs of Ottumwa, Iowa, and I ask unanimous consent to extend my remarks by inserting that address in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. RAMSEYER. Mr. Speaker, under leave to extend my remarks I submit for printing in the CONGRESSIONAL RECORD an address I delivered before a joint meeting of the service clubs of Ottumwa, Iowa, on the occasion of their annual observance of Constitution Day, September 17, 1928, as follows:

Mr. Chairman, ladies, and gentlemen, one hundred and forty-one years ago to-day the Constitution for the thirteen States then under the Articles of Confederation was agreed upon by the Constitutional Convention. The work of framing this Constitution continued during the hot summer months of 1787 in Philadelphia, and was completed on September 17 of that year. Fifty-five men constituted the convention.

The achievements of this convention should appeal to the young men and women of our country. Most of the members of this historic convention were comparatively young men. Six of the 55 were under 32 years of age. Forty-one were under 50 years of age. Three were over 60 years of age. George Washington, the president of the convention, was then 55 years of age. However, it is well to note, while speaking of the young men and their work in this convention, that it was due to the wisdom and experience of Benjamin Franklin, then 81 years of age, that finally induced the members of the convention to agree to any constitution.

The statement has often been made that the Constitutional Convention was made up of rich men and lawyers. There is no foundation for this statement. There were in the convention 16 lawyers, most of whom were eminent in their profession and were noted for their devotion to the country's welfare. In that day there were very few rich lawyers, and the lawyers who sat in this convention were not rich.

There was only one banker in the convention. That was Robert Morris. He bankrupted himself by financing the Revolutionary cause and he died penniless.

There were in the convention a few large landholders. George Mason was one of them. He refused to sign the Constitution although he was a close friend of Washington and opposed the ratification of the Constitution in the Virginia Ratification Convention because he thought the Constitution conferred too much power on the Federal Government.

The outstanding figure in the convention was Washington, a large landholder, who served throughout the Revolutionary period without pay. He was the most progressive farmer of Virginia. As President he declined to receive any salary, accepting only his actual expenses.

We are sometimes given the picture of this convention as being composed of able men formulating a scheme of government, guided by abstract ideals, meeting day after day, theorizing and arriving at this conclusion and that conclusion based on reason. These are not what guided the framers of the Constitution.

The framers of our Constitution were practical men and they had before them the work of solving a practical problem. The foundation of every action taken and every conclusion arrived at during the convention was human nature and human experience. The provisions in the Constitution were inserted because the framers had had actual experience with the principles of most of those provisions and had encountered actual evils from which they sought governmental remedies.

The framers of the Constitution builded on old foundations with skill, common sense, and a spirit of compromise in order to adapt old and tried principles of government to meet new conditions. Some of the provisions in the Constitution were taken verbatim from the constitutions of the States and from the Articles of Confederation. The Constitution signed 141 years ago to-day was mostly taken from the history and the experience of the American colonies and States. The framers knew from experience what worked well for the States; they knew from experience the shortcomings of the Articles of Confederation; they knew from experience and history that perfection was not attainable in government; and they knew from experience and history that a government to endure must derive its powers from the consent of the governed.

The preamble of the Constitution begins with: "We, the people of the United States, in order to form a more perfect Union." Then, in closing, the Constitution provides that to become effective it shall be ratified by conventions of nine States. Delegates to these conventions had to be elected by the people for the specific purpose of passing on the ratification of the Constitution agreed upon by the Philadelphia convention. The framers of the Constitution recognized the people as the source of governmental powers and they submitted the proposed Constitution to the people, not the State legislatures, for approval.

The people of the thirteen States, respectively, had adopted constitutions for the government of their States, each of which had its three departments—the executive, legislative, and judicial. This Constitution, agreed upon to form a more perfect union of these States, provided also for three departments—executive, legislative, and judicial—with the powers of each department clearly defined in the Constitution. These departments can only exercise such powers as are granted to them in the Constitution. In other words, the Federal Government is a Government of delegated powers.

The people of the States, in order to make a union possible, delegated certain powers to the Federal Government. To make it perfectly clear that the Federal Government, through these three departments, could only exercise the powers so delegated, they provided in Article X of the bill of rights that "The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people."

So we have here a union of States with all governmental powers in the possession of the people of the States, except the powers which the people, through the Constitution and subsequent amendments thereto, delegated to the Federal Government.

In one respect our form of government is different from any other in the world and that is in the power conferred upon our Supreme Court. Ours is the only court of any important country in the world that exercises the power to declare a law of the legislative department unconstitutional and void.

I have called to your attention that the Federal Government can only exercise the powers delegated to it by the people in the Constitution. All governmental powers not so delegated are reserved to the States, respectively, or to the people. When any State undertakes to exercise powers that have been delegated to the Federal Government it is infringing on the powers of the Federal Government. When the Federal Government undertakes to exercise governmental powers not delegated to it by the people of the several States, it is infringing upon the rights of the States and the people thereof.

The exercise of power by the States delegated to the Federal Government or the exercise of power by the Federal Government not delegated to it by the States or the people thereof would naturally lead to chaos, conflict, and warfare unless there were a tribunal to determine what powers have been delegated to the Federal Government and what powers have been reserved to the States. The framers of the Constitution knew that and established the Supreme Court to settle all such controversies. Many times in our history State legislatures have undertaken to legislate on matters over which the Federal Government has jurisdiction, and the Congress of the United States at times has undertaken to exercise the power of legislation over matters not delegated to the Federal Government in the Constitution.

Article VI, clause 2, of the Constitution provides: "This Constitution, and the laws of the United States which shall be made in pursuance thereof, and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land." Writers and speakers often refer to the Constitution as the supreme law of the land. That is incorrect.

The Constitution is the fundamental law. The Constitution, the laws of the United States made in pursuance of the Constitution, and the treaties made under the authority of the United States together constitute the supreme law of the land. That is, one is just as much law as the other. A law passed by Congress which conflicts with the Constitution is not a law made in pursuance of the Constitution, and, therefore, is not law. When the Supreme Court, in a case regularly before it, has presented to it the enforcement of a law made by Congress, which in fact is in conflict with the Constitution, that court has only one course it can logically pursue and that is to find that the law of Congress which conflicts with the Constitution is not law. In other words, such a law is declared to be unconstitutional and void.

Without the power reposed in the Supreme Court to declare laws of Congress and laws of State legislatures unconstitutional which conflict with the Constitution of the United States our scheme of government delegating certain powers to the Federal Government and reserving all other powers to the States, respectively, or to the people could not have endured. Without the power of the Supreme Court to declare unconstitutional laws, both Federal and State, enacted in violation of the Federal Constitution, either the Federal Government or the State governments would have been subdued, depending upon whether one or the other had the greater force to impose its or their will.

For the exercise of this power to declare laws of Congress and of State legislatures void when in its opinion such laws are in violation of the Constitution of the United States, our Supreme Court has been

at times severely criticized. Such a wave of criticism struck this country soon after the World War. I addressed myself to this criticism of the Supreme Court before one of your organizations four years ago. That wave of criticism blew over. Notwithstanding the recurring waves of criticism of the Supreme Court for exercising this power, there never has been and there is not now a persistent demand from the people that the Constitution be amended to take this power from the Supreme Court.

That the people have an abiding confidence in the Constitution and in the Supreme Court which has construed that instrument for 139 years is demonstrated by the way in which they have refused and still refuse to get excited by agitators to curtail the powers of the Supreme Court. The greatest security of our Government, however, is not in the Constitution. Our Government has been a success because of the stability, the character, and the intelligence of the people and because of the faith of the people in the Constitution and in every department of our Government, including the judiciary.

We are not an excitable people, easily swept off our feet. About 15 years ago there was a vigorous campaign on to empower the people to recall Supreme Court decision led by one of the most popular heroes the country ever had. That campaign did not survive the second sober thought of the American people. Six years ago there was proposed by one of the ablest political advocates of our time an amendment to the Constitution to give Congress the ultimate decision on the constitutionality of laws passed by it. That is, to give Congress the power to overrule a Supreme Court decision declaring a law of Congress unconstitutional.

Some newspapers and a considerable number of lawyers grew apprehensive that this new proposal would receive popular approval. The sober thought and the sound judgment of the people during all that agitation remained calm and composed.

At the time of this last agitation there were bills pending in Congress requiring the concurrence of seven of the nine members of the Supreme Court to declare a law of Congress unconstitutional instead of a majority of the court, which is now and always has been the practice. Bills of a similar purport have been introduced in one or both branches of Congress frequently. None were ever enacted into law. Under existing law six members of the court constitute a quorum, and a decision by a majority of the justices at a sitting of the court with a quorum present would undoubtedly be binding. However, it is both interesting and reassuring to know that there are very few sessions of the Supreme Court that are not attended by every member of the court, and only rarely is there a decision by that court rendered that is not participated in by all nine justices.

In defending the Supreme Court for the exercise of power conferred upon it by the Constitution I am not asserting that all the conclusions reached by that court are sound or that all its decisions are wise. Its membership is human. Since the foundation of the Government its membership has been composed of high-minded, intelligent, and patriotic men, worthy of the confidence that the people ungrudgingly have reposed and still repose in them.

According to a compilation which I made three years ago, the Congress, during a period of 136 years, had passed 19,750 public laws and resolutions and 30,310 private laws and resolutions, or a total of 50,060. During the same time the Supreme Court had decided over 30,000 cases. In all these decisions less than 50 laws of Congress were declared unconstitutional. Of this number only two laws were declared unconstitutional before the Civil War. During and since that war there has been a greater demand for social and economic legislation, and Congress, yielding sometimes to the demands of the majority and other times to the demands of well-organized and persistent minorities, has more frequently exceeded the power granted it under the Constitution.

Five of these laws undertook to confer powers on the Federal courts not authorized by the Constitution.

Seventeen of these laws undertook to regulate internal affairs of the States in violation of the Constitution.

Fifteen of these laws were in direct violation of fundamental and personal rights guaranteed by the Bill of Rights set forth in the first 10 amendments to the Constitution.

In 10 of these laws Congress undertook to exercise powers expressly prohibited by the Constitution.

Frequently the argument is made, in and out of Congress, in behalf of a bill whose constitutionality is questionable: Let Congress pass it and leave it to the Supreme Court to say whether the law is constitutional or not. Not infrequently have bills been vetoed because in the opinion of the President such bills were in violation of the Constitution. Vetoes on this ground have been criticized.

The criticism is usually based on the assumption that it is the duty of the judicial department and not of the executive department to pass on the constitutionality of laws of Congress. Every President, Senator, and Representative takes an oath that he will support and defend the Constitution of the United States. It is the duty of every Member of Congress to study every bill that comes before that body for action and to determine in his own mind whether such bill proposes legislation within the powers conferred upon Congress by the Constitution. If such Member, after careful study, arrives at the conclusion that the bill is unconstitutional, it is his clear duty under his oath to vote against it, notwithstanding that there may be a strong and persistent demand for the passage of legislation proposed in such bill. Likewise it is not only the right of the President, but the duty of the President, to veto a bill which, in his judgment, is in contravention of the Constitution. The oath to support and defend the Constitution taken by the President and Members of Congress is as solemn and binding upon them as is a like oath taken by members of the Supreme Court.

President or Congressman, who undertakes to exercise governmental powers not conferred upon him by the Constitution, takes that which does not belong to him but to the people. Such action constitutes an infringement on the rights of the people. Those who sincerely believe that the public welfare demands greater powers conferred upon the Federal Government should first seek to amend the Constitution.

Whenever the issue of the constitutionality of a law of Congress is raised in the Supreme Court the members of that court go on the assumption that that issue was carefully considered by Congress in passing the bill and by the President in signing the bill, that it was the deliberate judgment of both the Congress and the President that the law was constitutional; and being thus confronted by the judgment of the Congress and of the President in favor of the validity of the law, the members of that court will not declare the law of Congress unconstitutional until they are convinced beyond a reasonable doubt that it contravenes some provision or provisions of the Constitution.

Executives and legislators in passing upon the constitutionality of pending legislation should not do so with the purpose of narrowing the meaning of the Constitution by technical constructions but to broaden it to meet new and changed conditions and thereby keep it strengthened in the confidence of the people. The provisions of the Constitution were intended to give effect to the fine purposes of the founders of the Nation. Executives, legislators, and judges should construe these provisions liberally and broadly in order to promote the general welfare and should not thwart the noble purposes of the founders of the Nation by narrow or technical interpretations of the provisions of the Constitution.

In defending the Supreme Court in the exercise of its powers and in opposing constitutional amendments and legislation to curtail the powers of the Supreme Court, I do not wish to be understood as impugning the motives or the patriotism of the men who have in the past advocated such changes.

These changes have been advocated by thoughtful men in the name of progress, but to my mind their proposals appear extremely reactionary. In fact, I can not conceive of changes in our fundamental law that would place in jeopardy quite so much the sacred rights guaranteed by the Constitution to every inhabitant of the land, and that would be more destructive of our system of Federal and State Governments as the proposed changes I have discussed. The fact that the agitation for the proposed changes has ceased for a time is probably conclusive evidence that either the agitators themselves have become convinced that they are in the wrong or that the people are overwhelmingly against them.

The advocates of such proposals should not be denounced, but they should be taught history and given the reasons why the Constitution is as it is. No views, however radical, if presented in an orderly way are ever dangerous. If dangerous at all they are only dangerous until the light is turned on. Mr. Justice Holmes a few years ago wrote: "With effervescing opinions, as with the not yet forgotten champagnes, the quickest way to let them get flat is to let them get exposed to the air." In a judicial opinion this same justice has said: "The best test of truth is the power of thought to get itself accepted in the open market."

There is no use to get alarmed at radicals or radical views. Young radicals are a somewhat desirable portion of the community. They keep the community alive and without them the world would tend to stagnate. I think it is a good thing that young men start out in life more radical than their fathers.

To get their views accepted they will soon learn before they can make any headway that such views must be supported by facts and valid reasoning. Our Constitution guarantees the freedom of speech and of the press. The framers of the Constitution knew that the surest way to get rid of dangerous views was to bring them out in the open market where they could be seen and properly appraised by all.

We have good and intelligent people in this country who are concerned and alarmed because of the existence of forces threatening the life of the Republic. Is the life of the Republic threatened? Is there something in the form of our Government or in the character of the people back of the Government which is driving the Republic to destruction?

Life is a struggle. As to the individual, it applies to health, goods of subsistence, and to the moral and spiritual as well. We as individuals have to contend with forces both within and without to maintain our physical and also spiritual existence.

Likewise there are imperiling forces to our national existence both from within and without. Things worth while in life, whether individual or collective, can only be attained and retained by struggle.

When Cornwallis surrendered to Washington at Yorktown in 1781 the struggle for free and orderly government had only begun. Chaos not order reigned in the thirteen original Colonies. Two years later a treaty of peace was signed recognizing the independence of the Colonies. After six years more the fathers established a constitutional republic. The struggle then began to preserve and defend the Government thus established. That struggle has since continued with varying degrees of intensity and is still going on at this very hour.

The nation never did exist, does not exist now, and never will exist free from forces both within and without threatening its life. The life of a nation depends upon its life-preserving powers to resist destruction from within and upon its organized forces and powers to repel invasion from without. That has always been true, is true today, and will always be true as long as life is life and humans are human.

Is there anything in the form of our Government that would tend to breed discontent and disloyalty among the people? In the Declaration of Independence we recognize the principle as fundamental that governments are instituted among men, deriving their just powers from the consent of the governed, to secure to the people life, liberty, and the pursuit of happiness. If our Government is not so organized, it should be reorganized. The purposes for which our Government was organized are clearly set out in the preamble of the Constitution, which reads:

"We, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution for the United States of America."

The purposes for which governments are organized were never better or more sincerely expressed by the representatives of a free people. In the Constitution is an article outlining the procedure to amend the Constitution. So if the people desire to amend their Constitution, either by adding to or subtracting therefrom, the machinery for that purpose is provided for.

The written Constitution thus adopted for the government of our people has stood for 139 years without change except by amendments adopted in an orderly way as the Constitution specifically provides. No other Government in the world with a written constitution has stood for so long a time without violent change—a tribute both to the wisdom and foresight of the forefathers and to the stable character and intelligence of the American people.

Under our form of government all powers of government are in the people. These powers emanate from the people and go up and not from a central authority down. There is no grievance that the people have or may have that can not be remedied in an orderly way by the majority in the manner in which the people themselves have provided in their governmental machinery.

The theory of the whole framework of our Government, whether local, State, or National, is that the majority shall rule. However, one of the glories and safeguards of our form of government is that the individual has guaranteed certain rights of property, of trial by jury when accused, of freedom of speech and the press, of freedom of religion, and others that even a majority through the channels of legislation can not take away from him. These rights, it is true, might all be swept away by constitutional amendments which would receive the approval of three-fourths of the State legislatures. As long as the Constitution remains as it is in this respect the individual is safeguarded in these sacred rights.

As to the character and stability of our people I have already made reference in connection with their attitude toward agitation to curtail the powers of the Supreme Court.

Our Government is simplicity itself. There is no inherited power. Public officers are the servants of the people an serve during the will of the people. How easy to defend a system so simple and flexible against the arguments for a violent change. To assert that the American people, or a considerable number of them, can be induced to follow the preachers of revolution is a reflection on the stability, the character, and the intelligence of our people.

There is no governmental wrong that will not yield to the will of the majority, unless such wrong is inherent in the fundamental law where more than a majority is required to bring about a change. And that instrument, the Constitution, which is the fundamental law, has readily yielded to changes in response to a persistent and intelligent popular demand as is evidenced by the 19 amendments which have become a part of the Constitution and 4 of which were adopted within recent years.

The national security is not promoted by repressing those who advocate change, but in an analysis and consideration of the changes proposed and in remedying wrongs in our economic, social, and political structure where such wrongs exist, that will yield to legislation. The first amendment to the Constitution contains sacred guaranties to the people. Reason has never failed to prevail with our people.

Under our system of government it is easy for the majority to rule if they have the will to do so. There is nothing in our governmental system to prevent the majority from having their way. There is nothing in the character or habits of our people to prevent a majority rule.

Have faith in the Government and in the people by whom and for whose benefit the Government was established and on whose will its continuance depends, hold in subjection the forces of destruction from both within and without, and our Republic's security will be assured for all time. And remember that eternal vigilance is the price of liberty.

BILLS NOT SIGNED BY THE PRESIDENT

The SPEAKER laid before the House the following message from the President of the United States, which was read, and with the accompanying papers, referred to the Committee on the Judiciary and ordered printed:

To the Congress of the United States:

I am transmitting herewith for the information of the Congress a memorandum prepared in the office of the Attorney General regarding bills presented to the President less than 10 days before the adjournment of Congress and not signed by him.

CALVIN COOLIDGE.

THE WHITE HOUSE,
December 22, 1928.

Mr. LUCE. Mr. Speaker, I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LUCE. Will this communication respecting the standing of bills presented to the President less than 10 days before the adjournment of Congress and not signed by him be printed in the RECORD?

The SPEAKER. It will be printed as a document, and not in the RECORD.

Mr. LUCE. It strikes me, Mr. Speaker, that that is of such constitutional importance that a unanimous-consent request to print it in the RECORD is justified, and I make that request.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that the memorandum from the Attorney General's office be printed in the RECORD. Is there objection?

Mr. BANKHEAD. Mr. Speaker, reserving the right to object, how long is the document? It seemed to be a rather bulky one, as it appeared on the Clerk's desk.

The SPEAKER. There are 99 pages in it.

Mr. LUCE. Mr. Speaker, I withdraw the request.

PERRY VICTORY MEMORIAL COMMISSION

The SPEAKER also laid before the House the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on the Library and ordered printed:

To the Congress of the United States:

I transmit herewith for the information of the Congress the Ninth Annual Report of the Perry Victory Memorial Commission for the year ended December 1, 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 22, 1928.*

ELIZABETH MARY SMITH

Mr. MACGREGOR. Mr. Speaker, I present a privileged report from the Committee on Accounts, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 257

Resolved, That the Clerk of the House is hereby authorized and directed to pay, out of the contingent fund of the House, to Elizabeth Mary Smith, widow of John M. Smith, late an employee of the House, a sum equal to six months' compensation at the rate he was receiving at the time of his death, and in addition $250 to defray funeral expenses.

The SPEAKER. The question is on agreeing to the resolution.

Mr. GARNER of Texas. Mr. Speaker, Just one moment. I do not think the consideration of this resolution could be had if the spirit of the agreement of the majority leader, Mr. TILSON, as announced in yesterday's RECORD, is taken into consideration this morning. However, resolutions of this kind have been going through the House without debate for the last 6 or 7 or 8 years. Therefore, I am not going to insist that the spirit of the agreement referred to be kept in this particular.

Mr. TILSON. Mr. Speaker, I take a different view in respect to the spirit of that agreement. I think this is just the kind of thing that is always done by unanimous consent and that was contemplated in the agreement, and only this sort of thing.

Mr. GARNER of Texas. That is the reason that I am not objecting to this, but this is legislation.

Mr. TILSON. Oh, yes; but it is more or less routine legislation, and usually goes through by unanimous consent.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

ASSISTANT FLOOR MANAGER OF TELEPHONES

Mr. MACGREGOR. Mr. Speaker, I also present the following resolution, which I send to the desk.

The Clerk read as follows:

House Resolution 259

Resolved, That the Clerk of the House be, and he is hereby, authorized and directed to pay out of the contingent fund of the House compensation at the rate of $1,830 per annum, payable monthly, for the services of a temporary majority assistant floor manager of telephones to be appointed by the Doorkeeper of the House. The compensation and employment hereby authorized shall start from December 1, 1928, and terminate March 31, 1929.

Mr. MACGREGOR. Mr. Speaker, this is to continue the employment of a temporary man in place of Mr. Holt, who has been incapacitated.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

ADDITIONAL CLERICAL ASSISTANCE, COMMITTEE ON ACCOUNTS

Mr. MACGREGOR. Mr. Speaker, I also present the following resolution, which I send to the desk.

The Clerk read as follows:

House Resolution 276

Resolved, That the Clerk of the House is authorized to pay from the contingent fund of the House compensation at the rate of $200 per month for additional clerical assistance to the Committee on Accounts during the remainder of the session of the Seventieth Congress.

Mr. SNELL. Mr. Speaker, I think my colleague from New York should make some explanation in regard to this extra allowance. The Committee on Accounts is none too generous in giving the rest of us extra allowances for clerical hire.

Mr. MACGREGOR. Mr. Speaker, as most of you know, I am about to resign. The chairmanship of the Committee on Accounts is to be taken over by the ranking member, and he is not familiar with the details of the office. There are many details which are, of course, in the minds of the clerks that I have there now. The work that they have been doing is far in excess of that which has been done by my predecessors. My immediate predecessor had a man to whom I think he was paying $4,000 a year. The work of the Committee on Accounts has vastly increased since I became its chairman. We have taken over the work of the Committee on Mileage, and my present clerk is the manager of the restaurant, something never done before, so that the new chairman is going to have some job in getting in touch with the work of this committee. I have felt that this request is a reasonable request on his part, as a temporary proposition.

Mr. SNELL. I understand that he is to retain some one who is there at the present time, who is familiar with the work?

Mr. MACGREGOR. Yes.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

MINNIE F. M'KENZIE

Mr. MACGREGOR. Mr. Speaker, I present the following resolution, which I send to the desk.

The Clerk read as follows:

House Resolution 279

Resolved, That there shall be paid out of the contingent fund of the House to Minnie F. McKenzie, widow of John A. McKenzie, late an employee of the House, a sum equal to six months' salary and an additional sum not exceeding $250 to cover the funeral expenses and the expenses of his last illness.

Mr. UNDERHILL. Mr. Speaker, I think the provision in that resolution in respect to the expenses of his last illness is somewhat different from the usual form, and I move to strike those words out.

The SPEAKER. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. UNDERHILL: After the word "expenses," where it first occurs in the resolution, strike out the words "and the expenses of his last illness."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to, and the resolution as amended was agreed to.

RESIGNATION OF A MEMBER

The SPEAKER. The Chair lays before the House the following communication:

The Clerk read as follows:

Hon. NICHOLAS LONGWORTH,
Speaker of the House of Representatives,
Capitol, Washington, D. C.

MY DEAR SIR: I beg to inform you that I have transmitted to the Governor of the State of New York my resignation as a Representative in Congress from the forty-first congressional district of the State of New York, to take effect at the close of business on December 31, 1928.

Respectfully submitted.

CLARENCE MACGREGOR.

The SPEAKER. Ordered printed.

Mr. MACGREGOR. Mr. Speaker, I ask unanimous consent to proceed for one minute.

The SPEAKER. Is there objection to the request of the gentleman from New York? [After a pause.] The Chair hears none.

Mr. MACGREGOR. Mr. Speaker and my fellow Members [applause], I do not intend to make any so-called farewell speech. As most of you know, I have been chosen to another position in my State, a position which I have long cherished to fill, justice of the Supreme Court of the State of New York for the period of 14 years. [Applause.] I simply want to express to my fellow Members my thanks and my appreciation for their many kindnesses to me. It has been a wonderful experience here. The 10 years I have been a Member of this body have been years of pleasure and gratification, and I leave it, of course, with a great deal of regret, not only because of the great opportunities for work and constructive service that are ever present with Members of this House, but also because it severs at least a direct contact with the many friends I have made during my term of membership here. I leave you with regret, thank you for your kindnesses, wish you many, many merry Christmases and happy New Years. [Applause.]

Mr. UNDERHILL. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. UNDERHILL. My colleagues, I have been associated with Mr. MACGREGOR on the Committee on Accounts, of which he has been chairman for the past six years, ever since I have been a Member of Congress. I have learned not only to admire him because of his fairness, because of his conscientious endeavor to give justice to all, but because of his courage in consistently opposing raids upon the contingent fund, which has no protector except the chairman of the Committee on Accounts. He has given most generously of his time.

Perhaps some of you have forgotten that the chairman of the Committee on Accounts is one of the three Members appointed at the close of each session to serve as an ad interim committee during the recesses of Congress. That necessitates at least one Member's presence in Washington during most of the hot summer months. Mr. MACGREGOR has very generously taken over that duty, and the other two Members on that committee have been very seldom called upon to fill in during his absence. It is only one illustration of the sacrifices that he has made in his devotion to the country's service, and I am sure I voice the sentiments of the other Members of the House when I say that though we regret that he is to leave us we rejoice at his advancement in his profession. Our best wishes go with him not only for a merry Christmas and a happy, healthful, successful coming year, but for at least 14 more years, and then another 14 years of usefulness in his new position. [Applause.]

ADJOURNMENT OVER HOLIDAY RECESS

Mr. TILSON. Mr. Speaker, before we separate for the holiday recess I wish to express my sincere thanks to the entire membership of the House for the fine spirit of cooperation that has prevailed during the present session of Congress. And as we go, many of us to our homes, and all, as I hope, in the enjoyment of this little recess, I wish you all a very merry Christmas and a very happy New Year. [Applause.]

I move that the House do now adjourn.

The motion was agreed to.

Accordingly (at 12 o'clock and 30 minutes p. m.) the House adjourned, pursuant to a joint resolution previously passed, until Thursday, January 3, 1929, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

709. A letter from the Postmaster General, transmitting the facts in the claim of John T. Painter, postmaster at Greensburg,

Pa., for credit on account of loss sustained in the burglary of the post office on April 22, 1928, as set forth in the postmaster's claim, reports of the inspectors who investigated the matter, and a summary of the evidence by the solicitor for the department (H. Doc. No. 491); to the Committee on Claims and ordered to be printed.

710. A communication from the President of the United States, transmitting supplemental estimate of appropriation for the legislative establishment of the United States for the fiscal year ending June 30, 1929, for the expenses of the inaugural ceremonies of 1929, $45,000 (H. Doc. No. 492); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. MACGREGOR: Committee on Accounts. H. Res. 259. A resolution to provide for a temporary assistant majority floor manager of telephones (Rept. No. 1973). Ordered printed.

Mr. MACGREGOR: Committee on Accounts. H. Res. 276. A resolution to provide $200 per month for additional clerical assistance to the Committee on Accounts (Rept. No. 1974). Ordered printed.

Mr. WYANT: Committee on Interstate and Foreign Commerce. H. R. 14146. A bill granting the consent of Congress to the county of Allegheny, Pa., to construct a bridge across the Monongahela River, in the city of Pittsburgh, Allegheny County, Pa.; with amendment (Rept. No. 1975). Referred to the House Calendar.

Mr. PARKS: Committee on Interstate and Foreign Commerce. H. R. 14164. A bill granting the consent of Congress to the city of Knoxville, Tenn., to construct a bridge across the Tennessee River at Henley Street in Knoxville, Knox County, Tenn.; with amendment (Rept. No. 1976). Referred to the House Calendar.

Mr. WYANT: Committee on Interstate and Foreign Commerce. H. R. 14451. A bill granting the consent of Congress to the county of Allegheny, Pa., to construct a bridge across the Ohio River, between the city of Pittsburgh and the borough of McKees Rocks, State of Pennsylvania; with amendment (Rept. No. 1977). Referred to the House Calendar.

Mr. WYANT: Committee on Interstate and Foreign Commerce. H. R. 14469. A bill granting the consent of Congress to the county of Allegheny, Pa., to construct a bridge across the Youghiogheny River between the borough of Versailles and the village of Boston, in the township of Elizabeth, Allegheny County, Pa.; with amendment (Rept. No. 1978). Referred to the House Calendar.

Mr. DENISON: Committee on Interstate and Foreign Commerce. H. R. 14473. A bill granting the consent of Congress to the city of Aurora, State of Illinois, to construct, maintain, and operate a bridge across the Fox River within the city of Aurora, State of Illinois; with amendment (Rept. No. 1979). Referred to the House Calendar.

Mr. DENISON: Committee on Interstate and Foreign Commerce. H. R. 14474. A bill granting the consent of Congress to the city of Aurora, State of Illinois, to construct, maintain, and operate a bridge across the Fox River within the city of Aurora, State of Illinois; with amendment (Rept. No. 1980). Referred to the House Calendar.

Mr. JOHNSON of Indiana: Committee on Interstate and Foreign Commerce. H. R. 14481. A bill to authorize the construction of a bridge across the Grand Calumet River at East Chicago, Ind.; with amendment (Rept. No. 1981). Referred to the House Calendar.

Mr. COOPER of Ohio: Committee on Interstate and Foreign Commerce. H. R. 14802. A bill granting the consent of Congress to the Pittsburgh, Cincinnati, Chicago & St. Louis Railroad Co., for the maintenance and operation of a bridge across the Ohio River at Steubenville, Ohio; with amendment (Rept. No. 1982). Referred to the House Calendar.

Mr. PARKS. Committee on Interstate and Foreign Commerce. H. R. 14803. A bill to extend the time for completing the construction of the bridge across the Mississippi River at Natchez, Miss., three years from May 3, 1928; with amendment (Rept. No. 1983). Referred to the House Calendar.

Mr. COOPER of Ohio: Committee on Interstate and Foreign Commerce. H. R. 14919. A bill granting the consent of Congress to the commissioners of Mahoning County, Ohio, to construct a bridge across the Mahoning River at Cedar Street, Youngstown, Mahoning County, Ohio; with amendment (Rept. No. 1984). Referred to the House Calendar.

Mr. NEWTON: Committee on Interstate and Foreign Commerce. H. R. 14920. A bill granting the consent of Congress to the State of Wisconsin to construct, maintain, and operate a free highway bridge across the Rock River, at or near Center Avenue, Janesville, Rock County, Wis.; without amendment (Rept. No. 1985). Referred to the House Calendar.

Mr. RAYBURN: Committee on Interstate and Foreign Commerce. H. R. 15067. A bill authorizing the State of Louisiana and the State of Texas to construct, maintain, and operate a free highway bridge across the Sabine River where Louisiana Highway No. 21 meets Texas Highway No. 45; with amendment (Rept. No. 1986). Referred to the House Calendar.

Mr. DENISON: Committee on Interstate and Foreign Commerce. H. R. 15072. A bill granting the consent of Congress to the commissioners of the county of Cook, State of Illinois, to reconstruct the bridge across the Grand Calumet River at Burnham Avenue in said county and State; with amendment (Rept. No. 1987). Referred to the House Calendar.

Mr. DENISON: Committee on Interstate and Foreign Commerce. H. R. 15081. A bill to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near the city of Savanna, Ill.; with amendment (Rept. No. 1988). Referred to the House Calendar.

Mr. WYANT: Committee on Interstate and Foreign Commerce. H. R. 15084. A bill granting the consent of Congress to the county of Allegheny, Pa., to construct, maintain, and operate a bridge across the Ohio River between a point at or near Reedsdale Street in the north side and a point at or near Carson Street in the west end of the city of Pittsburgh, Allegheny County, Pa.; with amendment (Rept. No. 1989). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 15202. A bill granting the consent of Congress to the Danville & Western Railway Co. to rebuild and reconstruct and to maintain and operate the existing railroad bridge across the Dan River in Pittsylvania County, Va.; with amendment (Rept. No. 1990). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. MACGREGOR: Committee on Accounts. H. Res. 257. A resolution authorizing payment of six months' salary and funeral expenses to Elizabeth Mary Smith on account of the death of John M. Smith, late an employee of the House of Representatives (Rept. No. 1972). Ordered printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ASWELL: A bill (H. R. 15675) providing for the purchase and sale of cotton by net weight; to the Committee on Agriculture.

By Mr. HAWLEY: A bill (H. R. 15676) amendatory of the act of March 26, 1908 (35 Stat. L. p. 48), as amended by the act of December 11, 1919 (41 Stat. L. p. 366); to the Committee on the Public Lands.

By Mr. LEAVITT: A bill (H. R. 15677) to reserve certain lands on the public domain in Santa Fe County, N. Mex., for the use and benefit of the Indians of the San Ildefonso Pueblo; to the Committee on Indian Affairs.

By Mr. MILLER: A bill (H. R. 15678) to provide for the establishment of a rifle range in the vicinity of the navy yard, Puget Sound, Wash.; to the Committee on Naval Affairs.

By Mr. SMITH: A bill (H. R. 15679) amending an act to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof; to the Committee on the Civil Service.

By Mr. WELCH of California: A bill (H. R. 15680) to amend a section of the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof; to the Committee on the Civil Service.

By Mr. HALL of Illinois: Joint resolution (H. J. Res. 364) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALMON: A bill (H. R. 15681) granting a pension to Nicholas P. Broadway; to the Committee on Pensions.

By Mr. ANDREW: A bill (H. R. 15682) granting a pension to Anna M. Varnum; to the Committee on Invalid Pensions.

By Mr. AYRES: A bill (H. R. 15683) granting an increase of pension to Laura Myers; to the Committee on Invalid Pensions.

By Mr. BEERS: A bill (H. R. 15684) granting an increase of pension to Malinda Bollinger; to the Committee on Invalid Pensions.

By Mr. CANNON: A bill (H. R. 15685) granting a pension to Mary Love Roberts; to the Committee on Invalid Pensions.

By Mr. CRAIL: A bill (H. R. 15686) for the relief of E. O. McGillis; to the Committee on Military Affairs.

By Mr. DOUTRICH: A bill (H. R. 15687) granting an increase of pension to Bertha H. Lafner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15688) granting an increase of pension to Sarah L. Seltzer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15689) granting a pension to Maude Lingenfelter; to the Committee on Invalid Pensions.

By Mr. FREE: A bill (H. R. 15690) for the relief of Charles W. Byers; to the Committee on Claims.

By Mr. GARDNER of Indiana: A bill (H. R. 15691) granting a pension to Mary R. Gehlbach; to the Committee on Pensions.

Also, a bill (H. R. 15692) granting an increase of pension to Frances M. Roger; to the Committee on Invalid Pensions.

By Mr. GILBERT: A bill (H. R. 15693) granting a pension to Charles H. Phillips; to the Committee on Pensions.

By Mr. HARDY: A bill (H. R. 15694) granting an increase of pension to Effie M. Britton; to the Committee on Invalid Pensions.

By Mr. KENDALL: A bill (H. R. 15695) granting an increase of pension to Lavina Imhoff; to the Committee on Invalid Pensions.

By Mr. KETCHAM: A bill (H. R. 15696) granting a pension to Benjamin F. Gay, alias John Robinson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15697) granting a pension to Edith McCann; to the Committee on Invalid Pensions.

By Mr. KOPP: A bill (H. R. 15698) granting an increase of pension to Ella R. Crail; to the Committee on Invalid Pensions.

By Mr. KNUTSON: A bill (H. R. 15699) granting a pension to Frances N. Myers; to the Committee on Invalid Pensions.

By Mr. LEAVITT: A bill (H. R. 15700) for the relief of the heirs of William W. Head, deceased; to the Committee on the Public Lands.

By Mr. LEHLBACH: A bill (H. R. 15701) for the relief of Lieut. H. W. Taylor, United States Navy; to the Committee on Naval Affairs.

By Mr. MENGES: A bill (H. R. 15702) granting an increase of pension to Annie Bell; to the Committee on Invalid Pensions.

By Mr. MORIN: A bill (H. R. 15703) for the relief of Louis Vauthier and Francis Dohs; to the Committee on Military Affairs.

By Mr. MURPHY: A bill (H. R. 15704) granting an increase of pension to Harriet J. Davis; to the Committee on Invalid Pensions.

By Mr. NEIDRINGHAUS: A bill (H. R. 15705) granting a pension to Joshua A. Tate; to the Committee on Invalid Pensions.

By Mr. NELSON of Maine: A bill (H. R. 15706) granting an increase of pension to Laura A. Cram; to the Committee on Invalid Pensions.

By Mrs. ROGERS: A bill (H. R. 15707) authorizing payment of compensation to Annie Hiscock; to the Committee on World War Veterans' Legislation.

By Mr. SNELL: A bill (H. R. 15708) for the relief of Louis Shybilska; to the Committee on Naval Affairs.

By Mr. TAYLOR of Tennessee: A bill (H. R. 15709) granting a pension to Roxie Pope Baker; to the Committee on Invalid Pensions.

By Mr. WARE: A bill (H. R. 15710) granting a pension to Charley M. Ardleman; to the Committee on Pensions.

By Mr. WOOD: A bill (H. R. 15711) granting an increase of pension to Elizabeth J. Malone; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

8088. By Mr. EVANS of California: Petition of Lancaster Women's Club, for the ratification of the multilateral treaty; to the Committee on Foreign Affairs.

8089. Also, petition of Laura B. Jones and 38 others, protesting against the Lankford Sunday bill (H. R. 78); to the Committee on the District of Columbia.

8090. By Mr. HOOPER: Petition of Henry McDonald and eight other residents of Michigan, protesting against the enactment of compulsory Sunday observance legislation for the District of Columbia; to the Committee on the District of Columbia.

SENATE

THURSDAY, *January 3, 1929*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Father of life and God of the living, as the sweeping course of time has brought us to the dawn of another year, we bless Thee for the constant memories of what we are that rise up within us, for the hush of solemn thoughts, for the moments of insight when the veil on the face of all things falls away, and for the hours of high resolve which quicken the life within.

As in the changing seasons nature by Thy hand shakes off her olden vesture, only to be clothed upon with renewed splendor, so now by Thy Spirit enter our lives, rid us of all Thou canst not approve, and clothe us with the garments of love and service. Bless our Nation and all who are in authority, sanctify our homes and hallow our relationships, that we may be a people in whom joy and peace are set forth as glowing sacraments of Thy presence. Through Jesus Christ our Lord. Amen.

EARLE B. MAYFIELD, a Senator from the State of Texas, and PETER NORBECK, a Senator from the State of South Dakota, appeared in their seats to-day.

THE JOURNAL

The legislative clerk proceeded to read the Journal of the proceedings of Saturday, December 22, 1928, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

CREDENTIALS

The VICE PRESIDENT laid before the Senate the credentials of HIRAM W. JOHNSON, chosen a Senator from the State of California for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

EXECUTIVE DEPARTMENT,
STATE OF CALIFORNIA.

Know all men by these presents:

That it appears from the certificate duly executed by the secretary of state and filed in this office, and I, C. C. Young, Governor of the State of California, pursuant to the authority vested in me by law, do by these presents hereby certify that at the general election held on Tuesday, the 6th day of November, 1928, HIRAM W. JOHNSON was duly elected a Senator to represent the State of California in the Senate of the United States of America for a term of six years, as prescribed by law.

In witness whereof I have hereunto set my hand and caused to be affixed the great seal of the State at Sacramento this 18th day of December, 1928.

[SEAL.] C. C. YOUNG, *Governor.*

Attest:

FRANK C. JORDAN,
Secretary of State.

EXECUTIVE DEPARTMENT,
STATE OF CALIFORNIA.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 6th day of November, 1928, HIRAM W. JOHNSON was duly chosen by the qualified electors of the State of California a Senator from said State to represent said State in the Senate of the United States for the term of six years beginning on the 4th day of March, 1929.

In witness whereof I have hereunto set my hand and caused the great seal of the State to be affixed at Sacramento this 18th day of December, A. D. 1928.

[SEAL.] C. C. YOUNG, *Governor.*

Attest:

FRANK C. JORDAN,
Secretary of State.

The VICE PRESIDENT laid before the Senate the credentials of HUBERT D. STEPHENS, chosen a Senator from the State of Mississippi for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

JACKSON, MISS., *December 26, 1928.*

To the SECRETARY OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 6th day of November, 1928, HUBERT D. STEPHENS was duly chosen by the qualified electors of the State of Mississippi a Senator from said State to represent said State in

the Senate of the United States for the term of six years beginning on the 4th day of March, 1929.

Witness my signature and the great seal of the State of Mississippi this 26th day of December, 1928.

[SEAL.] WALKER WOOD,
Secretary of State.

The VICE PRESIDENT laid before the Senate the credentials of DAVID I. WALSH, chosen a Senator from the State of Massachusetts for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

THE COMMONWEALTH OF MASSACHUSETTS.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES, greeting:

This is to certify that on the 6th day of November, A. D. 1928, DAVID I. WALSH was duly chosen by the qualified voters of said Commonwealth a Senator, to represent said Commonwealth of Massachusetts in the Senate of the United States for the term of six years, commencing on the 4th day of March, A. D. 1929.

Witness, His Excellency Alvan T. Fuller, our governor, and our great seal, hereunto affixed, at Boston, this 5th day of December, A. D. 1928, and of the independence of the United States of America, the one hundred and fifty-third.

[SEAL.] ALVAN T. FULLER.

By his excellency the governor:

F. W. COOK,
Secretary of the Commonwealth.

The VICE PRESIDENT laid before the Senate the credentials of ARTHUR H. VANDENBERG, chosen a Senator from the State of Michigan for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

CERTIFICATE OF ELECTION

STATE OF MICHIGAN.

We, the undersigned, State canvassers, from an examination of the election returns received by the secretary of state, determine that, at the general election, held on the 6th day of November, 1928, ARTHUR H. VANDENBERG was duly elected United States Senator for the term ending March 4, 1935.

In witness whereof we have hereto subscribed our names at Lansing this 1st day of December, 1928.

JOHN S. HAGGERTY,
Secretary of State.
FRANK D. MCKAY,
State Treasurer.
WEBSTER H. PEARCE,
Superintendent of Public Instruction, Board of State Canvassers.

STATE OF MICHIGAN,
Department of State, ss:

I hereby certify that the foregoing copy of the certificate of determination of the board of State canvassers is a correct transcript of the original of such certificate of determination on file in this office.

In witness whereof I have hereto attached my signature and the great seal of the State, at Lansing, this 1st day of December, 1928.

[SEAL.] JOHN S. HAGGERTY,
Secretary of State.

Mr. JONES. Mr. President, I present the certificate of election of my colleague C. C. DILL, of Washington, and ask that it may be read.

The credentials were read and ordered to be placed on file, as follows:

CERTIFICATE OF ELECTION

UNITED STATES OF AMERICA,
THE STATE OF WASHINGTON.

This is to certify that at the general election held in the State of Washington on the 6th day of November, 1928, C. C. DILL received the highest number of votes cast for the office of United States Senator of said State of Washington, and was therefore duly elected to said office as appears from the official returns of said election duly transmitted to the Secretary of State of said State as duly canvassed and certified in the manner provided by law.

In witness whereof I have hereunto set my hand and caused the seal of the State of Washington to be affixed at Olympia this 10th day of December, A. D. 1928, and of our State the thirty-ninth year.

[SEAL.] ROLAND H. HARTLEY, *Governor.*

By the governor:

A. M. KITTO,
Assistant Secretary of State.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had approved and signed the following acts and joint resolution:

On December 22, 1928:

S. 3776. An act to authorize the Secretary of the Interior to issue patents for lands held under color of title; and

S. 4126. An act authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights reserved, and limited rights in land, and authorizing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances.

On December 31, 1928:

S. 4302. An act to authorize the Secretary of Commerce to convey the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., as a memorial to commemorate the Battle of Fort Fisher; and

S. J. Res. 167. Joint resolution limiting the operation of sections 198 and 203 of title 18 of the Code of Laws of the United States.

REPORT OF THE GOVERNOR OF PORTO RICO

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Territories and Insular Possessions:

To the Congress of the United States:

As required by section 12 of the act of Congress of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes," I transmit herewith, for the information of the Congress, the twenty-eighth annual report of the Governor of Porto Rico, including the reports of the heads of the several departments of the government of Porto Rico and that of the auditor, for the fiscal year ended June 30, 1928.

I recommend that the report of the Governor of Porto Rico, without appendices, be printed as a congressional document.

CALVIN COOLIDGE.

THE WHITE HOUSE, *January 3, 1929.*

CONTROL OF PREDATORY ANIMALS

The VICE PRESIDENT laid before the Senate a communication from the Secretary of Agriculture, transmitting, pursuant to law, a report on investigations made by the Department of Agriculture as to the feasibility of a 10-year cooperative program for the control of predatory animals within the United States, together with the estimated cost, which, with the accompanying report, was referred to the Committee on Agriculture and Forestry.

JOHN F. WHITE AND MARY L. WHITE

The VICE PRESIDENT laid before the Senate a communication from the Acting Secretary of the Interior, transmitting, pursuant to law, a report of an investigation of the claim of John F. White and Mary L. White, of Riverton, Wyo., for compensation for alleged damages and injuries to the property and persons of said claimants and their children sustained in an automobile accident in the Shoshone and Arapahoe Indian Reservation, which, with the accompanying report, was referred to the Committee on Indian Affairs.

USELESS PAPERS IN THE GENERAL ACCOUNTING OFFICE

The VICE PRESIDENT laid before the Senate a communication from the Comptroller General of the United States, transmitting, pursuant to law, a report of papers and documents on the files of the General Accounting Office which are not needed in the transaction of the public business and have no permanent value or historical interest, and asking for action looking toward their disposition, which, with the accompanying report, was referred to a Joint Select Committee on the Disposition of Useless Papers in the Executive Departments. The Vice President appointed Mr. JONES and Mr. OVERMAN as members of the committee on the part of the Senate.

GRAY ARTESIAN WELL CO.

The VICE PRESIDENT laid before the Senate a communication from the Comptroller General of the United States, transmitting, pursuant to law, a report and recommendation concerning the claim of the Gray Artesian Well Co. against the United States, which, with the accompanying report, was referred to the Committee on Claims.

SETTLEMENT OF SHIPPING BOARD CLAIMS

The VICE PRESIDENT laid before the Senate a communication from the vice chairman of the United States Shipping Board, transmitting, pursuant to law, a report of claims arbitrated or settled by agreement from October 16, 1927, to October 15, 1928, by the United States Shipping Board and/or the United States Shipping Board Merchant Fleet Corporation, which, with the accompanying report, was referred to the Committee on Commerce.

WASTE-PAPER SALES IN GOVERNMENT PRINTING OFFICE

The VICE PRESIDENT laid before the Senate a communication from the Public Printer, transmitting, pursuant to law,

a report on the disposition of useless papers in the Government Printing Office from February 16, 1928, to December 28, 1928, which was referred to the Committee on Printing.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate resolutions adopted by the Veterans of Foreign Wars of the United States at their national encampment, favoring the early completion of the quota of capital ships in the United States Navy, and urging that cruiser, aircraft carrier, and other auxiliary vessels, including naval personnel and equipment, be brought up to required strength and standing, which were ordered to lie on the table.

Mr. ROBINSON of Arkansas. I present petitions signed by several thousand employees of the St. Louis & San Francisco Railway Co., praying that the Congress enact legislation for the regulation of interstate commerce carried on by corporations and individuals engaged in transportation by buses. I move that the petitions be referred to the Committee on Interstate Commerce.

The motion was agreed to.

Mr. BORAH. Mr. President, I have a number of petitions and resolutions relative to the pending peace treaty, with a letter accompanying the petitions. I ask that the letter be printed in the RECORD and that the resolutions and petitions lie upon the table for future reference in case that may be desired.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter referred to is as follows:

NATIONAL COMMITTEE ON THE CAUSE AND CURE OF WAR,
New York City, December 28, 1928.

To the Hon. WILLIAM E. BORAH,
Chairman of the Committee on Foreign Relations,
and to the Senate of the United States.

SIRS: On behalf of the National Committee on the Cause and Cure of War, we, the undersigned, beg to present the following facts:

This committee, composed of 10 national women's organizations, including the largest and most generally distributed in our country, with some millions of members, has conducted an educational campaign on behalf of the Briand-Kellogg pact. The aim has been to carry to the people of our country knowledge of the purpose and intent of the treaty and to bring back to the United States Senate the evidence of public approval.

With this end in view, more than 10,000 meetings have been assembled, covering each of the 48 States. Fifty-one State and sectional conferences were held in 39 States, sponsored by the National Committee on the Cause and Cure of War and cooperated in by many organizations of men and of women not connected with the committee. Conventions of organizations unrelated to our own have devoted the whole or a part of a session to the treaty. Hundreds of the most eminent men and women of our country have addressed these meetings, which were not accompanied by spectacular features and in which opportunity was always given, in the true American spirit of free speech, for discussion, for questions, or for opposition.

In order to secure for the Senate evidence of the state of public opinion the following resolution was read, discussed, and put to vote at each meeting:

"Whereas the rising tide of public opinion throughout the world favors reason not force, arbitration not battles, as the means of settling disputes between nations; and

"Whereas out of correspondence and negotiations among the great powers, begun in January, 1928, has come a multilateral treaty, open to all nations, proscribing war as an instrument of national policy among the signatories and engaging them by solemn pledges to find peaceful methods of settling any dispute that may arise; and

"Whereas these negotiations have progressed so far that on August 27, 1928, at Paris, the treaty was duly signed by the representatives of 15 nations and now awaits ratification by each of these countries according to its custom, and all other nations have been invited to join in it; and

"Whereas we regard the treaty as one of the outstanding events of our century and welcome it as an indication that war may actually be abolished as an instrument of policy among civilized peoples: Be it

"*Resolved*, That we hereby pledge to this undertaking our earnest and active support, and urge the Senate of the United States, in response to public opinion, to ratify the treaty when presented."

The total number of resolutions thus adopted is at this date 10,057. The seven States having passed the largest number are—

Pennsylvania	1,156
Minnesota	932
Michigan	814
Colorado	654
New Jersey	561
Illinois	532
Iowa	509

These resolutions, signed by officials of the meeting and stating numbers present and numbers voting for and against, are on file at our headquarters, room 1015, Grand Central Terminal Building, New York City, and are at the disposal of the Senate when and if requested, each State being held for the examination of the Senators of that State. For the present purposes a list of the resolutions, with places and occasions when passed, is submitted for your convenience. The mere list of these resolutions weighs 1 pound and 9 ounces and the resolutions themselves, if placed end to end, would measure nearly 2 miles.

The reports are in singular agreement in their assurance that few persons have been found who oppose, doubt, or criticize the treaty, the general opinion favoring ratification without reservations.

We are convinced from our experience of the past six months that the women of this Nation are more united in their indorsement of this treaty than we have ever known them to be on any other question. Men have been more cautiously anxious to learn the opinion of party and business leaders, but with these doubts removed they have been as ardent in their support as women.

Therefore we petition your honorable body, on behalf of this enormous evidence of public interest, to grant an early ratification of the treaty, without reservations.

Yours sincerely,

CARRIE CHAPMAN CATT,
General Chairman.
JOSEPHINE SCHAIN,
Secretary.

Mr. FESS presented petitions numerously signed by sundry citizens in the State of Ohio, praying for the ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. FRAZIER presented petitions signed by over 1,908 citizens of the States of North and South Dakota, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. KENDRICK presented memorials numerously signed of the Cody Rod and Gun Club and sundry citizens of Ishawooa, Powell, Cody, Valley, Wapiti, Elk, Burlington, Greybull, Byron, and Emblem, all in the State of Wyoming, remonstrating against the passage of Senate bill 2571, to change the boundaries of the Yellowstone National Park by taking in the headwaters of the Yellowstone River, etc., which were referred to the Committee on Public Lands and Surveys.

Mr. SHORTRIDGE presented 6,994 petitions and letters and papers in the nature of petitions from sundry civic, educational, religious, and patriotic organizations and citizens, all in the State of California, praying for the ratification of the Kellogg multilateral treaty for the renunciation of war as an instrument of national policy, which were ordered to lie on the table.

Mr. BLAINE presented numerous petitions and papers in the nature of petitions of civic and religious organizations and sundry citizens in the State of Wisconsin, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

He also presented petitions and papers in the nature of petitions of the Woman's Foreign Missionary Society; sundry citizens; League of Women Voters; Connecticut Section, National Committee on the Cause and Cure of War; National Council of Jewish Women, all of Hartford; Men's Community Bible Class and sundry citizens of East Hartford and League of Women Voters of West Hartford; the Fairfield County League of Women Voters of South Norwalk; Business and Professional Women's Club; Council of Jewish Women of Norwalk and Association of University Women of Norwalk and Westport; Woman's Christian Temperance Union of Meriden; League of Women Voters of Meriden; League of Women Voters of Stamford and League of Women Voters of New Britain; faculty and students of Berkely Divinity School; Woman's Foreign Missionary Society; League of Women Voters; Young Women's Christian Association of New Haven; Young Women's Christian Association of Bridgeport; League of Women Voters of New London; League of Women Voters of Middletown; sundry citizens of Middletown and League of Women Voters of Windsor; Women Voters of Baltic; League of Women Voters of Stonington; League of Women Voters of Mystic; Riverside Women's Civics Club of Sound Beach; Salisbury League of Women Voters of Lakeville; League of Women Voters of North Branford; League of Women Voters of New Milford; League of Women Voters of South Manchester; Woman's Club of Suffield; League of Women Voters of Greenwich; League of Women Voters of Norwich and congregation of the Methodist Episcopal Church of Lakeville; American Legion Auxiliary, Department of Connecticut; Rau-Locke Post, No. 8, American Legion Auxiliary and American Legion of Hartford; American Legion Auxiliary, Naval Unit No. 110, and American Legion Auxiliary, No. 47, of New Haven; Delacour Post, No. 42, American Legion of Bridgeport; Post No. 45, American Legion of Meriden; Eddy-Glover Unit No. 6, American Legion Auxiliary, New Britain; American Legion of Middletown; Auxiliary Frank C. Godfrey Post, No. 12, American Legion of Norwalk; George Alfred Smith Post, No. 74, American Legion Auxiliary of Fairfield and Senger Post, No. 10, American Legion of Seymour, all in the State of Connecticut, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

CONSTRUCTION OF CRUISERS

Mr. VANDENBERG. Mr. President, I present a telegram, which I ask may be read at the desk.

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The telegram was read and ordered to lie on the table, as follows:

DETROIT, MICH., *December 18, 1928.*

Hon. ARTHUR H. VANDENBERG,
United States Senate, Washington, D. C.:

The allied veterans of three wars in Michigan join with us in urging your whole-hearted support of the replacement cruiser construction bill immediately. We want naval disarmament agreement ratio of 5–5–3 maintained without deviation. Europe having turned down America's offer for further naval reduction in armaments the past year, self-respect and the national defense command action.

Col. A. H. GANSSER,
President Michigan State Senate.

REPORT OF THE COMMITTEE ON MILITARY AFFAIRS

Mr. STECK, from the Committee on Military Affairs, to which was referred the bill (H. R. 10478) providing retirement for persons who hold licenses as navigators or engineers who have reached the age of 64 years and who have served 25 or more years on seagoing vessels of the Army Transport Service, reported it with amendments, submitted a report (No. 1377) thereon, and moved that it be referred to the Committee on Civil Service, which was agreed to.

ENROLLED BILL PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that on December 22, 1928, that committee presented to the President of the United States the enrolled bill (S. 4126) authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights reserved,

and limited rights in land, and authorizing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McKELLAR:

A bill (S. 5106) granting a pension to Jasper O. Craig;

A bill (S. 5107) granting a pension to Van Letsinger; and

A bill (S. 5108) granting an increase of pension to Robert N. Pitts; to the Committee on Pensions.

By Mr. FESS:

A bill (S. 5109) granting a pension to Ellen Tarbutton; to the Committee on Pensions.

By Mr. NYE:

A bill (S. 5110) validating certain applications for and entries of public lands, and for other purposes; to the Committee on Public Lands and Surveys.

A bill (S. 5111) to authorize the President of the United States to present in the name of Congress a medal of honor to Lieut. Carl Benjamin Eielson; to the Committee on Military Affairs.

By Mr. McMASTER:

A bill (S. 5112) providing for the examination and survey of the Missouri River from Sioux City, Iowa, to Chamberlain, S. Dak.; to the Committee on Commerce.

By Mr. SHORTRIDGE:

A bill (S. 5114) granting a pension to Stephen Sawyer; to the Committee on Pensions.

By Mr. GOFF:

A bill (S. 5115) granting an increase of pension to Lydia Ann Collins (with accompanying papers); to the Committee on Pensions.

By Mr. DILL:

A bill (S. 5116) granting a pension to Hamilton Miller;

A bill (S. 5117) granting a pension to George W. Smith; and

A bill (S. 5118) granting a pension to Mary R. Wood; to the Committee on Pensions.

By Mr. SMOOT:

A bill (S. 5119) to authorize the Secretary of War to grant to the city of Salt Lake, Utah, a portion of the Fort Douglas Military Reservation, Utah, for street purposes, and for other purposes; to the Committee on Military Affairs.

By Mr. BAYARD:

A bill (S. 5120) granting an increase of pension to Abigail J. Barton (with accompanying papers); to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 5121) to amend the act entitled "An act to authorize the Commissioners of the District of Columbia to close certain streets, roads, or highways in the District of Columbia rendered useless or unnecessary by reason of the opening, extension, widening, or straightening, in accordance with the highway plan of other streets, roads, or highways in the District of Columbia, and for other purposes," approved January 30, 1925; to the Committee on the District of Columbia.

A bill (S. 5122) granting a pension to Lucinda Cox (with accompanying papers);

A bill (S. 5123) granting an increase of pension to Nancy M. Montrose (with accompanying papers);

A bill (S. 5124) granting an increase of pension to Nancy J. Hopkins (with accompanying papers); and

A bill (S. 5125) granting an increase of pension to Cordelia Cummins (with accompanying papers); to the Committee on Pensions.

By Mr. THOMAS of Oklahoma:

A bill (S. 5126) for the relief of Gertrude Lustig; to the Committee on Claims.

A bill (S. 5127) to carry into effect the twelfth article of the treaty between the United States and the Loyal Shawnee Indians proclaimed October 14, 1868; to the Committee on Indian Affairs.

By Mr. FLETCHER:

A bill (S. 5128) granting a pension to Louise Koch; to the Committee on Pensions.

A bill (S. 5129) authorizing Thomas E. Brooks, of Camp Walton, Fla., and his associates and assigns, to construct, maintain, and operate a bridge across the mouth of Garniers Bayou, at a point where State Road No. 10, in the State of Florida, crosses the mouth of said Garniers Bayou, between Smack Point on the west and White Point on the east, in Okaloosa County, Fla.; to the Committee on Commerce.

By Mr. JONES:

A bill (S. 5130) granting a pension to Mary L. Tanner (with accompanying papers); and

A bill (S. 5131) extending the provisions of the pension laws relating to Indian war veterans to Capt. H. M. Hodgis's company, and for other purposes; to the Committee on Pensions.

By Mr. HALE:

A bill (S. 5134) granting a pension to Laura M. Leach (with accompanying papers); and

A bill (S. 5135) granting a pension to Marietta K. Johnson (with accompanying papers); to the Committee on Pensions.

By Mr. REED of Pennsylvania:

A bill (S. 5136) granting an increase of pension to Catherine Ramsey; to the Committee on Pensions.

By Mr. McNARY:

A bill (S. 5137) granting a pension to Victoria Van Duzer; to the Committee on Pensions.

A bill (S. 5138) to amend sections 4, 6, 8, 9, 10, 11, 12, 25, 26, 29, and 30 of the United States warehouse act, approved August 11, 1916; to the Committee on Agriculture and Forestry.

By Mr. ROBINSON of Indiana:

A bill (S. 5139) granting a pension to Della Coffman;

A bill (S. 5140) granting an increase of pension to Annie L. Herbert; and

A bill (S. 5141) granting an increase of pension to Annie E. Edwards; to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 5142) granting a pension to John R. Gilbert (with accompanying papers);

A bill (S. 5143) granting a pension to James C. Virdin; and

A bill (S. 5144) granting an increase of pension to Margaret E. Roseboom (with accompanying papers); to the Committee on Pensions.

By Mr. FRAZIER:

A bill (S. 5145) granting an increase of pension to Harriet A. Shea (with accompanying papers); to the Committee on Pensions.

(By request.) A bill (S. 5146) to reserve certain lands on the public domain in Santa Fe County, N. Mex., for the use and benefit of the Indians of the San Ildefonso Pueblo; and

(By request.) A bill (S. 5147) to reserve 920 acres on the public domain for the use and benefit of the Kanosh Band of Indians residing in the vicinity of Kanosh, Utah; to the Committee on Indian Affairs.

By Mr. BROOKHART:

A bill (S. 5149) for the relief of the widow of First Lieut. William C. Williams, jr., Air Service Reserve Corps, United States Army; to the Committee on Military Affairs.

A bill (S. 5150) granting a pension to Frances Lukens (with accompanying papers);

A bill (S. 5151) granting a pension to Otis H. Shurtliff; and

A bill (S. 5152) granting an increase of pension to Mary L. Hoffman (with accompanying paper); to the Committee on Pensions.

By Mr. CARAWAY:

A bill (S. 5153) for the relief of E. A. Ahrens; to the Committee on Claims.

By Mr. NORBECK:

A bill (S. 5155) granting a pension to Fredrik S. Ross (with accompanying papers);

A bill (S. 5156) granting a pension to John G. Brickel (with accompanying papers);

A bill (S. 5157) granting a pension to Flora Rotzler (with accompanying papers);

A bill (S. 5158) granting an increase of pension to Esther A. Colwell (with accompanying papers);

A bill (S. 5159) granting an increase of pension to Lena Lenning (with accompanying paper);

A bill (S. 5160) granting an increase of pension to Betsy Anderson (with accompanying papers);

A bill (S. 5161) granting an increase of pension to Etta Brown Linn (with accompanying papers);

A bill (S. 5162) granting an increase of pension to Fannie Bonk (with accompanying papers);

A bill (S. 5163) granting an increase of pension to William Nellis (with accompanying papers); and

A bill (S. 5164) granting an increase of pension to John Scott (with accompanying papers); to the Committee on Pensions.

By Mr. SHIPSTEAD:

A bill (S. 5165) to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near St. Paul and Minneapolis, in Ramsey and Hennepin Counties, Minn.; to the Committee on Commerce.

A bill (S. 5166) for the relief of the dependent relatives of Roswell Watson Gould; to the Committee on Military Affairs.

A bill (S. 5167) granting an annuity to Robert K. Brough; and

A bill (S. 5168) granting a pension to Otto S. Langum (with accompanying papers); to the Committee on Pensions.

By Mr. DALE:

A bill (S. 5169) granting an increase of pension to Cora A. Dunham (with accompanying papers); and

A bill (S. 5170) granting an increase of pension to Mary F. Cateract (with accompanying papers); to the Committee on Pensions.

By Mr. HAYDEN:

A bill (S. 5171) granting an increase of pension to William D. Wood; to the Committee on Pensions.

By Mr. HAWES:

A bill (S. 5172) granting a pension to Cordelia J. McKinney (with accompanying papers);

A bill (S. 5173) granting a pension to Frank Kramer (with accompanying papers);

A bill (S. 5174) granting a pension to Virginia Watkins (with accompanying papers);

A bill (S. 5175) granting a pension to Henry Thomas (with accompanying papers);

A bill (S. 5176) granting a pension to John Musgraves (with accompanying papers); and

A bill (S. 5177) granting a pension to Mike Zwitchy (with accompanying papers); to the Committee on Pensions.

By Mr. SHORTRIDGE:

A bill (S. 5178) to authorize the Secretary of the Treasury to donate to the city of Oakland, Calif., the U. S. Coast Guard cutter *Bear;* to the Committee on Commerce.

By Mr. JONES:

A bill (S. 5179) to improve the efficiency of the Lighthouse Service, and for other purposes; to the Committee on Commerce.

By Mr. FRAZIER (by request):

A bill (S. 5180) to authorize the payment of interest on certain funds held in trust by the United States for Indian tribes; to the Committee on Indian Affairs.

BRIDGE ON SOBOBA INDIAN RESERVATION, CALIF.

Mr. JOHNSON. Mr. President, I introduce a bill which I ask may be referred to the Committee on Indian Affairs, and, in connection with it, I ask that there may be printed in the RECORD a letter from Mr. Finney, the Acting Secretary of the Interior, in respect to it.

The bill (S. 5113) to authorize an appropriation to pay half the cost of a bridge on the Soboba Indian Reservation, Calif., was read twice by its title and referred to the Committee on Indian Affairs, and, there being no objection, the accompanying letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE INTERIOR,
December 28, 1928.

Hon. SCOTT LEAVITT,
Chairman Committee on Indian Affairs,
House of Representatives.

MY DEAR MR. LEAVITT: This will refer further to your letter of December 11, transmitting for report and recommendation a copy of H. R. 15092, to authorize an appropriation of $11,000 to pay half the cost of a bridge across the San Jacinto River. The title of the bill refers to the bridge as being on the Soboba Indian Reservation, in the State of California. This is erroneous, as the bridge is not on but near the reservation, as stated in line 6 of the bill.

The reservation comprises 4,450 acres, with 22 Indian homes, a subagency, and hospital. While, as above stated, the site of the bridge is not on the reservation, it affords the only convenient means of access thereto. The old bridge, a wooden structure, was destroyed by flood in the spring of 1927, and the reservation was entirely isolated for a few days, during which the river could not be safely forded. About 100 Indians live on the reservation, and at times half that number of hospital patients and employees.

It is estimated that a suitable bridge will cost about $22,000. While not on the reservation, yet, as the bridge is necessary from the standpoint of the Indians and governmental activities there, it would seem proper that the United States pay half the cost. It is, therefore, recommended that the bill be given favorable consideration.

Under date of December 20, 1928, the Director of the Budget advises that the proposed legislation would not be in conflict with the financial program of the President.

Very truly yours,

(Signed) E. C. FINNEY,
Acting Secretary.

THE "VESTRIS" DISASTER

Mr. JONES. Mr. President, in connection with the introduction of bills, I desire to ask to have printed in the RECORD, and also printed as a Senate document, the report of the commissioner who investigated the *Vestris* disaster. I hold his report in my hand. It is a very concise and complete report. While as a general rule I am not in favor of printing such reports in the RECORD and also as public documents, I think, owing to the widespread interest in this disaster, that this report should be printed in the RECORD, and, for the convenience of the Senate, it should also be printed as a Senate document. I therefore ask that that be done.

The VICE PRESIDENT. In the absence of objection, it is so ordered.

The report is as follows:

United States District Court, Southern District of New York, in the matter of an investigation into the causes and circumstances of the sinking of the S. S. *Vestris*

Report of United States Commissioner Francis A. O'Neill

REPORT OF THE COMMISSIONER—SCOPE AND PURPOSE OF INQUIRY

On November 15, 1928, there was filed with me by the United States attorney for this district an information relative to the sinking of the steamship *Vestris* on November 12. The information asked that there should be a rigid and impartial investigation in order to establish and perpetuate the facts while the witnesses were at hand, to determine the causes of the disaster, and to ascertain whether any law of the United States had been violated.

At the outset of the inquiry the British consul general in this city, on behalf of his Government, suggested that there be appointed nautical experts representing the British and American Governments, respectively, to sit with the court and advise on technical matters. This suggestion was immediately accepted. Thereupon, the British Government designated as its representative Capt. Henry McConkey, marine superintendent of the Cunard Line; and the American Government designated Capt. E. P. Jessop, formerly a captain in the United States Navy and marine superintendent of the Panama Canal, who had charge during the war of the repair of shipping in the port of Brest, France, and who was recommended by both the American and English Lloyds.

Thereafter both experts sat with the court continuously, and their reports have since been rendered.

The hearings were also continuously attended by counsel for the owners of the *Vestris,* who was given and who exercised the privilege of having called such witnesses as he desired and of having put to the witnesses such questions as he suggested. In addition, the court heard at length Capt. William H. Coombs, who stated that he managed a London organization representing 9,000 captains and officers in the English merchant marine.

The court sat almost continuously until December 6. There was taken, both orally and by affidavit, the testimony of a very large number of survivors and of other persons, including the marine superintendent of the Lamport & Holt Line, the inspector who conducted the annual inspection, and the head of the stevedoring firm who loaded the vessel. The officers of the ship were called and examined and given every opportunity to state what they knew or what they desired to say concerning the sinking of the *Vestris.* Such survivors as were not called would, as the United States attorney ascertained by inquiry out of court, have given mere cumulative evidence.

As a result of this cooperation the investigation was thorough and complete, the facts of the disaster have been clearly explained, public excitement has been allayed, and material is at hand to enable Congress and the Department of Commerce to bring constructive results from this unfortunate event. This report can not be concluded without officially noting the fine public service which this investigation has disclosed.

Passing details of the various decisions, in their nature not appearing in this record, involving professional and international courtesies, it is sufficient that the United States attorney, Charles H. Tuttle, has enjoyed the confidence and earned the lasting gratitude of the seagoing and general public by his scrupulous fairness, his thoroughness in the examination of witnessess and the marshalling of all material facts, and by his prompt initiation, entire conduct, and rapid conclusion of this important work.

Likewise, the voluntary contribution of the valuable time and services of the two nautical experts, Capt. Henry McConkey, marine superintendent of the Cunard Line for the British Government, and Capt. E. P. Jessop, of the United States Navy, retired, for the American Government, my advisers, has been beyond praise.

PRELIMINARY STATEMENT

On Saturday afternoon, November 10, at 4 o'clock, the *Vestris,* a passenger steamship of 17,000 tons displacement, 505 feet long and 61 feet of beam, built at Belfast, Ireland, in 1912, sailed for South America from the port of New York. Her clearance papers were issued

from the customhouse in the southern district of New York. She carried 129 passengers and 209 in the crew. She flew the British flag, and was owned by a British corporation, with an office in the southern district of New York. A few days previously she had received her annual inspection in this port by inspectors of the Steamboat Inspection Service; and the reports of the inspectors had been filed at the customhouse in the southern district of New York.

On Monday, November 12, at about 2.15 o'clock in the afternoon, she sank at a point nearly 300 miles east of Cape Henry. There survived about 77 per cent of the crew and about 46 per cent of the passengers. Twenty of the 27 women passengers and all of the 21 children were lost. Many of those lost were American citizens.

In response to an S O S signal sent from the *Vestris* on Monday morning at 9.58 o'clock a number of vessels arrived after nightfall at the position given by the *Vestris,* to wit, 37.35 north and 71.08 west. This position had been calculated by dead reckoning, and was about 37 miles west of her actual position. In consequence there was delay in locating the lifeboats, as is shown by the fact that the *American Shipper* reached the designated position at 7.30 o'clock Monday night, but located no survivors until after 4 o'clock Tuesday morning. The first survivors were found by the French tanker, the *Myriam,* at 4 o'clock Tuesday morning. Most of the survivors were brought to the port of New York and housed principally in the southern district of New York. A few survivors were carried by the American superdreadnought *Wyoming* to Norfolk, Va.

The *Vestris* carried 14 lifeboats, numbered consecutively from forward to aft. The odd numbers were on the starboard (right) side, and the even numbers on the port (left) side. The lifeboats on either side were capable of accommodating all the persons then on board. At about 11 o'clock Monday morning the captain ordered the port lifeboats Nos. 4 and 6 launched. The following is the history of each lifeboat at and after the sinking:

PORT LIFEBOATS

No. 2. Left on boat deck and sank with the ship.

No. 4. Lowered, but not completely launched. Filled principally with women and children and sank with the ship.

No. 6. Lowered, but not completely launched. Filled principally with women and children and sank with the ship.

No. 8. Lowered and launched. Filled principally with women and men passengers, also with children. In the process of lowering it from the boat deck a hole about 6 inches long was stove in it below the water line, to the knowledge of the officers in charge of lowering it. This hole was hastily and imperfectly covered with a piece of tin, nailed to the planking, and thereupon passengers and a few members of the crew to the number of over 50 persons were put in it. This lifeboat foundered about 30 minutes after being launched, and nearly all in it were drowned. The air-tight compartments broke up in the course of the night. It was sighted by the *Wyoming* almost wholly submerged, and four persons from about it were rescued.

No. 10. Launched and rescued by the *American Shipper.*

No. 12. Not launched; sank with the ship.

No. 14. Not launched; floated off empty from the deck and rescued by the *American Shipper.* Some of the crew swam to this empty lifeboat after the *Vestris* sank.

STARBOARD LIFEBOATS

No. 1. A motor boat. Launched with four persons in it, none of whom knew how to run the engine. Rescued by the *American Shipper.*

No. 3. Launched and rescued by the *American Shipper.*

No. 5. Launched and rescued by the *American Shipper.*

No. 7. Launched and rescued by the *American Shipper.*

No. 9. In launching one of the falls jammed, with the result that the boat plunged end first into the water and was broken.

No. 11. Launched and rescued by the *Myriam.*

No. 13. Not launched. Floated off the deck. Rescued by the *Berlin.*

The boats rescued by the *American Shipper* averaged about 25 occupants each.

A few persons were picked up alive from the water by the rescue fleet. Many dead bodies were sighted floating in life preservers and face down.

At the time of launching the lifeboats the sea was not rough and the sun was shining. During Sunday night the vessel had gradually acquired a list to starboard of 32 degrees, and at the time of sending out the S O S signal she was lying on her beam's end, in a sinking condition, with one of her three boilers out and the steam gradually failing in the other two. Shortly after the S O S signal the work of launching the lifeboats on the port side began. Nos. 4 and 6 were the first to be partly lowered and were filled with women and children. The process of lowering them occupied several hours, because the lifeboats caught on the sloping side of the *Vestris* and their weight when loaded strained their sides. The attempt to lower them was finally abandoned about one hour before the *Vestris* sank and they were left hanging, with their occupants, some feet above the water. No attempt was made to bring their occupants back to the deck of the vessel.

A principal contributing cause of the great loss of life was this unwise attempt to use the port boats first and for the passengers. Resort to the lifeboats was delayed until such an unjustifiably late hour on Monday that the list to starboard had become so great that any attempt to launch the port boats would inevitably be both very dangerous and very difficult. In fact, so difficult was it that several precious hours were consumed in this almost wholly unsuccessful attempt; and so dangereous was it that one of the boats was stove in, and, as several witnesses testified, other boats were strained as they scraped down the side of the *Vestris.* The port side, moreover, was the weather side, and even if Nos. 4 and 6 had ever reached the water they would have been in imminent danger of being dashed against the vessel's side. The danger and difficulty of this whole operation were also vastly increased by the action of the officers in loading the port lifeboats at or just under the promenade deck instead of using the rope ladders and in then attempting to send them, weighted nearly to capacity, down the sloping side of the *Vestris.* This attempt vastly increased the strain on the boats and tackle and vastly increased the friction between the boats and the vessel's side. The heavy list would tend to capsize the boats thus loaded before they reached the water and to open their seams. Moreover, the difficulty and danger of the whole proceeding were still further increased by the failure to place in any of the port boats an officer to take charge of them, as required by the elementary principles of seamanship. Instead, they were partly manned by colored members of the crew who, while willing enough, were not trained or experienced in the conduct of so delicate an operation or in the handling of a lifeboat when launched. The extreme unwisdom of the course and methods thus chosen is sufficiently demonstrated by the result, the disastrous character of which was practically inevitable and should have been foreseeable by any competent understanding of conditions as they were.

On the other hand, with the exception of No. 13, which was a "spare" boat not equipped for launching over the side, and with the further exception of No. 9 accidentally destroyed through the jamming of a fall, all the starboard boats were easily and speedily launched, without strain or injury, when the crew resorted to them after the attempt to launch the passengers from the port side had ended in catastrophe. The starboard side was the lee side. The sea was much calmer there; and the list of the vessel was such that the boats swung out readily, had but a short distance to drop, and by the use of ropes could easily have been drawn to the side of the *Vestris* and loaded from one of the decks. The very fact that, with the exception of No. 9, they all were successfully floated and preserved all their occupants (to wit, over 65 per cent of the crew), demonstrates the complete practicableness of resort to the starboard boats, and that many more lives would have been saved had these boats been resorted to first.

The argument that because of the great list of the vessel, the passengers could not safely have been brought down from the port to the starboard side, is without merit. The list would not have been so great, if so many precious hours had not been wasted in the disastrous attempt to use the port boats, and, in any event, a timely placing of ropes athwart ship would have enabled the passengers to have reached safely the starboard boats from the port side. No such ropes were strung.

While the launching of the boats was conducted without panic or signs of cowardice on the part either of the passengers or of the crew, there was an almost total absence of organization. The organization and assignments which were supposed to be in force were almost wholly abandoned, and no new organization was created. No general directions to prepare the lifeboats, the passengers, and the crew for leaving the vessel were given; no order to abandon the ship was issued; the passengers were not directed to put on life belts; the vessel was not made ready for the operation; the officers in charge of the respective lifeboats did not, in the great majority of instances, go to their respective stations or make any general attempt to distribute the passengers to their proper boats; the members of the crew did not (with few exceptions) enter the lifeboats according to the assignments existing when the vessel sailed; and the lifeboats when launched were not properly officered and manned.

This failure on the part of the personnel and the unwise methods pursued are the more extraordinary inasmuch as the approach of danger was gradual and apparent; and it left ample time to conduct an effective and properly organized operation.

The women and children were put in the lifeboats first, but, as above stated, adequate measures to secure their safety were not taken.

CONCLUSIONS AS TO THE CIRCUMSTANCES SURROUNDING THE SINKING

Inasmuch as the reports of the experts, Captain Jessop and Captain McConkey, are comprehensive, I shall not analyze in detail the causes and circumstanes of the sinking of the *Vestris.* My general findings and conclusions are as follows:

(1) The *Vestris* had the lowest limit of metacentric height for safety.

(2) The necessary data for computing her margin of stability are not on file in this country; and she put to sea without her margin of stability having been ascertained by or known to her owners or the Government inspectors.

(3) The vessel was not overloaded. Her cargo was not improperly stowed.

(4) Her lifeboats when she sailed from New York were in fair condition and were fairly well equipped. At the time of the annual inspection of the vessel in this port several weeks previously they were not tested for leakage by being placed in water or by being filled with water. As a matter of fact, all the boats which were launched leaked, the majority of them so badly that several occupants of each were bailing continuously until rescued. This leakage resulted in no loss of life. The disaster to lifeboat No. 8 was due to the hole stove in her during launching.

(5) The life preservers, while buoyant, did not comply with the general rules and regulations prescribed by the American Board of Supervising Inspectors or by the British Board of Trade. This subject I will elaborate later.

(6) In the official report of the inspector employed by the United States Government who conducted the annual inspection in the early part of last November he affirmed that "every lifeboat was lowered to water or to a wharf and lifted clear of the water or wharf with boat loaded to capacity." This affirmation was not true, and the inspector knew it was not true when he made it. No lifeboat was either so lowered or so raised. The explanation now attempted that lighters were alongside does not excuse either the misstatement or the failure to make the designated test.

(7) With the exceptions above stated there is no evidence that the annual inspection was not properly conducted.

(8) The storm which the *Vestris* encountered on Sunday, November 11, 1928, was severe, but its duration was short; and a vessel of her size ought to have passed through it readily if well found and seaworthy.

(9) Early Sunday morning the vessel began to acquire a permanent list to starboard. This list originated in the coming of water in large quantities into the stokehold through a badly leaking ash ejector and into the engine room from a lavatory scupper pipe. This list gradually but steadily increased until the vessel lost all stability and capsized.

(10) Late Sunday afternoon large quantities of water began to pour down the working alleyways from the companionways leading to the forward well deck. The wooden doors which protected these companionways were neither water-tight nor sufficiently strong. This water flowed down into the starboard bunkers.

(11) The half door on the starboard side did not become a serious contributing cause of the increasing list until the vessel had listed 11½ degrees. Such a list began to submerge the door; and, since the door was far from water-tight, water came in around its edges in a quantity and with a force beyond the power of the crew to stop it.

(12) The water from the half door and from the companionways flowed into the starboard bunkers through the hatches in the floor of the shelter deck. On the forward side of the athwartship alleyway leading from the starboard half door there is an opening into the adjoining bunker, which opening is only 4 feet from the half door. The opening begins within 11½ inches of the floor, runs to the ceiling, and is 3 feet wide. It was barred only by planks. The water flowed over this low sill into the bunker.

(13) As to the hatches in the floor of this athwartship alleyway the evidence is conflicting as to whether and when on Sunday they were covered, and whether, if covered, they were covered only with canvas or with wood. The weight of the evidence points to merely a canvas covering. But a definite finding on this subject is immaterial, since the water could easily penetrate the shelter-deck bunker through the large opening above mentioned. When once in that bunker the water would go downward into the lowest bunker.

(14) The shift in the cargo at 7.30 p. m. Sunday was too slight to be a factor contributing to the disaster.

(15) The chief engineer did not employ the full capacity of the pumps as promptly as he should have; nor does he seem to have taken adequate measures to assure that the pump suctions were clear.

(16) The orders given by the captain on Sunday afternoon and evening to pump out starboard bilge tanks 5, 2, and 4 seriously reduced the stability of the ship and tended to increase rather than to rectify the list.

(17) As the list increased, and ports on the starboard side became submerged, various ports leaked and became contributing factors.

(18) The vessel was supposed to be so constructed as to possess 10 water-tight compartments. No orders were given to close the water-tight doors in these compartments; and, apparently, they were not closed.

(19) Conditions were so desperate at 4 o'clock Monday morning that due regard for the safety of the passengers should have prompted a prudent master to send out the S O S at that hour. The delay for six hours caused the great loss of life. If the S O S had been sent out at 4 o'clock, vessels would have been standing by in a calm sea before the *Vestris* sank.

(20) Conditions were so desperate even as early as Sunday at midnight that prudence should then have dictated the course of locating other vessels by wireless, in order that a proper judgment as to when to request immediate assistance could have been formed. No such effort was made until about 9 o'clock Monday morning.

(21) As already stated, the whole operation of abandoning ship was delayed far too long and was inefficiently and improperly conducted.

(22) The decision to launch the port lifeboats first caused a loss of several precious hours and was a disastrous error.

(23) The messages sent to the captain by the chief engineer during Sunday and Monday morning that he was holding the water with the pumps were not in accord with the fact, patent to both, that the list was increasing.

(24) The crew seems to have been competent, if led, but they were not properly led.

(25) The act of the officers in putting women and children and male passengers into lifeboat No. 8 when the officers knew that it had a large hole in it below the water line, was inexcusable. Sound boats, more than sufficient for all, were available.

(26) The launching of the motor boat without anyone capable of operating the engine, defeated the whole purpose of having a motor boat among the lifeboats, and contributed to the loss of life.

(27) Prior to the sending out of the distress call on Monday, November 12, the *Vestris* had had no communication with the owners or with the *Voltaire,* or with any other vessel, concerning her condition.

(28) At the time of sending out the distress call the freighter *Montoso* was within several hours' steaming distance of the *Vestris.* The *Montoso* carried no wireless and was unaware of the danger to the *Vestris.*

(29) All vessels equipped with wireless and near enough to the *Vestris* to be of any practical assistance promptly responded to the distress call.

THE APPARENT IMMUNITY OF THE "VESTRIS" FROM THE EXISTING REGULATIONS FOR INSURING SAFETY AT SEA

As I have already stated, the inspector, Edward Keane, who conducted the annual inspection of the *Vestris* in the early part of November affirmed in his report of such an inspection that "every lifeboat was lowered to water or to a wharf, and lifted clear of water or wharf, with boat loaded to allowed capacity"—although he knew that neither such lowering nor such lifting had occurred at all. Section 4405 of the Revised Statutes of the United States authorizes the Board of Supervising Inspectors, with the approval of the Secretary of Commerce, to establish all necessary regulations required to carry out, in the most effective manner, the provisions of the laws of the United States for the inspection and regulation of steam vessels and their equipment, and further provides that such regulations, when approved by the Secretary of Commerce, "shall have the force of law."

Section 4488 of the Revised Statutes provides that "every steamer navigating the ocean" shall be provided with such numbers of lifeboats and life preservers as will best secure the safety of all persons aboard such vessel in case of disaster; and further that "every sea-going vessel carrying passengers, and every such vessel navigating any of the northern or northwestern lakes, shall have the lifeboats required by law provided with suitable boat-disengaging apparatus so arranged as to allow such boats to be safely launched while such vessels are under speed or otherwise and so as to allow such disengaging apparatus to be operated by one person, disengaging both ends of the boat simultaneously from the tackles by which it may be lowered to the water. And the Board of Supervising Inspectors shall fix and determine, by their rules and regulations, the character of lifeboats, floats, rafts, life preservers, line-carrying projectiles, and the means of propelling them." Pursuant to these statutes the Board of Supervising Inspectors adopted and there was in force at the time of the annual inspection of the *Vestris* the following requirements concerning the testing of lifeboats:

"Each boat shall be of sufficient strength to enable it to be safely lowered into the water when loaded with its full complement of persons and equipment.

"At every annual inspection of a passenger vessel every lifeboat shall be tested by lowering to the water, or when it can not be lowered to the water, to a wharf, and loaded to its allowed capacity, evenly distributed throughout its length. The boat shall then be lifted clear of the water or wharf to determine that the boat and falls are of sufficient strength. In making the above test of lifeboats the weight of each person shall average at least 140 pounds. When dead weight is used the weight shall be equivalent to at least 140 pounds for each person allowed." (Secs. 4405, 4488, R. S.)

As already stated, the report of Edward Keane falsely affirmed compliance with this regulation in his annual inspection of the lifeboats of the *Vestris*; but, when he was on the stand he placed before the court the following communication from the Department of Commerce dated May 1, 1913:

"Under date of April 12, 1913, file No. 57256. This bureau informs the supervising inspector of the second district, New York, N. Y., that the amendment to section 5, rule 3, of the General Rules and Regulations, which reads as follows: 'At every annual inspection of a vessel every lifeboat shall be tested by being lowered to the water or to a wharf, where a boat can not be lowered to the water, and lifted clear of the water or wharf, on block and falls, with the boat loaded with persons to the allotted capacity.' 'In making the test of lifeboats as required in this section the weight of a person is to be taken as 140 pounds' applies only to American vessels and not to foreign vessels."

Mr. Keane testified that this ruling had never been changed.

Similar testimony was given by Mr. John L. Crone, who is supervising inspector in the second district for the Steamboat Inspection Service, and

who stated that the foregoing requirements as to the annual inspection and testing of lifeboats on ocean steamships carrying passengers had been ruled by the Department of Commerce not to apply to foreign vessels leaving American ports.

Under these circumstances it is obvious that no inspector could be successfully prosecuted or otherwise held accountable for not thus testing lifeboats of foreign vessels in connection with their annual inspection, and in particular it is difficult to see how Mr. Keane could even be prosecuted for falsely stating that the test had been made when he knew that it had not. In other words, the lifeboats on the *Vestris* were immune from American requirements as to tests. So, also, they were immune so far as American inspection is concerned from testing in accordance with the very strict requirements of the British Board of Trade, for Mr. Crone testified that those requirements were held applicable only in the case of vessels going to English home ports. We have therefore the astonishing and disquieting fact that there is no legal requirement for the periodical testing of lifeboats on foreign vessels leaving American ports for ports other than a home port of the foreign country, and that any testing which may take place is, in consequence, purely voluntary and no adequate basis for holding the inspector to any definite accountability.

So likewise as to life preservers, section 4417 of the United States Revised Statutes provides concerning annual inspections in American ports of all ocean-going, steam passenger vessels:

"The local inspectors shall, once in every year, at least, carefully inspect the hull of each steam vessel within their respective districts, and shall satisfy themselves that every such vessel so submitted to their inspection is of a structure suitable for the service in which she is to be employed, has suitable accommodations for passengers and the crew, and is in a condition to warrant the belief that she may be used in navigation as a steamer, with safety to life, and that all the requirements of law in regard to fires, boats, pumps, hose, life preservers, floats, anchors, cables, and other things are faithfully complied with; and if they deem it expedient they may direct the vessel to be put in motion, and may adopt any other suitable means to test her sufficiency and that of her equipment."

Section 55 of the general rules and regulations prescribed by the Board of Supervising Inspectors, with the approval of the Secretary of Commerce, provides among other things:

"At each annual inspection of any vessel, and oftener if deemed necessary, it shall be the duty of the inspectors making the inspection to examine and inspect all life preservers in the equipment of such vessel and satisfy themselves (or himself) that such life preservers are in accordance with the requirements of the Board of Supervising Inspectors."

The same section also provides as to the character of the life preservers required, as follows:

"Every life preserver adjustable to the body of an adult person, manufactured after February 10, 1923, shall be of the reversible type, made of suitable material approved by the Board of Supervising Inspectors, with straps properly attached on each side of the body of the life preserver (thus making it reversible), with recesses under the arms, thereby allowing the front and back sections to fit around the upper part of the wearer, and held in place by the straps, and the upper part of the life preserver shall be made vestlike, the whole so constructed as to place the main buoyant body of the device underneath the shoulders and around the body in a manner that it will support the person wearing it in an upright or a slightly backward position."

This section in substantially this form has been in force since the middle of 1919.

Nevertheless the life preservers on the *Vestris* did not comply with these requirements in the following respects:

(1) They had no "recess under the arms, thereby allowing the front and back sections to fit around the upper part of the wearer."

(2) They were not "so constructed as to place the main buoyant body of the device underneath the shoulders and around the body in a manner that it will support the person wearing it in an upright or a slightly backward position."

On the contrary, all the life preservers on the *Vestris* were of the old-fashioned type consisting of plain slabs of cork which went around the waist, with the result that if the wearer became unconscious his face would tend to fall forward or backward into the water—thus accounting for the fact testified to by Captain Overstreet of the battleship *Wyoming* and other witnesses, that many persons were seen dead with their faces in the water, notwithstanding that they wore life preservers.

There is no evidence that the life preservers on the *Vestris* were manufactured prior to June, 1919, and examination of the sample received in evidence tends to show that they had not been manufactured so long ago.

Mr. John L. Crone, the supervising inspector of the second district of the United States Steamboat Inspection Service, testified that, precisely as in the case of the tests for lifeboats, the requirements for life preservers were not deemed to apply to foreign vessels leaving our ports; and that the requirements of the British Board of Trade concerning life preservers, which are even more effective and explicit than the American requirements in the matter of holding the head of an unconscious wearer out of the water, were not deemed applicable to foreign vessels unless they were going to a home port in a foreign country.

I can not but believe that some of the loss of life was due to the failure of these life preservers to comply with the essential and important purpose of both the American and British requirements that the head of an unconscious wearer should be kept above the water.

I also, and with great deference, can not agree with the thought that under the statutes of the United States the foregoing American requirements both as to lifeboats and life preservers are not applicable to foreign vessels not proceeding to a home port in a foreign country. On the contrary, an examination of sections 4400, 4417, and 4488 shows that by express declaration the provisions thereof are applicable to "all foreign private steam vessels carrying passengers from any port of the United States to any other place or country."

Furthermore, section 4400 expressly provides that "all" such vessels "shall be liable to visitation and inspection by the proper officer in any port of the United States respecting any of the provisions of the sections aforesaid"—including the said sections relative to life preservers and lifeboats.

The only exception allowed by the statute is in case of foreign passenger steamers belonging to countries with inspection laws approximating those of the United States and having unexpired certificates of inspection issued by the proper authorities in the respective countries to which they belong. In the case of such excepted vessels the law provides that they shall be subject "to no other inspection than to satisfy the local inspectors that the condition of the vessel, of boilers, and life-saving equipment are stated in the current certificate of inspection."

The *Vestris* was not such an excepted vessel, and she did not hold a current certificate of inspection from the inspecting authorities in Great Britain. Under the circumstances I am of the opinion that the *Vestris* and the multitude of other foreign vessels here leaving our ports for ports other than their home ports are not immune from the American requirements as to life preservers and lifeboats, and that the supposition and practice which extends to them such immunity are without authority of law, dangerous to life, and unfair to American seagoing vessels.

The unfortunate character of the present situation can be well illustrated by the following extracts from the testimony of Mr. Crone:

"Q. Mr. Crone, you do not mean to say that there has been any judicial interpretation that these requirements of law concerning life preservers are not applicable to foreign ships, do you?—A. I do not believe that I get that.

"Q. (Question repeated.)—A. Not that I know of.

"Q. Do you say that there is some express ruling made by the Secretary of Commerce that these requirements of law as to life preservers, as embodied in these regulations do not apply to foreign ships sailing from this port and having their annual inspection here?—A. Not by the Secretary of Commerce.

"Q. Not by the Secretary of Commerce. Well, then, isn't this the truth, simply: That the practice of this port has been not to enforce those regulations as regards foreign ships?—A. Now you are referring to the rules and regulations of the Board of Supervising Inspectors?

"Q. Yes.—A. Quite true, and I think it is universal throughout the country.

"Q. What I am trying to get at is because it is very important in this inquiry to determine, what is the legal authority on which that practice rests? Does it rest on anything? You have admitted it does not rest on anything in the statute and you have admitted it does not rest on any regulations or rule adopted by the Department of Commerce. I am interested therefore in finding what, in view of this disaster, it does rest on.—A. I think we have circular letters from the bureau in Washington advising us in particular what is applicable to the equipment on foreign ships." (P. 1276.)

"Q. Is there any regulation of your department which requires you to see that a foreign ship conforms with the regulations of their own countries?—A. Yes. In the case of countries which have reciprocal relations with the United States, and whose inspections of vessels and equipment are approximately the same as the United States—I would not say the same—are equally as good—we see that they have the equipment on board which is required by their home government certificate, a certificate issued, we will say, in the case of an English ship, issued by the board of trade, and where the duty is then to see that the ships have the equipment which that certificate calls for, and that it is in good condition.

"Q. Did you do that in the case of the *Vestris*?—A. The *Vestris* is not inspected under treaty for the reason she does not go home to a British port for her home government inspection." (P. 290.)

"Q. That suggested another thought to me, Mr. Crone. The *Vestris* was not held to British requirements because it did not go to a British port; that is right, isn't it?—A. Yes.

"Q. And didn't I understand you to say according to the practice throughout the country, these general rules and regulations prescribed by

the Board of Supervising Inspectors of April 10, 1928, did not apply to ships flying foreign flags?—A. Generally the rules of the Board of Supervising Inspectors do not apply to foreign ships." (P. 1291.)

This practice, thus admitted to be common in the ports of our country, I regard as contrary to public policy and to the plain letter of the statutes of the United Sates. Every ocean-going vessel bearing passengers from our ports should be made to comply with our American requirements as to life preservers and lifeboats, except in a case where—as provided in section 4400 of the Revised Statutes—the foreign vessel carries a current certificate of inspection issued by a foreign government having inspection requirements approximating those of the United States. Such a current foreign certificate the *Vestris* did not have.

Note must also be taken of the testimony of the supervising inspector in this port that many ocean-going American vessels are, like the *Vestris*, continuing to carry the old-style type of life preserver on the theory that the requirements in force since 1919 do not apply to life preservers previously bought. It would seem that the lapse of nearly 10 years since the present requirements came into force was more than ample time within which to secure life preservers in accordance with the requirements adopted in that year. The new requirements are obviously better calculated to protect life, and that consideration should now outweigh the comparatively small cost of installing life-saving equipment in accordance with the present law. The existing practice of passing these old life preservers opens the door wide to evasion of the requirements in force since 1919; and it countenances the use of apparatus which, if it is actually as old as claimed, has nearly or wholly outrun the period of its serviceable life.

RECOMMENDATIONS

The chief usefulness of this investigation lies in the constructive results which may be drawn from the lessons of the disaster as now disclosed. Accordingly, as such constructive results, I recommend the following:

(1) The present practice whereby foreign steam vessels carrying passengers from our ports to ports other than home ports of the country to which they belong, are treated as immune from the requirements of law as to lifeboats and life preservers, should be abolished. It is plainly contrary to public policy and common sense that the *Vestris* should not have been fully under our regulations because she carried a British flag, and was not examined under the British Board of Trade rules because she did not touch at British ports. Such a practice invites disaster.

(2) All vessels subject to our requirements of law as to life preservers should be required immediately to procure life preservers in accordance with the requirements in force since 1919, the purpose of which requirements is to insure a design which will keep an exhausted person's head above water. The present practice of passing life preservers not in accordance with those requirements on the plea that they were purchased prior to 1919 opens the door to subterfuge and, as shown by the experience of the *Vestris*, endangers life.

(3) The Steamboat Inspection Service should inaugurate a method of testing lifeboats for watertightness in cases where due to the loading of the vessel or for other reasons, the lifeboats can not be lowered into the water.

(4) All ocean-going steamers and motor ships, both freighters and passenger carriers, should be required to install wireless with competent wireless operators capable of maintaining continuous watch. Had such requirements been in force, the *Montoso* could have been along side of the *Vestris* long before the latter sank.

(5) Regulations should be made requiring that all sea connections and piping thereto be located where they may be capable of inspection at sea, and repaired.

(6) Regulations should be made requiring owners to furnish full and accurate stability data for all vessels using United States ports as bases for passenger traffic; and these data be kept up to date. Without such data clearance papers should not be issued.

(7) The law governing limitation of liability in case of marine disaster should be amended so that owners may not have the benefit of such limitation where they have not taken reasonable means to examine and determine the competency of the principal officers of the vessel.

(8) The agencies both here and abroad under whose authority examinations of officers and the issuing of licenses to such officers come, should study their method of examination for licenses for the purpose of injecting into those examinations larger means of determining the executive ability of the applicant.

(9) Present life-saving apparatus should be supplemented by requirements for rafts of approved construction.

(10) With the aid of competent technical advisers investigation should be conducted into improved designs of lifeboats, improved devices for launching lifeboats, and improved designs for life preservers and other buoyant material.

(11) There should be created in the Steamboat Inspection Service a technical staff empowered to pass upon the design of all commercial vessels, with respect particularly to construction materials, stability, bulkheads, pumps, and other factors making for stability and buoyancy.

(12) The rules and practice should be so changed as to require the thorough inspection of all openings in the shell plating of the ship, such as cargo ports, coal ports, scuppers, and discharge pipes of all kinds.

(13) A full study should be made, either by Congress or the approaching international conference on safety of life at sea, of the ancient rules of admiralty law as to salvage and limitation of liability on the part of the owners. These rules came into being before the construction of modern rapidly moving ships, and before the wireless enabled vessels at sea to communicate instantly with each other and with the owners on shore. Obviously, the amount of salvage which can be claimed by a rescuing ship may cause the captain of the vessel in distress to delay too long the sending of an appeal for help. So, likewise, the ancient fiction of law whereby the ship itself is treated as solely responsible for any disaster which overtakes it, is, under modern conditions of travel, grossly unjust to passengers and their dependents; and it puts a premium on slackness and penuriousness on the part of owners in keeping vessels in seaworthy condition and equipped with all modern, scientific devices for insuring stability, buoyancy, and safety.

(14) At the same time a full study should be made of the possibility of more humane legislation for the protection of the seamen in the crew. The principle of compulsory workmen's compensation in hazardous employments has become embodied in the statutes of many States. The members of the crew of a seagoing vessel are certainly engaged in a hazardous employment; and, since because of lack of official position, they have no control over the management of the vessel, they are exposed to the hazards not only of the sea but also of the ability of their officers. In the event of disaster, they and their families have at present no effective redress or compensation whatever.

I request the United States attorney to cause this report, the reports of the two captains, and the testimony taken in the case to be forwarded to the chairmen of the respective committees of the Senate and the House of Representatives of the United States having jurisdiction over the framing of applicable legislation.

Dated, New York, December 19, 1928.

FRANCIS A. O'NEILL,
United States Commissioner.

Mr. FLETCHER. Mr. President, in connection with the *Vestris* disaster, I have a communication from Capt. Earl P. Jessop, United States Navy, retired, who sat at the hearing, which I ask to have printed in the RECORD following the matter printed on the request of the Senator from Washington. The communication from Captain Jessop has some very valuable thoughts and suggestions.

The VICE PRESIDENT. Without objection, it is so ordered. The matter referred to is as follows:

NEW YORK CITY, *December 13, 1928.*

Senator DUNCAN U. FLETCHER, of Florida,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In thinking over the recent investigation of the *Vestris* the items which I believe should be made the subject of regulatory action would seem to cover the following:

1. The vessel sailed from the port of New York with several non-water-tight hatches in decks where the hatches should have been watertight, and it was these hatches which caused the sinking.

2. She sailed from New York with a thoroughly incompetent set of officers, and while I believe the fact that it will be very difficult to lay down a set of rules for determining the competency of officers, yet I do believe that in a case as striking as this one, where there is left no shadow of a doubt that the officers were thoroughly incompetent, that in such a case the company should be loaded with a liability therefor. Just how that can be brought about I am not clear on.

3. The condition of the vessel as to stability, metacentric height, etc., was not known by anyone when the vessel sailed.

This vessel was built in England in 1912, and at that time she was given what we call an inclining experiment and her metacentric height was obtained and stability curves laid out for her. Between 1914 and 1918, 1,700 tons of refrigerating machinery and insulation piping, etc., were installed in the ship, and at that time she should have been reinclined and a new set of stability curves developed.

If the statement of the owners to the court is to be believed, no such calculations were made, so that no one knew whether this vessel had sufficient stability to make her reasonably safe or not.

I was informed yesterday of what I consider a very great discrepancy in our laws. I was informed that even though our Steamboat Inspection Service were to find a foreign vessel unseaworthy on inspection it is very questionable whether the customhouse could refuse clearance papers to her. That certainly is a point which should be looked into.

There are many other points with regard to our methods of inspecting and clearing vessels which will bear investigation.

I do not think such an investigation can be properly made without the inclusion in any body, which is designated to make the investigation, of technical men to cover all sides of the subject. I think there

should be on any such commission at least one representative of the American Bureau of Shipping, one naval constructor, one admiralty lawyer, one or two master mariners, representatives of shipowners and operators carefully chosen from those who have a national reputation of competence, one marine engineer, and sufficient assistance to make the work effective.

It would be impossible for a committee of Congress, without the assistance of some such commission, to effectively take care of such a subject, because there is a tremendous amount of technique and experience necessary to prevent the passing of laws which will still further load down our merchant marine without accomplishing any real good.

As you know, it is comparatively easy to pass laws but very difficult to have them abrogated if they are wrong or do not work, so that this subject should be approached with great care to prevent that happening.

You will excuse, I am sure, my writing to you on this subject, but, having just been through the terrible experience of finding out that ships could be sent to sea so ill prepared as this vessel was, I feel rather strongly on the subject.

Very truly yours,

E. P. JESSOP.

NEW YORK CITY, *December 24, 1928.*

Senator DUNCAN U. FLETCHER,

United States Senate, Washington, D. C.

DEAR SENATOR FLETCHER: I am in receipt of your letter of December 20, asking me if I would object to your inserting my letter of the 13th in the CONGRESSIONAL RECORD.

I would be very glad to have you do that. I would like also to add the following to what I said in that letter:

At the present time there is so little requirement with regard to basic education which merchant marine officers have to show in examination that I believe the following should be considered.

We have in this country several very excellent nautical schools which are maintained partly by the States in which they are located and partly by the United States Government. These schools are each one superintended by a retired naval officer and they cover in their curriculum subjects with regard to stability of ships, loading of ships, and all sorts of knowledge which is most important for the masters or for the chief officers to have. Such a school forces study, and since it is competitive, alertness of mind, inculcates discipline, initiative, and executive ability, all of which are so necessary when an emergency arises. They also train the officers in the handling of lifeboat equipment to a much greater extent than is done elsewhere in the merchant service.

To-day men with a diploma from these school ships are not given any special recognition which places them above the ordinary master or mate who, without education, has managed to pass the Steamboat Inspection Service examination.

It would be a very excellent thing if we could devise some way by which the Shipping Board would be required to give preference to graduates of nautical schools in hiring their officers. A diploma from one of these State nautical schools, accompanied by the requirement—sea experience—should certainly give us a higher type of merchant marine officers than we have to-day, and with such encouragement these schools could turn out sufficient young men each year well grounded in basic principles to fill all the requirements of the demand for seamen, quartermasters, boatswains, and junior officers.

Of course this does not touch foreign ships, but it would at least assure us that we were doing the best we could to insure competence of officers of American ships.

I am inclosing copies of the kind of examination these young men are put through.

Please accept my best wishes for a merry Christmas and a very happy New Year.

Yours very truly,

E. P. JESSOP.

Mr. SHIPSTEAD. Mr. President, if the Senator from Washington will allow me to ask him a question in connection with the *Vestris* disaster to which he has referred, does the Senator know whether or not the lack of the enforcement of the La Follette Seamens Act was involved in that disaster?

Mr. JONES. I am not prepared to say whether that is true or not. I just received the commissioner's report the other day and have not had time to go into it in detail fully, but I have secured permission to have the report printed in the RECORD, and also as a Senate document for the convenience of Senators, and it may then be examined into very carefully, and the committee also will look into the matter very carefully.

Mr. SHIPSTEAD. Very well.

INSPECTION OF FOREIGN VESSELS

Mr. JONES. Mr. President, in connection with the report, which I have just had printed in the RECORD, I will also say that while the commissioner makes many recommendations that will need very careful consideration and which should be considered as promptly as possible, he calls attention to one rather strange circumstance, and that is that foreign vessels, flying foreign flags, have no inspection except when they leave their home ports, and there is no inspection of them authorized in our ports either as to life-saving instrumentalities, such as lifeboats, or anything of that sort. It has been held by a decision rendered by somebody in the Commerce Department in 1913 that our inspection laws do not apply to foreign vessels even when leaving American ports. That, it seems to me, should merit prompt and early action. So I desire to introduce a bill dealing with these two phases of the situation. I ask that the title of the bill may be read, and then that it may be referred to the Committee on Commerce.

The bill (S. 5132) subjecting foreign vessels leaving American ports to the inspection laws of the United States, and for other purposes, was read twice by its title and referred to the Committee on Commerce.

ADMINISTRATION OF PROHIBITION ACT

Mr. KING. Mr. President, I introduce a bill transferring the administration of the Prohibition Unit to the Department of Justice, and ask its reference to the Committee on the Judiciary.

The bill (S. 5133) transferring to the Department of Justice certain rights, privileges, powers, and duties relating to the national prohibition act, and for other purposes, was read twice by its title and referred to the Committee on the Judiciary.

AMENDMENT OF CIVIL SERVICE CLASSIFICATION ACT

Mr. BROOKHART. I introduce a bill providing for the amendment of the Welch Act, so as to make it correspond to the bill as it passed the Senate.

The bill (S. 5148) to amend section 13 of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services," as amended by the act of May 28, 1928, was read twice by its title and referred to the Committee on Civil Service.

UNITED STATES COURT OF ADMINISTRATIVE JUSTICE

Mr. NORRIS. Mr. President, I ask the indulgence of the Senate for a very few moments while I explain the bill which I am about to introduce.

The bill provides for the creation of a court which I have designated the United States court of administrative justice.

The effect of it will be to do away with several other courts and bureaus that now pass upon claims of various kinds against the Government of the United States.

I wish to say, to begin with, that I do not expect to obtain action on this bill at this session. I think, however, it is of sufficient importance that the Senate, particularly, and the country generally, should know, in a brief way, just what is sought to be accomplished by the bill. My object in introducing it now is to bring about a discussion and a consideration of it, in a general way, by Members of Congress, by Government officials, by attorneys generally, and by the people at large.

The bill is rather broad in its scope, its intention being to simplify the procedure, to do away with some useless officials, and to bring about expedition and efficiency in the settlement of claims against the United States. The proposed court will have no other jurisdiction than that, but it is the intention of the bill to gather together all cases against the United States of all kinds, to abolish some present existing courts and boards that handle them in different ways, and to have them handled by one tribunal.

Prior to 1855 there was no law for suits against the United States, though during the very earliest days of the Government there sprang up a procedure, which was approved by the Supreme Court of the United States, of the maintenance of suits on common-law principles against collectors of customs and against collectors of internal revenue. Thus we had the anomalous procedure of trials by jury at common law of questions whether a particular importation, for instance, was an article described in the tariff acts. Such suits against collectors of customs continued until 1890, when there was established a Board of General Appraisers, now the Customs Court, to hear appeals from the collectors of customs. At first the decisions of the Board of General Appraisers were reviewable in the circuit courts of appeal, but in 1911 such appeals were abolished and there was created a Court of Customs Appeals to exclusively hear appeals from the Board of General Appraisers with the possibility, in certain instances, of further review in the Supreme Court of the United States. At the present time suits against collectors of customs for refund of duties are not permitted and we have a customs court consisting of nine judges to hear appeals from the collectors of customs and a Court of Customs Appeals consisting of five judges to hear appeals from the Court of Customs. During the present session of Congress

bills passed both the Senate and House of Representatives in different forms and are now before conferees transferring from the Court of Appeals of the District of Columbia to the Court of Customs Appeals all appeals from the Commissioner of Patents. That bill is now in conference; the conferees have had one meeting and have taken it up in considerable detail, but have decided not to take further action on it, because there is pending in the Supreme Court of the United States a suit which it is expected will be decided within the next 30 or 60 days that will settle a very important constitutional question involved particularly in the Senate bill.

Suits against collectors of internal revenue have not developed in a similar manner. This is due, perhaps, to the fact that until the sixteenth amendment to the Constitution the larger part of our governmental revenue was derived from tariff duties and no great attention appears to have been given to the procedure of suits against collectors of internal revenue for refund of taxes erroneously or illegally collected. The courts sustained suits against collectors of internal revenue on the same common-law principles that they had sustained suits against collectors of customs, and it is possible to-day to step into a district court of the United States and see in progress a trial before a jury of a suit against a collector of internal revenue involving the most complicated and intricate questions of bookkeeping, amortization of capital investments, depreciation, or numerous other technical questions arising under the income tax laws. In addition to this procedure of suits against collectors of internal revenue a taxpayer may sue the United States in the district court under its concurrent jurisdiction with the court of claims or in the United States Court of Claims, or sue the Commissioner of Internal Revenue in the Board of Tax Appeals or bring a mandamus against the collector of internal revenue and the Secretary of the Treasury in the Supreme Court of the District of Columbia. Decisions of both the district courts and the Board of Tax Appeals are reviewable, as of right, in the circuit courts of appeal, while decisions of the circuit court of appeal, the Court of Claims, and the Court of Appeals of the District of Columbia are reviewable on certiorari in the Supreme Court of the United States.

There is no necessity for these various remedies for a taxpayer whose most earnest desire is for a prompt and accurate review of his claim in the courts, and if any reason ever existed for the establishment of the Board of Tax Appeals, which is neither a part of any executive department nor a part of the judicial branch of the Government, that need is diminishing with the adjustment of the peak of the claims arising out of war-time tax laws. In any event, its jurisdiction may be transferred to a court, and, in fact, the Board of Tax Appeals functions as a court.

By the act of 1855 there was established a Court of Claims to hear and determine suits against the United States arising out of contracts or laws of the United States when the claim did not sound in tort; that is, was not a tort claim. This statute was amended from time to time and in 1887 there was enacted the so-called Tucker Act, which conferred jurisdiction on United States district courts, concurrently with the Court of Claims, to hear and determine claims not in excess of $10,000 against the United States. These cases in the district courts, similar to the cases in the Court of Claims, Court of Customs Appeals, and Board of Tax Appeals, are tried without a jury. In addition to the Tucker Act jurisdiction, district courts of the United States also have jurisdiction over claims against the Government under World War insurance contracts and under the merchant marine act of 1920, together with claims against collectors of internal revenue, which I have just mentioned.

The proposal which I have brought forward in the bill is to create a United States court of administrative justice and to transfer to that court the five judges of the Court of Claims and the five judges of the Court of Customs Appeals. The bill proposes to give this Government court exclusive jurisdiction over all suits against the United States, together with the jurisdiction now exercised by the Supreme Court of the District of Columbia to grant writs of mandamus and bills of injunction against officers and employees of the United States. The bill also transfers to this court all the jurisdiction now possessed by the Court of Claims, the Court of Customs Appeals, the Board of Tax Appeals, and the Supreme Court of the District of Columbia in so far as that court has jurisdiction to coerce officers and employees of the United States through its use of extraordinary writs, as well as all the jurisdiction of the United States district courts in so far as suits against the United States are concerned. The bill proposes to abolish the procedure of suits against collectors of internal revenue, and to adopt in this respect the procedure which was adopted in 1890 in the case of collectors of customs.

The bill also authorizes this court to sit in divisions of three, except in matters of rehearings, when nine must sit. Divisions of the court may hold sessions in any part of the United States when business demands; and I should like to invite attention to this phase of the matter, which will not result in placing all of the litigation with the Government in the hands of lawyers located at the seat of government, but will insure the complaints of their clients being heard by a court devoting its entire time to litigation with the United States, and at sessions held in or near their locality. Such a court should become better trained in the intricate questions of claims against the United States than any court can hope to be which devotes only part of its time to such litigation. This proposed procedure of permitting the court to hold sessions in the various sections of the country is merely an adoption of the procedure now authorized for the Customs Court and the Board of Tax Appeals.

The expense to claimants of litigation with the United States is now so intolerable as to result, in some instances, in injustice. A claimant can not afford to spend from $100 to $500 or more in taking testimony and printing records and briefs when the claim is less than the expense of its enforcement. The great bulk of litigation with the United States does not involve fact questions but legal questions. Where the point involved is one of law neither the Government nor claimants should be required to bear the expense of taking testimony. Where fact questions are involved, there is no reason why the administrative record should not go to the court for what it may be worth, and the court authorize or direct the taking of such additional testimony as it may deem necessary. The bill seeks to save to both claimants and the Government the expense and considerable delay resulting from the taking of testimony where none is needed to reach the disputed question, or where the facts developed by the administrative department are sufficient for the settlement of the controversy.

The transfer to the administrative court of the jurisdiction now exercised by the Supreme Court of the District of Columbia to grant mandamus or injunction against officers or employees of the United States is proposed for a number of reasons. In the first place, the Supreme Court of the District of Columbia is, strictly speaking, in the same class as the circuit or district courts in the various States. In fact, as was pointed out by the Supreme Court of the United States in the early case of Kendall versus Stokes, the District of Columbia courts acquired jurisdiction to issue such writs because the act of Congress creating the District of Columbia courts stated that they should have the same jurisdiction as was then possessed by the Maryland courts; and the Maryland courts, as an inheritance from the English Court of Chancery, had jurisdiction to issue such writs against the executive officers of their jurisdiction. While the District of Columbia courts are for certain purposes district courts of the United States, it is not to be forgotten that they are local courts, and should be concerned solely with local questions. I may add that even United States district courts have never had, and do not now have, jurisdiction to issue mandamus in original proceedings, as does the Supreme Court of the District of Columbia.

In the second place, it is not in keeping with the dignity of the United States to have its Cabinet members and other responsible officers required to answer a writ of mandamus or bill for injunction before a single judge of the Supreme Court of the District of Columbia, and to have to take their turn, with their questions of great importance from the standpoint of administration, between petitions for alimony and divorce cases and the heterogeneous litigation coming before that court. The dignity of the United States demands that its officers and employees be required to answer for their acts before a court composed of at least three judges who are trained in the law relating to the administration of their departments and establishments through the hearing and the determination of claims which arise in said departments.

In the third place, the Supreme Court of the District of Columbia, like many United States district courts, is behind in its docket, and at this session there was passed a bill establishing an additional and seventh judge for said district. The courts of the District of Columbia have enough work to do without attempting to direct, by mandamus and injunction, the administration of the affairs of the Federal Government. No one appreciates more than I do the tendency of some persons appointed to Federal office to lose their perspective, and to become so obsessed with their importance as sometimes to forget the statutes for the conduct of their offices, and that it is necessary to bring them before a court, through a petition for a writ of mandamus or injunction, to secure justice at their hands. However, I would have them brought before a specially trained court, where they may properly present and have con-

sidered their problems of administration, and before a national, not a local, court.

I should say in this connection that the bill proposes no change in the present procedure of the United States district courts to grant writs of habeas corpus to review the decisions of the Department of Labor in immigration cases, nor of the three-judge courts to review orders of the Interstate Commerce Commission and orders of the Secretary of Agriculture under the packers and stockyards act, nor of the circuit courts of appeal to review cease-and-desist orders of the Federal Trade Commission, nor of the district courts to review the matter of permits under the prohibition laws.

At the present time it is customary for officers of the Federal Government brought into the Supreme Court of the District of Columbia to answer petitions for mandamus or injunctions by attorneys of their department or establishment, either nominally or actively assisted by the United States attorney for the District of Columbia. Not infrequently attorneys from such departments and establishments assist in representing the United States in other courts. The bill provides that the head of a department or establishment whose decision or act is brought in question may designate an attorney of his own department or establishment to present the defense on which he relies. This procedure will insure the presentation to the court of the administrative views, and there will be no excuse for failure to follow the decisions of the court in similar cases, or else to report the matter to Congress with recommendation for a change in the law. Not infrequently the failure of the administrative departments or establishments to follow a decision of the lower courts is due to the fact that the administrative view was not presented to the court, and there have been cases where, upon such presentation, the courts have reversed themselves.

In other words, Mr. President, if the decision of the head of a department is involved in litigation the attorney who represented that department on the record before the department does not necessarily under our present procedure have anything to do with the case when it gets into court. A new attorney from the Department of Justice takes the case. He is unfamiliar with the record; and it has often happened that because of that difficulty the record itself has never been considered and the case is decided on some side issue that really was not involved, when, as a matter of fact, the persons best qualified to handle the case and to present, as everybody must admit ought to be presented, the view of the officer whose action is in dispute are not there to present his view or the theory on which he rejected a claim.

The bill adds nothing to nor does it subtract from the substantive law of claims against the United States. It creates no innovations, but it does propose to reorganize and simplify the procedure of securing judicial reviews of administrative acts and decisions. The bill merely provides for the consolidation of certain special courts, the transfer to the consolidated court of the jurisdiction now exercised by those special courts and by the Supreme Court of the District of Columbia, the simplification of procedure, and recognition of the practice, in extraordinary proceedings against officers of the Government, of having them represented in whole or in part by their own subordinates who are especially skilled in the laws in controversy. It proposes to relieve the United States district courts and the Supreme Court of the District of Columbia of jurisdiction of claims against the Federal Government or proceedings against its officers and employees because of some official act, except in the instances hereinbefore named.

I should like to add that the creation of a single court to hear and determine all claims and controversies with the United States is similar to the procedure long since adopted in France in the establishment of the Council of State and in the various subdivisions of the German Republic by the establishment of administrative courts. It is also similar in principle to a bill which has been considered in the last two sessions of the Reichstag for the establishment of a central government court. However, it is not proposed to give the administrative court of the United States the broad jurisdiction exercised by the French Council of State nor by the administrative courts of Germany. As stated, it is not proposed either to add to or to subtract from the substantive law of either suits against the United States or proceedings against its officers at the seat of government, but to consolidate such proceedings in one court sufficiently large to hear and determine the controversies expeditiously. Any necessary modifications of the substantive law may come later as the needs arise.

I referred awhile ago, Mr. President, to the bill transferring some of the jurisdiction from one of these courts to another, now in controversy between the House and the Senate on account of some amendment; and I stated that the conferees had decided to wait until the Supreme Court acted on a case now pending involving the same question.

We found that some of the tribunals and boards and courts dealing with these various questions of which this new court would have jurisdiction are overcrowded, their dockets are full, they have more than they can do, while there are others which are not kept busy. The object of that bill was to transfer some of the jurisdiction from one of these courts to another. It seems in accordance with the best principles of economy and efficiency that we should combine two or combine three or four, put all their jurisdiction in one, so that the entire case, regardless of whether it was a claim in tort or a claim on a contract, should be promptly considered, and should not be sent to some court overcrowded with work, a court which could not hear it, which would thus delay the matter almost indefinitely.

I hope, Mr. President, that the Members of the Senate will examine the bill when it is printed, and I ask particularly that the members of the Judiciary Committee do so. I have the hope that between the adjournment of this session of Congress and the convening of the next the matter may be so thrashed out by those who will take an interest in it that amendments of a constructive nature may be offered to perfect the bill, if defects are found, as they probably will be. The bill is tentative only, and is offered for the purpose of bringing about an intelligent and constructive discussion over the country, particularly among members of the bar, of the questions involved.

Mr. HEFLIN. Mr. President——

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Does the Senator from Nebraska yield to the Senator from Alabama?

Mr. NORRIS. I yield.

Mr. HEFLIN. I have listened with a great deal of interest to the remarks of the Senator from Nebraska. I did not hear all he said, however. I wonder if the Senator would not include in his bill a provision to create a court to try the cases where requests and applications are made for tax refunds, if he would not include a provision for the establishment of a court separate and apart from the Treasury Department, free from the influence of the Secretary of the Treasury or anybody else in the department, to try these cases, where they can be tried in open court, a record can be kept of all the proceedings?

Mr. NORRIS. The Senator did not hear all of what I said. The bill provides for the transfer to this court of all the work of the Board of Tax Appeals, which I think would meet the matter the Senator has suggested.

Mr. HEFLIN. What I had in mind was getting away from the Board of Tax Appeals. I want this court to try the cases originally, make the parties prepare their case and come to this court before any order is made or decree is rendered for a refund of Federal income taxes.

The Senator knows, as I know and as other Senators know, that this matter of tax refunds has attracted a great deal of attention and aroused a great deal of suspicion. There has been constantly refunding and refunding of taxes paid to the Government since the close of the World War, four or five hundred million dollars a year, in old cases, left over from years back of us. There is something wrong about these cases, and as long as these Government clerks can work the cases up and somebody in authority over them can O. K. them, and the Secretary of the Treasury finally pass on them, these favors are constantly being extended, and I think we ought to have a court to try such a case in the outset before any refund can be granted; the case should be adjudicated by a court that will try it in the open where the public can attend. Senators, this is a serious matter. You have refunded over a billion dollars to the big taxpayers in America. Of course, where the case is a meritorious one, where the money should be refunded, I have no objection to that being done; I think it ought to be done; but I think a great deal has been refunded where, if a court had been trying the case, it would not have been refunded. I would like to have the Senator from Nebraska think about that suggestion, and if he can include in his bill a provision that would cover it, I would be glad to have him do so.

Mr. NORRIS. I think the main feature at least is covered, although if it is not, and it is thought desirable that it should be covered in the way the Senator has outlined, I would be very glad, and I know the committee having charge of the matter would be very glad, to have such an amendment suggested.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. McKELLAR. I want to say to the Senator from Nebraska, and also to the Senator from Alabama, that in order for this court to have jurisdiction of such cases it would have to be given jurisdiction in the Senator's bill or a similar bill which may be passed; otherwise it would not have jurisdiction

over the claims of which the Senator from Alabama is now speaking.

Mr. NORRIS. This bill abolishes the Board of Tax Appeals and gives to this court all the jurisdiction the Board of Tax Appeals now has. It would not, as it stands now, take away from an administrative officer the right to pass on a claim. In fact, it would be established for the purpose of reviewing the acts of administrative officers in such cases as have been mentioned. That is one of the objects of the bill.

Mr. McKELLAR. The Board of Tax Appeals has no jurisdiction now over the administrative cases the Senator from Alabama has just mentioned.

Mr. GEORGE and Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Nebraska yield; and if so, to whom?

Mr. NORRIS. I first yield to the Senator from Georgia.

Mr. GEORGE. I am very much interested in the statement made by the Senator from Nebraska. I wanted to ask him—and I ask the question because I could not hear all of his remarks—if he had given consideration to the proposal to decentralize the court system and machinery so as to give to the United States district courts original jurisdiction in many matters which he now proposes to confer on a court centrally located here in Washington. For instance, in cases of mandamus, I have always understood that the United States district courts, outside of the district court here in the District of Columbia, which is not a district court in the ordinary sense, had no original jurisdiction. They might, in an ancillary way, make use of that writ, but they could not entertain original proceeding for the writ.

Mr. NORRIS. Practically all cases of mandamus and injunction pertaining to the action of a department or an official of the Government are commenced and tried before the district court in the District of Columbia. As I understand it, that court obtained its jurisdiction in mandamus and injunction cases from the original act setting up that court. It gave to them the same jurisdiction the courts of Maryland had.

Mr. GEORGE. I so understand.

Mr. NORRIS. This bill takes that jurisdiction away from the Supreme Court of the District of Columbia and vests it in this new court.

Mr. GEORGE. I wanted to ask the Senator if he had given due consideration to the proposal to decentralize this power by vesting it in the several United States district courts.

Mr. NORRIS. The bill does not add to the jurisdiction of any United States district court.

Mr. GEORGE. The United States district courts have not original jurisdiction, for instance, in mandamus.

Mr. WALSH of Montana. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. WALSH of Montana. I think the Senator will find that the United States district courts have jurisdiction. The difficulty arises by reason of the fact that the officers to be mandamused are here in the District of Columbia, and service can not be secured except by proceedings instituted in the Supreme Court of the District of Columbia.

Mr. GEORGE. I have great respect for the Senator's opinion, but I think the Senator on investigation will find that the United States district courts have not original jurisdiction in mandamus cases. They may issue the writ in an ancillary proceeding, in the case of mandamus.

Here is the point: We have reached a time when there are administrative officers of the Government scattered all over the country. They are in every State, they are very numerous, they affect directly and powerfully the interests of the citizens, and I can not see why these administrative officers may not be mandamused in a United States district court in a direct and original proceeding for that purpose. That is the point to which I am directing the Senator's attention, and requesting that he make a study of that question, looking to the decentralizing of the power of the Federal judiciary over the citizens of the country.

Mr. REED of Missouri. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. REED of Missouri. I simply wanted to ask this question: Is there any provision in the bill the Senator has introduced for appeals from the decisions of this court?

Mr. NORRIS. Yes.

Mr. REED of Missouri. Where does the appeal run?

Mr. NORRIS. To the Supreme Court of the United States.

Mr. REED of Missouri. Is that an appeal as of right, or is it an appeal which can only be granted by writ of certiorari?

Mr. NORRIS. There are some cases where it would go as a matter of right, and others where it would not. The bill does not change the law in that respect. Under existing law there are some cases where the appeal is as a matter of right, and there are others where it is only on certiorari. There is no change in the law in that respect.

Mr. President, I ask that the bill be printed and referred to the Committee on the Judiciary.

The PRESIDING OFFICER. It is so ordered.

The bill (S. 5154) to establish a United States court of administrative justice and to expedite the hearing and determination of controversies with the United States, and for other purposes, was read twice by its title and referred to the Committee on the Judiciary.

CONGRESSIONAL REAPPORTIONMENT

Mr. VANDENBERG. Mr. President, I present an amendment intended to be proposed to the pending census bill, being House bill 393. I should like to identify it by saying that it is in the manner and form of the reapportionment measure which was passed in the House of Representatives in 1921, but which failed in the Senate. If reapportionment does not come to us in the usual channel in the near future, I hope to bring this amendment to the attention of the Senate. I ask that the amendment may be printed and lie on the table.

The VICE PRESIDENT. It will be so ordered.

AMENDMENT TO THE CRUISER BILL

Mr. KING submitted an amendment intended to be proposed by him to the bill (H. R. 11526) to authorize the construction of certain naval vessels, and for other purposes, which was ordered to lie on the table and to be printed.

PROPOSED EVERGLADES NATIONAL PARK, FLA.

Mr. FLETCHER submitted an amendment intended to be proposed by him to the bill (S. 4704) to authorize the Secretary of the Interior to investigate and report to Congress on the advisability and practicability of establishing a national park, to be known as the Everglades National Park, in the State of Florida, and for other purposes, which was referred to the Committee on Public Lands and Surveys and ordered to be printed.

AMENDMENTS TO AGRICULTURAL DEPARTMENT APPROPRIATION BILL

Mr. FLETCHER submitted two amendments intended to be proposed by him to House bill 15386, the Agricultural Department appropriation bill, which were referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 51, line 24, strike out "$130,500" and insert "red spiders and other enemies of Plumosus ferns, $140,500."

On page 52, line 19, strike out "$83,900" and insert the words "including sand flies, $113,900."

COMPILATION OF SENATE ELECTION CASES

Mr. SHORTRIDGE submitted the following resolution (S. Res. 284), which was referred to the Committee on Privileges and Elections:

Resolved, That the Committee on Privileges and Elections hereby is authorized to employ necessary assistants to compile a revised edition of the document entitled "Compilation of Senate Election Cases," from the last revision to and including the Seventieth Congress, at a cost not to exceed $10,000, to be paid out of the contingent fund of the Senate upon vouchers properly approved.

EXPENSES OF INVESTIGATION OF PENNSYLVANIA SENATORIAL ELECTION

Mr. SHORTRIDGE submitted the following resolution (S. Res. 285), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Privileges and Elections, authorized by resolution of December 17, 1927, to hear and determine the pending contest between WILLIAM S. VARE and William B. Wilson, involving the right to membership in the United States Senate as a Senator from the State of Pennsylvania, hereby is authorized to expend from the contingent fund of the Senate $20,000 in addition to the amounts heretofore authorized for said purpose.

MESSAGE FROM THE HOUSE—ENROLLED BILL SIGNED

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the enrolled bill (H. R. 10093) for the relief of Ferdinand Young, alias James Williams, and it was signed by the Vice President.

MULTILATERAL PEACE TREATY

Mr. BLAINE. Mr. President, I ask unanimous consent that there be printed as a Senate document several articles on the so-called multilateral peace treaty, one by Prof. Edwin Borchard, of Yale University, being an address delivered at the Williamstown Institute of Politics on August 22, 1928; an article by Frank H. Simonds, published in the January, 1929, Forum;

and an article published in the December Harpers for 1928 by Henry Cabot Lodge upon "The Meaning of the Kellogg Treaty."

The VICE PRESIDENT. Without objection, it is so ordered.

GOOD ROADS

Mr. OVERMAN. Mr. President, I ask unanimous consent to have printed in the RECORD an address delivered before the joint convention of the United States Good Roads Association and the Bankhead National Highway Association, by Col. T. L. Kirkpatrick, of Charlotte, N. C.

The VICE PRESIDENT. Without objection, it is so ordered.

The address is as follows:

Mr. President, His Excellency the Governor of Iowa, his honor the mayor of Des Moines, members of the United States Good Roads Association and the Bankhead National Highway Association in convention assembled, ladies and gentlemen, as president of the Bankhead National Highway Association, and as a director of the United States Good Roads Association, the pleasant duty and responsibility has been assigned to me by the members of the executive committee of these two associations and their membership to bring to you greetings and a message based upon the necessity of the United States Congress appropriating sufficient funds to build, construct, and maintain a national system of interstate hard-surfaced highways, interconnecting the capitals of the 48 States of the Union one with the other and with the National Capital, by the most practical and direct routes. Further, the building of two great seaboard highways, one traversing the Atlantic coast and the other the Pacific.

It is a very great pleasure, as well as a distinct privilege and honor, to be the guest of the hospitable and beautiful city of Des Moines, as well as to enjoy the hospitality and cordiality of the great State of Iowa, whose citizenship by its earnest endeavor, enterprise, intellect, and mental acumen has contributed incalculably to the spirit of Americanism the growth and development of the Nation and has wrought for herself and yourselves a position of commanding importance and influence among your sister Commonwealths.

Iowa's niche in the temple of fame stands out boldly unchallenged by the historians. Her contribution in polity, education, agriculture, industry, idealism, and religion, as well as her political leaders and statesmen such as Herbert Hoover, ex-Secretary E. T. Meredith, your distinguished governor, Hon. John Hammill, Senators S. W. BROOKHART and D. F. STECK, places her in the forefront of the galaxy of her sister States of the Union.

The beauty, grace, charm, and virtue of your good women, like the fragrance of the wild rose, your State flower, sheds additional glory and luster upon your Commonwealth and bids a more joyous welcome to your guests. Personally, we of the South feel a peculiar pride and interest in Iowa; in fact, if permitted, claim kinship with you by consanguinity and affinity, in that you were given your being in 1803 through the Louisiana Purchase, and had as your godfather one of the South's greatest noblemen and the Nation's greatest geniuses and political leaders—Thomas Jefferson—and the South contributed some of its best blood to the settlement of this great State.

May I bring to you special greetings to-day from my own mother Commonwealth, North Carolina—one of the foremost good-roads States in the South, if not in the Union, which has expended approximately, including State and Federal aid, $140,000,000 to build 7,365 miles of highways. As you perhaps know, North Carolina was one of the original daughters of the Goddess of Liberty. She has grown up to be the loveliest princess of the South and is the queen State of the Union upon whose fair brow rests the jeweled diadem of the Nation. She pillows her head on her own shadowy mountains, drapes her matchless form in the azure blue of her sun-kissed peaks; the stars pin back the curtains of the blue skies above her; and the angels peep through and smile at her delight as she dabbles her dimpled feet in the bright waters of the Atlantic.

Too, I bring to you an affectionate message of love from the old South, that part of your Nation and mine which has ever been rich in lore and history, jeweled with rhythm and song, sublime in music and poetry, adorned and embellished by the chivalry of brave men and the beauty and grace of fair women. I know that you honor us for the contributions which we have made to the Nation in statesmanship, military genius, science, art, invention, education, and industry. It was ours to bequeath to the Nation the immortal George Washington, Commander in Chief, and the Father of our Country. The Nation drew upon us for its first Chief Justice of the United States Supreme Court, John Rutledge; the author of the National Constitution, James Madison; the author of the National Declaration of Independence, Thomas Jefferson; the author of the national anthem; and the first assertion of the right of trial by jury.

May I assure you that we stand with the taxpayers of Iowa and the citizenship of every other State in the Union and offer you our fullest cooperation and hearty support in every patriotic effort and in the advancement of every principle of government founded upon the Constitution of the United States which makes for the weal of the governed that will enable the citizenship of the United States to achieve the fullest fruition of all its hopes and desires.

We are advocating a national system of interstate hard-surfaced highways, interconnecting the several capitals of the 48 States of the Union with the National Capital, and two great seaboard highways, to the end that our citizenship may have the proper means of communication and transportation and in order that we may more fully develop our agricultural, mining, industrial, and natural resources and further that the products of the farms, mines, and factories of our country may be economically, rapidly, and profitably sold in all the marts of the world. Further, we believe that a national system of interstate hard-surfaced highways will promote the spiritual, moral, and political interest of the Nation incalculably, make of our citizenship a homogeneous, patriotic, and loving people, binding us together with cords of inseparable love and patriotic devotion.

We are advised by the United States Bureau of Public Roads that America is to-day the greatest road builder in the world. It is our judgment that there is a greater need to-day for building a national system of interstate highways than ever before. There are approximately 23,000,000 motor cars traveling over our roads, the major portion of which are yet unpaved. There is invested in the automobile industry, motor car, and accessories a sum which almost equals the railway systems of the United States, to wit, $18,000,000,000.

We are advocating an expenditure by the Federal Government of $50,000,000,000 for a national system of interstate hard-surfaced highways—this amount to be expended in equal annual installments of $2,000,000,000 a year covering a building program of 25 years. We earnestly urge and insist that the taxpayers of Iowa, together with the taxpayers and citizens of the other States of the Union, demand of their Representatives in Congress immediate consideration of such a program, and that necessary legislation be immediately adopted to put it into effect as rapidly as is consistent with economical expenditures.

More than 2,000 years ago the old prophet, Solomon, stated an axiomatic and immortal truth: "Unless there be vision, the people perish." The truthfulness of that statement is as compelling to-day as when uttered by this seer for the guidance of the people of his day and generation. Our fathers in establishing the Constitution of this Government, as early as 1789, having in view the necessity of an economical and rapid distribution and transportation of our resources, and believing that permanent roads were the basis of the then present and future civilization of our country and were the means to the end of promoting national prosperity and happiness, placed in the fundamental law of the land and issued a mandate to the then Members and future Members of Congress to appropriate the necessary funds for the building of post roads. We have had enough talk about the great fundamental principles of government; we have had enough discussion of the tariff question; have debated long enough on international questions—what we need in this hour is a practical application of the rules of government to the needs of the governed.

If the National Government would lay down a broad, comprehensive program of internal improvements and make the necessary appropriations to build, construct, and maintain such a national system of hard-surfaced highways as we have outlined, develop the inland waterways of our Nation, build up and develop our harbors and docks, build a merchant marine, dig the Nicaragua canal, and use the undeveloped resources of the waters of the Mississippi River by developing the 55,000,000 hydroelectric horsepower, changing it from a death-dealing agency to a blessing, and stop the wasteful appropriations and loans to foreign governments and foreign powers, the majority of which is being used to build up big armies and navies for the next war and give us an army, navy, and air fleet big enough to afford adequate military police protection for the lives and property of our Nation the taxpayers would rise up and call it blessed.

We have at our command the necessary wealth to do and perform all things needed for the happiness and welfare of our citizenship, and for the development of this great Nation of ours. The wealth of this Nation, including all values, personal, real, and mixed, is reckoned at approximately $427,000,000,000. We are informed that the approximate income of our citizenship, from all sources, is $100,000,000,000. We have more gold than all the combined powers of the world. We have piled up in the vaults of our banking institutions a gold reserve of over three and one-half billion dollars.

The United States contains 6 per cent of the world's population, 6 per cent of the world's land area, and more than one-third of the world's accumulated wealth. The United States is producing one-half of the world's coal and coke, one-half of its iron and steel, 70 per cent of the world's petroleum, three-fourths of the world's sulphur, 85 per cent of the world's naval store, the bulk of the world's phosphate, 60 per cent of the world's supply of cotton, 50 per cent of the grain and livestock, one-half of the standing timber, 50 per cent of the minerals. It possesses 45 per cent of the world's gold supply and 40 per cent of the world's railroad mileage and 45 per cent of the world's developed hydroelectric horsepower.

Notwithstanding this tremendous aggregation of wealth, and moral and physical power, we are informed through the Manufacturers' Record, the National Bureau of Highway, and other reliable sources, that the "mud tax" costs the taxpayers of the Federal Government of the United States approximately $1,630,000,000 annually. By the "mud

tax" we mean the unnecessary wear, tear, and depreciation of motor vehicles of all kinds, wagons and horse-drawn vehicles, and any other conveyances using the highways for transportation purposes; the wear, tear, and depreciation of horse and mule vehicles, and the useless and unnecessary waste and consumption of gasolines and oils. By developing a national system of interstate hard-surfaced highways, the major portion of this waste, economic and financial loss could be saved to the taxpayers, not calculating the time that would be saved in transportation, and the profits that would accrue to the industrial, manufacturing, and agricultural interests through an economical and rapid transportation for the peoples of the Nation through such a national system of interstate highways.

If the appraised mud tax of the Nation is approximately correct, and it could be saved to the taxpayers of the Federal Government, this tax in 25 years, figuring the interest at 5 per cent, would more than supply the $50,000,000,000 for the building of a national highway system.

The Appian Way, built by the Cæsars, unified the Roman Government, extended its commerce, developed culture, art, and refinement, created adequate military defense, and continued the life of the government for centuries. The magnificent roads constructed by Napoleon cemented the Provinces of France, created a strong government, out of which grew the Republic, gave employment to the unemployed, built up its agricultural, industrial, and commercial interests, and in 1918 enabled the allied forces to save civilization and to achieve a glorious victory instead of suffering an ignominious defeat.

The expenditure of $2,000,000,000 a year on a national highway program by the Federal Government would furnish a tremendous amount of employment. This additional amount of capital in circulation annually would afford the farmer a vast market for his by-products, such as stone, gravel, and sand, and give him an increased income in the hiring and employing of his wagons, teams, and trucks. Further, it would give to the merchant an opportunity to increase his sales of merchandise.

If the Nation should definitely determine upon the building of a national system of highways and would spend $50,000,000,000 in 25 annual installments, let the money be allocated to the several States of the Union, upon a basis of area, through mileage and population; this effort on the part of the National Government would create confidence, stimulate the arteries of trade, energize commerce, enhance agricultural values and farm-land values, and encourage the profitable investment of private capital, and further serve as an inducement to States and counties in building communal and lateral roads.

Figuring the average cost of hard-surfaced highways at $33,200 per mile, $50,000,000,000 would build 1,506,024 miles of hard-surfaced roads, and this mileage added to the hard-surfaced roads already constructed by the States with the aid of Federal funds heretofore appropriated would give us a national system of approximately 1,706,024 miles of hard-surfaced highways, which would practically provide for the proposed national system of interstate highways.

The highways logically divide themselves into three groups, viz: National interstate highways, intrastate highways, and lateral or communal highways. The national highway system should be built largely by national funds and maintained by national funds; the State highways by the State, and the county highways by the local taxpayers. If the Federal Government finds it has not the $2,000,000,000 annually to appropriate for the next 25 years from the Treasury, it would pay to levy a small national gasoline and license tax, or have other appropriations heretofore made diverted to and used for national road building, but at all cost the national interstate highway system ought to be built now.

The natural reasons suggest themselves for the building of such a system of highways:

First. It would unite the citizenship of the United States in aspiration, social and economic thought, making us a homogeneous people as no other agency.

Second. Our steam and electric railroads and inland waterways are not sufficient or adequate to properly provide cheap transportation and economical and rapid distribution of the resources of our people and ought to be immediately supplemented by a national system of interstate hard-surfaced highways.

Third. Millions of dollars in economic waste is suffered annually by the taxpayers on account of "mud roads" in the depreciation of motor vehicles, loss of time, and inadequate marketing facilities.

Fourth. As a matter of national defense in time of threatened invasion, a complete system of national interstate hard-surfaced highways is absolutely imperative for the transportation of troops and supplies from coast to coast. The United States has approximatetly 3,000 miles of coastal line, 3,000,000 square miles of territory, 117,000,000 people, and $427,000,000,000 of wealth to protect. We should be adequately prepared on a moment's notice to render police protection.

Fifth. Good roads, and by that we mean hard-surfaced highways, are not only the basis of material prosperity, but will contribute to the moral, social, and spiritual life of the citizenship of the Nation as no other factor. By these means the citizens of the several States comes to know each other personally, the rural churches and the rural schoolhouses, and the rural mail system are all greatly benefited; greater inducements and encouragement are given to the rural population, especially the boys and girls, to remain on the farms, to grow and develop spiritually, socially, and materially in the life of the Nation.

Sixth. Modern highways lead upward to higher possibilities of national life. Bad highways form the other road downward to ruin. If James J. Hill and E. H. Harriman had not had the vision and launched the great transcontinental railway system, which we have to-day interlocking and interconnecting the great West with the great North, East, and South America to-day would not be the potential world factor that she is. What the railroads of Hill and Harriman have done for the great West, a complete system of communal, lateral, and national interstate highways, modernly built, constructed, and maintained will do for the entire Nation.

Seventh. Men who are working for the building of highways are working for the advancement of God and humanity, are laboring to broaden the foundation of equal opportunity for all. Highway building, therefore, is a high mission, and the builder, advocator, and promoter of highways is a missionary of the doctrine of human betterment. "He prayeth best who serveth best."

Saint and sinner alike agree that the judgment pronounced by the Master against the barren fig tree was but a just sentence. The question for the people of the United States is not whether we have iron, gold, coal, silver, copper, oil, phosphate, sulphur, mineral resources of all kinds, unexcelled climatic conditions, besides unlimited undeveloped electrical horsepower; the question is not whether our soil will produce all kinds of grain, fruits, and tobacco, to say nothing of our fishing and mining industries and water transportation facilities—these questions were settled by the great God in the long ago when He made the world; on the other hand, the question for us is whether or not we have the vision, the spiritual and moral courage, and intellectual power and dynamic energy to realize 100 per cent on these God-given inheritances.

Every patriotic American citizen must recognize himself or herself as trustee of all these tremendous natural resources, and use these unlimited resources to promote the welfare, peace, and prosperity of our present day and generation, and transmit to unborn posterity the blessings which we have received from our sires and mothers, thereby weaving threads of sunshine and happiness in the pathway of our fellow men, and add to the sum total of the glory of God and human happiness. The Nation, as well as the individual, must recognize that it holds this wealth as a trustee for the furtherance and advancement of its citizenship and humanity.

I appeal to the membership of this convention, I appeal to the citizenship of Iowa, and through you to the citizenship and taxpayers of this great United States of America to demand a national system of modern highways, in order that we may exert the greatest influence in shaping the destiny for the good of unnumbered millions and in molding the spiritual, the educational, and material life of the Nation. And in the language of the old Scottish bard:

"Burst be the ear that fails to hear,
And palsied be the feet that shuns to speed,
At the Clarion Call of his Country's need!"

THE HISTORY OF INLAND WATER TRANSPORTATION

Mr. SHEPPARD. Mr. President, I present for publication in the RECORD an address by F. H. Farwell, of Orange, Tex., on The History of Inland Water Transportation, delivered at the Intracoastal Canal Convention held at Baton Rouge, La., on November 9–10, 1928.

The VICE PRESIDENT. Without objection, the address will be printed in the RECORD.

The address is as follows:

The history of artificial waterways nearly tells the story of civilization from the beginning of time down to the present day.

Strange to say, however, information regarding inland water transportation is fragmentary, for early records are dim on specific movements, due to the fact that mainly these canals or ditches were for irrigating purposes.

The Bible tells us when famine stalked in God's chosen land knowledge of plenty in Egypt came to Abram, and we find that he and his entire family joined a caravan bound for that country, there to remain until next crop season in his own home land. As he neared ancient Egypt he saw civilization at its best. The universities, theaters, works of art, and the pyramids among the most conspicuous, but with his mind on sustenance who can say but what his greatest astonishment occurred as he beheld the Nile with its lateral canals built as an insurance against crop failure.

The evolution of the drainage ditch into a barge or boat canal as a means of transportation of food products to large centers simply followed as a natural consequence, and only adds an advanced chapter to the interesting story.

We are told that even the use of artificial waterways, which certainly must have followed that of natural streams by many centuries, goes back to 3500 B. C. or perhaps earlier. The first of these waterways, to be sure, were for irrigation, drainage, and flood control, and not for navigation. Tradition states, however, that the Suez Canal was excavated prior to 2000 B. C., and we have more than tradition

to show that it was open for the navigation of small vessels by 600 B. C. (Whitford's History of New York Canals.)

The Royal Canal of Babylon was open long before the time of Christ. A number of canals were built under the Roman Empire. The Imperial Canal of China, said to be a thousand miles long, was completed in 1289 A. D.

All of these canals long antedated the canal lock. This did not, however, preclude water transportation between different levels, because we are told that the early canals of Egypt and China had a form of inclined plane for transferring boats to successive levels. (Whitford.)

Strange to say, the idea of canal locks, which revolutionized transportation and made possible the use of inland waterways, was seemingly lost in antiquity. No one knows its origin or whom to credit with the invention. An authority tells us "to us living in an age of steam engines and daguerreotypes it might appear strange that an invention so simple in itself as the canal lock should have escaped the acuteness of Egypt, Greece, and Rome." (Quarterly Review No. CXLVI, p. 281.)

James Brinkley, a celebrated English engineer, in 1754 was commissioned by the Duke of Bridgewater to find a way to transport his coal from the estate to Manchester. The difficulties were great, but in the end he accomplished the feat, even to the extent of carrying the water 39 feet above the River Irwell. The success of this canal, both from an engineering and economical point of view, centered thought and action on canals as the practical means of transportation. (Enc. Britannica.)

It remained, however, for Thomas Telford, a Scotch engineer, to pioneer the idea of inland water transportation along practical barge lines. In 1793 he developed the Ellesmere Canal to a state of practicability that led to his service as consulting engineer both at home and in Sweden. (Inland Navigation, Edinburg, Enc.)

The evolution of the canal lock which, as indicated, has revolutionized the operation of canals and commercialized rivers, was developed so gradually that it is a question of whether Italy or Holland should be credited with the distinction of its first real use. It is definitely known, however, that during the latter part of the fifteenth century locks were actually used in both countries.

The introduction of these locks resulted in the rapid development of canal building in England, France, and other European countries, and this combination of natural and artificial waterways resulted in such a well-established system of transportation that in those countries the coming of the railroad had no material effect such as we experienced in this country. In Europe the inland waterway is a prime factor to-day in transportation.

Our Pilgrim Fathers had ample reason to realize the value of an intracoastal canal before they ever landed on Plymouth Rock. Had such a canal been available perhaps they would not have landed there, and perhaps the entire history of New England or, in fact, of all of our colonies would have been quite different. We are told that they were heading for some point south of what is now New York, but that, lacking either sufficient control of their ships to hold to a precise course, or instruments of precision to show their exact location, they missed in their aim and first encountered land on the exposed side of Cape Cod. Hardly knowing whether to go north or south, they started south, but encountered such terrifying shoals at the elbow of the cape that they turned around and followed the shore line to its end, whence they crossed the bay to what became Plymouth. Had they been able to use a safe intracoastal canal they would doubtless have continued to a warmer climate and more fertile soil, and Texas might have become New England.

Knowing of the dense forests and impassable roads in our own early history, which forced us to depend almost exclusively on waterways as a means of transportation, and observing transportation by boats and rafts at the present time by even the most primitive of races, we can assume that inland waterway transportation has been an important factor in the lives of human beings since the very beginning.

Early settlement in the colonies as a matter of course was along protected harbors and navigable waterways, and it may be noted that in the absence of any other means of transportation, waterways that could hardly be regarded as navigable were utilized to the utmost. For example, trading posts were established in the earliest colonial days on the small tidal rivers at the base of Cape Code, and a brisk trade was developed between the Puritans and the Dutch through this use of protected inland waters, necessitating, however, a carry across the neck of the cape.

It was not long, however, before the possibility was seen of elimination of this carry by the beginning of the intracoastal canal system. (Meyer's History of Transportation in the United States Before 1860.) As early as 1676 Samuel Sewell in his diary mentions the possibility of a passage "from the south sea to the north," and in 1697 the general court of Massachusetts adopted a resolution calling for a study and report on the possibilities of such a canal. The records do not show that such a report was made. A canal was opened in 1757 connecting two parts of Buzzards Bay, but this was not for the passage of boats but for the passage of herring. In 1776, however, the general court of Massachusetts passed another resolution calling for a study and report on the feasibility of such a canal, and a survey was started, only to be deferred when the engineer was called into war service.

The idea of a navigable canal to relieve shipping of the perils around Cape Cod was attaining strength, however, and in 1808 the Secretary of the Treasury, Albert Gallatin, included in a comprehensive report on waterways a recommendation for a canal to eliminate this difficulty. He believed the obstacles to such a canal across Cape Cod were so great that his recommendation was that the canal be built from Boston to Narragansett Bay. A company to build the Boston canal was incorporated in 1818, but the canal was never built. (Meyer.)

By 1824 interest had been revived in a canal across the cape. A survey was made and the project was favorably reported upon, but, strange to say, it was nearly another century, or 240 years after Samuel Sewell recorded sentiment in favor of it, and this sentiment resulted in actual construction. It was finally built and completed with private capital as a ship canal in 1916.

During its first year of operation it carried 3,019,883 tons. During the war it was taken over by the Railroad Administration. It was subsequently turned back to its owners, but it has been apparent that in order to attain its maximum usefulness it should be acquired and improved by the Federal Government, and after prolonged discussion, negotiation, and litigation its purchase was authorized by Congress last year. When the channel is widened to permit two-way traffic of large vessels and regulatory works are constructed to check the strong tidal currents, this canal can be expected to come into its own.

While the early efforts were going on to build a canal across Cape Cod others were being made to connect Chesapeake and Delaware Bays. The advantages of such a canal were mentioned in 1679–80 in Danker and Sluyter's Journal of a Tour in Maryland. A committee was appointed in 1769 to report on the project, but its recommendations involved such expense that the matter was dropped until 1784, and from that time until 1824 the efforts to get the canal built were futile, although surveys were made and companies were incorporated. In 1824, however, the canal was actually begun, and it was completed in 1829, with a navigable depth of 9 feet and with locks. (Meyer.)

This canal was also built and operated as a private undertaking, although the United States contributed 20 per cent of the construction cost and the States of Pennsylvania, Delaware, and Maryland made substantial contributions, inspired to do so by the threatened competition of the Erie Canal. Each decade from its opening showed a substantial increase in tonnage until 1870, when 1,245,928 tons of lumber, coal, flour, and other commodities were handled.

About this time the tonnage began to decline, and about the same time efforts were launched to have the waterway taken over by the Federal Government and converted into a ship canal. There followed the usual extended period of commissions, surveys, and reports, but apparently, in 1894, the Chief of Engineers reported favorably on the project for the first time. It was 12 years later (1906) that Congress authorized the appointment of a special commission to appraise the canal and 13 more years (1919) before Congress authorized its purchase and enlargement. The present project calls for a 12-foot sea-level canal, and the Chief of Engineers reported the work 96 per cent completed last year.

There is one other early forerunner of the intracoastal canal—namely, the Delaware and Raritan Canal across New Jersey. A company was chartered in 1804 to build this waterway, but various obstacles delayed the project so that it was not completed until 1838. The surveys of the New Jersey Ship Canal Commission in recent years have shown that the route of this canal, which is of 7-foot depth, is not the most desirable one for the intracoastal waterway, so that it is of historical interest mainly as showing early recognition of the need for such a canal.

The intracoastal waterway south of Cheaspeake Bay has little history. There were fragmentary congressional authorizations as far back as 1828, 1836, and 1844, but nothing comprehensive except in the last 20 years. As you know, it was only in 1925 that we obtained consolidated projects for the Louisiana and Texas Intracoastal Waterway, and only last year that a 9-foot channel was authorized. Several of the authorized projects east of the Mississippi are for less than 9 feet, and several important links have not yet been authorized.

While and before the early intracoastal projects were being carried out, our colonists were, of course, using the natural waterways as virtually their only means of communication with the interior. Even this necessitated difficult carries over the Appalachian barrier, whether the route was up the west branch of the Susquehanna and across the mountains to the Allegheny, up the Potomac and over to the Youghiogheny; or up the James River and over to the Greenbrier and Kanawha. The rivers themselves were full of obstacles to transportation, but these had been overcome as far as possible by the development of boats of very shallow draft. Interstate Commerce Commissioner Meyer in his Transportation in the United States Before 1860, tells us that, following, of course, the canoe, "the first boats which were used for navigating the Ohio were the flat boats, arks, keel boats, and barges. The early boats rarely used sails and received only occasional aid from their oars and depended almost wholly upon the current of the stream to carry them to their destination. It usually took a month to go from

Pittsburgh to New Orleans, but the return trip, when there was one, often occupied four months."

Various expedients were used to get these early boats upstream. Oars were ineffective against the current. One method used was manpower, the said men walking along the river bank and pulling the boat with ropes. Often there was nothing available as a tow path, in which case the boat was advanced by warping it with ropes coiled around trees. Poling was another method where the bed of the stream was firm enough to permit. Crude as these methods were, they continued in use until and considerably after the introduction of the steamboat.

The flatboats and the arks were used only to descend the streams. When they reached their destination they were used either to construct buildings of one kind or another for the new settlers who had traveled on them or were sold to other settlers for a similar purpose.

Commissioner Meyer further tells us that from February to June and from October to December were the best seasons for the navigation of the Ohio, although in the former season floating ice made the trip dangerous. Head winds were a frequent source of trouble. The river was so crooked that a favorable wind might within an hour become an unfavorable one, and in combination with strong currents be likely to drive the boat ashore.

The first steamboat descended the Ohio River from Pittsburgh to New Orleans in 1811. This was some five years after "Fulton's folly" had ventured upon the Hudson. Even though Fulton's boat and others on different deep waters had proved successful, there was apparently not much optimism regarding the utility of steam on the Ohio and the Mississippi, with their currents, snags, islands, and rocks. (Meyer.)

When the first voyage was made the skeptics at the river bank admitted that the boat was doing as well as a raft would do in floating downstream, but were certain that it could not go upstream. At Louisville it was necessary to wait a month for high enough water to float over the falls, but Captain Roosevelt made good use of this month in turning back and steaming up the river to Cincinnati to prove that it could be done.

This did not immediately solve the problem of navigating these rivers. Much experimenting was required before a steamboat of the shallow draft and capable of meeting the hazards of river transportation was developed. Another obstacle was the success which Livingstone and Fulton had for several years, until the Supreme Court ruled otherwise, in exercising a monopoly in the use of steamboats on inland waters. In the course of time, however, aided by the construction of a canal around the falls at Louisville, the cost of freight transportation from Pittsburgh to New Orleans, $6.75 per hundred pounds in 1800, was cut more than 50 per cent. (Meyer.)

Although the Livingstone-Fulton monopoly was not overthrown by the Supreme Court until 1824, it had become partly inoperative on the Ohio and Mississippi, and in 1819 there were 60 steamboats plying between New Orleans and Louisville, not at that time reaching Cincinnati and Pittsburgh because they had no way of getting around the falls. The building of steamboats was begun at both of these points about that time, however. A table presented by Meyer shows that the number so built on the Ohio increased from 3 in 1816 and 7 in 1817 to 25 in 1818 and 34 in 1819. There was then an apparent lull for a period of five or six years, but 56 were built in 1826. The early losses by fire and sinking were very heavy, and previous to 1826, 41 per cent of all of the steamboats constructed had been lost or destroyed, 28 per cent of these losses being due to obstructions to navigation.

Even after the appearance of the steamboat the number of flat and keel boats and barges steadily increased. They could carry heavier loads than the first steamboats, there were more experienced operators available, and though slow moving they had a wider range of activity. (Dixon's Traffic History of the Mississippi River System.) These flat boats reached a maximum size of 150 by 24 feet with a capacity of 300 tons. As late as 1840 nearly one-fifth of the freight handled on the lower Mississippi moved by flat boat, keel, or barge. Steam towing of flat boats was tried as early as 1829, but was not successful.

It is estimated that in the decade 1820–1830, 3,000 flat boats annually descended the Ohio. Dixon gives a table showing 2,763 arrivals of flat boats at New Orleans in 1845–46, dwindling down gradually to 1,047 in 1852–53, and 541 in 1856–57. Meanwhile the arrival of steamboats at New Orleans, 21 in number in 1814, increased to 198 in 1820, 989 in 1830, 1,573 in 1840, 2,784 in 1850, and 3,566 in 1860.

During this early period the trade of the lower Mississippi originated largely in the Ohio basin where settlement was most advanced. (Dixon.) Improvement work was begun on the open channel of the Ohio as early as 1827, although we are told that little of value was accomplished before 1860. The Allegheny was given up entirely to flats and rafts and was not navigable for even the lightest draft steamboats except during high water. The Monongahela was in about the same condition, but a private corporation built two locks in that river about 1840, and about that time the movement of coal was begun which has given the Monongahela the heaviest traffic of any river in the United States other than those navigable for and used by ocean-going vessels.

The coal movement on the Monongahela as late as 1850 was handled by barges carrying from 12,000 to 15,000 bushels of coal each. They were floated down the river to destination and there sold for lumber. Because of their heavy loaded draft they could be floated safely only during high water, of which there were usually two stages annually, and during these seasons from 250 to 300 barges started the trip. Many of them were wrecked by snags and rocks. Soon after 1850 the towing of coal flats by steam towboats was begun.

A steamboat is asserted to have ascended the upper Mississippi to a point near St. Paul in 1813. The arrivals were few and far between, however, before 1840, and even as recently as 1846 only 24 reached that point. (Dixon.) This number increased to 104 in 1850 and 1,026 in 1857. During the fifties the upper Mississippi territory was developing rapidly and the demand for transportation so far exceeded the supply that almost any price was paid for it, and boats often paid for themselves in two years if they survived the great hazards of snagging and burning. These boats were largely stern wheelers of 200 to 300 tons, able to proceed during periods of drought.

The flour industry was developing, and they handled numerous other commodities. By far the most important product of this area, however, was lumber, and this was handled almost entirely in rafts or barges propelled by steamboats. St. Louis was developing as an important river center, and Dixon indicates about the same number of arrivals of steamboats annually in New Orleans and St. Louis during the period from 1840 to 1860.

Dixon tells us that the average rates of speed on the Mississippi and Ohio in 1840 were about 6 miles per hour upstream and 10 to 12 downstream. It is estimated that from 1810 to 1850, 1,070 steamboats were lost, involving a cost of $7,000,000 and many lives. While many of these accidents were due to uncontrollable conditions of navigation, more were due to reckless operation. Racing for speed records resulted in frequent collisions and boiler explosions.

We mentioned earlier the Appalachian barrier which necessitated carrying commodities from the headwaters of the Atlantic rivers to the tributaries of the Ohio system. The Great Lakes were naturally being utilized as a means of access to the West while this development of traffic on the Ohio and Mississippi was going on, and the Erie Canal was conceived early in the nineteenth century as a means of overcoming this barrier. The physical geography greatly favored this project, as the Mohawk Valley offered a route with no very high climb. Meyer points out, however, that there were very serious handicaps in the scarcity of engineers, contractors, and excavating machinery, the unbroken forests and miasmal marshes the route must follow, and the sectional jealousy between eastern and western New York. These were all ultimately overcome, however, and the canal, begun in 1818, was opened for traffic in 1825. The effect of this monumental work soon became apparent, and it is widely admitted that the Erie Canal played a very large part in giving New York the start over the other Atlantic ports which has made it the metropolis of the Western Hemisphere.

The earliest year for which we have the tonnage figures for the Erie Canal is 1837, in which year 667,151 tons were moved. This tonnage increased to 945,944 in 1844, 1,635,089 in 1850, 2,253,533 in 1860, and 4,608,651 in 1880, the peak year for the Erie Canal. As recently as 1865 the tonnage on the Erie Canal exceeded that of the Erie Railroad, while the New York Central did not overtake the Canal until 1870.

Other canals were built across the mountains and watersheds, and some of them performed very important rôles until, handicapped by shallow draft, small vessel capacity, and the necessity for towpaths and mule power, they were superseded by the railroads. The Erie Canal alone, enlarged some 20 years ago to carry power boats and barges of economic size, has remained an important factor in transcontinental transportation.

This story would be incomplete without some inclusion of those greatest of inland waterways—the Great Lakes. Trading posts were established at various points on the lakes in the seventeenth century (Meyer), and the *Griffin*, built near Buffalo, made the first voyage of the upper lakes, only to be lost on the return voyage. The English began boat building at about the same point in 1759, and also on Lake Ontario. The first American-built vessel was launched in 1797 near Erie, Pa. The first steamboat to navigate the Lakes was built in 1817 at the head of the St. Lawrence.

The following year the *Walk-in-the-Water* was launched in the Niagara River above the falls. Her machinery was hauled in wagons from Albany, and oxen were used to tow her up the river to Lake Erie against the strong current. She made regular trips to and from Detroit, a round trip taking 9 or 10 days.

Grain began to move East in 1836, and by 1840 Meyer tells us there was a regular movement, carried by a few sailing vessels of about 125 tons each and a half-dozen sidewheel steamers.

Copper was discovered in the Lake Superior region in 1843–44, but vessels on the lower Lakes could not reach Lake Superior on account of the falls and rapids in St. Marys River. This situation was not remedied until 1882, when the first Soo Canal was authorized.

There is not time to describe the remarkable growth of traffic on the Great Lakes, particularly in the movement of grain and iron ore east and coal west. Aided by vessels and terminals designed especially for this traffic, transportation on the Great Lakes has become probably the cheapest in the world (about a twentieth of that of rail transportation), and its effect on the grain trade and the coal and steel industries is incalculable.

The early development of railroads, which were destined to have such a far-reaching effect on inland waterway transportation, seems to have proceeded on the assumption that the railroads could not compete with the waterways but should be supplemental to them, reaching where the waterways could not go. Consequently, although fragmentary railroads across New York State, competing it is true with the Erie Canal, had been constructed before 1840, nobody had the temerity to undertake a line alongside the Hudson River until 1846, while a necessary section of what is now the main line of the Pennsylvania Railroad was built originally as a means of hauling canal boats over the Alleghany Mountains. Dixon points out that the earliest railroads in the Middle West were largely short lines connecting with the waterways. He also notes that the railroads first specialized in passenger transportation and were not properly equipped to handle freight. For example, the Baltimore & Ohio in 1831 carried 81,905 passengers and only 593 tons of freight. As the era of railroad building proceeded, however, it became apparent that the railroad had two important advantages in speed and ability to go where the steamboat could not go. It also became apparent that the least expensive rail routes were usually alongside the waterways, and by 1860 there were rail lines in all directions in Ohio. Farther west and south there was less development.

The competition of the northern railroads began to be felt at New Orleans even before the Civil War. Nevertheless we are told by the Inland Waterways Commission that steamboat transportation on the lower Mississippi from the fifties to the early eighties was the chief agency upon which the people of the Mississippi Valley depended for the carriage of both freight and passengers. Through boats ran from Cincinnati, Louisville, and St. Louis to New Orleans. An interesting note is that in those pre-Volstead days the bar privilege on one boat for its lifetime sold for a sum that built the hull of the boat.

Up to the time of the preliminary report of the Inland Waterways Commission, in 1908, the only material change in the type of boats from the early days was the change from wooden to steel hulls, and this was by no means general. Some of the boats were finely equipped, however. Probably the most famous line was the Anchor Line, which owned as many as 19 fine steamboats. Competition cut into its passenger business, and it sold out and virtiually discontinued operations in 1895.

Authentic figures are not available to show what in tonnage or value has been the loss of traffic on the Ohio-Mississippi system. We know, certainly, that the river steamboat has not been the vital factor during the last 50 years that it was previously, whereas our coastwise and Great Lakes traffic has steadily increased with and contributed greatly to the prosperity of the country.

It is not necessary to go into the question of whether this decline of river commerce since 1880 has been brought about mainly by natural causes, or whether it has been materially hastened by unfair competition and cutting of rates by the railroads. We know, certainly, that the existence of the waterways remains as of lasting benefit to the communities having access to them in keeping rail rates down below the general level for interior points. We recognize now that the spectacular river steamboat of the nineteenth century was costly to operate, and we have awakened to the need for modern, economic equipment. We have come to realize that the railroads, because they go everywhere, are the framework of the transportation system, and that waterway transportation, to be successful, must be coordinated with the railroads. This means through routes and rates and adequate facilities for interchange between freight car and barge. We have learned that the advantages of cheap water transportation can be wiped out if we do not have proper terminal facilities, accessible by rail and by truck to the communities they serve.

And what all this time of the waterways themselves? Mark Twain, in his Life on the Mississippi, has given us a vivid picture of the perils of steamboating in his day. The Chief of Engineers in his annual report describes the Ohio River as originally "much obstructed throughout its entire length by snags, rocks, and gravel and sand bars," with an exceedingly variable width of channel and low-water depths over shoals as low as 1 foot. On the Mississippi above the Missouri there were 185 bars with low-water depths of 3 feet or less, while the Rock Island Rapids, 14 miles long, and the Des Moines Rapids, 12 miles long, were absolutely unnavigable in low water. Between the Missouri and the Ohio the waterway "was divided by numerous islands and bars, which distributed large portions of the flow through chutes, sloughs, and secondary channels to the detriment of navigation." At many of these locations the river was a mile wide or more and the maximum usable low-water channel only 3½ or 4 feet. Below the Missouri "low-water navigation was rendered difficult and hazardous by the formation of bars across the channel, sometimes limiting the controlling depths to 4½ feet."

The canal around the falls at Louisville, which was perhaps the first effort to alleviate conditions, was a private enterprise, but the Government early undertook to make the rivers more serviceable. Open-channel work was begun on the Ohio in 1827, and the first of the 52 locks and dams of the present project was authorized in 1879. On the upper Mississippi the Rock Island and Des Moines were by-passed prior to the first general improvement authorization of 1878. Between the Missouri and the Ohio, the first authorization was in 1872; below the Ohio, in 1880.

Space will not permit going into this improvement work in any detail—the necessary linking up of improvement for navigation with flood control, the creation of the Mississippi River Commission. The magnitude of the work; the amount of energy, time, labor, and expense required to maintain the works already constructed and repair the havoc done by floods; and, at least until recent years, the absence of a definite schedule of priorities for all of the waterway and harbor projects on the Federal program, have delayed the completion of these improvements. We have never to this day had a chance to make full use of these great avenues.

Thinking in terms of transportation is the business and pleasure of every American be he buyer or seller, for when all is said and done economy in competitive cost has much to do with the economical and social life of the people in general.

Such must have been in the mind of our very able president, Mr. C. S. E. Holland, for in 1904 he dreamed of cheaper commodities to the consumer, as well as better prices for the producer, and to that end thought in terms of water transportation, the result of which is his dream is coming true.

In 1905 a few invited friends gathered at his home in Victoria, Tex., and organized the Intrastate Inland Waterway League of Louisiana and Texas.

The purpose of the association was "to bring about the construction of an inland waterway from the Mississippi to the Rio Grande," a rather courageous undertaking, to say the least.

The personal and financial support of the idea rapidly broadened and the scope of the field became so large that the association changed its name to the Intracoastal Canal Association of Louisiana and Texas, in order to conform with the Government's official designation of the project.

Realizing that the 5-foot canal was only a beginning, it remained for the Houma, La., annual convention in 1922 to adopt a definite program with the view of bringing about the construction of the canal in its entirety on the basis of a 9-foot depth and 100-foot bottom.

At the next session of Congress following our Houma convention, a resolution was introduced and passed by Congress on March 3, 1923, authorizing a survey of Louisiana and Texas intracoastal waterway from the Mississippi River at or near New Orleans, La., to Corpus Christi, Tex. The survey authorized by this resolution was made by Col. G. M. Hoffman, then United States Division Engineer at New Orleans, and his recommendation, approved by the board of engineers and the Chief of Engineers, was submitted to Congress on April 12, 1924. This report recommended the construction of the canal on the basis of a 9-foot depth and 100-foot bottom width as provided in the survey resolution, at an estimated cost of $16,000,000.

Following exhaustive hearings before the Rivers and Harbors Committee, the recommendation was adopted and placed in the river and harbor bill. Subsequently, in response to the demand of President Coolidge that the total authorizations in the bill amounting to approximately $53,000,000 should be reduced to approximately $40,000,000, the item covering our project was amended to provide for construction as far as Galveston Bay with a limitation of $9,000,000 on the cost. The language of the bill read, "Louisiana and Texas Intracoastal Waterway from the Mississippi River at or near New Orleans to Galveston Bay, Tex."

This, of course, had the apparent effect of authorizing the construction of both routes leaving the Mississippi, namely, the Harvey route from New Orleans to Morgan City, and the Plaquemine route from Plaquemine to Morgan City. However, inasmuch as the $9,000,000 was not sufficient to provide for the construction of the Harvey route, an agreement was reached that the expenditure of the $9,000,000 would be limited to the construction of the Plaquemine route via Morgan City to Galveston Bay.

In the river and harbor act approved January 21, 1928, the authorization of the original recommendation of the engineers was completed. This, of course, included the authorization of the Harvey route at an estimated cost of $4,610,000 and the section from Galveston to Corpus Christi at an estimated cost of approximately $3,000,000.

Here we leave the subject of details regarding our own activity as the present convention will take up the task of making history from this date on.

We are confident that a revival of inland waterway transportation is at hand. The World War showed us the need for all of the transportation obtainable, and the Railroad Administration took over the

Mississippi system as well as the railroads. The Government has continued to operate the barge line, and in doing so is seeking to clear up the mistakes of the past. Not the least important of its accomplishments is the development of suitable and economical equipment—oil-burning towboats and large-capacity steel barges. Our future river transportation will be carried on with less smoke but more efficiency.

At the same time the railroads are coming to see, as many of them have already come to see with respect to motor-vehicle transportation, that they can profitably yield to the advantages of certain waterway routes for certain commodities moved on a contract or private carrier basis. Looking back over the accomplishment of inland waterway transportation we must note the changing attitude of the railroads toward the spreading out of the common-carrier rate structure.

A notable example of this is the double transportation on the Ohio River in the past few years, which, to a marked degree, is an anticipation rather than a realization of the completion of the Ohio River project. Yet the industries in the upper river sections, notably Pittsburgh, are becoming more and more conscious of the economies through the use of waterways, and we may look soon for a steady current of steel products and other commodities for points in the lower Mississippi and along the route of the Intracoastal Canal in Louisiana and Texas.

It has occurred to us that nearly all of the discussion with reference to the canal has been devoted to its downstream use. No one would care to detract from the great volume of such a movement, but let us not forget that our canal traversing the Gulf coast country serves the people who are next-door neighbors to Mexico and all the remaining Latin-American countries and that they have commodities to sell. It seems to us, therefore, that while we are thinking in terms of usefulness, some time should be devoted to the inbound cargo situation not only for local consumption along the route but deliveries to rail heads for inbound shipment.

History shows that human races have always recognized the economies of inland water transportation and have depended upon it to a large degree. Our experience in the last 100 years has taught us its limitations, but has not shaken our faith in it. We have come now to think of transportation nationally instead of locally; and we are prepared to proceed to develop and utilize every form of transportation—rail, water, motor, and air—to its economic limit.

One can not close this brief history of inland waterway transportation without centering his thought on the Intracoastal Canal in which we are all so deeply interested and pay tribute to the men who with their time and money made the project possible. By such men are empires created.

INAUGURAL ADDRESS OF HON. FRANKLIN D. ROOSEVELT, OF NEW YORK

Mr. WAGNER. Mr. President, I ask unanimous consent to have printed in the RECORD the inaugural address of Hon. Franklin D. Roosevelt, Governor of the State of New York, delivered at Albany, N. Y., January 1, 1929.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

This day is notable not so much for the inauguration of a new governor as that it marks the close of the term of a governor who has been our chief executive for eight years.

I am certain that no governor in the long history of the State has accomplished more than he in definite improvement of the structure of our State government, in the wise, efficient, and honorable administration of its affairs, and, finally, in his possession of that vibrant, understanding heart attuned to the needs and hopes of the men, the women, and the children who form the sovereignty known as the people of the State of New York.

To Alfred E. Smith, a public servant of true greatness, I extend on behalf of our citizens our affectionate greetings, our wishes for his good health and happiness, and our prayer that God will watch over him and his in the years to come.

It is a proud thing to be a citizen of the State of New York, not because of our great population and our natural resources, nor on account of our industries, our trade, or our agricultural development, but because the citizens of this State more than any other State in the Union have grown to realize the interdependence on each other which modern civilization has created.

Under the leadership of the great governor whose place you have selected me to fill has come a willingness on our part to give as well as to receive, to aid, through the agency of the State, the well-being of the men and women who by their toil have made our material prosperity possible.

I object to having this spirit of personal civil responsibility to the State and to the individual which has placed New York in the lead as a progressive Commonwealth described as "humanitarian." It is far more than that. It is the recognition that our civilization can not endure unless we as individuals realize our personal responsibility to and dependency on the rest of the world. For it is literally true that the "self-supporting" man or woman has become as extinct as the man of the Stone Age. Without the help of thousands of others, any one of us would die, naked and starved. Consider the bread upon our table, the clothes upon our backs, the luxuries that make life pleasant; how many men worked in sunlit fields, in dark mines, in the fierce heat of molten metal, and among the looms and wheels of countless factories in order to create them for our use and enjoyment?

I am proud that we of this State have grown to realize this dependence and, what is more important, have also come to know that we as individuals in our turn must give our time and our intelligence to help those who have helped us. To secure more of life's pleasures for the farmer; to guard the toilers in the factories and to insure them a fair wage and protection from the dangers of their trades; to compensate them by adequate insurance for injuries received while working for us, to open the doors of knowledge to their children more widely, to aid those who are crippled and ill, to pursue with strict justice all evil persons who prey upon their fellow men, and at the same time by intelligent and helpful sympathy to lead wrongdoers into right paths. All of these great aims of life are more fully realized here than in any other State in the Union. We have but started on the road, and we have far to go; but during the last six years in particular the people of this State have shown their impatience of those who seek to make such things a football of politics or by blind, unintelligent obstruction attempt to bar the road to progress.

Most gratifying of all, perhaps, is the practical way in which we have set about to take the first step toward this higher civilization, for, first of all, has been the need to set our machinery of government in order. If we are to reach these aims efficiently without needless waste of time or money, we must continue the efforts to simplify and modernize. You can not build a modern dynamo with the ancient forge and bellows of the medieval blacksmith. The modernization of our administrative procedure not alone that of the State but also of those other vital units of counties, of cities, of towns, and of villages must be accomplished; and while in the unit of the State we have almost reached our goal, I want to emphasize that in the other units we have a long road to travel.

Each one of us must realize the necessity of our personal interest not only toward our fellow citizens but in the government itself. You must watch, as a public duty, what is done and what is not done at Albany. You must understand the issues that arise in the legislature, and the recommendations made by your governor, and judge for yourselves if they are right or wrong. If you find them right, it is your duty as citizens on next election day to repudiate those who oppose, and to support by your vote those who strive for their accomplishment.

I want to call particularly on the public press of this State, in whose high standards I have the greatest confidence, to devote more space to the explanation and consideration of such legislation as may come up this year, for no matter how willing the individual citizen may be to support wise and progressive measures, it is only through the press, and I mean not only our great dailies but their smaller sisters in the rural districts that our electorate can learn and understand what is going on.

There are many puzzling problems to be solved. I will here mention but three. In the brief time that I have been speaking to you there has run to waste on their paths toward the sea enough power from our rivers to have turned the wheels of a thousand factories, to have lit a million farmers' homes—power which nature has supplied us through the gift of God. It is intolerable that the utilization of this stupendous heritage should be longer delayed by petty squabbles and partisan dispute. Time will not solve the problem; it will be more difficult as time goes on to reach a fair conclusion. It must be solved now.

I should like to state clearly the outstanding features of the problem itself. First, it is agreed, I think, that the water power of the State should belong to all the people. There was perhaps some excuse for careless legislative gift of power sites in the days when it was of no seemingly great importance. There can be no such excuse now. The title to this power must vest forever in the people of this State. No commission; no, not the legislature itself has any right to give, for any consideration whatever, a single potential kilowatt in virtual perpetuity to any person or corporation whatsoever. The legislature in this matter is but the trustee of the people, and it is their solemn duty to administer such heritage so as most greatly to benefit the whole people. On this point there can be no dispute.

It is also the duty of our legislative bodies to see that this power which belongs to all the people is tranformed into usable electrical energy and distributed to them at the lowest possible cost. It is our power; and no inordinate profits must be allowed to those who act as the people's agents in bringing this power to their homes and workshops. If we keep these two fundamental facts before us, half of the problem disappears.

There remains the technical question as to which of several methods will bring this power to our doors with the least expense. Let me here make clear the three divisions of this technical side of the question.

First. The construction of the dams, the erection of power houses, and the installation of the turbines necessary to convert the force of the falling water into electricity.

Second. The construction of many thousands of miles of transmission lines to bring the current so produced to the smaller distributing centers throughout the State.

Third. The final distribution of this power into thousands of homes and factories.

How much of this shall be undertaken by the State, how much of this carried out by properly regulated private enterprises, how much of this by some combination of the two, is the practical question that we have before us. And in the consideration of the question I want to warn the people of this State against too hasty assumption that mere regulation by public-service commissions is in itself a sure guaranty of protection of the interests of the consumer.

The questionable taking of jurisdiction by Federal courts, the gradual erection of a body of court-made law, the astuteness of our legal brethren, the possible temporary capitulation of our public servants and even of a dormant public opinion itself, may in the future, as in the past, nullify the rights of the public.

I as your governor will insist, and I trust with the support of the whole people, that there be no alienation of our possession of and title to our power sites, and that whatever method of distribution be adopted there can be no possible legal thwarting of the protection of the people themselves from excessive profits on the part of anybody.

On another matter I tread perhaps a new path. The phrase, "rich man's justice," has become too common nowadays. So complicated has our whole legal machinery become through our attempt to mend antiquated substructures by constant patching of the legal procedure and the courts that justice is our most expensive commodity. That rich criminals too often escape punishment is a general belief of our people. The difficulty with which our citizens maintain their civil rights before the courts has not been made a matter of such public notice but is equally serious. It is my hope that within the next two years we will have begun to simplify and to cheapen justice for the people.

Lastly, I want to refer to the difficult situation to which in recent years a large part of the rural population of our State has come. With few exceptions it has not shared in the prosperity of the urban centers.

It is not enough to dismiss this problem with the generality that it is the result of changing economic conditions. It is time to take practical steps to relieve our farm population of unequal tax burdens, to install economies in the methods of local government, to devise sounder marketing, to stabilize what has been too much a speculative industry; and, finally, to encourage the use of each acre of our State for the purpose to which it is by nature most suited. I am certain that the cities will cooperate to this end, and that more and more we as citizens shall become State-minded.

May I, as your newly elected governor, appeal for your help, for your advice, and, when you feel it is needed, for your criticism? No man may be a successful governor without the full assistance of the people of his own commonwealth.

Were I as wise as Solomon, all that I might propose or decide would be mere wasted effort, unless I have your constant support. On many of the great State questions that confront us, the platforms and the public pledges of candidates of both parties are substantially agreed. We have passed through a struggle against old-time political ideas, against antiquated conservatism, against ignorance of modern conditions, marked by serious disagreements between the legislative and the executive branches of the Government. As I read the declarations of both parties in asking the support of the people at the polls, I can see little reason for further controversies of this kind.

There is a period in our history known in all our school books as the "Era of Good Feeling." It is my hope that we stand on the threshhold of another such era in this State. For my part, I pledge that the business of the State will not be allowed to become involved in partisan politics and that I will not attempt to claim unfair advantage for my party or for myself, for the accomplishing of those things on which we are all agreed.

You have honored me greatly by selecting me as your chief executive. It is my hope that I will not fail you in this critical period of our history. I wish that you may have a continuance of good government and the happiest of New Years.

NICARAGUA AND PANAMA CANALS

Mr. EDGE. Mr. President, I ask unanimous consent for insertion in the RECORD of three editorials, one from the New York World, one from the Washington Star, and one from the St. Louis Post Dispatch, all indorsing the pending resolution providing for a survey of the Nicaraguan canal and for a further investigation of the proposed enlargement of the Panama Canal. I would ask unanimous consent that the very short editorial from the New York World be read at the desk.

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The legislative clerk read as follows:

[From the New York World, Tuesday, December 25, 1928]

A NEW LINK BETWEEN THE OCEANS

Senator EDGE says that if the traffic of the Panama Canal continues to increase at the rate of the last five years the capacity of the waterway will be overtaxed by the end of the next decade. The probabilities are that the traffic will continue to increase, but not relatively at the same rate as in the years of its early development. Yet there is no doubt that at some time within the not too distant future a second route across the Isthmus will be a commercial necessity, and that if it is to be ready when it is needed its construction should begin 10 or 15 years in advance of its need.

Commercial requirements are not the only consideration. A quick and convenient passageway between the east and west coasts of the United States is essential to the national defense. In case of war the Panama Canal will become one of our most vulnerable points—a veritable heel of Achilles. Two canals will afford vastly more protection than one.

A joint resolution is now before the Senate authorizing a survey for a canal through Nicaragua and a study of methods for increasing the capacity of the Panama Canal. This survey will involve relatively little expense because of the data assembled by the Isthmian Canal Commission in 1901. All that is needed is a revision which new engineering methods and changed construction costs require after the passage of so many years. The proposal is timely and Congress should adopt it.

The VICE PRESIDENT. The other two editorials referred to by the Senator from New Jersey will be printed in the RECORD, as requested.

The editorials are as follows:

[From the Washington Star, January 2, 1929]

THE NICARAGUA CANAL

When the Panama Canal, joining the Atlantic and Pacific Oceans, was authorized and later opened in 1915, it was generally supposed that the problem of water traffic between the East and the West had been solved. But now, after 14 years of use of the Panama Canal, it appears that the capacity of that canal will within the course of a few years be reached. It becomes evident that the commerce of the world demands still another waterway between the oceans.

Before it was finally determined to construct the Panama Canal there was a protracted fight in Congress to provide for a canal and waterway across Central America through Nicaragua. The Nicaraguan route was the preference of many of the legislators. And now that the time is coming when another route for shipping is to be necessary, it is proposed that the United States shall again undertake this great work and run a canal through Nicaragua. Senator EDGE, of New Jersey, author of a resolution providing for a thorough investigation and survey of the proposed canal route through Nicaragua, has given notice he will ask for action on the measure at the present session of Congress. It is not an undertaking to be lightly entered upon and it will receive serious consideration when the Senate reconvenes.

The United States is in a position to go ahead with this proposed Nicaraguan canal. Its treaty rights with Nicaragua have been in existence for years. President-elect Hoover, himself an engineer, during his recent visit to Nicaragua discussed the matter at length with the President of that country. It is not unlikely that Mr. Hoover would be glad to see this great engineering project initiated during his administration. It is estimated that it will require years to be brought to a completion. The time the work will require is a matter of estimate only, although American methods of construction may shorten it appreciably.

The business passing through the Panama Canal has grown by leaps and bounds. It has doubled every five years and is practically five times as great as it was during the first year of the operation of the canal. Senator EDGE believes that by 1940—certainly by 1960—the capacity of the Panama Canal will have been exceeded. The question naturally arises as to whether a Nicaraguan canal will not so reduce the business of the Panama Canal as to make the earlier canal or both "unprofitable." But there seems no end to the increase in the commerce and travel between the West and the Far East and the prospect is that eventually both canal routes will be well patronized.

[From the St. Louis Post-Dispatch, December 20, 1928]

THE NICARAGUA CANAL

Few things so fire the imagination of the people of the United States, and so fulfill their expectations of the sort of thing this great country should be doing, as the proposal that we build the Nicaragua canal.

Senator EDGE, chairman of the Senate Committee on Interoceanic Relations, is urging this project upon Congress. He does not rest his case upon either national sentiment or pride, which naturally dispose us toward such a great service to posterity, but upon the actual necessities of commerce. The Panama Canal has been more than a success. It has become to modern contact between oceans and continents a necessity that the Western Hemisphere could no more do without than the Eastern Hemisphere could do without the Suez Canal.

The increase in traffic through the Panama Canal has been beyond all expectations. In 1915, its first year, 1,075 vessels passed through it, and its revenue was $4,367,550. In the last year 6,456 vessels have gone through it, and its revenue has grown to $26,944,449. On a

commercial basis of $275,000,000, it is now paying 7½ per cent on the investment. The time is not far distant when it will be too small. In the opinion of Senator EDGE we shall have to do one of two things—enlarge the Panama Canal or build the Nicaragua canal.

We feel that the country will vastly prefer to build the Nicaragua canal. We have already paid Nicaragua $3,000,000 for the right to do so. In the days before we built the Panama Canal a commission of experts appointed to survey the proposed routes—that is, the one upon which the French had been working in Panama and the Nicaragua route—reported unanimously for the latter. It was a very great surprise when Congress thrust aside this recommendation and voted to build the canal across Panama. Perhaps the factor which determined its action was the feeling that in a region frequented by earthquakes a canal at virtual sea level was much less exposed to cataclysmic fortuity. If that was the reason we went to Panama, it was not a feeling shared by engineers. They have never had the least doubt about the practicability of the Nicaragua canal. It would first ascend the San Juan River and then traverse Lake Nicaragua, whence it would give into the Pacific. It would be about 183 miles long. As a scenic trip, which has made the Panama Canal such a great attraction, it would be incomparably preferable. Lake Nicaragua, lying in the Cordilleras at an altitude exceeded only by one other body of fresh water, Lake Titicaca, in the Andes, is one of the great natural phenomena of the world. Surrounded by volcanoes, some of them always active, about 100 miles long, and gemmed by islands in a setting like none other on earth, its beauty is said to be indescribable.

There are, too, as Senator EDGE says, political and social considerations which support the commercial claims of the Nicaragua canal. The effect of the Panama Canal has been to compose the lower isthmus and give it a place in our ordered civilization. Both Colon and Panama City are growing commercial cities in which the nationals of many countries do business unharassed by political disquiet. Mr. EDGE thinks the Nicaragua canal would have the same effect upon the upper isthmus. He reminds the Senate that we have been anything but happy in that region, which is true, as it also is true that by putting Nicaragua and the countries about her on one of the great commercial highways we can make of them, as we have already made of Panama, Cuba, and Porto Rico, political friends and commercial allies.

That is much better than making Latin-America a hunting ground for the marines.

ENFORCEMENT OF PROHIBITION

Mr. SHEPPARD. Mr. President, I present and ask that there may be printed in the RECORD three brief articles from the Washington Post of yesterday relative to the enforcement of prohibition during the past year and to the outlook for the future.

One of these articles contains the views of former Representative Andrew J. Volstead, the author of the act for the enforcement of the eighteenth amendment; another the comments of Dr. J. M. Doran, the Federal Prohibition Commissioner, and of Dr. F. Scott McBride, general superintendent of the Anti-Saloon League, and the other the observations of Mr. E. C. Yellowley, prohibition administrator for the Chicago district. I ask unanimous consent that these three articles may be published in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, January 2, 1929]

DRY LAW ENFORCED, VOLSTEAD ASSERTS—YEAR'S GREATEST SUCCESS IS STOPPING THE DIVERSION OF ALCOHOL, HE ADDS—SEES "TOPERS" PASSING

St. Paul, Minn., January 1 (United Press).—Prohibition enforcement the past year was rigid and successful and 1929 will be a "banner year" in reducing liquor consumption, Andrew J. Volstead, "father of the dry law," declared today.

"The greatest achievement of last year," the former Minnesota representative in Congress said, "was the successful stoppage at its source of alcoholic diversion from legal to illegal uses. Illicit diversion of alcohol is almost a thing of the past. Shipments of alcohol and alcoholic preparations in carload lots have also practically disappeared."

The absence of the saloon, he said, has dispensed with the former problem of "topers," who gradually are passing out of existence.

"Some young people drink, no doubt," Volstead added, "but they think it is smart. As there are no saloons, however, it is not likely that they will acquire the habit. The 'topers' were once our greatest problem, but are now only a minor consideration. As time goes on they will gradually pass away and we will have less trouble."

Volstead said the real battle ground for national prohibition enforcement was in the big cities. He named New York, Detroit, Chicago, Philadelphia, Baltimore, and Boston as the country's "wettest" spots.

"The day of the big bootlegger is gone from many districts," he added, "and the reign of the erstwhile liquor czars in other places is diminishing."

DRY REORGANIZATION OPPOSED BY DORAN—"MECHANICS" OF BUREAU BETTER THAN EVER, DECLARES COMMISSIONER—SEES CUT IN RUM SUPPLY

(United Press)

Prohibition Commissioner J. M. Doran predicted yesterday that dry law enforcement work would be more proficient and personal observance of the eighteenth amendment to the Constitution would be more general in the new year than at any time since prohibition.

"We get into the new year with the mechanics of the Prohibition Bureau in better shape than ever before, so far as organization goes," he told the United Press in an exclusive interview.

"The prospects of eliminating sources of bootleg supplies were never better, but the machine as it is must be left alone. If anyone attempts a new reorganization of the bureau it would be like trying to unscramble eggs."

COCKTAILS TO GO, HE SAYS

Doran said he was convinced the general public is slowly becoming accustomed to soft drinks instead of intoxicating beverages. He said many are even gradually eliminating near beer as a thirst quencher.

"We are steadily pushing commercial traffickers to the wall, and this removes opportunity to drink. Eventually it is hoped the entire populace will become accustomed to nonintoxicating refreshments instead of celebrating with gin cocktails and whisky highballs.

"This can be brought about by educating the younger generations. Young people who now imbibe, drink for the novelty of it and to get a thrill. American youngsters are not half as bad as some people try to paint them.

CITES "LIFE-SAVER" FOR MANY

"It takes years for the liquor habit to develop and taking one or two drinks every few weeks does not develop the habit. Prohibition is one certain cure for the drink habit. It has been a life-saver for the fellows who had to have five or six drinks of whisky every day to keep them moving."

Doran's view is reflected in a statement by F. Scott McBride, general superintendent of the Anti-Saloon League, who said yesterday there was every indication that voluntary observance of prohibition would increase.

McBride, however, warned that the dry forces expect to seek more severe legislation with more extreme penalties for certain classes of offenders.

PROHIBITION OBEYED, YELLOWLEY THINKS—SOME FEW DRINK, CHICAGO DIRECTOR ASSERTS, BUT MOST ARE RECONCILED—ARRESTS ARE FALLING OFF

CHICAGO, January 1 (A. P.).—E. C. Yellowley, prohibition administrator for the Chicago district, to-day declared that the New Year's celebrations indicate the city and country are becoming reconciled to prohibition and are not finding it so very painful.

"A certain few," he said, "persisted in trying to drink but they were in isolated cases. Reports from my men showed a very satisfactory respect for the prohibition laws."

Only one raid was made by the prohibition officials who toured the city New Year's eve and only three arrests were made. Prohibition agents in hotels and cafes mingled with the guests and ordered the management to confiscate bottles or flasks openly displayed but made no arrests and made no efforts to find hip flasks not on tables.

FEWER ARRESTS MADE

Chicago hotels which entertained 14,000 guests and the night clubs and cafes which entertained probably as many more, characterized the celebration as the liveliest in the city's history.

Mr. Yellowley said fewer arrests were made this year than any previous year and said several places would be observed further as a result of evidence obtained by his men last night.

In his annual report released to-day, Mr. Yellowley observed that "definite and advanced results" in enforcement of prohibition had been accomplished in the last year, adding that diversion of bonded liquor has been reduced to a minimum and that smuggling from Canada is one of the problems faced by agents now. However, he said, less than 2 per cent of the liquor seized in this district has been found to be real whisky.

MOONSHINE NOW PROBLEM

Diversion of industrial alcohol has been cut in half and the principal problem of prohibition enforcement now is the individual moonshine distiller rather than the large producer of former years, and he predicted this would be remedied with cooperation from the new State's attorney and the United States district attorney.

During the year, said the report, property valued at $3,672,764.54 was seized in the district, and permanent injunctions against 1,154 places were obtained, while 6,272 arrests were made. More than 93,000 gallons of alcohol, 309,000 gallons of beer, and 2,298,000 gallons of mash were seized.

TWO IMMIGRATION BILLS

Mr. WHEELER. Mr. President, I present an article from the Washington Post of Friday, December 28, 1928, entitled "Two immigration bills," which I ask may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

Two months of this session will remain when Congress returns from the holiday adjournment. Barring filibuster, a great deal of worthwhile work can be done before March 4.

Among the important bills offered for the consideration of Congress are two by Senator BLEASE, of South Carolina, which affect the administration of the immigration laws. One of these relates to aliens who have once been deported and who have again entered the country surreptitiously. The other provides for the identification of lawfully resident aliens by administrative means. Both are highly important measures.

Except as provided in a special act relating to the exclusion and expulsion from the United States of those who are members of the anarchistic and similar classes, there is no provision of law under which a penalty other than repeated deportation can be imposed on aliens who have been expelled from the United States and who reenter the country unlawfully. The cost of redeportation is a considerable drain upon the Treasury, and since no imputation of crime or penalty is connected with the deportation procedure it is not surprising that illegal entry is now attempted by deported aliens on later occasions. The Blease measure provides that any alien who has been arrested and deported and who thereafter gains admission to the United States except through lawful channels shall be deemed guilty of a felony and upon conviction shall be punished by fine or imprisonment, followed by deportation under the usual procedure.

The naturalization act of 1906, which is still in force, makes it the duty of immigration officers to cause to be granted to arriving aliens a certificate showing certain information concerning the record of arrival. Following the passage of this law admitted aliens were supplied with a simple certificate, but for one reason or another the practice was abandoned, and for many years certificates of arrival were furnished only in connection with naturalization proceedings, and then not directly to the alien concerned.

A form of certificate of admission has been recently prepared by the Department of Labor, and beginning on July 1, 1928, has been issued to every alien permanently admitted as an immigrant. Without question, the identification card is a document of great value to lawfully admitted immigrants. Its possession facilitates naturalization proceedings and otherwise enables the holder to establish his status as a lawful resident. That these identification cards, as now issued in conformity with the naturalization statute, are appreciated by those to whom they have been issued since July of this year is evidenced by the fact that the Department of Labor reports a very considerable demand for similar certificates from immigrants who were admitted prior to July. No provision has been made for the issuance of documents of any kind in such cases.

The purpose of the Blease bill is to enable the Commissioner General of Immigration, with the approval of the Secretary of Labor, to provide aliens who are lawfully resident in the United States with certificates of admission or residence similar to those now issued, in conformity with law, to arriving immigrants. Perhaps authority might be implied for the issuance of certificates to prior admitted immigrants, but some doubt has been raised as to whether such authority does exist, in view of the fact that the language of the statute provides for their issuance to arriving aliens. Furthermore, the cost of meeting all of the requests which would come in from aliens admitted during the past 20 years would make their issuance impossible without considerable additional appropriations. The suggested law provides for a small charge for each certificate sufficient to reimburse the Government for the expense incurred.

Both of the Blease measures would be of material aid in enforcing the immigration laws. The number of aliens who enter in violation of law, or who enter as seamen in pursuit of their calling, as visitors and as transits, and remain unlawfully, makes identification of legal residents necessary both to them and to the Government. As to providing penalties for willful surreptitious entry after an undesirable alien has once been deported, no comment is necessary. Deported aliens who reenter illegally should be taught by appropriate means that the laws can not be lightly disregarded.

TEMPERANCE AND PROHIBITION

Mr. BRUCE. Mr. President, I ask unanimous consent to have printed in the RECORD two powerful communications just made by Mr. William Randolph Hearst, in relation to the prize of $25,000, offered by him for the best plan for repealing the eighteenth amendment, and thereby correcting the present evils and abuses of prohibition. One is a telegram sent by Mr. Hearst to Mr. W. C. Durant, and the other is a telegram sent by Mr. Hearst to Mr. Edwin J. Clapp.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[From the Washington Times, January 3, 1929]

HEARST STRIVES FOR REAL TEMPERANCE

Mr. William Randolph Hearst to-day sent the following telegram to W. C. Durant in reply to Mr. Durant's comment on the publisher's offer of a $25,000 prize:

SAN SIMEON, CALIF., *January 3.*

W. C. DURANT,

250 West Fifty-seventh Street, New York.

MY DEAR MR. DURANT: I received your telegram and enjoyed it. We are not so far apart as might seem at first glance. At least we are not far apart in some phases of the problem we are discussing. You are in favor of temperance; so am I. I do not know how long you have been interested in the temperance movement, and how and to what extent you have crusaded for temperance.

Unless you might say the same thing about me, let me hurry to state that I have been a crusader in the temperance movement for something over 40 years; and I have printed an enormous number of editorials and cartoons attacking the saloon and the dispensation of hard liquors. That these editorials were at least considered effective propaganda may be indicated by the fact that many of the temperance organizations of the country asked leave to distribute them and did distribute many of them widely.

Therefore, I can assume, I think, that we are both equally sincerely interested in the cause of temperance; and the only difference between us is a difference of opinion as to what is the best means of promoting that cause.

You apparently believe that prohibition is an intelligent and practicable effort to promote temperance. I do not believe that it is. Our objective being the same—temperance or even total abstinence—our difference is merely one of method. I admit that I never did believe that prohibition would be effective as a temperance measure, for the reason that from the first it seemed inevitable, considering the character of our people, that a campaign of force would not be as effective as a campaign of education.

As I said in a previous telegram, paraphrasing a familiar quotation, you can lead the American people to water, but you can not make them drink it.

Furthermore, my fight had been chiefly against hard liquors, and it seemed to me from the first that it would be easier for the law-defying element to deal illicitly in hard liquors than in the milder and bulkier form of alcoholic drinkables. This opinion seems to have been borne out by the facts; and I think it can be truthfully said to-day that any man who wants a drink can get one; and about the only difference between the present condition and the condition preceding prohibition is that a man who wants a mild drink is compelled to take a strong one; and a man who wants a good drink is compelled to take a bad one.

It is true that saloons have been closed, but saloons were being closed before prohibition was enacted, being closed through the education of the public, through a high rate of excise taxation, through local option, and through direct legislation.

Since prohibition, for every saloon that has been closed there is either a still or a speakeasy or a bootlegger supplying the most vicious and injurious kind of liquor that it is possible to concoct or conceive of.

You ask is anybody in favor of the bootlegger and the speakeasy? The obvious answer is—No; nobody is, except possibly, the bootlegger and the proprietor of the speak-easy.

Some of the public are sincere enough and clear-thinking enough, however, to be opposed not only to the bootleggers and the speak-easy but to the condition which creates the bootlegger and the speak-easy.

You ask if anyone is opposed to the Constitution and the law. Nobody except the criminal class. But some of the public are sufficiently intelligent to realize that, when supporting the Constitution as a whole, they are also supporting that clause of the Constitution which permits the modification by amendment of that document's provision; and that it is just as much within the rights and liberties of the people to take prohibition out of the Constitution as it was within their rights and liberties to put it in in order to see how it would operate.

You intimate that prohibition has not been given a sufficient trial or a sufficiently fair trial.

It has been tried for 10 years. And I think the facts will justify the statement that there are more bootleggers to-day than there ever have been during the past 10 years of trial.

And that there are more speak-easies to-day than there ever have been during those 10 years;

And that there is more hard liquor and bad liquor being distributed to-day than there ever has been during those 10 years;

And that there are more criminals being created to-day by the liquor traffic than there ever has been during those 10 years;

And that those criminals, brought up and educated in law defiance by the liquor traffic, have become defiant of all other laws and added menaces to society in many other fields of dishonest endeavor. Prohibition has financed the underworld.

There is no use preaching, as we all do, that crime does not pay when it so obviously does pay—and pays big enough dividends to provide for the creation and employment of gangs of gunmen and thugs and murderers and bootleggers and hijackers, many of whom have become rich and consequently almost respectable; and all of whom are as earnestly, if not as conscientiously in favor of prohibition as you, sir, or any other of that measure's honest advocates.

You say that those who are in favor of the repeal of the eighteenth amendment are willing to admit defeat. Not all. They are only willing to admit facts and to call for a more intelligent and more successful plan which will lead them more surely to victory.

You imply that the Republican Party has just won its unprecedented political victory on the prohibition issue, and that the principal appeal of the Democratic candidate was his promise to use his high office to urge a relaxation of the liquor laws.

The Republican Party no more won a victory on the prohibition issue than the Prohibition Party ever won a victory on the prohibition issue. My contention is, and was during the whole campaign, in which I supported Mr. Hoover, that the liquor issue was not an issue at all in a Federal campaign, and that the President could do nothing to relax the liquor laws, and that Mr. Smith was making a false appeal which no intelligent voter should pay any attention to.

Charles Evans Hughes, formerly a justice of the Supreme Court of the United States, and fairly familiar with the laws of the land and the legitimate issues of the campaign, took the same view.

There were genuine issues in the last campaign—such as the maintenance of the high degree of prosperity which had prevailed under a Republican administration—and the voters had sense enough to recognize them. You say that out of 96 Members of the Senate 80 are dry and that out of 435 Members of the House 329 are dry. I would like to say, if it is not disrespectful, that many of them are dry intermittently, as it were, on the installment plan, and that their highest point of desiccation is reached during or immediately preceding a political campaign.

However, that has only an indirect application to the merits of prohibition as a temperance measure.

I am against prohibition for the same reason that the Church Temperance Society of the Episcopal Church stated that they were opposed to prohibition—because it has set the cause of temperance back 20 years.

Because it has substituted an effective campaign of force for an effective campaign of education.

Because it has replaced comparatively uninjurious light wines and beers with the worst kind of hard liquor and bad liquor.

Because it has increased drinking not only among men, but has extended drinking to women and even to children.

Because the most nearly universal Christmas present displayed in the shops, the department stores, the drug stores, and practically in every emporium during the Christmas season of good will to mankind were the hip flasks and cocktail shakers.

I am opposed to prohibition because it has created more and more skillful, and more highly remunerative and more dangerous criminals, and because it has corrupted our forces of law enforcement and to a certain degree even our judges; and because it has made pretenders and falsifiers out of so many of our public officials.

I am opposed to prohibition because it has instituted in the Government un-American methods of spying and sneaking and snooping and keyhole peeping and because prohibition fanatics, not content with that, are trying to have the Government go further and institute a secret police system, and a system of repression and oppression almost equal to that which wrought the ruin of the Russian Government.

What has become of our cherished American freedom of action, our boasted American personal liberty?

All that we held dear in our political system, as well as in our individual independence, has been sacrificed to a fetish.

Any sacrifice might be justified to further a great cause; but prohibition has not furthered the cause. It has hindered the cause. It has created intolerable criminal conditions and intolerable political conditions, and it has done nothing after 10 years' trial to advance the cause of temperance in which you and I are both sincerely and deeply interested.

Therefore, I think the time has come to call for another plan, a better plan, a more practical plan, which will advance the cause of temperance and will not merely promote crime, discredit law, demoralize the citizenship, and prostitute the public service.

WILLIAM RANDOLPH HEARST.

[From the Washington Times, January 3, 1929]

MR. HEARST'S OFFER OF $25,000 PRIZE

W. R. HEARST,

Los Angeles Examiner, Los Angeles, Calif.:

Glad you can use Pinchot plan. Pinchot plan mailed to-day to all Hearst Sunday editors. Your telegraph comments appreciated on subject of Education Versus Force in Getting Eighteenth Amendment Obeyed. We wish you had sent the telegram as entry in prize contest. Would like to come West and talk with you about this problem of law observance as a necessary part of the return of the country to being law-abiding.

EDWIN J. CLAPP.

In reply to the above telegram from Mr. Edwin J. Clapp, famous publicist, formerly with the Hearst papers, but now with Durant Motors (Inc.), Mr. Hearst sent the following telegram, which is printed herewith on account of the prize announcement which it contains:

EDWIN J. CLAPP,

Care Durant Motors (Inc.),

Room 2403, 250 West Fifty-seventh Street, New York, N. Y.:

We do not have to make the American people law-abiding. We only have to keep them law-abiding. And the best way to keep them law-abiding is not to make laws which very large and reputable elements of the community consider unwise, unjust, un-American, and in violation of their fundamental rights as free citizens.

I do not believe that prohibition ever will be or ever can be enforced, and I do believe that if a violent effort is made to enforce it during the next four years by the Republican administration the next President of the United States will be a Democrat.

Smith's candidacy proves nothing except that the people did not want Smith. Nor would the personal liberty issue have won in this campaign with any candidate. But after four more years of snooping, spying, keyhole peeping, and interference with fundamental rights and liberties by fanatics and professional busybodies the country will be ripe for a revolution against un-American conditions of this oppressive and offensive kind.

The opposition to prohibition is not merely by people who want to get drunk. Prohibition is opposed by such temperance influences as the Church Temperance Society of the Episcopal Church and the Hearst newspapers—I modestly put the Church Temperance Society of the Episcopal Church first.

The reason for this opposition is that prohibition is a failure as a temperance measure.

The more we try to enforce it the greater failure it becomes as a temperance measure, because the only thing we can absolutely prevent is traffic in bulky drinkables like wines and beers; and these contain the least amount of alcohol and are consequently the least harmful.

It has never been possible and never will be possible to prevent traffic in compact and concentrated alcoholic drinks; and even if the traffic could be interfered with, every man could make these in his own cellar if he should want to. Furthermore, we must not make the mistake of thinking that the country is divided into two classes—drys, who want to make the country bone dry; and wets, who want to make the country souse-wet.

There is an enormous middle class, which probably is a majority class, who believe in temperance and believe in personal liberty and realize that temperance can be secured without prohibition and never can be secured with prohibition.

These people do not want to be ruled by the liquor interests nor, on the other hand, by the bone-dry fanatics. Sooner or later they are going to assert themselves, and personally I think it will be sooner.

Prohibition has been repudiated by every country which has ever tried it. Primarily, because it did not accomplish the thing it was supposed to accomplish; and secondarily, because it became such an unpopular measure that no government could stand up under it, not even firmly entrenched monarchical governments.

Therefore, I think that in offering a prize on how best to enforce prohibition Mr. Durant is really offering a prize on how best to put the Republican Party out of power. And I personally think Mr. Pinchot has actually won the prize, because his plan, being the most un-American and the most obnoxious, will make the Republican Party more unpopular than any other plan which has been proposed. I did not mean to say in my previous telegram that education would get the eighteenth amendment obeyed.

I meant to say that education would promote a desire for temperance; but any sincere and intelligent desire for temperance will undoubtedly mean the repeal or material modification of the eighteenth amendment.

I consider the eighteenth amendment not only the most flagrant violation of the basic American principle of personal liberty that has ever been imposed on the American public but the most complete failure as a temperance measure that has ever been conceived and put into practical operation.

Therefore, I would like to offer, and hereby do offer, a prize of $25,000 for the best plan to repeal the eighteenth amendment and substitute in place of prohibition a more liberal and more American measure, which will secure for the public more genuine temperance with less offensive interference with the fundamental rights and personal liberties of the citizens.

WILLIAM RANDOLPH HEARST.

CONFIRMATIONS OF SOUTH CAROLINA POSTMASTERS

Mr. BLEASE. Mr. President, I send to the desk a resolution, for which I ask immediate consideration. I ask the indulgence of the Senate for just a moment.

There has been for some time much discussion as to the sale of post offices in my State. I have, when nominations were sent

in, requested from an appointee an affidavit that he or she has not paid or promised to pay any amount to any person or persons for their influence or support in securing said position, and unless such affidavit was filed with me I have declined to allow the party to be confirmed, save in one instance, at the home post office of the senior Senator from my State.

I now have in my possession these affidavits, and if any person has been confirmed and there is any proof anywhere that he has committed perjury in making these affidavits, any person knowing of the facts can prosecute and convict him for perjury in South Carolina.

I have for some time been holding up, or requesting that there be held up, all confirmations of postmasters in South Carolina pending the investigation now going on, and I feel that the time has arrived when I should not longer hold up any confirmation unless there be some definite proof. It is for that reason that I am asking that the investigating committee make the report herein requested, so that if there be such proof the appointees shall not be confirmed, and that those against whom there are no charges may be confirmed in order that the efficiency of the Government's business may not be in any way impaired.

I have personally some facts which I desire to present in case certain appointments are made, or the nominations should come before the Senate.

Mr. President, this resolution simply provides that the committee making the investigation inform the Senate whether or not they have any proof to offer to show why any nominee now before the Senate for confirmation as postmaster in South Carolina should not be confirmed. If there is such proof, I think the Senate is entitled to the information. If there is not, I think it is not right longer to hold up the confirmations, some of which have been here for some time.

I ask for the immediate consideration of the resolution. I am satisfied that the committee will have no objection to presenting the facts if they are requested.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). The Senator from South Carolina asks unanimous consent for the immediate consideration of a resolution which will be read.

Mr. JONES. Mr. President, the chairman of the Committee on Post Offices and Post Roads is not here, and besides this comes very nearly dealing with executive matters. While I am in sympathy with some of the suggestions of the Senator from South Carolina, I think his resolution had better lie over until to-morrow.

Mr. BLEASE. Mr. President, I ask that the resolution may be read. I will state to the Senator from Washington that the chairman of the subcommittee is now in his seat.

Mr. JONES. I understand that the Senator from New Hampshire [Mr. MOSES] is chairman of the committee.

Mr. BLEASE. I am asking for a report from the subcommittee and not from the full committee.

Mr. JONES. I have no objection to the resolution being read, but I think it should go over.

The PRESIDING OFFICER. The resolution will be read.

The Chief Clerk read the resolution (S. Res. 286), as follows:

Resolved, That the subcommittee, of which Senator BROOKHART is chairman, now investigating the patronage and post-office situation in South Carolina, be and is requested to inform the Senate if it has any evidence upon which it can or expects to request the Senate not to confirm any person nominated for postmaster in South Carolina.

Mr. BROOKHART. Mr. President, we have not investigated the phase of the situation referred to by the Senator from South Carolina. It has been the question of selling post-office appointments and collecting campaign contributions by promise of post-office appointments that we have investigated. We have quite a lot of information with reference to South Carolina. I have not checked it with reference to any particular postmaster, but rather with reference to the political machine which is running the appointments down there, and this I have done with a view to cleaning up the so-called crooked machines in the different Southern States. That is what I have been looking into. I think the subcommittee will be ready to report on that phase of the situation during the present session; at least I hope it will be. But we have not taken up the case of any particular postmaster to determine his fitness or whether he should be confirmed.

Mr. BLEASE. That is the reason why I ask for a report now. I have not anything to do with the machine in South Carolina. I have heard a great deal of talk about it. I myself have investigated some of its activities. I have heard Mr. Tolbert sometimes very severely criticized and sometimes otherwise, but I state here now as a Democratic Senator that, so far as I am concerned, I have investigated a good deal and I have never found where Mr. Tolbert has received one cent of corrupt money, unless we would call money corrupt that is collected from men who hold offices, to help keep themselves and their party in office.

I believe in giving a man a fair deal. I have no apologies for Joe Tolbert. I could say a good deal about him that I do not like, but I do know that if there was any proof in the hands of any man in the State of South Carolina that Joe Tolbert sold or bartered an office, or that he had received money in his own personal pocket for the sale of a post office, he would long ago have been in the penitentiary.

I do not think it is right to reflect upon others because some one is after one man only. I have no objection to Mr. Hoover kicking Tolbert out. I have no objection to his putting some one else in charge, because he is going to do that exact thing, of course. It is not Tolbert who is at fault. It is the Republican Party that is collecting this money, and Tolbert is simply their tool. Why deceive men whose appointments are being held up in the Senate and not being confirmed? Why should their confirmations be held up when there is not a single particle of proof that they have done anything wrong? If there is a postmaster in the State of South Carolina who has given or received any money for any wrongful purpose, I will guarantee the Senate, if they will furnish me the proof, that I will put him in the penitentiary. I will guarantee that if they will show me that Joe Tolbert himself personally has wrongfully accepted a dollar, I will put Joe Tolbert in the penitentiary.

I do not believe in saying to the postmasters of South Carolina generally, "You shall not be confirmed because of the fact that somebody says there is some charge of corruption." Let us have the facts. Let us have the report. If anyone is guilty let us prosecute him. If there is no one guilty, then quit slurring my State by saying that we have a wholesale jobbing of post offices going on, which I know is not true, unless it be by authority of the Republican Party. Tolbert might be guilty of it, but there are postmasters in South Carolina, and good ones, who would not submit to being bought or sold under any circumstances. They may contribute to the party, but they do not purchase any one man.

Let us have the facts as they are and expose the guilty and remove the insinuation from those who are not involved in the scandal. Money is paid, but who gets it; let us know.

Mr. BROOKHART. Mr. President, I would like to say further that we have taken the affidavits of every postmaster in South Carolina, and they are printed in the record of the committee hearings and are available to the Senator from South Carolina. If he wants to investigate the desirability of opposing or favoring any particular confirmation, that information is available to him now. We are investigating all of the Southern States. South Carolina is not the only one and probably not the worst one. When we report we shall not report piecemeal, but on the whole situation.

The PRESIDING OFFICER. Under objection, the resolution will go over under the rule.

MULTILATERAL PEACE TREATY

Mr. BLAINE. Mr. President, I desire, as in open executive session, to introduce a resolution relative to the multilateral peace treaty. I ask that the resolution may be read by the clerk and thereafter be printed and lie on the desk, and I shall bring it up at the appropriate time.

I also desire to state in relation to the resolution which I am offering, in order to call it to the attention of the Senate, that paragraph 10 of the British note or the British reservation to the multilateral treaty is another Article X of the covenant for the League of Nations. What Great Britain did not get under Article X of the league covenant she now proposes to acquire by engrafting upon the multilateral treaty paragraph 10 of the British note.

If America adheres to the peace treaty, then we legalize Great Britain's dominion in all the world and we acknowledge that less than 50,000,000 subjects of Great Britain shall have the right to rule over 400,000,000 people without their consent and against their protest. This proposed formula for peace stabilizes and legalizes the spoils of war obtained by the greatest Empire of the world. It is a one-sided declaration of British policy. By the Kellogg treaty America agrees to a decree quieting the title in the name of the British Empire to one-fourth of the world's inhabitable area.

I can not consent to a treaty that obligates America to recognize and respect the claim of any nation against the right of independence of other nations. Therefore, Mr. President, I offer the resolution and ask that it may be read.

The PRESIDING OFFICER. The Senator from Wisconsin, as in open executive session, asks unanimous consent to submit a resolution and that it be read. Without objection, the clerk will read the resolution.

The Chief Clerk read the resolution, as follows:

Whereas in the exchange of diplomatic notes between the United States and Great Britain the British Secretary of State for Foreign Affairs (Chamberlain), in a note to the American ambassador (Houghton), of date London, May 19, 1928, in accepting the invitation of the United States to join in the multilateral treaty, as a condition in adhering to said treaty stated:

"10. The language of Article I, as to the renunciation of war as an instrument of national policy, renders it desirable that I should remind your excellency that there are certain regions of the world the welfare and integrity of which constitute a special and vital interest for our peace and safety. His Majesty's Government have been at pains to make it clear in the past that interference with these regions can not be suffered. Their protection against attack is to the British Empire a measure of self-defense. It must be clearly understood that His Majesty's Government in Great Britain accept the new treaty upon the distinct understanding that it does not prejudice their freedom of action in this respect. * * *." And which condition and declaration, in substance, is repeated in the note of date London, July 18, 1928, from the British Secretary of State for Foreign Affairs to the American Government; and

Whereas said paragraph 10 of the British note is a unilateral condition upon the same subject matter and effecting in part the same purpose as does Article X for the Covenant of the League of Nations:

Resolved, That the Senate of the United States declares that, in advising and consenting to the multilateral treaty, it does so with the understanding that said paragraph 10 of the British note shall not imply any admission of any reserve made in connection therewith.

The Secretary of State is requested to forward a copy of this resolution to the representatives of the other powers.

The PRESIDING OFFICER. Without objection, the resolution will be referred to the Committee on Foreign Relations.

Mr. BLAINE. No, Mr. President, my request was that the resolution be printed and lie upon the table, stating that I would offer it at the appropriate time when the multilateral treaty is before the Senate for consideration.

Mr. SWANSON. I suggest that it lie on the table as in open executive session of the Senate, as is the case with the treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EDGE. Mr. President, I desire to propound a question to the Senator from Wisconsin on the subject matter he has just presented. In quoting section 10 of the letter from the British Foreign Office to the American Secretary of State, did the Senator from Wisconsin include the entire paragraph or section 10? I did not hear clearly the reading.

Mr. BLAINE. I included the entire section as it relates to the declaration of policy by the British Government. I omitted that part of paragraph 10 which offers to our Secretary of State a gratuitous interpretation and application of the American Monroe doctrine.

Mr. EDGE. I thank the Senator.

DISTRIBUTION OF THE CONGRESSIONAL RECORD

Mr. HEFLIN. Mr. President, just before the Senate recessed for the Christmas holidays, I gave notice that I would ask for the consideration of the bill to increase the number of copies of the CONGRESSIONAL RECORD to each Senator and each Member of the House of Representatives.

Mr. JONES. Mr. President, has morning business been concluded?

The PRESIDING OFFICER. Morning business has not been completed. Concurrent or other resolutions are in order.

Mr. HEFLIN. Mr, President, I merely wish to make a statement. The senior Senator from Utah [Mr. SMOOT] was called out of the Chamber and said he could not be here this morning, and desired to know if I would not let this matter go over until to-morrow morning. I do not want the measure to lose its place; it ought to be considered and passed at an early date. I do not think it will take more than twenty or thirty minutes to consider and dispose of it, and I am willing that it should go over with the understanding that we may have some time to consider it to-morrow morning.

ENFORCEMENT OF THE EIGHTEENTH AMENDMENT

Mr. JONES. I submit a Senate resolution, which I ask may be read and then referred to the Committee on the Judiciary.

The Chief Clerk read the resolution (S. Res. 287), as follows:

Resolved, That a committee of five Senators be appointed by the Vice President to investigate the enforcement of the eighteenth amendment to the Constitution of the United States. Said committee is authorized and directed to make a complete investigation and study of the system and methods of the enforcement of said amendment and the laws passed thereunder, and to determine the best means and methods for improving the enforcement thereof, and submit its report and recommendations to the Senate at as early a date a practicable, and not later than January 1, 1930.

The committee is authorized to take such testimony, subpœna such witnesses, employ such stenographers at a cost of not to exceed 25 cents per 100 words, and such clerical help as may be necessary, to enable it to make a complete study and investigation. The cost thereof shall be paid out of the contingent fund of the Senate upon vouchers signed by the chairman of such committee: *Provided*, That the cost of such study and investigation shall not exceed $10,000.

The PRESIDING OFFICER. The resolution will be referred to the Committee on the Judiciary.

Mr. KING. Mr. President, apropos of the resolution just submitted by the Senator from Washington, permit me to say that a few years ago a Senate committee was appointed, known as the Couzens committee, for the purpose of investigating the Internal Revenue Bureau of the Government, including the Prohibition Unit. That committee consisted of the Senator from Michigan, Mr. COUZENS, the Senator from Indiana, Mr. WATSON, the former Senator from Kentucky, Mr. Ernst, the late Senator Jones, from New Mexico, and myself. After taking testimony for perhaps two weeks in connection with the enforcement of the Volstead Act the revelations were of such a character and the evidence so conclusive of its nonenforcement and the evils existing either from the law or its nonenforcement that the committee felt there was no profit in further prosecuting the investigation.

Subsequently, another committee of the Senate spent considerable time in investigation of prohibition. Later the committee investigating the election of Mr. Vare had occasion to make an inquiry as to the expenditures of the Anti-Saloon League, and that committee ascertained that the Anti-Saloon League had collected and expended more than $60,000,000 in carrying on its activities. I am not quite clear as to the necessity of further investigation of this subject.

I introduced a bill this morning which I think, if enacted, will be of some advantage in bringing about a better enforcement of the law. The bill transfers to the Department of Justice—the law-enforcing department of the Government, armed and equipped as it is to enforce all laws—the enforcement of the prohibition law. The Department of Justice was created in the early days of the Republic. It is the law-enforcing agency of the Government. It is equipped to advise all officers of the Government and to enforce the criminal laws of the United States. It has hundreds of district attorneys and assistant district attorneys; it has hundreds, if not thousands, of marshals, deputy marshals, investigating agents, secret-service agents, and other instrumentalities. It has always seemed to me that to be an anomalous and rather an absurd thing to place the enforcement of criminal statutes in the tax-collecting agency of the Government.

When the Volstead Act was under consideration in the Committee on the Judiciary I opposed the provision creating the Prohibition Unit, and moved as an amendment to the bill that the enforcement of its provisions be placed in the hands of the Department of Justice. The bill which I introduced this morning is merely a reiteration of the position which I took years ago when the Volstead Act was under consideration before the Judiciary Committee.

Mr. BRUCE. Mr. President, I should like to ask the Senator from Washington [Mr. JONES] a question, which I regret it is necessary to ask. This resolution, of course, contemplates the appointment of Senators as members of the proposed commission, does it not?

Mr. JONES. Yes; that is what it provides for. I do not care to discuss it on the floor of the Senate, however, at this time. The resolution has been referred to the committee.

Mr. BRUCE. In others words, what the Senator contemplates is not an investigation such as the incoming President has promised us—that is to say, an impartial, searching, and exhaustive investigation by a disinterested commission appointed outside of Congress, but a committee of investigation made up of Members of this body, who would carry on their deliberations under the uplifted lash of the Anti-Saloon League. What possible occasion, in view of the promise that Mr. Hoover has made to us, can there be for such a committee as is proposed by the resolution? The very nature of the committee suggests the idea that it is intended to forestall action by the incoming President; to use figurative language, to take the wind out of his sails.

Mr. JONES. No; there is no intention of that kind at all.

Mr. BRUCE. I do not like to use such an expression, but the purpose is to foist upon the people of the country a senatorial investigation instead of such an impartial and dispassionate investigation as we have every reason to believe Mr. Hoover, in view of his solemn promise, will give to the people

of this country. Prohibition has often been made the subject of astute indirection in one form or another. I hope that practice will not proceed to the extent of the adoption of this resolution by this body.

Mr. JONES. Mr. President, I have no remarks to make on the resolution at this time.

APPROPRIATIONS FOR THE STATE AND OTHER DEPARTMENTS

The PRESIDING OFFICER. Morning business is closed, and the calender under Rule VIII is in order.

Mr. JONES. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House bill 15569, making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 15569) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor for the fiscal year ending June 30, 1930, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. JONES. I ask that the formal reading of the bill may be dispensed with and that the bill may be read for amendment, the amendments of the committee to be first considered.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. KING. Mr. President, an examination of the bill reveals that it carries an appropriation of more than $21,000,000 above that for the same departments and agencies appropriated for the present fiscal year. In the light of the promises of economy made by the President and the party in power, I am unable to understand why this bill, as well as others which have been reported, carry appropriations so much in excess of those of preceding years. It is apparent that the appropriations under these promises of economy will exceed $5,000,000,000 for the next fiscal year.

Mr. JONES. The increase was made in the House in the consideration of the bill, and almost the entire part of that increase was caused by the appropriation for taking the next census.

Mr. KING. I inquire as to the reason for the very large appropriation for the aeronautical branch of the Department of Commerce.

Mr. JONES. The aeronautical branch, of course, is an activity that is expanding quite rapidly; it is developing very fast; and the Budget estimate for it was agreed to by the House excepting about $33,000. That amount has been put on by the Senate committee in order to bring the appropriation up to the Budget estimate. It was urged by the Department of Commerce that if the Budget estimate should be reduced it would very largely cripple the administrative work in connection with this activity, which is expanding, as I have said, very rapidly. The Assistant Secretary of Commerce sent us a very strong letter urging that the appropriation be brought up to the Budget estimate, and the Senate committee, after considering the question, thought that this was such an important activity that it should not be crippled, and so it increased the amount to make it conform to the Budget estimate.

Mr. KING. It seems to me that nearly $5,000,000 for this agency is rather a large amount, and the increase is very large.

Mr. JONES. That activity has been growing very fast, as the Senator knows. There has been quite an expansion in the air activities, and much more even is promised for the future. In view of the rapid development, it was felt that the Congress was justified in making this appropriation, and that, as a matter of fact, it would be injurious if we did not make it.

Mr. KING. May I inquire of the Senator in regard to another subject?

Mr. JONES. Certainly.

Mr. KING. The appropriations for the Bureau of Foreign and Domestic Commerce are rapidly increasing. What is the increase over the last fiscal year?

Mr. JONES. My recollection is that the increase made in the House was about $40,000 or more above the Budget estimate. The House committee went into this activity very extensively. As the Senator knows, the activities of this bureau have been increasing every year for several years. The Senator knows also of the increase and expansion in our foreign business and of the importance of such increase and expansion. The House committee after going into the matter very carefully, made an allowance even above the amount recommended by the Budget, and the Senate committee increased that figure by $15,000. Such an increase was pressed by the Senator from Florida [Mr. FLETCHER], and the very urgent need of the increase was presented to the committee. The committee felt justified in raising the appropriation made by the House by that amount, because of the expansion of this tremendously important activity, in the interest of the Government and the growth and development of business. The Senator appreciates, I know, as well as I do the influence of foreign trade upon our own business and our own industries and the importance of expanding our trade in foreign countries, where we are going to be met with increased activity upon the part of other nations which are naturally increasing their efforts to expand their trade, and to take from the markets of the world. In view of the circumstances we felt fully justified in recommending the increase in the appropriation.

Mr. KING. I am not depreciating the work of this bureau, and I pay tribute to the ability of Doctor Klein, who is the director of the bureau. He has been active in promoting our foreign trade and has exhibited ability of a very high order. I have sometimes felt, however, that we are imposing upon the bureau duties and responsibilities which belong to private business and to American citizens who are engaged in domestic business as well as in foreign trade and commerce. The Government is not to be the business agent for everyone and to find markets, domestic and foreign, for our manufacturers and others who are engaged in business enterprises. I am afraid there is developing a feeling that the Department of Commerce must find domestic buyers for our products and foreign markets for all surplus products. And I have sometimes feared that the Department of Commerce was lending too much encouragement to this view and was seeking to increase its activities and expand its jurisdiction and functions.

I appreciate the importance of expanding our foreign trade and have criticized the party in power because of what I conceived to be some of its reactionary policies which were calculated to restrict our exports and to injure our foreign trade. I have opposed some measures which sought to place an embargo upon imports, the effect of which, of course, would be to limit exports. We hear a great deal about foreign markets and the importance of sending our products to all parts of the world. I approve of this policy. Anyone familiar with our resources and capacity for production must know that the United States can produce sufficient agricultural products to feed 200,000,000 people and can supply a large part of the needs of the American people in other commodities and necessaries and have surpluses of the value of billions of dollars.

Prohibitive tariffs mean diminished exports and diminished exports mean a limitation upon domestic production. We must find markets for our surplus products; markets in Europe and markets in all parts of the world. And the American business man, with his knowledge and aggressiveness, will find these markets if we will place no handicaps upon him and if we will adopt wise policies with respect to our international relations. If we permit selfish corporations and powerful trusts and monopolies to dictate our tariff laws and to compel the enactment of legislation that will enable them to exploit our own people, we will soon discover that our foreign markets will be, in part at least, lost to American producers. International trade is founded upon reciprocity; commodities are paid for in part by commodities, not gold.

If we adopt wise and pacific measures and constructive policies with respect to trade and commerce, our commodities will go to every port in the world and the ships of the United States will be found in the seven seas. But if we pursue a narrow, provincial, and restrictive policy we will drive our commerce from the seas, close the ports of the world against us, and bring about financial and industrial depression throughout the United States.

However, I do not intend to enter into a discussion of this question.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Tennessee?

Mr. KING. I want to ask the Senator from Washington just one other question. Does the Senator from Tennessee desire to ask a question?

Mr. McKELLAR. No; I merely wish to make a statement with reference to the particular item to which I imagine the Senator is referring—the total for the Bureau of Foreign and Domestic Commerce, on page 62.

Mr. KING. Yes; I was referring to that item.

Mr. McKELLAR. That bureau, as the Senator of course knows, is under Dr. Julius Klein, one of the most competent and efficient men, I think, that we have in the Government service. He is a man who is thoroughly posted, and he is doing a great work; and I was constrained to believe that the small increases which were asked for should be made.

I agree with the Senator entirely that we ought to do everything possible to build up our foreign commerce. In order to

build up our foreign commerce we are obliged to take steps on this side of the water to aid in that very desirable project, and so these increases were permitted by the committee. They are very small and might, indeed, have been made larger.

Of course, I agree with the Senator also in his statements about our general policy. I think we could increase our foreign trade a great deal more by adopting a different general policy than that which we have; but I certainly think these increases should be allowed.

Mr. KING. Mr. President, it is needless to repeat that I am anxious to develop the resources of our country and to aid in every legitimate way in increasing our exports. The point that I desire to make is that I am apprehensive of the growth of the bureaucratic organizations in the Government and that with their growth there will be a corresponding decline in individual initiative and effort and an inclination to have the Government through its bureaus and agencies assume duties and responsibilities which belong to individuals.

I have confidence in the business ability, in the initiative, and in the capacity of the American people and of our business men, but we find in many of the departments of the Government a disposition to encourage the people to come to the Government for support and for aid, and representations are made that the Government can materially help individuals in their private and personal matters.

American business men for many years have had their representatives abroad, and before the war business houses in Germany, Great Britain, and other countries sent to the United States and other countries their representatives to find markets for their products. The Germans were particularly active in the United States and sold, through representatives of business houses, large quantities of German products. And the United States was increasing before the war its foreign markets, and the manufacturers of the United States were competing with other manufacturing countries in the markets of the world.

The Department of State and other Federal agencies furnished them statistics and other important information, but there was no disposition to keep in various parts of the world business representatives as a sort of adjunct to the business houses and industries of the United States. Our Consular Service was active in obtaining statistics and information helpful to American buyers and American sellers. They prepared and transmitted to the State Department thousands of reports annually. The Department of Commerce has somewhat encroached upon the State Department and is increasing its activities and, of course, multiplying its personnel and greatly adding to its expenditures. What the end will be I can not say.

Mr. JONES. Mr. President——

Mr. KING. I yield.

Mr. JONES. Will the Senator permit this suggestion, which I think he probably overlooks:

In the previous consideration of these bills it has been shown that there is the closest and fullest cooperation between the State Department officers and consular officers and the other representatives of the State Department and the commercial attachés and agents and representatives of the Department of Commerce so far as the expansion of business and everything of that kind is concerned. That was so well demonstrated that the committee did not go into that phase of the matter at this time, because we are satisfied that there is practically no duplication; that the consular officers do work that otherwise would be done by the commerce officials, but their work is made available to the commercial attachés and representatives of the Department of Commerce, and that the representatives of the Department of Commerce do work that otherwise would be done, if necessary, by the State Department officers, and that they have regular meetings and conferences where they harmonize the work and very largely prevent duplication.

Mr. KING. Mr. President, I am familiar with the situation which obtains and the cooperation between the State and the Commerce Departments as indicated by the Senator. The Senator may remember that I looked with a great deal of concern upon what I conceived to be the encroachment of the Department of Commerce upon the proper functions of the State Department. I believe that we should have strengthened the State Department; bring substantially all of our foreign activities under its jurisdiction; that we should expand the Consular Service; extend its activities and utilize our Diplomatic and Consular Service more extensively and intensively than in the past in furthering our commercial relations with other nations. Many of our consular agents were men of experience, familiar with business conditions in the various countries in which they served. They had studied and were studying business conditions and were in a position to expand their activities and to render additional service for the promotion of our foreign trade and commerce. I believed that we should have coordinated all of our foreign activities and utilized to the fullest extent those who were connected with the State Department in the promotion of our commercial interests throughout the world.

My views, however, were not followed. We put upon the Department of Commerce work which I thought should have been performed by the Department of State and have set an example which will continue to plague Congress. The Department of Agriculture now demands that it have a foreign service and a bill is upon the calendar creating a bureau of foreign commerce in that department.

The argument is made that if the Department of Commerce is given a bureau for foreign service, then the Department of Agriculture should be treated in a similar way. It is contended that a large part of our exports are agricultural products and there is no reason why the Agricultural Department should not have hundreds of representatives stationed throughout the countries of the world and traveling throughout the world for the purpose of finding markets for American agricultural products.

The Department of Labor has contacts with the world, and it will soon demand additional organizations and bureaus to function in various parts of the world. There are persons who insist that the Immigration Bureau should have a foreign service and should have representatives in the important countries of the world. It is claimed by some that the Tariff Commission in order to obtain data from foreign countries to enable it to properly function should have a foreign-service bureau and be permitted to establish branches in many countries, particularly those which export commodities to the United States. Recently some educators insisted that the Bureau of Education should have a foreign service so as to obtain information available for our educational development.

Mr. President, we have literally thousands of representatives of the Federal Government stationed throughout the world, and hundreds, if not thousands, of persons connected with ambulatory commissions and organizations who flit from clime to clime and from continent to continent, costing the Government of the United States millions of dollars annually. Instead of consolidating bureaus and Federal agencies, we are multiplying them; instead of diminishing Federal employees we are increasing the number. We boast of the wealth of our country and then collect larger revenues and increase national expenditures. We will soon pass the five billion dollar mark for annual expenditures of the Federal Government.

I appreciate, Mr. President, that no objections to appropriations will be of any avail. We increase expenses but never reduce them. Attacks upon appropriation bills do not succeed. Indeed, there would be surprise, if not consternation, in the Senate if any appropriation bill was reduced even to the extent of one dollar.

Mr. FLETCHER. Mr. President, I desire to say just a word, since the Senator from Washington [Mr. JONES] referred to me in connection with this item. It is primarily intended to expand and enlarge the work of the London office of the Bureau of Foreign and Domestic Commerce, particularly with reference to the handling of citrus fruits.

The States of California, Texas, Arizona, to some extent perhaps Louisiana and Mississippi, and Florida are interested in expanding the market for citrus fruits. Last year the Leyland Line transported from Jacksonville abroad to London quite a few cargoes of grapefruit and oranges. This year the Palmetto Line has equipped with refrigeration three extra ships, and the Leyland Line and the Palmetto Line will be moving citrus fruits to Europe, and especially to London. From that market they will reach the other European markets.

I asked for more than this amount, but the committee allowed this; and it is very necessary in order to increase the facilities of the Bureau of Foreign and Domestic Commerce in London, especially with reference to the marketing of citrus fruits.

We are producing in this country a surplus. We are exporting large quantities, and there will be larger quantities produced. This market is a market of very great importance to the whole citrus industry in this country. They need some facilities there for placing the fruit, for listing the importers, and for giving information to our shippers with reference to the methods of packing and carrying and delivering the fruit. This small item of $15,000 is primarily to strengthen the London office so as to provide additional markets for this important commodity.

Mr. HEFLIN. Mr. President, in reply to the Senator from Utah [Mr. KING] I wish to say that I am heartily in favor of sending the necessary agents to represent the agricultural interests of the United States into foreign countries. I think we could spend money to no better purpose than to engage in the work of carrying forward and expanding our agricultural trade in foreign countries. Cotton and grain and other prod-

ucts of American soil would be materially benefited by sending American agents into foreign countries to urge the increased use of the products of American agriculture. It would not only greatly benefit the farmers of our country by increasing the demand for the products of the American farm, but it would increase our commerce with foreign nations and add each year to our balance of trade.

The PRESIDING OFFICER (Mr. BLEASE in the chair). The Secretary will read the bill.

The Chief Clerk proceeded to read the bill.

The first amendment of the Committee on Appropriations was, under the heading "Transportation of Diplomatic, Consular, and Foreign Service officers," on page 12, line 10, after the word "exceed," to strike out "$45,000" and insert "$55,000," and in line 17, after the word "home," to strike out "$410,000" and insert "$420,000," so as to read:

To pay the traveling expenses of Diplomatic, Consular, and Foreign Service officers, and clerks to embassies, legations, and consulates, including officers of the United States Court for China, and the itemized and verified statements of the actual and necessary expenses of transportation and subsistence, under such regulations as the Secretary of State may prescribe, of their families and effects, in going to and returning from their posts, including not to exceed $55,000 incurred in connection with leaves of absence, and of the transportation of the remains of those officers and clerks who have died or may die abroad or in transit while in the discharge of their official duties to their former homes in this country for interment, and for the ordinary expenses of such interment at their posts or at home, $420,000.

The amendment was agreed to.

The next amendment was, under the subhead "Aircraft in commerce," on page 53, line 22, after the word "exceed," to strike out "$229,570" and insert "$263,210," and on page 54, at the end of line 12, to strike out "$935,000" and insert "$968,640," so as to make the paragraph read:

Aircraft in commerce: To carry out the provisions of the act approved May 20, 1926, entitled "An act to encourage and regulate the use of aircraft in commerce, and for other purposes" (U. S. C. pp. 2119–2123, secs. 171–184), including personal services in the District of Columbia (not to exceed $263,210) and elsewhere; rent in the District of Columbia and elsewhere; traveling expenses; contract stenographic reporting services; fees and mileage of witnesses; purchase of furniture and equipment; stationery and supplies, including medical supplies, typewriting, adding, and computing machines, accessories and repairs; maintenance, operation, and repair of motor-propelled passenger-carrying vehicles; purchase of not to exceed five airplanes, including accessories and spare parts, and maintenance, operation, and repair of airplanes, including accessories and spare parts; special clothing, wearing apparel, and similar equipment for aviation purposes; purchase of books of reference and periodicals; newspapers, reports, documents, plans, specifications, maps, manuscripts, and all other publications; and all other necessary expenses not included in the foregoing, $968,640.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Foreign and Domestic Commerce," on page 58, at the end of line 17, to strike out "$923,500" and insert "$938,500," so as to read:

Export industries: To enable the Bureau of Foreign and Domestic Commerce to investigate and report on domestic as well as foreign problems relating to the production, distribution, and marketing, in so far as they relate to the important export industries of the United States, including personal services in the District of Columbia, traveling and subsistence expenses of officers and employees, purchase of furniture and equipment, stationery and supplies, typewriting, adding, and computing machines, accessories and repairs, books of reference and periodicals, reports, documents, plans, specifications, manuscripts, and all other publications, rent outside of the District of Columbia, ice and drinking water for office purposes, and all other incidental expenses connected therewith, $938,500.

The amendment was agreed to.

The next amendment was, on page 62, line 18, before the word "of," to strike out "$4,524,923" and insert "$4,539,923," and in line 19, before the word "may," to strike out "$1,704,340" and insert "$1,719,340," so as to read:

Total, Bureau of Foreign and Domestic Commerce, $4,539,923, of which amount not to exceed $1,719,340 may be expended for personal services in the District of Columbia.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Fisheries," on page 91, line 2, after the word "exceeding," to strike out "$47,000" and insert "$57,000," and at the end of line 16, to strike out "$360,000" and insert "$370,000," so as to make the paragraph read:

Alaska, general service: For protecting the seal fisheries of Alaska, including the furnishing of food, fuel, clothing, and other necessities of life to the natives of the Pribilof Islands of Alaska; not exceeding $57,000 for construction, improvement, repair, and alteration of buildings and roads, transportation of supplies to and from the islands, expenses of travel of agents and other employees and subsistence while on said islands, hire and maintenance of vessels, purchase of sea otters, and for all expenses necessary to carry out the provisions of the act entitled "An act to protect the seal fisheries of Alaska, and for other purposes," approved April 21, 1910 (U. S. C. p. 431, secs. 631–658), and for the protection of the fisheries of Alaska, including contract stenographic reporting service, travel, subsistence (or per diem in lieu of subsistence) of employees while on duty in Alaska, hire of boats, employment of temporary labor, and all other necessary expenses connected therewith, $370,000, of which $100,000 shall be immediately available.

The amendment was agreed to.

The reading of the bill was concluded.

The PRESIDING OFFICER. That completes the committee amendments. The bill is still as in Committee of the Whole and open to amendment.

Mr. JONES. Mr. President, I send to the desk a committee amendment, which the committee directed me to offer on the floor. It is on page 8, line 19, under "Allowance for clerk hire at United States consulates."

This is to place the clerks in the same condition as that of clerks at legations, which was taken care of by the House on page 6. I offer the amendment.

The PRESIDING OFFICER. The clerk will read the amendment.

The CHIEF CLERK. On page 8, after the word "State," in line 19, insert:

including salary during transit to and from homes in the United States, upon beginning and after termination of service.

The amendment was agreed to.

Mr. JONES. I offer the following amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 33, in lines 23 and 24, to strike out "$9,000."

Mr. JONES. That is already covered by law.

The amendment was agreed to.

Mr. JONES. I offer the following amendment.

The PRESIDING OFFICER. The clerk will read the amendment.

The CHIEF CLERK. On page 35, to strike out line 14, the subhead "Examination of judicial offices."

The amendment was agreed to.

Mr. JONES. I also offer the following amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 36, strike out line 9, the subhead, "Pueblo Lands Board."

The amendment was agreed to.

Mr. KING. Mr. President, I would like to ask the Senator if these are mere pro forma amendments?

Mr. JONES. Yes; these were already covered by language already in the bill, under the heading "Miscellaneous objects," so that there is no need of those different items.

Mr. KING. I should like to ask the Senator another question. My recollection is that when we had under consideration the bill for the restoration to the Germans and Austrians the property which had been sequestered, it was understood that the costs which would be incurred by the United States in restoring the property and in conducting any litigation would be paid out of the appropriation made by Congress to pay any obligations found due by the umpire which was contingently made by Congress. I notice here, on page 26, $118,762. Apparently that is a direct appropriation from the Treasury. I was wondering if the matter had been brought to the attention of the committee, and whether they determined that the United States should pay this, to be reimbursed subsequently from the fund which was appropriated, or which will be appropriated, or whether it was to be an absolute charge upon the Treasury of the United States.

Mr. JONES. I will say that that was in the bill as it came from the House. There was no question raised about it, or suggestion made in regard to it, and I assume that it goes in accordance with existing law. But I will say to the Senator that I have not looked into the details of the matter. I think this is a provision similar to the one we had in the last bill. It goes along the same lines.

Mr. KING. Mr. President, if I correctly remember the terms of the measure to which I have referred, there ought to be a

reservation in this bill to the effect that the amount appropriated is reimbursable out of the fund appropriated or which will hereafter be appropriated by Congress to meet the judgments and awards of the arbiter.

Mr. JONES. I will say to the Senator that there is a constant reference in this paragraph to the treaties concluded between the United States and these different countries. So I take it that this is in accordance with those treaties and existing law.

Mr. McKELLAR. If the Senator will look at the bottom of page 26, he will see the language—

the expenses which * * * and the agreement of November 26, 1924, are chargeable in part to the United States.

I take it that that refers only to that part we are under treaty agreement to pay.

Mr. KING. That has no reference to the bill which was passed providing for the restoration of the property. I wanted to challenge attention to that fact so that the committee, in the consideration of the next bill, may look into the matter, and if it seems, as I think it is, that the German property is to be held responsible for these expenditures, then provision should be made for withholding from that fund of $50,000,000, or a larger fund, if such there be, sufficient to meet the expenditures which have been advanced from the Treasury of the United States.

Mr. HAYDEN. Mr. President, the bill does not provide an adequate sum to care for the needs of the Bureau of Immigration in the Department of Labor. I intend to offer an amendment to increase the amount appropriated in this bill for the support of that bureau by $250,000, and I shall address the Senate briefly on that proposal.

It was not possible to have a hearing before the Senate Committee on Appropriations on this subject, and I am therefore compelled to introduce testimony from other official records. I desire to quote from the last annual report of the Commissioner of Immigration, Harry E. Hull. The report, dated June 30, 1928, states:

Prior to 1921, when the first quota law was enacted, or, perhaps, more accurately, prior to 1924, when the last quota law was enacted, the great bulk of immigration poured through our seaports, and Ellis Island, New York Harbor, was the great portal—the gateway through which the immigrant entered the land of opportunity. The land border ports were of secondary importance. If the expressions "Ellis Island" and "immigration" were not synonymous, one could hardly think of the one without thinking of the other.

* * * * * * *

A great change has been taking place along our borders; steadily are they approaching a place of first importance in the scheme of things from an immigration standpoint. The fiscal year just closed witnessed a movement back and forth across these frontiers made up of citizens and aliens aggregating 53,000,000 entrants.

I direct the attention of the Senate to the large number of persons, 53,000,000, who passed back and forth across the Canadian and Mexican borders during the last fiscal year.

Many of these, of course, were commuters, visitors, excursionists, and so forth. The tremendous impetus given to travel by the automobile and the opening of myriad new roads have been the chief contributing factors.

Nevertheless, this large number of persons must be inspected daily by the United States Immigration Service.

The commissioner's report continues:

It is almost impossible for the Appropriations Committee and the Bureau of the Budget to keep pace with the ever changing and increasing demands, without granting a larger appropriation than is proven necessary at the time appropriations are determined upon. So far the bureau has not been granted sufficient money with which to take care of unusual and unforeseen emergencies. In short, we are, generally speaking, anywhere from six months to a year behind the procession.

I might add in this connection that the problem of handling aliens arriving by air is coming on apace, so that in addition to our seaport and border control problems, we are right now confronted with the problem of opening many new ports of entry for aliens arriving by aircraft.

The Commissioner of Immigration concludes:

The foregoing means one thing and one thing only; we have simply got to have the men or else we can not enforce the law.

A large part of this work is done by the border patrol, and in commenting upon the activities of that branch of the service the commissioner says:

Beginning July 1, 1924, with an appropriation of a million dollars and a personnel of 472 employees, the organization has been expanded to a total of 747 members, consisting of 1 supervisor, 6 assistant superintendents, 28 chief patrol inspectors, 166 senior patrol inspectors, 504 patrol inspectors, 15 motor mechanics, 22 clerks, 3 laborers, and 2 janitors. During the year last past it operated on an appropriation of $1,600,000. * * *

The outstanding accomplishment of the immigration border patrol for the past year was the apprehension of 25,534 persons of all kinds found engaged in unlawful activities. Of this number, 23,896 were turned over by patrol officers to examiners of the Immigration Service. Out of this total, 18,000 were smuggled aliens and 330 were found to be smugglers of aliens.

Commissioner Hull concludes his annual report with this recommendation:

That Congress sufficiently increase its appropriation to the bureau to make possible stricter enforcement of the immigration laws, inasmuch as in recent years the immigration question has become one of the Nation's greatest problems. The available force is doing wonderful work in the enforcement of the present law, but naturally a larger force would be in a better position to enforce this very popular law.

Mr. DILL. Mr. President——

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Does the Senator from Arizona yield to the Senator from Washington?

Mr. HAYDEN. I yield.

Mr. DILL. Will this proposed increase give us more officials on the Canadian border to take care of the large tourist traffic that goes in and out of Canada during the summer months?

Mr. HAYDEN. That is one of the primary purposes of the amendment that I have offered, which not only applies to the Canadian border but to the Mexican border. I may add that at the hearings before the House Committee on Appropriations it was shown by the Assistant Secretary of Labor that the Department of Labor requested an increase of more than $500,000 in this appropriation, which was not allowed by the Bureau of the Budget.

Mr. DILL. The Senator may know that on the Canadian border, particularly on the Pacific coast, in the summer time there are lines of cars for miles, and people are delayed going in or out of Canada, and if one asks the boundary officers the reason for this condition he is told that they have not enough officials. It seems to me that we should provide enough money here to enable the Government to place there a sufficient number of officials to handle those crowds of people.

Mr. KING. We should not have so many thirsty people.

Mr. DILL. The fact remains that we have a great many people who want to cross purely for travel purposes. I think the Government should provide enough men to enable our people who want to go to Canada to get into Canada without being held up for half a day in crossing the line. If there is not enough money appropriated, I think we should appropriate it.

Mr. HAYDEN. In his testimony before the House Committee on Appropriations, Mr. Robert Carl White, the Assistant Secretary of Labor, pointed out facts similar to those stated by the Senator from Washington. His department asked of the Budget an increase of $585,000, which was not allowed. Mr. White further stated that there should be an increase of at least $300,000 in this appropriation. The House did increase the appropriation for the Bureau of Immigration by $50,000. In order to carry out the recommendation made by the Assistant Secretary of Labor, to meet this urgent necessity, I offer the following amendment.

The PRESIDING OFFICER. The clerk will read the amendment.

The CHIEF CLERK. On page 110, line 14, strike out the figures "$7,965,000" and insert in lieu thereof the figures "$8,215,000," and in line 15 strike out the figures "$1,918,440" and insert in lieu thereof the figures "$2,168,440."

Mr. JONES. Mr. President, very reluctantly I shall have to make a point of order against this amendment as a violation of Rule XVI, that it is not estimated for, and has not been reported from a standing committee.

Mr. DILL. Will my colleague answer a question? Did the Senate committee consider the further needs for employees on the border?

Mr. JONES. I will say to my colleague that no further request was made by the Department of Labor before the committee for any increase. Even now this goes above the Budget estimate as it was submitted to the House, and as there was no request made by the department the committee felt that under all the circumstances we had gone as far as we could.

Mr. DILL. The Senator knows, as everybody else knows, that there is a need for additional employees on the border in the summer months, and it seems to me that even if the department does not make the request, a committee of Congress might well make the necessary additional appropriations.

Mr. JONES. The House committee raised the amount even beyond the Budget estimate, and we felt that inasmuch as the House had raised it beyond the Budget estimate, we could not under the circumstances go further.

The PRESIDING OFFICER. The Chair sustains the point of order.

The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which, by the unanimous-consent agreement of December 20 last, is Calendar 1022, the bill (H. R. 11526) to authorize the construction of certain naval vessels, and for other purposes.

Mr. JONES. Mr. President, I think we can conclude the consideration of the appropriation bill in three or four minutes if the Senator from Maine [Mr. HALE] will grant us a little extension of time.

Mr. HALE. Mr. President, if the Senator thinks he can get through with the bill in a very few minutes, I am willing to accede to his request.

Mr. JONES. I ask that the unfinished business be temporarily laid aside.

The PRESIDING OFFICER. Without objection, the unfinished business will be temporarily laid aside. The Chair recognizes the Senator from Ohio.

Mr. FESS. Mr. President, I desire to offer an amendment to increase by $30,000 the amount on page 57, in line 6.

The purpose of the amendment is in keeping with the recommendation of the Bureau of Foreign and Domestic Commerce. Ohio is one industrial State that does not have any district office connected with the Bureau of Foreign and Domestic Commerce. In the last year the foreign commerce of that State was $182,000,000. The year before it was $171,000,000, and the year before that it was $152,000,000. There has been a very gradual growth. The State is ninth in manufacturing, and the business activity is very largely due to the fact that there are eight cities of over 100,000 population.

There are five cities of more than 300,000 population. It is a very unusual situation. Notwithstanding that fact, the State, after several appeals, has not been able to have established a district office. We transact our business through Chicago and Washington, D. C. There are over 11,000 manufacturers in the State of Ohio. About 1,400 of them are clients of the two offices mentioned.

The Bureau of Domestic and Foreign Commerce recommended an additional appropriation of $200,000, $100,000 to be applied to the enlargement of old offices and $100,000 to be applied to new offices. The State of Ohio and five other States have been asking for consideration. In my own State we have a greater commerce than the other five combined.

I offer this amendment along the line of the recommendation, not of the Bureau of the Budget, but of the Bureau of Domestic and Foreign Commerce, in the hope that we may have established in that State a district office. The facts would certainly justify it.

In the meantime I ask unanimous consent to submit the figures for insertion in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

DECEMBER 10, 1928.

MY DEAR MR. SMITH: I have received your letter of December 6, expressing your judgment in regard to the importance of the service rendered by the Bureau of Foreign and Domestic Commerce and your suggestion that adequate appropriations be allowed for the same.

I note that you specify two items, one of $30,000 for the support of the active cooperation in Ohio, and another of $10,000 for quarters for the offices of the American commercial attachés in London and Brussels.

In the onset I can assure you that I have sympathy with adequate appropriations for this service and will use my influence for the same. I have repeatedly asked for more direct service for Ohio from the Bureau of Foreign and Domestic Commerce. In fact, I have only recently made the following representations to the Committee on Appropriations:

The Department of Commerce is rendering a wonderful service to American business. District offices have been established at 23 points in the United States. The completed program of the department calls for about 30 offices.

For several years Congress has increased appropriations to provide for the strengthening of the old offices and the establishment of new ones. This year the Bureau of Foreign and Domestic Commerce requested an increase of $200,000, half of which was to be applied to the existing District offices, and the remaining $100,000 for the establishment of five new offices, which would have taken care of Ohio. The Bureau of the Budget has recommended an increase of only $19,120.

Ohio, with her eight cities of over 100,000, as compared to not more than two cities of 100,000 or over in any other State, coupled with the diversified industries in the State, has made a unique situation, which is in a large way responsible for Ohio not being accorded special treatment through the department.

Ohio ranks fifth among the States in the number of manufacturing establishments. It has 11,137 manufacturing establishments. Of these 1,399 are regular clients of the Bureau of Foreign and Domestic Commerce, i. e., about 12½ per cent. These are served from Washington or through the Chicago district office.

Ohio ranks ninth in the list of States in value of its exports for 1927, $186,091,545. It amounted to $171,450,184 in 1926 and $132,597,683 in 1925. This shows a steady gain and an increase of 8 per cent over 1926. The main items making up the total in 1927 were tires, iron and steel, machinery, automobiles, tools, toys, milk and cream, wheat flour, electrical equipment, clay products, and binder twine. Ohio is the only large export and industrial State which does not have a district office.

Since the fiscal year ending June 30, 1922, there has been an increase of 548 per cent in the number of requests for information and assistance rendered by the Bureau of Foreign and Domestic Commerce and its district offices. The total export trade of the United States has increased from $2,434,851,000 in 1914 to $5,056,085,000 in 1927, an increase of 107 per cent.

Ohio has practically as many manufacturing establishments as the other five States combined seeking district offices.

Hearings on the appropriation bill for State, Justice, Commerce, and Labor have just been concluded.

Yours very truly,

SIMEON D. FESS.

President ALLARD SMITH,
Cleveland Chamber of Commerce, Cleveland, Ohio.

Mr. FESS. I hope the Senator from Washington will accept the amendment.

Mr. JONES. Mr. President, I sympathize with the proposal of the Senator from Ohio. There is need of appropriations of this kind in many instances. We have been increasing appropriations practically every year and we will probably take care of this situation in the near future. We can not take care of everything in one year. I make the point of order that this is not recommended by the Bureau of the Budget, it is not reported by a committee, and is an amendment increasing an amount already in the bill.

Mr. FESS. Mr. President, I would like to ask the Senator a question. I have not examined as to whether the amendment is subject to a point of order or not. I do know that the Budget did make the recommendation of an increase and that the increase was about $19,000.

Mr. JONES. But the provision in the bill as coming from the House exceeded even the Budget estimate, so there is no Budget estimate for the amount the Senator proposes.

Mr. FESS. Does the Senator mean that an item which has been submitted by the Budget can not be increased by amendment on the floor?

Mr. JONES. Not under the rule.

Mr. FESS. I take exception to that statement.

Mr. JONES. Rule XVI reads as follows:

No amendments shall be received to any general appropriation bill the effect of which will be to increase an appropriation already contained in the bill, or to add a new item of appropriation, unless it be made to carry out the provisions of some existing law, or treaty stipulation, or act, or resolution previously passed by the Senate during that session; or unless the same be moved by direction of a standing or select committee of the Senate, or proposed in pursuance of an estimate submitted in accordance with law.

So that it is not covered by either of the provisions of the rule.

Mr. FESS. I submit to that last statement, namely, that it would have to be recommended by a standing committee. Otherwise the Budget would put us in a very serious situation as a legislative body.

The PRESIDING OFFICER. The point of order is well taken. The bill is still as in Committee of the Whole and subject to amendment. If there be no further amendments the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CONSTRUCTION OF CRUISERS

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 11526) to authorize the construction of certain naval vessels, and for other purposes, which had been reported from the Committee on Naval Affairs with an amendment.

Mr. HALE obtained the floor.

Mr. McKELLAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum being suggested, the clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	La Follette	Shipstead
Barkley	Frazier	McKellar	Shortridge
Bayard	George	McLean	Smoot
Bingham	Gerry	McMaster	Steck
Blaine	Glass	McNary	Steiwer
Blease	Glenn	Mayfield	Stephens
Borah	Goff	Neely	Swanson
Brookhart	Gould	Norbeck	Thomas, Idaho
Broussard	Greene	Norris	Thomas, Okla.
Bruce	Hale	Nye	Tydings
Burton	Harris	Overman	Vandenberg
Capper	Hastings	Pine	Wagner
Caraway	Hawes	Ransdell	Walsh, Mass.
Couzens	Hayden	Reed, Mo.	Walsh, Mont.
Curtis	Heflin	Reed, Pa.	Warren
Dale	Johnson	Robinson, Ark.	Waterman
Deneen	Jones	Robinson, Ind.	Watson
Dill	Kendrick	Sackett	Wheeler
Edge	Keyes	Schall	
Fess	King	Sheppard	

Mr. WAGNER. I desire to announce that my colleague the senior Senator from New York [Mr. COPELAND] is compelled to be absent to-day because of illness in his family. I ask that this announcement may stand for the day.

Mr. McKELLAR. I wish to announce that my colleague the junior Senator from Tennessee [Mr. TYSON] is unavoidably detained by illness in his family. I will let this announcement stand for the day.

Mr. FLETCHER. I desire to announce that my colleague the junior Senator from Florida [Mr. TRAMMELL] is unavoidably detained. I will let this announcement stand for the day.

Mr. GERRY. I desire to announce the unavoidable absence of the junior Senator from New Jersey [Mr. EDWARDS].

Mr. HEFLIN. My colleague the junior Senator from Alabama [Mr. BLACK] is absent owing to illness. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Seventy-eight Senators having answered to their names, a quorum is present. The Senator from Maine will proceed.

Mr. KING. Mr. President, will the Senator from Maine yield for a question?

Mr. HALE. I yield.

Mr. KING. As I understand, the Senator from Maine intends to submit some remarks in regard to the cruiser bill and at the expiration of his remarks a motion will be made to proceed to the consideration of the treaty?

Mr. HALE. That is my understanding.

Mr. JOHNSON. Mr. President, may I inquire whether this is an agreement among our leaders that we shall proceed immediately to listen to an exposition upon the naval cruiser bill, and that then the cruiser bill shall be laid aside indefinitely, and that the treaty will be taken up?

Mr. HALE. I do not think so. I want to set forth the need for these cruisers before the peace pact comes up. When I shall have concluded my remarks I understand that the Senator from Idaho [Mr. BORAH] is to move that we go into open executive session. I shall vote in favor of his motion.

Mr. JOHNSON. Then it is agreed?

Mr. HALE. It is agreed so far as I am concerned. I am willing that the treaty shall come up this afternoon as soon as I finish my speech.

Mr. JOHNSON. Has the Senator considered whether or not that bids the cruiser bill good-bye?

Mr. HALE. I do not think it does. I think on the contrary it will help the passage of the cruiser bill.

Mr. REED of Missouri. Mr. President, will the Senator yield?

Mr. HALE. I yield to the Senator from Missouri.

Mr. REED of Missouri. May I inquire whether it is the purpose of the Senator in charge of the cruiser bill, as soon as he has made his speech, to practically lay the cruiser bill aside until we have disposed of the treaty?

Mr. HALE. I have not made any such agreement.

Mr. REED of Missouri. Is that what the Senator intends to do? Does he intend to keep his bill before the Senate and fight his battle on that bill?

Mr. BORAH. Mr. President, it is my purpose at the close of the remarks of the Senator from Maine to move to proceed to the consideration of the peace treaty in open executive session. That is the extent of the agreement. I notified the Senator from Maine that I should take that procedure and that I hoped it would not be disagreeable to him. That is the extent of the agreement.

Mr. REED of Missouri. I understand the Senator's statement, but that is not my question. I want to know—and I think the Senate is entitled to know—what is the purpose of the Senator in charge of the cruiser bill, after he has made his speech, and after the Senator from Idaho has moved to take up the peace treaty in open executive session. Does the Senator in charge of the cruiser bill intend, after the treaty shall have been considered a short time, to again press for consideration of the cruiser bill, or does he intend to allow the cruiser bill practically to lie in abeyance until we shall have concluded the consideration of the treaty?

Mr. HALE. I think that, Mr. President, is a matter which we shall have to consider when we come to it. I am very anxious to have the cruiser bill passed. If the Kellogg peace pact can be ratified within a reasonable time, I shall be willing that its proponents shall go ahead with it. As I have stated, I am in favor of the treaty. If I find, however, that the treaty is not going to be ratified within a reasonable time, I shall feel free to ask that the cruiser bill be taken up, and, in all probability, I shall do so.

Mr. REED of Missouri. That is tantamount to the statement, then, that the Senator from Maine means, as soon as he shall have concluded his speech, to give way to the peace treaty and let it have the right of way?

Mr. HALE. For a certain time.

Mr. REED of Missouri. Yes.

Mr. HALE. And I have no more idea than has the Senator from Missouri for how long a time.

Mr. REED of Missouri. No. In plain, blunt speech, the cruiser bill is by the chairman of the committee laid aside for the treaty?

Mr. HALE. Temporarily.

Mr. REED of Missouri. And the temporary part of it will depend upon the patience of the Senate and the reinspiration of the Senator in charge of the cruiser bill.

Mr. HALE. Mr. President, on May 18, while the naval construction bill was on the calendar of the Senate, but not before the Senate for action, I made a speech on the floor explaining the purposes of the bill. My remarks were somewhat technical and many figures were used by me. Much of the historical data, the technical statements and figures used in that speech, I shall reiterate to-day, and I shall ask Senators to allow me to proceed with the course of my remarks without interruption.

Mr. President, to understand clearly the present naval situation and the purposes of the naval construction bill which is before the Senate, it will be necessary to go back a number of years into naval history.

In August, 1916, the so-called 1916 building program was authorized by act of Congress. This program provided for the construction of 157 new ships of various types, including a number of very large and very powerful battleships and battle cruisers.

Most of the ships in the building program, including all of the battleships and battle cruisers, had been laid down and were in process of construction when President Harding took his seat in the White House in March, 1921.

At that time we had on the ways 9 battleships, 3 of them of a tonnage of 32,600 tons each, 6 of a tonnage of 43,200 tons each, and 6 battle cruisers of a tonnage of 43,500 tons each. The battleships, when work was shortly thereafter stopped upon them, were in a stage of completion averaging 43 per cent, and the battle cruisers 16 per cent.

Mr. President, had all of these ships been completed and had they been added to our naval forces, and had a sufficient number of cruisers, submarines, aircraft carriers, and other auxiliary ships been laid down properly to round out the Navy, we would have had a Navy powerful enough in all probability to withstand all of the navies of the world now in existence combined.

This would have guaranteed to us absolute protection from any attack by sea.

After the Great War a feeling arose in this country and throughout the civilized world that naval armament should be reduced and that the various peoples of the world should be relieved of the burdens of taxation necessary to maintain and keep up the great armaments then existing and planned for, and, above all, as far as possible that competition in naval armament should be stopped.

To carry into effect such a plan for the limitation of armament the Washington Conference for the Limitation of Armament was called by President Harding in November, 1921.

With our tremendous shipbuilding program on the ways, which no other country could reasonably hope to equal, we were in a position to bring about an agreement among the five greater naval powers of the world—Great Britain, Japan, France, Italy, and ourselves—for such a limitation, and we did bring about,

Mr. President, such a limitation of naval armament, so far as capital ships and aircraft carriers were concerned, by agreeing to scrap all of our battleships building, with the exception of two of 32,600 tons each, and all of our battle cruisers building, with the exception of two, which were to be turned into aircraft carriers, making a total of 465,800 tons of new construction that was scrapped, on which $150,000,000 had already been spent.

In addition to this we agreed to scrap a number of older battleships, as did two of the other four nations parties to the treaty—Great Britain and Japan—which battleships could have been kept up only at great expense, and most of them would in all probability have been scrapped had there been no conference on limitation of naval armament.

The other nations parties to the conference agreed to scrap no ships that were in process of construction, with the exception of Japan, and nearly all of her building program was on paper.

In exchange for giving up this great naval supremacy of ours we secured a basis of limitation on capital ships and carriers of 5 to 5, or an equality with Great Britain; 5 to 3 with Japan; and 5 to 1.67 with France and Italy on capital ships and 5 to 2.22 on carriers.

The sacrifice in reaching this ratio was almost altogether on our part. At the same time the representatives of the United States made a strong attempt to have the same ratio apply to other combatant vessels, including cruisers, destroyers, and submarines, but the attempt was a failure and no agreement other than the agreement on capital ships and aircraft carriers was reached.

When in a conference called on our own initiative we showed ourselves ready to sacrifice our naval supremacy, the surprised world was only too glad to accept our terms for a limitation in these classes of ships, and to that extent the conference was a success. The pity is that with this immense leverage we could not have fixed the ratio limit on all classes of combatant ships. It is true that we tried our best to do so, and at one time it looked as though we were in a fair way to succeed. But we did not succeed, and hence our troubles of to-day.

One thing the Washington conference did for us—it served as a notification to the rest of the world that the 5-5-3 ratio was the basis upon which the United States proposed to keep up its Navy. Secretary Hughes, who presided over our delegation at the conference, stated clearly the position of our country in referring to the celebration of Navy Day on October 26, 1922, when he said:

> This Government has taken the lead in securing the reduction of naval armament, but the Navy that we retain under the agreement should be maintained with efficient personnel and pride in the service. It is essential that we should maintain the relative naval strength of the United States. That in my judgment is the way to peace and security. It will be upon that basis that we would enter in future conferences or make agreements for limitation, and it would be folly to undermine our position.

I firmly believe that the position taken by him expresses the will of the American people.

During the summer of 1927, Mr. President, at the instigation of the President of the United States, and to follow up the attempt made by our representatives at the Washington conference, a conference was held at Geneva to consider a limitation of armament of ships other than capital ships and carriers. France and Italy refused to take part in the conference other than to send observers, and the conference was thereby limited to Great Britain, Japan, and the United States.

The delegates of this country went to the conference with the honest intention of securing a limitation of armament in the classes of ships indicated. They were ready and willing to accept a tonnage figure on these classes of ships—cruisers, destroyers, and submarines—below the actual naval needs of the country as recommended to Congress by the Navy Department, provided the limitation could be made on the same basis as the capital-ship ratio.

The American proposal at the conference was 250,000 to 300,000 tons of cruisers for Great Britain and the United States and 150,000 to 180,000 for Japan. As we have but 155,000 tons of first-line cruisers built, building, or appropriated for, the lower figure would have had involved the building of nearly 100,000 tons of new cruisers.

As the British have built, building, or appropriated for 397,140 tons of first-line cruisers to come down to this lower figure they would have had to scrap about 147,000 tons of their present cruisers. The Japanese, with 213,955 tons of first-line cruisers built, building, or appropriated for, to come within the ratio would have had to scrap about 64,000 tons of their present cruiser force.

The first proposal of the British at the conference allowed for approximately 600,000 tons of cruisers. Her later proposals reduced this tonnage but did not come near meeting the offer of the United States, and all British offers included two classes of ships with a limitation on the 8-inch gun cruisers. The United States stated that it would consider no offer over 400,000 tons.

The representatives of Japan were at all times in favor of a low figure for a limitation.

The American demand was for a limitation of total tonnage in cruisers with permission to build cruisers of any size within the limitation up to the 10,000 standard tons of the treaty cruiser. The British contention was that on account of the number and length of their sea communications they needed a great number of smaller cruisers and that therefore the number of 10,000-ton treaty cruisers should be limited.

They insisted that their naval needs required 70 to 75 cruisers, and sought to limit the construction of cruisers to two classes, those of 10,000 tons, carrying 8-inch guns, and those of 7,500 tons and under, with a limit of 6-inch guns, which proposal was later changed to 6,000-ton cruisers with 6-inch guns.

Their original proposal was for fifteen 10,000-ton cruisers, which in one of their later offers was modified to 12.

The position of the United States that a limitation be placed on the total tonnage, with permission to build ships of any size within that limitation up to the treaty limit of 10,000 tons, was maintained throughout the conference by the American delegates, because on account of our almost entire lack of naval bases and the fact that our operations away from the fleet would necessarily be carried on overseas and in proximity to hostile bases, we need the maximum cruising radius and maximum protection in armament, so that it is imperative that we build almost exclusively ships of the larger type. The smaller type of ship with a lesser cruising radius would be of little value to the United States, and necessarily we would not feel justified in building such ships.

Another great advantage to the British in keeping down the number of the larger class of cruiser is their great merchant marine, many of whose ships are so constructed as to enable them to mount 6-inch guns. As they have 227 vessels in their merchant marine of 4,000 tons and over, of an aggregate tonnage of 2,937,300, and 15 knots speed and over, capable of carrying 6-inch guns, and in our own merchant marine we have but 70 vessels of a similar character, with an aggregate tonnage of 757,858, it will be readily seen that to cut out altogether the larger type of cruiser or to limit it to a small number of ships would at once greatly enhance the military value of their great merchant marine.

The reasons why the British can successfully use small cruisers whereas we can successfully use large cruisers only are apparent when we consider the question of the British naval bases.

I have had a map prepared by the Navy Department showing the British, Japanese, and American naval stations and bases and their position with relation to our own trade routes, and I ask that it be inserted in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

[The map referred to will be found on pages 1054 and 1055.]

Mr. HALE. I may add that there is a copy of the map on the wall at the rear of the Senate Chamber.

From this map it will be seen that the British naval stations and bases to all intents and purposes command our foreign and much of our coastwise commerce. Situated as they are it is apparent that British vessels of limited cruising radius will find at all times available fuel and repair facilities anywhere, with slight exceptions, along our trade routes.

The United States, on the other hand, has very few naval stations away from this continent. Our only naval stations outside of home waters are those located at Guantanamo, the Virgin Islands, Panama, Pearl Harbor, Guam, Samoa, and Cavite. The stations at Guantanamo, the Virgin Islands, and Panama to a limited extent protect our trade routes to South America, though the first two stations are small stations which have not been extensively developed, and the four stations in the Pacific Ocean—Pearl Harbor, Guam, Samoa, and Cavite—to a very limited extent protect our trade routes to Australia and to and along the eastern coast of Asia.

Excluding Pearl Harbor, which is our principal naval base in the Pacific Ocean, the other three stations may not, under treaty agreement, be developed beyond their present capacity, and they are in no respect modern, up-to-date, naval stations.

We have no naval stations in European or African waters, nor any in the Indian Ocean.

The British naval stations at Gibraltar and Malta and the home stations on the British Islands are so located that they command the principal water trade routes of Europe. The two stations at Gibraltar and Malta and the stations at Port Said, Aden, Port Louis, Simonstown, and Freetown command the

entire ocean traffic of Africa. The stations at Aden, Bombay, Trincomalee, Colombo, Rangoon, and Singapore command the entire Indian Ocean trade routes, and the stations at Singapore, Hong Kong, King George Sound, Sydney, and Auckland command the water trade routes of Australia, the islands of the southern Pacific, and the east coast of Asia as far north as Japan.

As to South America the British have a defended station at Kingston, an anchorage station at Port Castries, and a fuel station at Port Stanley, on the extreme southeastern coast of South America. They have nothing along the west coast of South America.

On our own continent the British have a defended naval base at Esquimalt, near Vancouver, on the west coast, and strong stations on the east coast at Halifax and Bermuda. These two latter stations, together with the station at Kingston, command our entire east coast traffic.

The British bases and stations are very few of them of recent acquirement.

Great Britain has from time immemorial had a very considerable ocean traffic, and she is fortunate in having naval stations so located that she can watch over that traffic and see that it is protected at all times. By the same token, these naval stations give her a strangle hold on the commerce of every other nation in the world. Her position in regard to naval stations is unique among the nations.

Japan has no naval stations outside of her own waters except the station at Futami Ko in the Bonin Islands, the station of Amami-O-Shima just south of the Island of Japan, the station at Bako in the Formosa Straits, near the British station at Hong Kong, and a defended destroyer station at Port Arthur.

The French have a number of outlying stations in the Mediterranean, and small stations in Senegal, Madagascar, and Indo-China. The Italians have no outlying stations.

Our own overseas merchant marine, which was at one time the greatest in the world, has now dwindled to about one-half of that of Great Britain, and a considerable proportion of that half is not in operation. Our overseas trade, however, is as great as that of Great Britain, and amounts to $9,000,000,000 in round numbers, and, though due to our lack of merchant ships, about two-thirds of it is being carried in foreign bottoms we are now in a fair way, through the passage of the White-Jones merchant marine bill last winter, to build up our own merchant marine and ultimately to carry in our own bottoms our proper proportion of our own ocean trade. Our policy has been, and is now, to acquire as few outlying possessions as possible. Being almost devoid of overseas naval stations, we must in some way be able to guarantee from undue interference our ocean-going traffic. To shut off or cripple our foreign commerce would bring an immediate end to American prosperity.

The one insurmountable bar to reaching an agreement at the Geneva conference for a proportionate reduction in naval armament was the divergent naval needs of this country and Great Britain in regard to cruisers. Her present cruiser force, with her naval stations which everywhere command the commerce of the world, give her the control of the seas.

If we are to keep up our foreign trade and build up our ocean commerce we must see to it that that ocean commerce is guaranteed protection in peace and in war, without which it is at the mercy of another and competing country, and however friendly our relations with that competing country may be, such a position is not to be tolerated.

Supremacy of the seas we do not seek, but the rights of our commerce when we and the rest of the world are at peace, when we are neutral and other countries are at war, and when we are ourselves belligerents, we must insist upon.

I do not need at this time to go into the complicated question of rights of neutrals in time of war. Suffice it to say that naval history shows that the safeguarding of those rights has proved to be almost entirely dependent upon the strength of the neutral country to enforce its claims.

In times of peace, of course, vessels of war may on notification enter any open port in the world, stay as long as they see fit to do so, replenish their supplies, and undergo repairs if necessary.

The vessels of war of a country, however, that is at war may enter a neutral port and remain in the neutral port but 24 hours for revictualing and refueling, and a very short time for absolutely necessary repairs, and may take on board only sufficient fuel to carry them to the next port of their own country. They must then leave the neutral port and risk meeting an enemy squadron lying in wait or be interned in the neutral port until the war is over.

The protection of our commerce devolves naturally in large part on our cruisers.

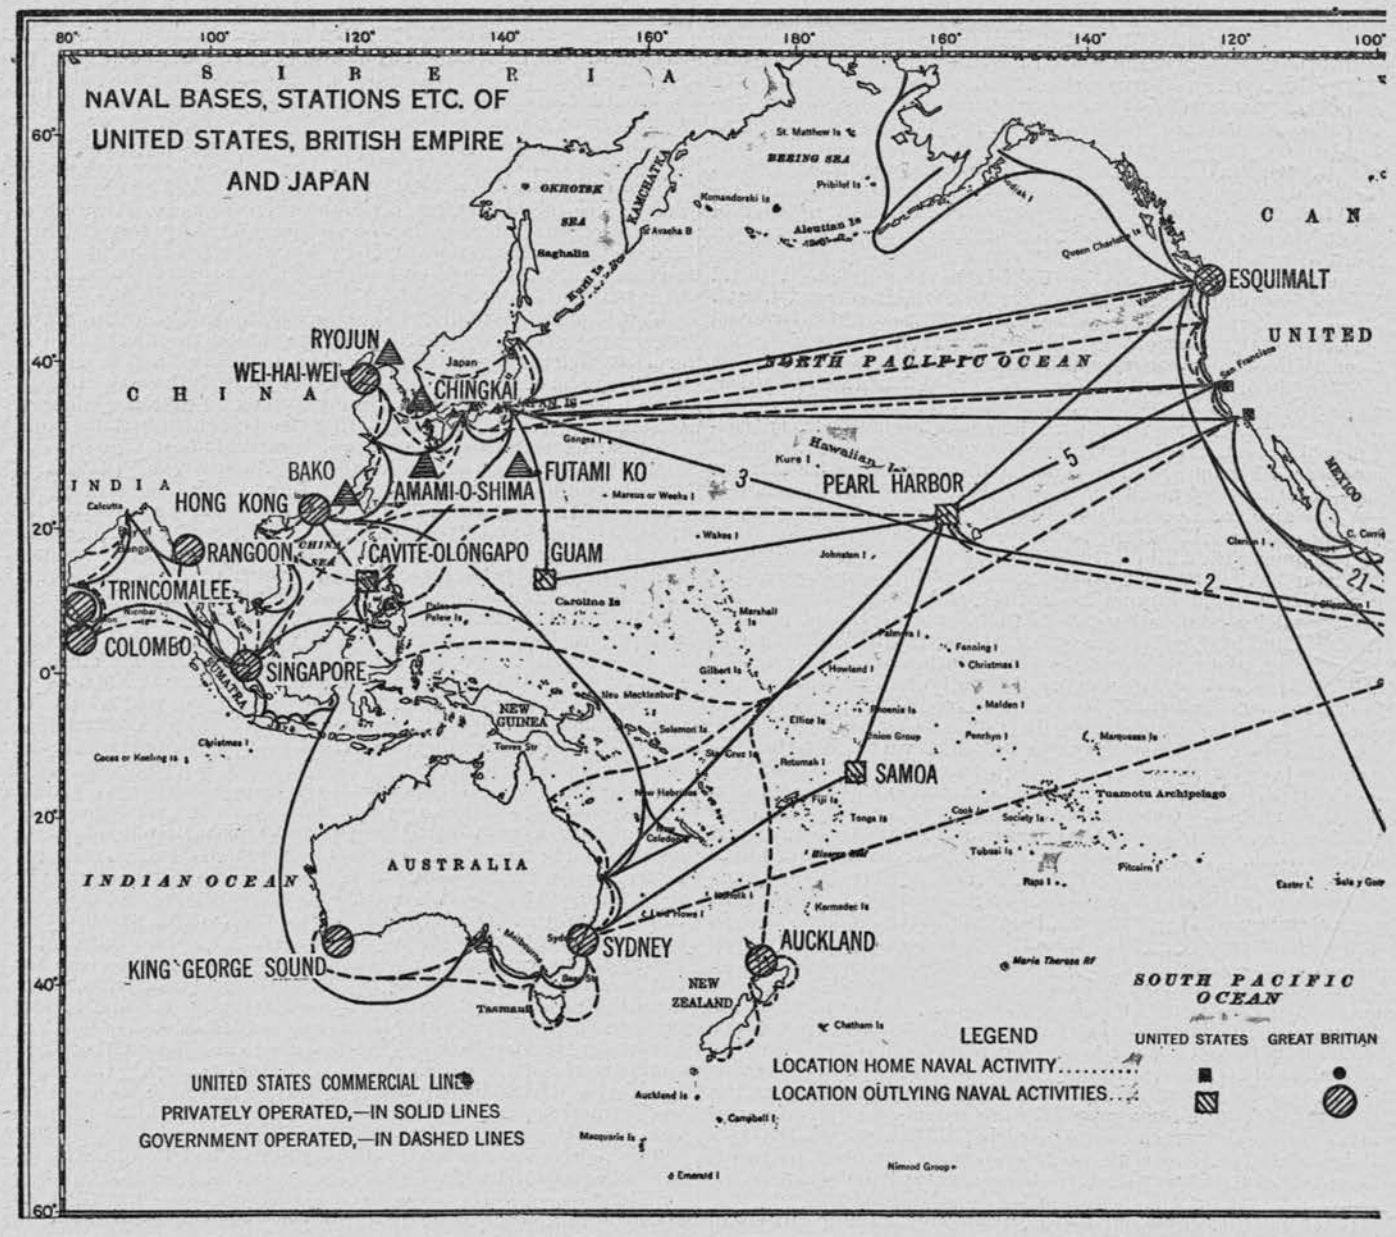
For the reasons above given it will be readily seen that it is of the utmost importance that these cruisers have a wide cruising radius, so that they may not only spend as much time as possible upon their stations but at all times have enough fuel on board to reach their home ports. The bigger the cruiser naturally the greater its capacity for carrying fuel, and it is all important to us to construct for our cruiser service the largest type of cruiser available under the terms of the Washington conference.

It is also highly important for us when we send out cruisers to protect our interests in foreign waters away from fueling and repair stations that they be not only self-sustaining but able to look after themselves against any probable enemy that they may encounter.

The 8-inch gun treaty cruiser has nothing to fear from any other type of surface craft excepting the battleship, the battle cruiser, and the aircraft carrier, and with her great speed she can keep out of the way of these more powerful vessels, though with the planes of the carrier she will have to take her chances.

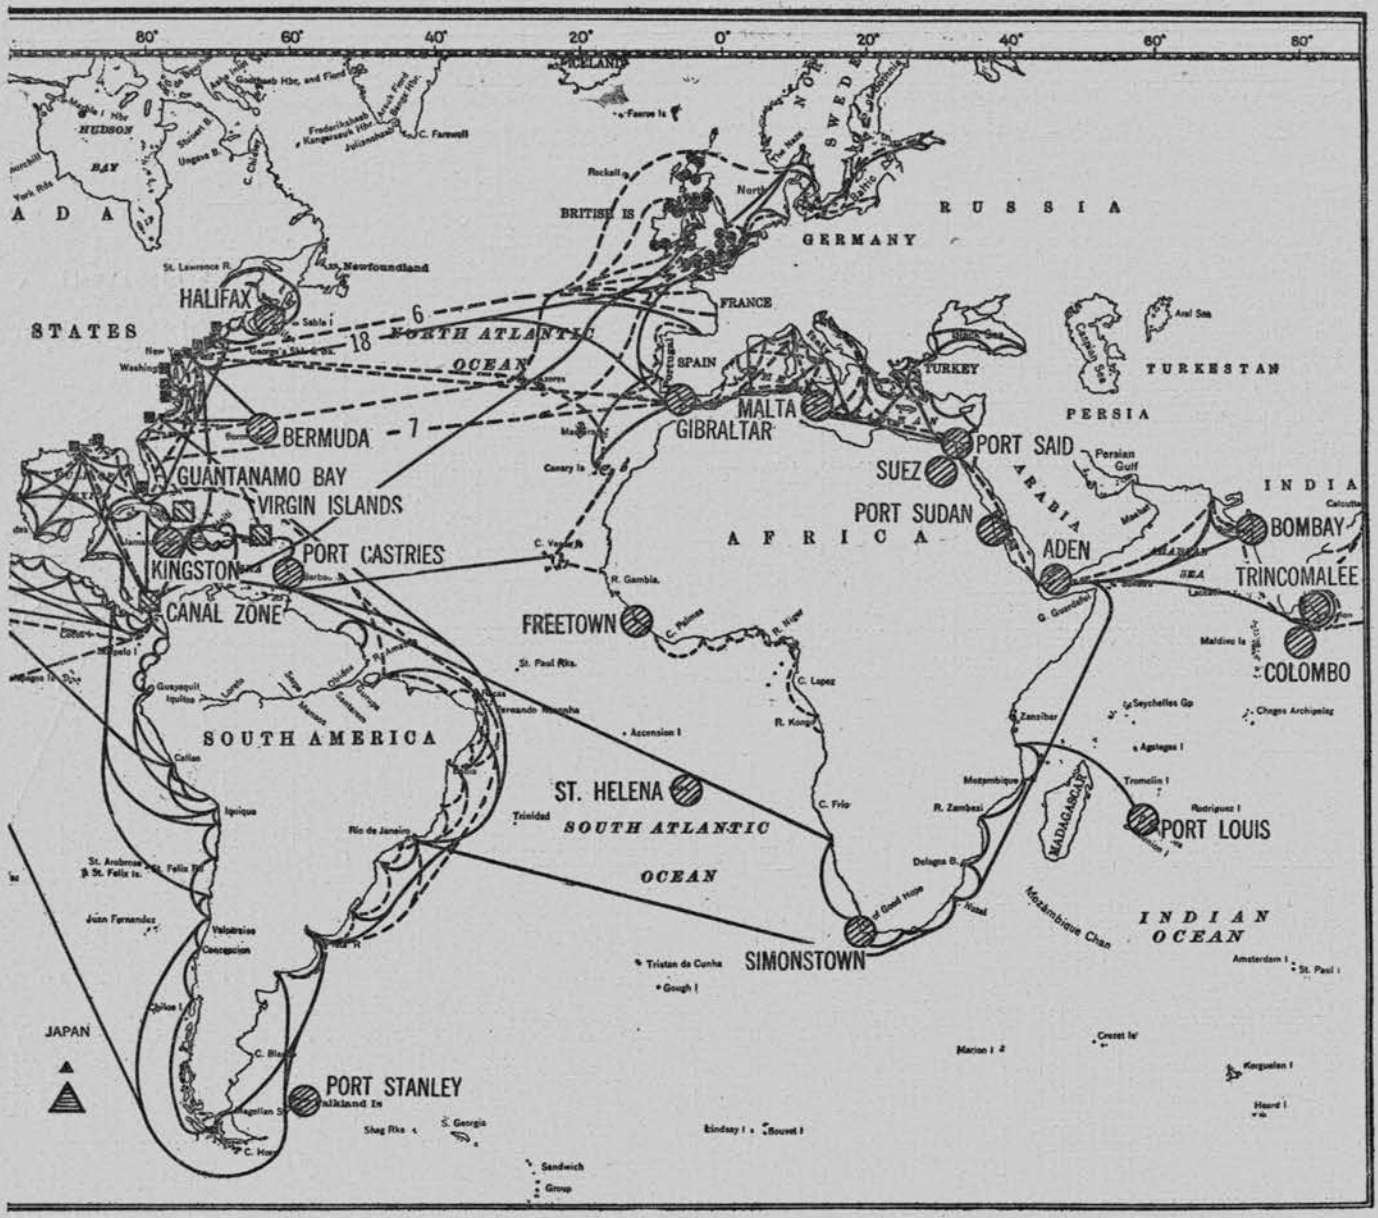
Smaller types of cruisers with a lesser cruising radius and lesser armament would be of proportionately less value to us, and it would seem that there would be little or no justification for our building such ships in the future.

The British, on the other hand, with their great string of naval stations and their adequate facilities for fueling and repair all over the world, naturally favor the building of smaller and less expensive types of ships, of which for the same appropriation they can secure more separate units.



While it is perfectly true that the naval needs of Great Britain are not necessarily based on the possibility of any hostilities with us, yet the fact remains that she is far stronger than we are at the present time in a very crucial type of ship and that if she builds up to her expressed naval needs and we do not she will be in a still stronger position. We shall have lost that position of equality which was the whole basis for the ratio of the Washington conference.

There are people in this country who believe that we should never consent to any agreement that would deny us the right to maintain a navy equal to that of Great Britain, and yet hold that it is not necessary for us to exercise fully our rights under such an agreement. It is true that there is nothing in the agreement of the Washington conference that obligates us in capital ships and carriers to keep our Navy up to the ratio basis, nor would there be in all probability any such obligation in any future conference agreements, yet if we do not do so for any reason we would necessarily be left in a secondary position until the deficiency in strength should be made up, and at any given time that would involve, with the intricacies of modern naval construction, a delay of several years before the Navy could be brought up to its permitted strength. Obviously in case of a sudden call for our Navy such an agreement, if we did not exercise fully our right under it, would be of little value to us.



The representatives of the United States had no objection to the other countries party to the Geneva conference building smaller vessels if they saw fit to do so, but were unwilling to bind the United States to an agreement that would force her, in order to maintain her position of equality, to build ships for which she had no use.

This failure to reach an agreement on types of cruiser and on the total tonnage of cruisers to be allowed caused the conference to break up without reaching an agreement. Tentative agreements could have been reached and practically were reached in regard to submarines and destroyers, including destroyer leaders, but as the main proposition—the cruiser proposition—failed, no final agreement was reached in respect to any class of ship in the conference.

We went into this Geneva conference in an honest attempt to bring about a further limitation of armament. We figured that in the Washington conference almost the entire sacrifice had been made by ourselves. In the Geneva conference we hoped that Great Britain, which was in much the same position in regard to cruisers at that time that we occupied in regard to capital ships at the time of the Washington conference, would sacrifice her cruiser superiority as we had sacrificed our capital-ship superiority, but we hoped in vain. The shoe was now very much on the other foot. We were not at this second conference in the lordly position that we occupied at the first one. We had no great partially completed program that we were willing to sacrifice in the interests of world economy. We were asking another country to assume that rôle and the other country did not feel that it could assume it, so the conference failed, as all such conferences in the future will fail unless the nation which has come to the top is willing to give up that advantage for some reason which to it seems justifiable.

[1] Being disarmed to be demolished.

We were able to bring the Washington conference to a more or less successful conclusion because we were on top at that time. Great Britain could have done the same thing at the Geneva conference at the price of sacrificing her cruiser superiority. In the same way France could undoubtedly bring about an agreement for a limitation in land forces if she were disposed to give up her military preeminence; but Spain could not do it, or England, or Italy, or any other country that was unable or unwilling to bring up its military strength to that of France.

I can not see how the American position, which calls for the right to build cruisers of any size and armament up to the treaty limitation, can at any future conference on limitation of armament be modified without giving up all possibility of maintaining a Navy equal to that of any other country in the world.

Any specific limitation on the building of 8-inch gun cruisers, coupled with full permission to build smaller cruisers ad libitum, or coupled with permission to build a given number of smaller cruisers, would limit our Navy to all practical intents and purposes to the 8-inch gun cruisers allowed since we have no practical use, owing to our lack of outside naval bases, for the smaller cruiser, and we would have little excuse for building this class of ship simply for the purpose of keeping up a ton for ton and a gun for gun equality.

The great striking force of the Navy is the Battle Fleet, which is made up not only of battleships but of aircraft carriers, cruisers, destroyers, submarines, and auxiliaries.

The striking unit of the Battle Fleet, in so far as gun power is concerned, is the battleship. Next is the cruiser.

The Battle Fleet is the guardian of the country. Its first duty is to protect our home possessions from enemy attack. It is vitally important that the Battle Fleet should at all times be kept in a condition where it can meet at least on equal terms any opposing battle fleet. Should it be destroyed our coasts and eventually our outlying possessions and our commerce will be at the mercy of the enemy.

While no agreement was reached at the Washington conference limiting the number or aggregate tonnage of vessels of the cruiser class, an agreement was reached that in the future no cruisers should be built of over 10,000 tons' displacement or mounting any guns heavier than 8-inch guns. The reason for the treaty limitation on type of cruiser adopted at the Washington conference was that Great Britain already at that time had built and building four cruisers of approximately 9,750 tons, mounting 7.5-inch guns. The modern tendency is to build cruisers of the treaty tonnage, and all of the nations party to the conference have laid down, built, and are building ships of this class.

The duties of cruisers are when with the fleet to guard the fleet movements as scouts, and to act as a protective screen for the fleet. In fleet action cruisers are necessary to attack on their own part the cruisers of the enemy, to break down destroyer attacks, and to carry in their own destroyer attacks, and to a certain extent they may also be used to augment the fire of the battle line. Without an adequate cruiser force the fleet can not operate effectively and that adequate cruiser force we do not have.

When the fleet is away from its home base, cruisers are needed to guard the lines of communication and to escort convoys. Away from the fleet they are the vessels primarily used to break the enemy's line of communication, to protect our commerce, and to destroy the enemy's commerce.

The treaty cruisers are very fast ships, in some instances reaching a speed of 35 knots. They carry 8-inch guns, which, though they have not the striking power of the heavier guns of the battleships and battle cruisers, have, through elevation of guns, almost the range of the larger guns.

With their great speed the treaty cruiser can keep out of the way of battleships and even battle cruisers and aircraft carriers, which while much faster vessels than battleships do not, except in the case of our own carriers the *Lexington* and *Saratoga*, attain the speed of the treaty cruiser.

And with their 8-inch guns they themselves can destroy all other surface types of naval vessels that come within the range of their guns.

At the close of the World War we found ourselves with a large number of surplus destroyers on hand. These ships had been constructed by us on the suggestion of our allies, the British, to aid in putting down the submarine menace. At that time, as at the present time, we were very greatly lacking in cruisers; but with our surplus destroyer force, to a very considerable extent, we were able to make up for this deficiency by using destroyers for cruiser work. At that time there were no cruisers of the treaty limit in existence; Great Britain had a number of small cruisers of a maximum speed of 29 knots, and Japan had a few small fast cruisers. But the destroyer at that time, with its great speed of 34 to 35 knots, could keep out of the way of these small cruisers and could be effectively used in doing near-by scouting and screening work for the fleet. With the advent of the treaty cruiser and of small cruisers of great speed our superiority in destroyer tonnage becomes no longer the compensatory factor that it was at the end of the war in making up for our lack of cruisers. The destroyer can not do the work of the modern cruiser and her rôle becomes again that for which she was originally intended. The modern cruiser on the contrary becomes of more and more importance as a factor in the fighting strength of the fleet. This has been realized by the naval experts for a number of years, and the importance of the cruiser has been repeatedly stressed to the committees of Congress.

The fact that we have not appropriated for ships of this kind does not indicate that their necessity is not appreciated. It is due almost entirely to the fact that the American people have believed that the necessity for building large numbers of these ships would be obviated by treaty limitation. Trusting that an agreement would be reached we have allowed our Navy to fall lamentably behind hand.

Mr. President, the needs of our Navy for cruisers, as pointed out to Congress by experts in the Navy Department, is for 26 vessels to accompany the United States Fleet, with 2 additional cruisers as destroyer flagships, and 15 for detached service, including protection of our commerce and guarding convoys, making a total of 43 cruisers.

Should we build additional cruisers to bring us up to this number we would then have in treaty cruisers mounting 8-inch guns 33 of a tonnage of 330,000 tons, and 10 smaller cruisers, mounting 6-inch guns, of a tonnage of 75,000 tons; in all, 405,000 tons.

At the present time we have building 8 of the treaty cruisers aggregating 80,000 tons and in commission 10 of the 7,500-ton cruisers, giving us a total first-line cruiser tonnage of 155,000 tons when the 8 now building are completed.

Aside from these 155,000 tons of first-line cruisers we have 22 superannuated cruisers of a tonnage of 179,425, the most modern of which was completed in 1908, which on account of our lack of cruisers have been kept on the Navy list, though only 5 of them are still in active commission.

These 22 ships with the 18 first-line cruisers of our Navy comprise the 40 cruisers referred to by the President in his armistice day speech. As they are all superannuated and as none of them have the cruising speed required of modern cruisers they can not in any way be considered in making up a list of serviceable vessels of the fleet and should and will be replaced as soon as the fleet can be provided with an adequate modern cruiser force.

These 18 modern cruisers will not be enough to take care of the needs of the fleet alone by some 10 vessels, and will allow us no additional cruisers for destroyer flagships, for detached service, or for the protection of our commerce. In this very important branch of the service we are distinctly lacking, and until the deficiency is made up the fleet can neither operate effectively nor can our commerce receive that protection which it manifestly should have.

Great Britain has 13 treaty cruisers of 10,000 tons and 2 of 8,300 tons built and building. She has, further, 2 of 8,300 tons appropriated for and 3 more authorized, 1 of 10,000 tons and 2 of 8,300 tons.

If she keeps up her program, she will have in 1931, 20 of these 8-inch-gun cruisers, and aside from this she has 47 other cruisers within the effective age, of 233,940 tons, running from 9,770 tons down to 3,750 tons each, none of which carries 8-inch guns, although 4 of the larger vessels carry seven 7.5-inch guns and are very much more powerful than are our 7,500-ton cruisers, giving her an aggregate tonnage of first-line cruisers of 397,140 tons now built, building, and appropriated for.

Japan has built, building, and appropriated for 8 of the 10,000-ton cruisers and 25 smaller first-line cruisers running from 3,100 tons to 7,100 tons each, of a tonnage of 133,955, giving her an aggregate tonnage of 213,955 tons.

Heretofore I have had printed at various times in the RECORD certain tables covering the relative strength of the navies of the several countries party to the treaty. Differentiation between first and second line combatant vessels was based in those tables on a definition which was, in general, as follows: First-line ships were those which were fit for use in a general fleet action where speed was an essential requirement and no cruisers under 29 knots speed were included; second-line ships were those which were fit mainly for subsidiary service in a naval campaign. In view of the tentative agreement which was reached at Geneva

during the summer of 1927, that the effective life of a cruiser would be 20 years, of a destroyer 16 years, and of a submarine 13 years, the figures now furnished are on the basis of age, which is the basis which would probably be used in any further conference on limitation in these types of vessels.

I ask to have printed in the RECORD tables showing the present cruiser strength of the five powers parties to the Washington treaty.

The VICE PRESIDENT. Is there objection?

There being no objection, the tables were ordered to be printed in the RECORD.

[The tables referred to appear on pages 1056 and 1057.]

Mr. HALE. Mr. President, the Geneva conference having broken up with no agreement reached, England having insisted that her naval strength must be based on her national needs and that therefore any possible agreement would involve an increase rather than a decrease in naval strength, it was up to us to quit marking time with our Navy and decide on its future building policy. The Navy Department accordingly, with the consent and approval of the President, presented to Congress a 5-year building program based on our national needs, which would have rounded out our Navy in certain classes of ships wherein we are not up to the mark, by replacing old and obsolete ships with modern up-to-date ships and by adding certain vessels in categories where we are lacking.

As I have said before, we have done practically no replacing since the Washington conference. We must bear in mind that ships of the Navy do not last forever and that under the accepted standards of ship longevity 20 years represents the useful life limit of any combatant ship of the Navy.

When the World War was over, in cutting down from a war-time to a peace-time complement, we naturally kept in commission the best of our ships, and the useful life of most of these ships has not yet expired. But the time will shortly come when the great majority of these ships will have exhausted their period of useful life and must be replaced.

That time has already been reached and passed in the case of the 22 old cruisers to which I have referred. These cruisers should have been replaced long ere this. As a matter of fact, we are now in this bill only partially taking up the necessary slack to make up for what we have neglected to do during the last six years and what all the other naval powers have done year by year.

Great as the cost of replacing our Navy will be, and there is no way of avoiding it if we are to keep up an effective Navy, it amounts to little or nothing compared with the enormous cost of carrying on a war. The financial cost of one month of war, as based on our expenditures in the last war, would be greater than the cost of replacement of our entire fleet.

A navy that is efficient and equal to that of any other navy in the world will, except in the case of a combination of the other naval powers of the world against us, assure us against getting into war. "When a strong man armed keepeth his palace his goods are in peace." A weaker navy will not do so, and the weak navy can not be made into a strong navy even under war-time pressure until months and years have elapsed.

The House has greatly cut down the program and the Senate Committee on Naval Affairs recommends the acceptance of the amended building program as adopted by the House. It is a 3-year instead of a 5-year building program. The present bill authorizes the construction of 15 cruisers at a cost of $17,000,000 each. These cruisers are to be treaty cruisers, carrying 8-inch guns and are replacements of superannuated cruisers still on the navy list.

When the ships carried in this bill shall have been completed, we will have 305,000 tons of cruisers, as against Great Britain's 397,140 tons at present built, building, and appropriated for, plus any additions thereto that she may make in the meanwhile; and as against 213,955 tons for Japan with any additions that she may make.

Obviously, the addition of these ships will not bring us up anywhere near to the ratio of 5–5 of the Washington conference as applied to Great Britain or to the ratio of 5–3 as applied to Japan, nor will it reach in cruiser tonnage any conceivable limitation that from past indications we may reasonably hope to bring about in the future with Great Britain.

Neither, as I have said before, will it meet our naval needs as indicated to us by the experts of the Navy Department.

It will, however, make up to a certain extent for our deplorable lack of vessels of this class.

In addition, the bill provides for the construction of one aircraft carrier, at a cost of $19,000,000, as a first step in taking care of a serious shortage.

Under the Washington treaty we are allowed 135,000 tons of aircraft carriers. We have at the present time the *Lexington* and *Saratoga*, with a tonnage of 33,000 tons each, and the *Langley*, which is an experimental vessel of very slow speed, and which will probably be scrapped as soon as she can be replaced.

The tonnage of the new carrier is to be approximately 13,800 tons. When built we shall have an aggregate carrier tonnage of 79,800 tons, or 92,500 tons if the *Langley* is still kept in commission.

The British have an aggregate tonnage of 107,550 tons and Japan of 63,300 tons. The building of this vessel will not bring us up to our ratio strength with either nation, as determined by the Washington treaty for vessels of this class.

Since the Washington conference we have started no new ships for our Navy, with the exception of the eight 10,000-ton treaty cruisers now appropriated for and building, six small river gunboats, and three submarines already authorized in the 1916 program. In addition we have under the terms of the treaty completed two aircraft carriers of 33,000 tons each that had been previously laid down as battle cruisers.

In other words, we have started very little modern construction since the Washington conference. Great Britain, on the other hand, has built two new battleships, which she had the right to do under the Washington treaty, and has built, is building, or has appropriated for thirteen 10,000-ton and four 8,300-ton treaty cruisers, and has authorized 3 more, 1 of 10,000 tons and 2 of 8,300; 20 destroyers, including 2 leaders; 21 submarines; and certain auxiliary vessels.

Japan has built, is building, or has appropriated for 16 first-line cruisers, included in which are eight 10,000-ton treaty cruisers, also 51 destroyers, including 24 which because of their displacement fall in the leader class, 33 submarines, and certain auxiliary vessels. Japan has also converted two battle cruisers into aircraft carriers.

France has built, is building, or has appropriated for 9 cruisers, 3 of 7,234 tons, 2 of 9,941 tons, 3 of 10,000 tons, and 1 of 6,496 tons; 44 destroyers, including 18 leaders; 57 submarines; and certain auxiliary vessels.

Italy has built, is building, or has appropriated for 8 cruisers, 4 of 10,000 tons and 4 of 5,000 tons; 32 destroyers, including 12 leaders; 27 submarines; and certain auxiliary vessels.

I have here a table showing the total tonnage of vessels (by classes) laid down or appropriated for since February 6, 1922 (date of Washington conference), and ask that it may be inserted at the appropriate place in the RECORD:

The VICE PRESIDENT. Without objection, it is so ordered.

The table referred to is as follows:

Total tonnage of vessels (by classes) laid down or appropriated for since February 6, 1922 (date of Washington conference)

Type	United States—laid down		British Empire						Japan					
			Laid down		Appropriation for		Total		Laid down		Appropriation for		Total	
	Number	Tonnage	Number	Total tonnage	Number	Total tonnage	Number	Total tonnage	Number	Total tonnage	Number	Total tonnage	Number	Total tonnage
Battleships			2	67,400			2	67,400						
Aircraft carriers	2	[1] 66,000	2	[2] 37,200			2	37,200	2	[3] 53,800			2	53,800

[8] Net layers.
[9] Exclusive of tonnage of 2 net layers, 2 gunboats, and 1 mine layer.

Mr. HALE. The multilateral treaty whereby nearly all of the important countries of the world agree to renounce war as a national policy is now ready for consideration by the Senate. The hopes of many people in the world are centered on this treaty. In my opinion, it should be ratified by the Senate, and I am confident that it will be ratified. I should not be in favor of its ratification, however, if I thought that thereby in any way our Government was committing itself to a policy that would lead to neglect of a proper national defense.

The present situation of the Navy is not in any way changed by the passage of the treaty. There is nothing in the wording of the treaty, as interpreted by the President, or in the notes exchanged between the various governments parties to it that in any way prohibits the exercise of the rights of self-defense. Indeed, the exercise of these rights is expressly excluded in certain of the aforesaid notes from the operation of the treaty.

The policy of this country has always been to maintain a Navy for defensive purposes. We do not need, and with the will of the American people for peace, shall not need a navy for purposes of aggression. As long as our Navy is capable of defending us, our home and foreign possessions, and our home and foreign commerce, we have little to fear from outside aggression. If powerful enough to withstand such outside aggression we can remain confident that we shall not be attacked nor our rights invaded.

It must always be remembered, however, that a defensive navy, after war is declared, must as soon as possible take the offensive and destroy the navy and the commerce of the country with which it is at war if the war is to be brought to a conclusion, and the possible offensive of the defensive navy must at all times be kept in mind and prepared for.

The naval strength of the five great naval powers in the world needs be purely relative. It should be possible to cut down proportionately the naval strength of these five great powers, and that is what the United States has sought to do along the lines of the ratio provided in the Washington treaty. We shall doubtless continue our attempts in this direction at the conference which takes place under the terms of the Washington treaty in 1931.

It is significant that since May 19, 1928, the date when the British Secretary of State for Foreign Affairs, Mr. Chamberlain, wrote to the American ambassador, Mr. Houghton, in part, as follows:

2. The suggestion for the conclusion of a treaty for the renunciation of war as an instrument of national policy has evoked widespread interest in this country, and His Majesty's Government will support the movement to the utmost of their power—

the United States has not authorized or appropriated for any new ships for our Navy. In the meantime there has been no let-up in the naval programs of other countries. For example, since the date mentioned Great Britain has passed the shipbuilding vote, which provides for two 8,300-ton cruisers, nine destroyers, including one leader, and six submarines. Again, on December 6, 1928, the French Chamber of Deputies passed the naval budget providing for one additional cruiser, six destroyer leaders, and six large submarines. From the best information available Italy has appropriated for two 10,000-ton cruisers, four destroyers, and six submarines. These examples are cited to show there has been no change in foreign naval programs due to the Kellogg pact.

An attempt has been made by those who do not believe that we should have a strong navy to create the impression that the building of these 15 cruisers is a move on our part toward competition in naval armament and that the building of these ships will incite the other naval powers to increase their own naval armament.

Competition, according to the dictionary definition, means "strife for superiority." For that we are clearly not striving.

The American position, clearly defined at the Washington conference and later at the Geneva conference, demands the right under any international agreement that may be made to have a navy the equal—not the superior—of any navy in the world; a navy based on the ratio adopted at the Washington conference for capital ships, and pending the application of that ratio to ships other than the above, it is no part of our American policy or plan to exceed in any naval program the basis of that ratio.

Mr. President, the ships provided in the bill before the Senate do not bring us up to within even measurable distance of the ratio.

The argument that if we do not build ships other countries will not is clearly disproved by the tables that I have inserted above.

While we have practically stood still the other naval powers have all gone ahead with big programs of modern construction. Instead of preventing them from building our own lethargy in building has, I believe, incited them to further building.

The Washington conference has very clearly proved that we can secure an agreement to cut down armament if we have a force that other nations can not hope to equal. The years since the Washington conference have proved the folly and the failure of the policy of not building with the hope that the other naval powers will do likewise.

The failure of the Geneva conference, I firmly believe, is directly due to that policy on our part of letting our Navy drop behind.

When we consider that our country is the richest and most prosperous country in the world, our aggregate wealth being greater than that of any other half dozen nations in the world combined, that our foreign commerce is the equal of that of any other country in the world, and reaches the stupendous figure of $9,000,000,000 a year, that we are the acknowledged money center of the world, and that with all these advantages we are naturally an object of envy to the rest of the world, and then when we further consider that our coast line is greater by far than that of any other naval power in the world, that our outlying naval stations, especially those at Panama and Pearl Harbor, are situated at a great distance from the mainland, and that their defense is of essentially vital importance to our mainland security and our coastwise trade, and, lastly, that we are creditors to the extent of many billions of dollars to three of the four other naval powers, it would not be assuming too much for us to take the position that our vast interests should be protected by the most powerful navy in the world. We could very well afford to keep up such a Navy without materially crippling our national resources should we see fit so to do—but we do not see fit so to do.

We are a peaceful Nation; we want peace and the benefits of peace. But we are not a supine Nation, and we shall never allow our rights as a Nation to be trampled upon. We believe that we can give security to our country and protection to our citizens and our interests at home and abroad with a navy that is the equal of any other power in the world, and beyond that it is not the American policy to go.

It is a peculiar thing that the United States alone of the five great naval powers seems to be subjected to adverse foreign criticism whenever legislation is proposed that will bring or keep her navy up to a state of efficiency. I have heard of no general foreign criticism of the British for the great building program projected by them since the Washington conference, or of the Japanese who have gone far ahead of all the powers in their submarine program, or of the French who have built large numbers of cruisers, submarines, and destroyers, or of the Italians who have materially increased their navy. The criticism seems to be directed wholly against the country that made the sacrifices in the Washington conference, and since that time has undertaken comparatively little new construction, when it seeks partially to recover the ground that it has lost through a vain reliance on a real world feeling for reduction in armaments, and it is particularly unfortunate that this unwarranted criticism from outside the country should be reenforced by such a loud and misguided echo from the opponents of preparedness here in the United States.

The opponents of preparedness in this country who seem to be united in their support of the multilateral treaty are equally united in their opposition to the cruiser bill. Apparently they think that the treaty will entirely do away with wars in the future, and that strong navies are no longer needed. They are willing through dependence on the multilateral treaty to allow our Navy to fall below the requisite strength of our national needs while the other naval powers instead of falling back are increasing their strength. They condemn any attempt on the part of the friends of the cruiser bill to secure its passage at this session of Congress on the ground that its passage will demonstrate to the rest of the world that we are hypocritical in asking the other nations to join in the multilateral treaty. Should they be wrong in their dependence upon the effect of the multilateral treaty our weakened position will inevitably bring disaster. That disaster, against the experience of history, they are willing to risk; that disaster the advocates of preparedness, and I believe a great majority of the people of the United States, are not willing to risk. An adequate preparedness based on the relative strength of other countries we insist upon.

The President and the Secretary of State, who negotiated the treaty and who are earnestly in favor of its adoption by the Senate, both stand foursquare for an authorization for additional cruisers. The President has stressed our need for these cruisers in no uncertain words.

Whose advice under the circumstances are we to take? The advice of the high officials of the Government who must have some familiarity with and knowledge of the treaty which they have negotiated and the international relations of our country with its naval needs, or the advice of the pacifist who is always to be heard clamoring against naval preparedness, and whose voice is never stilled in the land until the dogs of war, which a proper preparedness might have held back, are unleashed on his unfortunate country? Then he is very still indeed.

I can understand why other countries who are jealous of our power and our prestige should wish to have our naval strength cut down, though I should resent as a gross impertinence any attempt on their part to propagandize this country to bring about any such results.

The less powerful we are the less we have to say in the councils of the world, and it is entirely conceivable that other countries should consider it to their advantage that our naval strength be emasculated; but how any good American can seek to undermine the national defense it is beyond me to comprehend, and yet many excellent but misguided people in this country are doing exactly that.

It is not as though we were trying to build up a powerful Navy for purposes of aggression; the American people never will stand for that. Our interests and aims are all for peace and for the advantages that peace brings. We shall always endeavor to maintain a condition of world peace when world peace is at all possible, and our influence in doing so will depend largely upon our military strength, which in so far as our relations with the rest of the world is concerned means primarily our naval strength. To doubt the use to which we shall put that military strength is to doubt the will for peace of the American people. Our representatives at the Washington conference indicated the ratio on which our national needs required that strength to be kept up for the actual defense of our country against invasion, the protection of our commerce, and the maintenance of our national rights. Nothing that has occurred since that time leads to any indication that our relative position under the ratio should be changed. It is surely not an ignoble thing to do to keep our Navy up to those national needs. Not to do so might well subject us to military disaster or what is more probable to giving up some national right because of lack of power to maintain it. That is a position in which no good American should want to see his country placed. Let us by all means do everything that lies within our power to encourage treaties and agreements that will prevent war and that will result in a proportionate reduction of armament throughout the world, but until we know beyond peradventure of doubt that wars will not occur or until agreements have actually been reached providing for a proportionate reduction in armaments, let us keep up to the full measure of our national needs that arm of the service which must bear the first brunt of any hostile attack and which is the real life insurance of our country—the United States Navy. Let us no longer gamble on the chances that that life insurance may not be needed.

PRESIDENTIAL OFFICES AND CARRIERS

Mr. GEORGE. Mr. President, I submit a resolution which I ask may be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE PRESIDENT. The resolution will be read.

The resolution (S. Res. 288) was read, as follows:

Resolved, That the amount authorized to be expended by the Committee on Post Offices and Post Roads in their investigation of the choice of postmasters in presidential offices and carriers, with particular reference to the circumstances and influences surrounding such choice, in Senate Resolution 193, agreed to May 3, 1928, hereby is increased from $5,000 to $8,000, to be paid from the contingent fund of the Senate upon vouchers properly approved.

The VICE PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate as requested by the Senator from Georgia.

Mr. GEORGE. In connection with the resolution I ask unanimous consent to have printed in the RECORD an editorial appearing in the Washington Post this morning.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, January 3, 1929]

A TAX ON POLITICAL JOBS

Since the South has become Republican territory leaders of that party can not afford to turn deaf ears to the evidence that has been brought out by the Senate subcommittee investigating the sale of postmasterships. The committee has sufficient evidence to show that a house cleaning is necessary, and the party should not leave it to the Government and the courts.

Senator BROOKHART has made public card indexes and check stubs from the offices of the Georgia Republican State central committee showing that postmasters were assessed according to their salaries. The money was collected monthly or quarterly on a business basis as a political assessment on the privilege of being an appointive employee of the Government. The committee also has evidence of the outright sale of one postmastership for $250. The party's own records show that postmasters of Georgia were "contributing" from $60 to $150 per year from their salaries.

Evidence at the hearings of the subcommittee tends to show that political tribute has been levied upon postmasters for several years. Numerous affidavits substantiate the charges that the sale of patronage has been going on in South Carolina, Tennessee, and other States as well as Georgia.

Federal statutes provide penalties for corruption of this kind. The situation should be investigated thoroughly and the violators prosecuted. But this will not relieve the Republican Party of its obligation to weed out of its ranks those who are responsible for this method of raising political funds.

MULTILATERAL PEACE TREATY

Mr. BORAH. Mr. President, I move that the Senate proceed to the consideration of the so-called multilateral peace treaty in open executive session.

The motion was agreed to; and the Senate in open executive session proceeded to consider the following treaty for the renunciation of war transmitted to the Senate for ratification by the President of the United States on December 4, 1928, and reported from the Committee on Foreign Relations on December 19, 1928:

THE PRESIDENT OF THE GERMAN REICH, THE PRESIDENT OF THE UNITED STATES OF AMERICA, HIS MAJESTY THE KING OF THE BELGIANS, THE PRESIDENT OF THE FRENCH REPUBLIC, HIS MAJESTY THE KING OF GREAT BRITAIN, IRELAND AND THE BRITISH DOMINIONS BEYOND THE SEAS, EMPEROR OF INDIA, HIS MAJESTY THE KING OF ITALY, HIS MAJESTY THE EMPEROR OF JAPAN, THE PRESIDENT OF THE REPUBLIC OF POLAND, THE PRESIDENT OF THE CZECHOSLOVAK REPUBLIC,

Deeply sensible of their solemn duty to promote the welfare of mankind;

Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that the peaceful and friendly relations now existing between their peoples may be perpetuated;

Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process, and that any signatory Power which shall hereafter seek to promote its national interests by resort to war should be denied the benefits furnished by this Treaty;

Hopeful that, encouraged by their example, all the other nations of the world will join in this humane endeavor and by adhering to the present Treaty as soon as it comes into force bring their peoples within the scope of its beneficent provisions, thus uniting the civilized nations of the world in a common renunciation of war as an instrument of their national policy;

Have decided to conclude a Treaty and for that purpose have appointed as their respective Plenipotentiaries

THE PRESIDENT OF THE GERMAN REICH:
Dr. Gustav Stresemann, Minister for Foreign Affairs;

THE PRESIDENT OF THE UNITED STATES OF AMERICA:
The Honorable Frank B. Kellogg, Secretary of State;

HIS MAJESTY THE KING OF THE BELGIANS:
Mr. Paul Hymans, Minister for Foreign Affairs, Minister of State;

THE PRESIDENT OF THE FRENCH REPUBLIC:
Mr. Aristide Briand, Minister for Foreign Affairs;

HIS MAJESTY THE KING OF GREAT BRITAIN, IRELAND, AND THE BRITISH DOMINIONS BEYOND THE SEAS, EMPEROR OF INDIA:
For GREAT BRITAIN and NORTHERN IRELAND and all parts of the British Empire which are not separate Members of the League of Nations:
The Right Honourable Lord Cushendun, Chancellor of the Duchy of Lancaster, Acting Secretary of State for Foreign Affairs;
For the DOMINION OF CANADA:
The Right Honourable William Lyon Mackenzie King, Prime Minister and Minister for External Affairs;
For the COMMONWEALTH OF AUSTRALIA:
The Honourable Alexander John McLachlan, Member of the Executive Federal Council;
For the DOMINION OF NEW ZEALAND:
The Honourable Sir Christopher James Parr, High Commissioner for New Zealand in Great Britain;
For the UNION OF SOUTH AFRICA:
The Honourable Jacobus Stephanus Smit, High Commissioner for the Union of South Africa in Great Britain;
For the IRISH FREE STATE:
Mr. William Thomas Cosgrave, President of the Executive Council;
For INDIA:
The Right Honourable Lord Cushendun, Chancellor of the Duchy of Lancaster, Acting Secretary of State for Foreign Affairs;

HIS MAJESTY THE KING OF ITALY:
Count Gaetano Manzoni, his Ambassador Extraordinary and Plenipotentiary at Paris.

HIS MAJESTY THE EMPEROR OF JAPAN:
Count Uchida, Privy Councillor;

THE PRESIDENT OF THE REPUBLIC OF POLAND:
Mr. A. Zaleski, Minister for Foreign Affairs;

THE PRESIDENT OF THE CZECHOSLOVAK REPUBLIC:
Dr. Eduard Benès, Minister for Foreign Affairs;

who, having communicated to one another their full powers found in good and due form have agreed upon the following articles:

ARTICLE I

The High Contracting Parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.

ARTICLE II

The High Contracting Parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means.

ARTICLE III

The present Treaty shall be ratified by the High Contracting Parties named in the Preamble in accordance with their respective constitutional requirements, and shall take effect as between them as soon as all their several instruments of ratification shall have been deposited at Washington.

This Treaty shall, when it has come into effect as prescribed in the preceding paragraph, remain open as long as may be necessary for adherence by all the other Powers of the world. Every instrument evidencing the adherence of a Power shall be deposited at Washington and the Treaty shall immediately upon such deposit become effective as between the Power thus adhering and the other Powers parties hereto.

It shall be the duty of the Government of the United States to furnish each Government named in the Preamble and every Government subsequently adhering to this Treaty with a certified copy of the Treaty and of every instrument of ratification or adherence. It shall also be the duty of the Government of the United States telegraphically to notify such Governments immediately upon the deposit with it of each instrument of ratification or adherence.

IN FAITH WHEREOF the respective Plenipotentiaries have signed this Treaty in the French and English languages both texts having equal force, and hereunto affix their seals.

DONE at Paris, the twenty-seventh day of August in the year one thousand nine hundred and twenty-eight.

Mr. BORAH. Mr. President, I think it will be helpful to the Senate and most agreeable to myself if prior to submitting to interrogatories or questions, I be permitted to make a connected statement as to the treaty, including a recital in the nature of a brief history of its negotiation, and as to the

meaning of the treaty. I shall be very glad later to the best of my ability to answer any questions which may be propounded. I should like in the first instance to proceed, for a short time at least, uninterrupted.

Mr. President, the treaty which is before the Senate contains two articles, and only two, and I shall read those articles in order that we may have them in mind as we proceed with the discussion. Article I provides that—

> The high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.

Article II provides:

> The high contracting parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means.

I think it is worth while to call particular attention to Article II. The general discussion in the popular consideration of the treaty has ranged almost entirely around Article I. To my mind the active virtue of the treaty lies in Article II. That article is in the nature of a pledge by the signatories to the treaty that they will in all controversies, of whatever nature or whatever origin, seek an adjustment through specific means. That is the treaty. That expresses the real object and scope of the treaty.

Article I has significance in throwing light upon the meaning of Article II, but the practical provision of the treaty is contained in Article II.

Fifteen leading nations of the world upon August 27, 1928, signed this treaty at Paris. Since that time some 43 or 45 other nations have adhered to the treaty. The treaty itself provides the manner in which adherence shall be had. I think practically all nations now have adhered; only three or four have not, and the indications are that they will later adhere.

A brief history of the treaty may properly begin, I presume, with the statement of M. Briand made upon the 6th of April, 1927, on the tenth anniversary of the entrance of the United States into the World War. At that time in a public statement M. Briand said:

> France would be willing to subscribe publicly with the United States to any mutual agreement tending to outlaw war—to use an American expression—as between these two countries. The renunciation of war as an instrument of national policy is a conception already familiar to the signatories of the covenant of the League of Nations and of the treaty of Locarno.

This statement was made in the course of an address or interview; it was not communicated to this Government; but the statement of itself led to much discussion throughout the world and was given great consideration in the press of the United States.

Later, upon the 20th of June, 1927, the French Government proposed a treaty between the United States and France which I shall read. It will be observed when we read this proposed treaty that it is in the same language as the treaty which was ultimately signed, the only difference in the two being such differences as were necessary to transform a bilateral into a multilateral treaty. I shall read the proposal, notwithstanding it is a repetition, in order that we may have it before us and in the RECORD.

> ARTICLE I. The high contracting parties solemnly declare in the name of the French people and the people of the United States of America that they condemn recourse to war and renounce it, respectively, as an instrument of their national policy toward each other.
>
> ART. II. The settlement, or solution, of all disputes or conflicts of whatever nature, or of whatever origin they may be, which may arise between France and the United States of America shall never be sought by either side except by pacific means.

After the proposal was transmitted to the Government of the United States the Secretary of State met with the Committee on Foreign Relations of the Senate and discussed it. I shall not go into a discussion of what transpired in the committee, but, after meeting with the committee, the Secretary made answer to the French Government, and the change the Secretary of State proposed consisted of nothing more than the change from a bilateral to a multilateral treaty. It was thought by our Government that, if the principle announced upon the part of the French Government was a sound one, it ought to be applied to all governments which were willing to become signatory to such a treaty.

It was thought, furthermore, that a treaty of the nature proposed by the French Government confined to the French Government and to the Government of the United States would be something in the nature of an alliance, and that it would place our Government in an attitude which it did not desire to occupy, apparently being willing to enter into a peace treaty with one government which it was not willing to enter into with another. Thus the multilateral treaty was proposed by the Government of the United States. We took the proposal of France literally and declared it to be our desire to extend it to all other nations. I think all will agree that this was the wise thing to do.

A vast amount of correspondence followed. Much of that correspondence has, to my mind, now become immaterial. Some of the suggestions proposed were abandoned; others were met by interpretation. I do not think it necessary to go into detail as to that portion of the correspondence which seems to me at this time to be irrelevant and which throws no light upon the treaty as it was ultimately signed. That correspondence gave rise to two important questions, and outside of the correspondence in general and public discussion a third question has been raised. To those questions it seems to me proper to refer in the opening discussion of the treaty.

The question which may be considered first not only in point of time but in some respects in importance is that of the right of self-defense under the treaty. It is conceded upon the part of all now that the right of self-defense is in no wise curtailed or embarrassed by the treaty, the Secretary of State taking the position, and the other governments promptly acceding to it, that the right of self-defense is an inherent right, implicit in every treaty; that it is a right which can not be bartered away, abrogated, or surrendered; and that each nation may under the treaty determine for itself when the right of self-defense arises and the extent to which it may go in defending its rights.

The criticism is at once made that this practically destroys the value of the treaty; that it is a weakness the measure of which can hardly be estimated, it is contended. If, say the critics, a nation may determine for itself what constitutes an attack and what constitutes the right of self-defense, it leaves the entire treaty and its effect within the judgment of any particular nation which may feel disposed to answer to an attack or threatened attack. I frankly concede, Mr. President, there is in that respect a weakness, but it is a weakness which is inherent in human nature and inherent in the conditions which obtain. I presume until we are willing to have a supergovernment, a government of sufficient sovereign power as a supergovernment to execute its decrees, that no nation will ever surrender or undertake to surrender—in my judgment it could not do so—the right of self-defense, and no nation will surrender the right to determine for itself what constitutes an attack or what is justification for defense. This is a right which must be conceded as a part of every treaty.

If the treaty undertook to provide such a surrender, I take it that it would not receive the support of anyone. It never would have been proposed by the President to the Senate, and would not meet with the approval of any Member of the Senate.

In discussing this question of self-defense, the Secretary of State had this to say:

> The Government of the United States believes that the right of self-defense is inherent in every sovereign state, and implicit in every treaty. No specific reference to that inalienable attribute of sovereignty is, therefore, necessary or desirable.

Later, in a speech made upon the 11th of November, 1928, a further statement was made by the Secretary in regard to this matter:

> The question was raised as to whether this treaty prevented a country from defending itself in the event of attack. It seemed to me incomprehensible that any nation should believe that a country should be deprived of its legitimate right of self-defense. No nation would sign a treaty expressly or clearly implying an obligation denying it the right to defend itself if attacked by any other country. I stated that this was a right inherent in every sovereign state and that it alone is competent to decide whether circumstances require resort to war in self-defense. If it has a good case, the world will applaud it and not condemn it; but a nation must answer to the tribunal of public opinion as to whether its claim of the right of self-defense is an adequate justification for it to go to war.

The only censor—and these things we may understand and frankly admit—the only censor or criticizing power of a nation exercising the right of self-defense, if it does not exercise it upon true principle, is the power of public opinion. There being no supergovernment, no tribunal to which to appeal, and no one willing to create a supergovernment, and no authority otherwise to pass upon the matter, that is the only judge that we can rely upon to censor this part of the treaty. I know of no other tribunal to which we can appeal for the rectitude of nations in the exercise of this right of self-defense.

On page 28 of the pamphlet which contains the correspondence the British Government, in speaking of this matter, use the following language:

The language of Article I, as to the renunciation of war as an instrument of national policy, renders it desirable that I should remind your excellency that there are certain regions of the world the welfare and integrity of which constitute a special and vital interest for our peace and safety. His Majesty's Government have been at pains to make it clear in the past that interference with these regions can not be suffered. Their protection against attack is to the British Empire a measure of self-defense. It must be clearly understood that His Majesty's Government in Great Britain accept the new treaty upon the distinct understanding that it does not prejudice their freedom of action in this respect. The Government of the United States have comparable interests any disregard of which by a foreign power they have declared that they would regard as an unfriendly act. His Majesty's Government believe, therefore, that in defining their position they are expressing the intention and meaning of the United States Government.

We shall have occasion, no doubt, to recur to this paragraph often in this debate; and I propose at this time to treat it only as it relates to the particular matter which I am now discussing.

The British Government in this note undertakes to define what it conceives to be the principle or right of self-defense as applied to the British Government. It contends that there are certain regions, which the Secretary of State for Foreign Affairs afterwards more accurately defines, interference with which, or attack upon which, would be regarded as an attack upon the British Empire; and would call for the exercise of the right of self-defense under the treaty. It is an expression of view as to the application of this principle. But the note neither adds to nor detracts from the treaty, for this right of self-defense is complete under the treaty itself.

It may be said, and undoubtedly will be said, that this gives the British Empire a wide region of the world over which to exercise the right of self-defense; and it does. That is by reason of the fact that the British Empire's possessions cover all quarters of the globe. But I know of no way and I know of no desire to deny the British Empire or any other government the right of construing the treaty in accordance with what it conceives to be necessary for the defense of its country. That at least is what the British Government in this instance undertakes to do, and indicates what its policy will be in the application of this principle. We may differ from the application of the principle, but, under the treaty, she is answerable alone to her own sense of honor and to public opinion.

Later, in discussing this particular matter in the House of Commons, when the Secretary of State for Foreign Affairs was interrogated with reference to this note, Mr. Chamberlain used the following language:

I venture to think that it does no good to put about those exaggerated suspicions, and that it will be much more helpful to say, what is the fact, that our doctrine is exactly comparable to that of the American Government; that it is not a doctrine of aggression, that it is not a desire for territorial expansion, but a pure measure in self-defense necessitated by the geographical position of the Empire.

A fair construction, therefore, of the language used both in the note and in the debate is that the British Government is attempting to confine itself, and thinks it is confining itself, to a principle contained in the treaty, and a principle which no one disputes—that is, the right of self-defense.

The honorable gentleman found fault with the wording of my note with respect to the passage dealing with self-defense. He appeared to think that that was something which I had added, and that it had no parallel in the American note.

Then, in the language which I have just quoted, he undertakes to show that it is purely a matter of self-defense, and not in excess of the claim or different from the claim made in the American note.

I ought to say here that this question of self-defense had been discussed by the Secretary of State in a public speech prior to the time of this note, and that that public speech had been transmitted with the note.

France, in discussing this question, on page 44 of the pamphlet, says:

Nothing in the new treaty restrains or compromises in any manner whatsoever the right of self-defense. Each nation in this respect will always remain free to defend its territory against attack or invasion; it alone is competent to decide whether circumstances require recourse to war in self-defense.

The German Government, on page 24 of the pamphlet, says:

As the need of the nations for the assurance of peace since the World War has already led to other international agreements, the necessity arises for the states concerned to make a decision as to the relationship in which the pact now being planned would stand to these international agreements which are already in effect. You have already, Mr. Ambassador, referred in your note to the considerations which were put forward in this connection by the French Government in its exchange of views with the Government of the United States. So far as Germany is concerned, the covenant of the League of Nations and the Rhine pact of Locarno come into consideration as international agreements which might affect the substance of the new pact; other international obligations of this kind have not been entered into by Germany. Respect for the obligations arising from the covenant of the League of Nations and the Rhine pact must in the opinion of the German Government remain inviolable. The German Government is, however, convinced that these obligations contain nothing which could in any way conflict with the obligations provided for in the draft treaty of the United States. On the contrary, it believes that the binding obligation not to use war as an instrument of national policy could only serve to strengthen the fundamental idea of the covenant of the League of Nations and of the Rhine pact.

The German Government proceeds on the belief that a pact after the pattern submitted by the Government of the United States would not put in question the sovereign right of any state to defend itself. It is self-evident that if one state violates the pact the other contracting parties regain their freedom of action with reference to that state.

Without taking time to read the different notes of the other governments, all governments take the position that the right of self-defense is not impaired under the treaty. Whatever may be the value of the treaty, it must be measured in its value by the full conceded right of self-defense by all signatories to the treaty. In this connection I desire to call attention to Article II in connection with the principle of self-defense.

It must be borne in mind that Article II provides that—

The settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them (the High Contracting Parties), shall never be sought except by pacific means.

If we assume, for illustration, that a controversy is on between two powers, that a dispute has arisen, and the controversy has proceeded to the point where both governments are engaged in considering it, the government which desires to live up to the treaty would, in my judgment, under Article II, have a right to say and would be in duty bound to say, "We desire peaceful settlement of this controversy under Article II. You have pledged that you will settle all controversies with us, of whatever nature or of whatever origin, by peaceful methods. We are prepared to carry out our part of the engagement and ask for a peaceful solution of the controversy."

No government refusing to come into conference, or refusing to make an effort for peaceful settlement, could, in my judgment, ever afterwards successfully claim that it was in good faith acting in self-defense. It would have great difficulty in satisfying the public opinion of the world that it was acting in good faith. It would indeed be violating the treaty. Here is a method and a means by which to test any government which might be acting not in good faith under the treaty, and to place it in a position before the world where it would be practically impossible to defend its course or conduct.

Another principle with reference to the right of self-defense is that it consists of defense only. When the attack has been resisted and the danger has disappeared, the right of self-defense no longer exists, under any rule with which I am familiar.

Let me say here that I have made the statement publicly, with which some have found fault, that these letters in no wise change the treaty. I wish to reiterate that. I have no doubt as to the correctness of that position. I do not mean to say that notes might not deal with the subject and in a way which would, as notes, constitute a change in the treaty, which would put a construction upon the treaty at variance with the terms of the treaty. What I do mean to say is that these notes do not assume to make any change in the treaty, since they contend for nothing more than that which is conceded to be within the terms of the treaty. The notes state no principle in this matter not already found in the treaty.

When the writers discuss the right of self-defense, and state what they understand to be the right of self-defense, they are doing nothing more than they would have a right to do had no note ever been written. When they say that "under the treaty we reserve the right of self-defense," they are undertaking, if they should use that language, to reserve that which is already provided for and reserved in the treaty.

It is in this sense that it is my contention that none of this correspondence results in any modification of the terms of the treaty itself, and that the treaty as signed is that which is to guide. These terms have not been changed.

The second proposition of importance is the question of sanctions. What agreement, express or implied, do the signatories to the treaty make with reference to enforcing the treaty? Is force or punitive measures, express or implied, anywhere provided for in the treaty? If a nation violates the treaty are we under any obligation, express or implied, to apply coercive or punitive measures? I answer emphatically, no!

It will certainly not be contended that the language of the treaty itself makes any such provision. The language of the treaty refutes the proposition. The philosophy of the treaty is not that of preventing war, but that of organizing peace, which is a wholly different thing. The treaty is not founded upon the theory of force or punitive measures at any place or at any time. It does not rest upon the principles upon which alliances and balance of power ordinarily rest, that of force behind the treaty to be applied in case anyone transgresses the treaty. That is not, in my opinion, within the terms of the treaty. I know it is not within the express terms, and I am equally certain that it is not within the implied terms.

There certainly can not be any implication for the use of force under a treaty which rejects the use of power or force or under a treaty which pledges pacific settlement of all controversies of whatever nature or kind. From language which rejects war and pledges the nations to the settlement of their controversies through peace how can we imply the implication at any time or under any circumstances to use force or to administer coercive or punitive discipline?

Let us read this treaty again in connection with that argument. It is very brief, fortunately:

> They condemn recourse to war for the solution of international controversies.

The treaty condemns war; not aggressive war, which was rejected, not this or that kind of war, but war as an institution. It rejects war as a method for settling international disputes. War is not condemned under certain circumstances but all circumstances.

That being true and that being the language, how may we imply that outside of the language is an inference that we will do that which the language positively prohibits?

> And renounce it as an instrument of national policy in their relations with one another.

Again, referring to Article II:

> The settlement or solution of all disputes or conflicts, of whatever nature or of whatever origin they may be, which may arise among them shall never be sought except by pacific means.

So the language, plain, simple, and direct, that under no circumstances or conditions do we recognize coercive measures as a method of enforcing the treaty seems to be clear.

Not only is the language of the treaty, as I have indicated, clear and unmistakable, but at no time in this voluminous correspondence, coming up between 15 nations originally, and the correspondence laying the basis for adherence, has there been an indication or an implication that any nation conceived that there was any implied obligation upon the part of the nations to enforce the treaty or to punish an aggressor. At no time has that ever been suggested. They have swept the entire field of controversy and explanation with reference to possible exceptions or objections, but at no time and in no instance has any nation suggested that that implication might rest upon a government signing the treaty. The shrewd and discerning statesmen of 60 nations have failed to discover any such implications. And these same statesmen are as familiar with punitive measures and sanctions as any men anywhere on earth, for this is the first principle of European treaties.

I take it, Mr. President, that if such an implication should have been thought of, or had occurred to the mind of France or Great Britain, it would have been the first matter for consideration.

But I find nowhere in the language of the treaty or in the correspondence any reference to this matter, or any language which would indicate that it occurred to any of the Governments that such implication might arise.

It has been stated in the public press, by some critics of the treaty, that, while the language does not provide for force in the punishment of a violator of the treaty, such an implication is there; statements have been made, it is claimed, which indicate that Europe expects the United States will become responsible for the maintenance of the treaty even if force is necessary in order to maintain it.

Mr. President, I have been fairly familiar with the history of this treaty from its beginning, and before it began, and I have undertaken to follow as closely as I could the discussion of it, not only in this country but in foreign countries, both among public officials and the press, and I have been unable to find any discussion indicating any such opinion upon the part of the people of foreign countries. I know that that is not the construction which has been placed upon it very generally, not only by the press but by officials. The very opposite construction has been placed upon it over and over again by leading statesmen and publicists throughout Europe. I venture the opinion that no support for such a contention can be found in European thought.

At the time this treaty was signed, Lord Cushendun represented the British Government, owing to the fact that Sir Austen Chamberlain was ill. I do not think anyone familiar with the political philosophy of Lord Cushendun with reference to these matters and with his acute mind would suspect him of overlooking anything which might be appealed to in the way of force in connection with the enforcement of treaties. So startling a proposition as that of an implied obligation to use coercive measures against any nation which might break the treaty would scarcely escape his inspection of the document.

At the time the treaty was signed, Lord Cushendun said, in a public statement:

> In so far as America is concerned, I do not think the great part Mr. Kellogg has played should be interpreted to mean that we can expect any modification of the traditional American policy of aloofness. So far as the pact is concerned, it does not carry with it any implication on the part of America that she intends to enlarge her interest in European affairs.

This amounts practically to an official interpretation of the treaty by the British Government. At any rate, it strongly refutes the idea that the opinion is entertained in foreign countries that there is an implied obligation upon the part of the United States to use sanctions or to join in punishing European countries which would violate the treaty.

Later, and upon another occasion, Lord Cushendun said:

> There is an element in the British character which makes us shrink from expressing in exhuberant language the ideals which nevertheless supply the motive power of our action, either as individuals or as a nation. And I do not hesitate to say that I look upon the Paris pact as an instrument that proclaims a new era and creates a new outlook. That may not be immediately observable.
>
> Human beings have to adjust themselves to a new environment. But the up-growing generation, assimilating the new Zeitgeist will be nurtured in the idea that war, except in bona fide self-defense, is not a gallant adventure but a national dishonour.
>
> * * * If this hope should be even partially realised, then assuredly this year, 1928, in which we live, will be remembered as a notable landmark in human history, for it will be the fulfillment of the dream of the most ancient visionaries of our race.

It is well, too, to mention the fact that Lord Cushendun here states that no war under the treaty is admissible except a war in bona fide self defense. That should be considered in connection with the British note.

Lord Grey, in discussing the treaty, used this language:

> It is true there will be no sanctions under the American peace pact. Nations which sign it would not be under any obligations to take action against any nation which breaks it.

This is a statement by Lord Grey who has been an advocate and a strong advocate of the league and of the Locarno pact, and has been identified with all the peace movements since the great World War. It is his clear judgment, expressed by his emphatic and unmistakable language, that there are no implied sanctions, no promise express or implied upon the part of any nation to join in punishing one which shall break the treaty.

The London Daily News in discussing it said:

> America herself is under no obligation to punish or share in the punishment of the nation which may break its pledge.

The Saturday Review discussed the matter a little more fully and referred to the difference which we ought to keep in mind as to this treaty and ordinary treaties with reference to peace. It said:

> The essence of all European plans for preserving the peace has been the creation of sanctions against its violation. The essence of the American plan is that there shall be none but the moral sanction. The European school of thought seeks to preserve the peace by forming holy alliances to punish the aggressor; the American school rejects the idea of warlike sanctions and relies purely on the moral sanction. The one school seeks to create in a new form the old system of alliances to restrain an international criminal; the other is content to pronounce the sentence of outlawry against war and to trust to the conscience of nations to make it operative.

There, it seems to me, is an exact definition, an accurate distinction, between the ordinary peace treaties or alliances or balance of power and the present treaty. We ought to con-

sider the treaty for what it is. It may in the minds of some impair its value when we take away the idea of force being behind the treaty or sanctions existing, express or implied, but nevertheless that is the treaty. There are no sanctions; the treaty rests in a wholly different philosophy.

I read a paragraph now from an address by Dr. David Jayne Hill, one of our own great students of peace questions and of treaties, as applied to the question of sanction:

> From the draft of a bilateral treaty of perpetual friendship between France and the United States presented by the Minister of Foreign Affairs of France under date of June 20, 1907, has been developed a multilateral treaty, signed at Paris on August 27 by 15 Governments, including 5 great military powers, to which a great number of others have since expressed their intention to adhere. * * * What, it is asked, is to happen to a contracting party if it violates the compact? Is the United States under obligation to bring it to task and punish it for its defection? Not at all. Such a delinquent will have proved its disloyalty to its pledged word, but the United States makes no pledge to improve its morals or to inflict upon it a penalty by making war upon it. The United States does not guarantee these signatures. It proposes a policy of voluntary peace. This policy is not identical with that of several European political and military combinations. Those compacts require the contracting parties to punish war with war. What then will be the probable action of the United States under this compact toward a military situation in another part of the world? It will first of all no doubt remind the delinquent signatories of their solemn agreement. It may properly call attention to the existence of Article II of the multilateral treaty and the obligations under it. But there is no enforcement clause in this compact.

There is no obligation to go further than the treaty provides, and that is to settle the controversy through peaceful means, and in so far as the United States should take an interest in a particular situation which may arise under the treaty it would be guided and be compelled to be guided in accordance with the principles of the treaty, and that is to bring about peaceful and pacific settlement of the controversy.

Mr. REED of Missouri. Mr. President, will the Senator yield for just one question?

The PRESIDING OFFICER (Mr. CURTIS in the chair). Does the Senator from Idaho yield to the Senator from Missouri?

Mr. BORAH. I yield.

Mr. REED of Missouri. Is it the Senator's view that there is any obligation upon the United States in the case just stated to make any representations at all?

Mr. BORAH. No; I do not think there is any obligation in the treaty, but I say that if the United States should act it could be presumed to act only in accordance with the principles of the treaty and not in conflict with them.

Mr. REED of Missouri. But there is no obligation?

Mr. BORAH. There is no obligation whatever. This is a voluntary matter, as we might say, and as Doctor Hill said, in which they agree and pledge themselves respectively, to one another and to all, to settle their controversies through peaceful means; and if they violate that and disregard it, the treaty is at an end.

Mr. REED of Missouri. I thank the Senator, and I apologize for interrupting.

Mr. BORAH. That is all right. I am always glad to yield to the Senator.

Mr. BRUCE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Maryland?

Mr. BORAH. I yield.

Mr. BRUCE. In other words, the one nation would simply say to the other, "You are not the nation that I took you for," and that would end the episode?

Mr. BORAH. I do not think, if a nation should simply say, "You are not the nation I took you for" and say nothing more, that it would be a violation of the treaty, and it is not probable a nation would do anything of that kind.

Mr. JOHNSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from California?

Mr. BORAH. I yield.

Mr. JOHNSON. May I put it a different way, if it be accurate, and I ask whether or not the statement be accurate. Under the covenant of the League of Nations there was a moral obligation that existed, as the Senator believes?

Mr. BORAH. There was an express obligation.

Mr. JOHNSON. There was an express obligation, and it was an express obligation to enforce a breach of the peace or a violation of the provisions of the league?

Mr. BORAH. Yes.

Mr. JOHNSON. There is no such obligation, express or implied, under the present treaty?

Mr. BORAH. No; there is no such obligation.

Mr. JOHNSON. Suppose, however, that all of the nations that are parties to the multilateral treaty are parties to the League of Nations covenant save the United States, and assume that the breach shall be a breach of the peace under both treaties. We would then be one nation that was not a member of the league where there was a breach of the obligation both of the league and of this treaty in relation to the peace. Would there then be any obligation, express or implied, on the part of the United States to act?

Mr. BORAH. Not at all.

Mr. ROBINSON of Indiana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Indiana?

Mr. BORAH. I will yield in just a moment. In other words, the covenant of the League of Nations had certain express provisions with reference to maintaining peace. The United States not having joined the league could not be bound by any of the obligations, express or implied, of the league, and, although all members of the league might be bound by reason of certain conditions which should arise, the United States would not be bound.

Mr. JOHNSON. What I am endeavoring to make plain, if the Senator will permit me, is that the breach was, alike under the covenant of the league and under this treaty, a breach of the peace. All the nations except the United States under the covenant of the league would endeavor to enforce the obligation that rests upon them and against the party that was guilty of the breach. The United States then would stand aloof, the only nation on the face of the earth that was a party to the same breach in a different treaty, doing nothing at all, with no obligation either express or implied.

Mr. BORAH. Exactly. In other words, when the treaty is broken the United States is absolutely free. It is just as free to choose its course as if the treaty had never been written.

Mr. ROBINSON of Indiana and Mr. SHIPSTEAD addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Idaho yield; and if so, to whom?

Mr. BORAH. I will yield first to the Senator from Indiana.

Mr. ROBINSON of Indiana. I agree with the Senator that Article II is, of course, the most important part of the treaty. I assume the Senator believes with me that if the United States enters upon the treaty and becomes a signatory thereto, and if it is ratified by the Senate, the United States will be bound by the treaty and by Article II at all times.

Mr. BORAH. Yes; that is, bound so long as the treaty is not broken.

Mr. ROBINSON of Indiana. To get at the question in just a little different way from that which was suggested a moment ago, assume that France, for instance, and Colombia should get into a controversy of some sort and not observe the treaty. Assume that it led to warfare. What, then, should be the proper attitude of the United States under the treaty?

Mr. BORAH. The United States would be in just the attitude toward those nations that had broken the treaty and gone to war without regard to the treaty as if no treaty had been made. In other words, the moment a signatory to the treaty violates the treaty it releases all other nations as to that government violating the treaty.

Mr. ROBINSON of Indiana. But assume that both of them insist they were acting in self-defense, then who is going to decide that question and, if it is decided, no matter how, what is to be the attitude then of the United States? Could the Senator tell me that?

Mr. BORAH. The United States would have nothing to do with deciding the question of self-defense with reference to the action of any other nation unless the action of that nation were in the nature of an attack upon the United States iself. If that were true the United States would decide for itself what action it would take in that case.

Mr. ROBINSON of Indiana. In that event would the Senator say that the United States under this treaty would be justified in going to war against France to protect her rights under the Monroe doctrine?

Mr. BORAH. Absolutely. If the facts disclosed a disregard of the Monroe doctrine, that being a part of our self-defense, we would have the right to act in accordance with our free judgment.

Mr. ROBINSON of Indiana. Then the language does not mean what it says.

Mr. BORAH. Yes; it does. It means exactly what it says.

Mr. ROBINSON of Indiana. It says:

The high contracting parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means.

Mr. BORAH. When France undertakes to settle it by other means than pacific means, by going to war, as the Senator said, France has violated the treaty and the United States is released. In addition to that, the Monroe doctrine raises the question of self-defense.

Mr. ROBINSON of Indiana. But let us assume France insists that she is acting in self-defense.

Mr. BORAH. I suppose the Senator is getting at the Monroe doctrine?

Mr. ROBINSON of Indiana. Precisely. If the Senator feels that this language does not mean what it says under certain conditions, then what would be the objection to a resolution setting forth exactly what we do mean by it, giving us the moral right ultimately to protect the Monroe doctrine?

Mr. BORAH. In my opinion when we push the Monroe doctrine outside of the principle of self-defense we have no Monroe doctrine at all. There is only one principle upon which the Monroe doctrine has ever rested. We can not maintain it upon any other principle. That principle is the right of self-defense. That was the principle which caused its enunciation. That is the principle upon which we have maintained it, and if we push it outside of that we have no right to interfere in South American affairs at all.

Mr. ROBINSON of Indiana. Precisely, but as the treaty now stands it is multilateral and we took the initiative to make it a multilateral treaty. To some degree, therefore, we are responsible for the treaty's being observed throughout the world because we took the initiative to make it multilateral.

Mr. BORAH. The fact that we took the initiative does not give rise to any implication or obligation other than that which is contained in the initiative which we finally consummated.

Mr. ROBINSON of Indiana. Other signatories to the pact, however, found it necessary, or seemed to find it necessary, to write into their ratification in one manner or another the right of self-defense. Does not the Senator think that the United States, to be perfectly safe, ought to write the same kind of a provision into its ratification by the Senate?

Mr. BORAH. I take it that the Senator perhaps is not familiar with all the correspondence; but the first nation to write such a stipulation into this treaty—if that is what the Senator calls it; I do not call it that, because it was already in the treaty—was the United States. The United States said that under this treaty the United States has the absolute right of self-defense. Ours was the first Government so to state. My contention, however, is that the right of self-defense would have been just as plain and just as inalienable and just as perfect without any letter from anybody at all.

Mr. ROBINSON of Indiana. But, Mr. President, if we should go to the defense of Columbia in a supposed case, such as I suggested a moment ago, and the other 50 or more signatories to the treaty—and none of them is any too friendly to us—should insist that we were not acting in self-defense in accordance with the treaty itself, I am asking the Senator then if we would not be proscribed by the remainder of the world? Then would we not possibly have to fight all the world to defend the Monroe doctrine? In other words, is it not about as well that we take care of our own business?

Mr. BORAH. Oh, it is exceedingly important that we take care of our own business, but it is also exceedingly important that we do it intelligently.

Mr. ROBINSON of Indiana. That is just what I am suggesting.

Mr. BORAH. Mr. President, the Monroe doctrine, as I have said, in my judgment is just as much a principle of self-defense as is our right to resist if France should attack Norfolk, Va.

Mr. ROBINSON of Indiana. Then, would there be any harm in saying so?

Mr. BORAH. We have said so.

Mr. ROBINSON of Indiana. Can we not say so again in the ratification?

Mr. BORAH. The Senator from Indiana is saying so again, but it is in the treaty and saying so again adds nothing. [Laughter in the galleries.]

The PRESIDING OFFICER. The galleries will please preserve order.

Mr. SHIPSTEAD. Mr. President, will the Senator from Idaho yield to me?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Minnesota?

Mr. BORAH. I yield.

Mr. SHIPSTEAD. This question came to my mind during the discussion. The League of Nations as a military alliance provides for sanctions in case of the violation of treaty obligations. If such a contingency should arise as that one of the signatories to the compact should violate the compact and the council of the league should invoke sanctions, should impose, for instance, an economic blockade upon the offending nation, and that blockade should interfere with the commerce of the United States, would the Senator believe that that was a violation of the treaty?

Mr. BORAH. Mr. President, I beg the Senator's pardon. I had lost a paper, and while I was looking for it my attention was diverted from his question. Will he again state his question?

Mr. SHIPSTEAD. If a condition should arise by which a member of the League of Nations should violate or in the opinion of the council should violate any of its obligations under the compact of the League of Nations, and the council, feeling competent to apply sanctions, as the pact provides, in order to discipline such nation, should do so, for instance, by the application of an economic blockade, and that blockade should interfere with the commerce of the United States, should interfere with our right to trade, would the Senator believe, if such a condition should arise, that it would be a violation of the treaty?

Mr. BORAH. No; I should not. In other words, as I understand the Senator's question, it is this: If under Article XVI of the League of Nations conditions should arise which would justify, in the opinion of the league, the application of a blockade, and the League of Nations should put into execution a blockade, the question which the Senator is interested in, I take it, is whether or not we would be bound to recognize that blockade in carrying on our commerce? In my opinion, this treaty does not affect such a situation at all and has nothing whatever to do with it. Our right to trade and our commercial rights would in no wise be affected.

We would as a neutral, and not being a member of the league, have the right to carry on our trade under the rules of the sea and this treaty would not curtail or embarrass that right. If a controversy should arise we would then be bound to settle the controversy through peaceful methods.

Mr. REED of Missouri. Mr. President, will the Senator pardon me if I ask him another question right there?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Missouri?

Mr. BORAH. I yield.

Mr. REED of Missouri. I should like to inquire about how long he thinks the war would have to last before we could settle such a controversy by peaceful means?

Mr. BORAH. Perhaps I do not understand the Senator's question.

Mr. REED of Missouri. About how long does the Senator think the war, of which we have been speaking, would have to last in order for us to settle our right to violate the blockade and settle it by peaceful means?

Mr. BORAH. We would not have anything at all to do with the time the war lasted.

Mr. REED of Missouri. The Senator does not understand me.

Mr. BORAH. No; seemingly I do not.

Mr. REED of Missouri. Perhaps, I asked the question stupidly.

Mr. BORAH. I think not, but probably we are thinking about two different things.

Mr. REED of Missouri. The question is in connection with the colloquy which has preceded. I understood the Senator from Idaho to say in answer to the Senator from Minnesota [Mr. SHIPSTEAD] that if the League of Nations were to declare a blockade and we were to disregard the blockade and a controversy should arise, it would then be our duty under the so-called Kellogg treaty to settle that controversy by peaceful means. I asked the Senator how long he thought the war would have to last for us to get a decision by peaceful means in a controversy of that kind.

Mr. BORAH. I do not know, and neither would I care particularly, because we would conduct our commercial transactions upon the theory that we had a perfect right to do so, and the pending treaty would have no application to such a situation at all.

Mr. REED of Missouri. Exactly.

Mr. BORAH. Only in such an instance where an actual controversy arises which we would recognize would we be under any obligation to negotiate with any nation which was interested in the blockade.

Mr. REED of Missouri. I do not desire to prolong the discussion, and I apologize to the Senator for having asked the first question which started all of these questions after he asked not to be interrupted; but, since he has been interrupted, let

me follow the illustration through, merely to get the Senator's opinion. I do not, as I have said, care to debate it at this time, but I should like to get the judgment of the Senator from Idaho.

Assume that a war is threatened and that the League of Nations, under Article II, proceeds to declare that there is a threat of war between two nations, either members or non-members, and thereupon the league applies, sanctions, or declares a blockade or goes to war and resorts to force, all of which, of course, is reserved in Article II. Among other things, the league undertakes to blockade the ports and destroy the commerce of the offending nation, and seizes our ships passing over the high seas to the ports of the nation declared to be the offending nation. Of course, we can protest by peaceful means, but I reaffirm practically what I intimated in my question, that I think it would be a very long war and would not be terminated before we would get through with peaceful negotiations.

If, instead of doing that, we were to do what we would do if we had not signed this treaty, if the case became aggravated we would convoy our merchant ships by our men-of-war.

Mr. BORAH. Which we would have a perfect right to do under this treaty.

Mr. REED of Missouri. But suppose some ship of the league or some nation controlled by the league should attempt to take a merchant vessel from under the guns of our man-of-war, what would we do—negotiate or defend? And does not this treaty absolutely bind us not to fire a shot in defense of that vessel?

Mr. BORAH. Not at all; not at all.

Mr. REED of Missouri. Then we are at perfect liberty to go anywhere we want to in the world on all the waters of the seven seas, without waiting for negotiation, to defend the rights of American citizens, and American property by our cannon and our men just as we are now if we do not sign this treaty.

Mr. BORAH. Mr. President, if such an incident should occur as that which the Senator relates, it would be an act of war upon the part of the nation attacking us. If it undertook to take our property or take our citizens from under our protection, in my opinion that would constitute an act of war. The nation guilty of such act would have violated the treaty and we would be released.

Mr. REED of Missouri. We might so treat it, but the other nation, on the other hand, could claim that it was merely exercising a proper right of search and seizure under the law of nations.

Mr. BORAH. The Senator is now stating an entirely different proposition.

Mr. REED of Missouri. That would be the claim at the time; and the question is, under the terms of this treaty should we surrender that vessel and go to some tribunal somewhere to settle the controversy, or are we by this treaty left at liberty to act just the same as though we had not signed the treaty.

Mr. BORAH. In my opinion, if the acts of the government to which the Senator refers, whatever government it might be, were such as to constitute war we would be relieved, of course, from the obligations of this treaty. If they were not such as to constitute war, of course we would be bound by the terms of the treaty.

Mr. REED of Missouri. The mere taking of a merchant vessel under a claim of right is not an act of war in itself. I do not want to debate the question; I merely wish to get the Senator's view of it.

Mr. BORAH. Let me state it a little more fully then. If the act of the nation in challenging our right upon the sea should be such as to constitute an attack by force to take possession of our citizens or our property it would undoubtedly constitute an act of war. If, on the other hand, the action of the Government should be nothing more than the exercise of a right under maritime law to search for contraband and seize it, it would not be an act of war, and we would not be justified in using force. That is precisely the principle which we followed during the World War.

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield further to the Senator from Missouri?

Mr. BORAH. I do.

Mr. REED of Missouri. If the Senator will pardon me for asking a further question; has it not been the claim at all times of all of the nations which have seized the commerce of other nations upon the high seas that they were acting in accordance with the laws of war and merely searching or seizing because contraband or alleged contraband was being carried?

Mr. BORAH. Of course, a nation might make a claim that it was acting in self-defense when it was not; it might make a claim that it was complying with maritime law when it was not; that is a situation that can not be obviated, of course; but I am assuming now in discussing this treaty that there is an honest effort to live up to the terms of the treaty and that the nations are acting in good faith in regard to it. If that be true, the nations would have no right to use force while a government was pursuing the course mapped out by maritime law with reference to searching for contraband.

Mr. BINGHAM. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Connecticut?

Mr. BORAH. I do.

Mr. BINGHAM. Does the Senator feel that there is anything in this treaty which changes American practice and American policy for the past century in regard to sending our warships and marines into various parts of the world to defend the lives of American citizens or the property of American citizens which may be threatened?

Mr. BORAH. As I understand, it is a well-established rule and principle of international law that a nation—the United States, for illustration, here—would have a perfect right, without going to war or being under the principle of war, to protect the lives and property of its citizens from threatened attack in foreign countries. If it goes beyond the principle or the necessity of protecting the lives and property of its citizens and interferes with the political organization of the foreign government and attacks its sovereignty or its sovereign rights, of course that is war; but so long as its action consists of defending and protecting the lives and property of the citizens it is not war, and never has been regarded as war. International law does not treat such action as war, and no nation has a right to call it war; so this treaty would not affect that situation at all.

Mr. BINGHAM. Does the Senator think, then, that under this treaty we would have the right to deal with foreign nations under all the various forms of nonamicable measures, short of war, which are recognized in international law?

Mr. BORAH. Yes; I think so—short of war, if conditions justified.

Mr. BINGHAM. Including reprisals?

Mr. BORAH. We now settle those things by peaceful means if we can. We undertake to settle them in the same way in which this treaty provides for settling them. That is our policy. That has been our policy since the beginning. If a nation refuses settlement by peaceful means we may rest upon our rights under international law even to the extent of reprisals or other more amicable methods.

Mr. BINGHAM. Then the Senator does feel that the treaty represents no change in our policy?

Mr. BORAH. Not in regard to the matters of which the Senator has now spoken, always taking the acts of the other nation into consideration.

Mr. BINGHAM. That is, with regard to the defense of American lives and property abroad?

Mr. BORAH. Yes. I do not wish the Senator to understand from that, however, that in looking back over the past I regard all acts in defense of the lives and property of American citizens in foreign countries as coming under the rule which I have just stated. I think we have carried on war in certain instances. I do not care to go into that discussion now; but I should not want to be understood as asserting that in all the things we have done heretofore we have kept out of war. I state a principle and do not approve any particular instance.

Mr. BINGHAM. Will the Senator pardon one further question?

Mr. BORAH. Yes. I yield.

Mr. BINGHAM. The Senator mentioned, in the second article of the treaty, particularly the last phrase, "except by pacific means." Before the Senator gets through will he explain to us, so that there may be no doubt about it, that a good deal of what has been published in the press as to what is meant by "pacific means" is incorrect, and that the phrase "pacific means" includes nonamicable measures short of war, which might also include such things as a display of, or restricted use of, force, embargo, nonintercourse, reprisals, retortion, and the breaking of diplomatic relations?

Mr. BORAH. Mr. President, to state in a single paragraph what I understand this treaty to mean in connection with that question, it is this:

We pledge ourselves by this treaty to adjust our controversies with other nations through peaceful means. That may consist of settling them through diplomatic channels; it may consist of settling them under the conciliation treaties, or the arbitration treaties, or The Hague tribunal, or any other method which at the time we may be able to devise to come to an understanding with that nation, this side of war.

Mr. BINGHAM. Mr. President, will the Senator yield there for just a moment?

The PRESIDING OFFICER. Does the Senator from Idaho further yield to the Senator from Connecticut?

Mr. BORAH. Yes.

Mr. BINGHAM. All the means which the Senator has just referred to are in international law usually considered to be "amicable" means of settling a question. The Senator has not yet referred to those five or six means generally referred to as "nonamicable means short of war," which are sometimes held to include also pacific blockades.

Mr. BORAH. We would undoubtedly have the right to employ all means coming within the pacific settlement or the peaceful settlement of disputes which are this side of war. For instance, if we wanted to break off diplomatic relations with a country, there would be nothing in this treaty to prevent that. It is not necessarily regarded as an act of war. But undoubtedly the treaty obliges us to employ peaceful methods and we depart from that only when such methods are rejected or disregarded by the other nation.

Mr. BARKLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Kentucky?

Mr. BORAH. In just a moment. This treaty pledges us not to resort to war except in self-defense. It pledges us to seek settlement through peaceful means; and, in my judgment, we can only depart from that as we find those methods are rejected by other powers. If the other nation will not join in the settlement through peaceful means, then we take such action as seems best adapted to bring about protection to our people or their property, or to the Nation as a whole. But we can never under the treaty go to the extent of resorting to war except in self-defense.

Mr. BINGHAM. Then there is nothing under the treaty which would prevent us from sending a cruiser into the heart of China, to the port of Hankow, as we had to do last year, if we believe that American lives and property are in danger there?

Mr. BORAH. I understand not; because that would not be an act of war. It never has been held to be an act of war. I assume that life and property are in actual danger.

Mr. BINGHAM. In other words, if under the treaty we are permitted to send our cruisers to all parts of the world where we think American lives are in danger, the ratification of the treaty would in no way diminish our necessity for cruisers?

Mr. BORAH. I do not know about that. I am not committed to that doctrine without explanation. That is to say, I do not think that it likely will result in diminishing our desire for cruisers at once. It is my hope that if this treaty obtains the confidence and faith of the nations and they live up to the treaty, in time disarmament will inevitably follow to a marked degree, just as in the relationship between this country and Canada through a hundred years we have lived on the most peaceful terms. We have destroyed our forts and all means of protecting one another by force along the border. That has ripened into a sentiment in both countries which gives us entire confidence in each other.

It is my hope that in time this treaty would have an effect of that kind. I am not, however, one of those who believe that we should to-morrow, by reason of signing this treaty, disband our Army or destroy our Navy, because we can reduce our Navy only in proportion to some degree, at least, as other nations do the same thing. We must get the confidence of those nations in peaceful methods and the settlement of disputes through peaceful methods before we can expect them to reduce their navies to any marked degree; and so long as they do not reduce theirs it is but wisdom that we keep a reasonable navy for the purpose of protecting ourselves.

Another proposition is that this treaty does not at all impair the right of self-defense. The Navy as a whole will not be destroyed in my time, or the Senator's, because that confidence will not arrive to that extent. Nevertheless, in my judgment that will not prevent a reasonable reduction of armament when the nations come to have more confidence in the settlement of their controversies through peaceful means, and it is my great hope that it will bring about a state of international confidence and good will which will reduce armaments. But the treaty must be given time to effectuate that confidence and in the meantime let us not destroy our navies, but keep them down to a reasonable protection of our rights at sea.

As a matter of fact, there is not a thing in this treaty that has not been a fundamental foreign principle of ours from the beginning of the Government until this hour. There is not a principle in it that we have not advocated over and over again since John Jay signed the first treaty for the settlement of all controversies through peaceful means.

Mr. JOHNSON. May I ask just one question in that regard?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from California? Hereafter will Senators who desire to interrupt please address the Chair?

Mr. JOHNSON. Mr. President, will the Senator yield for just a question?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from California?

Mr. BORAH. I do.

Mr. JOHNSON. I should like to ask the Senator a question following what he has said, which I think is quite accurate, and with which I have full sympathy?

Could the United States, if this pact had been in full force and effect, have fought the Spanish-American War?

Mr. BORAH. In my judgment it could, upon the theory upon which we professed to fight it. Our ships had been attacked, our people had been murdered, and we had a perfect right to defend ourselves against these attacks.

Mr. JOHNSON. But does not the Senator think the cause of the Spanish-American War was far different from that?

Mr. BORAH. It might have been the cause. If so it would have been prohibited by this treaty.

Mr. JOHNSON. Did we not fight it upon an entirely different basis from that?

Mr. BORAH. I do not know what the Senator has in his mind.

Mr. JOHNSON. Nonamicable reasons have been given by the Senator from Connecticut [Mr. BINGHAM]. Rather sentimental reasons dictated the Spanish-American War, did they not?

Mr. BORAH. Well, I suspect that those reasons entered into it. I should hope that if we ratify this treaty we would be more vigilant in confining ourselves to actual attacks and not sentimental attacks. But our ship had been sunk, American lives lost, and we at least professed to be moved in the protection of life and property.

Mr. JOHNSON. But I understand that the Senator says that with this treaty in full force we could still have fought, without being guilty of a violation of it, the Spanish-American War.

Mr. BORAH. On the basis, as I say, of the blowing up of the *Maine*. I do not know who was responsible, but the disaster had occurred and it was for our Government to determine who was responsible.

Mr. JOHNSON. But upon the basis of the facts that are before us, and the reasons that were given, we could have fought that war?

Mr. BORAH. I think we could. But only upon the theory that we acted in good faith in defending against any further attacks.

Mr. REED of Missouri. Why, Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri desire to interrupt?

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Missouri?

Mr. BORAH. I do.

Mr. REED of Missouri. Does not the Senator recall that when the *Maine* was blown up the Spanish Government immediately disclaimed the act, and that the Spanish Government made almost every conceivable effort to avoid the war by peaceful means? If this treaty had been in effect, surely we would have been bound, under the representations of the Spanish Government, to have arbitrated that matter.

Mr. BORAH. Mr. President, we would not be bound under this treaty, in my opinion, in any different way than that in which we were bound at that time, for this reason: We either acted in good faith or in bad faith with reference to the reason why we fought the Spanish-American War. We could doubtless assign a bad reason and a hypocritical reason under this treaty. We were under obligations to settle with Spain at that time through peaceful means, according to the principles which we had announced for a hundred years, if we believed that Spain was acting in good faith, and that we could protect our rights through peaceful means.

But after the incident as it occurred, after our property had been destroyed and American lives destroyed, it was for the Government of the United States to determine what constituted a real defense of our rights; and when this treaty is ratified it will be for the Government of the United States to determine, upon any particular state of facts or any set of conditions, as to what constitutes a defense of its rights. The principle of the treaty is that we can only go to war in self-defense; if we did not do that in the Spanish-American War, then it would have been barred by this treaty.

Mr. REED of Missouri. That would be true of every other nation and every case.

Mr. BORAH. I said in the beginning that we must admit that the fact that every nation had a right to determine for itself what constitutes self-defense, and how it should apply, is a weakness upon the part of the treaty; but it is a weakness which is inherent in the condition of things which now confronts the world. There is no Senator in this Chamber who would more seriously and effectively attack a treaty which undertook to deny the right of the United States to self-defense than the able Senator from Missouri. There is no way to bridge that chasm.

Mr. BARKLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Kentucky?

Mr. BORAH. I do.

Mr. BARKLEY. I was called out of the Chamber and did not hear all of the Senator's discussion as to just what this treaty includes. As I understand the Senator construes this treaty, or Article II of it at least, to mean that as to every controversy, of whatever nature or character, that might arise out of the application or interpretation of the Monroe doctrine, the treaty compels us to submit it to arbitration or to make every possible effort to arrive at a pacific settlement. What effect would that have upon a controversy similar to that which arose between Great Britain and Venezuela during the administration of President Cleveland?

Mr. BORAH. What we undertook to do at that time was to bring about exactly that situation, a peaceful settlement of the controversy; and that is what we did.

Mr. BARKLEY. But there was some strong language used in the message of the President on that subject, which indicated that if Venezuela and Great Britain were unable to settle their dispute amicably we would probably settle it in another way.

Mr. BORAH. Exactly; and if this treaty were ratified and any nation refused to settle a controversy of that kind through peaceful means, disregarded our request in regard to it, and violated the Monroe doctrine, we would have a perfect right to defend the Monroe doctrine, just as we proposed to do at that time. We would be under obligation to do what we did do, to settle the controversy through peaceful means if possible; but the Monroe doctrine constituting an element of self-defense of the United States, we would have a perfect right to defend the Monroe doctrine, if it was attacked or defied through the acts of a European power.

Mr. BARKLEY. In the event there might be a conceivable controversy between some European nation and some South American or Central American nation involving a question of territory, which, if settled amicably, might result in the cession of a certain portion of territory in this hemisphere to the European nation as a part of an amicable settlement, would our consent to such a settlement in any way involve the abrogation of the Monroe doctrine upon the part of the United States?

Mr. BORAH. Oh, yes. The primary principle of the Monroe doctrine is that no foreign government shall acquire territory in South or Central America.

Mr. BARKLEY. That was not the original primary object. It was to prevent any European government taking any territory here if it was for the purpose of obtaining a foothold in the Western Hemisphere, but it did not cover a controversy over a boundary line. It was intended to keep European nations from an attitude of aggression in the Western Hemisphere, but not originally did it involve the question of disputes in good faith over boundary lines. I think our modern interpretation of the doctrine has been extended to the question of boundary lines. But would the Senator consider that we would in any way abrogate our right to assert the Monroe doctrine by the ratification of this treaty, under which we are obligated to resort to every possible means to settle disputes amicably, in the case of a dispute between a European nation and a South American nation over a question of that sort, which might result in a cession of territory to a nation which the Monroe doctrine involved?

Mr. BORAH. No; I do not think this treaty would in any way embarrass or impair our rights in asserting and maintaining the Monroe doctrine.

Mr. BARKLEY. And the Senator thinks those rights are governed by our own interpretation of the Monroe doctrine?

Mr. BORAH. Exactly. The Monroe doctrine is our doctrine. We announced it ourselves. It is a principle of self-defense. We alone interpret it. As Mr Wilson said, we interpret it, and we will never consent to anybody else joining us in interpreting it. Therefore, if a government of Europe should challenge whatever we deem to be the Monroe doctrine, refuse to settle a controversy between us with regard to it peacefully, we would undoubtedly be the sole judges, ourselves, of what constitutes the Monroe doctrine and how we should defend it.

Mr. BARKLEY. So that if any European nation and any South American nation should settle a dispute amicably between themselves but in our judgment that settlement, amicably arrived at, involved the question of the interpretation and application of the Monroe doctrine, we would then have the right to step in and interfere with that settlement, if necessary, even to the extent of going to war?

Mr. BORAH. Yes. That is, in case the government refused to settle with us peacefully.

Mr. BARKLEY. That is, if both governments refused to settle with us?

Mr. BORAH. Yes.

Mr. CARAWAY. Mr. President, earlier in the Senator's speech he said that if one nation should claim that it was acting upon the principle of self-defense, and another nation said, "I am willing to submit all these questions to arbitration," then that would determine the fact as to who was the aggressor. That is hardly the language of the Senator, but practically what he said.

Mr. BORAH. What I undertook to say was this, that as a test of the good faith of a nation which was claiming to be acting in self-defense, if we should say to that nation, "Let us settle this matter peacefully, let us adjust our controversy, let us arbitrate," and that nation should refuse any overtures of that kind, it would be very difficult for that nation to claim that it was acting in self-defense.

Mr. CARAWAY. In other words, the other nations would be justified in regarding that nation as an aggressor which refused to enter the settlement?

Mr. BORAH. I think they would be.

Mr. CARAWAY. I am asking the question because the Senator said, in answer to a question of the Senator from California, that we could have fought the Spanish-American War, if this treaty had been in effect, without violating its provisions. As I now recall, Spain disclaimed any responsibility for the sinking of the *Maine*, and was willing to settle those questions peacefully. How could we justify ourselves, under this treaty, in refusing to do that?

Mr. BORAH. As I said a moment ago, when you take into consideration the fact that the *Maine* had been blown up, our property destroyed, our means of defense attacked, and our citizens killed, the mere fact that Spain or some other government might disclaim its acts would not of itself be conclusive. The crime having been committed, the deed having been accomplished, the lives of our citizens lost, it would be for us to determine whether the disclaimer was in good faith and whether their action necessitated our action in regard to it. I repeat I do not pretend to say who, in fact, was responsible.

Mr. CARAWAY. In other words, as I understand the Senator, we could look within the minds of people and say, "While you say you are our friends, you are in fact our enemies," and still keep the treaty?

Mr. BORAH. Certainly. We would judge from all the facts—acts as well as words.

Mr. CARAWAY. I asked the questions because I did not understand the logic of that position.

Mr. President, owing to the lateness of the hour, I will move at this time that the Senate take a recess until to-morrow at 12 o'clock.

RECESS

The PRESIDING OFFICER (Mr. CURTIS in the chair). Before putting the motion for a recess, the Chair, under the order previously entered, will refer sundry executive nominations to the appropriate committees.

The Senator from Idaho moves that the Senate take a recess until to-morrow at 12 o'clock.

The motion was agreed to; and the Senate (at 4 o'clock and 50 minutes p. m.) took a recess until to-morrow, Friday, January 4, 1929, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 3, 1929

SURGEON GENERAL AND CHIEF

Medical Director Charles E. Riggs to be Surgeon General and Chief of the Bureau of Medicine and Surgery in the Department of the Navy, with the rank of rear admiral, for a term of four years.

COAST GUARD OF THE UNITED STATES

To be lieutenant commanders

Lieut. Noble G. Ricketts, October 1, 1928.
Lieut. Harold G. Bradbury, October 1, 1928.
Lieut. Irving W. Buckalew, October 1, 1928.
Lieut. Rae B. Hall, October 1, 1928.

Lieut. Arthur G. Hall, October 1, 1928.
Lieut. Ephraim Zoole, October 1, 1928.
Lieut. Paul K. Perry, October 1, 1928.

To be lieutenants

Lieut. (Junior Grade) Alfred C. Richmond, October 1, 1928.
Lieut. (Junior Grade) Walter R. Richards, October 1, 1928.
Lieut. (Junior Grade) Thomas Y. Awalt, September 10, 1928.
Lieut. (Junior Grade) Roy L. Raney, October 17, 1928.
Lieut. (Junior Grade) George B. Gelly, October 17, 1928.
Lieut. (Junior Grade) Russell E. Wood, October 17, 1928.
Lieut. (Junior Grade) Clarence H. Peterson, October 17, 1928.
Lieut. (Junior Grade) James A. Hirshfield, October 17, 1928.
Lieut. (Junior Grade) Joseph D. Conway, October 17, 1928.
Lieut. (Junior Grade) Charles W. Lawson, October 17, 1928.
Lieut. (Junior Grade) Frank T. Kenner, October 17, 1928.
Lieut. (Junior Grade) George C. Carlstedt, October 17, 1928.
Lieut. (Junior Grade) John Rountree, October 17, 1928.
Lieut. (Junior Grade) William W. Kenner, October 17, 1928.
Lieut. (Junior Grade) Stephen P. Swicegood, jr., October 17, 1928.
Lieut. (Junior Grade) Henry C. Perkins, October 24, 1928.
Lieut. (Junior Grade) Paul W. Collins, October 24, 1928.
Lieut. (Junior Grade) Charles W. Thomas, October 24, 1928.
Lieut. (Junior Grade) Frank A. Leamy, October 24, 1928.
Lieut. (Junior Grade) John H. Byrd, October 24, 1928.
Lieut. (Junior Grade) Beckwith Jordan, October 24, 1928.

The above-named officers have passed the examinations required by law.

To be lieutenants

Lieut. (Temporary) John McCann.
Lieut. (Temporary) Charles Etzweiler.

To be an ensign

Ensign (Temporary) Dwight H. Dexter.

The above-named officers have met the requirements for appointment in the regular Coast Guard, as set forth in section 5 of the act of July 3, 1926.

APPOINTMENT IN THE OFFICERS' RESERVE CORPS OF THE ARMY

GENERAL OFFICER

Brig. Gen. David St. Clair Ritchie, North Dakota National Guard, to be brigadier general, Reserve, from December 20, 1928.

PROMOTIONS AND APPOINTMENTS IN THE NAVY

Lieut. Commander William N. Richardson, jr., to be a commander in the Navy from the 11th day of December, 1928.

Lieut. Elliott M. Senn to be a lieutenant commander in the Navy from the 16th day of October, 1928.

Lieut. Vernon F. Grant to be a lieutenant commander in the Navy from the 16th day of November, 1928.

Lieut. Francis T. Spellman to be a lieutenant commander in the Navy from the 11th day of December, 1928.

The following-named lieutenants (junior grade) to be lieutenants in the Navy from the 16th day of October, 1928:

Cecil Faine.
Hubbard F. Goodwin.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 5th day of December, 1927:

Gerald B. Ogle.
John R. Sanford, jr.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 4th day of June, 1928:

Walter B. Davidson.
Roy R. Ransom.
Benjamin May, 2d.
Alfred J. Benz.
Arthur D. J. Farrell.

The following-named citizens to be assistant dental surgeons in the Navy, with the rank of lieutenant (junior grade), from the 14th day of December, 1928:

Merrette M. Maxwell, a citizen of California.
Jackson F. Henningsen, a citizen of New York.

Pay Clerk Walter W. Metcalf to be a chief pay clerk in the Navy, to rank with but after ensign, from the 3d day of December, 1927.

HOUSE OF REPRESENTATIVES

THURSDAY, *January 3, 1929*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

We pause at the threshold of the new year, Righteous Father; into the folds of the coming months we pass. We believe that Thou art ever nearer than the sky and all the worlds that roll in light. In the care of business, at the hearthstone with the children, at the cot when we wrestle for our loved ones, we need not search for Thy presence, nor feel like an exile far from home. We thank Thee that Thou dost lift us to a knowledge of Thy love and protecting care, and that neither life nor death can change the manifestations of Thy heavenly providence. Oh, may the future glow with the glory of God. In the urgency of great duty or in the joy of a great purpose, may we feel ourselves allied to Thee. By simple honesty, by rejecting falsehood, by wise speech and brave example may we grow larger and better and become increasing forces in the affairs of state and society. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of Saturday, December 22, 1928, was read and approved.

BILL PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee did on December 22, 1928, present to the President, for his approval, a bill of the House of the following title:

H. R. 7324. An act for the relief of Orla W. Robinson.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Latta, one of his secretaries, who also informed the House that on the following date the President approved and signed a bill of the House of the following title:

On December 22, 1928:

H. R. 7324. An act for the relief of Orla W. Robinson.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 10093. An act for the relief of Ferdinand Young, alias James Williams.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 584. An act for the relief of Frederick D. Swank; and

S. 4712. An act to authorize the Secretary of War to grant a right of way to the Southern Pacific Railroad Co. across the Benicia Arsenal Military Reservation, Calif.

The message also announced that the Vice President had appointed Mr. KEYES as a member of the committee of conference on the part of the Senate on the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes, vice Mr. CURTIS, excused.

AMERICAN TARIFF AND TRADE POLICIES

Mr. HULL of Tennessee. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on trade subjects and some tariff subjects.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. HULL of Tennessee. Mr. Speaker, the Republican proposal this year again to revise the tariff upward should be met by a Democratic challenge and demand to revise it downward. The Republican practice of accepting large campaign funds from tariff beneficiaries and later permitting them to come to Washington and write their own rates on the plea that the tariff must be revised by its "friends" should be met by a Democratic challenge and a demand that Congress, in the exercise of its own functions and prerogatives, shall write the rates. The Republican proposal to move farther in the direction of extreme high tariffs and more severe restrictions on international trade, in accordance with economic formulas and notions of the prewar vintage, should be met by another Democratic challenge and a demand that America, instead of being further subjected to supertariffs, must in the future work toward a constructive and liberal tariff and commercial policy with uniformity of treatment, in the light of the transformation and revolution in our financial, industrial, and commercial affairs since 1914.

A correct interpretation of these new and changed postwar conditions clearly demands foreign markets rather than excessive tariff protection. There are certain new and elemental facts about America's domestic and international situation that can not well be ignored. From the economic standpoint the United States should have two main objectives, viz, the home trade and continuous development of foreign markets. The future prosperity of this country is inseparably bound up with both.

Republican leadership, ignoring the secure and impregnable position of American industry in our home trade and clinging to preconceived ideas of narrow nationalism or exclusiveness, would continue extreme protection, breathing retaliation, primarily at the behest of antiquated or inefficient plants, those

not economically justifiable, minor specialties, and those near seaports, where small but not abnormal imports come in. Foreign markets and foreign trade are no part of this single policy of superprotection and economic isolation.

The opposing view would put vitality into the recent utterance of President-elect Hoover that "international trade is the lifeblood of modern civilization," and would point to the extreme need of many great and increasing surplus-producing industries for foreign markets. It would brand as absurd the idea of formulating a broad, national tariff and commercial policy by singling out minor or local or group phases or individual tariff items and generalizing from them. It would insist instead that in solving our present vast industrial and trade problems, we must visualize the Nation as a whole—as one great financial unit, one giant productive plant with ever-increasing surpluses, and as the chief outstanding factor in the present interdependent and interlocked financial, commercial, and economic affairs of the world.

American economic policy can no longer ignore the fact that since 1914 we have changed from a debtor and small surplus Nation to the greatest creditor and actual or potential surplus-producing Nation in the world; that due not to tariffs but to our superior labor, machinery, horsepower, and to mass production we maintain higher wages and living standards and lower production costs in an increasing number of industries than any other country; that as a result we were able in 1927 to export and sell $2,000,000,000 of finished manufactures and $700,000,000 of semimanufactures throughout the world in defiance of all low wages and low living standards. Be it remembered in this connection that our high wages and high-living standards had become a permanent part of our industrial system prior to the Fordney tariff; that they originated in the automobile, the buildings, the railroad, and other nontariff sheltered industries, and that real wages here have increased not much over 2½ per cent since 1923. And, too, the great reduction of working hours was effected prior to 1921. Let it be further remembered that our high tariffs were not an important factor in such partially satisfactory business conditions as we have had. Our unlimited raw materials and foodstuffs, mass production, and increased productivity of labor, automobile expansion, our vast gold and credit structure, the expenditure of billions annually in building, highway, and railway construction and improvement, and the installment sales of two and three-fourths billion dollars per annum, have been the chief factors. The major effect of tariffs is to transfer wealth from one class to another without affecting the Nation's total.

It is safe to say that our productive capacity to-day is 25 per cent in excess of our ability to consume. High tariffs can not save us from growing surpluses. Some of the serious results already are the doubling and trebling of distribution costs in frenzied efforts to dispose of increasing surpluses at home; much idle labor and vast aggregations of idle capital, billions of which have gone into stock brokers' loans, for gambling purposes, thereby seriously affecting the stability of both our money and trade structure; many loans abroad made more hastily than prudence and good investment policy would justify; feverish efforts by many industries, through devices and tacit arrangements to curtail production so as to maintain an equilibrium between production and consumption, thereby avoiding price dislocation; a growing annual surplus in an increasing number of industries such as agriculture, coal, the textiles, oil, and a long list of others. If American plants to-day were unloosed at full production capacity, they would flood all domestic markets within 90 days, and many artificial parts of our economic structure would topple and fall.

It is my individual view that these glaring facts and conditions soon will compel America to recognize that these ever-increasing surpluses are her key economic problems, and that our neglect to develop foreign markets for surpluses is the one outstanding cause of unemployment. Those who champion our system of superprotection do not pretend that tariffs will aid exports, for the patent reason that nations can not sell more if each tries to buy less; that high tariffs shut off our exports almost to the extent that they shut out imports; that such tariffs arouse hatred, controversy, retaliation, and drive trade in the opposite direction; that we can not extend foreign markets by raising domestic costs; and that every tariff rate is an injury to export trade.

Since the war, with values equalized, our imports of finished dutiable manufactures have been less than in 1914. Our average tariff rate on these is approximately 42 per cent, while it runs to 53 per cent on cotton manufactures, 61 per cent to 71 per cent on woolen manufactures and fabrics, respectively, and 68 per cent on silk wearing apparel. Imports comprise the very minimum of competitive articles, while they involve billions of noncompetitive raw materials and foodstuffs, we do not produce, or can not produce in sufficient quantities, semimanufactures, specialties, and certain costly fashions or designs purchased by the rich. If instead of teaching the people that the slightest imports are a matter of life and death we would teach them that there is room for a mutually profitable exchange of a large range of commodities that neither country can profitably produce, as just described, as well as still others only indirectly or remotely competitive, we would thereby derive $3 from enhanced and healthy sales of our surpluses to each $1 derived from ultra tariff protection. But people are taught to view only the gross tariff benefits and to overlook what are net tariff injuries in a majority of cases.

It was under American leadership that a network of tariffs has been built up in Europe since the war, with such results as diminished production, wasteful use of capital, uneconomic distribution of industries, serious trade controversies, and fatal handicaps to the restoration of international trade. America should now take the lead back toward lower tariffs and liberal trade policies. It would be absurd to call upon other countries to lower their tariffs while we proceed to raise ours, already far higher than theirs. There was never such potential trade opportunities in many countries open to a nation as are offered America to-day. There are more than a billion people in the Far East and in South America whom we could easily persuade to desire more and better things to eat, wear, and use, and who could soon be induced to develop a purchasing power of ten to fifteen billion dollars per annum. We have thus far scarcely scratched the surface. A similar course toward Cuba, Porto Rico, and the Philippine Islands by the United States, toward Africa by England, and Manchuria by Japan, are illustrations.

The conclusion is inescapable that this Nation, faced with large and growing surpluses, can advance its economic welfare to a far greater extent by developing these wonderful foreign-trade opportunities than by rejecting them for the sake of an air-tight tariff structure and the trifling increase of home trade resulting. To prove this we have but to look at the small increase of home trade and consumption compared with our great piling up surpluses since 1923. The latter course will send American agriculture and other surplus industries to their doom. Agriculture was given the so-called farmers' high tariff of May, 1921, with the assurance that it meant prosperity; they were later given the supplemental tariffs in the Fordney Act of September, 1922, with the renewed promise that they were the key to undoubted agricultural prosperity. Agriculture to-day is over $20,000,000,000 worse off than in 1920. Still more tariffs are again offered agriculture. Can the same farmers be thus fooled a third time in succession? Our agriculture already enjoys all the tariff benefits available to a material extent, save as to a few minor products. Three hundred and thirty-nine million of a total of 356,000,000 acres planted to crops in 1927, comprised staple crops that experience purely nominal or no tariff benefits, but only tariff penalties. These include corn, cotton, tobacco, wheat, hay, rye, oats, buckwheat, and barley. Here is where the farmer's capital is invested. I agree now to pay $500 to any charity, if any impartial group of unbiased economists to be selected should not find that the tariff injuries as a whole to the producers of these eight staple products are not three to five times greater than the tariff benefits. Almost the entire truck products, which are more clamorous for tariffs, are only raised on about 2,400,000 acres, or less than 4,500,000 acres, if we include peanuts and beet and cane sugar. To dose the farmer further on tariffs, save in a few minor instances, is but an attempt "to drug the patient while his strength slowly ebbs away." The farmer should follow economic rather than political leadership.

The United States along with Spain and Russia maintains the highest tariff and trade barriers in the world. Other nations have tariffs, deemed amply high, but they are low in comparison with ours. When Republicans assert that tariff protection has become the accepted policy in this country, they do not mean reasonable, or adequate, or moderate protection, but inordinate, air-tight, superprotection intended to exclude every item of imports remotely competitive, which invites retaliation, and which largely cuts us off from all markets for our surpluses. They dare not defend it upon grounds of revenue or equity or morals.

This is the first economic issue tendered to Democrats. We must first halt and drive back the movement to fasten this unsound and destructive policy of extremism upon the country, by a demand that the Nation face in the opposite direction of lower tariffs, more liberal trade policies, and systematic efforts to develop an increasing export trade. The latter should include free ports wherein raw materials could be brought from abroad, mixed with our own, and manufactured into finished products to be exported and sold.

Astonishing to say, our exports to-day are less than they would have been under the pre-war percentage of increase, although we have sold most of them on credit by loaning the money to pay for them. These loans with which to pay indebtedness due us from abroad can not continue. It is merely piling new upon old debts. The first objective then, of those who challenge the Republican tariff program, is to substitute the broader and more liberal tariff and trade policies as stated. The tariff readjustments to this end should be brought about in the most careful, gradual, and scientific manner. Under these policies our surpluses would be kept moving; labor and capital would be fully employed on thoroughly satisfactory terms; many raw materials we do not produce or can only produce in wholly inadequate quantities would be admitted free, thereby substantially reducing production costs; and soon our exports would aggregate ten to fifteen billion dollars instead of five billions at present.

Pending the accomplishment of this first objective, as I view it, there need be no occasion for quibbling or concern about the fixing of rates for minor tariff items where, due to changed conditions, imports are abnormal, the industry is efficient, and the rates are not on a parity with those of the general tariff structure. But when the first long step in this proposed tariff and trade policy of liberalization shall have been carried into effect, then under improved conditions will come the occasion to define and prescribe more exact formulas for rate purposes. When with lower production costs and wider and better foreign markets, tariff demands will be modified, the rate basis will be different and easier of determination. The modernized view that as a nation becomes economically independent it should throw off artificial restrictions upon production and trade, will be strong. Unreasoning fear of foreign competition and the present mania for tariff embargoes will have abated. The weight of enlightened opinion will incline more and more toward moderate tariffs, reasonably competitive, which would give play to an ever-increasing foreign trade, a healthier, greater, and better balanced home production and price level, with all standards of wages and of living maintained and gradually improved, a better distributed prosperity, and America for generations would lead the world in finance, industry, and commerce.

Our Government should have had installed since 1921 a great impartial and firm fact-finding tariff body—much freer from bias and factionalism than some of the commissions that have been attempting to function—to the end that Congress and the country might at each stage have been kept fully advised of all current industrial, trade, and economic facts material and pertinent for the purposes of tariff readjustments from time to time. With a responsive Congress, disposed to utilize and act upon conditions thus revealed, our economic situation to-day would have been far better.

This country could have utilized, as it could yet, the bargaining method, along with the unconditional favored-nation doctrine; but the former only as a present means of checking and gradually lowering many abnormally high tariff and trade barriers. Our country could also lend its moral influence, as it heretofore should, in the direction of gradual readjustment downward of excessive tariffs by all nations, and so participate either in concert, or separately and independently, in such downward movement.

The set of policies herein suggested offers the only alternative to that always practiced, though not always professed, by the Republican Party; which latter constitutes the most aggravated form of special privilege; which requires our economic structure, as far as may be, to rest upon subsidies made possible by legislation; and which, worst of all, involves a corrupt partnership between politics and vested industrial interests, the poison of which constantly breeds national scandal such as that in Pennsylvania. With this sinister and discredited policy there can be no compromise.

Moreover, the Democratic Party could not secure the favor of these forces of superprotection if it would. The Republican Party already is their willing and subservient agent, and they would be slow to incur the useless trouble and expense to debauch and prostitute another political party for the same purposes.

EXTENSION OF REMARKS

Mr. DICKINSON of Missouri. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an address on religious liberty, delivered by William Jennings Bryan, at the Democratic convention held in Madison Square Garden, New York, four years ago.

Mr. UNDERHILL. Mr. Speaker, that is going pretty far, and I object.

LEAVE OF ABSENCE

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent that leave of absence be granted to my colleague, Mr. HARE, of South Carolina, for five days, on account of serious illness in his family.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

ARMY APPROPRIATION BILL

Mr. BARBOUR, from the Committee on Appropriations, by direction of that committee, reported the bill (H. R. 15712) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1930, and for other purposes, which was referred to the Union Calendar and ordered printed.

Mr. COLLINS reserved all points of order.

REVISION OF THE UNIFORM GOVERNMENT CONTRACT BILL

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER. The gentleman from Michigan asks unanimous consent to proceed for three minutes. Is there objection?

There was no objection.

Mr. CRAMTON. Mr. Speaker and gentlemen, in the last session I introduced H. R. 5767, a bill to establish uniform requirements affecting Government contracts, and for other purposes; a bill which is of very general interest in the departments and to those who have business with the Government. Some hearings were held and then the bill, which was originally drafted in the Budget office by the interdepartmental board on contracts, went back to that board for further consideration. They have now agreed upon a new bill which I am introducing to-day, H. R. 15713. I should like to ask unanimous consent to extend and revise my remarks very briefly and, in addition, to insert with my remarks the bill showing the changes made in it. As I have introduced it to-day it is in form an entirely new bill and it would be a great convenience to those who are following this legislation to have printed in the RECORD the bill with the amendments and changes indicated in the customary style, and with that a brief memorandum from the Budget office explaining the changes and amendments, as well as a letter from the Director of the Budget. I present that as a unanimous-consent request.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. CRAMTON. Hearings were held before a subcommittee of the Judiciary Committee of the House, headed by Congressman CHRISTOPHERSON. In those hearings numerous suggestions were made with reference to the bill and those suggestions have had extended study by the interdepartmental board. The numerous changes in the bill of more or less importance are recommended by that board and are embodied in the bill which I am now introducing.

I anticipate that Judge CHRISTOPHERSON's subcommittee will proceed with hearings on this revised bill in the near future. I regard the bill as one of very great importance in bringing about uniformity in the practice of the Government in its various departments and establishments in the making of contracts. Through such uniformity the work of the General Accounting Office will be materially simplified and due protection of the interests of the Government will be made more easy.

The letter from the Director of the Budget is as follows:

BUREAU OF THE BUDGET,
Washington, December 29, 1928.

Hon. L. C. CRAMTON,
House of Representatives.

MY DEAR MR. CRAMTON: On December 27, 1928, you wrote me with reference to the general Government contract bill (H. R. 5767) which you introduced December 5, 1927. Since the termination of the first session of the Seventieth Congress the Interdepartmental Board of Contracts and Adjustments has been actively engaged in reviewing the original bill, and, following your suggestion, has had hearings with Government officials and others who suggested certain changes in the bill to the Committee on the Judiciary of the House of Representatives.

As a result of this review work, the board has recommended certain changes in the original draft, which changes are indicated on the inclosed copy of bill H. R. 5767, as it was thought that you would desire to know exactly what changes were recommended. A complete redraft of the bill containing all of the changes recommended by the board is also inclosed, together with an explanatory statement relating to these changes.

The draft herewith submitted embodies the amendments that were deemed advisable by the board and I am informed by the board that the present draft in all material respects has the approval of the

departments and independent establishments of the Government, including the municipal government of the District of Columbia, and excepting alone the General Accounting Office. With regard to the General Accounting Office I am informed that the provisions of sections 7 and 9 are not concurred in.

There is one section of this draft to which I believe I should make specific reference, namely, section 9, which deals with liquidated damages, and as now worded confers upon the head of the department concerned the authority to remit the whole or any part of such damages as in his opinion may be just and equitable. The board advised me that this section had the unanimous approval of the departments and establishments, with the exception of the General Accounting Office.

I again presented this matter to the President, who has authorized me to state that he approves the draft as now presented by the Interdepartmental Board of Contracts and Adjustments.

Sincerely yours,

H. M. LORD, *Director.*

The bill showing the amendments of H. R. 5767 therein is as follows, and showing amendments by contract board, December, 1928:

A bill (H. R. 5767) to establish uniform requirements affecting Government contracts, and for other purposes

[Omit the part in brackets and insert the part printed in italics]

Be it enacted, etc.—

SECTION 1. This act may be cited as the "The public contract act, [1928] *1929.*"

SEC. 2. Definitions: When used in this act, unless the text indicates otherwise;

(a) The terms "United States" and "Government" are synonymous and include the District of Columbia and all departments of the Government;

(b) The term "department" means any executive department, independent establishment, commission, board, or other Government agency having authority to make contracts involving the expenditure of public funds, *and shall include the District of Columbia;*

(c) The term "formal contract" means an agreement reduced to writing *in one instrument* and signed by all the contracting parties at the end thereof. The term "informal contract" means an agreement in any other form;

(d) The term "advertising" means inviting competitive bids by notice in printed publications or posted in public places, by circular letter or otherwise;

(e) The term "general provisions" means those parts of a contract that deal with the general rights and liabilities of the contracting parties as distinguished from the provisions peculiar to the particular contract;

(f) The term "personal services" means services rendered at a specified rate in person by the party or parties who contract to perform them;

(g) The term "contractor" means any person, partnership, company, or corporation party to a contract with the United States;

[(h) The term "emergency and exigency" are synonymous and mean situations requiring such immediate action as not to permit advertising for bids and the execution of contracts;]

[(i)] *(h)* The terms "purchase" and "procurement" are synonymous and mean the acquisition of services, materials, or supplies pursuant to contract.

SEC. 3. Authority: No contract shall be made or obligation assumed on behalf of the United States unless the same is under appropriation adequate to its fulfillment except—

(a) By any department charged by law with the procuring thereof for clothing, subsistence, forage, quarters, shelter, transportation, medical, surgical, or hospital supplies, or services, which, however, shall not exceed the necessities for the current fiscal year;

(b) For fuel for Government use in sufficient quantities to meet the requirements for one year without regard to the current fiscal year, when, in the opinion of the head of the department charged with the procuring thereof, it is in the interest of the United States so to do. Payments for fuel delivered may be made from funds appropriated to such department for that purpose for the current fiscal year or from funds appropriated or that may be appropriated therefor for the ensuing fiscal year;

(c) By the Post Office Department for such periods of time as may now be authorized by law;

(d) Leases of real estate *by departments for terms not exceeding three years,* by the State department for premises in foreign lands *for terms not exceeding 10 years, and* by the Post Office Department for [terms not exceeding 10 years, and by other departments for a term not exceeding three years] *such periods of time as may now be authorized by law: Provided,* That no contract shall be made for the leasing of any building or part of building in the District of Columbia unless the same shall have been authorized by law or until an appropriation therefor shall have been made in terms by Congress;

(e) For services or supplies in cases threatening immediate loss of human life or destruction of property;

(f) By the Indian Service as provided by section 4 of the act of August 15, 1894;

(g) By the Bureau of Fisheries for supplies for the natives of the Pribilof Islands in the manner and subject to the limitations provided in paragraph (b) of this section;

(h) When otherwise authorized by law.

SEC. 4. Purchase of land: No land shall be purchased on account of the United States except under a law authorizing such purchase.

SEC. 5. Advertising: *(1)* All contracts exceeding $500 in amount for work, materials, supplies, or services, other than personal, shall be made after advertising for bids a sufficient time previously and not less than 10 days before the day set for the opening thereof; except—

(a) During the period of a national emergency when so declared by the President;

(b) When the public exigency will not admit of the delay incident to advertising;

(c) For medicines and medical supplies, hospital and surgical supplies, and prosthetic appliances when authorized in writing by the head of a department or by the head of the medical service of the department concerned;

(d) For articles for the military or naval or Coast Guard service, when the Secretary, Acting Secretary, or Assistant Secretary of the War, Navy, or Treasury Departments, respectively, personally certify that the character or ingredients thereof are of such a nature that the public interests require that they be kept secret;

(e) In purchasing fuel for the Navy or for naval stations and yards, the Secretary of the Navy shall have power to discriminate and purchase, in such manner as he may deem proper, that kind of fuel that is best adapted to the purpose for which it is to be used;

(f) For scientific and technical apparatus and instruments of precision for specialized laboratory or research work;

(g) For supplies purchased and to be used without the limits of the United States or its possessions;

(h) For products of Indian industry purchased from Indians under Government superintendence for Indians under Government supervision;

(i) For proprietary or other articles or services for which it is impracticable to secure competition;

(j) Supplies purchased for authorized resale;

[(k) For experimentation, development, and manufacture of special military or naval material for test to determine the suitability thereof for actual service.]

(k) For experimental or development work for the military or naval services, or for manufacture or purchase of military or naval matériel for experimentation or test to determine the suitability thereof for actual service;

(l) When otherwise authorized by law.

(2) *The advertisement or specifications shall clearly describe the needs of the Government in such terms as to permit full and free competition on such needs.*

SEC. 6. Publication: No advertisement for bids shall be published in any printed publication except upon written authority or regulation of the head of the department *concerned.* The compensation for such advertising shall in no case exceed the commercial rates charged to private individuals, with the usual discounts, such rates to be ascertained from sworn statements to be furnished by the proprietors or publishers of such publications.

[SEC. 7. Opening bids: When bids are submitted in answer to advertisements, they shall be publicly opened at the time and place stated in the advertisement. Bidders shall be permitted to be present at the opening either in person or by representative. An abstract of all bids received shall then and there be made. Award shall be made with reasonable promptness and by written notice to that responsible bidder whose bid, conforming to the specifications, will be most advantageous to the Government, price and other factors considered. In case of doubt as to which bid is most advantageous to the Government, the decision of the head of the department shall be final: *Provided, however,* That any and all bids may be rejected when it is in the public interest so to do.]

Sec. 7. Award of contracts: All bids shall be publicly opened at the time and place stated in the advertisement. Award shall be made with reasonable promptness by written notice to that responsible bidder whose bid, conforming to the specifications, will be most advantageous to the Government, price and other factors considered: Provided, That acceptance of any other than the lowest bid conforming to the specifications, or the rejection of any bid on the ground of the bidder's irresponsibility, shall be by the head of the department concerned, whose decision shall be final, and in each such case he shall file with the original contract a statement of his reasons therefor, an abstract of all bids received, and a copy of the advertisement: Provided further, That all bids may be rejected when it is in the public interest so to do.

SEC. 8. Forms of contract: Contracts for the construction or repair of public works or the procurement of materials, supplies, or services other than personal shall be formal, except—

(a) When the amount of the award is $2,000 or less;

(b) When the amount is $5,000 or less and performance or delivery is to be completed within 90 days;

(c) When the public exigencies require immediate performance or delivery; or

(d) When the supplies are to be purchased and used without the limits of the United States or its possessions;

(e) For the repair or overhaul of vessels.

In cases (a), (b), (c), (d), and (e) the work, materials, supplies, or services may be procured by informal contract.

[SEC. 9. Liquidated damages: Whenever, in contracts to which the United States is a party, there is a provision for liquidated damages for delay, the Comptroller General of the United States, on the written recommendation of the head of the department concerned, may remit the whole or any part of such damages that have accrued as, in his opinion, may be just and equitable.]

Sec. 9. Liquidated damages: Whenever, in contracts to which the United States is a party, there is a provision for liquidated damages for delay, the head of the department concerned, stating his reasons in writing therefor, may remit the whole or any part of such damages as in his opinion may be just and equitable.

SEC. 10. Filing of contracts: [An] *The* original of each formal contract shall be forwarded to the General Accounting Office as soon as practicable. [An] *The* original of each informal contract shall be forwarded to the General Accounting Office with the voucher covering the first payment thereon. All contracts so forwarded shall be accompanied by the performance bond, if any.

SEC. 11. Copies of contracts: A certified copy of any contract and related papers filed therewith, in whole or in part, shall be furnished by the General Accounting Office to any person applying therefor, and paying in advance its estimated cost, but this shall not apply to any contract which the head of the department concerned has certified contains confidential or other matters which, in the public interest, shall not be disclosed.

SEC. 12. Payments: No payment shall be made under contract in excess of the value of the work performed, the services rendered, or the articles accepted, except that communication services, *subscriptions for printed publications, and* rent, *heat, and light* in foreign countries, [and subscriptions for printed publications] may be paid for in advance.

SEC. 13. Security: (a) Every formal contract with the United States for the construction or repair of public work shall be accompanied by a performance bond, with good and sufficient sureties, including the additional obligation that the contractor shall promptly make payments to all persons supplying labor or materials for such [contract] *work*. If no suit be brought on the bond by the United States prior to [within three] *six* months from and after final settlement under the contract, *by the General Accounting Office*, any other claimant under such obligation may bring suit in the name of the United States, for his use and benefit, in the [district] *appropriate* court of the United States for the district in which the contract was to be performed, irrespective of the amount in controversy, and not elsewhere, within [one year] *18 months* after such settlement. *Any claimant under such bond shall, upon application therefor and furnishing an affidavit to the General Accounting Office that he has supplied labor or materials for such work and payment has not been made therefor, be furnished, without cost, with a certified copy of said contract and bond, upon which he may bring said suit, and he shall also be furnished by the said office with a statement of the date that final settlement has been made under the contract, which statement of the date of settlement shall be conclusive upon the parties.* Only one suit on such bond may be brought, whether by the United States or other claimant, and any other claimant under the bond, including the United States, may intervene in the suit and be made a party thereto not later than [one month] *90 calendar days* after the date of the last publication of notice hereinafter provided for. Notice of the pendency of the suit, with information as to the right to intervene, shall be given personally or by mail, as the court may order, to all known creditors, and published in some newspaper of general circulation, published in the State, [or] county, or city in which the contract was to be performed, once in each of three successive weeks. If the full amount of the liability of the sureties on said bond is insufficient to pay all amounts awarded in such suit, the amount remaining after paying in full any amount awarded the United States shall be prorated among the judgment creditors. In any such suit the sureties on the bond may pay into court for distribution among all claimants the full amount of their liability under the bond, less any amount which they may have had to pay to the United States thereunder, and upon so doing they will be relieved from further liability;

(b) Performance bonds or other security may be required in cases other than those specified in paragraph (a) of this section;

(c) Any corporation having qualified, as required by law, to act as surety on bonds in which the United States is obligee, may be accepted as sole surety on any bond required or authorized under this act;

(d) Whenever any bond, guaranty, or undertaking, with surety or sureties, is required by this act, United States bonds or notes may be furnished as security [, as provided by law].

SEC. 14. Hours of labor: Every contract on behalf of the Government, which may require or involve the employment of laborers or mechanics, shall contain a provision that no laborer or mechanic doing any part of the work contemplated by the contract in the employ of the contractor or any subcontractor contracting for any part of said work contemplated, shall be required or permitted to work more than eight hours in any one calendar day upon such work, and every such contract shall stipulate a penalty for each violation of such provision in such contract of $5 for each laborer or mechanic for every calendar day in which he shall be required or permitted to labor more than eight hours upon said work; and any officer or person designated as inspector of the work to be performed under such contract, or to aid in enforcing the fulfillment thereof, shall, upon observation or investigation, forthwith report to the proper officer of the Government all violations of the provisions of this section and the amount of the penalties imposed according to such stipulation shall be withheld, for the use and benefit of the Government, by the officer or person whose duty it shall be to approve the payment of the moneys due under such contract, whether violations of the provisions of such contract [is] *are* by the contractor or any subcontractor. Any contractor or subcontractor aggrieved by the withholding of any penalty as hereinbefore provided shall have the right, within six months thereafter, to appeal to the head of the department making the contract on behalf of the United States, who shall have power to review the action imposing the penalty, and in all such appeals from such final order whereby a contractor or subcontractor may be aggrieved by the imposition of the penalty hereinbefore provided such contractor or subcontractor may, within six months after decision by such head of a department, file a claim in the Court of Claims, which shall have jurisdiction to hear and decide the matter in like manner as in other cases before said court: *Provided*, That nothing in this section shall apply to or be construed to apply to—

(a) Persons employed in connection with dredging or rock excavation in any river or harbor or navigable water of the United States while not directly operating dredging or rock excavation machinery or tools;

(b) Persons engaged in construction or repair of levees or revetments necessary for protection against floods or overflows on the navigable rivers of the United States;

(c) Persons employed in connection with subaqueous construction in any tidal waters;

(d) Contracts for transportation by air, land, or water, for public utility services, for the transmission of intelligence, or for the purchase, *renovation, or repair* of materials or supplies such as are ordinarily procurable in the open market, except armor and armor plate, whether made to conform to particular specifications or not;

(e) Contracts for farm or reforestation seasonal work;

(f) Contracts to be performed in foreign countries;

(g) Contracts for public works at places without labor supply and so remote or difficult of access that the workmen employed on the contract must live away from their homes;

(h) Violations due to any extraordinary events or conditions of manufacture, or to any emergency caused by fire, famine, flood, or danger to life or property; or by other extraordinary event or condition on account of which the President shall subsequently declare the violation to have been excusable: *Provided further*, That in the case of national emergency the President is authorized to suspend the provisions of this section, in which case the wages of persons employed upon any contract with the United States shall be computed upon a basic daily rate of eight hours' work, with overtime rates to be paid for at no less than time and one-half for all hours' work in excess of eight hours: *And provided further*, That nothing in this section shall be construed to repeal or modify the act entitled "An act relating to the limitation of the hours of daily service of laborers and mechanics employed upon the public works of the United States and of the District of Columbia," approved August 1, 1892, as modified by the act of March 3, 1913.

SEC. 15. Transfer: No contract with the United States nor any interest therein shall be transferred by the contractor to any other person. In case of such transfer the United States may void the contract and recover from the contractor damages for the breach thereof.

[SEC. 16. Domestic material and services: In the making of contracts preference shall be given to articles of domestic production or manufacture, quality, and prices, including in the price of foreign articles the duty prescribed by the tariff act for importation into the United States, being equal. In the transportation by sea of Government personnel, materials, or supplies vessels documented under the laws of the United States or belonging to the United States shall be used, unless the head of the department concerned shall find that the rates charged by said vessels are excessive and unreasonable.]

Sec. 16. Domestic materials: In the making of contracts to be performed in the United States, its Territories and possessions, preference shall be given to articles or materials of domestic production, conditions of quality and price, including duty, being equal. The term "articles or materials of domestic production" means articles or materials manufactured or assembled in the United States, its Territories or possessions.

SEC. 17. The President is authorized to prescribe and standardize, so far as practicable, the forms, general provisions, and security to be required for all Government contracts.

SEC. 18. Settlement and suits: No suit shall be entertained by any court against the United States on any claim arising under or out of any contract with the United States, unless the claim shall have been presented [at least 90 days prior thereto] to the General Accounting Office for audit and settlement [and unless the suit shall have been instituted within three years from the date the cause of action accrued: *Provided*, That all claims which shall have accrued at the time this act goes into effect shall be governed by the provisions of section 156 of the act of March 3, 1911 (36 Stat. L. 1139).] *and shall have either been settled or remain unsettled for a period of 90 days.*

SEC. 19. Repeal provision: (a) The following sections of the Revised Statutes are hereby repealed: 230, 512, 513, 514, 515, 1136, as amended by the act of June 25, 1910 (36 Stat. L. 721), and the act of May 12, 1917 (40 Stat. L. 58); 3709, 3710, 3711, as amended by the act of March 15, 1898, section 6 (30 Stat. L. 316); 3712; [(twentieth footnote);] 3713, 3715, 3716, 3717, 3718, as amended by act of June 30, 1890 (26 Stat. L. 197), and by the act of July 19, 1892 (27 Stat. L. 243), and by the act of March 3, 1893 (27 Stat. L. 724); 3719, as amended by the act of May 25, 1896 (29 Stat. L. 136); 3720, as amended by the act of June 22, 1910 (36 Stat. L. 591); 3721, 3722, 3723, 3724, 3725, 3727, 3728, 3729, 3730, 3731, 3732, 3733, 3735, 3736, 3737, 3741, as amended by act of February 27, 1877 (19 Stat. L. 249); [3743, as amended by the act of July 31, 1894, section 18 (28 Stat. L. 210);] 3744, as amended by act of June 15, 1917 (40 Stat. L. 198); 3745, 3746, 3747, 3828.

(b) The following acts and parts of acts are hereby repealed: Act of April 10, 1878 (20 Stat. L. 36), as amended by act of March 3, 1883 (22 Stat. L. 487); Joint Resolution No. 30, of June 14, 1878 (20 Stat. L. 253); act of January 21, 1881 (21 Stat. L. 317); Joint Resolution No. 24, of May 5, 1894 (28 Stat. L. 582); act of July 16, 1894, section 2 (28 Stat. L. 106); act of August 13, 1894 (28 Stat. L. 278), as amended by act of February 24, 1905 (33 Stat. L. 811), act of June 6, 1902, section 21 (32 Stat. L. 326), act of April 28, 1904 (33 Stat. L. 518), act of December 11, 1906 (34 Stat. L. 841), act of May 30, 1908, section 34 (35 Stat. L. 545), act of June 17, 1910, section 8 (36 Stat. L. 538), act of June 25, 1910, section 5 (36 Stat. L. 676), act of June 25, 1910, section 23 (36 Stat. L. 861), act of August 22, 1911 (37 Stat. L. 32), act of June 19, 1912 (37 Stat. L. 137), act of March 4, 1915, section 5 (38 Stat. L. 1049); *section 3 of the act approved August 15, 1876 (19 Stat. L. 199–200), as amended by the act of June 21, 1906 (34 Stat. L. 328); section 9 of the act approved March 3, 1875 (18 Stat. L. 450), as amended by section 1 of the act approved May 18, 1916 (39 Stat. L. 129); so much of the act of June 26, 1912 (37 Stat. L. 168), and of the act of September 1, 1916 (39 Stat. L. 668), as requires penal bonds with formal written contracts for the purchase of supplies and materials for the District of Columbia.*

(c) All other acts or parts of acts inconsistent with the provisions of this act are hereby repealed to the extent of such inconsistency: *Provided*, That nothing in this act shall be construed as repealing or modifying—

(1) Statutes relating to the collection, carrying, or distribution of the mails; or

(2) Statutes relating to the purchase, under the direction of the Joint Committee on Printing, of supplies and material for public printing and binding and for paper and envelopes; or

(3) The act of June 17, 1910, creating the General Supply Committee; or

(4) The act of July 2, 1926, entitled "An act to provide more effectively for the national defense by increasing the efficiency of the Air Corps of the Army of the United States, and for other purposes" (44 Stat. L. 780); or

(5) *The act of May 7, 1926, entitled "An act for the acquisition of buildings and grounds in foreign countries for the use of the Government of the United States of America" (44 Stat. L. 403).*

Provided further, That nothing in this act shall be construed to apply to contracts of the United States Shipping Board, or the United States Shipping Board [Emergency] *Merchant* Fleet Corporation, relating to the operation of vessels, nor to contracts of the Inland Waterways Corporation.

[SEC. 23. This act shall take effect July 1, 1928.]

SEC. 20. This act shall take effect July 1, 1929, but any contract entered into or any rights or remedies that have accrued prior to that date shall be settled, adjusted, determined, and enforced without regard to this act.

EXPLANATORY STATEMENT

DECEMBER 17, 1928.

Subject: Amendments to H. R. 5767, a bill to establish uniform requirements affecting Government contracts, and for other purposes.

At the hearing before the Committee on the Judiciary of the House of Representatives in March, 1928, upon H. R. 5767, several amendments to this bill were recommended.

The interdepartmental board of contracts and adjustments has given careful consideration to these proposed amendments and certain other suggested amendments and has drafted the attached proposed bill, which includes the amendments to H. R. 5767, approved by the board.

These amendments to H. R. 5767 and the reasons therefor are as follows:

Section 1 has been amended by changing the year "1928" to "1929."

In section 2, at the end of paragraph (b), the following words have been added: "and shall include the District of Columbia." The Commissioners of the District of Columbia recommended that this paragraph (b) be clarified to specifically include the District of Columbia, which is not an agency of the Federal Government.

In section 2, paragraph (c), the words "in one instrument" have been added in line 6, page 2. This amendment was deemed advisable in view of the decision of the Supreme Court in the case of the United States *v.* Swift & Co. (270 U. S. 124).

In section 2 paragraph (h) was omitted as unnecessary.

In section 3 paragraph (d) was amended by changing the language preceding the proviso so as to read as follows:

"(d) Leases of real estate by departments for terms not exceeding 3 years, by the State Department for premises in foreign lands for terms not exceeding 10 years, and by the Post Office Department for such periods of time as may now be authorized by law: *Provided*, That no contract shall be made for the leasing of any building or part of building in the District of Columbia unless the same shall have been authorized by law or until an appropriation therefor shall have been made in terms by Congress."

This amendment meets the objection of the Post Office Department, as set forth in letter to the chairman of the Judiciary Committee dated February 28, 1928 (p. 108), of part 2 of the printed hearing, in so far as the restriction of leases to 10 years by that department is concerned. The proviso of paragraph (d) continues existing law which it was believed applies to the Post Office Department and therefore the other recommendation by the Post Office Department that this proviso be amended so as to except the leasing of buildings for postal purposes was not approved. This amendment also limits the State Department to 10 years for leasing premises in foreign lands, which is the limitation now contained in current appropriation acts for this department.

Section 5 was amended by changing paragraph (k) to read as follows:

"(k) For experimental or development work for the military or naval services, or for manufacture or purchase of military or naval matériel for experimentation or test to determine the suitability thereof for actual service."

This amendment was adopted to clarify the language.

In section 5 an additional paragraph (2) was added at the end of the section, reading as follows:

"(2) The advertisement or specifications shall clearly describe the needs of the Government in such terms as to permit full and free competition on such needs."

This foregoing amendment was adopted in connection with the revision of section 7, as hereinafter set forth, to meet objections of the Comptroller General as set forth in his letter of February 4, 1928, to the Judiciary Committee (pp. 97 and 98 of the hearing).

In section 6 the word "concerned" has been inserted after the word "department" in line 9 for the purpose of clarity.

Section 7 has been redrafted to read as follows:

"SEC. 7. Award of contracts: All bids shall be publicly opened at the time and place stated in the advertisement. Award shall be made with reasonable promptness by written notice to that responsible bidder whose bid, conforming to the specifications, will be most advantageous to the Government, price and other factors considered: *Provided*, That acceptance of any other than the lowest bid conforming to the specifications, or the rejection of any bid on the ground of the bidder's irresponsibility, shall be by the head of the department concerned, whose decision shall be final; and in each such case he shall file with the original contract a statement of his reasons therefor, an abstract of all bids received, and a copy of the advertisement: *Provided further*, That all bids may be rejected when it is in the public interest so to do."

This amendment of section 7 requires the head of the department, in case he accepts other than the lowest or rejects any bid on the ground of the bidder's irresponsibility, to file with the original contract a statement of his reasons therefor, an abstract of all bids, and a copy of the advertisement. It is believed that this amendment meets the objection of the Comptroller General to the original draft of section 7 (p. 98 of the hearing), which left the decision "to the interested administrative head without disclosing in connection with the expenditure of public funds any justifying fact or reason."

Section 9 was amended to read as follows:

"SEC. 9. Liquidated damages: Whenever, in contracts to which the United States is a party, there is a provision for liquidated damages for delay, the head of the department concerned, stating his reasons in writing therefor, may remit the whole or any part of such damages as in his opinion may be just and equitable."

The foregoing amendment was the language of section 9 as originally drafted by the board which has reaffirmed its views that the authority to remit liquidated damages for delay should be vested in the head of

the department concerned as set forth by Mr. Wetmore on pages 9 to 28 of the hearing.

Section 10 was amended by changing the word "an," in line 1 and also in line 3, to the word "the." This amendment meets in part the objection of the Comptroller General as set forth on page 96 of the hearing.

Section 12 was amended by adding "heat and light" in addition to "rent" that may be paid for in advance in foreign countries as recommended by the State Department. (P. 99 of hearing.)

Section 13 has been amended by giving the United States six months instead of three months after final settlement in which to bring suit and by giving other claimants 18 months after such settlement instead of 1 year in which to bring suit.

This section was also amended by providing that the final settlement means settlement by the General Accounting Office, where all contracts under existing law are now finally settled, rather than a settlement by the department as now construed by the courts. (See p. 15 of hearing.) The section has also been amended by allowing 90 calendar days instead of 1 month after the date of the last publication in which the United States or other claimant may intervene in the suit. The word "contract," in line 1, page 9, was changed to the word "work" and the word "district," in line 6, page 9, was changed to the word "appropriate."

There was also added, after the word "settlement," in line 9, page 9, the following language:

"Any claimant under such bond shall, upon application therefor and furnishing an affidavit to the General Accounting Office that he has supplied labor or materials for such work and payment has not been made therefor, be furnished, without cost, with a certified copy of said contract and bond, upon which he may bring said suit, and he shall also be furnished by the said office with a statement of the date that final settlement has been made under the contract, which statement of the date of settlement shall be conclusive upon the parties."

The foregoing additional language was decided upon after conference by the contract board with Mr. A. Preston Shealey, who testified before the Judiciary Committee and recommended amendments to this section. (See pp. 28–32 of hearing.)

In paragraph (d), section 13, the words "as provided by law" at the end of this paragraph were omitted.

In section 14, line 13, page 11, the word "is" was changed to "are" for grammatical reasons.

In paragraph (d) of section 14 the words "renovation or repair" were inserted after the word "purchase" in line 14, page 12.

Section 16 was amended to read as follows:

"SEC. 16. Domestic materials: In the making of contracts to be performed in the United States, its Territories, and possessions preference shall be given to articles or materials of domestic production, conditions of quality and price, including duty, being equal. The term 'articles or materials of domestic production' means articles or materials manufactured or assembled in the United States, its Territories, or possessions."

The foregoing language was recommended by the State Department. The last sentence of section 16 relating to transportation on United States vessels was omitted because of section 601 of the merchant marine act of May 22, 1928 (45 Stat. 697), requiring officers or employees of the United States to travel on ships registered under the laws of the United States when such ships are available.

Section 18 has been amended by omitting the provision that would reduce the statute of limitations from six to three years on contracts. It was not deemed advisable to amend the Judicial Code in this bill in respect to the statute of limitations relating to contracts leaving the statute of limitation six years as to other claims. The other amendment to this section 18 was for the purpose of permitting a claimant to bring suit if the General Accounting Office has not settled his claim within 90 days.

In section 19 the words "twentieth footnote" are omitted in line 4, page 15, and the specific repeal of 3743 of the Revised Statutes as amended (lines 16 and 17, p. 15) has been omitted from the specific repeal provision as recommended by the Comptroller General. (P. 97 of hearing.)

There has been added for specific repeal at the end of paragraph (b), section 19, the acts relating to the Indian Service as recommended by the Secretary of the Interior. (P. 100 of hearing.)

There has also been added for specific repeal under paragraph (b), section 19, so much of the act of June 26, 1912, and of the act of September 1, 1916, as requires penal bonds with formal written contracts for the purchase of supplies and materials for the District of Columbia. This repeal is concurred in by the Commissioners of the District of Columbia.

A new paragraph 5 has been added under paragraph (d) of section 19, exempting the act of May 7, 1926, from repeal as recommended by the State Department. (P. 99 of hearing.)

The words "United States Shipping Board Emergency Fleet Corporation" have been corrected to read "United States Shipping Board Merchant Fleet Corporation," in line 16, page 17.

Section 23 of the bill has been changed to section 20, to read as follows:

"SEC. 20. This act shall take effect July 1, 1929, but any contract entered into or any rights or remedies that have accrued prior to that date shall be settled, adjusted, determined, and enforced without regard to this act."

MEMORIAL SERVICES

Mr. SNELL. Mr. Speaker, I present a privileged resolution from the Committee on Rules.

The SPEAKER. The gentleman from New York presents a resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 272

Resolved, That Rule X of the Rules of the House of Representatives be amended by inserting a new paragraph following paragraph 40, which shall be known as 40a and shall read as follows:

"40a. On memorials, to consist of three members."

That Rule XI be amended by inserting a new paragraph following paragraph 40, that shall be numbered 40a and shall read as follows:

"40a. It shall be the duty of the Committee on Memorials to arrange a suitable program for each memorial day observed by the House of Representatives as a memorial day in memory of Members of the Senate and House of Representatives who have died during the preceding year, and to arrange for the publication of the proceedings thereof."

Mr. SNELL. Mr. Speaker, if this resolution is adopted a new standing committee of the House will be created, known as the Committee on Memorials, to consist of three members. For a long time it has been the feeling among the Members that our usual memorial day program was falling short of what was intended and that it lacked a great deal of the dignity of a proper memorial day in the House of Representatives. If, perchance, some of the relatives of deceased Members should happen to come here on that day, it is always a great disappointment to see so very few Members present and apparently going through a perfunctory performance. This resolution provides for the creation of a committee that will formulate some kind of a program, and is very general in every way. Such a committee may suggest that we have a memorial day during the week in place of a regular session of the House, and at that time have some Member deliver a eulogy in memory of deceased Members. In addition to that, if any Member from the specific State desires to make some remarks with reference to a deceased Member, of course he would be allowed to do so.

There is no definite program formed at the present time, but it is expected that this committee will do something along this line and will arrange for a program that is much more satisfactory than the manner in which these memorial services have been observed during the past.

Some one has asked me how this committee would report. I have not given that question very careful consideration, but it would seem to me that the chairman of the committee could rise and present a resolution, the same as a Member does from any State that has a deceased Member, and ask unanimous consent for its immediate consideration, and that resolution probably would simply set aside some specific day to be observed with a memorial program.

Mr. GARRETT of Tennessee. Will the gentleman yield for a question?

Mr. SNELL. I will be pleased to yield to the gentleman.

Mr. GARRETT of Tennessee. As the gentleman will remember, I was not present at the meeting of the Committee on Rules at which this resolution was considered, so I want to ask one or two questions for information. I note that the last paragraph provides that—

a. It shall be the duty of the Committee on Memorials to arrange a suitable program for each memorial day observed by the House of Representatives as a memorial day in memory of Members of the Senate and House of Representatives who have died during the preceding year, and to arrange for the publication of the proceedings thereof.

I am not quite sure that I understand. For instance, if this committee were in existence now, it would be its duty to arrange a memorial day for——

Mr. SNELL (interposing). For all of the Members of the House and Senate who have died during the last recess and up to the present time.

Mr. GARRETT of Tennessee. Is the language sufficiently clear also to carry out this idea? Suppose there is a death after the regular memorial day and during the session.

Mr. SNELL. During our discussion the idea was to have simply one day and have that at the very latter part of each session, and only have one each session. If some Member should happen to die after that, I think under this program the matter would go over until the next session.

Mr. GARRETT of Tennessee. For instance, if a Member should die during the closing days of a session such as this, whatever memorial exercises were held by the Congress would have to be held at this session because the Congress dies on the 4th of March.

Mr. SNELL. That is true.

Mr. GARRETT of Tennessee. It could not go over until the next Congress?

Mr. SNELL. That is right. An occasion might arise once in a while where this would not cover the situation, but my own idea would be to set aside a day somewhere between the 25th and the 28th of February, or somewhere in that vicinity, as a memorial day for this session. There might be some contingencies that may arise where this would not cover the matter, but I know of nothing that absolutely prohibits the memorial exercises being held in a following Congress.

Mr. GARRETT of Tennessee. I suppose, of course, in its practical working, it will have to be tried out.

Mr. SNELL. Yes; and we may have to change it after some experience; we simply want to improve the present situation and hope to make it better.

Mr. GARRETT of Tennessee. I would like to ask one further question. I notice the resolution provides that this committee shall consist of three members. This thought occurs to me—and if it has been gone over in committee I do not want to interfere with the plans of the committee—but just as a matter of first impression with me, it seems that the committee ought to consist of at least five members, because it is a standing committee of the House——

Mr. SNELL. Yes; it is to be a standing committee.

Mr. GARRETT of Tennessee. If one of the three members should be ill, there would be no one to take his place. It would not be like a special committee. You might be able to appoint some one to take his place or something of that sort. However, I do not know that it is of any very great importance.

Mr. SNELL. There is practically nothing controversial coming before this committee. Its duty is simply to sit down and work out some kind of program, and if there are only two present they could probably take care of all the business that would come to the committee. It was not the intention that this committee should have any room or cause any expense whatever, but simply that some one be recognized or appointed by the House to take charge of these memorial exercises.

Mr. GARRETT of Tennessee. I suppose we might as well try it out with the three Members.

Mr. SNELL. And then if we find out we need to make some changes along any line, we can amend the resolution.

Mr. MOORE of Virginia. Will the gentleman yield for a question?

Mr. SNELL. Certainly.

Mr. MOORE of Virginia. How does the gentleman interpret the language in the proposed resolution "during the preceding year"? Would not that mean by common construction "during the preceding calendar year"? That I suppose, however, is not the intention.

Mr. SNELL. The idea of the committee and the construction that we placed on that was that each session of Congress would hold memorial exercises in memory of the Members who had died since the last session.

Mr. MOORE of Virginia. Who had died theretofore.

Mr. SNELL. Yes; and hold it during the latter part of the session.

Mr. MOORE of Virginia. The word "theretofore" would express exactly what the gentleman means, whereas the language "during the preceding year" might fairly be construed as referring to the preceding calendar year.

Mr. SNELL. Well, there are a lot of things that if you try to construe too strictly will get you into trouble. I think we have got to let this matter work itself out, and if we find that it is wrong in any way we can change it.

Mr. CRAMTON. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. CRAMTON. Possibly this might tie in with what the gentleman from Virginia has suggested. The term "previous year" may be a little hard and fast as we come to have experience under this plan. It seems to me probably we might give a little more leeway to the committee——

Mr. SNELL. That is exactly what we had in mind, to give a great deal of leeway to the committee.

Mr. CRAMTON. I was going to suggest this: It may be that experience will show it is undesirable to take a day at the close of the session or it may be desired to have each session covered by itself or each Congress or each year, and I was going to suggest that instead of saying "the previous year," as I understand the rule does——

Mr. SNELL. "During the preceding year" is the exact wording.

Mr. CRAMTON (continuing). That you say "during the preceding period," and then let "period" be construed according to our experience. We may find that the period will be a year or it may be a session or it may be a Congress.

Mr. MOORE of Virginia. I think the gentleman is right about that; that would be equivalent to saying "theretofore." I think that would express the purpose of the resolution.

Mr. CRAMTON. Change the one word "year" to "period."

Mr. HUDDLESTON. Will the gentleman yield?

Mr. SNELL. I yield to the gentleman.

Mr. HUDDLESTON. The gentleman is proposing to put the resolution on its passage?

Mr. SNELL. Yes.

Mr. HUDDLESTON. Is it contemplated that there should be any debate on it?

Mr. SNELL. If the gentleman wants time I will gladly yield him time.

Mr. HUDDLESTON. There has been no arrangement in regard to it?

Mr. SNELL. No; I did not know that there would be any opposition to it.

Mr. HUDDLESTON. This has been brought to the House without any previous notice, and I would like to have five minutes.

Mr. SNELL. I shall be glad to yield to the gentleman.

Mr. CRAMTON. What would be the effect of this on existing orders?

Mr. SNELL. I do not think it would affect an existing order. I know that this is indefinite and the whole proposition is indefinite, but after a while we can see how it works and if it is necessary to change it we can do so. As to changing the preceding "year" to preceding "period" I have no objection if it is thought best to do so.

Mr. FRENCH. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. FRENCH. May I have about five minutes?

Mr. SNELL. Mr. Speaker, I yield five minutes to the gentleman from Idaho.

Mr. FRENCH. Mr. Speaker, for some years I have been very much interested in the subject matter proposed in the pending resolution. I believe that to most Members of the Congress, the present plan of holding memorial services in memory of deceased Members of the Senate and House of Representatives is a source of genuine humiliation.

The Senate and House combined have a total memberhip of 531, not including the Delegates and Commissioners from the Territories. From among so large a number of people it is but natural that during every year there would be quite a number of deaths.

Turning back to just a few Congresses, I find the records of deaths as follows:

Sixty-seventh: 4 Senators, 19 Representatives.

Sixty-eighth: 7 Senators, 17 Representatives.

Sixty-ninth: 7 Senators, 9 Representatives.

It usually happens under our present procedure that during each of the last several Sundays of each session, memorial services are held in this House Chamber for each individual Member who has departed, these services being held as you know, not as one service but as distinct services, one after the other, having nothing in common, excepting the calling of the House to order, the prayer by the Chaplain, and the motion to adjourn. With so many services being held, naturally the attendance must be light, and the attendance is usually less than 20 Members and sometimes I have seen the membership shrink to 5 or 6.

I recall that upon one Sunday, eight separate memorial services were held, the first one commencing at 12 o'clock, and the last one concluding at between 7 and 8 o'clock at night.

The proposed plan, as I understand it, would call for one memorial service annually, that naturally would be held toward the close of the session. I could hope that it would be held during a week day and not upon Sunday. The plan, as I understand it, would contemplate a reverential, respectful memorial service. There would be music, there would be prayer by the Chaplain, there would be the reading of the names of the deceased, there would possibly be two fairly short addresses, more music, and adjournment. Around the rostrum it would be appropriate to have flowers. The whole program, it would seem, could be concluded in from one hour to an hour and fifteen minutes. Admission to the galleries could be by card, and invitations to the friends and relatives of the deceased Members should be issued by the House.

The present plan is no longer suited to our condition. It is the outgrowth of the normal and natural plan that was reasonable at the beginning of the history of our Congress.

During the first Congress there was but one death of a Member of the House. No death occurred on the Senate side. During the first 40 or 50 years of our congressional history burials occurred for the most part at the Capital City; funerals were held in the House Chamber. The memorial service and the funeral service were one.

Then, with the building of railroads, the bodies of the deceased Members came to be taken to their homes for burial. This procedure suggested the incongruity of two funeral services, and shortly thereafter the Congress abandoned the practice of pronouncing eulogies at the time of the death of a Member and adopted the policy of holding memorial services weeks or months later at some suitable time.

Prior to 1884 it was the custom of Members of the House, when a Member died, to wear crêpe upon their arms for a period of 30 days out of respect to the deceased. If that practice were followed to-day, and the deaths of Members of the Senate and House were to occur at regular intervals, there might be Congresses, as there have been in the past, during all of which time the Members, by the wearing of crêpe, would constantly proclaim their sorrow because of the loss of a colleague.

With the changing conditions that have come about since the early days of the Republic and the comparatively small size of the congressional bodies in contrast with the large membership of to-day, I believe we have come to the time when we ought to adopt a memorial procedure that would befit the dignity of the House. It seems to me that under the terms of the proposed resolution such a procedure can be worked out.

Mr. GREEN. Mr. Speaker, will the gentleman yield?

Mr. FRENCH. Yes.

Mr. GREEN. About how often would we have these memorial services?

Mr. FRENCH. Once at the close of every session of Congress.

Another question relates to the printing of the memorial service. I would have the memorial services that occur printed just as is done now. Then in addition to the general service I would have the Members granted the privilege of extending their remarks under arrangements with the committee touching the individuals whom they might desire to honor in that way. There could then be printed as many volumes as there had been deaths. Each volume could contain the record of the service, and in addition, the tributes to one of the deceased. Thus, the memorial volume for A would contain the general service and also the estimates of fellow Members touching A, and for B it would contain the same general service and in addition the estimates of individual Members touching B, and the same with C.

Mr. GARRETT of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. FRENCH. Yes.

Mr. GARRETT of Tennessee. I have been wondering whether the final language there "To arrange for the publication of proceedings" might in any way be in conflict with the present law. The Joint Committee on Printing, of course, now, under the law, as I understand it and independent of any rules of the House, has the jurisdiction of this particular type of printing.

Mr. FRENCH. My thought would be, although I do not know how the language would be construed, that the function of this committee would have to do with the arrangement and subject matter of programs, and extension of remarks rather than with the detail of the printing. I would not seek to take that power away from the committee that has charge of it now.

Mr. GARRETT of Tennessee. The point is that there is certain printing that is controlled by law and not by the rules of either the House or the Senate, and that printing which is controlled by law, of course, is under the jurisdiction of the Joint Committee on Printing. If there is any possibility of conflict, it should be carefully considered.

Mr. SNELL. I do not think that could be construed to be in conflict with the present law governing the Joint Committee on Printing.

Mr. FRENCH. I think not.

Mr. SNELL. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. Mr. Speaker, the gentleman from Idaho [Mr. FRENCH] has called attention to the diminishing respect which Congress is showing to its deceased Members. A cynical comment would be that it marks the diminishing respect which Members of Congress have for themselves.

I do not share the gentleman's view as to what will come out of the adoption of this resolution. I think it is merely another step in the progress of that diminishing respect and that it will continue to grow less until the time when we will pay no attention to the decease of Members whatever.

Under our present practice we set apart a day, usually Sunday, on which the friends of the deceased Member and his family may gather here and show respect to his memory. It is true that those exercises are not largely attended. Nevertheless, I have observed some of them which were very beautiful and impressive. I have listened to some splendid addresses and I have seen some find marks of feeling displayed here upon the floor on those occasions. I have seen evidences that the Member who had departed did yet live in the memory of his colleagues and of his friends.

It has been our practice to print the proceedings of those occasions in a separate volume—a memorial volume, with a handsome steel engraving of the deceased Member—and to make those volumes available to Members of the House and to the family of the deceased. In that way his memory has been perpetuated in an appropriate and dignified way.

It is now proposed to consolidate all of the memorial exercises into one, so to have only a single occasion during a term when all Members who have died during the term will be remembered. Thereby, of course, the importance of the occasion as respecting each of the deceased Members will be minimized. Instead of Members feeling it a duty and a privilege to come and pay tribute to the memory of their departed associates, they will come, if at all, in a perfunctory manner, as they do to the sessions of the House, and we will soon find that the consolidated and general memorial exercise will be no better attended than are the individual and separate memorial exercises as now held. In short, when the novelty has gone it will transpire that only those will attend the exercises who have been designated to speak, and no longer will the friends who really loved the deceased feel moved to speak in behalf of his memory and to pay tribute to his quality. The occasion will become a perfunctory and merely formal thing. Thus will the occasion continue to diminish and diminish, until finally it will disappear altogether.

The report of the consolidated memorial exercise will be printed in a single volume, and that volume will not be made available to the same extent as at present. It will not be furnished to the same extent to the family of the deceased. In that way something will be saved in the way of printing, but much in the way of respect which we might show the departed will be lost. I think it will be a very high price to pay in the dignity and honor of the House of Representatives, and that we should not now adopt this custom of lumping the deceased Members all together and reducing the importance of each in that way.

I do not like to depart from our ancient custom. We have had it for a long time. Why quit it now? Why jump to a new and ill-considered system? Why should this be done? Why depart from a system which works well? I ask the gentleman from New York this question.

The time will come in development under the proposed practice when we will cease to issue the memorial volumes. They will be no longer printed, and the families of deceased Members will be deprived of the solace to be found in them.

The SPEAKER. The time of the gentleman has expired.

Mr. HUDDLESTON. Will the gentleman yield me two additional minutes?

Mr. SNELL. I yield the gentleman two additional minutes.

Mr. HUDDLESTON. The time will come when the proceedings of the memorial sessions will merely be printed in the CONGRESSIONAL RECORD and will consist largely of "leaves to print." Members will be found staying at home or in their offices and absenting themselves from what has become a tiresome and meaningless ceremony, and it will finally transpire that our ancient and appropriate custom of holding memorial exercises will be wholly abandoned.

The question comes up now, as it seems to me, Is it proper to do this? Is it proper to cease paying respect to deceased Members? Is it nothing to be a Membor of the House of Representatives? Has it ceased to be of any consequence?

Let us hold to this established custom and our old practice. We have not had, it is true, the presence of the entire membership on these occasions; but at least all have been privileged to come who wanted to come. And I trust that if and when my time shall come only those who want to do so and who love me will attend. And I also trust that I will not be put merely in a category of those who are deceased and be classed in a consolidated assortment of Members who have died—good, bad, and indifferent—and have delivered, for the edification of the few who may be constrained to attend, some perfunctory funeral oration full of wise saws and solemn and impersonal

abjurations such, as with equal propriety, might have been delivered over a dead dog. [Applause.]

For these reasons I am not in favor of the resolution.

The SPEAKER. The time of the gentleman from Alabama has expired.

Mr. RANKIN. Mr. Speaker, will the gentleman from New York yield to me five minutes?

Mr. SNELL. I yield to the gentleman five minutes.

Mr. RANKIN. Mr. Speaker, I rise in opposition to the resolution. One of the main reasons for my opposing it is that it takes the human element out of these memorial exercises. Under the present system, when a Member dies and a day is set apart, usually a Sunday, to hold exercises in honor of his memory, his family invites a few of his friends among the Members of the House who knew him in his lifetime to come here to speak on that occasion. If this resolution is adopted, you take that prerogative away from the family of the deceased Member and turn it over to a committee of one. They say a committee of three; but you know the chairman of that committee will run it, and he may be a man who possibly did not know the deceased when he saw him on the floor of the House; a man who does not know his family. And he selects some one to deliver a memorial oration on that occasion.

Mr. SNELL. May I ask the gentleman from Mississippi what rights are we taking from the family?

Mr. RANKIN. You are taking away from the family the prerogative of selecting and inviting friends of the deceased to come here on these memorial occasions to speak on the life and character of a former fellow Member. You are turning this over to a committee of not over three, and, as I said, it will really consist of one member, because the chairman will practically run it; and he will select somebody to arrange for the memorial to a man whom he possibly did not know when he saw him on the floor of the House. I say you are taking out of these memorial exercises the human element, and I hope the House will vote this resolution down. [Applause.]

Mr. HOWARD of Nebraska. Mr. Speaker, will the gentleman from New York permit a question for information?

Mr. SNELL. Gladly.

Mr. HOWARD of Nebraska. Under this resolution the committee in charge will select those who will speak on the occasion of the omnibus funeral memorial. On that I would like to speak of my own particular attitude. I speak on this floor only when I get opportunity to speak from my fellow Members. On an occasion of that kind suppose the name of some Member of the House who had been very dear to him should appear in the list of the dead, and I should want to speak a tribute to his memory. I could not under the rule.

Mr. SNELL. Oh, let me say that the gentleman is entirely mistaken as to that. There is no hard and fast rule that fixes it in any way. This is an experiment, to try it out and see if we can not get a more dignified method of conducting these memorial exercises.

Mr. HOWARD of Nebraska. Do I understand the gentleman to say that on an occasion of that kind it would be perfectly proper for me to rise and speak without asking for time?

Mr. SNELL. I think probably you might have to suggest that you wanted to speak. Of course, it would not be an open field day, but without question the committee would yield time to anybody who wanted to speak.

Mr. HOWARD of Nebraska. Then I would be debarred from speaking, because I do not ask for time from an individual or from a committee. I ask for time only from all my fellow Members and by their unanimous consent.

Mr. SNELL. Somebody would be in charge of the committee. The gentleman would have to get permission to speak. I expect the gentleman would come under the same rules of the House as any one else.

Mr. HOWARD of Nebraska. The gentleman from Nebraska is loyal to the rules, but he never takes advantage of them; and he never asks a committee or a man for time in which to speak.

Mr. SNELL. I do not understand the gentleman's position.

Mr. HOWARD of Nebraska. It is very clear and simple. The gentleman knows that this particular gentleman from Nebraska never asks for time unless he asks the whole House for time.

Mr. SNELL. What would be the situation if every other man in the House wanted to act as an independent unit? We would never get anywhere.

Mr. HOWARD of Nebraska. It would be a delightful situation. I hope to see the time when our Speaker will control all the time, and no individual Member will control the time of fellow Members.

Mr. SNELL. I think the gentleman has entirely misinterpreted the intention of the committee and the views of the committee which has presented this resolution. The idea of the committee is that we shall have more dignified and humane and proper memorial services for deceased Members of the House and Senate than we have had under the former arrangement. Nearly everyone thinks that the other plan has been a failure. We should try out this new plan, and if it does not work, then there is no reason why it should not be changed again and go back to the old system or try some other plan. But I know that the feeling on the part of the Members of the House is that the former memorial services have not been satisfactory, and it is to give them a little more humane and dignified touch, calculated to make them more satisfactory, that we are presenting this resolution at this time.

I can assure the gentleman from Alabama [Mr. HUDDLESTON] and the gentleman from Mississippi [Mr. RANKIN] and the gentleman from Nebraska that we are not going to take anything away from the family.

They will be consulted and taken into consideration just as they ever have been, and I am sure under the guidance of this committee those relatives who come here to attend the services will find the exercises much more satisfactory than they have been under the form used in the past.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. RANKIN. I understand under this proposed resolution the addresses of all those who have spoken concerning those who have died will be published together in one volume?

Mr. SNELL. Yes.

Mr. RANKIN. The relatives of a gentleman from Massachusetts or a gentleman from California, let us say, if they get one of these memorial volumes, get with it the memorials relating to a gentleman from Colorado or a gentleman from Mississippi or some other State in the same volume. In other words, instead of the separate small volumes concerning each Member, it will be a volume of the CONGRESSIONAL RECORD containing memorial addresses on all Members who have died within the year?

Mr. FRENCH. The resolution itself does not provide a hard and fast procedure. My thought is that there would be as many volumes as there would be Members who had died, just as at this time the frontispiece of each volume contains the program that has occurred on the floor, where each of several volumes even now contains the same prayer offered by the Chaplain. The other part would contain the eulogies or comments upon the life, character, and public services of each deceased Member by Members of the House. Much of present volumes, after all, is by way of extension of remarks.

Mr. RANKIN. Suppose the State of Idaho had been so unfortunate as to lose a Member. Now, in order to get a record of what is said about the deceased Member by his friends on this floor, why compel the relatives to take a record of all the speeches with reference to all the other Members who have died within that year?

Mr. FRENCH. But the gentleman did not understand me. I suggested a separate volume, a small, compact volume, for each Member, containing just the part pertaining to that Member, in addition to the general program.

Mr. SNELL. As the gentleman from Idaho has suggested, there is no hard and fast rule laid down in this resolution. The procedure is to be worked out in such a way as to provide for a more satisfactory condition than we have at the present time. The committee can provide for as many volumes and for as many different kinds as it may see fit.

Mr. RANKIN. Then the gentleman from New York agrees with the gentleman from the State of Idaho?

Mr. SNELL. I am perfectly willing to have it worked out along that line.

Mr. WINGO. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. WINGO. Possibly the gentleman has already covered it, but I just came on the floor. As I understand, the intention is to have just one eulogy by some Member to cover all—is that the idea?

Mr. SNELL. Have that as the principal eulogy and then in addition to that have some Member from the State of the deceased make any eulogy he desired or as many as desired.

Mr. WINGO. Of course, the gentleman understands it would be highly necessary that Members from the specific State say something about the particular individual. With the practice as it has been, if one Member from the State should speak it would be necessary for the others from the State to speak, otherwise there would be some criticism, and yet if all were to do that with reference to the men who have died in the course of the year you would have something like 170 speeches on that one day.

Mr. SNELL. Well, this is my idea: The State of New York has 43 Members, and if a Member from the State of New York should die, the New York delegation could select a spokesman from among its Members to speak in behalf of the delegation.

Mr. WINGO. As I understand, this resolution refers the whole matter to a committee on memorials.

Mr. SNELL. That is what I have said several times. There is nothing definite or fixed about it. All we are trying to do is to have something worked out which would be better than that we have at the present time.

Mr. WINGO. I appreciate the difficulties we have now, and there ought to be some improvement.

Mr. SNELL. That is what we are trying to do. In this resolution no restriction is placed on this committee, and if we find it does not work out there is no reason why it should not be changed.

Mr. WINGO. It could not report any worse plan than we have now, and it is to be hoped we may get something better.

Mr. ALMON. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. ALMON. The part of the resolution to which I object is that which places in this committee the discretion to publish separate volumes or one volume. As it is now eulogies for each Member are printed in a separate volume, and a considerable number are allotted to each Member from the State interested, probably 150. Those copies get into the hands of the friends and relatives of the deceased Member, who appreciate them, whereas if you placed it in the discretion of the committee and put it all in one volume probably one Member from that State would get a dozen or 15 copies to go into the district where the man lived and from which he served his country.

Mr. SNELL. I do not think there will be any curtailment in the number. I think they can get all they want.

Mr. ALMON. The gentleman says it is an experiment, but as it is such a serious thing I do not think we ought to experiment with it until we give it more consideration.

Mr. TILSON. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. TILSON. It seems to be the principal objection to this resolution that the memorial speeches are all to be printed in one volume. The practice to-day is to include the memorial addresses concerning each Member in a separate volume. It seems to me this is about the only redeeming feature of our present plan. If this practice might be continued and at the same time do away with separate memorial service days, it would be a great improvement, because, I am sorry to say, that the present memorial service days are very poorly attended and are not as impressive as they should be.

Mr. HUDDLESTON. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. HUDDLESTON. How can you continue the present volume when you discontinue the speeches that make up the volume?

Mr. TILSON. I do not believe that it is the intention to discontinue all the speeches. Many of the speeches that are printed in the volume are never made on the floor and those that are made on the floor might just as well be put in by leave to print because there is practically no one here to hear them.

Mr. HUDDLESTON. Then that knocks the whole thing in the head.

Mr. RANKIN. Will not the same thing apply under the new rule?

Mr. SNELL. Mr. Speaker, in line 13, I move to strike out the word "year" and insert the word "period."

The SPEAKER. The gentleman from New York offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. SNELL: In line 13 of the resolution, strike out the word "year" and insert in lieu thereof the word "period."

The amendment was agreed to.

Mr. SNELL. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

THE FRANKING PRIVILEGE

Mr. KENDALL. Mr. Speaker, I ask unanimous consent that the Senate bill (S. 3800) to carry out provisions of the Pan American Postal Convention concerning franking privileges for diplomatic officers in Pan American countries and the United States be substituted for the House bill (H. R. 12415).

This bill passed both Houses unanimously and it has the approval of the Post Office Department and the majority and minority leaders of the House.

Mr. SNELL. Mr. Speaker, I did not understand the request.

Mr. KENDALL. The request is to substitute a Senate bill for a House bill.

Mr. CHINDBLOM. How does the matter come up for consideration—by unanimous consent?

Mr. KENDALL. I have asked unanimous consent.

Mr. TILSON. May I ask the gentleman what is the parliamentary situation? Has the House passed one bill and the Senate an identical bill?

Mr. KENDALL. Yes.

Mr. TILSON. And the gentleman simply wishes to have the Senate bill substituted for the House bill, is that correct?

Mr. KENDALL. That is correct.

Mr. CHINDBLOM. Is the bill on the House Calendar?

Mr. KENDALL. The request is to have the House bill removed from the House Calendar.

Mr. CHINDBLOM. Is the Senate bill on the House Calendar?

Mr. KENDALL. The bill was passed.

Mr. TILSON. As I understand, each bill has passed its respective House unanimously and the intention is to get together by one House passing the bill as passed by the other House.

Mr. CRAMTON. Is not the question to pass the Senate bill instead of making a substitution?

The SPEAKER. The gentleman from Pennsylvania [Mr. KENDALL] asks unanimous consent to take from the Speaker's table the bill S. 3800 and consider the same. The Clerk will report the bill.

The Clerk read the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. WINGO. Mr. Speaker, reserving the right to object, I would like to ask the gentleman a question. As I noticed the reading of the first part of the bill, it gives unlimited franking privileges to certain diplomatic officers, both on their official and their private mail in the United States, but as to the consuls and the vice consuls they only have the franking privilege on their official mail. What is the idea of giving the franking privilege on the private mail of these diplomatic officers?

Mr. KENDALL. It is an agreement that was arrived at between the different Pan American countries.

Mr. WINGO. I understand it is an agreement and that the bill proposes to carry out that agreement, which will give unlimited franking privileges in the United States for private as well as official mail of all the diplomatic representatives of these countries. Now, why give the diplomatic representatives, some of whom may be of less importance than the consul general of his country, the franking privilege upon his private mail and yet restrict the franking privilege of the consul general of that country to official mail? Should you not restrict all of them to official mail? Why should we ask for the American diplomatic representatives in these foreign countries the right to send their laundry by mail franked or their billets doux, or anything else? Why not confine it to official mail?

Mr. KENDALL. The same privilege, I will say to the gentleman, is accorded to the United States by these countries.

Mr. WINGO. That is why I am objecting. Why do this? Why should we ask other countries to give unlimited franking privileges to the private mail of some man who happens to be a member of the diplomatic corps? I am not talking about the ambassador. I should not object to the privilege being given to the ambassador or the chief representative of a great nation, but the idea of saying that these little "tea hounds" that we have attached to our embassies and attached to the other embassies can write their love notes and their social correspondence and their correspondence with their bootleggers, all of which shall be officially franked even though it may be private mail, is going a little too far. We get criticized enough about the expense we are put to for handling our official mail, which is very small compared with the dead-head mail that is carried by the departments of the Government.

Mr. SCHAFER. Will the gentleman yield?

Mr. WINGO. I will when I get the information I have asked.

Mr. KENDALL. I will say to the gentleman that this bill was considered by the Post Office Committees of the House and Senate, passed unanimously by both Houses, has the approval of the Post Office Department, and there has been no objection to the bill thus far.

Mr. WINGO. That may be a reason, but it never has occurred to me that the fact that everybody went to sleep in this House and passed something unanimously is conclusive evidence it is meritorious, which is the gentleman's answer. What reason has the gentleman? How can we justify it? If

you are going to give these officers this privilege, will you not have to give it to other officers? Why not give it to Members of Congress? If you are going to give it to a little attaché from Panama and let him send his private mail anywhere in the United States free, Members of Congress will come along and say, "Why not have our private mail sent free?"

Mr. KENDALL. That is the privilege of the Congress.

Mr. WINGO. Yes; it is a privilege, and that is what I am objecting to. Instead of extending these privileges that have no justification and are criticized, why does not the gentleman undertake to curtail some of the privileges and bring about a reform and limit the franking privilege to strictly official matters?

Mr. KENDALL. I think it is practically limited to official matters in this bill.

Mr. WINGO. The gentleman's bill does not do that. The gentleman's bill gives unlimited franking privileges to every little forty-second military attaché from Panama or any other Pan American country, and if that is done, you are going to have to grant it to the other nations.

Mr. RAMSEYER. Will the gentleman yield? The restrictions here are under such regulation as the Postmaster General will prescribe. I do not think it is supposed by the Post Office Committee that the Postmaster General would prescribe regulations under which they could send their private correspondence.

Mr. WINGO. The gentleman from Iowa is one of the ablest lawyers in the House, and he knows how, without any exception, such a law has been interpreted. Would he dare to make a regulation that would curtail the privilege? No; it would be a regulation as to how the privilege could be exercised and not limited.

Mr. RAMSEYER. I admit that the language is rather broad, but I do know that when the matter was before the Post Office Committee it was contemplated to pass a law to permit free exchange of official correspondence.

Mr. WINGO. I now yield to the gentleman from Wisconsin.

Mr. SCHAFER. The gentleman spoke about franking mail to bootleggers in the Diplomatic Service. They do not have to frank their mail to the bootleggers; the embassies are the biggest bootleggers we have. [Laughter.]

Mr. WINGO. Well, my ignorance of the actions of bootleggers is confessed, and I am willing to accept the information from the gentleman from Wisconsin. [Laughter.]

Mr. GARRETT of Texas. Will the gentleman yield?

Mr. WINGO. If I have the floor.

Mr. GARRETT of Texas. The gentleman says that under the regulation by the Post Office Department they could give unlimited franking privilege to these officials. Under the provisions of the regulations of the Post Office Department you send your official file to your district in one of these boxes prepared by the Government. You have 150 or 200 Veterans' Bureau cases. When you get home and want to send that file back you have to send it back four pounds at a time. You can not send your own files in the same way that you sent them home. You have to let the Postmaster look through those files to see if you have any old socks or shoes that you want to frank; and here you extend the franking privilege to these people to send trunkfulls of whatever they please.

Mr. LAGUARDIA. If the gentleman will yield, I want to say that the provisions of this bill were not initiated in the House. They simply came to us to carry out the provisions of an agreement entered into between the United States and some of these countries. So that all we have to do is to provide a law which will permit the Postmaster General to carry out the agreement which the Government had entered into with these countries.

Mr. GARRETT of Tennessee. Mr. Speaker, if the gentleman will yield, I have not felt disposed to oppose the bill. I think I was not here when it was considered before, but the statement of the gentleman from New York has made me somewhat dubious as to the attitude that ought to be assumed by the House touching this matter. I do not want to get myself in the attitude of agreeing that it is the duty of Congress in dealing with these internal matters, like the Postal Service, to carry out whatever treaty the executive department—for the Post Office Department is a part of the executive department—may choose to make. I do not think the House ought to encourage the idea that the treaty-making branch of the Government can go out and make a treaty and then have Congress carry it out. The statement of the gentleman from New York renders me doubtful whether we ought to pass the bill.

Mr. LAGUARDIA. I did not intend to state that it was our duty to carry it out; I was informing the House what happened. When the bill came before the House the House could turn it down or approve it. The House having agreed to it, it ought to show on the RECORD why the House agreed to it.

Mr. WINGO. If the House in a moment of mental aberration passed the bill by unanimous consent, and it passed the Senate both bodies have passed the identical provision in separate bills. When the Senate learns that the House has turned down the Senate bill granting special privileges they will call up the House bill and pass it, and it will become a law. I shall not object to this, but I hope that the committee who has jurisdiction of these matters in the future, instead of extending privileges to those in private life, will curtail the privileges to those in public life.

Mr. KENDALL. Mr. Speaker, the Committee on the Post Office and Post Roads considered this bill very carefully, and after full consideration it was unanimously approved.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. COLLINS. Mr. Speaker, I object.

THE SERVING OF FOOD IN THE CLOAKROOMS

Mr. UNDERHILL. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. UNDERHILL. Mr. Speaker, the last session of Congress appropriated almost $400,000 to improve the ventilating system in this Chamber and in the Senate Chamber. Of that amount about $175,000 was expended in improving the ventilation of this Chamber. It was for the purpose of conserving the health and the happiness of the Members of the House that such action was taken. However, we overlooked one serious condition which has more to do, perhaps, with the good health of Members than the matter of ventilation. Until we passed an order asking the Navy Department to assign a doctor to the House for the benefit of the Members of the House, we had overlooked the fact that we were carrying a source of infection, distribution of illness, sickness, and contagion, through the medium of food served in the little cubbyholes underneath the gallery. This doctor, who is in attendance upon the Members of the House as they may need him, made a thorough investigation of the sanitary conditions, and he reports that these are two of the most insanitary places, if not the most insanitary, of any place in the District of Columbia where food is served, and that if these little restaurants had existed elsewhere in the District undoubtedly the District health authorities would have taken action.

With this information and upon his advice, the sale of food in the cloakrooms has been abandoned. To take the place of that, if any of the Members find themselves obliged to remain on the floor of the House during the lunch period, arrangements have been made at the restaurant downstairs to serve sandwiches inclosed in sanitary envelopes, milk in sanitary cups, and such other food as can be served up here without contamination or fear of contagion.

Mr. ALMON. And with hot soup also?

Mr. UNDERHILL. The gentleman will have to go to the restaurant for hot soup.

Mr. ALMON. The House physician said that they had arranged to serve hot soup down there.

Mr. UNDERHILL. Oh, we will do that down in the restaurant.

Mr. ALMON. I mean at the lunch counter.

Mr. UNDERHILL. If a man has to remain on the floor of the House because of committee assignments or public business, he may have these sandwiches served. This is entirely in the interest of the health of the Members. I think that we have more trouble from lack of care in eating than from any other cause. Many of us who have been here for some time have seen several of our colleagues collapse soon after the lunch hour. There is much valuable advice which the doctor offers with reference to your eating; and, I think, if you will consult with the doctor, all of you will enjoy good health during the next year. It is my hope that the new year will bring to you health, happiness, and contentment, as well as success here. These things you can not obtain unless you eat properly, and the doctor is the right man to see in respect to that.

Mr. GARRETT of Texas. Mr. Speaker, I thank the gentleman for his good wishes; but will he yield to me for a moment?

Mr. UNDERHILL. Yes.

Mr. GARRETT of Texas. Does this doctor say when the contagion or infection takes place on the sandwich—whether it is before it is wrapped with paper or afterwards? I am driving at something which I think has a good deal of common sense in it.

I would like to know whether or not the man who fixes the sandwich downstairs has any cleaner hands than the man who

fixed the sandwich in the cloakroom, and if the tongue or the ham that he fixes downstairs in the restaurant has been inspected differently from what it was in the cloakrooms, or if it had been inspected up here any differently from what it will be inspected downstairs. Where the germ lodges himself is on the sandwich before it goes into the paper, and I would like to have the gentleman from Massachusetts inform us whether the conditions are better downstairs and whether when we get the sandwich wrapped up we will be any more secure when we unwrap it up here than if we were to get it up here in the manner in which we have been getting it?

Mr. UNDERHILL. That is a question which I suppose scientists might ponder over just as they have over the question of whether the chicken or the egg came first. As a matter of fact, the doctor is going to make a thorough inspection—and has already made a partial one—of everything connected with the restaurant downstairs. We propose to follow his advice and cooperate with him to the fullest extent.

The SPEAKER. The time of the gentleman from Massachusetts has expired.

CIVIL GOVERNMENT FOR PORTO RICO

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Insular Affairs and ordered printed without appendices:

To the Congress of the United States:

As required by section 12 of the act of Congress of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes," I transmit herewith, for the information of the Congress, the twenty-eighth annual report of the Governor of Porto Rico, including the reports of the heads of the several departments of the government of Porto Rico and that of the auditor, for the fiscal year ended June 30, 1928.

I recommend that the report of the Governor of Porto Rico, without appendices, be printed as a congressional document.

CALVIN COOLIDGE.

THE WHITE HOUSE, *January 3, 1929.*

WAR DEPARTMENT APPROPRIATIONS

Mr. BARBOUR. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15712, making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1930, and for other purposes. Pending that motion I ask unanimous consent that the time for general debate be not fixed at this time, but that it be controlled one-half by the gentleman from Mississippi, Mr. COLLINS, and one-half by myself.

The SPEAKER. The gentleman from California moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the War Department appropriation bill, and asks unanimous consent that the time for general debate to-day be equally divided between himself and the gentleman from Mississippi. Is there objection?

Mr. WINGO. Mr. Speaker, I reserve the right to object for the purpose of making a statement. I do not want to let go unchallenged in the RECORD, to be broadcast to the country, the statement of the gentleman from Massachusetts [Mr. UNDERHILL], that in the cloakrooms of the House of Representatives we have been maintaining lunch counters that are the most insanitary of any eating place in the District of Columbia. I have great respect for all doctors, but I have never seen cleaner food or a cleaner place than the small lunch tables that have been for years in the two cloakrooms, in fact, ever since I have been a Member of this House. I have never heard of anybody getting sick through eating the food that has been served in the cloakrooms. I, myself, have gotten sick through eating food served in the restaurant. However, we all know that the country is a little bit inclined to be glad to get anything that it can on which to hang a criticism of Congress, and to-morrow morning it will go out to the country that the distinguished gentleman from Massachusetts [Mr. UNDERHILL] had his New England sanitary soul outraged because under his nose this doctor found out that we had insanitary conditions in the cloakrooms. I wish that the food which is served in all of the hotels, cafés, and restaurants in the District of Columbia were as clean as this food that we have been getting in the cloakrooms. [Applause.] I go further and say deliberately that I wish the food served in the restaurant downstairs could come to us with the same assurance that it is sanitary as did the food that we purchased in these two cloakrooms. [Applause.] If he wishes to have the sandwiches wrapped, very well, but to say no more milk, oranges, coffee, apples, or sandwiches shall be served in the cloakroom because, forsooth, it is "insanitary" is just a little bit incredulous—yes, worse—but I will say no more for the present.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on the motion of the gentleman from California [Mr. BARBOUR].

The motion was agreed to.

The SPEAKER. The gentleman from Connecticut [Mr. TILSON] will please take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15712, with Mr. TILSON in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15712, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 15712) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1930, and for other purposes.

Mr. BARBOUR. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CLAGUE. Mr. Chairman, I yield 30 minutes to the gentleman from Nebraska [Mr. SIMMONS].

The CHAIRMAN. The gentleman from Nebraska is recognized for 30 minutes.

Mr. SIMMONS. Mr. Chairman, on December 17, 1928, the gentleman from Kentucky [Mr. GILBERT], in a prepared address before the House, among other things, stated:

For eight years I have heard Presidents' messages of prosperity, of dollars and cents, until materialism has become nauseating. Not once has ever been mentioned education, refinement, the arts, the sciences, honesty, morality, patriotism, or Christianity. Think of the President confining an entire address on George Washington to his farms, his slaves, his business ability, and material prosperity!

For the consideration of the gentleman from Kentucky and others who may be like minded, I offer the following quotations from the addresses, proclamations, and messages of Presidents Harding and Coolidge and suggest the serious reading of the documents in full. Copies are obtainable either at the White House, the Library of Congress, the Government Printing Office, or in the CONGRESSIONAL RECORD.

I have arranged the quotations and references of President Coolidge's addresses in two divisions in chronological order. The first group are inaugural addresses and messages to Congress. The second are addresses on other and varied occasions, all of which have appeared in printed form.

Warren G. Harding, in his inaugural address upon assuming the Presidency, stated:

Standing in this presence, mindful of the solemnity of this occasion, feeling the emotions which no one may know until he senses the great weight of responsibility for himself, I must utter my belief in the divine inspiration of the founding fathers. Surely there must have been God's intent in the making of this New World Republic. * * *

I would rejoice to acclaim the era of the Golden Rule and crown it with the autocracy of service. The world upheaval has added heavily to our tasks, but with the realization comes the surge of high resolve, and there is reassurance in belief in the God-given destiny of our Republic. If I fear that there is to be sole responsibility in the Executive for the America of to-morrow, I should shrink from the burden. But here are a hundred millions, with common concern and shared responsibility, answerable to God and country. The Republic summons them to their duty, and I invite cooperation.

I accept my part with single mindedness of purpose and humility of spirit and implore the favor and guidance of God in His heaven. With these I am unafraid and confidently face the future.

I have taken the solemn oath of office on that passage of Holy Writ wherein it is asked, "What doth the Lord require of thee but to do justly, and to love mercy, and to walk humbly with thy God?" This I pledge to God and country.

In an address to a joint session of the two Houses on April 12, 1921, President Harding said in part:

No government is more desirous than our own to reflect the human attitude, the purpose of making better citizens—physically, intellectually, spiritually.

In the realms of education, public health, sanitation, conditions of workers in industry, child welfare, proper amusement and recreation, the elimination of social vice, and many other subjects the Government has already undertaken a considerable range of activities.

President Harding in his Thanksgiving proclamation in 1921 said in part:

Ours has been a favored Nation in the bounty which God has bestowed upon it. * * *

It is for us to recognize that we have been thus favored, and when we gather at our altars to offer up thanks we will do well to judge, in humility and all sincerity, our purpose to prove deserving. We have been raised up and preserved in national power and consequence as part of a plan whose wisdom we can not question. Thus believing, we can do no less than hold our Nation the willing instrument of the Providence which has so wonderfully favored us. Opportunity for very great service awaits us if we shall prove equal to it. Let our prayers be raised for direction in the right paths. Under God our responsibility is great; to our own first, to all men afterwards; to all mankind in God's own justice.

President Harding, in his first annual address to Congress, December 6, 1921, said in part:

Through the eradication of illiteracy and the diffusion of education mankind has reached a stage where we may fairly say that in the United States equality of opportunity has been attained, though all are not prepared to embrace it.

Proclaiming December 3–9, 1922, as American education week, President Harding stated in part:

The ideals of democratic government and democratic education were planted simultaneously in our country. The fathers rightly believed that only a people trained to vision of public needs and duties could develop and maintain the institutions of popular government. The system of universal education, established in the beginnings, has developed with the country and become one of the characteristic features of our life.

"Without vision the people perish." Without education there can be little vision. Of education it may be said that "It is twice blest; it blesseth him that gives and him that takes."

The strength and security of the Nation will always rest in the intelligent body of its people. Our education should implant conceptions of public duty and private obligation broad enough to envisage the problems of a greatly distraught world. More than anything else men and women need the capacity to see with clear eye and to contemplate with open, unprejudiced mind, the issues of these times. Only through a properly motivated and generously inspired process of education can this be accomplished.

President Harding, in his address to Congress December 8, 1922, said in part:

From the very beginning public education has been left mainly in the hands of the States. * * * I believe in the cooperation of the national authority to stimulate, encourage, and broaden the work of the local authorities.

President Coolidge closed his annual message delivered to a joint session of the Senate and House of Representatives in December, 1923, with these words:

The world has had enough of the curse of hatred and selfishness, of destruction and war. It has had enough of the wrongful use of material power. For the healing of the nations there must be good will and charity, confidence and peace. The time has come for a more practical use of moral power, and more reliance upon the principle that right makes its own might. Our authority among the nations must be represented by justice and mercy. It is necessary not only to have faith, but to make sacrifices for our faith. The spiritual forces of the world make all its final determinations. It is with these voices that America should speak. Whenever they declare a righteous purpose there need be no doubt that they will be heard. America has taken her place in the world as a Republic—free, independent, powerful. The best service that can be rendered to humanity is the assurance that this place will be maintained.

President Coolidge closed his message to the Congress, December 3, 1924, with these words:

It is axiomatic that our country can not stand still. It would seem to be perfectly plain from recent events that it is determined to go forward. But it wants no pretenses, it wants no vagaries. It is determined to advance in an orderly, sound, and common-sense way. It does not propose to abandon the theory of the Declaration that the people have inalienable rights which no majority and no power of government can destroy. It does not propose to abandon the practice of the Constitution that provides for the protection of these rights. It believes that within these limitations, which are imposed not by the fiat of man but by the law of the Creator, self-government is just and wise. It is convinced that it will be impossible for the people to provide their own government unless they continue to own their own property.

These are the very foundations of America. On them has been erected a Government of freedom and equality, of justice and mercy, of education and charity. Living under it and supporting it the people have come into great possessions on the material and spiritual sides of life. I want to continue in this direction. I know that the Congress shares with me that desire. I want our institutions to be more and more expressive of these principles. I want the people of all the earth to see in the American flag the symbol of a Government which intends no oppression at home and no aggression abroad, which in the spirit of a common brotherhood provides assistance in time of distress.

On March 4, 1925, President Coolidge became the elected President of the United States. In his inaugural address upon that occasion he said:

We need not concern ourselves much about the rights of property if we will faithfully observe the rights of persons. Under our institutions their rights are supreme. It is not property but the right to hold property, both great and small, which our Constitution guarantees. All owners of property are charged with a service. These rights and duties have been revealed, through the conscience of society, to have a divine sanction. The very stability of our society rests upon production and conservation. For individuals or for governments to waste and squander their resources is to deny these rights and disregard these obligations. The result of economic dissipation to a nation is always moral decay.

Here stands our country, an example of tranquillity at home, a patron of tranquillity abroad. Here stands its Government, aware of its might but obedient to its conscience. Here it will continue to stand, seeking peace and prosperity, solicitous for the welfare of the wage earner, promoting enterprise, developing waterways and natural resources, attentive to the intuitive counsel of womanhood, encouraging education, desiring the advancement of religion, supporting the cause of justice and honor among the nations. America seeks no earthly empire built on blood and force. No ambition, no temptation, lures her to thought of foreign dominions. The legions which she sends forth are armed, not with the sword, but with the cross. The higher state to which she seeks the allegiance of all mankind is not of human, but of divine origin. She cherishes no purpose save to merit the favor of Almighty God.

In his message to the Congress at the beginning of the first session of the Sixty-ninth Congress, in 1925, President Coolidge said in part:

The Government ought always to be alert on the side of the humanities. It ought to encourage provisions for economic justice for the defenseless. It ought to extend its relief through its national and local agencies, as may be appropriate in each case, to the suffering and the needy. It ought to be charitable.

The Government of the United States has been created by the people. It is solely responsible to them. It will be most successful if it is conducted solely for their benefit. All its efforts would be of little avail unless they brought more justice, more enlightenment, more happiness and prosperity into the home. This means an opportunity to observe religion, secure education, and earn a living under a reign of law and order. It is the growth and improvement of the material and spiritual life of the Nation. We shall not be able to gain these ends merely by our own action. If they come at all, it will be because we have been willing to work in harmony with the abiding purpose of a Divine Providence.

President Coolidge closed his message to the Congress at the beginning of the second session of the Sixty-ninth Congress, December 7, 1926, with these words:

America is not and must not be a country without ideals. They are useless if they are only visionary; they are only valuable if they are practical. A nation can not dwell constantly on the mountain tops. It has to be replenished and sustained through the ceaseless toil of the less inspiring valleys. But its face ought always to be turned upward, its vision ought always to be fixed on high.

We need ideals that can be followed in daily life, that can be translated into terms of the home. We can not expect to be relieved from toil, but we do expect to divest it of degrading conditions. Work is honorable; it is entitled to an honorable recompense. We must strive mightily, but having striven there is a defect in our political and social system if we are not in general rewarded with success. To relieve the land of the burdens that came from the war, to release to the individual more of the fruits of his own industry, to increase his earning capacity and decrease his hours of labor, to enlarge the circle of his vision through good roads and better transportation, to place before him the opportunity for education both in science and in art, to leave him free to receive the inspiration of religion, all these are ideals which deliver him from the servitude of the body and exalt him to the service of the soul. Through this emancipation from the things that are material, we broaden our dominion over the things that are spiritual.

I have quoted the statement of the gentleman from Kentucky in which he said:

Think of the President confining an entire address on George Washington to his farms, his slaves, his business ability, and material prosperity.

I have been unable to find an address of either Presidents Harding or Coolidge that meets that description. It is assumed by several who heard the gentleman's statement that he referred to an address of President Coolidge before the Congress in joint session February 22, 1927, given in response to a request of the Congress asking that the address be given reminding the American people of the reason and purpose for holding a celebration on February 22, 1932, of the two hundredth anniversary of the birth of George Washington.

Assuming that that is the address to which reference was made, I shall quote more fully than from other addresses of President Coolidge. Discussing the plans, he stated:

When the plans begin to be matured they should embrace the active support of educational and religious institutions, of the many civic, social, and fraternal organizations, agricultural and trade associations, and of other numerous activities which characterize our national life.

Discussing President Washington, President Coolidge in that address stated, among other things:

A recital of his courage and patriotism, his loyalty and devotion, his self-sacrifice, his refusal to be king, will always arouse the imagination and inspire the soul of everyone who loves his country. Nothing can detract from the exalted place which this record entitles him to hold. But he has an appeal even broader than this, which to-day is equally valuable to the people of the United States. Not many of our citizens are to be called on to take high commands or to hold high public office. We are all necessarily engaged in the ordinary affairs of life. As a valuable example to youth and to maturity, the experience of Washington in these directions is worthy of much more attention than it has received.

It ought always to be an inspiration to the young people of the country to know that from earliest youth Washington showed a disposition to make the most of his opportunities. He was diligently industrious—a most admirable and desirable, if seemingly uninteresting, trait.

The boy might well have grown up with very little education, but his eager mind and indomitable will led him to acquire learning and information despite the handicaps surrounding him.

His formal schooling, which was of a rather primitive character, ended at the age of 13. When his regular instruction ended, his education was just beginning. It continued up to his death, December 14, 1799. If ever there was a self-made man, it was George Washington. Through all his later years he was constantly absorbing knowledge from contact with men, from reading whenever time and facilities permitted, and from a wide correspondence.

Although considerable has been written about it, not many people think of our first President as an agriculturist. He prepared a treatise on this subject. Those who have studied this phase of his life tell us he was probably the most successful owner and director of an agricultural estate in his day. A visitor in 1785 declared "Washington's greatest pride was to be thought the first farmer in America." Toward the end of his life he wrote:

"I am led to reflect how much more delightful to an undebauched mind is the task of making improvements on the earth than all the vain glory which can be acquired from ravaging it by the most uninterrupted career of conquests."

As President he was always an exponent of sound and honest public finance. He advocated the payment of our debts in full to holders of record, and the assumption by the Nation of the debts incurred by the various States to carry on the Revolution. His support of financial integrity, because it was morally right, strengthened the Union.

His ability as a business man was the strong support of his statesmanship. It made his political ideas intensely practical.

Washington was a builder—a creator. He had a national mind. He was constantly warning his countrymen of the danger of settling problems in accordance with sectional interests. His ideas in regard to the opening of our western territory were thought out primarily for the benefit of the Nation. It has been said that he would have been "the greatest man in America had there been no Revolutionary War."

Washington had the ability to translate ideals into the practical affairs of life. He was interested in what he believed contributed to the betterment of every-day existence. Perhaps because he realized the deficiency of his own early education, he was solicitous to provide liberal facilities for the youth of the future. Because as a man of affairs he knew the every-day uses of learning, in an early message to the Congress and in his will he sought methods for the establishment of a national university. Even in his Farewell Address we find this exhortation:

"Promote, then, as an object of primary importance, institutions for the general diffusion of knowledge. In proportion as the structure of a government gives force to public opinion, it is essential that public opinion should be enlightened."

He desired his system of education to be thoroughly American and thoroughly national. It was to support the people in a knowledge of their rights, in the creation of a republican spirit, and in the maintenance of the Union.

It was with the same clear vision that he looked upon religion. For him there was little in it of emotionalism. He placed it on a firmer, more secure foundation, and stated the benefits which would accrue to his country as the results of faith in spiritual things. He recognized that religion was the main support of free institutions. In his Farewell Address he said:

"Of all the dispositions and habits which lead to political prosperity, religion and morality are indispensable supports. In vain would that man claim the tribute of patriotism who should labor to subvert these great pillars of human happiness—these firmest props of the duties of men and citizens. The mere politician, equally with the pious man, ought to respect and to cherish them. A volume could not trace all their connections with private and public felicity. Let it simply be asked, Where is the security for property, for reputation, for life, if the sense of religious obligation desert the oaths which are the instruments of investigation in courts of justice? And let us with caution indulge the supposition that morality can be maintained without religion.

"Whatever may be conceded to the influence of refined education on minds of peculiar structure, reason and experience both forbid us to expect that national morality can prevail in exclusion of religious principle. It is substantially true that virtue or morality is a necessary spring of popular government. The rule indeed extends with more or less force to every species of free government. Who that is a sincere friend to it can look with indifference upon attempts to shake the foundation of the fabric?"

Without bigotry, without intolerance, he appeals to the highest spiritual nature of mankind. His genius has filled the earth. He has been recognized abroad as "the greatest man of our own or any age." He loved his fellow men. He loved his country. That he intrusted their keeping to a Divine Providence is revealed in the following prayer which he made in 1794:

"Let us unite, in imploring the Supreme Ruler of Nations, to spread His holy protection over these United States; to turn the machinations of the wicked, to the confirming of our Constitution; to enable us, at all times, to root out internal sedition and put invasion to flight; to perpetuate to our country that prosperity which His goodness has already conferred; and to verify the anticipations of this Government being a safeguard of human rights."

His accomplishments were great because of an efficiency which marked his every act and a sublime, compelling faith in the ultimate triumph of the right. As we study his daily life, as we read his letters, his diaries, his State papers, we come to realize more and more his wisdom, his energy, and his efficiency.

We have seen many soldiers who have left behind them little but the memory of their conflicts, but among all the victors the power to establish among a great people a form of self-government which the test of experience has shown will endure was bestowed upon Washington, and Washington alone. Many others have been able to destroy. He was able to construct. That he had around him many great minds does not detract from his glory. His was the directing spirit, without which there would have been no independence, no Union, no Constitution, and no Republic. His ways were the ways of truth. He built for eternity. His influence grows. His stature increases with the increasing years. In wisdom of action, in purity of character, he stands alone. We can not yet estimate him. We can only indicate our reverence for him and thank the Divine Providence which sent him to serve and inspire his fellow men.

In the message to the Congress at the beginning of the first session of the Seventieth Congress, December 6, 1927, President Coolidge closed with these words:

Our country has made much progress. But it has taken, and will continue to take, much effort. Competition will be keen, the temptation to selfishness and arrogance will be severe, the provocations to deal harshly with weaker peoples will be many. All of these are embraced in the opportunity for true greatness. They will be overbalanced by cooperation, by generosity, and a spirit of neighborly kindness. The forces of the universe are taking humanity in that direction. In doing good, in walking humbly, in sustaining its own people, in ministering to other nations, America will work out its own mighty destiny.

President Coolidge closed his message to the Congress December 4, 1928, at the beginning of the second session of the Seventieth Congress, with these words:

The country is in the midst of an era of prosperity more extensive and of peace more permanent than it has ever before experienced. But, having reached this position, we should not fail to comprehend that it can easily be lost. It needs more effort for its support than the less exalted places of the world. We shall not be permitted to take our ease, but shall continue to be required to spend our days in unremitting toil. The actions of the Government must command the confidence of the country. Without this our prosperity would be lost. We must extend

to other countries the largest measure of generosity, moderation, and patience. In addition to dealing justly we can well afford to walk humbly.

The end of government is to keep open the opportunity for a more abundant life. Peace and prosperity are not finalities; they are only methods. It is too easy under their influence for a nation to become selfish and degenerate. This test has come to the United States. Our country has been provided with the resources with which it can enlarge its intellectual, moral, and spiritual life. The issue is in the hands of the people. Our faith in man and God is the justification for the belief in our continuing success.

September 26, 1923, Calvin Coolidge issued a national education week proclamation stating, among other things:

From its earliest beginnings America has been devoted to the cause of education. This country was founded on the ideal of ministering to the individual. It was realized that this must be done by the institutions of religion and government. In order that there might be a properly educated clergy and well-trained civil magistrates, one of the first thoughts of the early settlers was to provide for a college of liberal culture, while for the general diffusion of knowledge primary schools were established. This course was taken as the necessary requirement of enlightened society.

Such a policy, once adopted, has continued to grow in extent. With the adoption of the Federal Constitution and the establishment of free governments in the States of the Union there was additional reason for broadening the opportunity for education. Our country adopted the principle of self-government by a free people. Those who were worthy of being free were worthy of being educated. Those who had the duty and responsibility of government must necessarily have the education with which to discharge the obligations of citizenship. The sovereign had to be educated. The sovereign had become the people. Schools and universities were provided by the various governments, and founded and fostered by private charity, until their buildings dotted all the land.

To insure the permanence and continuing improvement of such an educational policy there must be the fullest public realization of its absolute necessity. Every American citizen is entitled to a liberal education. Without this there is no guaranty for the permanance of free institutions, no hope of perpetuating self-government. Despotism finds it chief support in ignorance. Knowledge and freedom go hand in hand.

February 12, 1924, before the National Republican Club in New York City, President Coolidge said:

Character is the only secure foundation of the State.

The forces of evil do not long triumph. The power of justice can not long be delayed. The moral force of Lincoln is with us still. "He that keepeth Israel shall neither slumber nor sleep."

Addressing the luncheon of the Associated Press at New York City, April 22, 1924, President Coolidge said:

Little progress can be made by merely attempting to repress what is evil, our great hope lies in developing what is good. One newspaper is better than many criminal laws. One schoolmaster is better than a legion of bailiffs. One clergyman is better than an army with banners. These are our guaranties of internal peace and progress.

At the National Conference on Outdoor Recreation, May 22, 1924, President Coolidge said:

I want to see all Americans have a reasonable amount of leisure. Then I want to see them educated to use such leisure for their own enjoyment and betterment, and the strengthening of the quality of their citizenship. We can go a long way in that direction by getting them out of doors and really interested in nature. We can make still further progress by engaging them in games and sports. Our country is a land of cultured men and women. It is a land of agriculture, of industries, of schools, and of places of religious worship. It is a land of varied climes and scenery, of mountain and plain, of lake and river. It is the American heritage. We must make it a land of vision, a land of work, of sincere striving for the good, but we must add to all these, in order to round out the full stature of the people, an ample effort to make it a land of wholesome enjoyment and perennial gladness.

At the Confederate Memorial at Arlington, May 25, 1924, President Coolidge said:

If I am correctly informed by history, it is fitting that the Sabbath should be your Memorial Day. This follows from the belief that except for the forces of Oliver Cromwell no army was ever more thoroughly religious than that which followed General Lee. Moreover, these ceremonies necessarily are expressive of a hope and a belief that rise above the things of this life. It was Lincoln who pointed out that both sides prayed to the same God. When that is the case, it is only a matter of time when each will seek a common end. We can now see clearly what that end is. It is the maintenance of our American form of government, of our American institutions, of our American ideals, beneath a common flag, under the blessings of Almighty God.

A mightier force than ever followed Grant or Lee has leveled both their hosts, raised up a united Nation, and made us all partakers of a new glory. It is not for us to forget the past but to remember it, that we may profit by it. But it is gone; we can not change it. We must put our emphasis on the present and put into effect the lessons the past has taught us. All about us sleep those of many different beliefs and many divergent actions. But America claims them all. Her flag floats over them all. Her Government protects them all. They all rest in the same divine peace.

At Howard University, June 6, 1924, President Coolidge, in an address to the student body, said:

The accomplishments of the colored people in the United States, in the brief historic period since they were brought here from the restrictions of their native continent, can not but make us realize that there is something essential in our civilization which gives it a special power. I think we shall be able to agree that that particular element is the Christian religion, whose influence has always and everywhere been a force for the illumination and advancement of the peoples who have come under its sway.

At Georgetown University commencement, June 9, 1924, President Coolidge said:

* * * a continuing elimination of the uncomfortable tasks, of course, means a corresponding increase in human happiness. But this will not be possible, unless intellectual progress keeps step with the demand for higher technical, scientific, and social capabilities. That is why the progress of education must always be a primary concern to us.

The graduates of our higher institutions of learning have been mentally well equipped to take their part. If they shall fail, it will not be through lack of intelligence. Their success will be measured by the method with which they apply themselves. It will depend upon whether they choose the solid and substantial things and put their trust in the realities of life. It will not be so much a question of what they know as of how they use what they know. They can not meet the problems in life unless they have a foundation of character, and unless they are inspired by a moral purpose. It is necessary to be active and energetic and courageous, but it is necessary likewise to have humility. It is necessary to have knowledge and experience and wisdom, and keep the mind open for new truths; but it is necessary likewise to have abiding religious convictions.

I would not venture to say what our country needs most from its educated young men and women, but one of its urgent needs is a greater spirit of loyalty, which can only come from reverence for constituted authority, from faith in the things that are. There must be loyalty to the family; loyalty to the various civic organizations of society; loyalty to the Government, which means first of all the observance of its laws; and loyalty to religion. These are fundamental virtues. They are the chief characteristics of faith. If education has not given that clearer insight into all that touches our life, whether it come from our relationship to the physical world, or our relationship to mankind, it will be a disappointment and a failure. If it has given that insight, it will be a success; it will be the source of that power through which alone has been, and can be, "wrought many wonderful works."

At the convention of the National Education Association, Washington, D. C., July 4, 1924, President Coolidge stated:

Our country has not ceased to glory in its strength, but it has come to a realization that it must have something more than numbers and wealth, something more than a fleet and an army, to satisfy the longing of the soul. It knows that to power must be added wisdom, and to greatness must be added morality. It is no longer so solicitous to catalogue the powers which it possesses, as to direct those great forces for the spiritual advancement of the American people at home and the discharge of the obligations to humanity abroad. America is turning from the things that are seen to the things that are unseen.

That there could have been gathered together a body of men so learned in that science, so experienced in its application, so talented and so wise in its statement and demonstration, as those who proposed, formulated, and secured the adoption of the American Constitution, will never cease to be the wonder and admiration of the profoundest students of government. After making every allowance for a fortunate combination of circumstances and the accomplishments of human ingenuity, they have been nearly all forced to come to the belief that it can be accounted for only by the addition of another element, which we must recognize as the guiding hand of Providence. As we can make progress in science not by the disregard but by the application of the laws of mathematics, so in my firm conviction we can make progress politically and socially, not by a disregard of those fundamental principles which are the recognized, ratified, and established American institutions, but by their scrupulous support and observance.

Through it all (the Declaration of Independence) runs the recognition of the dignity and worth of the individual, because of his possession of those qualities which are revealed to us by religion.

It needed but little contemplation to determine that the greatest obstacle to freedom was ignorance. If there was to be self-government,

if there was to be popular sovereignty, if there was to be an almost unlimited privilege to vote and hold office, if the people were going to maintain themselves and administer their own political and social affairs, it was necessary as a purely practical matter that they should have a sufficiently trained and enlightened intelligence to accomplish that end. Popular government could only be predicated on popular education. In addition to this, the very conception of the value and responsibility of the individual, which made him worthy to be intrusted with this high estate, required that he should be furnished the opportunity to develop the spiritual nature, with which he was endowed, through adequate education.

The land was blessed with a great people and with great leaders. Washington and Jefferson, Franklin and Mason, Hamilton and Madison, Adams and Marshall, suggest a type of citizenship and leadership, of scholarship and statesmanship, of wisdom and character, of ability and patriotism, unsurpassed by any group of men ever brought together to direct the political destinies of a nation.

While I believe that educators are under obligation to expend public funds economically, it seems obvious that the recent increase in expenses for this purpose is a most wise investment. It is impossible to conceive that there should be any increase in agricultural products, in the production of manufactures, or any other increase in our material wealth, through ignorance. The reaction to using the resources of the country to develop the brains of the country through education has always been greatly to stimulate and increase the power of the people to produce.

As already indicated America is turning from the mere thought of the material advantage to a greater appreciation of the cultural advantage of learning. It is coming to be valued more and more for its own sake. People desire not only the intelligence to comprehend economic and social problems, but they are finding increased leisure is little more than time wasted in indulgence, unless an opportunity for self-development and self-expression has been provided in youth by the cultivation of a taste for literature, history, and the fine arts.

Another element must be secured in the training of citizenship, or all else will be in vain. All of our learning and science, our culture, and our arts will be of little avail unless they are supported by high character, unless there be honor, truth, and justice, unless our material resources are supported by moral and spiritual resources, there is no foundation for progress. A trained intelligence can do much, but there is no substitute for morality, character, and religious convictions. Unless these abide American citizenship will be found unequal to its task.

We are not yet free, but we are struggling to become free economically, socially, politically, spiritually.

A new importance is attaching to the cause of education. A new realization of its urgent necessity is taking hold of the Nation.

It is intent, as never before, upon listening to the word of the teacher, whether it comes from the platform, the schoolhouse, or the pulpit. The power of evil is being broken. The power of the truth is reasserting itself. The Declaration of Independence is continuing to justify itself.

August 14, 1924, President Coolidge, in his address of acceptance of the nomination for the Presidency, said:

Underneath and upholding political parties was, and is, the enduring principle that a true citizen of a real republic can not exist as a segregated, unattached fragment of selfishness, but must live as a constituent part of the whole of society, in which he can secure his own welfare only as he secures the welfare of his fellow men.

Party means political cooperation, not as an end in itself, but a means, an instrument of government. If founded upon a great moral principle and directed with scrupulous regard for its integrity, it can not fail to sweep onward and upward, advancing always steadily and surely, a mighty constructive force, a glorious bearer of progress.

The domestic affairs of our country appear to me to be by far the chief concern. From that source comes our strength. The home market consumes nearly all of our production. Within our own boundaries will be determined to a very large degree the economic welfare and the moral worth of the American people. These are plain facts, but there are others equally plain.

America, under Providence, has come to be a nation of great responsibility. It exists as one of the family of nations. We can not be isolated. Other peoples exist all about us. Their actions affect us, and our actions affect them, whether we will or no. Their financial condition is not and can not be entirely separated from our financial condition. But the final determination of our relationship to other countries rises into a higher realm. We believe in the brotherhood of man, because we believe in the fatherhood of God. That is our justification for freedom and equality.

Our country can not afford to let anyone live off the earnings of its youth of tender years. Their places are not in the factory, but in the school, that the men and women of to-morrow may reach a higher state of existence and the Nation a higher standard of citizenship.

In the commonplace things of life lies the strength of the Nation. It is not in brilliant conceptions and strokes of genius that we shall find the chief reliance of our country, but in the home, in the school, and in religion. America will continue to defend these shrines. Every evil force that seeks to desecrate or destroy them will find that a Higher Power has endowed the people with an inherent spirit of resistance. The people know the difference between pretense and reality. They want to be told the truth. They want to be trusted. They want a chance to work out their own material and spiritual salvation.

President Coolidge closed an address to the Association of Land Grant Colleges, November 13, 1924, in Washington, D. C., with these words:

Finally, you will remember that America has but one great staple product. We till the soil, we operate our industries, we develop transportation, we engage in commerce, we encourage the arts and sciences, but these are only means to an end. They are all carried on in order that America may produce men and women worthy of our standards of citizenship. We want to see them endowed with ability and character, with patriotism and religious devotion. We want to see them truly American, while ready and eager to contribute a generous share to world welfare. We want to see them honest, industrious, and independent, possessed of all those virtues which arise from an adequate moral and intellectual training joined to experiences which come from the open country.

November 14, 1924, President Coolidge began a proclamation designating American Education Week with these words:

Education for the children of all the people, extending from the primary grades through the university, constitutes America's noblest contribution to civilization. No child or youth in the United States need be deprived of the benefits of education suited to his age and degree of advancement.

Addressing the National Conference on Utilization of Forest Products at Washington, D. C., November 19, 1924, President Coolidge said:

We hold the resources of our country as a trust. They ought to be used for the benefit of the present generation, but they ought neither to be wasted nor destroyed. The generations to come also have a vested interest in them. They ought to be administered for the benefit of the public. No monopoly should be permitted which would result in profiteering, nor on the other hand should they be indiscriminately bestowed upon those who will unwisely permit them to be dissipated. These great natural resources must be administered for the general welfare of all the people, both for the present and for the future.

Addressing the International Livestock Exposition at Chicago, December 4, 1924, President Coolidge said:

We are entitled, I think, to look upon livestock as one of the most highly developed products of the agricultural industry. To bring that industry to its present high estate has required a continuing cooperation of unflagging industry, determined courage, sound business, a widespread and intelligent application of scientific methods, and the recognition of the practical advantages to be derived from our American system of agricultural education. This annual exposition has marked perhaps more accurately than any other index the steady progression of agriculture from an unorganized and rudimentary occupation to the point where it has taken on the character of a profession, and has summoned to its aid the most effective methods in business organization, economic analysis, and scientific methods.

At the Norwegian centennial celebration at the Minnesota State Fair Grounds, June 8, 1925, President Coolidge said:

Our America with all that it represents of hope in the world is now and will be what you make it. Its institutions of religious liberty, of educational and economic opportunity, of constitutional rights, of the integrity of the law, are the most precious possessions of the human race. These do not emanate from the Government. Their abiding place is with the people. They come from the consecration of the father, the love of the mother, and the devotion of the children. They are the product of that honest, earnest, and tireless effort that goes into the rearing of the family altar and the making of the home of our country.

At Cambridge, Mass., July 3, 1925, President Coolidge spoke on the one hundred and fiftieth anniversary of George Washington taking command of the Continental Army and said:

Wherever men love liberty, wherever they believe in patriotism, wherever they exalt high character, by universal consent they turn to the name of George Washington. No occasion could be conceived more worthy, more truly and comprehensively American, than that which is chosen to commemorate this divinely appointed captain. The contemplation of his life and work will forever strengthen our faith in our country and in our country's God.

Others have created wider commotion and deeper impression in the hour of their eminence. But we shall hardly find one who in his own

day achieved so much as Washington and left his work so firmly established that posterity, generation after generation, can only increase its tributes to his ability, his wisdom, his patriotism, and his rounded perfection in the character of a Christian citizen.

Addressing the Council of the Congregational Churches at Washington, D. C., October 20, 1925, President Coolidge said:

It is my understanding that the purpose of this council is to enlarge and improve the moral and spiritual life of the Nation. While I appreciate that its purpose is religious rather than political, I have felt a propriety in coming here because of my belief in the necessity for a growing reliance of the political success of our Government upon the religious convictions of our people.

In the progress of the human race religious beliefs were developed before the formation of governments. It is my understanding that government rests on religion. While in our own country we have wisely separated the church and the State in order to emancipate faith from all political interference, nevertheless the forms and theories of our Government were laid in accordance with the prevailing religious convictions of the people. The great revival of the middle of the eighteenth century had a marked influence upon our Revolutionary period. The claim to the right to freedom, the claim to the right to equality, with the resultant right to self-government—the rule of the people—have no foundation other than the common brotherhood of man derived from the common fatherhood of God. The righteous authority of the law depends for its sanction upon its harmony with the righteous authority of the Almighty. If this faith is set aside, the foundations of our institutions fail, the citizen is deposed from the high estate which he holds as amenable to a universal conscience, society reverts to a system of class and caste, and the government instead of being imposed by reason from within is imposed by force from without. Freedom and democracy would give way to despotism and slavery. I do not know of any adequate support for our form of government except that which comes from religion. The very fact that amid all the complexities and distractions of our present life we are still maintaining unimpaired the foundations of our institutions, constantly increasing the rectitude with which the great business affairs of our country are conducted, all the while improving our educational facilities, answering more and more generously to the calls of public and private charity, continually enlarging the field of art, giving more and more attention to the humanities, and becoming more and more responsive to spiritual things, appears to me to be incontrovertible evidence that though it may be practiced in a somewhat different manner than formerly the deep and abiding faith of our people in religion has not diminished but has increased.

I have tried to indicate what I think the country needs in the way of help under present conditions. It needs more religion. If there are any general failures in the enforcement of the law, it is because there have first been general failures in the disposition to observe the law. I can conceive of no adequate remedy for the evils which beset society except through the influences of religion. There is no form of education which will not fail, there is no form of government which will not fail, there is no form of reward which will not fail. Redemption must come through sacrifice, and sacrifice is the essence of religion. It will be of untold benefit if there is a broader comprehension of this principle by the public and a continued preaching of this crusade by the clergy. It is only through these avenues, by a constant renewal and extension of our faith, that we can expect to enlarge and improve the moral and spiritual life of the Nation. Without that faith all that we have of an enlightened civilization can not endure.

Addressing the International Convention of the Young Men's Christian Associations of the United States and Canada at Washington, D. C., October 24, 1925, President Coolidge said:

One of the chief characteristics of Christianity is that it is a militant and crusading faith. Those who have become partakers of its inspirations and its consolations, since it first began its early march over the hostile territory of the Roman Empire, have been constantly spreading its truths among all their associates. If that faith is to maintain its vitality that work must go on. It is not enough that there should be action in the pulpits—there must be reaction in the pews. It will not be sufficient to have exalted preaching by the clergy unless there is exalted living by the laity.

Special emphasis is being placed upon the need of training for citizenship. Not only by the general development of character, by encouraging industry and discouraging waste, are they strengthening the community and raising up leaders, but by informing the young respecting the teachings of the New Testament and of the Hebrew prophets they are providing them with a grasp on the principles which must underlie all enduring civilization.

America has many reasons for pride and satisfaction in the spirit and character of its citizenship. It is gratifying to know that it has the resources with which to make these outlays and perform these services. We ought to be thankful in remembering that our own people do not need to receive this kind of assistance from any other people. We are able to look after our own. But that which rises above all other considerations is the fact that our people are imbued with a religious charity which makes them disposed to extend these benefits to those who are less fortunately circumstanced at home and abroad. There are those who constantly reprove our people and our Government for an alleged failure to assist other peoples. I do not know that anyone could ever say that we were doing enough, but it is my strong suspicion that those who are making the loudest complaints have never taken the trouble to ascertain what we have done and what we are doing. It is gratifying beyond measure to realize how the steady, courageous, generous hand of the real America continues to reach out to those in need. It stands as a conclusive answer to all censorious criticism. These works stamp America with a continuing effort working for moral regeneration.

December 7, 1925, President Coolidge addressed the American Farm Bureau Federation at Chicago and closed with these words:

In all our economic discussions we must remember that we can not stop with the mere acquisition of wealth. The ultimate result to be desired is not the making of money but the making of people. Industry, thrift, and self-control are not sought because they create wealth but because they create character. These are the prime product of the farm. We who have seen it and lived it, we know.

It is this life that the Nation is so solicitous to maintain and improve. It dwells in the open country, among the hills and valleys and over the great plains, in the unobstructed light of the sun, and under the glimmer of the stars. It brings its inhabitants into an intimate and true relation to nature, where they can live in harmony with the Great Purpose. It has been the life of freedom and independence, of religious convictions and abiding character. In its past it has made and saved America and helped rescue the world. In its future it holds the supreme promise of human progress.

February 22, 1926, in an address before the department of superintendence of the National Education Association, President Coolidge closed with these words:

Our country has prospered, our Government is secure. But that prosperity and that security flow from the school and the church. They are the product of the mind and the soul. They are the result of the character of the American people. Through and through Washington is the great example of character. He sought to bestow that heritage upon his country. We shall fail in our estimation and understanding of him unless we remember that during his lifetime he helped to build a place of religious worship; in his will he provided for institutions of learning, and in his farewell address he emphasized the spiritual values of life. But what he did was even more eloquent than what he said. He was a soldier, a patriot, a statesman; but in addition to all these he was a great teacher.

Laying the corner stone of the National Press Club Building in Washington, D. C., April 8, 1926, President Coolidge said:

It is my firm conviction that the press of this country is strong enough, independent enough, and influential enough so that it should seek not to cater to a supposed low and degraded public opinion, but rather to create a noble and inspired public opinion. It ought to work in harmony with a great purpose, revealing to the people the progress of the development of a Divine power.

There is another side to journalism perhaps most important of all. No enterprise can obtain a success which is worth anything unless it appeals to the spiritual nature of mankind. No matter how secular the efforts may be of a publication, it will fail of the largest attainments, will not meet the highest requirements, will not secure the widest influence unless it is moved by a reverence for religion. Our country is a reverent country and our people are a reverent people. Our institutions must rest on that foundation. The press must minister to that spirit. Their great work must go on, like all other great works, in reliance upon a divine purpose. If the corner stone which we are laying to-day is to endure, it must represent these principles. "Except the Lord build the house, they labor in vain that build it."

At Washington, D. C., April 19, 1926, before the Daughters of the American Revolution, President Coolidge spoke as follows:

However exalted is the conception of our institutions, they are not beyond the reach of the common run of people. They are ideal, but they are practical. They rest on the everyday virtues—honesty, industry, and thrift. As the overwhelming mass of our people are thoroughly loyal to these principles, we can feel a warranted assurance that the foundations of our institutions are secure.

Our Republic gives to its citizens greater opportunities, and under it they have achieved greater blessings than ever came to any other people. It is exceedingly wholesome to stop and contemplate that undisputed fact from time to time. Then, it is necessary to contemplate the inescapable corollary that the enjoyment and perpetuation of these conditions necessarily lay upon our people the obligation of a corresponding service and sacrifice. Citizenship in America is not a private enterprise, but a public function. Although I have indicated that it is my firm conviction that this requirement will be met, it can not be

denied that if it is not met disaster will overtake the whole fabric of our institutions.

Addressing the National Council of the Boy Scouts of America, Washington, D. C., May 1, 1926, President Coolidge said:

We hear much talk of the decline in the influence of religion, of the loosening of the home ties, of the lack of discipline—all tending to break down reverence and respect for the laws of God and of man. Such thought as I have been able to give to the subject and such observations as have come within my experience have convinced me that there is no substitute for the influences of the home and of religion. In the past I have declared my conviction that our Government rests upon religion; that religion is the source from which we derive our reverence for truth and justice, for equality and liberty, and for the rights of mankind.

We need a greater faith in the strength of right living. We need a greater faith in the power of righteousness. These are the realities which do not pass away. On these everlasting principles rests the movement of the Boy Scouts of America. It is one of the growing institutions by which our country is working out the fulfillment of an eternal promise.

At Philadelphia, July 5, 1926, celebrating the one hundred and fiftieth anniversary of the Declaration of Independence, President Coolidge spoke as follows:

It is little wonder that people at home and abroad consider Independence Hall as hallowed ground and revere the Liberty Bell as a sacred relic. That pile of bricks and mortar, that mass of metal, might appear to the uninstructed as only the outgrown meeting place and the shattered bell of a former time, useless now because of more modern conveniences, but to those who know they have become consecrated by the use which men have made of them. They have long been identified with a great cause. They are the framework of a spiritual event. The world looks upon them, because of their associations of 150 years ago, as it looks upon the Holy Land because of what took place there nineteen hundred years ago. Through use for a righteous purpose they have become sanctified.

The American Revolution represented the informed and mature convictions of a great mass of independent, liberty-loving, God-fearing people who knew their rights and possessed the courage to dare to maintain them.

No one can examine this record and escape the conclusion that in the great outline of its principles the Declaration was the result of the religious teachings of the preceding period. The profound philosophy which Jonathan Edwards applied to theology, the popular preaching of George Whitefield, had aroused the thought and stirred the people of the Colonies in preparation for this great event.

But when we come to a contemplation of the immediate conception of the principles of human relationship which went into the Declaration of Independence we are not required to extend our search beyond our own shores. They are found in the texts, the sermons, and the writings of the early colonial clergy who were earnestly undertaking to instruct their congregations in the great mystery of how to live. They preached equality because they believed in the fatherhood of God and the brotherhood of man. They justified freedom by the text that we are all created in the divine image, all partakers of the divine spirit.

If this apprehension of the facts be correct, and the documentary evidence would appear to verify it, then certain conclusions are bound to follow. A spring will cease to flow if its source be dried up; a tree will wither if its roots be destroyed. In its main features the Declaration of Independence is a great spiritual document. It is a declaration not of material but of spiritual conceptions. Equality, liberty, popular sovereignty, the rights of man—these are not elements which we can see and touch. They are ideals. They have their source and their roots in the religious convictions. They belong to the unseen world. Unless the faith of the American people in these religious convictions is to endure, the principles of our Declaration will perish. We can not continue to enjoy the result if we neglect and abandon the cause.

We are too prone to overlook another conclusion. Governments do not make ideals, but ideals make governments. This is both historically and logically true. Of course, the government can help to sustain ideals and can create institutions through which they can be the better observed, but their source by their very nature is in the people. The people have to bear their own responsibilities. There is no method by which that burden can be shifted to the government. It is not the enactment, but the observance of laws, that creates the character of a nation.

We hold that the duly authorized expression of the will of the people has a divine sanction. But even in that we come back to the theory of John Wise that "Democracy is Christ's government. * * *." The ultimate sanction of law rests on the righteous authority of the Almighty.

On an occasion like this a great temptation exists to present evidence of the practical success of our form of democratic republic at home and the ever-broadening acceptance it is securing abroad. Although these things are well known, their frequent consideration is an encouragement and an inspiration. But it is not results and effects so much as sources and causes that I believe it is even more necessary constantly to contemplate.

Our forefathers came to certain conclusions and decided upon certain courses of action which have been a great blessing to the world. Before we can understand their conclusions we must go back and review the course which they followed. We must think the thoughts which they thought. Their intellectual life centered around the meeting house. They were intent upon religious worship. While there were always among them men of deep learning, and later those who had comparatively large possessions, the mind of the people was not so much engrossed in how much they knew or how much they had as in how they were going to live. While scantily provided with other literature there was a wide acquaintance with the Scriptures. Over a period as great as that which measures the existence of our independence they were subject to this discipline not only in their religious life and educational training, but also in their political thought. They were a people who came under the influence of a great spiritual development and acquired a great moral power.

No other theory is adequate to explain or comprehend the Declaration of Independence. It is the product of the spiritual insight of the people. We live in an age of science and of abounding accumulation of material things. These did not create our Declaration. Our Declaration created them. The things of the spirit come first. Unless we cling to that, all our material prosperity, overwhelming though it may appear, will turn to a barren scepter in our grasp. If we are to maintain the great heritage which has been bequeathed to us, we must be like-minded as the fathers who created it. We must not sink into a pagan materialism. We must cultivate the reverence which they had for the things that are holy. We must follow the spiritual and moral leadership which they showed. We must keep replenished, that they may glow with a more compelling flame the altar fires before which they worshipped.

At the annual convention of the American Red Cross in Washington, D. C., October 4, 1926, President Coolidge spoke as follows:

The main purpose of this organization is charity, but charity is not something that can exist of itself, apart from all else. It is a very complete demonstration of the fact that we live in a world that is interrelated and interdependent. Charity depends not only on a benevolent spirit but upon the material resources by means of which such a sentiment can manifest itself.

It is the realization of this principle that helps to sanctify the realm of business. The people of this country are engaged in their various daily occupations in order that they may meet their wide and comprehensive obligations. No doubt their first thought is to be self-supporting and independent, maintaining themselves and their families in comfort, supplying the needs of their declining years, and passing on to posterity the means of a broader existence and a more comprehensive life. It is with this in view that they have given heed to the scriptural injunction to be diligent in business, and under the inspiration of this motive America has become rich and prosperous. But our obligation does not end there. Although there is no doubt that we have surpassed every other people in that direction we have not yet attained, and perhaps it is not possible for finite beings to attain, to a complete economic justice. The limitations of humanity and the results of unforeseen and unforeseeable contingencies constantly leave some of our people, oftentimes without any fault on their part, in a condition of want and distress which they are unable of themselves to alleviate. Nothing is clearer than the requirement which is laid on society to use its resources for the relief and restoration of such conditions. The success and completeness with which these obligations are discharged measure the moral rank of a people.

It is to meet this broad purpose that the American Red Cross has been organized and maintained.

More and more each year it has become a symbol and expression of the divine sympathy which exists in every human being.

What the Red Cross is doing is only one example of the innumerable results of American idealism. While there is no more moving spectacle than that of the poor, out of their meager substance, extending relief to their fellow beings in time of distress, such relief would be entirely inadequate to meet the needs of modern society. To extend medical aid, to give the necessary food, clothing, and shelter to the victims of disaster in the crowded areas of the world, either in war or peace, require great outlays of money and large aggregates of personal service. This can only be furnished from the resources of wealth and prosperity. The fact that these charities are supplied not only for the Red Cross but in innumerable other directions is one of the most complete demonstrations that our people in their effort to accumulate property are moved by a righteous purpose. Their success has not been turned to

greed, avarice, or selfishness, but has been productive of generosity, benevolence, and charity.

After all the ideal charity is to place in the hands of the people the means of satisfying their own requirements through their own efforts.

It is for these reasons that it is necessary to rely so largely upon the economic condition of the country to minister to the idealism of the country. We may be moved ever so strongly with benevolent impulses; but if we are without means to afford relief, such sentiments are of little practical value. Even where generosity and wealth both exist we can not say that even these are sufficient. After all, human nature does not want permanent charity but permanent independence through the opportunity to work out its own destiny. It is at this point that the economic well-being and prosperity of a nation passes over into the ideal. Great wealth belonging to a few is not a condition that we seek in this country, but rather a system of production and distribution where the great mass of people shall be contributors to the process and shall share in the rewards. Under this system, toward which we are constantly advancing in America, prosperity and idealism merge, and the cause of economics serves the cause of humanity. The higher idealism, the true philanthropy, is not that which comes to the rescue after the catastrophe, but rather that which through obedience to sound economic laws creates a prosperity among the people that anticipates and prevents the need of charity.

Before the American Association of Advertising Agencies at Washington, October 27, 1926, President Coolidge spoke as follows:

Sometimes it seems as though our generation fails to give the proper estimate and importance to the values of life. Results appear to be secured so easily that we look upon them with indifference. We take too many things as a matter of course, when in fact they have been obtained for us only as the result of ages of effort and sacrifice. We look at our economic condition upon which we are absolutely dependent for the comforts and even the necessaries of life, and forgetting that it all rests on industry, thrift, and management, dismiss it lightly as a matter that does not concern us. Occasionally our attention is directed to our political institutions, which have been secured for us through the disinterested exertion of generations of patriotism, and, going along oblivious to the fact that they are the sole guarantees of our rights to life and liberty, we turn away with the comforting thought that we can let some party committee attend to getting out the vote and that probably the Government will run itself all right anyway. Then perhaps we are attracted by the buildings erected for education, or the temples dedicated to religious worship, and without stopping to realize that these are the main source of the culture of society and the moral and spiritual life of the people we pass them by as the concern very largely of schoolmasters and clergymen. We have become so accustomed to the character of our whole, vast, and intricate system of existence that we do not ordinarily realize its enormous importance.

These results, however, can not be considered as guaranteed by our material resources alone. They will accrue to us, not because of our fertile agricultural fields, our deposits of coal, iron, and precious metals, nor even from the present state of our development of trade with its accompanying supports of manufacturing, transportation, and finance. We can not rely on these alone. They could all be turned into instruments of destruction. Our chief warrant for faith in the future of America lies in the character of the American people. It is our belief in what they are going to do, rather than our knowledge of what they are going to have, that causes us to face the coming years with hope and confidence. The future of our country is not to be determined by the material resources, but by the spiritual life of the people. So long as our economic activities can be maintained on the standard of competition in service, we are safe. If they ever degenerate into a mere selfish scramble for rewards, we are lost. Our economic well-being depends on our integrity, our honor, our conscience.

President Coolidge closed his address dedicating the Liberty Memorial at Kansas City, November 11, 1926, with these words:

While we recognize the obligations arising from the war and the common dictates of humanity which ever bind us to a friendly consideration for other people, our main responsibility is for America. In the present state of the world that responsibility is more grave than it ever was at any other time. We have to face the facts. The margin of safety in human affairs is never very broad, as we have seen from the experience of the last dozen years. If the American spirit fails, what hope has the world? In the hour of our triumph and power we can not escape the need for sober thought and consecrated action. These dead whom we here commemorate have placed their trust in us. Their living comrades have made their sacrifice in the belief that we would not fail. In the consciousness of that trust and that belief this memorial stands as our pledge to their faith, a holy testament that our country will continue to do its duty under the guidance of a Divine Providence.

On the one hundred and fiftieth anniversary of the Battles of Trenton and Princeton, December 29, 1926, at Trenton, President Coolidge said:

Washington and his generals are gone. The bloody tracks which their barefoot armies often left on the frozen ground have long since been washed away. The smoke of the conflict in which they engaged has cleared. The civil strife and disorder which followed have been dissipated. But the institutions which they founded, the Government which they established, have not only remained, but have grown in strength and importance and extended their influence throughout the earth. We can never go to their assistance with supplies and reinforcements. We can never lend our counsel to their political deliberations. But we can support the Government and institutions which are their chief titles to the esteem and reverence in which they are held by the common consent of all humanity.

Our country has traveled far since these soul-inspiring days. Our progress has been great. Our prosperity has been the wonder of the world. Our present-day existence has its difficulties, requiring courage and resourcefulness. The political and economic life of the Nation offers abundant opportunity for developing the character and increasing the moral power of the people. I believe it to be a grave error to assert that the spiritual force of the men and women of the Revolutionary period was superior to that which exists in the America of the present. But they did set for us an example which no nation can ignore and long exist.

The Colonies of those days had little in the way of accumulated wealth, but by hard work the people on the whole maintained themselves in comfort. Those conditions, as everyone knows, have been radically changed. Through the development of our natural resources, our inventive genius, and mechanical skill this Nation has become possessed of very large wealth. Such a situation has its dangers. In past history it has usually led first to luxury and ease and later to decline and decay. We do not yet appear to be tending in that direction. While we have a considerable extent of what might be called luxury, it is not of that destructive nature which has in the past afflicted other people. In a wide measure it is for use rather than display. It makes its appeal to the soul rather than to the senses.

We are placing a great deal of emphasis on prosperity. Our people ought to desire to be prosperous, but it ought not to be their main desire. There are other things that they ought to want more. Prosperity is not a cause; it is a result. It is not based on indolence and ease, on avarice and greed, or on selfishness and self-indulgence. It is the result of industry, fair dealing, self-denial, and generosity. It is all summed up in a single word. It is character. If the country will put its emphasis on this process and remember to practice these virtues, its prosperity will become greater and greater, and the greater it becomes the more worthy it will be of our admiration. A more efficient service, one to another, will be the foundation of a greater prosperity and of a stronger national character.

The whole record of American success is traceable to the excellence of American citizenship.

* * * Under our institutions the only way to perfect our Government is to perfect the individual citizen. It is necessary to reach the mind and the soul of the individual. It is not merely a change of environment but a change of heart that is needed. The power of the law may help, but only the power of righteousness can be completely sufficient. I know of no way that this can be done save through the influences of religion and education. By religion I do not mean either fanaticism or bigotry; by education I do not mean the cant of the schools; but a broad and tolerant faith, loving thy neighbor as thyself, and a training and experience that enables the human mind to see into the heart of things.

At the annual session of the American Medical Association, May 17, 1927, Washington, D. C., President Coolidge said:

One of the difficulties in the world is not that we are lacking in sufficient knowledge, but that we are unwilling to live in accordance with the knowledge which we have. Approbation of the Ten Commandments is almost universal. The principles they declare are sanctioned by the common consent of mankind. We do not lack in knowledge of them. We lack in ability to live by them.

It is to your profession in its broadest sense, untrammeled by the contentions of different schools, that the world may look for large contributions toward its regeneration, physically, mentally, and spiritually, when not force but reason will hold universal sway. As human beings gain in individual perfection, so the world will gain in social perfection, and we may hope to come into an era of right living and right thinking, of good will, and of peace, in accordance with the teachings of the Great Physician.

At the memorial exercises at Arlington, May 30, 1927, President Coolidge said:

We have robbed no people of their independence, we have laid on no country the hand of oppression. When our military forces have taken the field it has been to enlarge the area of self-government, to extend

the scope of freedom, and to defend the principles of liberty. We have established our independence, resisted encroachment upon our sovereignty, maintained our national union, rescued afflicted people from their oppression, and brought victory to the cause of liberty in a world convulsion. To all of our departed dead who, on land and on sea, have offered their blood in the support of this holy and triumphant cause, America to-day brings its affectionate garlands of honor and acclaim.

As Americans we are always justified in glorying in our own country. While offensive boastfulness may be carried to the point of reproach, it is much less to be criticized than an attitude of apologetic inferiority. Not to know and appreciate the many excellent qualities of our own country constitutes an intellectual poverty which instead of being displayed with pride ought to be acknowledged with shame. While pride in our country ought to be the American attitude, it should not include any spirit of arrogance or contempt toward other nations. All people have points of excellence and are justly entitled to the honorable consideration of other nations. While this land was still a wilderness there were other lands supporting a high state of civilization and enlightenment. On the foundation which they had already laid we have erected our own structure of society. Their ways may not always be our ways, and their thoughts may not always be our thoughts, but in accordance with their own methods they are attempting to maintain their position in the world and discharge their obligations to humanity. We shall best fulfill our mission by extending to them all the hand of helpfulness, consideration, and friendship. Our own greatness will be measured by the justice and forbearance which we manifest toward others.

If we desire to be an influence in order and law, tranquillity and good will in the world, we must be determined to make sufficient sacrifices to live by these precepts at home. We can be a moral force in the world only to the extent that we establish morality in our own country.

Addressing the First International Congress of Soil Science, June 13, 1927, at Washington, D. C., President Coolidge said:

Science is not confined within any national boundaries. Its achievements and its benefits, like the achievements and benefits of all truth, are at the service of the world for the lightening of human labor and the enrichment of human life.

Dedicating Wicker Memorial Park to World War veterans, June 14, 1927, at Hammond, Ind., President Coolidge said:

The immediate aim of these efforts is to improve the public health. It is realized that sound bodies mean an increased industrial efficiency. But the purpose goes beyond this to the cleansing and clarifying of the mind, raising the whole standard of life. It is becoming better and better understood that a sound body, an informed mind, normal social contacts, and that contentment which comes from opportunity for a broader self-expression, are all vital factors in the preservation of our national existence. The significance of this development is triumphantly American. In this country the sciences, the arts, the humanities, are not reserved for a supposed aristocracy, but for the whole of the people. Here we do not extend privilege to a few, we extend privilege to everybody. That which was only provided for kings and nobles in former days, we bestow freely on the people at large. The destiny of America is to give the people still more royal powers, to strengthen their hand for a more effective grasp upon the scepter.

We are also possessors of human strength. Intelligence, courage, fidelity, character—these, also, are our heritage and our mark of the Divine Image.

Amid all her prosperity America has not forgotten her ideals. As a people we stand in respectful reverence before the things that are unseen. It is but a passing glance that we bestow upon wealth and place, compared with that which we pour out upon courage, patriotism, holiness, and character. We dedicate no monuments to merely financial and economic success, while our country is filled with memorials to those who have done some service for their fellow men.

No one who is acquainted with history, who observes what is all about us, can fail to cherish the hope that we are entering on a wonderful future. It has been said that the war was fought to make a world fit for the abode of heroes. I want to see our own country the first to make that expectation a reality. But if it is to come true, it can only be through the industry, the devotion, and the character of the people themselves. The Government can help to provide opportunity, but the people must take advantage of it.

At Brookings, S. Dak., September 10, 1927, dedicating the Lincoln Memorial Library, President Coolidge said:

In communities such as these the cause of education has never failed to hold a very high place. Of course, the people in their daily life would give their first thought to religious worship, but in the affairs of government education has come to be predominant. No progressive community can afford to neglect the education of its people. It is impossible for any community to hold its place in modern society unless it is fully equipped in the educational field of arts and sciences and research.

All of our science and all of our arts will never be the means for the true advancement of our Nation, will never remove us from the sphere of the superficial and the cynical, will never give us a civilization and a culture of any worthy and lasting importance unless we are able to see in them the outward manifestation of a spiritual reality. Unless our halls of learning are real temples which are to be approached by our youth in an attitude of reverence, consecrated by worship of the truth, they will all end in a delusion. The information that is acquired in them will simply provide a greater capacity for evil. Our institutions of learning must be dedicated to a higher purpose. The life of our Nation must rise to a higher realm.

But these colleges are important not only because of the economic results which have accrued from them but even more because of their spiritual value. They are of great benefit in the domain of land and the various products of the soil, but in the domain of thought they have an even more important influence. Our whole country is yet comparatively young. We have been driven by necessity to giving a great deal of attention to subduing the forces of nature. It has been necessary to create anew on this continent all of the instruments of civilization. We have had our cities to build, our highways, our railroads, and our canals to lay out, our mines and manufacturing to put into operation, our banking and commerce, as well as our agriculture, to organize, and our political and our social problems to solve. All of these have made necessary a great supply of material resources for their creation and support.

We have been excessively busy seeking for information that could be turned to practical advantage in the matter of dollars and cents, rather than for that wisdom which would guide us through eternity. Our higher educational institutions have turned their thoughts especially to the sciences, and our secondary schools to vocational training. How important these are in my estimation will appear from what I have already said. How poor and weak and generally ineffective we should be without these advantages can be at once seen by the most casual observation of those nations among which they have been neglected.

This is by no means all that is to be expected from American education and American institutions. I can not conceive that the object of Abraham Lincoln was merely to instruct men how to raise more corn, to feed more hogs, to get more money, to buy more land, and so on, in the expanding circle, as the story goes. Of course, he wanted to teach men to raise more corn, but his main object must have been to raise better men. We come back to the query that is contained in the concentrated wisdom of the ages, "What shall it profit a man if he gain the whole world and lose his own soul?"

We should all of us remember Lincoln as the great emancipator, the President who guided the Nation through four years of internal conflict, who demonstrated beyond future question the national quality of our institutions and the indestructibility of our Union, who removed forever from our soil the stain of human slavery, and who possessed a God-given insight into the hearts of the American people. But these elements of his greatness should not be permitted to eclipse the mighty service which he rendered to the cause of vocational education by his advocacy and approval of the measure which established what are usually referred to as our State agricultural colleges.

At the annual observance of Founders' Day at Carnegie Institute, Pittsburgh, Pa., October 13, 1927, President Coolidge said:

It is a fundamental principle of our institutions that freedom, education, and wealth are not to be reserved for the few but are to be reached through equal opportunity which is open to all. We have staked America on the potential capacity of the average citizen.

There are still some who sit apart, who do not see, who can not understand. To them our industrial life is the apotheosis of selfishness. They can not realize that the rattle of the reaper, the buzz of the saw, the clang of the anvil, the roar of traffic are all part of a mighty symphony not only of material but of spiritual progress. Out of them the Nation is supporting its religious institutions, endowing its colleges, providing its charities, furnishing adornments of architecture, rearing its monuments, organizing its orchestras, and encouraging its painting. But the American people see and understand. Unperturbed, they move majestically forward in the consciousness that they are making their contribution in common with our sister nations to the progress of humanity.

Speaking before the Union League at Philadelphia, November 17, 1927, President Coolidge said:

America is much more than a geographical location. It is a combination and a relationship. It is the destiny of a masterful, pioneering people, enduring all the hardships of settling a new country, determined to be free. It is the Declaration of Independence and the Federal Constitution, with a system of local self-government. It is the development of the farm, the factory, and the mine, the creation of a surpassing commerce, and the opening of vast lines of travel by sea and land, with broadening opportunity for education and freedom for religious worship. Our country is the result of incomprehensible

triumph, conferring upon its own people untold material and spiritual rewards and indirectly raising the standards of the world. It is a combination of all these elements, with their past history and their present aspirations, that we refer to as America.

While we have not neglected religion and education, we have considered our welfare in the past mainly on its economic side. Our population has increased rapidly over a considerable space of years. We have received large numbers of foreign people. For the most part they were vigorous, enterprising, and of good character, but almost always without money and too often without learning. Due to the exigencies of frontier life, many of our native-born have found themselves in a similar situation. To form all these people into an organization where they might not merely secure a livelihood, but by industry and thrift have the opportunity to accumulate a competency, such as has been done in this country, is one of the most marvelous feats ever accomplished by human society. It could never have been done without the utmost of private and public attention to the business side of life. Yet it has been done. The task is by no means complete, but the framework has been erected and no one can deny that the construction is making steady progress.

The object of this economic endeavor has not been the making of money for its own sake. It certainly has not been for the purpose of endowing an aristocracy with wealth. It has been fostered and encouraged by the Government in order to provide the people at large with sufficient incomes to raise their standards of living to a position worthy of a free and enlightened nation. In the carrying out of this mighty project, which in its conception and its execution has never been surpassed by any effort for human advancement, our inhabitants have found the added benefit of a corresponding development of character. The results have reached into the humblest home in the land, carrying hope and cheer with the knowledge that the door of opportunity has been opened to them.

We have sought to establish a system under which the people would control the Government, and not the Government control the people. If economic freedom vanishes, political freedom becomes nothing but a shadow.

Those are some of the economic results which have accrued from the American principle of reliance upon the initiative and the freedom of the individual. It is the very antithesis of communism, but it has raised the general welfare of the people to a position beyond even the promises of the extremists. Arising from this same principle is popular education, the right to justice, free speech, and free religious worship, all of which we cherish under the general designation of liberty under the law.

We have demonstrated that we were able to meet adversity and overcome it. The test which now confronts the Nation is prosperity. There is nothing more likely to reveal the soul of a people. History is littered with stories of nations destroyed by their own wealth. It is true that we have accumulated a small but a blatant fringe of extravagance and waste, nourished in idleness, and another undesirable class who seek to live without work. A successful people are always a mark for the vicious and the criminal. But these are conspicuous mainly by contrast. The great mass of our people, whatever their possessions, are conscientious and industrious, seeking to serve humanity. They know that the doctrine of ease is the doctrine of surrender and decay. To the effort which built this country they are giving increased effort to maintain it. The heart of the Nation is sound.

Society is made up of constants and variables. The variables attract us by their contrasts and are always appearing in the headlines. But the constants always predominate, always push ahead in the march of progress. We hear enough of criticism, we hear enough of the evil; but we must not forget commendation, we must not forget the good. This is our Government. This is our society. This is our country. It is solid, sound, secure. It is for us to put forth sufficient effort to keep it so.

Addressing the Pan American conference at Habana, Cuba, January 16, 1928, President Coolidge stated:

The fertility of a virgin soil, a wealth of mineral deposits, an abundance of water power, a multitude of navigable rivers, all at the command of a resourceful people, have produced a material prosperity greater in amount and more widely distributed than ever before fell to the lot of the human race. The arts and sciences have flourished, the advantages of education are widespread, devotion to religion is marked by its sincerity. The spirit of liberty is universal. An attitude of peace and good will prevails among our nations.

While the law is necessary for the proper guidance of human action, and will always remain the source of freedom and liberty and the ultimate guaranty of all our rights, there is another element in our experience which must always be taken into consideration. We read that "The letter killeth but the spirit giveth life." Oftentimes in our international relationship we shall have to look to the spirit rather than to the letter of the law. We shall have to realize that the highest law is consideration, cooperation, friendship, and charity. Without the application of these there can be no peace and no progress, no liberty, and no republic. These are the attributes that raise human relationships out of the realm of the mechanical, above the realm of animal existence, into the loftier sphere that borders on the divine. If we are to experience a new era in our affairs, it will be because the world recognizes and lives in accordance with this spirit. Its most complete expression is the Golden Rule.

The light which Columbus followed has not failed. The courage that carried him on still lives. They are the heritage of the people of Bolivar and of Washington. We must lay our voyage of exploration toward complete understanding and friendship. Having taken that course, we must not be turned aside by the fears of the timid, the counsels of the ignorant, or the designs of the malevolent. With law and charity as our guides, with that ancient faith which is only strengthened when it requires sacrifices, we shall anchor at last in the harbor of justice and truth. The same Pilot which stood by the side of the great discoverer, and the same Wisdom which instructed the founding fathers of our republics, will continue to abide with us.

Addressing a joint meeting of the American Federation of Arts and the American Association of Museums, Washington, D. C., May 16, 1928, President Coolidge stated:

While we have been devoted to the development of our material resources, as a Nation ought to be which heeds the admonition to be diligent in business, we have not been neglectful of the higher things of life. In fact, I believe it can be demonstrated that the intellectual and moral awakening which characterized our people in their early experiences was the forerunner and foundation of the remarkable era of development in which we now live. But in the midst of all the swift-moving events we have an increasing need for inspiration. Men and women become conscious that they must seek for satisfaction in something more than worldly success. They are moved with a desire to rise above themselves. It is but natural, therefore, that we should turn to the field of art.

We refer to painting, sculpture, the adornments of architecture, music, poetry, and the drama as fine arts. More recently we have designated the perfection and refinement of the design of articles fabricated by modern machinery as industrial arts. But in a wider sense the arts include all those manifestations of beauty created by man which broaden and enrich life. It is an attempt to transfer to others the highest and best thoughts which the race has experienced. The self-expression which it makes possible rises into the realm of the divine.

It is especially the practical side of art that requires more emphasis. We need to put more effort into translating art into the daily life of the people. If we could surround ourselves with forms of beauty, the evil things of life would tend to disappear and our moral standards would be raised. Through our contact with the beautiful we see more of the truth and are brought into closer harmony with the infinite.

Our country has reached a position where this is no longer a visionary desire but is becoming an actual reality. With general prosperity, with high wages, with reasonable hours of labor has come both the means and the time to cultivate the artistic spirit. Philanthropy has given the people access to all that is most beautiful in form and color. It is theirs without money and without price, if they will but go and possess it. Out of our agriculture, our commerce, and our industry, we can already see emerging a new spirit. The potential is becoming actual. Through science and invention, gradually but surely, we are banishing the drudgery of existence and bringing into every avenue of living a touch of the artistic. We are working out the ideal under which everyone will realize that they are artists, in their employment, in their recreation, and in their relations, one with another.

Speaking at Andover, Mass., May 19, 1928, on the one hundred and fiftieth anniversary of Phillips Academy, President Coolidge said:

For our chartered institutions of learning to turn back to the material and neglect the spiritual would be treason, not only to the cause for which they were founded, but to man and to God.

When the cause of the Revolution still hung in the balance, when this school was conducted in an abandoned carpenter shop, before our Federal Constitution had made our scattered colonies into one nation, when authority was weak and all the future was uncertain, the patriots of that day offered life, fortune, and honor in defense of their country. They did not doubt; they did not complain. They went forward, placing their hope on the sure support of liberty and justice, the improvement of agriculture, industry, and commerce, and the advance of education. The day has come when we have seen their hope fulfilled, when we have seen their faith justified, and when success has demonstrated the correctness of their theories. The general advance made by our country is commensurate with the advance which has been made by Phillips Academy. As we behold it our doubts ought to be removed, our faith ought to be replenished. Our determination to make such sacrifices as are necessary for the common good ought to be strengthened. We may be certain that our country is altogether worthy of us. It will be necessary to demonstrate that we are worthy of our country.

Dedicating a memorial to Col. William Colvill at Cannon Falls, Minn., July 29, 1928, President Coolidge said:

Heroic deeds have about them an element of immortality. We stand in reverence before those who perform them and cherish their memory down through the ages because we recognize in them the manifestation

of a spiritual life, the evidence of things not seen, a presence which was without beginning and is without end, a power that lifts men above the things of this earth into the realm of the divine.

Because we believe in the reality of right and truth and justice and recognize the necessity of supporting them with every necessary sacrifice, including life itself, we could not be engaged in any more devotional action than in reverencing the memory of those who have nobly responded to that high conception of eternal duty.

We may well stop to consider on this Sabbath Day what Power it was that stationed these men at this strategic point on this occasion, which held so much of the hope of humanity. We can only infer that it was the same Power which guided the path of the *Mayflower*, which gave our country Franklin and Washington, which brought this northwestern territory into the Union through the miraculous victory of George Rogers Clark at Vincennes and peopled it with a freedom-loving immigration, which raised up Lincoln and Grant, which went to the rescue of liberty in Cuba and on the fields of France. Was it not the same Power which set these men as Its sentinels on that July day to guard the progress of humanity? As we behold it all we can but conclude in the words of Holy Writ that, "The judgments of the Lord are true and righteous altogether."

It has been demonstrated that what never could have been created under a condition of servitude is the almost natural result of a condition of freedom. Human nature has been so designed that men are only at their best when they are permitted to live like men. It is when they are released from the bondage of the body, given control over their own actions, receive the returns from their own labor, and released from bondage of the mind so that ignorance and superstition are replaced by education and moral influences that most progress is made toward an enlightened civilization.

It is in accordance with these conceptions that we have come to-day to dedicate this memorial and to rededicate ourselves to the support and preservation of those principles which have been revealed to us through the human understanding to be true and demonstrated through long experience to be sound. We have come to increase our admiration for all that is heroic in life, to express our reverence for those who have made sacrifices for the well-being of their fellow men, to renew our fealty to the Constitution of the United States, to rejoice in the universal freedom which it guarantees and in the perfect Union which it has created, and finally for all these blessings in gratitude and humility to acknowledge our dependence upon the Giver of every true and perfect gift.

Addressing the general convention of the Episcopal Church, Washington, D. C., October 10, 1928, President Coolidge said:

This general convention of the Episcopal Church, which is held once in three years, represents organized religious life and missionary effort in every part of the globe. Many thousands are taking part in it. Considered by itself alone it constitutes an activity of the greatest importance. But when we remember that it is but one of many similar organizations, some larger and some smaller, all devoted to the service of religion, we can not escape the conclusion that the major forces of the world are actively and energetically engaged in promoting the spiritual advancement of humanity.

The advancement of knowledge, the increase in science, the growth and distribution of wealth, the enactment of laws, while they may all be commendable or even necessary in themselves, do not alone meet the problem of human existence or furnish a sufficient foundation for human progress. Man is more than all these. He requires the inspiration of a higher motive to meet the demands of a spiritual nature. They might furnish a partial explanation of an Alexander, a Cæsar, or a Napoleon. They fail utterly to account for a Hampden or a Cromwell, a Washington or a Lincoln, or for the long list of sacrificing missionaries, saints, and martyrs who have devoted their lives to the higher cause of humanity. Organized government and organized society have done much and can do much. Their efforts will always be necessary, but without the inspiration of faith, without devotion to religion, they are inadequate to serve the needs of mankind. It is in that direction that we must look for the permanent sources of the ministrations of charity, the kindness of brotherly love, and the renunciation of consecrated lives.

Our country is thoroughly committed to a life of action. We expect our people to put forth great energy and great effort in perfecting the material structure of our national life, in enlarging our production, in increasing our commerce, in strengthening our agriculture, in improving our transportation, in organizing our finances. But all these things will never be done for their own sake. They are not an end in themselves. They are but a means to a nobler character and a higher life. Unless that motive is provided from some other source, these activities inevitably lead back to the conclusion that the end justifies the means and that might makes right. We are not seeking an increased material welfare that leads to materialism; we are seeking an increased devotion to duty that leads to spiritual life. Such an effort would be in vain, unless our Nation as a whole continued in its devotion to religion.

We can not remind ourselves too often that our right to be free, the support of our principles of justice, our obligations to each other in our domestic affairs, and our duty to humanity abroad, the confidence in each other necessary to support our social and economic relations, and finally the fabric of our Government itself, all rest on religion. Its importance can not be stressed too often or emphasized too much. If the bonds of our religious convictions become loosened, the guaranties which have been erected for the protection of life and liberty and all the vast body of rights that lie between are gone. The debt which this country owes to the men and women down through the ages who have been teaching and are teaching to-day the cause of righteousness is beyond all estimation. So long as the great body of our people continue to be inspired by their example, and to be faithful to their precepts, our institutions will remain secure and our civilization will continue in its increase of material and spiritual welfare.

In an address at Fredericksburg, Va., October 19, 1928, dedicating the Fredericksburg and Spotsylvania County Battle Fields Memorial, President Coolidge stated:

* * * This Nation is something vastly more than an expanse of territory. It has reached the high place which it holds in the world largely because of its institutions of government.

These figures, which would be cold and uninteresting in themselves, when we realize that they illustrate the life and development of our country, can not fail to have a deep fascination. But those wonderful records would be of little avail, if they were not accompanied by evidences of the moral power of the Nation. Education is on the increase. Our charities are lavish and world-wide. Our missionary efforts reach in every direction. Our actions in behalf of limitation of naval armaments have been of great benefit to all mankind. Our influence in negotiating the recent treaty in behalf of peace is well known. It raises the greatest barrier against war that was ever created by the art of man. Our progress and prosperity at home, our standing and influence abroad, could never have been secured unless they rested on a solid foundation of demonstrated integrity, high character, and abiding faith.

Such are some of the outlines of the mansion in which dwell the people of the United States. It is "a house not made with hands." Into it have gone the sacrifices and prayers of many generations. While it is by no means complete, it is already the most comfortable habitation which a nation ever enjoyed. Its prevailing atmosphere is marked by progress, peace, and tranquillity. Sectional animosities have disappeared. Industrial conflicts have almost ceased. Her territorial integrity is secure. Her constitutional liberties are protected by the eternal vigilance of her people. Our country is still worthy of those who have made such great sacrifices in its behalf, still determined to improve the opportunities which those sacrifices created, still loyal to the faith of the past, still inspired by the hope of the future.

In an address upon the observance of the tenth anniversary of the armistice, under the auspices of the American Legion November 11, 1928, Washington, D. C., President Coolidge said:

As we contemplate the past 10 years, there is every reason to be encouraged. It has been a period in which human freedom has been greatly extended, in which the right of self-government has come to be more widely recognized. Strong foundations have been laid for the support of these principles. We should by no means be discouraged because practice lags behind principle. We make progress slowly and over a course which can tolerate no open spaces. It is a long distance from a world that walks by force to a world that walks by faith. The United States has been so placed that it could advance with little interruption along the road of freedom and faith.

It is befitting that we should pursue our course without exultation, with due humility, and with due gratitude for the important contributions of the more ancient nations which have helped to make possible our present progress and our future hope. The gravest responsibilities that can come to a people in this world have come to us. We must not fail to meet them in accordance with the requirements of conscience and righteousness.

Addressing the National Grange convention, in Washington November 16, 1928, President Coolidge said:

The last half century has seen many organizations formed in the name of agriculture, usually to relieve some local or national distress. When conditions have improved the organization has disappeared. But the National Grange, having a much broader basis, has continued without interruption a long and useful existence. The main reason for this has been the sound foundation on which it stands. It has not devoted its efforts to the treatment of local and temporary symptoms, but with a wider and more penetrating view it has sought to eradicate causes. It has been interested in securing prosperity, improving living conditions, and encouraging education; but primarily it has stood for the development of the men, women, and children of the farm in intelligence, character, and moral worth. Realizing that these are

the most important products of life in the open country, it has never failed to place upon them its main emphasis.

The great strength of the farm in our national life lies in the farm home. It has been the prime source from which have sprung the ability and the character of the Nation. Those who suggest that the farmer is in danger of being reduced to a state of peasantry entirely disregard the inherent independence and resourcefulness that is bred in life in the open. That spirit does not depend upon the possession of a large amount of property or income or the price of agricultural products. I was born and raised in such surroundings, and on this subject I know whereof I speak. The danger of the development of the peasant spirit in this country lies in our crowded tenements, which shelter the dependent wage earners of our great centers of population. Under present conditions that menace also is disappearing. From that danger our farm population is the most remote.

Addressing the Pan American Conference on Arbitration and Conciliation, December 10, 1928, President Coolidge said:

It is to no ordinary occasion that I am privileged as President of the United States to bid you welcome. There are represented here 20 nations of the Western Hemisphere, who have a common purpose to advance the cause of civilization by substituting the obligation of reason for the coercion of force. It is an effort to raise humanity to a higher level of existence, where nations may dwell together in peace and harmony according to the principles of liberty and equality under the fostering influence of justice and equity. It is impossible to conceive of a more inspiring motive for an international conference. Here is no shadow of past conflict and no thought of future conquest. All is peace, and all thoughts are bent on establishing a better method through which a higher degree of justice may be done each to the other. We must not only maintain the traditional policy established by the founders of our republics, but we must also carry the procedure of conciliation and arbitration to a new and higher sphere. The world has the right to expect that the mission undertaken by the early statesmen of this continent shall be carried to completion. Our history, our national ideals, and the standards of our international intercourse make this a solemn obligation.

[Applause.]

Mr. Chairman, I yield back the balance of my time.

Mr. CLAGUE. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. LAGUARDIA].

The CHAIRMAN (Mr. THATCHER). The gentleman from New York is recognized for 20 minutes.

Mr. LAGUARDIA. Mr. Chairman and gentlemen, with apologies to the House, I will talk on the pending bill. [Laughter.] I want to call the attention of the Members of the House to the report of the Surgeon General of the United States Army. While this report might pass unnoticed and without consideration, yet it contains some rather startling statements bearing on the condition and morale of the Army. On page 4 of the report of the Surgeon General for the year 1928 he states that there were 52 deaths which occurred during the year as the result of suicide. This he simply passes off with the statement that this is higher than it has ever been heretofore in the Army. In 1923 there were 44 deaths in the Army from suicide.

Now, gentlemen, if you stop to consider the population of the Army, 132,901, and consider the care, or the supposed care exercised in recruiting, the medical examination, and while in the Army the proper food, genial surroundings, medical care, and the fact that certainly no soldier is ever overworked in time of peace, it seems to me that the War Department is called upon to explain this exceedingly unsual high rate of suicide.

Now, the rate in the United States for the so-called death area per 100,000 in 1925 was 12.1. In 1927 it was 13. Remember that is per 100,000; and here you have 52, or four times a higher rate per 100,000.

Obviously something is wrong somewhere. Perhaps it is the recruiting service. I never thought very much of the recruiting service, especially in New York City, and I know conditions there. In the cities the recruiting service is enlisting mere boys, just lads of 16 or 17, who by their very appearance indicate their age, and getting them into the Army. Then we have trouble. The parents find it out, and they write to us, and at times the demand is made in time to get them out and at times the parents do not learn about the enlistment until the boy gets in trouble.

The Army is either taking the kind of men who should not be enlisted, or else something is radically wrong in the treatment of the men in the Army, because this fact of four times the average number of suicides in the Army is not satisfactorily explained in the Surgeon General's report. I am not criticizing the Surgeon General's report, but I do demand an explanation from the military command of the Army. The War Department owes Congress some explanation of this startling condition.

Perhaps something may be wrong in the discipline of the Army. The paragraph in the report just before the suicide paragraph is a paragraph on alcoholism, and during the same year there were 1,147 admissions into Army hospitals for alcoholism. If the same ratio should exist in New York, we would have 52,927 cases of alcoholism in our city hospitals. Statistics show we have not even one-tenth of that number of cases. If the same ratio existed in the city of Washington, you would have 4,398 cases of alcoholism. Members know that there are not a fraction of such number of cases. The Army figures, the report makes clear, does not include cases where the patient drank denatured or poisoned alcohol. The 1,147 cases of alcoholism resulting from excessive drinking certainly brings the drinking rate of the Army very high. Just imagine a military post, with its sentinels and its guards and all the military discipline that can be imagined, where complete control prevails over the conduct of each man, where no man can enter the post without a permit, where men are all inspected when they leave and when they return, and still have excessive drinking. Of course, everyone knows that every man in the Army who takes a drink is not a patient in the hospital and enumerated in the report from which I am quoting. It just goes to show that prohibition can not be enforced even at the point of a bayonet.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield there?

Mr. LAGUARDIA. Yes.

Mr. SCHAFER. Is there any relationship between the number of suicides and the great number of excessive drinkers of alcohol?

Mr. LAGUARDIA. No. In these cases the suicides are dead and the 1,147 cases of acute alcoholism are alive. There were seven deaths from alcohol, and those are kept separate from the suicides, so that there is no relation between the two at all.

Mr. KETCHAM. Will the gentleman yield?

Mr. LAGUARDIA. Certainly.

Mr. KETCHAM. Has the gentleman any means of ascertaining whether or not the 1,147 cases to which he refers are separate individuals, or are there some repeaters there?

Mr. LAGUARDIA. I will read the paragraph, because it is very short:

There were 1,147 admissions for the total Army during the year on account of alcoholism.

A man enlists for three years, and it would seem to me that if he were a repeater he would certainly bring himself within the violation of the regulations and be dismissed, so I do not think there could be many repeaters.

That brings me to another question which I want to bring up, and it is that of the 1-year enlistment. I particularly invite the attention of the Committee on Appropriations to this subject. This House has repeatedly expressed itself on that subject. If young men were enlisted for one year they would get the benefit of the training; they would get the physical set-up, and that training and set-up would be an asset to the country. The officers of the Army—or, rather, the General Staff, I will say—has stubbornly and consistently resisted 1-year enlistments. Why? Because if you get a man to enlist for three years, after he learns to drill there is no more work on him. He takes care of himself. It is nothing but laziness on the part of the officers who fight this 1-year enlistment. Under a 1-year enlistment plan there would be drill duty year in and year out; also good for the officers. Men who are enlisted for three years are not generally the energetic, active, and industrious young men who would be attracted to a 1-year enlistment. One-year enlistment would be attractive and it would be interesting for young men willing to take the training and the experience for the short term of one year.

A young man can get all the military training necessary in one year and it would be possible to get the clean-cut type of young Americans. It is hard to get that same type to enlist for three years, and then you get the so-called professional soldier, and the result is seen right here in these two short paragraphs of the Surgeon General's report.

Mr. SOMERS of New York. Will the gentleman yield?

Mr. LAGUARDIA. Certainly.

Mr. SOMERS of New York. Does not the gentleman think the 1-year enlistment system would have a tendency to cut down the ever-increasing number of desertions?

Mr. LAGUARDIA. Absolutely. I want to call the attention of the committee—and they are giving me no attention at all—to the question of desertion. In the bill you provide money for the payment of a reward of $50. The evil of this reward is not as bad in the Army as it is in the Navy. This reward has created a new—I will not say profession, but a new calling—that of enticing young men to desert and then reporting them

back in order to collect the reward. I had a case in New York only a few weeks ago of a young man who was named after a former distinguished Speaker of this House, the Hon. Champ Clark. His name was Champ Clark Rose, a Texas boy. He enlisted in the Navy and eventually found his way to New York. There one of these fellows enticed the boy to desert, got him a job, and after the boy was on the job for the required length of time, the same man turned him back to the Navy and got the reward. That is a disgraceful condition, and it is a condition that has existed a long time—to which the attention of the committee has been called, but the committee will not listen to reason. The committee is simply hypnotized when a general with spurs appears before them. They seem to be absolutely hypnotized, and go ahead and appropriate money for the payment of this reward, which, as I have pointed out, creates a disgraceful condition, and the committee will not listen to reason.

I am going to offer an amendment reducing that reward to $10, and further provide that no police officer is entitled to that reward, because we have occasions where constables and local peace officers work in with these men who entice the boys to desert and then turn them over to the military authorities. The runners get the reward and the boys go to a military prison for six months and then get a dishonorable discharge.

Mr. BLACK of New York. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. BLACK of New York. Does not the gentleman think it would be wiser to limit the amount that any one man could get in any one year?

Mr. LAGUARDIA. Oh, they would get around that easily enough by working in pairs or through dummies. It seems to me those conditions ought to be considered, and that the reward of $50 ought to be reduced to $10 so as not to make it sufficiently lucrative for anyone to establish himself in the business of getting boys to desert and then reporting them back.

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. COCHRAN of Missouri. The gentleman knows, of course, that when a boy deserts, the Army and the Navy immediately notify the police authorities of the city or town where he comes from that he is a deserter, and informs them of the $50 reward, so as to get them busy. In that way they get the man back into the service where he can be court-martialed.

Mr. LAGUARDIA. The gentleman will find that in large centers—and, of course, I am speaking for my own center—just a few men specialize in that kind of work; and I understand that in the last year one man has turned in over 80 cases of deserters to the Navy. So I think the subcommittee should give this proposition careful consideration. After all, committees are only a part of the House, and supposed to reflect the wishes of the House.

I would like to go along with the great Appropriations Committee, because they say the great Appropriations Committee has looked into this, but I do not think the committee is infallible and I do not believe any individual member of that committee is infallible. This matter of the amount paid as a reward for turning back deserters has been called to the attention of the committee almost every year when the bill has been before the House for consideration, but no attention is paid to the matter of reducing the amount.

Now, I hope that the War Department will, in the course of the next few days, inform this House, if it can, as to the cause of this unusually high rate of suicides in the Army, which is four times over the normal in any part of this country. Where you are supposed to have 100,000 men, contented, well clad, well fed, with proper medical care, if the service is anything like it is depicted in the posters; where you have recruiting under high-pressure salesmanship, where you promise these boys that every day in the week will be better than a Sunday on the farm. Some explaining ought to be done.

Mr. KETCHAM. Will the gentleman give a moment's attention to this phase of the matter? I notice what to me, at least, is a rather astonishing statement, to the effect that $800,000 is turned into the Treasury each year accruing from discharge by purchase in the Army. If that rate of compensation is $125 that means that 6,400 of these discharge-by-purchase cases arise every year. Does not the gentleman see some connection between that proposition and the general proposition which he is now discussing?

Mr. LAGUARDIA. I am very glad the gentleman has called my attention to that. You know it is very difficult to explain to a man why it is necessary for him to purchase his discharge. He simply can not understand it. There is a regular graduated scale for that and there are a great many boys who find the Army anything but what they expected.

Most of the discharge-by-purchase cases are where the boy does not get the military service that he expected. He resents doing a lot of menial work. We used to call it, when I was a little boy, "dog robbing." They do not call it dog robbing any more. A dog robber is a soldier that is assigned to be the servant not only of the officer but of the officer's family. I do not know what they call them now.

Mr. TABER. Will the gentleman yield?

Mr. LAGUARDIA. In just a moment. I want to touch on this discharge-by-purchase question.

There is no reason, it seems to me, when a boy has fulfilled the military end of his service, where he is a full-fledged soldier, if he desires his discharge and he can show there are home conditions requiring his presence or that he can better himself, he should not be able to get his honorable discharge after one year. I think we ought to provide for an honorable discharge on request after a minimum of one year's service conditioned on good conduct and good service. Upon application in peace time a soldier, if his record is good, should be able to get his discharge without the necessity of purchasing it.

I yield now to the gentleman from New York.

Mr. TABER. The gentleman has talked about the matter of desertion and the satisfaction of the enlisted men in the Army. I would like to call the attention of the committee and the gentleman to the fact that in the year 1926 we had 7.26 per cent desertions; in 1927, we had 6.07 per cent; and in the fiscal year 1928, ending last July, we had 5.81 per cent, showing a continual, progressive reduction in the desertions from the Army and indicating that the enlisted men are better taken care of and are better satisfied.

Mr. LAGUARDIA. If the gentleman thinks that 5 per cent is anything to brag about, then I will say to the gentleman that it means 5,000 men deserted from the Army in one year, and it is nothing to brag about. Imagine one complete regiment of desertions.

Mr. TABER. But the improvement is very much to brag about.

Mr. LAGUARDIA. Well, yes; the improvement in two years was 1,000 men. The gentleman from New York or anyone on this floor who knows anything about military service or knows anything about military discipline can take the floor and say, "Hurrah; we are great. We have only 5 per cent desertion." Of course, 5 per cent does not sound much, but it means over 5,000 men deserting the Army in one year. I will tell you that it means a very low morale. You can not get away from that. If you had that percentage of desertions in war time, you would have an army corps doing nothing else but shooting men on the firing line. You would not think of a condition like that under war conditions, where the conditions are really bad; you would not have 5,000 desertions out of 100,000 men, and yet the gentleman from New York wants to brag about it. The Army ought to be ashamed of it.

Mr. SCHAFER. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. SCHAFER. The gentleman states the enlisted men are used as servants by officers and their families.

Mr. LAGUARDIA. Yes; as "dog robbers."

Mr. SOMERS of New York. Will the gentleman give the number of enlistments in the last three years that these figures refer to?

Mr. LAGUARDIA. I do not know exactly what the turnover is, but the turnover is very great.

Mr. SOMERS of New York. Ninety-five per cent, or practically all of the desertions, are men who have only been in the service less than a year.

Mr. LAGUARDIA. Yes. You know the reenlistments are of the type of men who can adjust themselves to this kind of life and who can not adjust themselves to our highly competitive industrial life; and I insist that a great deal of this evil would be remedied if the staff would not so stubbornly resist 1-year enlistments, and, as pointed out by the gentleman from Michigan [Mr. KETCHAM], would abolish the discharge by purchase and permit a man who has qualified and who has a good record after one year to be discharged on his own request. [Applause.]

I yield back the remainder of my time, Mr. Chairman.

Mr. COLLINS. Mr. Chairman, I yield to the gentleman from Oklahoma [Mr. SWANK] such time as he may desire.

Mr. SWANK. Mr. Chairman and gentlemen of the committee, many important bills are pending here that should be enacted into law before the adjournment of this Congress. A farm bill that will give relief to the farmers of our country should have been enacted long ago and many of us here have exerted our every effort in that direction. The farm relief bill should be passed before this short session adjourns. Then a more stringent immigration bill should be passed. I supported the present

immigration law, but too many people from foreign countries are coming to the United States. We must look after our own people first. But, Mr. Chairman, nothing is so important to the citizenship of our country as a strict and vigorous enforcement of all our laws.

I have introduced a bill that I believe would make for better enforcement of our prohibition laws if passed by Congress and approved by the President. I believe the law should be strengthened by a minimum fine and term of imprisonment. Oklahoma has one of the best prohibition laws of any State in the Union, and provides that a conviction for a violation of that act shall be punished by a fine of not less than $50 nor more than $500, and by imprisonment for not less than 30 days, nor more than 6 months. Certainty of punishment and imprisonment is what deters the law violator. Under the national prohibition act convictions for the first violation are punishable by a fine of not more than $1,000, or imprisoned not exceeding six months, and for a second or subsequent offense the penalty is by a fine of not less than $200 nor more than $2,000 and by imprisonment not less than one month nor more than five years. Under the act, the first offense can be punished by a fine of $1 and for the second offense by a fine of $200 and one month in prison. A small fine that many times is given violators of this law is only a license to violate it again. Let them know that for the first offense they will have to serve at least 30 days in jail and you will see better enforcement. Then let them know further that for subsequent convictions they will get a longer term in prison. The big bootlegger cares nothing for even the maximum fine of $2,000 under the present law for a second conviction, but he will care something for a good term in the penitentiary. The present law should be strengthened.

My bill provides a penalty of not less than $50 nor more than $10,000 and imprisonment for not less than one month nor more than five years. For a second conviction the bill provides a fine of not less than $50 nor more than $10,000 and imprisonment for not less than 6 months nor more than 10 years. For the third and all subsequent convictions the bill provides a fine of not less than $50 and imprisonment for not less than five years. Under the terms of this bill the violator will know that he will have to go to jail for the first offense. For a second offense he will know that he must go to prison for at least six months, and for the third offense he will have to serve at least five years, and he may be sent up for life if the jury and judge so decide. The only objection I have heard against such a bill is that the penalty is so severe that a jury may not convict, but you need not worry about the jury when the evidence warrants a conviction and is properly presented.

Mr. Chairman, the penalty should be severe. When the habitual violator of this law sees a life sentence staring him in the face he will think many times before he violates the law again. When we were campaigning in Oklahoma for the adoption of our State constitution in 1906, I was active for its adoption with a strong provision for prohibition. The constitution went into effect with statehood November 16, 1907. In all my campaigns I have advocated a stricter enforcement of our prohibition laws. In the Oklahoma City Times of October 5, 1928, is the following statement:

> Violation of the Federal liquor law should be punishable with a six months' jail sentence for the first offense, five years for the second violation, and life imprisonment for the third offense, Congressman F. B. SWANK told an audience at Moore, Tuesday night.

The provisions of my bill provide these penalties.

We hear much talk and see numerous newspaper articles in the public press of this section and in other large cities about the laxity of the enforcement of the prohibition laws. For many years the Christian, law-abiding people of this country have been fighting gallantly to bring about sobriety in this Nation, and that work and the efforts of these good people have been well rewarded, for the country for all time is dry and rid of the open saloon that debauched the youth of our common land for so many years. We can not understand now just why the saloons and all their accompanying misery and evils were ever permitted in this country. No person can point to anything but evil that came from them.

In the old Indian Territory, where I lived to young manhood, there were no saloons. When I moved to Cleveland County, my present home, it was in the days of the open saloon. I well remember those days; and in our fight in Oklahoma for statehood I worked and fought with all my power and might for the cause of prohibition and have always been on that side of the question. I remember when local option was the slogan, but I opposed the saloon then as I do now. They were the curse of the Nation and caused more crime and poverty than all other causes combined. We lived through those conditions, but we do not want the same evil influences thrown in the paths of our children and such temptations encountered by them. The light wine and beer advocates do not ask for the open saloon, but what they really want is heavy wine and high-powered beer with more than one-half of 1 per cent alcohol. There is not going to be any legally manufactured wine and beer sold in the United States, for that would be the entering wedge for the open saloon; and the question of prohibition was settled when the eighteenth amendment to the Constitution of the United States was adopted and the Volstead Act became a law. If there is any modification, it will be to tighten the law instead of weakening it.

The cry of those modificationists who want light wine and beer is personal liberty and lack of enforcement of the law. They do not complain of other laws that interfere with what they call personal liberty. Many laws on our statute books restrain citizens from the course some of them would pursue. When so-called personal liberty interferes with the rights of the masses of our people, it is then that the law steps in and tells them where to stop. So it is with prohibition. A drunk man becomes a nuisance on the streets, in the trains, and in other public places to the discomfort of other citizens. I remember in saloon days that ladies and children could not walk down some of the main streets to do their shopping on account of drunks and their insults. We see no such conditions now. In the city of Washington, during the past eight years that I have had the honor to be a Member of Congress and represent an honest, law-abiding, intelligent constituency, I have not seen a dozen drunk men in this city of some 600,000 people. The reason that I have not seen them on the streets was because they were not there. The antiprohibition talk that there are more drunk men now than before the enactment of the Volstead law is not correct. If there are more, why do we not see them in the Nation's Capital and in other large cities?

If we had the open saloon in this day the manufacture of automobiles would have to be greatly curtailed. They both could not go together. Drunk men are seldom seen in the section where I live. Thousands of young men and women have never seen a drunk person and, thank God, have never seen a saloon.

The law is here to stay since the enactment of our national prohibition laws, and we should now confine ourselves to a strict and vigorous enforcement. They will never be repealed nor weakened, and we must continue our efforts for real enforcement in the name of our children and for the good of our country. No law can be enforced 100 per cent, but the prohibition laws can be enforced like other laws. There are more people that believe in law enforcement than there are of the other kind. They want our prohibition laws enforced strictly. The law can be enforced better than it is now.

The eighteenth amendment was passed by Congress and submitted to the States December 18, 1917, and was adopted in 1919. The Volstead Act, giving force and effect to this amendment was passed by Congress in October, 1919, and became effective with the amendment January 17, 1920. Since the enactment of this law, attention should be called to the effect of the same. Let us examine the cold facts and figures as they speak for themselves. The following table shows the great increase in savings deposits, individual deposits, building and loan associations, and life insurance in the United States since 1921 to and including 1927:

Years	Savings deposits	Individual deposits	Building and loan association assets	Life insurance in force
1921	$16, 500, 663, 000	$34, 232, 612, 000	$2, 890, 764, 621	$45, 983, 400, 333
1926	24, 696, 192, 000	47, 472, 118, 000	6, 334, 103, 807	79, 644, 487, 109
1927	26, 090, 902, 000	49, 060, 021, 000	7, 000, 000, 000	87, 400, 000, 000

Some argue that it costs too much to enforce the prohibition laws and that much revenue could be derived by the manufacture and sale of intoxicating liquor. It costs something to enforce any law, but no one advocates the repeal of other laws on account of the cost of enforcement. When we figure what prohibition has saved the Nation, how it has helped and promoted our excellent system of public schools, and the happiness that it has brought to many a blighted home, the conclusion is that its enforcement is cheap. Mr. Chairman, the results of prohibition can not be valued in shining silver nor yellow gold.

After I retire from Congress March 4, 1929, I shall continue in the future, as in the past, to do everything within my power for upholding our prohibition laws and for their honest and strict enforcement. We are not going to take any backward step and I stand on that question where I have always stood, and that is for prohibition and strict sobriety, privately, personally, and publicly.

Below are some letters and resolutions received concerning our prohibition laws, thanking me for my attitude and work on that subject. I greatly prize and appreciate these letters and resolutions, for they come from people who believe in law enforcement and the betterment of our country:

FIRST METHODIST EPISCOPAL CHURCH,
Oklahoma City, Okla., March 18, 1924.

Hon. F. B. SWANK.

HONORABLE SIR: We the undersigned wish to express our appreciation of your efforts in upholding the eighteenth amendment to the Constitution of the United States of America, and pledge you our support in your efforts to prevent the legalizing of the sale of light wine and beer.

Respectfully,

THE LADIES OF THE FIRST METHODIST EPISCOPAL CHURCH OF OKLOHOMA CITY, A CHURCH NUMBERING 1,700 MEMBERS.
By Mrs. D. D. MCHENRY, *President.*
Mrs. A. C. PARSONS, *Secretary.*

NORMAN, OKLA., *March 18, 1924.*

Congressman F. B. SWANK:

I am writing you to protest against the attempt to license beer as made by the 60 Members of the House of Representatives who on March 4 introduced bills to so amend the Federal prohibition act as to legalize 2.75 per cent beer and to ask you to use your utmost effort against such a bill. You are there to represent us, the citizens of your district, and we know you well enough to believe you would do this even without a request. Nevertheless, as a Christian citizen and president of the Woman's Christian Temperance Union, I can't refrain from protesting against such a movement and to let you know we are with you in trying to retain the eighteenth amendment as it stands. We do not want the return of wine and beer.

Respectfully,

Mrs. A. H. HARLOW,
President Norman Woman's Christian Temperance Union.

OKLAHOMA WOMAN'S CHRISTIAN TEMPERANCE UNION,
Oklahoma City, Okla., March 18, 1924.

Congressman F. B. SWANK,
Washington, D. C.

DEAR MR. SWANK: It is with gratifying rejoicing that I pen this communication to you because I do not have to protest against your attitude—we here know you are dry. But nevertheless we want to say there are thousands back of you in your district who protest against legalizing beer, and we want to cheer you with this dry-force knowledge. God speed the dry forces in our Government and give them victory is our prayer.

Very truly yours,

ALICE M. DAVID.

OKLAHOMA WOMAN'S CHRISTIAN TEMPERANCE UNION,
OFFICE OF PRESIDENT.
Bartlesville, Okla., March 25, 1924.

Hon. F. B. SWANK,
United States Representative, Washington, D. C.

DEAR SIR: The Oklahoma Woman's Christian Temperance Union in executive meeting assembled in Bartlesville, Okla., this 25th day of March, 1924, beg to submit the following resolutions:

"*Resolved,* That we earnestly protest against any modification of the Volstead Act to legalize the sale of wine and beer, and that we urge the Senators and Representatives of our Commonwealth to use their best influence and vote toward the strengthening of the Volstead Act and the eighteenth amendment to the Constitution of the United States."

This resolution is the expression of a membership of 7,000 patriotic, loyal men and women of Oklahoma.

Thanking you for the prohibition victories which you have given us in the past and depending upon you for future victories, we are,

Yours sincerely,

ELIZABETH HOUSE,
Corresponding Secretary.
JOSEPHINE M. BUHL,
President.

THE MINISTERIAL ALLIANCE OF TULSA, OKLA.,
April 8, 1926.

Representative F. B. SWANK,
House of Representatives Office Building,
Washington, D. C.

MY DEAR CONGRESSMAN SWANK: Inclosed find a copy of a resolution passed on last Monday, April 5, at a joint meeting of the white and colored ministerial alliances of the city of Tulsa at which time there were over 75 ministers of greater Tulsa in attendance.

We want you to know that your constituents greatly appreciate your splendid efforts in the past concerning the eighteenth amendment and the Volstead Act.

Very sincerely yours,

GUY C. TETIRICK,
Secretary Ministerial Alliance.

STILLWATER, OKLA., *April 9, 1926.*

Congressman F. B. SWANK,
Washington, D. C.:

Payne County is supporting you in your stand against the wets, and hope there will be no modification of the Volstead Act in their favor.

C. C. SUMAN, *County Attorney.*
L. W. WRIGHT, *County Assessor.*
M. E. BASIL, *County Treasurer.*
JOHN A. SHOW, *Court Clerk.*
CECIL G. JONES, *County Clerk.*
L. H. WOODYARD, *County Judge.*
J. B. CALDERHEAD, *Sheriff.*

EAST CENTRAL STATE TEACHERS' COLLEGE,
Ada, Okla., April 28, 1926.

Hon. F. B. SWANK,
Washington, D. C.

DEAR MR. SWANK: We take pleasure in informing you that the First Christian Church, of Ada, Okla., assembled for worship last Sunday and passed resolutions strongly indorsing your stand on the prohibition question as expressed in your telegram to the State convention of the Oklahoma church a few days ago.

We hereby congratulate you upon your stand and assure you of the cooperation of Christian churches everywhere in your efforts to keep this country free from the evil of intoxicating liquor.

Very respectfully,

A. C. CHANEY, *Chairman of Board.*
M. E. QUALLS, *Clerk of Board.*

ANTI-SALOON LEAGUE OF AMERICA,
OKLAHOMA DEPARTMENT,
Oklahoma City, August 9, 1926.

Hon. F. B. SWANK,
Norman, Okla.

DEAR MR. SWANK: Congratulations! You never missed a cog.

Very cordially yours,

H. T. LAUGHBAUM, *Superintendent.*

NOVEMBER 4, 1926.

Hon. F. B. SWANK,
Norman, Okla.

DEAR MR. SWANK: Congratulations. You never slipped a cog. We had no fear of the results at any time.

With kindest regards and best wishes, I am

Very cordially yours,

H. T. LAUGHBAUM, *Superintendent.*

THE ANTI-SALOON LEAGUE OF AMERICA,
LEGAL DEPARTMENT,
Washington, D. C., November 8, 1926.

Hon. F. B. SWANK, M. C.,
Norman, Okla.

DEAR MR. SWANK: Congratulations on your election. Your splendid public record is ample justification for the confidence which the people have in you.

It is heartening to the friends of the eighteenth amendment to know that for the eighth time under national prohibition the people have by overwhelming majorities in national primaries and elections sustained Senators and Congressmen who stand for the maintenance and enforcement of prohibition.

Anticipating the pleasure of seeing you at the Capital in the near future, I am,

Yours very cordially,

W. B. WHEELER,
General Counsel and Legislative Superintendent.

MARCH 11, 1927.

Hon. F. B. SWANK, M. C.,
Washington, D. C.

DEAR MR. SWANK: At the close of the sixty-ninth session of Congress let me thank you again for your support of the legislation needed to enforce the eighteenth amendment. I am sure that the people of your district who believe in prohibition and its enforcement will approve of your record.

Yours cordially,

W. B. WHEELER.

The CHAIRMAN (Mr. TILSON). The gentleman from Oklahoma asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. COLLINS. Mr. Chairman, I yield 10 minutes to the gentleman from Louisiana [Mr. WILSON].

Mr. WILSON of Louisiana. Mr. Chairman, I request this time in order to get something in the way of information relative to appropriations for rivers and harbors and flood control—information respecting the surveys.

House Document No. 308 and the act of January 21, 1927, authorizes extensive surveys of streams throughout the United States for navigation, water power, and flood control. Then, in the flood control act under section 10, it adds and designates a number of important streams, and authorizes the surveys to be made simultaneously with the prosecution of the flood-control work, and requires that definite reports be made to Congress relative to investigations for flood control, and especially as to what effect upon flood control in the lower Mississippi Valley may be had by the institution of a reservoir system.

I would like to know from members of the committee if appropriations herein authorized supply the funds for those surveys provided for in the flood control act. Fifty million dollars is allotted for rivers and harbors. Is it understood that the department may use a portion of that $50,000,000 to carry on the surveys authorized?

Mr. TABER. They are expected to, and they said that they would be.

Mr. WILSON of Louisiana. I wanted to get that information because the people of the lower Mississippi Valley and especially in Louisiana and Arkansas are vitally interested in the reports to be made simultaneously with the prosecution of the flood-control program.

Mr. BARBOUR. General Jadwin said before the subcommittee that he would do that very thing, and that he would allot the amount necessary.

Mr. WILSON of Louisiana. I thank the gentleman for the information. The citizens in the lower Mississippi Valley as well as those on these tributaries are vitally interested in a full, complete, and definite report as to what effect may be had on flood heights on the main stream by the institution of reservoir systems upon these tributary streams that contribute to the floods in the alluvial valley of the Mississippi River.

During the hearings before the Committee on Flood Control and before the enactment of the flood control law of 1928, it was stated and shown by the reservoir board that reservoirs could be established on the Arkansas and White Rivers that would lower the flood heights at the mouth of the Arkansas River and opposite where the most disastrous crevasse occured about 8 feet. Of course, that would not take care of the floods of two years ago, but in the floods of previous records it would have had an effect that would have made the valley entirely secure in that section, by the use of levees and bank revetment and without the necessity of flood ways.

So in the flood control law it is provided that these surveys shall be made simultaneously with the flood-control works on the main river and a report made to Congress as to what effect on the floods may be had by the installation of reservoir systems. Do I understand that out of the $30,000,000 allotted to flood control a portion of that may be used as a part of the $5,000,000 authorized in section 10 of the flood control act?

Mr. BARBOUR. It will be.

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. WILSON of Louisiana. I will.

Mr. HOWARD of Oklahoma. The gentleman is a member of the Committee on Flood Control. Is it his understanding that after these economic surveys are made that it was to be optional with the chief engineer as to whether or not the proper flood control would be instituted?

Mr. WILSON of Louisiana. At his discretion? No; it was not.

Mr. HOWARD of Oklahoma. It is the gentleman's understanding as a member of the committee that no matter what condition the engineers should find, they were directed to prepare a flood-control project for these rivers?

Mr. WILSON of Louisiana. And to make a report to Congress. Of course, in those reports that are made by the Corps of Engineers they very often, in fact usually, report upon the economic phases of the problem which they survey, and they make a report that something is unworthy of adoption because it is not "economically justified." That is the phrase usually used. I feel that these surveys should be made and all of the facts reported to Congress as to what the project is, whether it be a reservoir system or whether it relates to power or to navigation, and as to what the cost will be, and that as to whether or not it is economically justified, in my humble opinion, should be left to the Congress.

Mr. HOWARD of Oklahoma. It is the gentleman's understanding that they were to report on physical flood-control projects in accordance with section 10 if they complied with that section.

Mr. WILSON of Louisiana. Yes; I think so. I think they should report as to the flood control upon the rivers in the document, and those named in addition, such as the Yazoo, the Red, the St. Francis, and the White, and so forth. One reason why the people in these lower sections of the valley are anxious and determined, so far as they may have the power to do so, to secure definite reports under section 10 is that they feel that under section 1 of the flood control act, when the surveys were provided for the reach between Baton Rouge and Cape Girardeau, Mo., for a statement or report on means of flood control other than levees, that should have been considered; and they feel that that was practically ignored, and now, as full authority is given under section 10 to make that report, it should be made. I am glad to know from the members of the committee that the funds are provided and that we are entitled to get that report.

Mr. WHITTINGTON. Mr. Chairman, will the gentleman yield?

Mr. WILSON of Louisiana. Yes.

Mr. WHITTINGTON. Is it the gentleman's understanding that sufficient funds are provided in the pending bill to complete those surveys, or is it merely the amount the Chief of Engineers thinks he can use in the prosecution of that work during the next fiscal year?

Mr. WILSON of Louisiana. It is my understanding from the answers that out of the $50,000,000 appropriated for rivers and harbors and the $30,000,000 for flood control, the Chief of Engineers takes the position that he can allot whatever is necessary in order to complete those surveys, as required by the act of 1927 and the flood control act.

Mr. TABER. I would not want to be understood as saying that every one of those surveys would be completed in the fiscal year 1930. I would want to be understood as saying that the Chief of Engineers said that there was enough money in there so that he could go as far as his facilities would permit in completing those surveys and those estimates.

Mr. WILSON of Louisiana. And that he felt that he had authority to use the funds as they might be required and necessary for that purpose out of the $50,000,000 and the $30,000,000.

Mr. TABER. Oh, there is no question about that.

Mr. WILSON of Louisiana. Anyway, it is made clear that there is full authority and a specific direction in section 10 of the flood control act for the survey and report authorized by section 1 of the same law wherein it was said that—

> survey shall be made between Baton Rouge, La., and Cape Girardeau, Mo., * * * to ascertain and determine the best method of securing flood relief in addition to levees, of any flood-control works other than levees or revetments undertaken on that portion of the river.

If storage reservoirs on the Arkansas and White Rivers in territory adjacent to the alluvial valley of the Mississippi River can be installed that will lower flood heights, as shown by the report of the reservoir board made by Army engineers, to the extent of 8 feet at Arkansas City in Arkansas and 5 to 6 feet at the head of the Atchafalaya Basin in Louisiana, then this phase of the flood-control problem should have further consideration by the Congress.

The estimated cost would not be as great as the loss and destruction caused by one disastrous flood that might result by a failure to use the reservoir system.

So I am now appealing to the Corps of Engineers and to the Mississippi River Commission to make this complete survey and to give Congress a full and definite report.

This will in no way interfere with the prosecution of the work of flood control now in progress. The levee heights may be raised on the main stream, the bank revetment can proceed, and the construction of the Bonnet Carre Spillway above New Orleans will in no way be affected.

The CHAIRMAN. The time of the gentlmean from Louisiana has expired.

Mr. COLLINS. Mr. Chairman, I yield 20 minutes to the gentleman from Oklahoma [Mr. MCKEOWN].

Mr. MCKEOWN. Mr. Chairman and gentlemen of the House, we resume our duties to-day for the new year, and I want first to wish all of the Members of the House a very pleasant, happy, and prosperous New Year. I am hoping that the Members of this House in taking stock of the legislative program for 1929 will endeavor to solve the problem that has been before Congress for the past four or five years, viz, farm relief. The pending bill carries approximately $400,000,000 for

the support of the Army and it is necessary to have an Army as it is necessary to have a Navy, but it does seem to me as though we are always very liberal with the Army and with the Navy, and very economical when it comes to legislating or making appropriations for the farmers of the country. Days like this are days when we should take stock of the situation in the country generally. We pick up our newspapers in the morning and we see where the stocks in the stock exchange have gone sky-high, where fortunes have been made overnight on these stock exchanges throughout the country. I sometimes wonder whether or not these sums at which the stocks are sold represent the true value of the stocks. Then I look around and see what happens to people generally. Justice is supposed to be blind but she is evidently just blind in one eye. If a bunch of young fellows are caught playing poker or a few negroes caught shooting dice they are haled into court and fined. Yet the great stock gamblers of the country can gamble to their heart's content on the stock exchanges, and not only citizens of mature age indulge in this sort of gambling, but it is spreading out and they are bringing in the high-school boys and girls and inducing them to gamble on stocks. Justice in this country is illustrated by what has happened in our Capital City. A man charged with defrauding his Government out of millions of dollars is acquitted and crowds of wealthy friends meet him at the courthouse to congratulate him on his success. A poor negro woman steals five newspapers and is fined $10 in the courts. The grand jury in session to investigate violations of the liquor law are surprised, if not chagrined, one morning, to find that two of its members had been caught in a neighboring State transporting liquor, and this while serving on this grand jury.

Some very peculiar things happened during the last campaign, and it is painful to me to recall that period. I do not care to make any reference to the issues in that campaign, except to say that I am a little disappointed that our friend Mr. Durant did not offer his reward for the best method of enforcing the prohibition question before the campaign ended. He waited until after the campaign was over before he offered any prizes. I see now that Mr. Hearst is offering a big prize to some one who will tell us the best method of repealing the eighteenth amendment.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. SCHAFER. Does the gentleman think that the recent Democratic candidate, the Governor of New York, Mr. Smith, would qualify for that prize if he submitted the plan he submitted in the wet territory during the campaign?

Mr. McKEOWN. There is a peculiar thing about that election. The wet fellows all say that Smith was defeated for some other reason than the liquor question, and I am sometimes inclined to think so myself, but I have wondered how these fellows would feel about this—if we were to make it a felony to sell whisky in the United States and a felony to buy whisky in the United States, and then let the fellow make his own whisky at home and not give it away. If he was too lazy to make his whisky, he would simply have to do without. I wonder how that would strike both sides of the controversy?

Anyway, what I rose to talk about is this question of farm relief. [Laughter.] I do not want to get away from that subject. I do not know what we are going to do about it, except I may say, speaking for myself, I am going to vote for the best bill at the first opportunity that I get a chance to, whether it is at this session or at a called session. I do not know of any good reason why it should not be passed now at this session instead of at another session. There is a difference of opinion, of course, about that. Some people think if we pass it now we shall not get as much if we would if we waited and passed it at the special session. My idea is to get what we can now and take as much the next time as you can get. The McNary-Haugen bill having been twice vetoed, some people do not believe that it would be the best thing to put that bill through now, but we have all come to the conclusion, I take it, that we are going to abandon the equalization-fee idea.

I have never been very strong for the idea of selling our products in Europe and other foreign countries for less money than we are selling them to our American people. And this applies to the sale of farm products or manufactured products.

One man said to me, "You voted for the equalization fee." I said, "Yes; that was the only thing we had a chance to vote for." I have an idea that if we should set up this board as proposed, and make an appropriation equal to the amount carried in this pending bill, some $400,000,000, the board, when the Department of Agriculture should make its estimate upon any nonperishable crop, wheat, for instance, say in May, and estimated that we are going to make 750,000,000 bushels of wheat in the United States, which is just 100,000,000 bushels more than we are going to consume in the United States, then the board would go out and take that 100,000,000 bushels of wheat off the market out of the first products coming on the market, and with that 100,000,000 bushels removed, you would have nothing to do but to leave the 650,000,000 bushels of wheat take its course in the markets.

If the estimate of the Agricultural Department should be in error and the wheat crop as developed further north in the wheat country would show that we did not have any surplus at all, but had only 650,000,000 bushels, then let the board withdraw this 100,000,000 bushels at a reasonable price to the consumer. That would take care of the situation both for the producer and the consumer.

I am not in favor of making the prices for the farmers so high as to make them prohibitive to the consumer. If the Department of Agriculture should estimate 16,000,000 bales of cotton and the board should decide that we needed for domestic consumption only 14,000,000 bales to supply the demand, then we would take off those 2,000,000 bales surplus, and the balance would take its regular course. In the event the estimate is correct, and there is a surplus left, then it would be the duty of the board before the seeding time for the next crop to notify the producers that we have already a surplus, and that if the producers produce a great surplus and increase their acreage they will have no relief, but must carry some responsibility in this matter.

Mr. KVALE. Mr. Chairman, will the gentleman yield there?

Mr. McKEOWN. Yes.

Mr. KVALE. Does the gentleman think the grain gamblers and speculators in the United States will permit such a bill as that to become a law?

Mr. McKEOWN. Of course, I do not speak for them and I expect to have some opposition from them. The intention is not that we shall put anybody out of legitimate business, because we leave the bulk of the crop to be handled in the customary way. We are not trying to put anybody out of business. We are simply moving the surplus off the market.

Mr. BURTNESS. Mr. Chairman, will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. BURTNESS. Usually we have an exportable surplus of 200,000,000 bushels of wheat, estimating an average year. Assuming that, how would the Government, or this board, as you call it, handle this surplus?

Mr. McKEOWN. I would take the surplus off, as I said at the outset.

Mr. BURTNESS. I understand that.

Mr. McKEOWN. And then if there is a market abroad that would pay us for the wheat, why should we undergo any loss? We will have time and opportunity to hold it. I am opposed to the proposition of taking our wheat and selling it to the American consumer at one price and then dumping it into Europe at a lower price.

Mr. BURTNESS. So that if this board could not get a price abroad sufficient to cover the price they have paid for it, together with the cost of transporting it abroad and paying storage charges, would you keep the grain until the next season?

Mr. McKEOWN. Yes; I would keep it until the next season.

Mr. BURTNESS. And you would have the board announce to the wheat growers that we are holding over 200,000,000 bushels of wheat now, and that therefore the wheat farmers should reduce their acreage?

Mr. McKEOWN. Yes; because if they do not reduce their acreage how can the Government take care of them? They have to do something for themselves as well as have the Government do something.

Mr. BURTNESS. This would be of tremendous value for the first season, but after the first season it could not possibly be of any value unless the production was within the consumption.

Mr. McKEOWN. Well, it would if they did not make too much surplus; but let me tell the gentleman what is the matter: The trouble now is that under the present system we give the American farmer the markets of foreign countries as a standard, whereas I propose to give the American farmer the American market as a standard. What I am trying to do is to give the American farmer the American market as a standard for his crops instead of taking the foreign markets as a standard for the American farmer's products.

Mr. BURTNESS. I think that is what many of us have tried to do. What I was interested in ascertaining and why I asked the question was to find out your plan for taking care of the surplus wheat above domestic requirements.

Mr. McKEOWN. I am just telling the gentleman you can not govern the production of wheat in this country—and the gentleman knows that—unless you can reduce the acreage; and what I want to impress upon the farmers of this country is this fact, that if the Government is willing to put money into

the proposition of helping hold down the surplus and give them a fair price and give them the benefit of the American market, then they ought to be willing to do something on their part in helping hold it down and keep within the American market standard. You can take 160 acres of wheat, and if you have a big crop and there is a big crop all over the whole country, you will get less money on your good crop than you receive when you make a short wheat crop. But that ought not to be so, and that is not according to the law of economics. What you want, of course, is to make a lot of wheat, but what your farmers should learn to do is to intensify cultivation and make more wheat on less acreage rather than to try to crash the whole market. Let me show what the tendency of agriculture is in this country now. We do not have a proper balanced agriculture for this reason: Cotton is so unprofitable that the men in my country who raise cotton are doing something else. What are they doing just as fast as they can? They are going into the dairying business, which will eventually interfere with the dairying business up in the Northwest.

The first thing you know you will have the dairying business all out of balance and overdone. You will have the cotton business a little short and the dairying business long. Then up in the wheat country you will learn some other crop by which you will diversify so that you will augment some other product, which will result in keeping down the whole thing. The truth about it is that one-crop production in the United States has been destructive to every part of the country that follows the one-crop production.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. LAGUARDIA. Of course, if the gentleman could control the amount of production he would solve the whole problem, but after the first year what method would the gentleman employ to curtail the following year's crop?

Mr. McKEOWN. I have had a method here but Congress will never pass it. My method is simply to go out and fix the amount of acreage according to what a farmer has had heretofore. I would fix that as the standard, as the standard of production.

Mr. LAGUARDIA. By law?

Mr. McKEOWN. Yes. But Congress will not do that. They will not agree to that because they are afraid of the reaction, but the farmers of the country really want it.

Mr. BLACK of New York. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. BLACK of New York. I believe the gentleman is one of the most aggressive and intelligent farm-relief fighters in this House and I have a suggestion to make to him. As the gentleman knows, in the big cities the neighborhood store is rapidly going out of business and we are having in its place these great chain stores, and we are beginning to find out that they are short-weighting the people on food products, and I think that if the farm people would take this up with the Secretary of Agriculture and look into this situation they might be able to sell more to the consumers by giving them proper weight.

Mr. McKEOWN. I am glad to have that suggestion from the gentleman.

Mr. KETCHAM. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. KETCHAM. I am very much interested in the gentleman's suggestion but I want to ask his consideration of this phase of it: He said he would retire the first 100,000,000 bushels, provided there were 100,000,000 bushels, from production.

Mr. McKEOWN. Yes.

Mr. KETCHAM. I wonder if the gentleman has given any consideration to the geographical effect of this?

Mr. McKEOWN. Yes. It comes off the south end of it, and that helps you folks up in the North, because by the time it gets up to Michigan it may have gone up tremendously. The fellows in the South would receive a fair and reasonable price and there would be nothing in Michigan to complain about.

Mr. KETCHAM. Exactly, but I am wondering if that proposition would meet with the favor of the good people of Oklahoma?

Mr. McKEOWN. I do not know.

Mr. KETCHAM. I wanted to bring the matter to the gentleman's attention so as to be sure he had given it consideration.

Mr. McKEOWN. Yes; I have given the matter consideration.

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. HOWARD of Oklahoma. I want to say in answer to the gentleman from Michigan and the gentleman from New York, that the plan which the gentleman has suggested from the Oklahoma standpoint would save the consumer's money and save the farmer's money for this reason. Oklahoma is the second winter-wheat State in the Union and when our wheat is harvested, all of it, under existing conditions, must go into the box cars, pay the freight to the primary point, go into storage, pass through two or three brokers' hands and within four months the Oklahoma mills are shipping wheat in there to grind, paying this extra freight both ways, paying these brokerages and charging them to the gentleman's consumers.

Should the Government take that surplus off of the market at the time, it would secure for the Oklahoma farmers a reasonable price for their wheat, save the consumers these brokerage and freight rates; and I would go further than the gentleman, and I would not permit this wheat to be sold out of storage to anybody but a miller who is going to grind it. This would benefit both the farmer and the consumer.

Mr. McKEOWN. Gentlemen, this proposition of taking off the first crop will mean that it will be taken off of the southern end of the production. Of course, in respect of cotton, we would go down to our friend GARNER'S district in Texas and take his cotton first. Of course, if we did not give his people enough we would have a row with him about that, but we would go ahead and take the cotton down there first.

Now, what does this plan do? It does not interfere with the marketing arrangements of this country. It does not interfere with the business men of this country. It simply insures a fair price to the man who produces cotton.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. McKEOWN. Will the gentleman give me a few minutes more? I would like to have about 15 minutes more and then I will not take much more of the time of the committee this session.

Mr. COLLINS. I yield the gentleman 15 additional minutes.

Mr. McKEOWN. Now, this idea has simply occurred to me as being a solution of this question without all these entangling questions that have arisen and without involving the machinery of government. It does not put the Government in business except to take off this amount of production and store the product. It can do this through the cooperative organizations or do it directly.

We are saying that we are going to postpone our consideration of this matter until we take up tariff legislation, so we can help the farmer with the tariff. This is a very interesting thing to me.

There have been some interesting things developed about the tariff situation since the last campaign. As a former statesman from Georgia once said, some of us do not just exactly know "where we are at" on this question; but, anyway, the farmers are anxious to have their legislation and I doubt if the manufacturers are so anxious to have their tariff legislation just now in a few months.

I do not believe the masses of the manufacturers of this country are in any hurry about a tariff revision in this country. I am just taking that view by looking at it from the standpoint of a man who is in the great consuming class. Of course, if I were in the manufacturing class, I might have another idea; but, looking at it from the standpoint of a consumer, I am just wondering what the general run of the great manufacturers of this country have got to expect from a tariff revision.

You know that the business man when he sells an article figures that he is selling it for all it will carry, but some of these tariff rates are carrying all the products will bear and a little bit more.

The man who has that protection now does not want the tariff taken up for the next four years.

The truth of the business is: The tariff is an economic question and we all know it, but we have never been able to keep it out of politics. We get it into politics and the Republicans have always taken the tariff and knocked us clear into the middle of next month because they always get their campaign money out of the tariff proponents. [Laughter and applause.]

The tariff question is an economic one and we all know it. The Tariff Commission ought to be a fact-finding body empowered to make its recommendations to the Congress. There ought not to be a revision of the tariff except every 10 years upon the taking of a census of this country. There should be separate bills allowed and the rules of the House ought to be changed so that when you go to change one rate you can not be flooded with a number of other fellows wanting changes. If there is a meritorious change in the tariff schedule necessary, we ought to be permitted to make it without being hampered with 10 or 15 other amendments piled on to what is meritorious and thus destroy the meritorious proposition.

I am not a free trader. I have never been a free trader. I believe in a sufficient tariff to protect the manufacturers of this country and to protect the wage earner in his wages and

in his standards of living as against the poorly paid laborers of other countries. But I will tell you what I am not in favor of. I am not in favor of a tariff so high that when we give the manufacturers of this country the best market in the world—the American market—then permit him to go into the foreign country and compete with the same labor in the foreign market that we are protecting him against in this country. That is my position about that.

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. HOWARD of Oklahoma. The gentleman will remember that in the recent campaign the Republican candidate for Vice President came to Oklahoma and promised the independent oil producers a tariff on crude oil. Has the gentleman any hope that either the party or the Vice President elect will carry that out for the benefit of the farmers and the independent oil producers of Oklahoma who are suffering by reason of 250,000 to 300,000 barrels of crude oil coming into this highly protective-tariff country free of charge?

Mr. McKEOWN. I will say to my friend that he has the happy faculty of bringing up rather particular situations when a man is talking generally. [Laughter.] I will say that they evidently believed the Vice President elect because they voted that way down there. [Laughter.] I do not know whether they are going to get it or not, but they evidently thought so, because all the ballot boxes where the oil fellows voted showed that they voted pretty straight along a certain line.

Mr. HOWARD of Oklahoma. Is the gentleman willing to demand that he make good his promise to the Oklahoma producers?

Mr. McKEOWN. Oh, I quit demanding a long time ago. I came to Congress demanding things. [Laughter.] I started in here by "demanding" and I found out that you did not get anywhere by demanding things when it came to talking with Congressmen, because they wanted facts and not demands. [Laughter.]

The situation as I see it is this: If we are to have tariff legislation we should confine it to the needs for revision. There are a few schedules I would like to see revised downward, but everybody has an idea that tariff revision means to revise it upward. I do not believe that the great mass of the business men of this country want the tariff tinkered with now. They are getting along pretty well, from all reports, except the textile people up in Massachusetts, and what is the matter with the textile people there is this, that they should have gone years ago down in the South and bought the land and grown their own cotton, just as the tire fellows are going to do with the rubber.

I see that some fellow advocates chain farms—putting everybody on a chain farm. I have a few that I would like to have them put into the chain; perhaps they could make something out of them. I do not make much myself.

My idea is this, and I am serious when I say it, that we should go to work and give the farmers legislation to take care of the 1929 crop. What are you going to say when you go back home? That you wanted to give Mr. Hoover a chance to pass upon the legislation. Well, Mr. Hoover has said that he was going to carry out Mr. Coolidge's policy. At any rate that was the slogan. If you do not want Mr. Coolidge to name the board, you can very easily arrange it by saying that the board herein named shall not be appointed less than 60 nor more than 90 days after the approval of the bill.

Agriculture is on the decline. Whether this country is going to be better off by reason of moving the agricultural population to the big centers I do not know. I see that Mr. Ford is hiring additional men out in Michigan—30,000 of them in Detroit—and he confines his employment to the citizens of Detroit. That is all right. If we had enough Mr. Fords throughout the country, we would not need legislation for the unemployed.

Gentlemen, let me urge you to give some attention now to farm relief. You are going ahead with the appropriation bills, but give some attention to settling this agricultural question. If you are going to have tariff legislation, all right, have it, but let us get farm relief out of the way first. The manufacturers are not in a hurry for tariff revision. They are well taken care of now. There may be here and there a schedule that wants to be improved. Some of you know that when you start in others are coming in and want to have a schedule or two raised. [Applause.]

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. CLAGUE. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. MORTON D. HULL].

Mr. MORTON D. HULL. Mr. Chairman and gentlemen of the committee, I rise to call your attention to an episode that took place last spring, and to address some questions to the Committee on Military Affairs. I refer to the episode, a disturbing episode, that took place in an exchange between the gentleman from Oklahoma [Mr. McCLINTIC] and the gentleman from Massachusetts [Mr. ANDREW], in which it appeared that an employee of the War Department, the Intelligence Department of the Army, one Harold Weeks, had made an affidavit that he had received certain documents which were nonfrankable, under the frank of the gentleman from Oklahoma [Mr. McCLINTIC]. In that incident it also appeared that the question was referred to the Postmaster General, and the Postmaster General found that there had been no violation of the franking privilege.

Now, it is a disturbing thing to me, that any employee of the Intelligence Department of the Army should be guilty of apparently framing up a case against a Member of the House or anybody appearing before any committee in the House. My questions addressed to the members of the Military Committee are these: Have they followed up the incident? Is this man Weeks still in the service of the Government? Did he act under the authority of any superior in what he was doing? Did he report to any superior what he had done, and how was it that this affidavit was referred to a Member of Congress and, apparently, not to the department, so far as we know? I think it is an outrage on the public if any employee of the Government can indulge in that sort of practice—in framing up affidavits on people properly before legislative committees of this Congress—and I think it is a matter which the Committee on Military Affairs should follow up.

Mr. LaGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. MORTON D. HULL. Yes.

Mr. LaGUARDIA. The fact that this man Weeks is a sergeant in the intelligence office would indicate that he acted in pursuance of his military duty and not as a private individual. In any event, if he acted in the course of his duty, then, of course, some responsible superior officer must answer; and if he acted in his individual capacity, then something should be done in the way of disciplining him for the action that he took.

Mr. MORTON D. HULL. The gentleman from New York agrees with my suggestion?

Mr. LaGUARDIA. Fully.

Mr. BARBOUR. Mr. Chairman, I yield 10 minutes to the gentleman from North Dakota [Mr. BURTNESS].

Mr. BURTNESS. Mr. Chairman and gentlemen of the committee, I had not intended to say anything this afternoon, and the occasion for my arising will have to be laid at the door of my good friend from Oklahoma [Mr. McKEOWN], who has given us a very interesting little talk upon farm legislation.

The especial thought that I want to bring to your attention is that I can not, for the life of me, see why this Congress should delay the passage of farm legislation until the next Congress meets, whether the next Congress meets in special session or in regular session. I believe there is no one who has tried to support and did support the so-called McNary-Haugen bill more sincerely than I. I believed in it thoroughly, but I realize that legislation along the lines of the McNary-Haugen bill, including the equalization fee, can not be enacted into law without at least first trying out another proposed remedy, and the remedy which I feel the majority of the country wants tried out by way of experiment and in the hope that it will solve the agricultural problem is that outlined in the speeches made by Mr. Hoover during the campaign and along the lines, generally speaking, of the Republican platform. With that in mind, it does not seem to me that the question as to just what precise form the legislation shall take is such a complex one.

Most intelligent people who have read anything about the subject know at least the general set-up that would be required by way of machinery. The task of drawing the legislation embodying the Hoover ideas would not be particularly difficult.

I was very much interested in the remarks made by the gentleman from Oklahoma [Mr. McKEOWN] to the effect that some agency ought to be able to step in at the beginning of a marketing season—for instance, in the case of such a crop as wheat—and buy up what is termed the "exportable surplus" in the country of such a commodity. It is plain that under the suggestions made by Mr. Hoover the stabilization corporations to which he referred from time to time, which should be helped by the Government, could very well be used by the Farm Board for that very purpose, if the board decides that it would be good policy to do so. This was one of the very purposes outlined. I am entirely willing to follow and thoroughly agree with Mr. McKEOWN to that extent, but I can not follow him when he makes the next suggestion and says that when this exportable surplus is bought up it should be kept in the elevators and not be sold unless it can be used here at home in our domestic con-

sumption, or sold abroad for at least the amount of the purchase price, plus the transportation charges of getting it abroad. That procedure would aggravate the situation. Such surplus must be disposed of each season. It would be a mighty fine thing if somebody could control the actual production on the farms of our country, but that is impossible, and we might as well recognize that it is impossible. The difficulty with his suggestion is that if you have a surplus of 150,000,000 bushels or 200,000,000 bushels of wheat the first year, then, in order for his scheme to work at all, the following season we would have to reduce our entire production not simply down to the consumption needs, but down to the consumption limits less the carry-over surplus, and that would mean that under the figures he suggested we would reduce wheat production down to four or five hundred million bushels, almost down to half the usual crop. Then, in the very next breath our good friend from Oklahoma made the suggestion that they are having difficulties with cotton in his territory, and that the cotton farmers in his country, engaged in an unprofitable business, are switching to dairying, and that soon the dairying business will be overworked, and so forth. Of course, that is the situation, and it is one of the serious evils, and just as soon as a farm board or any other governmental agency would begin to tell the wheat farmers that they must cut their acreage in two, they would naturally switch to these other crops or products, and we would have falling down upon you the very evils to which the gentleman from Oklahoma refers. In our territory they would probably switch to dairying principally and to other lines of the farming industry, such as raising hogs, and if you carry his system out it would just be a case of jumping from the frying pan into the fire. Switching annually from one form of farming to another under Government mandate would not be a solution.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. BURTNESS. Yes.

Mr. McKEOWN. Did the gentleman examine the records to see how often we have had short crops of wheat?

Mr. BURTNESS. Oh, yes. We have never had a short crop of wheat in so far as not more than meeting the consumption needs in the United States is concerned. We have had a short crop of wheat in the sense that our yields have been low and our exportable surplus less, but not in the sense of not meeting the consumption needs of our own country.

Mr. McKEOWN. Is not the same thing true of wheat that is of cotton, that short crops come in just about often enough to offset this surplus?

Mr. BURTNESS. Oh, no; not at all.

Mr. McKEOWN. What becomes of all these surpluses?

Mr. BURTNESS. They are sold abroad. They are sold in the case of wheat in exports of flour and of wheat itself, to the extent, on an average, of practically 200,000,000 bushels a year for the last 12 years. These are round figures given from memory, but fairly represent the general picture.

Mr. WILLIAM E. HULL. Mr. Chairman, will the gentleman yield?

Mr. BURTNESS. Yes.

Mr. WILLIAM E. HULL. Is it true or is it not true that in a 5-year period there is no surplus of wheat?

Mr. BURTNESS. Before answering the question I shall ask the gentleman to define what he means by the word "surplus."

Mr. WILLIAM E. HULL. It is generally suggested in all of these arguments that there is no surplus of any of these commodities in a 5-year straight period. That is, the lean years take care of the fat years. Is that true or not true?

Mr. BURTNESS. I have found that there is a good deal of difference in the application or use of the word "surplus." The people who have made the statement to which the gentleman refers are those who take the position that an exportable surplus—that is, the production above what we consume in the United States—is not really a surplus, because it is really sold to some one and used, in fact needed, for food somewhere in the world. If that is the sense in which the gentleman uses the world "surplus," then, of course, the answer would be entirely different from what my answer would be to the question as to whether we have an exportable surplus, a surplus above the needs of the people of the United States.

Mr. WILLIAM E. HULL. When the gentleman speaks of surplus, does he mean that we raise just a surplus of wheat over what we consume in the United States or a surplus of wheat over what we sell, no matter whether it is exported or not?

Mr. BURTNESS. I have not used the word "surplus" here this afternoon standing by itself. If the gentleman has followed my remarks he will have noted that I have always spoken of an "exportable surplus," meaning simply the production in excess of our own consumption needs. I believe those words are definite and used in accordance with the understanding thereof in this House.

Mr. WILLIAM E. HULL. I am not trying to dispute the gentleman's statement. I am trying to find out something for the benefit of the Members of the House and myself, whether there is a surplus of wheat.

Mr. BURTNESS. On the average there is a surplus above consumption needs of 200,000,000, whether you take the average for the last 5 years or 10 years. That amount has had to be exported and sold abroad, either in the form of wheat unground or in the form of American wheat converted into flour. Sometimes it is over 200,000,000, and sometimes less, but always a surplus.

Mr. STRONG of Kansas. Mr. Chairman, will the gentleman yield there?

Mr. BURTNESS. Yes.

Mr. STRONG of Kansas. Unfortunately under our system of marketing the American wheat sold outside of our boundaries sets our price at home and bears down the price here at home, so that it does not bring in a fair return to our producers?

Mr. BURTNESS. That is unfortunately the case, the price abroad is the principal factor, but I would not say the sole factor in determining our price.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield?

Mr. BURTNESS. Certainly.

Mr. WAINWRIGHT. Does not the gentleman think that after all the debate we have had in this Congress on the question of farm relief and the various bills pending before the Congress we have sufficient knowledge of the subject, so that Congress is just as competent now to pass a satisfactory bill as a new Congress would be?

Mr. BURTNESS. Yes. That is my attitude precisely. There is also no great changes to take place in the next Congress. The same general organization will be in control and the membership not much different.

I wanted to ask my friend from Oklahoma, Mr. McKEOWN, during his remarks the question as to when wheat starts moving in Oklahoma. I did not have opportunity to ask him before his time expired, but if I had asked him that question he would probably have told me that it starts to move about the middle of June. Is that correct? I will ask the gentleman from Oklahoma now.

Mr. McKEOWN. Yes; about the 15th of June.

Mr. BURTNESS. Yes. In the State of Kansas, too, it starts moving in June, in some parts, and in the rest of Kansas it starts moving in July. I may say that new wheat moves into the markets from June clear to the end of the threshing season throughout the wheat territory, and threshing operations continue up in northwestern Canada through October and even into November some years. Most of the spring-wheat threshing in the Northwest is done in August and September.

Now, what is the situation if we postpone farm-relief legislation until the next Congress? Oh, some people say that a bill can be passed in four weeks' time or so. Most of us know that unless farm-relief legislation is passed before the 4th of March we will not see it written on the statute books until next June or July. One of the most important functions of the Chief Executive after enactment of the legislation will be to select the farm board. It should not be selected in a hurry. The best thought and consideration must be given to the selection of that board. Then, after its appointment and qualification, you know how long it takes for a board to organize or for any establishment having to do with the Federal Government to get going with the great amount of red tape involved. In this particular matter much more than mere red tape will be involved, because the board will have to analyze the entire crop and marketing situation and determine upon the policies to be carried out during that particular crop season. In my judgment the postponement of farm legislation until the next Congress means practically that you might as well not attempt to pass any farm-relief legislation until after the producing season of 1929.

I know that when I make this statement I differ in my views from those entertained by most of the representation from the general Northwest, for I understand the sentiment of many Members of Congress from the Northwest is that we ought to wait until the next Congress.

I know, too, that the leaders of many of the farm organizations have assumed that same position. But when they have done so, I can not believe that they have had a full understanding of the slow methods involved in passing legislation and the unlooked-for delays always encountered, and they do not realize the length of time required by such a board to organize and agree upon its policies as to the next season's crop. I feel they have jumped at conclusions rather than

thought the matter through, especially in so far as its effect upon the 1929 crops is concerned.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. BURTNESS. Yes.

Mr. McKEOWN. Has the gentleman any idea how large the loss will be to the 1929 crop if we do not take care of it?

Mr. BURTNESS. I do not know just what this proposed legislation will add to the price of wheat or any other commodity, but let us assume that it will add only 10 cents a bushel for illustration. Under a normal crop in 1929 the loss of the season would mean a loss of $80,000,000 on that crop alone under a conservative estimate. Other illustrations, doubtless, come to the minds of all of you.

I was interested in the suggestion made by the gentleman from Oklahoma [Mr. McKEOWN] with reference to the appointment of the board. Our people generally believe that the man who should be as directly responsible as possible for the success of the board that is going to be appointed under farm-relief legislation, if enacted, is the man who becomes Chief Executive of the United States after March 4—Mr. Hoover. They desire that he appoint the board, but I do not think that the fact that he should be responsible for the work of the board and that he should appoint it is any reason for our delaying the enactment of farm-relief legislation until the next Congress. I, for one, do not believe that President Coolidge would appoint the board, even if the legislation is passed a few days prior to March 4. President Coolidge knows and realizes as well as any of us that the campaign was made by Mr. Hoover on the specific promise of himself and his party that the question of farm legislation is one that must be solved, and in that campaign Mr. Hoover pledged his best efforts to the solving of that problem. Naturally President Coolidge would under such circumstances hesitate to appoint a board which could not possibly go to work until after the beginning of the Hoover administration. I firmly believe he would leave the selections to his successor, with whom he has always cooperated and whom he honored not only by his support in the campaign but by appointment to his own Cabinet.

Mr. WILLIAMS of Illinois. Will the gentleman yield?

Mr. BURTNESS. Yes; certainly.

Mr. WILLIAMS of Illinois. If the next administration has the responsibility of solving the farm problem, why not permit the next administration to have something to say about framing the law? The gentleman well knows that Mr. Hoover, if he were here in Washington, could not take up with Members of Congress or the Committee on Agriculture the question of farm relief.

Mr. BURTNESS. I do not just concede that. Mr. Hoover took up with the entire country during the campaign the question of farm relief legislation.

Mr. WILLIAMS of Illinois. He did that as a candidate.

Mr. BURTNESS. And he made his views pretty well known. I believe the members of the Committee on Agriculture, capable men as they are, know very well what those views are, and I do not know that it would be particularly unseemly for one or two of their emissaries, if they thought they needed it, to ascertain them a little more in detail. Mr. Hoover has always dealt frankly with the public, and I do not believe representatives of the Agricultural Committee would find him particularly skittish about the problem, if they desire to consult him when he arrives in the continental United States. I agree that his views should be embodied in the legislation to be passed. But remember that there has not been any great issue or any great difference in views as to the type of legislation that would be signed by Mr. Hoover or by President Coolidge.

Mr. WILLIAMS of Illinois. Mr. Hoover, in his campaign, outlined a definite and concrete program for agriculture.

Mr. BURTNESS. I am glad to hear the gentleman say that, and I agree with him.

Mr. WILLIAMS of Illinois. He was a candidate and the farmers of the country voted for him. They believed in him, and they believe in him now, and I think there is an almost universal sentiment among the farmers, at least of the Mississippi Valley, that this matter ought to go over until Mr. Hoover is in a position where he can, with propriety, discuss this matter with Members of the House and Senate responsible for the legislation.

Mr. BURTNESS. The gentleman may be entirely right as to the sentiment in that regard. If that sentiment does exist, all I can say is that I must differ with the conclusion reached. There is another proposition upon which I agree with the gentleman, namely, that throughout the campaign the proposition outlined by Mr. Hoover was "a definite and concrete program for agriculture," and knowing that fact that is the very reason why I say it would not be any task for the committee of which the gentleman is an able member to convert those ideas and that program into a piece of workable legislation, and I want to go further than that. I want to say this: That in so far as the first piece of legislation is concerned, the exact form or nature of that legislation is not half as important as the selection of a proper kind of board to administer it, and I am convinced that the farmers of this country will be entirely satisfied with the kind of board Mr. Hoover will select to carry on the work when that time comes, even if we should pass the legislation at this session of Congress. The experience of the board will doubtless show needed changes in the legislation in any event and later we will need their advice. If we pass the first legislation before March 4 and Mr. Hoover appoints the board, say, before the 1st of April or the 15th of April, and the farmers find that the board can then go to work, organize, establish policies, and operate on this season's crop, they will be more than satisfied. On the other hand, if this Congress follows the advice and suggestion of those who contend that all these matters should be left to a special session and then the farmers find we will be working here for weeks and months, perhaps, before we can write the bill into law, and find that there must be still further delay in the appointment of the board and that the board can not agree upon its policies, or can not organize and get into operation until next September, October, or November, then I think the criticism on the part of the farmers will be directed not at those of us who feel that such legislation should be passed at the earliest possible moment but at those who throughout the last few weeks have been urging delay in the adoption of legislation on this very important subject. [Applause.]

Mr. COLE of Iowa. Will the gentleman yield?

Mr. BURTNESS. Yes.

Mr. COLE of Iowa. I have been one of those who favored delaying this, but, as a matter of fact, is it not true that Mr. Hoover as a candidate contemplated the passage of this legislation in the short session when he said he would call a special session if this session of Congress did not pass this law?

Mr. BURTNESS. There can not be any other contruction, in my opinion.

Mr. COLE of Iowa. He not only contemplated that but he rather hoped that this session of Congress would pass it and the statement he made was to this effect: That if this session did not pass it then, and only then, would he call a special session of Congress.

Mr. BURTNESS. I agree thoroughly with the gentleman. I believe the gentleman from Iowa was also present at a conference with Mr. Hoover, in which quite a number of Members of this House participated, and at which Mr. Hoover also rather expressed the hope that this Congress would be able to take care of the agricultural problem in so far as passing the required legislation for general farm legislation was concerned.

Mr. COLE of Iowa. I think that is a correct statement.

Mr. BURTNESS. I am glad your recollection of the instance conforms with my own.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. CLAGUE. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. LOZIER. Will the gentleman yield?

Mr. BURTNESS. Yes.

Mr. LOZIER. Is it not a fact, recognized by every man informed as to conditions, that the only farm bill President Coolidge would sign is a bill which involves the formula contained in the Fess or Curtis bill, which the gentleman who is now addressing the House opposed and which the farm organizations in America have denounced as a counterfeit farm-relief measure?

Mr. BURTNESS. No; I do not say that that is correct. I do not think that is the only kind of bill President Coolidge would sign at all. On the other hand, I believe he would sign a measure in conformity with the views expressed by Mr. Hoover in his campaign speeches.

Mr. LOZIER. Is it not true that the so-called McNary bill recently introduced in the Senate is the McNary-Haugen bill emasculated of the equalization fee, and is not that the same bill that the gentleman and practically every other representative of a great farming district in America have denounced as a counterfeit farm relief bill for the last three or four years?

Mr. BURTNESS. I do not want to answer the gentleman's question yes or no, but I will answer it fairly. Substantially, the present McNary bill is the old McNary-Haugen bill with the equalization-fee principle taken out of it.

I believe I have already made the statement that those of us who believe that this problem can only be solved eventually by legislation along the equalization-fee principle of the McNary-Haugen type must realize that the first experiment that will be conducted in farm legislation is along this other line without the equalization fee; and to those who believe in the

equalization fee I want to emphasize this statement. The quickest way in which to get equalization-fee legislation, if it should be found that nothing else works, is to pass the other legislation first and give it a fair trial. If upon a fair trial it is found not to do the business, then you and I and anyone else who entertains the view that this problem can best be solved through such legislation as the McNary-Haugen bill with an equalization fee will be able to come in with a stronger case than we have ever had before, and I believe if that time comes both the President and the American Congress will be willing to listen to the plea. But up until that time, let us be fair with the other proposal, let us not put any stone in its way, let us give it a chance to operate; and I think we will all hope, when the legislation is passed, that it will be able to do the business and solve the problems that are involved. [Applause.]

Mr. LOZIER. Will the gentleman yield again?

Mr. BURTNESS. Yes; but I want to reach another point.

Mr. LOZIER. The gentleman did not make that argument when these legislative proposals were pending in the Congress one, two, and three years ago, but the gentleman insisted that they were counterfeits and inefficient formulas and would not work. Now, I will ask the gentleman a question——

Mr. BURTNESS. I was here pleading for the kind of legislation which I thought was best, which I still think is best, and in the hope at that time we would be able to write it into law, but, apparently unlike the gentleman, I recognize a practical situation when I see it. I do not feel that I am blind. I know equalization-fee legislation can not be written into law before March 4. I know it can not be written into law in the next Congress, so let us not be dogs in the manger and stand in the way. Let us pass the very best kind of legislation we can possibly get at the earliest possible moment. [Applause.]

Mr. LOZIER. Is it not a fact that if the so-called McNary bill, which is the McNary-Haugen bill emasculated by the removal of the equalization fee, is a sound and workable formula now, was it not a sound and workable formula before the election when the gentleman was opposing it?

Mr. BURTNESS. The answer is so obvious that the question does not need any reply.

The gentleman from Oklahoma [Mr. McKEOWN] made the same suggestion on the floor here this afternoon that I made in a statement which I gave out to one of the newspapers in the Northwest on December 3, the opening day of this session, namely, that if we want to insure by legislation the appointment of the board by the President elect rather than by the present President, we can very easily accomplish that by writing into the bill a provision that is not unusual in legislation, a provision that the law shall go into effect on some certain date, some such date as March 15 or April 1.

I have mentioned this to many Members of the House from time to time in conversations in the cloakroom and elsewhere, and a few have suggested that such a provision might seem like an affront to President Coolidge. I would not so regard it. As already indicated, it is a rather usual provision to put in legislation, but let me make this statement with respect thereto. It would be much less of an affront to write that provision into a bill than it will be for this Congress to sit idly by for three months and pay absolutely no attention whatsoever to the provisions he wrote into his message asking our earnest consideration for farm legislation and which was delivered to us at the opening of this session. [Applause.]

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. McDUFFIE. Mr. Chairman, I yield five minutes to the gentleman from Arkansas [Mr. WINGO].

Mr. WINGO. Mr. Chairman, I realize that whenever a Democrat has the temerity to offer any suggestion in this confusion of counsel among our Republican brethren upon the farm question, he runs the danger of suffering the proverbial fate of the innocent bystander, but it would not be amiss possibly for a Democrat to kind of soliloquize aloud as to the situation.

I find myself somewhat surprised. I do not know whether it is a sign I am no longer a boy, but somehow I have reached that point where I like to look back a little bit and think about what has been, and when I look back just a few months I can remember how every mother's son of you Republicans was clinging onto Calvin Coolidge's coat tail, and even Herbert Hoover was saying, "If you will just elect me President of the United States, I will carry out Coolidge's policies." And lo and behold, Mr. Chairman, how the times have changed.

We find gentlemen upon the Republican side to-day who say they can not trust Calvin Coolidge to appoint a farm board. No; you will not trust him. You say he is not the friend of the farmer. You insist that you must wait until the new leader comes in and so do the farm-leader politicians and then we will let him come and tell us what kind of bill he wants and let him appoint his board and let him do the work.

There may be a streak of contrariness in my make-up, Mr. Chairman, but somehow I find myself always with the under dog, or with the fellow who is slipping, and now as Cal goes out, his appointing power being about exhausted, I find myself resenting these imputations of some of my Republican friends that they can not trust Cal to be the friend of the farmer. You have stood by him until the last piece of pie has been distributed, and now you desert him. I protest against this wanton abandonment of the leader you followed in the heyday of his power and pie.

Why, have you not told us for years that he was a real friend of the farmer; haven't you promised to carry out his policies in the platform utterances, and your speeches on the stump? Why must the farmer wait; why will you keep your promise to his ear and break it to his hope?

Mr. Hoover is coming to town. Go down and ask him what his plan is. Then, when you have got it, have the Agricultural Committee bring it out and pass it, and let the farmer have the relief you have promised for eight years. Why defer it any longer? [Applause.]

Mr. CLAGUE. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. ADKINS].

Mr. ADKINS. Mr. Chairman and gentleman, it would seem that the farm problem has been so much discussed that the subject ought to be exhausted.

I have been greatly interested and amused at some of our newspapers and a great many men who have persistently and insistently opposed the program brought here by the farmers for farm relief at their undue haste and anxiety to pass farm relief now at the short session of Congress. That about all we have to do is to write the law on the statute books, touch the button, and away it goes.

First of all, there does not seem to be much of an issue now that there is a farm problem to solve. Everybody seems to agree that there is not much of an issue, that the surplus is the cause of the farmers' plight. Everybody admits that it is the surplus that causes the trouble. Everybody seems to admit also that it will be necessary to have a Federal farm board to administer the distribution of the surplus in times of necessity. Everybody seems to have agreed to that.

Everybody seems to agree that you can not start this without a large Federal loan. Up to that point there does not seem to be any material issue in the farm-relief problem.

There does seem to be an issue as to how the losses must be taken care of in the operation of the machinery to take care of the surplus.

Any man that has studied the agricultural conditions for the last 25 years knows that they have not been able to organize a corporation or a commodity association that is nation-wide that has been able to succeed against competitive business.

No people have yet been able to demonstrate over a period of years that so large a commodity organization can survive, especially if it encounters losses during the first year or two of its existence.

Denmark tried this out and failed. The Danish Farmers' Cooperative Potato Association organized a nation-wide marketing organization in 1919. You will find an account of this in Department Bulletin of the Department of Agriculture No. 1266 and issued in August of 1924. It says that contrary to the common Danish method, this new potato association set up the central machinery and then began to build the locals. With an enormous organization force and the advantages of a favorable foreign market demand, the association closed the first year's business with export sales amounting to $8,283,000 at exchange, and its membership totaled 350 local associations with 25,000 producers. Enormous losses incurred in export trade, together with the market depression in 1920, wrecked the association in its second year's operation. Its failure is attributed to inefficient management and a mushroom-like growth during an inflation period.

In the same bulletin you will find on page 25 the experience of a nation-wide agency known as the Danish Cooperative Butter Export Association, organized in 1889. Approximately 90 per cent of the milk production in the country was assembled and manufactured into finished food products in the cooperative creameries. Yet this organization went along until 1908, when it was forced to discontinue, and they have since organized, according to this authority, 11 separate export associations.

Denmark with all her experience in cooperation was unable to make so large a nation-wide corporation survive, and in that little country where the volume of business would be nothing to compare with such an organization that would necessarily have to be created in this country to handle such a business.

In providing the means of stabilizing and getting on its feet the so-called stabilization corporation that seems to be recommended by all is the perplexing problem to be solved by the next administration. The present administration does not seem to have anything to offer on that all-important question.

Mr. Hoover's experience as food administrator handling the volume that was necessary for him to supervise and his ability and capacity to handle and solve big problems, I think appeals to the farmers in such a way that they perhaps have more confidence in him to work this problem out or to suggest some scheme to maintain this great corporation until our whole marketing machinery can be adjusted in such a way that the institution can stand on its own feet. Whatever program is worked out, if it survives a few years and is sound, it will be able to take care of itself. If some means is not provided to meet the contingencies previously referred to, I do not think the farmers would be interested in it; and I think they have confidence, for the reason already stated, that Mr. Hoover will have something at least very interesting to suggest to meet this situation.

Twenty-five years ago, when the local cooperatives started, if they had not provided an equalization fee, or what we called a "penalty clause" at that time, I do not think many of them could have met the competition they had to meet and survive. After a few years the necessity for such a fee had passed away.

I do not think there is any question but that the farmers in the great surplus-producing sections of our country and who would be most vitally affected by such legislation are not looking to this Congress to pass such legislation, but are looking to the incoming Congress to pass such legislation that will solve their problems.

Now I have read the two messages of the President, vetoing the McNary-Haugen bills, and the equalization fee was not the only thing he criticized. I have not compared the other bill but it is suggested that it is the McNary-Haugen bill with the equalization fee left out. What are you going to do with the other provisions that the President criticizes? The President in his messages has not pointed out a single thing that would cause this revolving fund to revolve, if he could put it in operation, or what inducements there would be for farmers to organize this stabilization corporation and borrow this money and take over for example the surplus of the coming wheat crop if it should be one hundred and fifty or two hundred million bushels. If there are no means provided to take care of a loss should it occur, and it very likely would, it is not likely that such a scheme would be seriously attempted if the corporation or the individual farmer was made in any way liable for the loan made to them, and if there was a large world supply of wheat and a falling world market there would no doubt be losses to be taken care of, either by the corporation or its stockholders, or taken care of by the Government. To be sure if there was a world shortage of wheat and a rising world market the surplus would be disposed of at a profit and everybody would be happy, but when the price is such that the farmer produces this at a loss and the stabilization corporation takes a hold of it, losses, it would seem to me, would be inevitable.

In the last campaign we made much of Mr. Hoover's great organizing ability and his ability to handle large problems. During his administration as food administrator he handled a very large business and he handled it in a way that I have not heard anybody criticize. People look to him to have something to suggest to take care of this proposition, to take care of the loans for the first few years at least, because no one who has had anything to do with cooperation for 25 years past believes that this corporation that you are providing for under the supervision of this board is going to be able to withstand the competition they will have to meet in this country and live unless some provision is made to take care of it the first few years of its life. Mr. Hoover, I think, in the campaign went as far as a man should go in making his statements about this program of our taking care of this. The farmers of the country who have been taking an interest in this matter know the present President has made no suggestion as to how these loans shall be taken care of during the first few years of the life of these stabilization corporations. They believe that Mr. Hoover will have something to suggest that will be of advantage to Congress as to how this stabilization fund is to be maintained.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. ADKINS. Yes.

Mr. McKEOWN. Would it not be far better to set up the organization here and start it out, and then take advantage of Mr. Hoover's wide experience to see how it operates. Would he not know better where the weaknesses are in such a case so that we might take care of them in the next session of Congress?

Mr. ADKINS. No; and I will tell you why. First of all, we have all talked as if this board is the whole show. Neither the President of the United States nor the incoming President believes that it is good policy to put the Government into business.

The talk has been as if this board is going to dispose of this surplus. This board is not going to do that. First of all, after this board has been provided for, you get ready to get your law into operation, you have got to get your cooperatives or your farmers or somebody to organize your stabilization corporations and get that ready to go into the business of taking over the surplus. For instance, if you are going to take care of the surplus wheat this coming crop, which you gentlemen all seem so exercised about, you do not wait for the board that is to be appointed by Mr. Hoover when he becomes President. I see that somebody gave out the statement that it would take six months for this to get going, but if Mr. Coolidge is to appoint the board, it will not be able to operate for this wheat crop if you pass the bill now.

You have this stabilization corporation to organize. We do not need to kid ourselves. The men who are most interested in this legislation are sold on the idea that the President of the United States is not particularly in sympathy with their scheme to raise the price of wheat, for instance, at the next harvest. A large per cent of them are also sold on the idea that a bill that would pass through this Congress and be permitted to become a law would not mean much to them. It is the psychology of the proposition that is bad. I don't know of a single cooperative organization in my part of the country that would even start to organize under this program. They would say, "I am not going to take hold of this if my company is made liable for this loan, or the farmers individually, we will not touch it." This is all an experiment. We do not know whether these beautiful theories that we have been outlining are going to work out in actual business practice. We have a marketing system that has been built up during almost a century of our economic development years, and it is the most efficient in the world. We get our commodities now from our fields to the processor, or the consumer, more cheaply than any other nation in the world.

You propose stepping in now in competition with that system which has been built up by the shrewdest minds in the world, and the theory that we have been touting here of stabilizing the violent up-and-down movements in the market giving the farmer the benefit of the domestic market plus the tariff, when put into actual operation may not work. I submit to the candid judgment of any man here whether in undertaking so gigantic an economic proposition we should not undertake it under the most favorable conditions possible for the psychological effect it will have on the country.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. CLAGUE. Mr. Chairman, I yield the gentleman five minutes more.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. ADKINS. Yes.

Mr. McKEOWN. The gentleman recalls the fact that at one time here in this House we who were favoring this bill——

Mr. ADKINS. Oh, I wish the gentleman would ask a question and not make a speech.

Mr. McKEOWN. We were told not to offer an amendment or to vote for a single amendment on this bill as it came from the Senate in order to pass it in a hurry. Why has the gentleman changed so much about being in a hurry now to pass this legislation?

Mr. ADKINS. How is that, how is that?

Mr. McKEOWN. We had instructions from the leaders on this farm bill when it came from the Senate not to vote for a single amendment, not to change the dotting of an "i" or the crossing of a "t," in order that the bill might become a law, and we followed those instructions. Why not be in as great a hurry now as then?

Mr. ADKINS. Because it will not do the business.

Mr. McKEOWN. But the other bill would not do the business, either.

Mr. LaGUARDIA. Does the gentleman take the stand that the initiative for such legislation must come from the Chief Executive, and that Congress must await the plan in detail of the incoming President?

Mr. ADKINS. No.

Mr. LaGUARDIA. I have understood the gentleman to argue that way.

Mr. ADKINS. In the last campaign out in our part of the country this was the principal issue that we presented to the farm people. As I said a moment ago, we continually held up the picture of Mr. Hoover's great economic ability, his ability to solve these problems. We pointed out the fact that he never has tackled a big problem which he has not made a success of, and while this is a gigantic problem, yet we think from the experience that he has had with it that he has the initiative and ability to suggest something.

Mr. LAGUARDIA. And the gentleman suggests waiting for that?

Mr. ADKINS. Certainly. We have got to have the cooperation of the farmers, of the legislative body, and of the Executive to work out this program.

Now, nobody has suggested, as I said a while ago, how we are going to maintain this revolving fund. I take it that Mr. Hoover is going to have something very interesting to suggest along that line. He knows the experience of other countries in attacking a proposition of that kind. If they did not have some means of taking care of the losses, the outfit went out of business.

Mr. LOZIER. Mr. Chairman, will the gentleman yield?

Mr. ADKINS. Yes.

Mr. LOZIER. Is it not true that this fund can only be kept intact by accretions from two sources, one from the commodity growers and the other by subsidies from the United States Treasury?

Mr. ADKINS. There are three ways in which the next wheat crop can be handled. The only way it would maintain itself would be for some world condition to arise in which we would have a rising world market. Then this stabilization corporation would feed this surplus on the market at a profit and everybody would be happy. It is only when the world's markets are likely to be low that they would, perhaps, be operating. Now, the losses incident to put this surplus on the world's market would be borne either by the stabilization corporation or the stockholders or the Government.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield?

Mr. ADKINS. Certainly.

Mr. BANKHEAD. Does the gentleman know, or does he know of anyone who does know, what Mr. Hoover has in mind to recommend in respect to farm relief?

Mr. ADKINS. I will answer that by saying this: It was asserted during the campaign that Mr. Hoover said if the present Congress did not pass a law that he would call a special session. I do not think any fair-minded man would have expected him to have said anything else, and I do not think any man in this House would think that it would be proper even to suggest to the President elect to make a recommendation to this Congress on any subject. I do not think that a man who would be honest with him or with himself would think that that would be a proper thing to do. [Applause.]

Now, if this so-called equalization fee is unconstitutional and surplus control is to be put into operation to meet this situation, some other plan must be worked out. If Mr. Hoover has that plan it will be very interesting and very helpful to know what it is.

This idea of surplus control to be handled by the farmers themselves is a very difficult problem. The farm leaders and Congress have made two suggestions as to how it should be done, both of which have been rejected. Whatever we try will be an experiment, and I believe that experiment should be tried under the most favorable conditions possible—conditions that will inspire confidence in the farmers in making the trial and the cooperation between them and the administration in trying to solve this problem, not only in the interest of the producers but the consumers as well. It is thought by many that a plan of this kind will ultimately work out to the advantage of both. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. BARBOUR. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TILSON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 15712) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1930, and for other purposes, had come to no resolution thereon

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. PATTERSON (at the request of Mr. ALMON), for an indefinite period, on account of illness;

To Mr. ROMJUE, for the balance of the week, on account of the illness of his wife; and

To Mr. WINTER, until January 14, 1929.

ENROLLED BILL SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 10093. An act for the relief of Ferdinand Young, alias James Williams.

ORDER OF BUSINESS

Mr. SNELL. Mr. Speaker, I desire to make an announcement. There are two resolutions on the calendar from the Committee on Rules, proposing changes in the rules of the House. One changes the jurisdiction of the Committee on the Judiciary, referring all constitutional amendments to the Committee on the Judiciary; and another one is relative to a matter that has been discussed considerably on the floor of the House, that where a bill proposes an amendment to certain laws at least the part to be amended shall be printed together with the new text. We expect to call these up in the next few days. I thought I would notify the Members accordingly.

ADJOURNMENT

Mr. BARBOUR. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 35 minutes p. m.) the House adjourned until to-morrow, Friday, January 4, 1929, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for January 4, 1929, as reported to the floor leader by clerks of the several committees:

APPROPRIATIONS COMMITTEE

(10 a. m.)

Independent offices appropriation bill.

(10.30 a. m.)

District of Columbia appropriation bill.

(11 a. m.)

First deficiency appropriation bill.

COMMITTEE ON FOREIGN AFFAIRS

(10.30 a. m.)

Favoring the ratification by the United States Senate of the Kellogg peace pact (H. Res. 264).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To hear private bills.

COMMITTEE ON WAYS AND MEANS

(10 a. m.)

Consenting that certain States may sue the United States, and providing for trial on the merits in any suit brought hereunder by a State to recover direct taxes alleged to have been illegally collected by the United States during the years 1866, 1867, and 1868, and vesting the right in each State to sue in its own name (H. J. Res. 166).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

711. A letter from the Comptroller General of the United States, transmitting report and recommendation to the Congress concerning the claim of the Gray Artesian Well Co. against the United States (H. Doc. No. 495); to the Committee on Claims and ordered to be printed.

712. A letter from the chairman of the United States Shipping Board, transmitting report of claims arbitrated or settled by agreement from October 16, 1927, to October 15, 1928, by the United States Shipping Board and/or the United States Shipping Board Merchant Fleet Corporation; to the Committee on the Merchant Marine and Fisheries.

713. A letter from the Secretary of Agriculture, transmitting report on investigations made by the Department of Agriculture as to the feasibility of a 10-year cooperative program for the control of predatory animals within the United States (H. Doc. No. 496); to the Committee on Agriculture and ordered to be printed.

714. A letter from the Secretary of the Treasury, transmitting draft of a proposed bill to authorize the sale of the old Syracuse post office and courthouse building and site; to the Committee on Public Buildings and Grounds.

715. A letter from the Comptroller General of the United States, transmitting report of papers or documents now in the files of the General Accounting Office; to the Committee on the Disposition of Useless Executive Papers.

716. A letter from the Public Printer, transmitting report showing 77,378 pounds of useless papers have been disposed of, and the proceeds, $510.69; to the Committee on the Disposition of Useless Executive Papers.

717. A letter from the Secretary of the Navy, transmitting draft of a proposed bill to regulate the minimum-age limit for enlistments in the Naval Reserve or Marine Corps Reserve; to the Committee on Naval Affairs.

718. A letter from the Acting Secretary of the Interior, transmitting report on the case of Annie E. Springer, widow of William Springer, who is included in Private Act No. 178, Seventieth Congress; to the Committee on Invalid Pensions.

719. A letter from the vice chairman, national legislative committee of the American Legion, transmitting proceedings of the Tenth National Convention of the American Legion, held at San Antonio, Tex., October 8 to 11, 1928, inclusive; to the Committee on World War Veterans' Legislation and ordered to be printed.

720. A communication from the President of the United States, transmitting supplemental estimate of appropriation pertaining to the legislative establishment, United States Senate, for the fiscal year 1929, in the sum of $5,000 (H. Doc. No. 497); to the Committee on Appropriations and ordered to be printed.

721. A communication from the President of the United States, transmitting supplemental estimates of appropriations pertaining to the legislative establishment, United States Senate, for the fiscal year 1929, in the sum of $13,500 (H. Doc. No. 498); to the Committee on Appropriations and ordered to be printed.

722. A communication from the President of the United States, transmitting supplemental estimate of appropriation pertaining to the legislative establishment, Architect of the Capitol, for the fiscal year 1929, in the sum of $10,000 (H. Doc. No. 499); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. BARBOUR: Committee on Appropriations. H. R. 15712. A bill making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1930, and for other purposes; without amendment (Rept. No. 1991). Referred to the Committee of the Whole House on the state of the Union.

Mr. COLTON: Committee on the Public Lands. H. R. 15088. A bill to provide for the extension of the boundary limits of the Lafayette National Park in the State of Maine, and for change of name of said park to the Acadia National Park; without amendment (Rept. No. 1992). Referred to the Committee of the Whole House on the state of the Union.

Mr. RAYBURN: Committee on Interstate and Foreign Commerce. H. R. 14458. A bill authorizing the Rio Grande del Norte Investment Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande at or near San Benito, Tex.; with amendment (Rept. No. 1999). Referred to the House Calendar.

By Mr. COLTON: A bill (H. R. 15721) validating certain applications for and entries of public lands, and for the relief of certain homestead entrymen in the State of Colorado, and for other purposes; to the Committee on the Public Lands.

By Mr. CRAIL: A bill (H. R. 15722) providing a nautical school at the port of Los Angeles, Calif.; to the Committee on Naval Affairs.

By Mr. LEAVITT: A bill (H. R. 15723) authorizing an appropriation of Crow tribal funds for payment of council and delegate expenses, and for other purposes; to the Committee on Indian Affairs.

Also, a bill (H. R. 15724) to authorize the Secretary of the Interior to exchange certain lands within the State of Montana, and for other purposes; to the Committee on the Public Lands.

By Mr. SIMMONS: A bill (H. R. 15725) for the acquisition of private lands within the exterior boundaries of the Niobrara Reservation; to the Committee on Agriculture.

By Mr. STRONG of Kansas: A bill (H. R. 15726) to increase the import duty on certain agricultural products; to the Committee on Ways and Means.

By Mr. SUMMERS of Washington: A bill (H. R. 15727) to relinquish all rights, title, and interest of the United States in certain lands in the State of Washington; to the Committee on the Public Lands.

By Mr. SUTHERLAND: A bill (H. R. 15728) to amend the act of Congress of June 26, 1906, entitled "An act for the protection of the fisheries of Alaska, and for other purposes"; to the Committee on the Merchant Marine and Fisheries.

By Mr. SWANK: A bill (H. R. 15729) to amend the national prohibition act, as amended and supplemented; to the Committee on the Judiciary.

By Mr. WOODRUFF: A bill (H. R. 15730) to amend the act of August 29, 1916, relating to the promotion of officers in the Navy, to provide for the promotion of officers who have been wounded in line of duty; to the Committee on Naval Affairs.

By Mr. ZIHLMAN: A bill (H. R. 15731) to amend "An act to authorize the Commissioners of the District of Columbia to close certain streets, roads, or highways in the District of Columbia rendered useless or unnecessary by reason of the opening, extension, widening, or straightening, in accordance with the highway plan of other streets, roads, or highways in the District of Columbia, and for other purposes," approved January 30, 1925; to the Committee on the District of Columbia.

By Mr. COLTON: A bill (H. R. 15732) making an additional grant of lands for a miners' hospital for disabled miners of the State of Utah, and for other purposes; to the Committee on the Public Lands.

By Mr. DICKINSON of Iowa: A bill (H. R. 15733) to exempt from taxation certain property of the National Society, United States Daughters of 1812, in Washington, D. C.; to the Committee on the District of Columbia.

By Mr. SMITH: A bill (H. R. 15734) to authorize homestead entrymen and owners of patented lands to purchase not exceeding 640 acres of stock-raising homestead lands; to the Committee on the Public Lands.

By Mr. PORTER: A bill (H. R. 15735) to amend the Foreign Service buildings act, 1926, as amended; to the Committee on Foreign Affairs.

By Mr. SUMMERS of Washington: A bill (H. R. 15736) to suppress unfair and fraudulent practices in the marketing of perishable agricultural commodities in interstate and foreign commerce; to the Committee on Interstate and Foreign Commerce.

By Mr. COLTON: A bill (H. R. 15737) to reserve 920 acres on the public domain for the use and benefit of the Kanosh Band of Indians residing in the vicinity of Kanosh, Utah; to the Committee on Indian Affairs.

By Mr. ROY G. FITZGERALD: A bill (H. R. 15738) to consolidate, codify, and set forth the general and permanent laws of the District of Columbia in force December 2, 1928; to the Committee on Revision of the Laws.

By Mr. WILLIAM E. HULL: A bill (H. R. 15739) to provide a 1-cent postage rate on local letters and expedite the handling of that class of mail matter; to the Committee on the Post Office and Post Roads.

By Mr. HAWLEY: Joint resolution (H. J. Res. 365) authorizing the President, under certain conditions, to invite the participation of other nations in the Chicago World's Fair, providing for the admission of their exhibits, and for other purposes; to the Committee on Ways and Means.

By Mr. FISH: Joint resolution (H. J. Res. 366) authorizing the appropriation of the sum of $871,655 as the contribution of the United States toward the Christopher Columbus Memorial Lighthouse at Santo Domingo; to the Committee on Foreign Affairs.

By Mr. LAGUARDIA: Joint resolution (H. J. Res. 367) providing for the printing of the CONGRESSIONAL RECORD on cornstalk paper; to the Committee on Printing.

By Mr. ROY G. FITZGERALD: Joint resolution (H. J. Res. 368) providing more economical and improved methods for the publication and distribution of the Code of Laws of the United States and of the District of Columbia, and supplements; to the Committee on Revision of the Laws.

By Mr. TINKHAM: Resolution (H. Res. 281) directing an investigation of the payment and expenditure of money by international bankers, United States international business organizations, and their legal representatives, and foreign interests, to create a public opinion in the United States favorable to the United States joining the League of Nations, adhering to the Permanent Court of International Justice of the League of Nations, and to the acceptance of the multilateral treaty by the United States; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ADKINS: A bill (H. R. 15740) granting a pension to Altha Jewett Atterberry; to the Committee on Invalid Pensions.

By Mr. ROBINSON of Iowa: A bill (H. R. 15814) granting a pension to Mary A. Crosby; to the Committee on Invalid Pensions.

By Mr. ROBSION of Kentucky: A bill (H. R. 15815) granting a pension to Robert H. Hays; to the Committee on Pensions.

Also, a bill (H. R. 15816) granting an increase of pension to Benjamin F. Johnson; to the Committee on Pensions.

Also, a bill (H. R. 15817) granting an increase of pension to Elizabeth B. Ashurst; to the Committee on Invalid Pensions.

By Mr. SCHAFER: A bill (H. R. 15818) granting a pension to John Wroblewski; to the Committee on Pensions.

Also, a bill (H. R. 15819) granting a pension to Peter F. Van Auken; to the Committee on Pensions.

Also, a bill (H. R. 15820) granting a pension to David L. Wiltgen; to the Committee on Pensions.

Also, a bill (H. R. 15821) granting a pension to Lillian Murphy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15822) for the relief of Rose Lea Comstock; to the Committee on Claims.

By Mr. SANDERS of New York: A bill (H. R. 15823) granting an increase of pension to Anna C. Curtis; to the Committee on Invalid Pensions.

By Mr. SELVIG: A bill (H. R. 15824) granting an increase of pension to Richard E. Goldner; to the Committee on Pensions.

By Mr. SHREVE: A bill (H. R. 15825) granting an increase of pension to Angeline S. Skinner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15826) granting a pension to Benjamin F. Moorehouse; to the Committee on Pensions.

By Mr. SIMMONS: A bill (H. R. 15827) granting a pension to Armina Besaw; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15828) for the relief of Capt. Herbert Baldwin; to the Committee on Military Affairs.

By Mr. SMITH: A bill (H. R. 15829) for the relief of Ira W. Moore; to the Committee on Claims.

By Mr. STRONG of Pennsylvania: A bill (H. R. 15830) granting an increase of pension to Elizabeth Alford; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15831) granting an increase of pension to Anna M. McAfoos; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15832) granting an increase of pension to Annie S. Aul; to the Committee on Invalid Pensions.

By Mr. SUTHERLAND: A bill (H. R. 15833) granting a pension to Lizzie Smith; to the Committee on Pensions.

Also, a bill (H. R. 15834) granting a pension to Walker Cooper; to the Committee on Pensions.

By Mr. SWING: A bill (H. R. 15835) for the relief of William O. Hart; to the Committee on Claims.

By Mr. TINKHAM: A bill (H. R. 15836) for the relief of Miriam E. Benjamin; to the Committee on Claims.

Also, a bill (H. R. 15837) granting an increase of pension to Sarah E. Reed; to the Committee on Invalid Pensions.

By Mr. UNDERHILL: A bill (H. R. 15838) granting an increase of pension to Hannah M. Burtt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15839) granting an increase of pension to Maude Howard Simpson; to the Committee on Invalid Pensions.

By Mr. UNDERWOOD: A bill (H. R. 15840) granting an increase of pension to Edward H. Packer; to the Committee on Pensions.

Also, a bill (H. R. 15841) granting an increase of pension to Harriet Nelson; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 15842) granting an increase of pension to Frances V. Aspy; to the Committee on Invalid Pensions.

By Mr. WELCH of California: A bill (H. R. 15843) granting an increase of pension to John J. Weir; to the Committee on Invalid Pensions.

By Mr. WILLIAMS of Texas: A bill (H. R. 15844) granting a pension to Rachel L. Morris; to the Committee on Pensions.

By Mr. WOOD: A bill (H. R. 15845) granting an increase of pension to Ellen Boen; to the Committee on Invalid Pensions.

By Mr. ZIHLMAN: A bill (H. R. 15846) granting a pension to Alice Wisener; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15847) granting an increase of pension to Cordelia S. Lakin; to the Committee on Invalid Pensions.

By Mr. KNUTSON: Resolution (H. Res. 280) to pay Fred R. Miller for extra and expert services to the Committee on Pensions; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

8091. By Mr. CRAIL: Petition of Hollywood Camp No. 83, United Spanish War Veterans, of Hollywood, Calif., favoring additional hospital facilities at the Soldiers' Home, Pacific Branch, Los Angeles County, Calif.; to the Committee on Military Affairs.

8092. Also, petition of executive board of the Los Angeles District, California Federation of Women's Clubs, protesting against the resurvey of the north line of the Hoopa Indian Reservation and the adjacent lands as executed by Francis E. Joy, and that it be rejected and declared to be of no further force or effect; to the Committee on Indian Affairs.

8093. Also, petition of Chas. E. Clark Camp, No. 78, United Spanish War Veterans, Inglewood, Calif., favoring additional hospital facilities at Soldiers' Home, Pacific Branch, Los Angeles County, Calif.; to the Committee on Military Affairs.

8094. By Mr. GARBER: Petition of Dr. B. F. Wooding, Washington, D. C., urging support of House bill 10594; to the Committee on Interstate and Foreign Commerce.

8095. Also, petition of the Southwestern Game and Fish Conservation Association, urging support of the Norbeck migratory bird refuge bill; to the Committee on Agriculture.

8096: Also, petition of the Mid-Central Fish Co., Kansas City, Mo., indorsing House Joint Resolution 303, to amend the Hoch-Smith resolution to include the product of fisheries; to the Committee on Interstate and Foreign Commerce.

8097. Also, petition of the Middle Atlantic Fisheries Association, New York City, indorsing House Joint Resolution 303, to amend the Hoch-Smith resolution to include the product of fisheries; to the Committee on Interstate and Foreign Commerce.

8098. Also, petition of Milo E. Hendrix Camp, No. 4, United Spanish War Veterans, and the Ladies Auxiliary to the camp, Department of Oklahoma, Muskogee, Okla., urging enactment of House bill 14676; to the Committee on Pensions.

8099. Also, petition of the World Alliance for International Friendship Through the Churches, protesting against any unusual appropriations for naval expansion; to the Committee on Appropriations.

8100. Also, petition of the directors of the Okmulgee Chamber of Commerce, Okmulgee, Okla., requesting opposition to legislation having as its purpose the elimination of the Pullman surcharge; to the Committee on Interstate and Foreign Commerce.

8101. Also, petition of the Consolidated Flour Mills Co., Wichita, Kans., indorsing House bill 15267, a bill to amend the tariff act of 1922; to the Committee on Ways and Means.

8102. Also, petition of General Harrison Gray Otis Post, No. 1537, Veterans of Foreign Wars of the United States, Los Angeles, Calif., urging enactment of House bill 6523; to the Committee on Military Affairs.

8103. Also, petition of the General Federation of Women's Clubs, urging support of the convict labor bill (H. R. 7729) as amended by the Senate; to the Committee on Labor.

8104. Also, petition of Robert Newberry, Laverne, Okla., indorsing the plan of flood relief through the impounding of the waters in the tributaries; to the Committee on Flood Control.

8105. Also, petition of William H. Ruller, McAlester, Okla., urging amendment of the Pittman-Newton recapture bill to render protection to the small railroad lines of the State; to the Committee on Interstate and Foreign Commerce.

8106. Also, petition of the Nordic Seafood Co., Tulsa, Okla., urging support of House Joint Resolution 303 to amend the Hoch-Smith resolution to include the products of fisheries; to the Committee on Interstate and Foreign Commerce.

8107. Also, petition of C. J. Turpin, president and general manager of the Beaver, Meade & Englewood Railroad Co., urging support of the Pittman-Newton recapture bill; to the Committee on Interstate and Foreign Commerce.

8108. Also, petition of the Oklahoma Division of the American Association of University Women, indorsing the Gillett resolution and the Kellogg-Briand multilateral treaty; to the Committee on Foreign Affairs.

8109. Also, petition of Concordia Mercantile Co., Concordia, Kans., indorsing House Joint Resolution 303, to amend the Hoch-Smith resolution to include the products of fisheries; to the Committee on Interstate and Foreign Commerce.

8110. Also, petition of E. N. Puckett, manager Union Equity Exchange, Enid, Okla., urging the enactment of farm-relief legislation during this second session of the Seventieth Congress; to the Committee on Agriculture.

8111. Also, petition of John Manley, general manager of the Oklahoma Wheat Growers' Association, Enid, Okla., expressing approval of House bill 15267, a bill to amend the tariff act of 1922; to the Committee on Ways and Means.

8112. By Mr. JOHNSON of Texas: Petition of W. T. Stockton, president of First National Bank of Kerens, Tex., and M. L. Speed, manager of the M. L. Speed Hardware Co., of Kerens, Tex., indorsing Senate bill 4689; to the Committee on Irrigation and Reclamation.

8113. By Mr. MORROW: Petition of citizens of Colfax County, opposing House bill 78, compulsory Sunday observance for the District of Columbia; to the Committee on the District of Columbia.

8114. Also, petition of citizens of Clayton, N. Mex., protesting against House bill 78, compulsory Sunday observance bill for the District of Columbia; to the Committee on the District of Columbia.

8115. Also, petition of citizens of Maxwell and Clayton, N. Mex., opposing House bill 78, compulsory Sunday observance for the District of Columbia; to the Committee on the District of Columbia.

8116. Also, petition of citizens of Maxwell, N. Mex., opposing House bill 78, compulsory Sunday observance bill for the District of Columbia; to the Committee on the District of Columbia.

8117. By Mr. O'CONNELL: Petition of J. G. Phelps Stokes, 100 William Street, New York City, favoring the passage of Senate bill 3623; to the Committee on Interstate and Foreign Commerce.

8118. Also, petition of the Nevada Central Railroad Co., favoring the passage of Senate bill 3623; to the Committee on Interstate and Foreign Commerce.

8119. Also, petition of the Standard Wholesale Phosphate & Acid Works, Baltimore, Md., opposing the passage of legislation to place a duty on disease-freed seed potatoes imported from Canada; to the Committee on Ways and Means.

8120. Also, petition of the Guaranty Co. of New York City, N. Y., favoring additional appropriations to the Postmaster General to enforce the postal fraud laws; to the Committee on the Post Office and Post Roads.

8121. Also, petition of the General Harrison Gray Otis Post, No. 1537, Pasadena, Calif., favoring the passage of House bill 6523; to the Committee on Military Affairs.

8122. Also, petition of the Medical Society of the County of Kings, State of New York, opposing the passage of the Newton

bill (H. R. 14070); to the Committee on Interstate and Foreign Commerce.

8123. Also, petition of the General Federation of Women's Clubs, favoring the passage of House bill 7729 as amended by the Senate; to the Committee on Labor.

8124. Also, petition of E. F. Drew & Co. (Inc.), New York City, opposing the passage of the Haugen bill (H. R. 10958); to the Committee on Agriculture.

8125. By Mr. QUAYLE: Petition of Medical Society of the County of Kings, protesting against the passage of the Newton bill (H. R. 14070); to the Committee on Interstate and Foreign Commerce.

8126. Also, petition of the Maritime Association of the Port of New York, favoring amendments to the laws through which to clothe the courts with power adequately to punish all parties found guilty of the charge of theft and pilferage; to the Committee on the Judiciary.

8127. Also, petition adopted by the board of directors of the Maritime Association of New York, protesting against the refusal of the United States Shipping Board to pay brokerage commission on coal fixtures; to the Committee on the Merchant Marine and Fisheries.

8128. Also, petition by the General Federation of Women's Clubs, in favor of the convict labor bill (H. R. 7729), as amended by the Senate; to the Committee on Labor.

8129. Also, petition of the Nevada Central Railroad Co. of New York, in favor of the passage of Senate bill 3623; to the Committee on Interstate and Foreign Commerce.

8130. Also, petition of the Illinois Valley Protective Association, Peoria, Ill., urging the passing of Senate bill 4689 and House bill 14116; to the Committee on Agriculture.

8131. Also, petition of J. G. Phelps Stokes, of New York City, urging the passage of Senate bill 3623; to the Committee on Interstate and Foreign Commerce.

8132. Also, petition of Ed S. Vail Butterine Co., of Chicago, Ill., opposing the passage of the Haugen bill (H. R. 10958) to amend the definition of oleomargarine; to the Committee on Agriculture.

8133. By Mr. TILSON: Resolution favoring an immediate revision of the tariff law of 1922, adopted by group of several hundred business men, representing all branches of business and all sections of Connecticut, at Hartford, on December 27, 1928, as arranged by the Connecticut Chamber of Commerce; to the Committee on Ways and Means.

8134. By Mr. TINKHAM: Resolutions adopted by the St. Brendan Society at the December meeting on the racial origins clause of the immigration law; to the Committee on Immigration and Naturalization.

SENATE

FRIDAY, *January 4, 1929*

(Legislative day of Thursday, January 3, 1929)

The Senate met in open executive session at 12 o'clock meridian, on the expiration of the recess.

PROPOSED COMMISSION ON PROHIBITION ENFORCEMENT

Mr. EDGE. Mr. President, as in legislative session, I ask unanimous consent to present a proposed amendment to Senate Resolution 287, introduced by the Senator from Washington [Mr. JONES], with a request that it be referred to the Committee on the Judiciary. I ask that the clerk may read the proposed substitute.

The VICE PRESIDENT. The clerk will read, as requested.

The Chief Clerk read as follows:

Amendment in the nature of a substitute intended to be proposed by Mr. EDGE to Senate Resolution 287, viz: Substitute for the resolution the following:

Joint resolution creating a commission to investigate the operation and enforcement of the eighteenth amendment to the Constitution and the national prohibition act

Resolved, etc., That on and after April 1, 1929, the President of the United States is authorized to appoint a special commission of nine citizens to investigate the operation and enforcement of the eighteenth amendment of the Constitution of the United States and the national prohibition act and all laws supplementary thereto. The commission is authorized and directed to organize and make a searching investigation of the system and methods of the enforcement of said amendment and laws and of the facts relating to and the causes responsible for the admitted general violations of such laws; to determine the best means and methods for correcting the situation with respect to prohibition; and to submit its report, with any recommendations desired, to the President at as early a date as practicable, but in no case later than January 1, 1930.

SEC. 2. The commission is authorized to employ and fix the compensation of such experts and clerical help, and to make such expenditures (including expenditures for personal services at the seat of government and elsewhere) as may be necessary for the purposes of this resolution. For the purposes of this resolution there is authorized to be appropriated the sum of $50,000 to be expended by the commission and to remain available until expended. All expenditures of the commission shall be allowed and paid upon the presentation of itemized vouchers therefor approved by the chairman. For the purposes of this resolution the commission or any member thereof is authorized to hold hearings, administer oaths, examine witnesses, and issue subpœnas for the attendance and testimony of witnesses or the production of books, papers, documents, or other evidence, or the taking of depositions before any designated individual competent to administer oaths. All governmental establishments in the executive branch of the Government are directed to furnish the commission with such available information and data as the commission may request and to otherwise cooperate with the commission.

The VICE PRESIDENT. The proposed amendment will be referred to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

As in legislative session,

Mr. WALSH of Massachusetts presented petitions numerously signed by sundry citizens of Pittsfield, Mass., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

Mr. SHEPPARD presented the petition of Rev. James H. Tate and sundry other citizens of Fluvanna, Tex., praying that the preamble of the Constitution be amended by including therein the words "devoutly recognizing the authority and law of Jesus Christ, the Savior and King of Nations," which was referred to the Committee on the Judiciary.

Mr. SHIPSTEAD presented a petition of sundry citizens of New Ulm, Minn., praying for the adoption of Senate Resolution 242, providing for an inquiry as to the appropriateness of amending article 231 of the treaty of Versailles for the purpose of establishing the World War guilt, which was referred to the Committee on Foreign Relations.

Mr. EDGE presented a communication from Mary Patterson Shelton, president of the Leonia (N. J.) Women's Republican Club, transmitting resolutions adopted by that club favoring the policy of immigration restriction, the maintenance of the national-origins quota system, and adequate measures for the national defense, which was referred to the Committee on Immigration.

CONSTRUCTION OF CRUISERS

Mr. DENEEN. I present resolutions adopted by the Chicago Association of Commerce, in favor of the passage of House bill 11526, to authorize the construction of 15 light cruisers and 1 airplane carrier. I ask that the resolutions may be printed in the RECORD and lie on the table.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

THE CHICAGO ASSOCIATION OF COMMERCE,
OFFICE OF THE PRESIDENT,
December 18, 1928.

Hon. CHARLES S. DENEEN,
United States Senate, Washington, D. C.

DEAR SENATOR DENEEN: I am requested by the executive committee of the Chicago Association of Commerce to invite your attention to the following resolution adopted Friday, December 14, 1928:

"Whereas the President of the United States in his message to Congress has called attention to the deficiency of the Navy in the matter of cruisers, and has recommended the passage of legislation designed to correct that deficiency; and

"Whereas there is pending in the Senate a bill, H. R. 11526, which has passed the House of Representatives, to authorize the construction of 15 light cruisers and 1 airplane carrier, which measure it is understood has the support of the administration: Therefore be it

"*Resolved*, That the Chicago Association of Commerce approve, indorse, and recommend the early enactment of this bill; and be it further

"*Resolved*, That the president of the association be authorized and requested to transmit copies of this resolution to the President of the United States, the Secretary of the Navy, and the members of the Illinois congressional delegation."

Thanking you for giving this matter consideration, and with the compliments of the season,

Very sincerely yours,

WM. R. DAWES, *President.*

GEORGE ROGERS CLARK

Mr. DENEEN. Mr. President, I offer an address by Mrs. Henry W. English, of Jacksonville, Ill., upon George Rogers

Clark. The anniversary of his capture of Vincennes will be celebrated on the coming February 25, 1929.

Mrs. English is past State librarian of the Illinois Daughters of the American Revolution. At present she is State registrar of the Illinois State Daughters of American Colonists. She is a prominent member of the United States Daughters of 1812 and director and treasurer of the Morgan County (Ill.) Historical Society.

I ask that this address by Mrs. English be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

PLEADS FOR FORGOTTEN GEORGE ROGERS CLARK—MRS. HENRY W. ENGLISH, STATE LIBRARIAN OF THE ILLINOIS DAUGHTERS OF AMERICAN REVOLUTION, GIVES INTERESTING ACCOUNT OF NATION'S MOST NEGLECTED HERO, WHOSE SESQUICENTENNIAL OF TAKING OF KASKASKIA WILL BE OBSERVED NEXT YEAR

George Rogers Clark (like his great contemporary of the Revolution) was a surveyor.

The site of George Rogers Clark's rendezvous has disappeared unmarked in the Ohio River.

His home at Clarksville was only recently indicated to the traveler. His memorials in Illinois were negligible until the erection of his statue at Quincy. Even in Vincennes there is nothing save a slight tablet reciting the fact "This was the site of Fort Sackville, captured from the British by George Rogers Clark, February 25, 1779." In this one hundred and fiftieth anniversary of the Revolution in the West, we hope to erect appropriate memorials and to educate the people about the beginning of the United States as an independent nation in the regions west of the Allegheny Mountains. At Louisville there is a movement under way to erect a lighthouse, if not on the site of Corn Island, at the entrance to the harbor in Randolph and St. Clair Counties; an organization has been incorporated for the celebration of the one hundred and fiftieth anniversary of Clark's capture of Kaskaskia. Indiana's General Assembly has imposed a tax levy which will produce something over $400,000 for the purchase of grounds near Vincennes for a park and a memorial which will tell the future generations the story of perhaps the most "heroic man" and exploit in American history. So in the future we hope to see a beautiful hall of history, a lovely park, and an exquisite old cathedral in the background overlooking the majestic Wabash and the memorial bridge connecting the Illinois country through which the intrepid Clark made his incredible march, with the Indiana country, in which he captured the British fort, holding the Northwest territory.

This bridge will be a national shrine to perpetuate the memory of George Rogers Clark, the pioneer and the spirit of the Revolution in the West.

One by one the roses of historical narrative fade and fall; now even the thrilling story of Clark's capture of Kaskaskia is shattered—for we have two written accounts of the event coming from his own pen. His letter to George Mason, written soon afterwards, and his letter to Congressman Brown, the so-called "memoir" dated in the nineties, this was suggested by Thomas Jefferson—neither mentions a ball. One refers to a noise earlier in the evening which it was thought came from a dance in the negro quarters.

Both give the picture of a little village with no garrison and a commandant who was merely a frontier agent of the English Government.

Clark says that he broke into the fort, and later refers to the commandant, Rocheblare, having retired for the night. The first mention of an officers' ball where the mirth-loving Creoles were dancing was found years after in the editorial introduction of Major Denning's journal. It was adopted by Theodore Roosevelt and given with imaginative embellishments in his Winning of the West. It has passed into tradition and is repeated everywhere without a shadow of contemporary evidence to support it.

I do not see how anyone can read the material now available without recognizing that in the expedition of George Rogers Clark in the Revolutionary struggle in the West, Kentucky, Indiana, and Illinois possess an historical legacy which is among their greatest assets. It reveals plainly the figure of the great leader who, especially in his march from Kaskaskia to Vincennes and in his capture of Fort Sackville with the garrison and the British commander of the Northwest, he rose to heights of military genius and fortitude not often equaled in human history.

That any man with a handful of followers should have established himself at Kaskaskia, in the midst of a large number of hostile Indian tribes, should have gained such a hold upon the French population as to draw 75 or more of its men to accompany him upon a march which they all believed impossible, and that a band of men could be inspired to persist in going through 250 miles and more of impassable country to Vincennes, armed only with rifles, should capture a well-built fortification defended by artillery, and that all this could be done without the loss of a single man, seems, indeed, incredible if not miraculous.

His story can not be too often told in the words of William Dudley Foulke. It would form the theme of a greater epic than Homer wrote about the wrath of Achilles and the fall of Troy. It surpasses the adventures of Aeneus, the Trojan pioneer who settled Italy. It has all the length and depth of Dantes Divine Comedy. It might be well to picture the situation that Clark found west of the Allegheny Mountains and which existed till 1777–78. Some hundreds of pioneers had crossed the Allegheny Mountains and established a few posts in Kentucky. Their little farms were clustered in clearings around primitive block houses. No Indians lived in Kentucky, but the country north of the Ohio, then a part of the Province of Quebec, there lived numerous warlike tribes, who were predisposed to destroy the white intruders, and they were supported by the British posts in Detroit as they too, hoped to destroy all whites in the West. On keeping the West open to the people of the original States hinged the future of the new Republic and perhaps the fate of all North America.

In 1777 a young man in Kentucky was pondering over this situation. George Rogers Clark was then only 24 years of age. He had, however, already risen to leadership in this "dark and bloody ground." Born of a vigorous stock in a family of good position, all his five brothers were officers in the revolutionary armies save William, who was too young. William was destined to become one of the most prominent men in the West; he was chosen with his cousin Merriwether Lewis to explore the Louisiana Purchase.

In 1772 George Rogers Clark crossed the Allegheny Mountains as a surveyor, identified his fortunes with the West. He took part in Lord Dunmore's war, in which he became one of the vouchers for the authenticity of the eloquent speech of Logan Mingo, Indian chief. He settled in Kentucky in 1775, as a deputy surveyor for the Ohio Co. While surveying and taking up land for himself he rapidly rose to leadership among such men as Harrod Henderson, Todd Kenton, Boone, and the Logans. It was Clark who organized the frontier government, went to Williamsburg and forced the Virginia Assembly to make Kentucky a separate county and to assume responsibility for its defense. Returning he took command of the military defense of Kentucky. His quick grasp of the whole situation, political and military, and his physical prowess and commanding bearing, his magnetic personality put him at 24 at the head of the embryonic Commonwealth. He became the father of the future State of Kentucky.

This masterful frontiersman, busy with the defense of the forts, the procuring of provisions, when possible, nursing the sick, dressing the wounded, burying the dead, reflected as he said "on things in general, Kentucky and the interests of the United States." This led him to lay aside every private interest and engage seriously in the war until the fate of the continent should be known.

Then almost as if by inspiration came the plan for the defense of Kentucky by the reduction of the towns of the Illinois and the Wabash, which would open a field for further actions.

Herein Clark displayed military genius of the first order, his grasp of the situation confronting him places him side by side with Nathaniel Green in his southern campaign and George Washington in his Yorktown campaign as one of the three leading military strategists in the Revolutionary War. It is possible, as Doctor Alvord suggests, that as commander of the Kentucky forces Clark may have learned that Kaskaskia would be an easy conquest and that there were those there who would help him, but this is a tribute to his command of all the elements of the situation, rather than a detraction from the originality of his conception.

Kaskaskia and Vincennes in American hands would be the surest means, if not the only means, of preventing the destruction of Kentucky, and might well be the means of wresting the country northwest of the Ohio from the British.

It was a brilliant plan, but more wonderful than the plan were the energy and skill with which it was executed. Clark had first to secure authorization from Virginia and men and supplies for the expedition. Only by hastening to Williamsburg, itself a dangerous journey, and by demonstration and persistence, which brooked no gainsaying, and with the help of Thomas Jefferson, George Mason, and George Wythe, his lifelong friends, did he finally persuade Gov. Patrick Henry and the Virginia Assembly to grant him the necessary powers and a meager supply of military stores. At that it was with only about 150 men instead of the 500 men that he thought necessary that Clark came down the Ohio River and on Corn Island, near the Falls of the Ohio, prepared for his hazardous undertaking. So daring was the enterprise, so necessary was it to take the enemy by surprise that the governor issued to Clark two sets of instructions, one public, authorizing the raising a force for the protection of the Kentucky frontier; the other secret, authorizing an expedition into the Northwest. When he revealed his true destination the greater part of one company deserted, and that number of the Army was barely brought up to 180 by recruits from the Kentucky forts.

"I knew," wrote Clark, "that our case was desperate, but the more I reflected on our weakness, the more pleased I was with the enterprise." Theodore Roosevelt in his Winning of the West, says that not another in the Revolution could have succeeded in the enterprise.

It was reserved for the far-seeing eye of Col. George Rogers Clark, then in the vigor of early manhood, to discover the situation of affairs, and for his sagacity and valor to apply the remedy. He had made

himself familiar with the relations and conditions and resources of the West.

With that intuitive genius which stamps him as the most brilliant commander of all those who obtained distinction in border warfare, "he was quick to perceive the policy required which was: to transfer the line of defense and the battle field from the settlements in Kentucky County to the territory which formed the enemies' base of supplies. To arouse sentiments of friendship among, or at least conciliate the opposition of the French inhabitants of the Northwest, and to neutralize the hostility of the savages if possible by demonstrating to them the justice of the American cause, and to accomplish what in every war is considered one of the greatest strategic successes—to turn the enemy's guns against himself."

To make what actually took place at all credible, one must constantly envisage a leadership which inspired men to do the impossible. The best description of Clark by a contemporary is given by Governor Reynolds of Illinois. "Colonel Clark himself was nature's favorite in his person as well as his mind. He was large and athletic, capable of enduring much, yet formed with such noble symmetry and manly beauty, that he combined much grace and elegance together with great firmness of character. He was grave and dignified in his deportment, agreeable and affable with his soldiers when relaxed from duty, but in a crisis when the fate of a campaign was at stake or the lives of his brave warriors were in danger, he became stern and severe. His appearance in these perils indicated without language to his men that every soldier must do his duty."

This stern yet affectionate leader started in June, 1778, to conquer the Illinois country and faced the effort with less than 180 in the face of thousands of hostile Indians and a strong, well-equipped British force. Clark left a few men and women who had accompanied the force to the falls to plant a crop and raise food on the Kentucky side of the river—this was the beginning of the city of Louisville. Then the little army rowed with double manned oars through the rapids and down the river to old Fort Massac. Thence with marvelous speed threaded the trails through swamps and wilderness for eight days to Kaskaskia; fortunately before leaving the falls Clark had received the information of the terms of the recent treaty of alliance between the United States and France. For to the French villages on the Mississippi and the Wabash France was still the fatherland. So Clark approached them, perhaps, at first as an unknown terror, but essentially as a deliverer from the military rule of their own country's enemy. The British garrison had been withdrawn from Kaskaskia and the occupation of the post was effected in the night of July 4 without fighting and without bloodshed. Though lacking in dramatic quality it was nevertheless managed with great skill and effectiveness. The British agent was captured in his bedroom peacefully sleeping, and within the next few days Cahokia and the other French settlements nearly all were occupied without resistance. Through the mission of Laffong and Father Gibault, friends of Clark, Vincennes, 200 miles away on the Wabash, acclaimed itself American and Clark stationed Captain Helmshere as his representative. In fact, Clark's little force was engulfed in meeting Indian tribes which at the least mischance would utterly overwhelm it. In his dealing with them he showed himself a past master of diplomacy and personal power unsurpassed in the annals of our history. He met truculence and stealth with courage and a bold front which his position far from justified.

He thwarted an attempted surprise to murder him, established himself at Kaskaskia, and after he had sufficiently wrought upon the people's fears he resolved to try the effect of lenity. After they had begged for their lives and homes, he abruptly said: "What! Do you mistake us for savages? Do you think Americans will strip women and children and take the bread out of their mouths? My countrymen disdain to make war upon helpless innocence. It was to protect our own wives and children that we penetrated into the wilderness and subjugated this stronghold of British and Indian barbarity and not the despicable object of plunder. We do not war against Frenchmen; the King of France, your former ruler, is the ally of the colonies; his fleets and armies are fighting our battles; the war must shortly terminate. Embrace whichever side you deem best and enjoy your religion, for American law respects the believers of every creed, protects them in their right. Now, to convince you of my sincerity, go and inform the inhabitants that they can dismiss their fears concerning their property and their families, that they can conduct themselves as usual, and that their friends who are in confinement shall immediately be released." Imagine the revulsion of feeling and the effect of such a speech by a conquering hero. They were frantic with joy and eternally his friends. Great were trials and complications of his position, yet he managed all with consummate tact and greatest address. He instructed his men to create the impression that the headquarters of his army were at the Falls on the Ohio, and that reinforcements were daily expected. Upon their arrival military operations would be resumed on an extended scale. This artifice enabled him to counteract the extensive influence of his powerful adversaries and to triumph over their superior strength. He never resorted to artifice or punishment except when driven to them by necessity. Many times rigor and harshness were kept up only to enhance the favors which his magnanimity and kindliness of disposition inclined him to grant.

Clark, unlike the English, only granted the Indians presents reluctantly, fought with them only until they were compelled to seek refuge in treaties, as a means of self-preservation. He studiously avoided making the first advances. At a council of the Indians Clark was present (September 1 at Cahokia) sitting at a table, one of the chiefs approached him bearing three bells, one emblematic of peace, the second contained the sacred pipe, and the third the fire to light it. The pipe was lighted, presented to the heavens, then to the earth, then in a big circle it was offered to all the spirits to invoke them to witness the proceedings, and finally to Colonel Clark and then other members of the council. Then the chief arose and spoke in favor of peace, after which he threw down the bloody belt and flag, which had been given to him by the English, stamped upon them as evidence of their rejection. Clark coldly replied that he would consider what he had heard and give them an answer the next day. Clark warned the chiefs not to allow their men to shake hands with the white people, as peace had not been concluded, saying it would be time to give the hand when the heart could also be given with it. This pleased the chiefs, who remarked that such sentiments showed men who did not speak with a forked tongue. They adjourned till the next day. Then they reassembled and Clark thus addressed them: "Men and warriors, pay attention to my words. You informed me yesterday that you hoped the Great Spirit had brought us together for good. I have the same hope, and trust that each party will strictly adhere to whatever is agreed upon, whether it be peace or war. I am a man and a warrior, not a councilor. I carry war in my right hand, peace in my left.

"I am sent by the Great Council of the 'Long Knives' and their friends to take possesion of all the towns occupied by the English in this country and to watch the red people, to bloody the paths of those who attempt to stop the course of the rivers, and to clear the roads for those who desire to be in peace. I am ordered to call upon the Great Fire for warriors enough to darken the land, that the red people may hear no sound but of birds which live upon blood. I know that there is a mist before your eyes. I will dispel the clouds that you may see clearly the causes of the war between the 'Long Knives' and the English, then you may judge which party is in the right; and if you are warriors, as you profess, prove it by adhering faithfully to the party which you shall believe to be entitled to your friendship."

He carefully explained the war, the causes and effects of war existing between the English and the colonies. Then concluded: "The whole land was dark, the old men bowed down their head in shame because they could not see the sun, and thus there was mourning for many years over the land. At last the Great Spirit took pity on us and kindled a great council fire at Philadelphia, planted a post, put a tomahawk by it, and went away. The sun immediately broke out, the sky was blue again, and the old men held up their heads and assembled at the fire. They took up the hatchet and sharpened it and immediately put it in the hands of our young men, ordering them to strike the English as long as they could find one on this side of the Great Water. The young men immediately struck the war post and blood was shed. In this way the war began and the English were driven from one place to another until they got weak and then hired the red people to fight for them. The Great Spirit got angry at this and caused your old father, the French King, and other great nations to join the 'Long Knives' and fight with them all their enemies.

"So the English have become like the deer in the woods, and you can see that it was the Great Spirit that troubled your waters because you fought for the people with whom he was displeased. You can now judge who is in the right. I have already told you who I am. Here is a bloody belt and a peace belt; take which you please, behave like men, and do not let your being surrounded by 'Long Knives' cause you to take up one belt with your hands while your hearts take up the other. If you take the bloody belt, you can go in safety and join your friends, the English. We will then try like warriors who can stain our clothes the longest with blood. If, on the other hand, you take the path of peace and are received as brothers by the 'Long Knives,' and then listen to bad birds that are flying through the land, you can not longer be considered men but creatures with two tongues which ought to be destroyed. As I am convinced you never heard the truth before, I do not wish you to answer before you have taken time for consideration. We will therefore part this evening, and when the Great Spirit shall bring us together again let us speak and think as men with but one heart and tongue."

The following day the council fire was kindled with more than ordinary ceremony, and the chiefs assured Clark that the Great Spirit had opened their ears and hearts to receive the truth and they believed he told them the truth, that he did not speak like other men, and that the old Indians were right when they said the English spoke with double tongues. We will take the belt of peace, cast down the bloody belt of war, call our warriors home, throw the tomahawk ir the river, and smooth the roads for your brothers.

The pipe was again lighted and the spirits called upon as witnesses and the council concluded. In this manner treaties or alliances were formed with other tribes and in a short time Clark's power was so well established that a single soldier could be sent in safety as far north as the headwaters of the streams emptying in the lakes.

In the vicinity of the lakes the British held and retained their influence. From henceforth his name was one to conjure with among the Indians and they could not be induced to attack a post which he commanded, and when he took the field the numbers of his soldiers was by this means multiplied tenfold. His enduring moral ascendency over the Indians became one of the greatest forces in revolution in the West.

Clark sent various expeditions into the Indian country, one as far as the site of the present city of Rock Island, Ill., the remotest point reached by his men in the Northwest. His fame and the terror of his name spread beyond the British posts of Detroit and Michilimachinac.

The climax of the war in the West came the next winter. Colonel Hamilton, called by Clark the "Hair-buyer General," the British commander of the West, and called the "inspirer" of the bloody Indian raids, started in October, 1778, from Detroit and proceeded slowly down the Wabash with a small army of British regulars from the King's own regiment and a host of Indians. In December he occupied Vincennes in force and rebuilt and fortified old Fort Sackville and then waited for the spring to recover the French villages on the Mississippi.

Clark's doom would have been sealed had he not risen to heights of daring and leadership which placed his name among the immortals. Clark, in view of the critical condition of the country and the extreme peril of his own situation, wrote to Gov. Patrick Henry, acquainted him with Colonel Hamilton's designs, as he had learned them from Colonel Vigo.

Parties of hostile Indians sent out by the British began to appear. Assistance from Virginia could not be obtained in time, so with the promptness which the emergency demanded, Clark resolved to help himself. Anticipating the arrival of his enemies, he commenced preparations with his own limited means to carry the war into the enemy's country, for, as he said, "I knew if I did not take him, he would take me." Vigo had told Clark that the force at the garrison numbered 80 men, 3 cannons, and some swivels, and that if Clark could attack the fort before the troops could be recalled he might recapture it. Without a moment's delay a galley was fitted out with two 4-pounders and four swivels and placed in charge of Capt. John Rogers and 46 men, with orders to reach the Wabash and force their way up the stream to the mouth of the White River, there remain until further instructions were given. His next move was to order Captain Bowman to evacuate the fort at Cahokia for the purpose of organizing a force for the expedition to proceed across by land to cooperate with the force under Captain Rogers. The French raised two companies commanded by Captains McCarly and Charleville, which, with the Americans, amounted to barely 170. On the 7th of February, only eight days after he received the news from Vincennes, this forlorn hope started to march. Many of Clark's men had returned to Virginia and to Kentucky, but with the remainder and about an equal number of Creoles, whose allegiance and devotion he had won, he immediately determined to again seize the offensive and attack Vincennes, now the pivotal point of the whole west. The boat, the *Willing*, which he sent to row up the Wabash and join in the attack on Fort Sackville, did not arrive till the fighting was over. With 130 men on February 5, 1779, he started across the prairies of southern Illinois, drenched by the rains of an unusually wet winter; they had no tents nor any shelter, but slept out in the open through the winter nights.

The officers were mounted until the going was too difficult for the horses and they had to be left behind. Most of the time they did not dare to light fires for fear of Indian attacks. Then on the 13th they came to the Little Wabash. They saw before them a vast expanse of water, such as needs no description to those who are familiar with the Wabash Valley in high flood. Then for days they went through water and ice, which not infrequently came up to their shoulders. Over the muddy prairies they had made the amazing average of 28 miles a day for 6 days, but to cross the 4 rivers and the remaining 63 miles to Vincennes took them 10 days. The last two days even the strongest men began to fail. That any man after such previous hardship could wade for hours through water up to his neck, breaking the ice before him with his sword, passes belief, yet Clark did this and brought every man he started with to the attack upon the fort.

Clark's account of his last day's desperate march through the icy water to Vincennes, February 25, 1779:

"The nearest land to us in the direction of Vincennes was a spot called 'Sugar Camp' on the opposite side of the slough. I sounded the water, finding it deep as my neck; returned with the design of having the men transported on board canoes to the camp, though I knew it would spend the whole day and coming night, as the vessels would pass slowly through the bushes. The loss of so much time to men half starved was a matter of serious consequence, and I now would have given a great deal for a day's provisions or one of our horses. When I returned all ran to hear the report. I unfortunately spoke in a serious manner to one of the officers. The whole were alarmed without knowing what I said. I viewed their confusion for a moment, whispered to those near me to do as I did. I immediately put some water in my hand, poured powder on it, blackened my face, gave the war whoop, and marched into the stream. The party immediately followed without uttering a word of complaint. I ordered those near me to sing a favorite song, which soon passed through the line, and all went cheerfully.

"I now intended to have them transported across the deepest part of the water, but when about waist deep one of the men informed me he thought he had discovered a path. We followed it and finding it kept on higher ground, without further difficulty we arrived at the camp where there was dry ground on which to pitch our lodges. The French we had taken on the river appeared uneasy at our situation and begged that they might be permitted during the night to visit the town in two canoes and to bring their horse provisions. They said that some of our men could go with them as a surety for their conduct, and that it would be impossible to leave this place till the waters, which were too deep for marching, subsided. Some of the officers believed this might be done, but I would not suffer it. I could never well account for my obstinacy on this occasion or give satisfactory reasons to myself or anybody else why I denied a proposition apparently so easy to execute and of so much advantage, but something seemed to tell me it should not be done. On the following morning, the finest we had experienced, I harangued the men. What I said I am not now able to recall, but it may be easily imagined by a person who possesses the regard which I at that time entertained for them. I concluded by informing them that, passing the sheet of water, which was then in full view, and reaching the opposite woods would put an end to their hardships, that in a few hours they would have a sight of their long-wished-for object, and I immediately stepped into the water without waiting for a reply. Before the third of the men had entered I halted and called to Major Bowman and ordered him to fall into the rear with 25 men and put to death any man who refused to march with us, as we did not wish to have any such with us. The whole gave a cry of approbation, and on we went. This was the most trying of the difficulties we experienced. I generally keep 15 of the strongest men next to myself and judged from my own feelings what must be that of others.

"Getting near the middle of the inundated plain, I found myself sensibly falling and, as there were no trees for the men to support themselves, I feared that many of the weak would be drowned. I ordered the canoe to ply back and forth and with all diligence to pick up the men; and to encourage the party, sent some of the strongest forward with orders that when they had advanced a certain distance to pass the word back that the water was getting shallow, and when near the woods to cry out, land! This stratagem had the desired effect. The men, encouraged by it, exerted themselves almost beyond their abilities, the weak holding on the stronger. On reaching the woods where the men expected land the water was up to their shoulders, but gaining the timber was the greatest consequence for the weakly hung to trees and floated on the drift till they were taken off by the canoes. The strong and all got ashore and built fires, but many of the feeble on reaching land would fall with their bodies half in the water. The latter were so benumbed with cold we soon found that fires would not restore them and the strong were compelled to exercise them with great severity to revive their circulation. Fortunately a canoe in charge of some squaws was going to town which our men captured, and which contained half of a quarter of buffalo meat, some corn, tallow, and kettles. Broth was made of this valuable prize and served to the most weakly with great care. Most of the men got a small portion, but many of them gave part of theirs to the more famished, jocosely saying something cheering to the company. We next crossed a deep but narrow lake in the canoes, and marching some distance came to a copse of timber called Warriors Island. We were now distant only 2 miles from town, which, without a single tree to obstruct the view, could be seen from the position we occupied. The lower portions of the land between us and the town were covered with water which served at this season as a resort for duck and other waterfowl.

"We had observed several men on horseback shooting them half a mile distant and sent out as many of our active young Frenchmen to decoy and take them prisoners in such a manner as not to alarm the others. Being successful in addition to the information which had been obtained from those taken on the river, the captives reported that the British had that evening completed the wall of the fort and that there were a good many Indians in the town. Our situation was truly critical. No possibility of retreat in case of defeat, and in full view of the town which at this time had 600 men in it, troops, inhabitants and Indians. The crew of our galley, though not 50 men, would have been a reinforcement of immense magnitude to our little army, but we could not think of waiting for them. Each had forgot his suffering and was ready for the fray, saying what he had suffered was nothing but what a man should bear for the good of his country. The idea of being made a prisoner was foreign to every man, as each expected nothing but torture if they fell into the hands of the Indians. Our fate was to be determined in a few hours and nothing but the inhabitants wished us well. There were many lukewarm to the interests of either party. I also learned that Grand Dooe had but a few days before openly declared in council with the British, that he was a brother and friend of the 'Long Knives.' These were favorable circumstances and

as there was little probability of our remaining until dark undiscovered, I determined to commence operations immediately."

So in the gathering dusk of February 23, Clark's force began firing on the fort. This firing was supposed to be only drunken Indians shooting, as they had saluted the fort in this manner several times.

Clark had sent this placard to the inhabitants of Vincennes, "To the inhabitants of Vincennes: Gentlemen, being now within 2 miles of your village with my army, determined to take your fort this night and such of you as are true citizens and willing to enjoy the liberty which I bring you, to still remain in your houses and those, if any there be, who are friends of the king, let them instantly repair to the fort and join the hair-buyer general and fight like men—and if the latter do not go to the fort, and shall be discovered afterwards, they may depend upon severe punishment. On the contrary, those who are true friends to liberty, may depend upon being well treated as an enemy." After this, even those friendly to the British were afraid to give warning to those at the fort. This forceful letter shows insight into human nature. Clark, of all the commanders, had the clearest and greatest insight into human nature, this faculty was so developed that he was held in awe by many and this very trait caused him to capture Vincennes as he had the other forts in Illinois, without bloodshed. We can not describe the dramatic episode of the attack, the surprise of Colonel Hamilton, the attitude of the Creoles, the capture the next day of the Indians returning from Kentucky, bringing the scalps of men, women, and children hanging from their belts, and the tomahawking the next day of these Indians, in sight of the British garrison. But so remarkably accurate was the shooting of the frontiersmen that the garrison could not use the cannon mounted on the corners of the fort. Whenever they attempted to shoot from the fort or the palisade around it, a bullet was sure to come through from the outside. Thus did Clark's men lying in the open, behind such crude shelter as they could construct, silence the fire of a well-garrisoned, well-armed fort. After a famous dramatic interview with Clark, Colonel Hamilton capitulated on February 25, 1779. The Americans took possession, sending Hamilton and his principal men to Virginia as prisoners. Never again was the British flag to fly over Vincennes, and the treaty of peace took the Northwest from the Province of Quebec and gave it to the United States.

If Virginia could have sent Clark money, supplies, and even a small reinforcement he could have reached his ultimate goal, Detroit, and he could have captured and held it. Then the Indian wars of the next 44 years would have been avoided; indeed, it is more than probable that the war of 1812 would also have been avoided, for the United States in a large part was led into this war by pressure from the West for the annexation of Canada as a protection against British support of the Indians. But this was not to be; recruits could not be sent, even the small force which he had in 1779 melted away. He was left to defend the frontier without men or supplies. The depreciated currency of Virginia became entirely worthless. Clark, Vigo, Pollock, and several others pledged all their property to secure supplies for the soldiers. The Government could not repay them. They became utterly impoverished. They had to seize food to keep from starving, and their men were reduced to almost nakedness. Here he proved his worth in the greatest rugged battle of fate, where his strength was shown by a test thousands would have shunned. His marvelously resourceful and strong character was committed to a destiny of its own.

Twice during the five years after the capture of Vincennes Colonel Clark led successful expeditions against hostile Indians in what is now Ohio, and he cooperated with the Spanish in successful resistance to the strong British expedition down the Mississippi. In December, 1780, when he went to Virginia, he took command under Baron Steuben to defend Virginia against an invasion by a British force under Benedict Arnold. In 1781 Clark became brigadier general. In 1782 he gathered a large force and marched against the Indian towns on the Miami and Scioto; five were destroyed. He participated in a successful expedition against Indians on the Wabash in 1786 and about 1794 accepted a commission as major general in the French Army against the Spanish possessions on the Mississippi, but when Genet, the French minister to the United States, who had given to him the commission, was recalled the commission was annulled. But on the whole the history of the last year of the war and of the years immediately following is a pathetic story of his heroic struggles, without support, against the British and Indian forces without and chaos in the American lines.

After the war came dastardly attacks and intrigues against Clark by James Wilkinson, his supplanter, one of the most despicable figures on the pages of American history. Land speculators whom he had opposed and offended joined in the clamor against him. His just claims for money expended were left unpaid by Virginia and ignored in the adjustment between her and Continental Congress. He paid the penalty of his hardships and exposure as did most of his men, by years of suffering and physical anguish. He sought and too often found the drunkard's temporary relief from pain and disappointment. Doctor Coleman said, "Clark drunk knew more than all the Bodleys and Dunns that ever lived." After years as an invalid his rheumatic troubles finally were added to by paralysis, which caused his death at the home of his sister in 1818. For years he had been dependent upon his brothers and sister and their families. It was a long and terrible penalty imposed upon a mind and body worn out in service such as few men ever gave to their country. Think of all the fertile, vast region northwest of the Ohio wrested from the British by the valor of this great soldier, whose technique of leadership has never been surpassed, yet he was for years swallowed by the quicksands of time and endured poverty and chill penury which froze almost every current of his noble soul. In spite of the oblivion in which he rested for a number of years, his noble, decisive character had made too large a dent upon the shield not only of his beloved United States but of civilization ever to be removed. He gave his all for his country.

The picture can not but recur, as that of a gallant ship which weathered the fiercest tempests and storms, then was left to be beaten to pieces and be abandoned on the beach. Those who saw only the hopeless wreck never understood the heroism of the fierce struggle in the gale. It has remained for later years to bring to and hold aloft before the world the incredible achievement of the march from Kaskaskia and the capture of the British headquarters in the West.

This will long remain the most glorious epic in the history of the old Northwest. George Rogers Clark, by his incredible achievements, not only proved his courage and indomitable will, personal magnetism, and invincible leadership, but common sense. Wisdom is common sense in an uncommon degree; then George Rogers Clark was one of the world's wisest men, for nine-tenths of wisdom is being wise in time; only by his quick foresight and vision was this country led to victory and preserved for the posterity of generations yet unborn. His instinct acted as a guiding star and led him unerringly in snatching the Northwest from the Province of Quebec. He seems to have followed the dictum, "One's instinct is truer than one's thought." As you recall his saying in regard to allowing some of the French to go to Vincennes for food, "I could never well account for my obstinacy on this occasion or give satisfactory reasons to myself or anybody else, but something seemed to tell me it should not be done." Like Jefferson, Clark never invited failure by neglecting obvious precaution; his motto seemed to be:

The giant of a nation's creed
Prepared,
Lest we be in another's greed
Ensnared.

The true Clark is revealed in words spoken to the people of Kaskaskia just after he took possession—for no one excelled Clark in the respect for the rights of others—he keenly felt himself the hardships which the necessity of the situation compelled him to inflict or impose upon those in his power, and he sought to rule by stratagem rather than by force or punishment.

He was an essence of magnanimity and heroism. So great were the services of Colonel Clark and his brave warriors and officers they were voted the thanks of the Virginia House of Delegates November 23, 1778, "for their extraordinary resolution and perseverance in so hazardous an enterprise, and the important service thereby rendered the country." Years afterwards Virginia sent to Clark a sword, but he felt so keenly what he considered the ingratitude of the Republic in leaving him in this obscurity and poverty that he received the compliments of the committee in gloomy silence. Then he exclaimed with his old fire, "When Virginia needed a sword I gave her one, she sends me now a toy. I want bread." He thrust the sword into the ground and broke it with his crutch. Though all the rich vast domain northwest of the Ohio was rescued to this Republic at the peace of 1783 by the consequences of Clark's powers, his inconspicuous grave in Cave Hill Cemetery at Louisville, Ky., is marked only by a little headstone bearing the letters "G. R. C." It is unkept and it is said not one dozen persons in the United States can point it out. What a great reflection upon Louisville, Ky., and the great Northwest. The rippling waters of his beautiful Ohio still murmur a requiem over the grave which holds the dust of the noblest American that ever went up and down her waters, the soldier, statesman whose tireless energy still lives in the enterprise of millions who dwell in the land he loved and defended; only the relicts of nature contend with him for the empire of the wilderness.

This American was born in Albemarle County, Va., November 18, 1752, near Monticello, the home of his beloved friend, Thomas Jefferson, and distant relative. He spent his life in Caroline County, Va., where he enjoyed not only common-school education but advantages from the noted Scotch scholar and teacher, Donald Robertson. James Madison was also one of Robertson's pupils. Our valiant hero never married but the family tradition is that he was greatly fascinated by the daughter of the Spanish Governor of St. Louis.

He paid her his most ardent addresses, but when he relieved that post after an Indian attack he observed a want of courage in the governor. He broke off his addresses to the girl and said to his friends, "I will not be the father to a race of cowards." Man is a bundle of his ancestors, and George Rogers Clark subscribed to this belief in that utterance, so I wonder if we, the daughters of Eve, have not the curiosity to see who is in George Rogers Clark's bundle?

He is a direct descendant of Eneas, King of the Scots, A. D. 100, Charlemagne, Louis IX of France, and Louis XI of France through

Hugh Capet, which gives him two lines of descent from Charlemagne. William the Conqueror and Anne Boleyn, daughter of Lady Margeret Butler, and Sir William Boleyn, whose daughter married Sir John Shelton. Anne Boleyn was the great aunt of Queen Elizabeth's mother. Anne Boleyn hid at the home of her great aunt from her persecutors at Shelton Hall, and occupied a pew in the church Sir Ralph Shelton built in 1480. Sir Ralph Shelton, the father of Sir John Shelton, was in the King's own company at the Battle of Cressy. Sir John Shelton was a Knight of the Bath, Edwards I, II, III of England. His Shelton ancestors were so nobly connected that few private families even in feudal times could surpass their opulence and alliance. Their family history is recorded in the Doomsday Book on account of its connection with royal families. Many of America's most prominent men, Col. William Byrd, of Westover, as well as John Roger, gentleman, who was born about 1680 on a ship en route from England to America. His parents settled in the tidewater section of Virginia. He married May Bird, of Westover. John died in King and Queen County, Va., in 1762, and John C. Clark, an immigrant, of King and Queen County, Va., before 1725 married Elizabeth Lumpkin; they had five children. Their oldest son, Jonathan Clark, married in 1723 Elizabeth Wilson, daughter of Lucy Rogers. Their eldest son was born in October, 1724. He married his counsin, Anne Rogers, in 1749.

Anne Rogers was the daughter of Giles Rogers and granddaughter of Mary Byrd and John Rogers. Their children were Jonathan, George Rogers, and William, three other sons and one daughter. If Col. William Byrd would only have seen into the future, he certainly would not have scorned plain John Rogers, gentleman, nor disowned his daughter, Mary, for having married him. Merriwether Lewis was also descended from the same line of Sheltons and Byrds. Even to-day this strain of blood brings us intrepid, powerful men, for Evelyn Byrd, the Arctic explorer and North Pole hero, and his brother, the present Governor of Virginia, show the power of inheritance. Through the two brothers, George Rogers and William, and their cousin, Merriwether Lewis, we are indebted for opening the way for the acquisition to our Republic of the entire region from the Mississippi Valley to the Pacific Ocean.

This country being opened and held by Clark was to produce the great westward movement which eventually pushed the frontier to the Pacific Ocean. It filled the Mississippi Valley and the far West and made the United States a continental nation and revived the blood of the whole people. But had the British and the Indians cleared the western country of American settlers and retained it as a colonial possession, the new Nation would have remained an Atlantic seaboard State, with little chance to spread its wings either materially or spiritually. Another nation, or perhaps a colony of Great Britain, would have grown rich and powerful upon the great westward movement. Appealing to adventurous Americans as did Louisiana in the hands of Spain or Texas in the hands of Mexico, and there seems to be no reason for thinking that another revolution would have come to bring about its annexation to the United States. In endeavoring to estimate the achievements of George Rogers Clark or the debt of gratitude we owe him we must consider the present state of our great Nation and the blessings we enjoy as his gifts to the United States and to us as her citizens in this mighty Northwest.

My friends, as we look back through the long vista of years upon such men we almost recoil from the obligations they imply. Their visions must be realized; we must fulfill the longing of their hearts, these champions of truth. There are no more continents to conquer, but let us live in the duties and blessings of our great citizenship as those to whom has been left this magnificent trust, as those who are conscious of an unreckoned debt to a heroic past, the grand and solemn lineage whose freedom runs back beyond Bunker Hill or the *Mayflower*, not forgetful of the lessons and duties of the hour. But by all the memories of the past, by all the impulses of the present, by all the noblest instincts of our souls, by a touch of His sovereign spirit upon us, may God make us faithful and worthy of our heritage.

BILLS AND JOINT RESOLUTION INTRODUCED

As in legislative session,

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. NORRIS (by request of the Attorney General):

A bill (S. 5181) to amend section 4 of the act of June 15, 1917 (40 Stat. 224, sec. 241, title 22, U. S. C.) (with accompanying papers); to the Committee on the Judiciary.

By Mr. NEELY:

A bill (S. 5182) granting an increase of pension to John Rose; to the Committee on Pensions.

By Mr. WALSH of Massachusetts:

A bill (S. 5183) granting a pension to Gertrude F. DuBois; to the Committee on Pensions.

By Mr. HALE:

A bill (S. 5184) granting an increase of pension to Mary M. DePew (with accompanying papers); to the Committee on Pensions.

By Mr. FLETCHER:

A bill (S. 5185) authorizing the Secretary of War to modify the contract for the sale of the St. Johns Bluff Military Reservation, Fla.; to the Committee on Military Affairs.

By Mr. THOMAS of Oklahoma:

A bill (S. 5186) for the relief of Louisa Z. Ozborn and minor children (with accompanying papers); to the Committee on Claims.

By Mr. DENEEN:

A bill (S. 5187) to exempt from taxation certain property of the National Society of the Sons of the American Revolution in Washington, D. C.; to the Committee on Finance.

By Mr. SACKETT:

A bill (S. 5188) granting an increase of pension to Cora B. Keltner (with accompanying papers); and

A bill (S. 5189) granting an increase of pension to Nannie Curry (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

A bill (S. 5190) granting an increase of pension to Willard M. Girton; to the Committee on Pensions.

By Mr. WATSON:

A bill (S. 5191) granting a pension to Harlow Hewett; and

A bill (S. 5192) granting an increase of pension to Rue S. Donnohue; to the Committee on Pensions.

By Mr. REED of Pennsylvania:

A bill (S. 5193) to authorize the President of the United States to appoint an additional judge of the District Court of the United States for the Middle District of the State of Pennsylvania; to the Committee on the Judiciary.

A bill (S. 5194) authorizing Richard H. Klein, his heirs, legal representatives, and assigns to construct, maintain, and operate a bridge across the Susquehanna River at or near the Borough of Liverpool, Perry County, Pa.; to the Committee on Commerce.

By Mr. SHEPPARD:

A bill (S. 5195) for the relief of Don A. Spencer; to the Committee on Claims.

By Mr. HAYDEN:

A bill (S. 5196) to amend the act entitled "An act to authorize credit upon the construction charges of certain water-right applicants and purchasers on the Yuma Mesa auxiliary projects, and for other purposes"; to the Committee on Irrigation and Reclamation.

By Mr. THOMAS of Oklahoma:

A joint resolution (S. J. Res. 184) authorizing an extension of time within which suits may be instituted on behalf of the Cherokee Indians, the Seminole Indians, the Creek Indians, and the Choctaw and Chickasaw Indians to June 30, 1931, and for other purposes; to the Committee on Indian Affairs.

AMENDMENT TO AGRICULTURAL APPROPRIATION BILL

Mr. JONES submitted an amendment proposing to increase the appropriation for market news service in connection with the production, transportation, marketing, and distribution of farm and food products, from $1,227,000 to $1,262,000, intended to be proposed by him to House bill 15386, the Agricultural Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

COUNTING OF THE ELECTORAL VOTE

As in legislative session,

Mr. SHORTRIDGE submitted the following concurrent resolution (S. Con. Res. 28), which was referred to the Committee on Privileges and Elections:

Resolved by the Senate (the House of Representatives concurring), That the two Houses of Congress shall assemble in the Hall of the House of Representatives on Wednesday, the 13th day of February, 1929, at 1 o'clock p. m., pursuant to the requirements of the Constitution and laws relating to the election of President and Vice President of the United States, and the President of the Senate shall be their presiding officer; that two tellers shall be previously appointed by the President of the Senate on the part of the Senate and two by the Speaker on the part of the House of Representatives, to whom shall be handed as they are opened by the President of the Senate all the certificates and papers purporting to be certificates of the electoral votes, which certificates and papers shall be opened, presented, and acted upon in the alphabetical order of the States, beginning with the letter A; and said tellers, having then read the same in the presence and hearing of the two Houses, shall make a list of the votes as they shall appear from the said certificates; and the votes having been ascertained and counted in the manner and according to the rules by law provided, the result of the same shall be delivered to the President of the Senate, who shall thereupon announce the state of the vote, which announcement shall be deemed a sufficient declara-

tion of the persons, if any, elected President and Vice President of the United States, and, together with a list of the votes, be entered on the Journals of the two Houses.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed the bill (S. 3127) to amend section 217, as amended, of the act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases; requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. KOPP, Mr. ZIHLMAN, and Mr. CONNERY were appointed managers on the part of the House at the conference.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 11469) to authorize appropriations for construction at the United States Military Academy, West Point, N. Y.,; requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MORIN, Mr. JAMES, and Mr. MCSWAIN were appointed managers on the part of the House at the conference.

FINAL ASCERTAINMENT OF ELECTORS

As in legislative session,

The VICE PRESIDENT laid before the Senate communications from the Secretary of State, transmitting, pursuant to law, certified copies of the final ascertainments of electors for President and Vice President in the States of California, Connecticut, Florida, Illinois, Indiana, New York, North Carolina, North Dakota, Pennsylvania, Rhode Island, South Carolina, and Texas, at the election held November 6, 1928, which were ordered to lie on the table.

CONSTRUCTION AT THE MILITARY ACADEMY

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 11469) to authorize appropriations for construction at the United States Military Academy, West Point, N. Y., and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. REED of Pennsylvania. I move that the Senate insist on its amendments, agree to the conference asked by the House, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. REED of Pennsylvania, Mr. MCMASTER, and Mr. FLETCHER conferees on the part of the Senate.

BRIEFS IN RAILROAD VALUATION CASE

Mr. NORRIS. Mr. President, I have here the briefs which have been filed in the so-called O'Fallon valuation railroad case now being argued in the Supreme Court, probably the most important law suit that has ever been tried in the history of the world. I am informed by one of the attorneys, who prepared one of the briefs, and also by a representative from the office of the clerk of the Supreme Court that demands for copies of the briefs are coming from all over the United States, from colleges, students, economists, and attorneys generally, and that they are unable to supply the demand. I therefore ask that the briefs be printed as a Senate document, all in one document.

Mr. SACKETT. Mr. President, may I inquire if that includes the briefs on both sides?

Mr. NORRIS. It includes all the briefs. It includes the brief for the appellant railway companies; that is, the St. Louis & O'Fallon Railway Co. and the Manufacturers' Railway Co.; the brief for the United States; the brief for the Interstate Commerce Commission; the brief on behalf of the National Conference on Valuation of American Railroads, as Amicus Curiae; also a similar brief on behalf of the Great Northern Railway as Amici Curiae; and a reply brief from the railroads. I am asking that they may all be printed together in one document.

Mr. GOFF. How many copies are to be printed?

Mr. FLETCHER. The number would be limited.

Mr. NORRIS. In my judgment there will probably be a demand later on for a reprint of the document, though there may not be. We can get a reprint in case the demand continues as it seems to be progressing now.

Mr. FESS. Mr. President, I hope there will be no objection to the request because this is the case that will decide the item of the recapture clause in the 1920 law which has been suspended. I have examined one of the briefs, and I think it is very important.

Mr. NORRIS. It will be an expensive document, it is true. I hold the briefs in my hand for Senators to see.

The VICE PRESIDENT. Is there objection to the request of the Senator from Nebraska?

Mr. BINGHAM. Mr. President, my recollection is that under the rule of the Senate all requests of this kind should be referred to the Committee on Printing, and the Committee on Printing is ordered by the rule to secure an estimate of cost from the Public Printer for a certain number of copies that are authorized to be printed.

Mr. NORRIS. My recollection is that that is true where the amount of the cost is liable to be more than a certain sum.

Mr. SMOOT. The amount will be more than that sum in this case.

Mr. NORRIS. I am inclined to think so; in fact, I have no doubt that the amount of money required to print the briefs as a Senate document will exceed the amount stated in the law.

Mr. SMOOT. I have no objection to the printing of the briefs as a Senate document.

Mr. NORRIS. I do not think there will be any delay on the part of the Committee on Printing. A delay would be serious, because now is the time when students of the subject all over the United States are trying to get copies of the various briefs.

Mr. FLETCHER. I think we can by unanimous consent order the printing, and any request for additional copies may be referred to the Committee on Printing to ascertain the cost.

Mr. SMOOT. I think it is best to send the request to the Committee on Printing, because the House would want a certain number of copies. I believe before the printing is done we ought to find out how many copies shall be printed, so that we may determine how many shall be allocated to the Senate and how many to the House.

Mr. NORRIS. The chairman of the Committee on Printing is not present at the moment. I have no objection to taking that course, with the understanding that there will be no delay.

Mr. FLETCHER. It is just a question now of making it a public document, and we can determine later on about the number.

Mr. GOFF. Mr. President, I would like to ask the Senator from Nebraska if there will be a proportionate allocation to the Members of the Senate so that they can meet the requirements of their respective State bars?

Mr. SMOOT. If the matter goes to the Committee on Printing, when they report it out they can fix upon the number of copies required, and then the allocation will be made between the Senate and the House, and the number allotted to the Senate is always distributed among the Senators.

Mr. GOFF. With that understanding, I have no objection.

Mr. NORRIS. I have no objection to having my request referred to the Committee on Printing.

The VICE PRESIDENT. Without objection, it will be so referred.

RESTRICTION OF IMMIGRATION

Mr. BLEASE. Mr. President, I ask unanimous consent to have inserted in the RECORD two letters written by Secretary of Labor Davis in regard to two bills which I have introduced relative to immigration.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
COMMITTEE ON IMMIGRATION,
January 4, 1929.

Senator COLE L. BLEASE,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I send you herein copy of the report that has come to me from the Secretary of Labor upon your bill S. 5093. I also inclose report from Secretary Davis upon your bill S. 5094.

Sincerely yours,

HIRAM W. JOHNSON, *Chairman.*

DEPARTMENT OF LABOR,
OFFICE OF THE SECRETARY,
Washington, January 2, 1929.

Hon. HIRAM W. JOHNSON,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In response to your letter of December 26, 1928, inclosing a copy of Senate bill 5093, by Senator BLEASE, "To authorize the issuance of certificates of admission to aliens, and for other purposes," I have to make the following comment: The general demand on the part of aliens for the issuance of certificates of admission as

proposed in S. 5093 is indicated in the very large number of requests from aliens for a certificate since the adoption by this department of the granting of identification cards to presently arriving aliens, which is done under section 1 of the naturalization act of June 29, 1906.

The section of the naturalization act referred to provides that immigration officials at ports of entry shall record certain information concerning each alien arriving in the United States, and it is likewise provided that it shall be the duty of such immigration officers to cause to be granted to arriving aliens a certificate "of such registry."

It is understood that following the passage of this legislation admitted aliens were supplied with a simple certificate of registry, but for one reason or another this practice was soon abandoned, and for a good many years certificates of arrival were furnished only in connection with naturalization proceedings, and then not directly to the alien concerned.

The department and Bureau of Immigration have long believed that aliens who are admitted to the United States, either permanently or temporarily, ought to be supplied with some evidence of their status as residents of the United States under the immigration laws. Accordingly a system of stamping passports was adopted in the case of visitors entering the United States temporarily, and beginning with July 1, 1928, a more elaborate certificate of admission has been issued to every alien permanently admitted as an immigrant. This certificate, which is known as an "immigrant identification card," is prepared in part at the American consulate where a visa is issued and is completed by an immigration officer when final admission is made at port of arrival. These cards are prepared with a view to preventing forgeries so far as that is possible. They contain certain essential data, including the photograph of the immigrant. They are issued in duplicate, such duplicate being permanently filed in the Bureau of Naturalization in Washington.

Without question the identification card is a document of great value to lawfully admitted immigrants. Their possession facilitates naturalization proceedings and otherwise enables the holder to establish his status as a lawful resident. Moreover, the duplicates afford the department a highly valuable and convenient card-index record of aliens who have been admitted for permanent residence. Finally it is felt that the issuance of the identification card to arriving immigrants is in strict compliance with section 1 of the naturalization act already referred to. There is ample evidence that the identification cards are appreciated by those to whom they have been issued since the system was inaugurated in July last. This is in part evidenced by the fact that there has been a very considerable demand for similar certificates from immigrants who were admitted prior to July, but no provision has been made for the issuance of documents of any kind in such cases.

The proposed legislation, if enacted, would enable the Commissioner General of Immigration, with the approval of the Secretary of Labor, to provide aliens who are lawfully resident in the United States with certificates of admission or residence similar to those now issued to arriving immigrants. As already pointed out, the naturalization law evidently contemplates that some such document shall be issued to arriving aliens, but that having been neglected, some doubt has been raised as to whether the department would be justified under the law in providing every legally resident alien who might apply with a similar document. The proposed legislation, if enacted, would, of course, remove all doubt in this regard and, moreover, would through the charge of $3 for each certificate issued reimburse the Government, it is believed, for the expense that would necessarily be incurred in putting the proposed system into effect.

Sincerely yours,

JAMES J. DAVIS.

DEPARTMENT OF LABOR,
OFFICE OF THE SECRETARY,
Washington, January 2, 1929.

Hon. HIRAM W. JOHNSON,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In response to your letter of December 26, 1928, requesting the views of this department respecting S. 5094, a bill by Senator BLEASE, "making it a felony with penalty for certain aliens to enter the United States of America under certain conditions in violation of law," I have to state that in our opinion the enactment of the law proposed would be of material assistance in the administration of existing immigration laws.

It is academic that no prohibitive law can successfully be enforced without a deterrent penalty. The fact that possible deportation is not a sufficient deterrent to discourage those who seek to gain entry through other than regular channels is demonstrated by the frequency with which this department is compelled to resort to deportation proceedings for the same alien on several succeeding occasions. Unfortunately, however, no statistics as to the number of instances in which deportations have been repeated have been kept. Many of the aliens who are required to be deported enter as seamen, and it goes without saying that deportation as passengers aboard regular passenger steamers is no penalty in this class of cases. In any event, an alien deported at Government expense under the present procedure is not subject to any more difficulties or embarrassment than before the first successful attempt to enter the country unlawfully.

Aside from the sexually immoral and members of the anarchistic and similar cases there is nothing in the immigration laws which penalizes aliens for reentering the United States unlawfully after they have been deported at considerable expense to the Government. The enactment of a law imposing a penalty is recommended.

Sincerely yours,

(Signed) JAMES J. DAVIS.

ARMY PROMOTION SYSTEM

Mr. REED of Pennsylvania. Mr. President, there has been considerable discussion about the projected change in the promotion system in the Army. The Army and Navy Journal has taken a poll of all of the officers in the service. The result of the poll is contained in a letter from the managing editor of the Journal, dated on yesterday, which I send to the desk; and, as in legislative session, I ask that it may be printed in the CONGRESSIONAL RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ARMY AND NAVY JOURNAL,
Washington, D. C., January 3, 1929.

Hon. DAVID A. REED,
Chairman Military Affairs Committee,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In response to your request I have the honor to submit the following data obtained as a result of the Army and Navy Journal's survey on promotion. This survey was undertaken by the Army and Navy Journal as an independent agency to ascertain the real individual sentiment of officers of the Army on the subject of promotion and the basic principles proposed for the relief of the present situation.

The general response to newspaper polls, no matter how vital the subject, totals from 10 to 20 per cent, we are reliably informed. The replies to the journal's survey, therefore, are indicative of the tremendous interest and desire of the Army for action this session, as over 50 per cent of the officers of the Army have responded to date. Except on enforced separation the ratio in favor of a separate bill embodying the basic principles outlined is more than 11 to 1. Officers at all posts in the United States, Panama, and Hawaii have sent in their replies. No Philippine returns have as yet arrived. They are expected to bring the total to more than 6,000, or about 60 per cent of the officers on the promotion list of the Army. No effort was made to canvass the Chaplain or Medical Corps as these officers have separate promotion lists of their own.

The responses from officers in the "hump," composed of captains and first lieutenants of promotion list branches, was greater than the general response, averaging about 54 per cent to date. Following is an analysis of the responses from these officers:

Captains and first lieutenants of promotion list branches

	Yes	No	Failed to indicate
Do you favor:			
(a) Promotion after a stated number of years' service in each grade	2,947	32	73
(b) Advancement of officers at prescribed periods without rigid regard to number in grades	2,732	95	125
(c) Reduction of "hump" by—			
(1) Retirement of lieutenant colonels as colonels after 26 years' service	2,887	33	132
(2) Retirement of officers appointed July 1, 1920, or prior to that date with suitable compensation upon own application	3,095	37	70
(3) Removal of restrictions on retired officers for holding office or employment	3,155	37	60
(4) Enforced separations	398	2,758	96
(5) Voluntary separations	3,076	76	100
(d) A separate bill to secure passage of these principles	2,724	252	276

The attention of your committee is called to the fact that the results recorded in question (d) "Do you favor a separate bill to secure passage of these principles?" indicate that over 90 per cent of the officers in all grades who gave an opinion unmistakably indicated their desire for action to accelerate promotion this session. These principles are the "noncontroversial" ones and would benefit the Army as a whole. The officers, in their comments, show that they favor the passage of a measure embodying these alone, if "controversial" principles included in pending bills threaten to block action this session. Following is an analysis of general replies:

All grades and branches

	Yes	No	Failed to indicate
Do you favor:			
(a) Promotion after a stated number of years' service in each grade	4,977	583	148
(b) Advancement of officers at prescribed periods without rigid regard to number in grades	4,534	940	234
(c) Reduction of "hump" by—			
(1) Retirement of lieutenant colonels as colonels after 26 years' service	4,715	737	256
(2) Retirement of officers appointed July 1, 1920, or prior to that date with suitable compensation upon own application	5,231	309	168
(3) Removal of restrictions on retired officers for holding office or employment	5,525	91	92
(4) Enforced separations	804	4,682	222
(5) Voluntary separations	5,336	140	232
(d) A separate bill to secure passage of these principles	4,768	424	516

The results in this group of officers are practically the same as the results of the officers in the "hump." There is also indicated an overwhelming sentiment among all officers of the Army for the principles (other than enforced separation) of promotion as embodied in the survey.

The survey clearly shows that the question of greatest concern to retired officers is that of removal of restrictions on their employment. Almost 97 per cent of the votes cast were in favor of such removal.

A great number of cards, mostly in the grades of captain and lieutenant, contained comment upon the matter of pay, which is entirely outside the scope of this survey. Many officers of all grades entered remarks indicating the necessity for higher pay. These comments are so generally distributed throughout the various grades and branches and are so forcefully presented that congressional relief in the matter of pay appears to the Army and Navy Journal to be a vital necessity for the welfare and efficiency of the Army, which should be cared for as well as the question of promotion.

Appended are tabulations showing (1) total returns by branches, (2) tabulation by branches and grade.

Should any further information be desired, the Army and Navy Journal will be pleased to furnish it.

Sincerely yours,

BERTRAM KALISCH,
Managing Editor.

DISTRIBUTION OF THE CONGRESSIONAL RECORD

Mr. HEFLIN. Mr. President, on yesterday morning I gave notice to the Senate that I would call up this morning Senate bill 5022, which provides for an increase in the number of copies of the CONGRESSIONAL RECORD allotted to each Senator and each Member of the House.

Mr. BORAH. Mr. President——

Mr. HEFLIN. This measure has been unanimously reported by the Committee on Printing, and an agreement was had in the committee cutting the number down from 300 to 150 for each Senator and to 100 copies for each Member of the House. A Senator now gets only 88 copies for distribution in his entire State. Each Member of the House gets only 60 copies. Before Christmas the Senator from Utah [Mr. SMOOT] asked me to let the matter go over until he could get certain information and stated he would have that information ready after the Christmas recess. It was my understanding that he would have it ready on yesterday, but he then asked to have the matter go over until to-day.

Mr. SMOOT. Oh, yes; I had the information ready. The Senator is mistaken.

Mr. HEFLIN. Senators heard me state that the Senator from Utah had gone from the Chamber and that he asked that the matter might go over until he could be here this morning, and I yielded to his request. Now the Senator is not ready this morning to go on with the measure. It ought to be passed. The people of the United States are entitled to know what is going on in Congress, and I submit that it is a crying shame that they are not allowed to get the CONGRESSIONAL RECORD and to read the proceedings of this body and the other House. Eighty-eight copies of the RECORD to each Senator for his entire State is ridiculous. I want the Senate to pass on the question whether or not they will have this number increased. If the Senator from Utah is not ready to go on with it, I want to fight it out with him on the floor of the Senate.

Mr. BORAH. Mr. President, let me say to the Senator from Alabama that we are proceeding now as in open executive session, and I should not want to yield to return to legislative session at this time to dispose of the measure to which he refers. As we are now in open executive session, I would like to proceed with the business before the Senate.

Mr. HEFLIN. I gave notice yesterday morning in the Senator's presence, and I thought he would yield to us this morning to go ahead with this matter for a little while. It will take only a short time.

Mr. BORAH. I hope the Senator will not insist on going ahead while we are proceeding as in open executive session.

Mr. HEFLIN. We could consider it as in legislative session.

Mr. BORAH. Yes; we could, but I think the Senator from Utah is not ready to proceed at this time.

Mr. HEFLIN. I want to say to the Senator from Idaho that the longer the matter is delayed, the longer it will be before the people in the States who are writing in for the RECORD can get on the mailing list. The sooner the measure is passed the better it will be.

Mr. BORAH. If the matter can be voted upon without debate, I shall not object.

Mr. SMOOT. Mr. President, I want to say to the Senator from Alabama that if the amendment has been agreed to by the chairman of the committee, this is the first time I have heard that the Senator had yielded——

Mr. BORAH. Mr. President, if there is going to be debate, I object and call for the regular order.

The VICE PRESIDENT. The regular order is called for. The Senator from Idaho is entitled to the floor.

Mr. HEFLIN. Mr. President, I make the point of no quorum. That is the regular order now.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	La Follette	Shipstead
Barkley	Frazier	McKellar	Shortridge
Bayard	George	McLean	Smoot
Bingham	Gerry	McMaster	Steck
Blaine	Glass	McNary	Steiwer
Blease	Glenn	Mayfield	Stephens
Borah	Goff	Neely	Swanson
Brookhart	Gould	Norbeck	Thomas, Idaho
Broussard	Greene	Norris	Thomas, Okla.
Bruce	Hale	Nye	Tydings
Burton	Harris	Overman	Vandenberg
Capper	Hastings	Pine	Wagner
Caraway	Hawes	Ransdell	Walsh, Mass.
Couzens	Hayden	Reed, Mo.	Walsh, Mont.
Curtis	Heflin	Reed, Pa.	Warren
Dale	Johnson	Robinson, Ark.	Waterman
Deneen	Jones	Robinson, Ind.	Watson
Dill	Kendrick	Sackett	Wheeler
Edge	Keyes	Schall	
Fess	King	Sheppard	

Mr. HEFLIN. My colleague the junior Senator from Alabama [Mr. BLACK] is absent on account of illness. I ask that this announcement may stand for the day.

Mr. NORRIS. The junior Senator from Nebraska [Mr. HOWELL] is detained from the Senate on account of illness. I ask that this announcement may stand for the day.

Mr. MCKELLAR. My colleague the junior Senator from Tennessee [Mr. TYSON] is absent on account of illness in his family. I should like to have this announcement stand for the day.

Mr. WAGNER. I wish to announce that the senior Senator from New York [Mr. COPELAND] is unavoidably absent because of illness in his family.

The VICE PRESIDENT. Seventy-eight Senators having answered to their names, a quorum is present. The Senator from Idaho.

Mr. HEFLIN. Mr. President, with the permission of the Senator from Idaho, I should like to say that the senior Senator from Utah [Mr. SMOOT] did not understand that we had agreed in committee to cut the number of CONGRESSIONAL RECORDS set out in the bill to be allotted to each Senator from 300 to 150 and the number allotted to each Member of the House of Representatives from 150 to 100 copies. We did agree on that. In order to get some increase I accepted the compromise as suggested. The bill has been unanimously reported with that understanding. The Senator from Utah did not seem to understand that we had done that, but thought the number was to be 300 copies to each Senator.

Mr. BORAH. Is the Senator from Utah ready for a vote on the bill?

Mr. SMOOT. I am perfectly willing to vote upon the proposition to make the number for each Senator 150, but not to make it 300.

Mr. HEFLIN. We have accepted the suggestion to make the number of copies for each Senator 150.

Mr. BORAH. Then let us have a vote.

Mr. HEFLIN. I ask unanimous consent, as in legislative session, that the Senate proceed to the consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole and in legislative session, proceeded to consider the bill (S. 5022) to amend sections 183 and 184 of chapter 6 of title

44 of the United States Code, approved June 30, 1926, relative to the printing and distribution of the CONGRESSIONAL RECORD, which was read, as follows:

Be it enacted, etc., That sections 183 and 184 of chapter 6 of title 44 of the United States Code, approved June 30, 1926, be amended to read as follows:

SEC. 183. CONGRESSIONAL RECORD; daily and permanent forms.—That the public proceedings of each House of Congress, as reported by the official reporters thereof, shall be printed in the CONGRESSIONAL RECORD, which shall be issued in daily form during each session and shall be revised and bound, as may be directed by the Joint Committee on Printing, in permanent form, promptly at the close of each session. The daily and permanent RECORD shall bear the same date, which shall be that of the actual day's proceedings reported therein.

Same; maps, diagrams, etc.: No maps, diagrams, or illustrations shall be inserted in the RECORD without the approval of the Joint Committee on Printing. All requests for such approval should be submitted to the Joint Committee on Printing through the chairman of the Committee on Printing on the part of the Senate or of the House, in whichever the speech is desired to be illustrated may be delivered, and no maps, diagrams, or illustrations shall be inserted that exceed in size a page of the RECORD.

Same; gratuitous copies; distributions: The Public Printer shall furnish the CONGRESSIONAL RECORD as follows, and shall furnish gratuitously no others in addition thereto:

To the Vice President and each Senator, not to exceed 150 copies; and to the Secretary and Sergeant at Arms of the Senate, each, 20 copies; to the Secretary, for office use, 20 copies; and to the Sergeant at Arms of the Senate, for use on the floor of the Senate, 40 copies; to each Representative, Delegate, and Resident Commissioner, not to exceed 100 copies, and to the Clerk, Sergeant at Arms, and Doorkeeper of the House, each, 20 copies; and to the Clerk, for office use, 35 copies; and to the Clerk, for use on the floor of the House of Representatives, 50 copies, and all of the foregoing shall be supplied daily as originally published. Each order for the daily RECORD shall begin with the current issue thereof, if previous issues of the same session are not available.

Of the bound edition there shall be printed and delivered to the folding room of the Senate not to exceed 8 copies for the Vice President and each Senator, and to the folding room of the House of Representatives not to exceed 5 copies for each Member, Delegate, and Resident Commissioner; to the Secretary and Sergeant at Arms of the Senate, each, 2 copies; and to the Clerk, Sergeant at Arms, and Doorkeeper of the House, each, 2 copies.

To the Vice President and each Senator, Representative, Delegate, and Resident Commissioner there shall be furnished (which shall not be transferable) 4 additional copies of the daily RECORD, 1 to be delivered at his residence, 1 to his office, 1 at the Capitol, and 1 to be reserved by the Public Printer in unstitched form to be bound promptly in paper and delivered to each Member, Delegate, or Resident Commissioner when each semimonthly index shall be issued; to each standing committee of Congress, one daily and one semimonthly copy.

To the President, for use of the Executive Office, 10 copies of the daily and 1 bound copy.

To the Chief Justice and each of the Associate Justices of the Supreme Court of the United States, the marshal and clerk of the said court, 2 copies of the daily and 1 bound copy.

To the governor of each State and Territory, 1 copy of the daily and 1 bound copy.

To the office of the Vice President and Speaker of the House, each, 4 copies of the daily and 1 semimonthly copy.

To the Sergeant at Arms, the Chaplain, the Postmaster, the superintendent and foreman of the folding room of the Senate and House, respectively, and to the two Assistant Sergeants at Arms of the Senate, each, 1 copy of the daily.

To the Official Reporter of the Senate and each of his assistant reporters, and to the official reporters of debates of the House, and the assistant, each, 2 copies of the daily and but 1 semimonthly copy and 3 bound copies to each of these offices.

To the stenographers to committees of the House, 4 copies of the daily and but 1 semimonthly copy.

To the superintendent of the Senate and House document rooms, each, 3 copies of the daily, 1 semimonthly, and 1 bound copy.

To the legislative counsel of the Senate and House and the Architect of the Capitol, each, 3 copies of the daily and 1 semimonthly copy.

To the Senate and House libraries, each, 3 copies of the daily, 1 semimonthly copy, and not to exceed 15 bound copies.

To the Library of Congress 125 bound copies for its own use and international exchange and 10 copies of the daily RECORD for its own use, as provided in section 139 of title 44, and such number of copies of the daily RECORD as may be required, not exceeding 100 copies, for distribution under section 186 of title 44.

To the library of each executive department, independent office, or establishment of the Government in Washington, D. C., except those designated as depository libraries; the Naval Observatory, and the Smithsonian Institution, 1 bound copy.

To the Soldiers' Home and to each of the National Homes for Disabled Volunteer Soldiers, and to each of the State soldiers' homes established for either Federal or Confederate soldiers, 1 copy of the daily.

To the Superintendent of Documents, as many bound copies as may be required for distribution to depository libraries.

To each of our legations abroad, 1 copy of the daily, to be sent through the Secretary of State.

To each foreign legation in Washington whose government extends a like courtesy to our legations abroad, 1 copy of the daily, to be sent through the Secretary of State and furnished upon his requisition.

To each newspaper correspondent whose name appears in the Congressional Directory, and who makes application therefor, for his personal use and that of the paper or papers he represents, 1 copy of the daily CONGRESSIONAL RECORD and 1 copy of the bound CONGRESSIONAL RECORD, the same to be sent to the office address of each member of the press or elsewhere in the city of Washington, as he may direct: *Provided*, That not to exceed 2 copies in all shall be furnished to members of the same press bureau.

To the superintendent of the press gallery of the Senate and House, for office use, each, 2 copies of the daily, 1 semimonthly copy, and 1 bound copy.

To the Governor General of the Philippine Islands at Manila, 10 copies of the daily RECORD as provided in section 164 of title 44.

The Public Printer is authorized to furnish to subscribers the daily RECORD at $8 for the long and $4 for the short session, or $1.50 per month, payable in advance. The "usual number" of the CONGRESSIONAL RECORD shall not be printed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, and read the third time.

The VICE PRESIDENT. The question is, Shall the bill pass?

Mr. BURTON. Mr. President, I should like to ask a question for information in regard to this matter. May I ask the Senator from Alabama what number of copies of the CONGRESSIONAL RECORD it is contemplated shall be reserved to be bound in permanent form?

Mr. HEFLIN. I do not think there is any change proposed in the bill as to that.

Mr. FLETCHER. The Senator will see that on page 3 of the bill it is provided that of the bound edition eight copies are allotted to each Senator and not to exceed five copies for Members of the other House.

Mr. SHIPSTEAD. If the Senator will permit me, I desire to state that the number of bound copies of the RECORD under the proposed law will be the same as it now is. Senators will have eight sets of the bound RECORD and Members of the other House will have five copies.

Mr. SMOOT. There is no change proposed in that respect. The pending measure is the same as the existing law.

The VICE PRESIDENT. The question is, Shall the bill pass?

The bill was passed.

MULTILATERAL PEACE TREATY

The Senate, in open executive session, resumed the consideration of the treaty for the renunciation of war transmitted to the Senate for ratification by the President of the United States December 4, 1928, and reported from the Committee on Foreign Relations December 19, 1928.

Mr. BORAH. Mr. President, when the discussion ended last evening at the close of the session we had under consideration the effect of the pending peace treaty upon the Monroe doctrine. I had not intended to discuss that feature of the subject in my opening remarks upon the treaty, but since questions relating to it have been submitted and it is now before the Senate I think I may conclude what I have to say in regard to that particular subject.

As I understand, the Monroe doctrine rests upon the principle of self-defense; that is the theory upon which it was promulgated and that is the theory upon which it has been maintained. As it is conceded under this treaty that each nation has the right of self-defense and to determine for itself what constitutes self-defense, it is my opinion that the Monroe doctrine is in no wise embarrassed or curtailed, and neither is the Government of the United States embarrassed in the maintenance of the Monroe doctrine.

A brief reference to the message itself originally announcing this doctrine is sufficient to sustain the theory upon which the Monroe doctrine rests. Mr. Monroe said:

> We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. * * * We could not view any interposition for the purpose of oppressing

them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States. * * * It is impossible that the allied powers should extend their political system to any portion of either continent without endangering our peace and happiness.

The circumstances under which the Monroe doctrine was announced will be recalled. Certain European powers, then operating largely under an organization known as the Holy Alliance, were engaged either in preventing the independence of South American countries or in destroying the independence of those which had been successful in achieving it. The very basic purpose of the Holy Alliance, notwithstanding it was originally announced as a peace organization, was to destroy all forms of free government. Its great object was to establish and maintain despotic forms of government. Not only, therefore, was the encroachment upon the western continent by the European powers deemed injurious to the United States or a menace to its peace and safety as a general proposition, but the particular philosophy or policy of those who at that time were carrying on this program was deemed especially dangerous to our peace and welfare.

The original purpose of the Monroe doctrine has since been maintained. I am one of those who believe that the Monroe doctrine has been wrenched from its original moorings in many respects, but, nevertheless, it has always been contended that whatever we have done under that doctrine we have done upon the theory of self-defense or for the security and safety of the Nation.

Mr. GLASS. Mr. President——

Mr. BORAH. I yield to the Senator from Virginia.

Mr. GLASS. With respect to an accurate definition of the Monroe doctrine and its scope, I should like to propound an inquiry to the chairman of the Committee on Foreign Relations. Recently there was friction between two South American countries, both of them members of the League of Nations. Suppose, under article 10 of the league covenant, there had been consideration of the question as to how the league would proceed with reference to that quarrel, and it had been determined by the league to interfere in a coercive way against, perhaps, we might say, the offending nation party to the quarrel. What would have been the attitude of the United States toward a decision of that sort, under the Monroe doctrine?

Mr. BORAH. Mr. President, I would hesitate to answer that question offhand; but, in my opinion, the Monroe doctrine would not be infringed or challenged by any effort upon the part of foreign governments amicably or peacefully to arrange the difficulties of two South American countries. If the foreign governments were solely interested in the question of establishing peace between two South American countries, and not in any sense interested in establishing themselves in South or Central America or destroying South or Central American governments, I do not see how the Monroe doctrine would be in any way challenged.

Mr. GLASS. I can not either; but I wanted to be assured as to that.

Mr. CARAWAY. Mr. President, may I ask the Senator from Idaho a question if the Senator from Virginia has concluded?

Mr. GLASS. The Senator may proceed.

Mr. CARAWAY. I want to vote for the ratification of the treaty, but I want to know just where we are going in view of the answer to the question just asked by the Senator from Virginia. Would it be possible for foreign nations to coerce one of the governments referred to and make it yield to the other under the claim of bringing about a peaceful settlement of their controversy?

Mr. BORAH. As I have said, I hesitate to answer that kind of a question. I do not understand that the Monroe doctrine would inhibit a foreign government from undertaking to arrange the difficulties of two South American countries. When it is undertaken to employ the doctrine of force, however, or to coerce one of such governments, there is a possibility involved of the violation of the Monroe doctrine which undoubtedly would interest the United States.

Mr. CARAWAY. The reason I am asking the Senator the question is that one nation at least in its correspondence preceding the ratification of this treaty referred to its obligation under the treaty of Versailles. Under that treaty, of course, if the league should decide to act, force could be used, blockades could be maintained, and so on.

Mr. SWANSON. Mr. President, if the Senator will permit an interruption there, as I understand, the covenant of the League of Nations specifically excludes the Monroe doctrine from its operation. Is not that true?

Mr. BORAH. That was the intention; yes.

Mr. SWANSON. That is what we insisted upon as a condition of going into the league.

Mr. GLASS. But what I am trying to get at is, What is the application of the Monroe doctrine to the case that I stated? I do not think it has a thing in the world to do with it; but I wanted to educe the opinion of the chairman of the Committee on Foreign Relations.

Mr. BORAH. The purpose of the Monroe doctrine, as I understand it, was to prevent European powers from taking possession of the territory of South America——

Mr. GLASS. Exactly.

Mr. BORAH. Or demolishing or breaking down the governments of South America, and establishing on the South American continent their own government or their own control. So long as the purpose of European governments is free from those propostions, I do not know of anything in the Monroe doctrine that would inhibit them from taking part in a peaceful adjustment of South American affairs.

Mr. CARAWAY. Pardon me; I do not understand from the statement of the Senator from Virginia that the foreign governments would——

Mr. REED of Missouri. Mr. President, we are unable to hear what is being said. We should like to hear this colloquy.

Mr. CARAWAY. Personally, I had put this one question.

The PRESIDING OFFICER (Mr. HASTINGS in the chair). Does the Senator from Idaho yield to the Senator from Arkansas?

Mr. BORAH. I yield to the Senator from Arkansas.

Mr. CARAWAY. All I was trying to do was merely to clarify the answer of the Senator from Idaho. I did not quite follow him. If, under the treaty of Versailles, the league should use force—either commercially or the force of arms—to bring about a settlement between South American countries, of course to that extent it would infringe the liberty of those nations. Did I understand the Senator to say that that would not be a violation of the Monroe doctrine?

Mr. BORAH. I said that the Monroe doctrine had for its purpose——

Mr. CARAWAY. I understand its purpose.

Mr. BORAH. I would not undertake to say that a particular situation did not challenge the Monroe doctrine until I knew what all the facts were; but if the nations were engaged in an effort to adjust amicably differences between them, and not in an effort to satisfy their own ambitions or to satisfy their own interests or to establish themselves on the South American continent, I do not see how the Monroe doctrine would interfere.

Mr. CARAWAY. I do not, either, under that statement; but what I am coming to is this: If they may use force to compel a South American nation to accept an agreement, they do establish themselves to that extent upon the Continent of South America, do they not?

Mr. BORAH. No; not necessarily.

Mr. CARAWAY. Why, Mr. President, under the Monroe doctrine we even objected to their taking charge of the customs down in Venezuela to collect foreign debts.

Mr. BORAH. Yes; we objected. But we have not always objected to foreign governments collecting their debts.

Mr. CARAWAY. And we prevented its being done.

Mr. BORAH. We did in some instances. We have done many things under the Monroe doctrine.

Mr. CARAWAY. Even holding elections down there under the Monroe doctrine?

Mr. BORAH. Yes. I presume it was claimed to be under the Monroe doctrine.

Mr. CARAWAY. Well, of course——

Mr. BORAH. Let me say this, and then I will yield to the Senator further: Without, of course, objecting to the question, I do not feel that this question has any relevancy to the treaty before us, for this reason: Whatever the Monroe doctrine is, and whatever we decide the Monroe doctrine to be from time to time, based upon the principle of self-defense, we are just as free to decide and just as free to execute under this treaty as if no treaty had been made, for the reason that the Monroe doctrine is simply an extension of our system of self-defense. Now, we may misconstrue the Monroe doctrine. We may have done so in the past. This treaty will not prevent the misconstruction, in all probability, if we base it upon the proposition that we are acting under it and acting in defense of our interests.

Mr. CARAWAY. I am inclined to agree with the Senator about that. The thing I wanted to be perfectly clear about was that it was not in the mind of the chairman of the Committee on Foreign Relations that we were conceding to other

people a power to act in South America in connection with this treaty.

Mr. BORAH. No; I do not think this treaty gives them any more right to act than if the treaty did not exist.

Mr. CARAWAY. We are not, then, by our very discussion of it, making any concession that they have any power to coerce South American nations?

Mr. BORAH. Certainly not.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Connecticut?

Mr. BORAH. I do.

Mr. McLEAN. The Senator, of course, is familiar with the resolution introduced by the Senator from New Hampshire [Mr. MOSES]; and I take it, from the very able presentation of the Senator's views with regard to this treaty, that he thinks the Monroe doctrine will be just as safe without the first paragraph of this resolution as with it?

Mr. BORAH. I do.

Mr. McLEAN. Then what is the harm, in the mind of the Senator, in the Senate agreeing with him on this subject, and formally stating that the treaty does not impair or abridge the right of the United States to defend its territory or other vital interests?

Mr. BORAH. When I come to those resolutions, if they are ever presented, I will state why I think that they ought not to be adopted. That would lead me into a field which I have no intention of covering at this time, but I shall be very glad to cover it then.

Mr. McLEAN. I hope, when the Senator does that, he will bear in mind Mr. Kellogg's official communication to the powers delivered on June 23, 1928, in which he defines what he considers to be the right of self-defense—that is, in my opinion, he defines it—and uses the following language:

> Every nation is free at all times and regardless of treaty provisions to defend its territory from attack or invasion.

Mr. BORAH. Mr. President, while I do not desire to discuss that at this time, let me say this much: The Senator is now reading from a speech which the Secretary of State made, which speech was transmitted to the other powers; but the Senator omits to read the letter itself.

Mr. McLEAN. No; I am reading from the letter.

Mr. BORAH. Now, let me read from the letter.

Mr. ROBINSON of Arkansas. It ought to read alike, no matter who reads from it.

Mr. BORAH. This is in the letter. The part which the Senator from Connecticut read was in the speech which was incorporated in the letter.

Mr. McLEAN. I am reading from this printed document——

Mr. BORAH. Yes; I know the Senator is, but he is reading from page 37, and I am reading from page 38.

Mr. McLEAN. No; I am reading from page 36.

Mr. ROBINSON of Arkansas. We might have an arbitration to settle this dispute.

Mr. BORAH. In the letter, following the speech, the Secretary of State says:

> The right of self-defense is inherent in every sovereign State and implicit in every treaty.

That is the statement of the Secretary of State, without any limitation as to territory or anything else. The French Government used, by way of illustration, the same illustration that the Secretary of State used—that every government had a right to defend its territory. That was simply by way of illustration. But in this letter, and in another letter written by the Secretary of State, he makes no reference whatever to the question of territory, but puts it upon the broad grounds that every government has a right to defend itself, and to determine for itself what constitutes self-defense.

Mr. McLEAN. Precisely. The Monroe doctrine is not mentioned in any of the Secretary's communications; but on the 23d of June, 1928, in his official communication to the powers, I quoted his language at the bottom of the page under the heading of "Self-defense," and I have read to the Senate what he says.

Mr. WATSON. Read it again.

Mr. McLEAN (reading):

> Every nation is free at all times and regardless of treaty provisions to defend its territory.

I take it that the Monroe doctrine goes far beyond the defense of our territory; and I am informed that the South American countries object to the ratification of this treaty, or will object, if the Monroe doctrine is mentioned; and I suspect that the language used by Mr. Kellogg in his note to the powers was very significant when he said that it included the right to defend our territory from attack.

Mr. BORAH. Let me assure the Senator from Connecticut that the reference of territory was not significant in the sense that he was undertaking to limit it in deference to the views of South America.

Mr. McLEAN. Then may I propound another question?

Mr. BORAH. I will ask the Senator to wait until I get through with my reply to his first question. If the Senator would read the entire communication of the Secretary of State he could not reach any other conclusion than that the Secretary of State stated the principle of self-defense in the very broadest terms. The Senator picks a single sentence, but omits to read:

> There is nothing in the American draft of an antiwar treaty which restricts or impairs in any way the right of self-defense. That right is inherent in every sovereign State and is implicit in every treaty.

If you are indulging in strict technical interpretation, what are we defending when we are executing the Monroe doctrine? What are we defending?

Mr. McLEAN. That is the point.

Mr. BORAH. We are defending the territory of the United States, and, as Mr. Cleveland said, we are defending our institutions. We are defending our form of government. We are defending the Capitol here just as much as we are defending any portion of our rights.

Mr. McLEAN. I do not agree with that proposition; but the Secretary——

Mr. BORAH. What are we defending when we defend the Monroe doctrine?

Mr. McLEAN. It is very difficult to define the Monroe doctrine.

Mr. BORAH. I am not asking the Senator to define the Monroe doctrine. When we maintain the Monroe doctrine, and seek to enforce it and defend ourselves against its being broken down, what are we defending?

Mr. McLEAN. We may be defending the lives of our citizens abroad. We may be defending their property.

Mr. BORAH. And we may be defending our territory.

Mr. McLEAN. We may be; but we may not be defending our territory when we are defending the lives of our citizens abroad.

Mr. BORAH. Mr. Kellogg does not say we are confined to that.

Mr. McLEAN. But, if the Senator will pardon me, Mr. Kellogg clearly states that the right of self-defense can not be defined. He says it in all of his communications.

Mr. BORAH. And therefore he does not attempt to define it.

Mr. McLEAN. Then he does attempt to define it in the paragraph which I have read. That, I think, is the danger, and that is the reason why I think we should adopt the first section of the Moses resolution. I think the Senator will agree with me that if Mr. Kellogg had inserted, after the word "territory," the words "or other vital interests," it would have indicated a degree of wisdom on his part which I certainly should heartily approve.

Mr. BORAH. I am not clear as to how you would defend other vital interests, separated and divorced from our territory. If we defend our territory, that is one of the items in our self-defense.

Mr. McLEAN. I will not interrupt the Senator further, but I have considerable to say.

Mr. BORAH. I suspect so.

Mr. KING. Mr. President, will the Senator permit me to interrupt him?

Mr. BORAH. I yield.

Mr. KING. I want to understand the Senator. Does the Senator mean that under the clause which he has just read the obligation rests upon the United States to defend South American countries or Latin American countries from invasion by some other country—some temporary intervention?

Mr. McLEAN. No, no. On the contrary——

Mr. KING. I ask because I do not think that is the Monroe doctrine at all.

Mr. McLEAN. On the contrary, my point is that the Secretary of State, in using the language which he did, implied a renunciation of our Monroe doctrine—implied that the right of self-defense in the future would go no further than the right to defend our territory from attack or invasion.

Mr. KING. I do not think his language is susceptible of that construction. I think the Senator from Idaho is right.

Mr. BORAH. Mr. President, I was not discussing the question of self-defense except incidentally, but I will refer to it again, in view of the suggestion of the Senator from Connecticut. I repeat, the language which the Senator from Con-

necticut quoted was in a public address delivered by the Secretary of State before the American Society of International Law on the 28th day of April, 1928. Afterwards the Secretary of State transmitted that address to the powers with reference to this matter.

Mr. McLEAN. As a part of an official communication.

Mr. BORAH. I thank the Senator. After having incorporated it in his letter, he then proceeded to restate it in the letter itself, aside from the address, and in the letter itself he states, as I have said, that "the right of self-defense is inherent in every sovereign state and implicit in every treaty. No specific reference to that inalienable attribute of sovereignty is therefore necessary or desirable."

That is the language of the Secretary of State in the letter itself. There are no limitations, and there is no specific reference to property or territory, but the general statement that the right of self-defense is inherent in every sovereign. That is his last and final statement, a statement which the Senator from Connecticut is unable to find or to read after it has been called to his attention.

Mr. WATSON. Mr. President, may I interrupt the Senator?

Mr. BORAH. Certainly.

Mr. WATSON. Has the Secretary of State stated in any of his correspondence or in any public address that the maintenance of the Monroe doctrine is a part of our system of self-defense?

Mr. BORAH. He stated that before the Committee on Foreign Relations and it has been published. Again, the Secretary of State, in another address, speaking on this same subject, said:

> The question was raised as to whether this treaty prevented a country from defending itself in the event of attack. It seemed to me incomprehensible that any nation should believe that a country should be deprived of its legitimate right of self-defense. No nation would sign a treaty expressly or clearly implying an obligation denying it the right to defend itself if attacked by any other country. I stated that this was a right inherent in every sovereign state and that it alone is competent to decide whether circumstances require resort to war in self-defense. If it has a good cause the world will applaud it and not condemn it.

Mr. JOHNSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from California?

Mr. BORAH. I yield.

Mr. JOHNSON. At this point, upon this subject, I would like a very brief elucidation, which may be reached, I think, by a question, if the Senator will permit me.

Suppose this treaty, in the opinion of the Senator, did not protect the Monroe doctrine, would the Senator favor, then, either a reservation or an explanatory clause that would afford that protection?

Mr. BORAH. Yes; if I did not believe that the Monroe doctrine was fully protected, I would not hesitate to join in a resolution that would accomplish that end.

Mr. JOHNSON. The Senator believes in the Monroe doctrine, does he not?

Mr. BORAH. Yes.

Mr. JOHNSON. I ask that because of the Senator's remark that he thought it had been wrenched far from its moorings. Nevertheless, in the doctrine in its pristine purity he believes?

Mr. BORAH. The doctrine as announced I believe in, not as it has been too often misconstrued.

Mr. JOHNSON. Under the right of self-defense, every act that might be undertaken by this Nation under the Monroe doctrine could be undertaken with this treaty in full force and effect, is the position of the Senator?

Mr. BORAH. I have no doubt of that.

Mr. JOHNSON. That is equally so, is it not, in respect to every other signatory to the treaty?

Mr. BORAH. With reference to the Monroe doctrine.

Mr. JOHNSON. No; I mean with reference to any right of self-defense.

Mr. BORAH. Unquestionably.

Mr. JOHNSON. Does the Senator not construe the British note as a reservation or a condition to the execution of this treaty?

Mr. BORAH. I construe the British note the same as I construe Mr. Kellogg's statement, as a construction of what the British understand the principle of self-defense to be under the treaty. They undertake to state what they conceive to be self-defense as applied, as they say, to their territory.

Mr. JOHNSON. Their intimation is, if I may use the expression, that they announce now a Monroe doctrine in reference to certain regions of the world, and that they will insist upon the execution of that doctrine so far as they are concerned. The Senator, of course, is much more familiar with the language than I am, but the British note says in so many words:

> It must be clearly understood that His Majesty's Government in Great Britain accept the new treaty upon the distinct understanding that it does not prejudice their freedom of action in this respect.

That is, in relation to either interference with or attack upon the regions of the world in which Great Britain has an interest.

Mr. ROBINSON of Indiana. Or claims an interest.

Mr. JOHNSON. Yes. Does not that language make this treaty dependent upon the condition that is thus written by Britain in reference to it?

Mr. BORAH. No; if I understand the Senator's question correctly. I do not understand that the British note changes the treaty in any respect whatever or gives Great Britain any other rights than Great Britain would have had had she never written the note.

Mr. JOHNSON. I do not quarrel with the Senator's construction in the slightest degree in that regard, but some one in Great Britain, some statesmanlike mind, must have looked at the situation a little differently from the way in which we are now looking at it, because Britain writes, first, Britain's interest in certain regions of the world, and then writes distinctly that this treaty is executed upon the condition that Britain may act in reference to those regions of the world.

It is found on page 28, paragraph 10 of the Chamberlain note. The Senator is thoroughly familiar with it.

Mr. BORAH. Yes; I have it here.

Mr. JOHNSON. So, what we pass here as being wholly unnecessary somebody there deemed to be of very grave importance. Is not that a fair inference?

Mr. BORAH. That is possibly a fair inference. The British Government deemed it important to make clear what they regarded as self-defense under the conditions of their far-flung territory.

In order that I may be distinctly understood, my contention is, Senator, that had she never written this note at all Great Britain would have had the same right that she would have under the note, because it was up to her all the time to construe the question of self-defense, and that is what she is doing in the note. It was up to her all the time to say what constituted self-defense in her mind, and that is what she did in the note.

If I may be permitted to pass in judgment upon the acts of such able men as the British Government had representing them in this matter, I think the position of the United States, if we are going to adopt a technical construction, is infinitely stronger than that of the British Government, because the British Government refers to certain regions, and afterwards in debate in the House of Commons undertakes to indicate those regions. If we should adopt a strict construction, they having named one proposition, the rule would exclude them from including others, while we are acting under a general principle and may adopt the principle of self-defense anywhere, or under any circumstances, or in any region where we regard it as necessary for our safety.

Mr. JOHNSON. The point I was trying to suggest was this, not that the Senator's construction is at all erroneous, but that it was deemed essential by the British, in order to exercise hereafter what he terms the right of self-defense, specifically to designate it and to make as a condition precedent to the execution of this treaty the reservation of that right. So that they disagree, I think, with the view that we may have in regard to the breadth of the right of self-defense.

The language of that section the Senator read yesterday, but I recall it to him by simply saying, realize the indefiniteness of it, first, then the utter clarity and emphasis with which the British Government reserves its rights.

> There are certain regions of the world the welfare and integrity of which constitute a special and vital interest for our peace and safety. His Majesty's Government have been at pains to make it clear in the past that interference with these regions can not be suffered. Their protection against attack is to the British Empire a measure of self-defense. It must be clearly understood that His Majesty's Government in Great Britain accept the new treaty upon the distinct understanding that it does not prejudice their freedom of action in this respect.

If we had the same view that is apparent here, we, too, would sign this treaty upon the distinct understanding that the regions in which we are interested should always be subject to our right of self-defense, if we use that term, or subject to such peculiar rules or regulations or policies as we might have in respect to those regions. I was merely calling the attention of the Senator to the difference between the attitude we take

here and the attitude that obviously was taken by the British in this matter.

Mr. BARKLEY. Mr. President, in that same connection will the Senator permit a question?

Mr. BORAH. Will not the Senator permit me to answer the Senator from California so that I may keep order between the different parts of the Chamber?

The Senator from California has stated that the British Government deemed it important to make this statement as an expression of its idea of what constituted self-defense, and that it signs the treaty with the distinct understanding that in that respect it will exercise the right of self-defense.

We sign this treaty with the distinct understanding, so expressed by the Secretary of State, that we will exercise the right of self-defense according to our judgment and according to our discretion. There is no difference between the two propositions. Let me read what the Secretary said.

Mr. GLASS. Mr. President, before the Senator reads that, the Senator from California has added tremendously to our conception of the Monroe doctrine and to the pending treaty by saying that the treaty would be signed subject to any rules or regulations this Government may make with respect to the matter.

Mr. JOHNSON. The Senator may omit "rules and regulations," if he desires. Call it the Monroe doctrine alone.

Mr. GLASS. I wanted the Senator from California to omit "rules and regulations."

Mr. JOHNSON. It is of no consequence.

Mr. GLASS. That takes in a very wide scope.

Mr. JOHNSON. What is it that the British exception takes in? Is the Senator aware?

Mr. GLASS. I think it is a British Monroe doctrine.

Mr. JOHNSON. A British Monroe doctrine, not expressed at all, or expressed in the most general terms.

Mr. BORAH. It could not be any more general than the Monroe doctrine in the United States.

Mr. JOHNSON. Oh, yes, indeed.

Mr. BLAINE. Mr. President, will the Senator yield?

Mr. BORAH. Just one moment. I want to carry along this discussion with a degree of connectedness, if possible.

The same authority that wrote this note, the same representative of the British Government, in discussing this matter in the House of Commons, said this:

> The honorable gentleman found fault with the wording of my note with respect to the passage dealing with self-defense. He appeared to think that that was something which I had added, and that it had no parallel in the American note.

Then he said:

> I venture to think that it does no good to put about those exaggerated suspicions, and that it will be much more helpful to say, what is the fact, that our doctrine is exactly comparable to that of the American Government, that it is not a doctrine of aggression, that it is not a desire for territorial expansion, but a pure measure in self-defense necessitated by the geographical position of the Empire.

It is just the same proposition, in my judgment. Great Britain would not be stretching the principle of self-defense in defending those regions of country any more than we would be stretching the principle of self-defense if we should undertake to defend Patagonia against some foreign power.

It would be just as difficult—yes; far more difficult—to associate the conditions in Patagonia with the welfare and peace and safety of the United States than it would to associate the regions around the Suez Canal with the safety and security of the British Empire. I can well imagine, as can the Senator, that if the British Empire were in a controversy with a certain great power in Europe and they should begin to maneuver in the region which is designated by Sir Austen Chamberlain or in the region of the Suez Canal, it would be regarded as a menace to the British Empire. It would be taking possession of a part of the territory which, if in the possession of the enemy, would make it impossible for the British Empire to conduct connectedly her military affairs. So, as I see it, there is no difference in the two propositions whatever.

Mr. JOHNSON. I am not arguing that there is any difference in the two propositions.

Mr. BLAINE. Mr. President, I have asked the Senator to yield to me.

Mr. BORAH. I beg the Senator to let me conclude this proposition before I yield to anyone else.

Mr. JOHNSON. Just let me finish this colloquy with the Senator from Idaho, and then I shall yield with apologies to the Senator from Wisconsin.

Let us concede there is no difference in the two propositions. That was not the point I had in mind when I rose and questioned the Senator. Britain felt it necessary to state that position accurately. Is it the Senator's position that our country has up to this time accurately stated its position as well?

Mr. BORAH. Yes; that is exactly my position.

Mr. JOHNSON. And that that occurs in the Kellogg note and the Kellogg speeches?

Mr. BORAH. Yes; it is stated in the Kellogg note and in the Kellogg speeches, and aside from that, in my judgment, it would have been the same, so far as execution of the treaty is concerned, if neither one of the parties had ever written a line about it.

Mr. JOHNSON. Then is the Senator's position that it is inherent in the treaty?

Mr. BORAH. Exactly. Safer there than it could ever be under a reservation, for there it is inherent and inalienable.

Mr. JOHNSON. And required no statement either by Britain or the United States?

Mr. BORAH. Exactly.

Mr. JOHNSON. But that both countries have stated with exactness, so far as our doctrine is concerned, their position?

Mr. BORAH. Yes.

Mr. BLAINE. Mr. President——

Mr. BORAH. I think I am under obligation to the Senator from Kentucky [Mr. BARKLEY], who rose a few moments ago.

Mr. BARKLEY. In the same connection to which reference has been made by the Senator from California, after Sir Austen Chamberlain stated the position with reference to certain regions of the world, he had this to say:

> The Government of the United States have comparable interests, any disregard of which by a foreign power they have declared that they would regard as an unfriendly act.

Of course, he refers there to the Monroe doctrine. It seems from the correspondence that the British Government felt itself obligated, in the interest of fairness and honorable dealing with all of the signatories to this treaty, to serve notice upon them that in the application of the treaty hereafter it would regard itself as bound to protect the various regions to which reference is made. Sir Austen seems to make an effort to link it up with the Monroe doctrine. In the reply of the Secretary of State no reference is made to that suggestion of Great Britain and no reference is made to the various regions. Secretary Kellogg does not either confirm or deny the right of the British Government to take that attitude with reference to the treaty. Neither does he deny nor confirm the inference made by Sir Austen Chamberlain with reference to the Monroe doctrine.

Does the Senator from Idaho attach any importance to the fact that the Secretary of State in all this correspondence makes no mention whatever of this particular doctrine of the United States? While he discusses in general terms the right of self-defense and leaves each nation to determine when that right shall be exercised and in what part of the world, he seems to avoid any discussion of the question either through fear that it might be Pandora's box which might embarrass the Nation or because of some other reason. I would like to inquire of the Senator if he thinks any importance is to be attached to the fact that our Secretary of State enters into no discussion of that question at all in any of the correspondence between himself and the other side?

Mr. BORAH. The reason why the Secretary did not, as I understand—and I am quite sure I am correct—is that the Secretary of State stated the principle of self-defense, that it was inherent, as I said, and could not be denied to a sovereign power; that it was implicit in the treaty, and that he regarded and does regard the Monroe doctrine as much a part of our self-defense as the protection of any part of our territory, or any other interest.

Mr. BARKLEY. It might have been a little more illuminating if in connection with the British note there had been some reference to it so we might have avoided the apprehension that some Senators now seem to feel.

Mr. BORAH. Of course that is true; that is to say, as we look back over the correspondence in this way we can see things that might have been done to make it more explicit. But I want to say for the Secretary of State, that he brought this treaty before the Committee on Foreign Relations as it was proposed by Briand. Throughout voluminous correspondence running over a year he held the treaty to the exact words as it came to us in the first instance. He declined in different ways to accede to suggestions, and maintained the treaty as it was originally proposed. Mr. President, the reason why he did not mention the Monroe doctrine, or one reason at least, was because he has always taken the position that there was no occasion for mentioning it in view of the fact that the Monroe doctrine is a part of our self-defense.

Mr. REED of Missouri. Mr. President——

Mr. BORAH. I yield to the Senator from Missouri.

Mr. REED of Missouri. Does the Senator mean to say that that is the only reason why the Monroe doctrine was not mentioned?

Mr. BORAH. I said that was one of the reasons and, in my opinion, in the first instance the controlling reason.

Mr. REED of Missouri. I would not want to concede that that was the only reason, because I think there was another very material reason that I do not want to go into at this moment. I do not think there will be any dispute between the Senator and myself as to the facts if it becomes necessary to state them.

Mr. BORAH. No; there will be no dispute, in my judgment, between the Senator and myself as to the facts. There may be a difference of view as to the inferences to be drawn from them.

Mr. BLAINE. Mr. President, will the Senator now yield to me?

Mr. BORAH. Yes; I yield to the Senator from Wisconsin.

Mr. BLAINE. In connection with the very matter which the Senator from Idaho is discussing, I want to call his attention to what appears to be a sort of double-barreled proposition on the part of the British Government. Our Secretary of State, in all of his diplomatic notes and different speeches, has referred to the subject of self-defense generally. He did so in his final note of June 23, 1928, and so treated it in the first numbered paragraph of that note. The British Government prior to that, on May 19, must have had a different conception of the question of self-defense than had our Secretary of State, for in the British note of May 19 Chamberlain first takes out the question of general self-defense or self-defense in general and in paragraph 4 of his note had this to say:

> After studying the wording of article 1 of the United States draft, His Majesty's Government do not think that its terms exclude action which a State may be forced to take in self-defense. Mr. Kellogg has made it clear in the speech to which I have referred above that he regards the right of self-defense as inalienable, and His Majesty's Government are disposed to think that on this question no addition to the text is necessary.

Then under paragraph 10 of the same note Chamberlain engrafts upon the subject and upon the treaty a new proposition.

Mr. BORAH. I do not think so.

Mr. BLAINE. At least the British Government must have conceived the situation to be that the general discussion on the question of self-defense was not sufficient, and therefore proposed to make a special exception in reference to the formula or policy concerning self-defense. Since the British Government concedes that the definitions applied by our Secretary of State and himself in the diplomatic notes was not sufficient to be all inclusive of the right of self-defense, why should not the United States also follow the very assumption of the British Government and engraft upon the treaty an interpretation with respect to the Monroe doctrine and its application?

Mr. BORAH. I think I have made myself as clear as I can upon that proposition. I will repeat, however, that in my opinion the British Government was seeking to do nothing more than by way of illustration to state its conception of self-defense under the treaty. It would have had just the same freedom had it never said anything.

Mr. BRUCE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Maryland?

Mr. BORAH. I yield.

Mr. BRUCE. May I ask the Senator just a single question, because I want to understand clearly his position? As I understand, the position of the Senator is that it makes no difference whether Great Britain asked for any such reservation or not, and it makes no difference whether we make any reservation with regard to the Monroe doctrine, because whatever any nation under this treaty chooses to call self-defense is, for the purposes of the treaty, self-defense.

Mr. BORAH. Undoubtedly, and that is the reason why these technical discussions in the Senate will never be of any practical value when the exigency arises. Each nation will determine for itself, under the circumstances as they arise and the conditions which are presented, what it conceives to be self-defense. As I said yesterday, undoubtedly that is regarded by men, and by the able Senator from Maryland in all probability, as a great weakness of the treaty. I regard it as a weakness inherent in human nature of any condition which I know of no way at this time to obviate. I know of no way by which to take away fram a nation the right of self-defense.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield for a question?

Mr. BORAH. I yield.

Mr. ROBINSON of Arkansas. The Senator just stated that he knows of no way to take away from a nation the right of self-defense. The Senator did not mean to imply by that that he would like to find a way to accomplish that end, did he?

Mr. BORAH. No indeed. I say I know of no way; but even if a way were suggested as proposed, I am not desirous of depriving any country of that right. If we undertook it, of course, it would be perfectly futile. I do not desire to subscribe to a supergovernment to exercise for us the right of self-defense instead of exercising it ourselves; so I have no desire to undertake to find a way.

Mr. GEORGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Georgia?

Mr. BORAH. I yield.

Mr. GEORGE. I merely want to say that, as I interpret the Senator's position, the treaty neither enlarges nor restricts the right of national self-defense.

Mr. BORAH. The Senator is quite right.

Mr. GEORGE. It neither enlarges nor restricts nor in any way amends the Monroe doctrine?

Mr. BORAH. The Senator is quite right.

Mr. EDGE. Mr. President, may I ask a question? As I understand the Senator from Idaho he goes further and expresses the opinion that if any effort had been made to define what constituted self-defense such limitation would leave a decision more contracted than it is under the terms of the treaty? In other words, any limitation would naturally place a nation in the position that it must remain within the limitation?

Mr. BORAH. Certainly. If you would undertake to define self-defense what would you say? That it was the right to defend yourself.

Mr. EDGE. In that regard these few lines from Secretary Kellogg's statement appeal to me as being very appropriate to that contention:

> Inasmuch as no treaty provision can add to the natural right of self-defense, it is not in the interest of peace that a treaty should stipulate a juristic conception of self-defense, since it is far too easy for the unscrupulous to mold events to accord with an agreed definition.

I repeat, I think that is very appropriate.

Mr. BORAH. The Supreme Court of the United States has always very carefully refused to undertake to define "due process of law," and I think it would be just as difficult to define self-defense. Such a definition would amount to absolutely nothing until the facts in a particular case were known.

Mr. McLEAN. Mr. President, I should like to call the attention of the Senator from New Jersey to the fact that——

Mr. BORAH. Well, the Senator from New Jersey has not the floor.

Mr. McLEAN. Very well.

Mr. BORAH. I am willing to answer questions, but I do not want Senators to engage in debate in my time.

Mr. BINGHAM. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Connecticut?

Mr. BORAH. I yield.

Mr. BINGHAM. Does the Senator contend that the right of self-defense covers our right to protect our citizens and their property in whatsoever part of the world they may be?

Mr. BORAH. Yes; I stated that on yesterday. But that right may also be invoked under another principle.

Mr. SHIPSTEAD. Mr. President, will the Senator from Idaho yield to me?

Mr. BORAH. I yield to the Senator from Minnesota.

Mr. SHIPSTEAD. Is it the Senator's understanding that the letters that have passed between the Secretary of State and various foreign countries become, with the signature of the treaty, the common understanding of the signatories as to what the treaty means?

Mr. BORAH. Yes; written interpretations of the treaty. France and Great Britain, and I think also Germany referred to their notes as interpretations—not as reservations but as interpretations—of the treaty. That is all they are. The signatories could have just as easily made the interpretations afterwards as before.

Mr. SHIPSTEAD. I desire to ask the Senator from Idaho another question. Those interpretations of the treaty were accepted by all who signed the treaty? Is that the Senator's understanding?

Mr. BORAH. No; the interpretations of Great Britain, for instance, were not accepted by some of those who adhered to the treaty.

Mr. SHIPSTEAD. Does the Senator understand that they are accepted by us?

Mr. BORAH. Yes; as we construe them. Great Britain was doing nothing more than interpreting her idea of self-defense, and we accept her construction of it; that is, the construction that she decides for herself and determines for herself what is self-defense. That was in the treaty, anyway.

Mr. SHIPSTEAD. Then, if I may ask the Senator another question, at some time in the future if a controversy should arise, and the treaty should have to be interpreted, is it the Senator's understanding that the parties to the controversy would be forced to go back to the official interpretation given to the treaty before it was signed in order to apply the treaty to the future controversy?

Mr. BORAH. The treaty would be applied to the future controversy; in other words, in my opinion, these notes do not add anything to the treaty nor take anything from the treaty. Therefore when we come to apply the treaty or to interpret the treaty upon a state of facts we shall have to go to the treaty.

Mr. SHIPSTEAD. Does the Senator mean the treaty exclusive of the notes?

Mr. BORAH. Absolutely. Do not understand that I contend that a treaty might not be modified by notes, but what I contend is that the notes referred to did not undertake to modify the pending treaty. They simply placed a construction upon the treaty which anyone accepts, because it is in the treaty itself, and would have been there had the notes never been written.

Mr. BLAINE. Mr. President, will the Senator yield to me?

Mr. SHIPSTEAD. I shall be through in just a moment. I do not want to be obstreperous.

Mr. BORAH. Not at all.

Mr. SHIPSTEAD. I am making these inquiries for my own information.

Mr. BORAH. In so far as I am able to do so, I am willing to satisfy the Senator from Minnesota.

Mr. SHIPSTEAD. As I understand the Senator's point of view, he regards these notes as being a part of the treaty?

Mr. BORAH. No; I do not in the sense in which I think the Senator is now asking the question. I regard these notes in the light of the fact that they add nothing to the treaty nor take anything from the treaty as having no legal effect whatsoever.

Mr. SHIPSTEAD. The notes are a part of the treaty without adding anything to it or taking anything from it.

Mr. BORAH. I say that the notes are interpretative.

Mr. SHIPSTEAD. Yes; and are official because they were accepted by those who signed the treaty. Is that the Senator's understanding?

Mr. BORAH. No. In other words, when the Senator says "accepted" he means accepted in the sense there resulted a different understanding of the treaty than it would have had if the notes had not been written. Of course, we accepted the notes, we received them, but we did not in any way modify our views as to the treaty, and the notes did not modify the treaty. Therefore, when it is undertaken to interpret the treaty in the future, it will be interpreted just as if the notes had never been written. I take that position, and I want it to be distinctly understood.

Mr. SHIPSTEAD. Mr. President, I should like to ask another question of the Senator for the sake of clearing up a little difficulty which I have in understanding this problem. In November, 1850, we signed a commercial treaty with Switzerland and certain notes passed in connection with that treaty. They were not physically a part of the treaty which was signed but certain interpretative notes passed between the two Governments. No controversy arose until 1898 when Switzerland came with certain claims.

The United States Government replied that the claims were contrary to the established policy of the Government of the United States. The Swiss Government referred the Government of the United States to the interpretive notes which had passed prior to the signature of the treaty. When that fact was called to the attention of John Hay, he immediately capitulated and said that justice and honor demanded that the interpretation of the treaty at the time it was signed would have to govern action under the treaty in 1898. Now I want to know if the Senator draws a line of distinction between the notes passed in 1850 between the Government of the United States and the Government of Switzerland and the notes which have passed in the negotiation of the pending treaty?

Mr. BORAH. Not at all. I am familiar in a general way with the incident to which the Senator refers, and I do not draw any distinction as to the reception of the notes, but in the Swiss incident there was an interpretation placed upon the treaty different from what the interpretation of the treaty would have been had the notes not been written. I want to make my contention plain. I do not contend, as I have said over and over again, that the interpretation of a treaty may not be changed by a note or notes, but what I contend in this instance is it has not been done, because the governments responsible for the notes have said nothing in the notes that is not in the treaty without the notes. If they had made some statement in their notes which was not contained in the treaty, under a fair interpretation of it, the Senator would have his Swiss case, but that is not this instance. For example, let me ask the Senator a question: Suppose in the future the question should arise as to what constituted self-defense in a particular transaction, what possible light would the statement of Mr. Kellogg throw upon the treaty, what possible light would the statement in the English note throw upon the treaty, when both of them do nothing more than confirm the proposition that each nation has a right for itself to determine what is self-defense?

Mr. SHIPSTEAD. And within that right to determine that wars conducted by the League of Nations come within the right of self-defense?

Mr. BORAH. Certainly, if the facts and conditions are such as to reach this treaty.

Mr. BLAINE. Mr. President——

Mr. BORAH. I yield to the Senator from Wisconsin.

Mr. BLAINE. Is it the Senator's conception that when America adheres to this treaty, if we shall adhere, that action is a recognition of the claim of the British Government under paragraph 10 of the British note of May 19, 1928?

Mr. BORAH. It is a recognition of the right of the British Government to construe the doctrine of self-defense to apply to any territory which she conceives it to be necessary to apply it for protection.

Mr. BLAINE. Then, it is a recognition that Great Britain may extend any doctrine she may pronounce to any portion of the world in which she has a special interest?

Mr. BORAH. Undoubtedly. She has the right to make the construction; whether the public opinion of the world would sustain her may be a different thing.

Mr. BLAINE. And that we recognize that from the beginning of this treaty?

Mr. BORAH. Yes. We recognize it by this treaty, and we would recognize it if the British Government had pursued the policy of remaining silent and signing the treaty without a word.

Mr. BLAINE. Is it not a fact that the American Monroe doctrine was never recognized by any document or by any diplomatic note by any government until the recognition in the covenant of the League of Nations?

Mr. BORAH. I believe so; but we are neither recognizing nor refusing to recognize the Monroe doctrine here; we are recognizing the doctrine of self-defense, and in the doctrine of self-defense is included the Monroe doctrine.

Mr. SWANSON. Mr. President, if the Senator will permit me——

Mr. BLAINE. So that any nation can give justification to its acts by sanctifying that act as an act of self-defense?

Mr. BORAH. Exactly. As I said yesterday, that may be regarded by some as the weakness of this treaty; we have got to leave it to each signatory of the treaty to determine for itself what is self-defense. It may construe the treaty out of all reason, and there is no one to censor it except the public opinion of the world. I know of no way to curtail that right. I would not any more take it away from Great Britain with her world-wide territories than I would take it away from the United States. Great Britain must be the judge, and she must answer to the conscience of the world whether she has acted in good faith in construing it. There is no superior court or other tribunal to which appeal can be made except the judgment of the world.

Mr. BLAINE. Let us assume a situation that might well occur: India, having something over 300,000,000 subjects, under the jurisdiction and sovereignty of the British Government, might assert her independence and the American Government might find itself in a situation whereby it would be to its advantage and that of civilization to take a certain course in connection with that assertion of independence by the people of India which would in effect border upon an act of war. Are we not by this treaty recognizing that we have no right to do that; that we must first submit the case to some tribunal, some organization for a pacific settlement; and are we not binding ourselves against any act in reference to the possible independence of the nations that are now under the British dominion?

Mr. BORAH. Mr. President, if the Indian Government should undertake to establish its independence, undoubtedly the British Government under this treaty would have a right to pursue such course as would retain the Indian Government

under British dominion; and the United States would have no right whatever to interfere in that matter. She has not now any right to do so.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Montana?

Mr. BORAH. I yield.

Mr. WALSH of Montana. Some of the passages that have taken place might possibly lead to the conclusion that if Great Britain waged any kind of a war, and claimed to be doing it in self-defense, the other nations signatory to the treaty would be estopped from asserting that she was not acting in self-defense.

Mr. BORAH. Oh, yes.

Mr. WALSH of Montana. I hope the Senator will make that clear.

Mr. BORAH. Certainly. For instance, when the situation arises and the conditions are presented, and Great Britain acts upon the theory of self-defense, the United States is not bound to accept Great Britain's judgment. We may freely disagree with that proposition. The whole world may freely disagree with it. She may be morally condemned for any such course, and likely would be if it did not meet with the ordinary principles of self-defense. The treaty does not involve us in a combine to approve what any particular signatory of the treaty says is self-defense; but if they act upon it and violate the treaty, we are relieved from the obligations of the treaty.

Mr. WALSH of Montana. I ask the question because in one of the articles introduced in the RECORD yesterday by the Senator from Wisconsin [Mr. BLAINE] the statement is made that we sanction any war in which Great Britain may choose to engage. I should like to have the views of the Senator from Idaho on that subject.

Mr. BORAH. Of course, I have read that article. I really do not know upon what theory that assertion is made. We do not sanction any war, Mr. President. The very object and purpose of this treaty, the fundamental principle upon which it is written and rests, is to condemn all war, to reject force in the settlement of international affairs. By no possible construction can it be said that we have sanctioned any war either that Great Britain may wage or that any other country may wage. We do not sanction any war that the league may wage. We do not sanction the use of force anywhere. If Senators will read this treaty, and take the treaty for what it says and not what it has been asserted that it says, they will come to the conclusion that there is just one fundamental principle in the treaty, and that is a solemn pledge upon the part of these nations, representing now practically all the inhabitants of the earth, that they will not seek other methods than peaceful methods for the settlement of their controversies.

It may be said that that is not much. I think it is a stupendous fact. I think the fact that 60 nations, representing the inhabitants of the earth, can be drawn together in a solemn pledge, backed by the conscience and the moral forces of their people, that henceforth they will pursue no course save that of peace, is a stupendous fact. We have been so thoroughly saturated, however, with the idea that there is nothing in international affairs save force, that we can give no credence to anything save that which is backed by an army and a navy.

I undertake to assert that the greatest factor in international affairs to-day is the moral forces of the masses of mankind; and this is an attempt to mobilize those forces.

Mr. FESS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Ohio?

Mr. BORAH. I yield.

Mr. FESS. Has there ever been an attempt in international law to define self-defense?

Mr. BORAH. No; not to define it. A great many international-law writers say that the right of self-defense among nations is as inherent and inalienable as the right of self-defense among individuals.

Mr. FESS. The omission of it in this treaty is not due to a desire to avoid it; but it is difficult to define.

Mr. BORAH. You could not define it. Suppose you attempted to define self-defense as to yourself; what would it be? The right to defend yourself. Suppose a nation undertook to define self-defense: It is the right of the nation to defend itself.

Mr. FESS. That is the reason why we leave it to each individual nation to determine what self-defense is.

Mr. BORAH. Exactly.

Mr. FESS. And, while that is the weakness of the treaty, it can not be corrected.

Mr. BORAH. I have said that some will regard it as the weakness of the treaty, and of course it is, from one viewpoint. From another viewpoint it is the strength of the treaty.

Mr. TYDINGS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Maryland?

Mr. BORAH. I yield to the Senator.

Mr. TYDINGS. I should like to ask the Senator whether it is his opinion that the right of self-defense precedes the duty to arbitrate, or whether the duty to arbitrate precedes the right of self-defense?

Mr. BORAH. As I said yesterday, under Article II we agree to pursue no other course than that of peaceful means in the settlement of international affairs. If a controversy should arise between this Government and another government, it would be the duty of this Government to call attention to Article II and undertake to bring about a peaceful settlement and adjustment of the matter by peaceful means. Undoubtedly that would be the first thing we would do. If the other nation declined to settle it by peaceful methods and rejected all our overtures, that government would be in a rather difficult position before the world if it claimed that it was acting in self-defense.

Mr. TYDINGS. The thought I had in mind was that inasmuch as the right of self-defense is inherent in each nation signatory to the treaty, the right of self-defense, if that nation considers it necessary to exercise it, precedes the right to arbitrate, even though the second article specifically binds the nation to arbitrate all disputes.

Mr. BORAH. Of course, the idea of self-defense necessarily involves an attack from somebody. If the attack comes, of course, the most fundamental right, the first right, is that of self-defense; but under Article II you can go far toward preventing that attack, assuming that the nation is acting in good faith.

I think I said yesterday, but this matter has continued to such an extent that I am not clear as to what ground I have covered, that there is really nothing in this treaty except the doctrine which the United States has advocated ever since its natal hour, and that is the settlement of all controversies through peaceful means, if it is possible to do so. We have now an opportunity to extend this doctrine to the world. I think it a marvelous achievement.

Mr. TYDINGS. Mr. President, as I understand, the whole idea of the treaty is to arbitrate everything.

Mr. BORAH. Not to arbitrate, but to settle through peaceful means. The controversy may be settled through diplomatic methods or any other method of peaceful settlement.

Mr. TYDINGS. But, at the same time, I think the treaty would give any nation which was a party to it the right of self-defense before it was asked to arbitrate the matter or settle it through peaceful channels, if that nation saw fit to settle it by the exercise of the right of self-defense.

Mr. BLAINE. Mr. President, will the Senator yield for another question?

Mr. BORAH. I yield.

Mr. BLAINE. Assuming that paragraph 10 of the British note had been the declared British policy prior to our American Revolution, could Lafayette have come to America under the circumstances that he did, and could Franklin have gone to France under the circumstances that he did, without having involved France in war with the British Government?

Mr. BORAH. Lafayette got to America by stealing away from the espionage of his king. Lafayette did not come here by authority of the French Government or by authority of anybody that would be bound by a treaty. Lafayette stole away, and came here in the first instance really as a fugitive from his government, because his government was not willing for him to come. So that the illustration is not, in my judgment, applicable, because he was not representing any government which would have been bound by a treaty.

Mr. BLAINE. I associated Franklin with the acts of Lafayette. Franklin did not steal his way into France, and when he reached France he was not there regarded as a criminal nor a fugitive; and France did certain acts—not only the French citizens, but, as well, the French Government—acts that to-day would be regarded as hostile acts; acts that in my opinion would have involved France in war if paragraph 10 of the British note had then been the declared policy of the British Government.

Mr. BORAH. In my opinion, the treaty would not have any application to the Franklin episode at all, and very little to the Indian episode; because if India should undertake to establish her independence, and should proceed to the point

where she was sending representatives to other governments and seeking to establish diplomatic relations with the other governments, the Government of the United States, under this treaty, would have the right to exercise its discretion as to whether the time had arrived under international law when it could justly recognize that government and receive its ambassadors; and this treaty would not have the slightest effect upon it.

Mr. FLETCHER. Mr. President, may I suggest, somewhat in line with the inquiry by the Senator from Maryland [Mr. TYDINGS] as to whether a country signing the treaty would be obliged to resort to pacific means before exercising the right of self-defense, that it would depend altogether upon the circumstances and the facts; would it not?

Mr. BORAH. Exactly.

Mr. FLETCHER. If one government actually attacked another, that government would have the right to defend itself without any diplomatic exchanges.

Mr. BORAH. Precisely. I perhaps misunderstood the Senator, but the Senator's interpretation is undoubtedly correct. It would depend entirely upon the circumstances. If the United States or any other Government was attacked, of course it would have the right to invoke the principle of self-defense instantly, because that is what self-defense is.

Mr. TYDINGS. If the Senator will yield, the point I was trying to bring out was that the right of self-defense is paramount to every other right or statement in the treaty.

Mr. BORAH. Whenever the facts put it into operation.

Mr. President, I was discussing the Monroe doctrine when the principle of self-defense was again brought into the discusssion; and notwithstanding it will be somewhat disconnected, I think I ought to put into the RECORD some excerpts in regard to the Monroe doctrine as it relates to the question of self-defense.

Mr. Root, in the Journal of International Law in July, 1914, says:

> The doctrine is not international law, but it rests upon the right of self-protection; and that right is recognized by international law. The right is a necessary corollary of independent sovereignty. It is well understood that the exercise of the right of self-protection may, and frequently does, extend in its effect beyond the limits of the territorial jurisdiction of the State exercising it. * * * Since the Monroe doctrine is a declaration based upon this Nation's right of self-protection, it can not be transmuted into a joint, or common, declaration by American States, or any number of them.

Again, he says:

> It is to be observed that in reference to the South American governments, as in all other respects, the international right upon which the declaration expressly rests is not sentiment or sympathy or a claim to dictate what kind of government any other country shall have, but the safety of the United States. It is because the new governments can not be overthrown by the allied powers "without endangering our peace and happiness" that "the United States can not behold such interposition in any form with indifference."

Mr. Cleveland, in his message in 1895, said, speaking with reference to the Monroe doctrine:

> The doctrine upon which we stand is strong and sound because its enforcement is important to our peace and safety as a nation, and is essential to the integrity of our free institutions and the tranquil maintenance of our distinct form of government.

That is the well-stated, briefly stated, succinctly stated principle of the Monroe doctrine.

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Missouri?

Mr. BORAH. I do.

Mr. REED of Missouri. Would it interrupt the Senator if I called his attention to the fact that the British minister, in the notes discussing the Venezuelan controversy, or at least in his public statements, declared that the Monroe doctrine was a bit of American impudence, and that it never had been recognized?

Mr. BORAH. There have been Englishmen who transgressed the laws of propriety, as well as other people. They are liable to do that over there, as we are over here, but we do not pay much attention to it. We go ahead and maintain the Monroe doctrine. Now, it has come to have considerable respect over there. They mention it in their note here. Abraham Lincoln once said that the most sublime virtue which a public man could possess was patience, and I think that will apply to nations as well. We have been patient until the time has come when everybody recognizes that the Monroe doctrine is a part of our national safety, and they respect it. In my opinion there would not be any more danger of a foreign government challenging that doctrine than there would be of their making an attack upon us.

Mr. Buchanan said in 1848:

> The highest and first duty of every independent nation is to provide for its own safety and acting upon this principle we should be compelled to resist the acquisition of Cuba by any powerful maritime state with all means which Providence has placed at our command.

Prof. Bushnell Hart, in his treatise on the Monroe doctrine, after speaking of the changes and different interpretations of the Monroe doctrine, said:

> There are two fundamental principles to which all agree. The first is that the doctrine has always been, and now is, directed primarily to the defense and welfare of the United States; and secondarily, to the defense and welfare of other American states.

Professor Callihan, quoted by Professor Hart, says:

> It may be fitly called the doctrine of national defense, which in its results may be regarded also as a doctrine of Pan American defense.

Professor Woolsey says:

> There are now three fundamental principles which characterize the policy of President Monroe as it was and as it is. First, the Monroe doctrine was a statement of policy originated and maintained by reason of self-interest, not of altruism. Second, it was justifiable by reason of the right of self-defense (which is a recognized principle of international law). Third, it called no new rights into being, therefore, whenever it oversteps the principle of self-defense reasonably interpreted, the right disappears and the policy is questionable because it then violates the rights of others. * * * The Monroe doctrine is based upon the right of self-defense. This is the first law of nations as of individuals.

I think the statement of Professor Woolsey is an exceedingly illuminating one.

> It called no new rights into being; therefore whenever it oversteps the principle of self-defense reasonably interpreted, the right disappears and the policy is questionable.

Frederick Coudert, the great lawyer, said:

> In its essence the doctrine was merely one of safety for the United States. Its germ is contained in Washington's Farewell Address. Experience has shown that every European war involved a struggle between the various colonial possessions of the contestants, and the doctrine of hands off on this continent was nothing more than a necessary measure of safety.

Mr. WALSH of Montana. Mr. President, will the Senator yield?

Mr. BORAH. I yield.

Mr. WALSH of Montana. In that connection, will the Senator permit me to read a single paragraph from the celebrated Olney letter on Venezuela?

Mr. BORAH. I am very glad to.

Mr. WALSH of Montana. And another paragraph, in view of the remark just made by the Senator from Missouri, as follows:

> That the rule thus defined——
>
> That is, the Monroe doctrine—
>
> has been the accepted public law of this country ever since its promulgation can not fairly be denied. Its pronouncement by the Monroe administration at that particular time was unquestionably due to the inspiration of Great Britain, who at once gave to it an open and unqualified adhesion which has never been withdrawn.

I call attention to this:

> But the rule was decided upon and formulated by the Monroe administration as a distinctively American doctrine of great import to the safety and welfare of the United States after the most careful consideration by a Cabinet which numbered among its members John Quincy Adams, Calhoun, Crawford, and Wirt, and which before acting took both Jefferson and Madison into its councils.

Mr. BORAH. I thank the Senator. Now, Mr. President, could the Monroe doctrine rest upon any more secure basis than that of self-defense, when we recognize that principle as inherent not only in this treaty but in all treaties, inherent in the nations, and inalienable; and also recognize that we are the sole judges of what constitutes our security, our safety, and our self-defense? No reservation, no resolution, no specification, could make it more secure, more within the protection of our Government, than to treat it as what it is, an essential part of our self-defense, and thereby protected by the inalienable right of self-defense.

Mr. President, yesterday when the interrogatories were first submitted which led us into another field of discussion I was

discussing the question of implied sanctions under this treaty. I do not feel, notwithstanding I have taken entirely too much time of the Senate, that I ought to leave that subject what I deem to be somewhat incomplete, and I will be as brief in regard to it as I may.

I called attention yesterday to the fact that there are no sanctions to be implied from the language of the treaty itself; that is, no implied obligation to use force, or to enforce the treaty against a nation which should see fit to violate it.

I called attention further to the fact that nowhere in the correspondence, in the numerous notes between the different governments, the governments which afterwards adhered to the treaty, has there been any indication, so far as I find, of any implication, that there are any sanctions expressed or implied in the treaty.

I also called attention to numerous statements, among others the statement of Lord Cushendun, at the time of the signing of the treaty, Lord Grey, and others, to the effect that there were no sanctions, express or implied.

It has been said, however, that if we do not, in case the treaty is violated, join with the other nations in punishing the violator of the treaty, the European powers will have a chance to charge bad faith; in other words, it is said that Europe looks upon this treaty as one providing for implied sanctions, and that we will be expected to maintain it as against those who disregard it. I do not know of any expression of that kind upon the part of any responsible party in Europe. If any such statement has been made, it has escaped my rather vigilant observations in regard to this matter.

I do know that numerous statements by those in authority, and by the leading press of foreign countries, have been to the very opposite effect, and in my opinion there is no misunderstanding whatever in England, in France, or anywhere in Europe, as to just exactly what this treaty means, with reference to sanctions. There is no understanding that the United States, for instance, is under any obligation whatever to use force or to maintain by force the treaty. The other nations understand perfectly that it is a voluntary obligation, binding upon each nation in so far as it respects its obligation, to settle its controversies in a peaceful way; that if any nation disregards the treaty, it steps out from under the treaty, and the treaty is at an end with reference to all other nations so far as that nation violating the treaty is concerned.

The New Republic, discussing this matter as to the view of Europe, seems to me to have a very pertinent paragraph. It refers to the statement having been made that Europe has this understanding as to the treaty, and says:

> Europe's misunderstanding of the treaty's terms is a matter which has some interesting aspects. It is not based on anything Mr. Kellogg or any other official has said. It is not based on the text of the document. Then where does it come from?
>
> It is true that if we sign the treaty, as has been stated, and then do only what we have agreed, and not what some one hopes, we will be criticized, but we should have been criticized equally for failing to participate, even if the treaty had never been thought of.

In other words, Mr. President, whatever idea may prevail in scattered places or in fugitive ways with reference to any implication, arises not by reason of the treaty, but by reason of circumstances and conditions which lead those entertaining the idea to hope that something may be done by the United States in the way of involving itself in European affairs. A hope they would have as much reason to entertain if there had been no treaty.

I want to read here a statement of Premier Baldwin which I think is a most remarkable statement when one comes to analyze it and consider the implications of it. It was made on November 8, 1928. Speaking with reference to this treaty, he said:

> Believe me, the alternative before us in Europe is very simple and the choice ought to be easy. We must either keep faith with the spirit of the pact that we have signed or in time we must go down the steep place together like the Gadarene swine, and perish eternally.

Talk about sanctions for a treaty; there is no sanction for a treaty, after all, but what the nation conceives to be its interest. That is, at last, the only sanction. It does not make any difference what you agree to, you must test it at last by what the signatories to the treaty, when their exigency arises, conceive to be necessary to their interest, to their protection, to their preservation, or to their welfare.

I think, as the Premier clearly indicated, Europe has arrived at the point where she believes that the war system means the destruction of European civilization; that if we can not find some way to settle international controversies other than by force of arms the civilization of Europe will give way, cave in, break down. Self-preservation has become the one powerful function for this treaty. The war system is undermining civilization, bringing ruin and misery to millions, and the only hope is the policy embodied in this treaty. Here is the strength and the worth and the function for this treaty. Sink or swim, live or die, something like this treaty is the only way of escape from the impending doom.

Mr. BRUCE. Mr. President, may I ask the Senator from Idaho, then, why is it that these European nations keep on arming? Mussolini has just told us that bayonets and cannons are steadily increasing in Europe. Lloyd George has lately sounded a note of warning to the same effect. At present one-sixth of the entire aggregate income of the world is devoted to the maintenance of armies and navies, and there is 1 soldier for every 300 civilians throughout the world. I do not see any indication that those moral forces upon which the Senator is so strongly disposed to rely are as powerful as he seems to think that they are, or that Europe is as anxious for peace as he supposes it to be. It seems to me that the Senator forgets that a nation, when it signs a treaty, may have one conception of its self-interest and then a little later on find that it has made a mistake and form another conception of its self-interest.

We all know that in 1839 Germany thought that it was to its interest as well as to the interest of Europe generally that it should guarantee the neutrality of Belgium. Yet in 1914 she changed her view and hewed and burned her way with sword and fire over the soil of Belgium to France. Before the World War Italy thought that it was to her interest to enter into the tripartite treaty with Austria and Germany. Yet when the crucial time came for the performance of her obligations she aligned herself with the Allies and with us and not with Austria and Germany. So I say that it seems to me that trust in the mere enlightened self-interest of a country for the purposes of peace is an unreliable thing.

Mr. BORAH. Mr. President, the Senator is explaining now just exactly what I stated—that in the last analysis it is self-interest that controls. He has just stated that at one time they thought it was to their interest to do one thing, and at another time that it was to their interest to do another thing, and, of course, that is true. So I repeat that the Senator is quite in accord with what I stated a moment ago—that in the last analysis it is in response to what the nation conceives to be necessary to its self-preservation or to its self-interest that it will act.

Then what I say in addition to that is that Europe has come to the conclusion that self-preservation—that its deepest and most permanent and profound self-interest—is to get rid of war and of armaments and to pursue a course which this treaty points out.

Mr. BRUCE. I ask the Senator, has Europe arrived at any such point? If so, why is it that we find it impossible to reach any sort of permanent agreement with Great Britain, one of the most enlightened and highly civilized countries in the world, with regard to a proper naval ratio? Practically every effort since the League of Nations was established to bring about a disarmament of the nations of the world has proved abortive.

The Senator may have different ideas about peace from mine, but I do not see on just what rainbow of real hope his eyes are fixed.

Mr. BORAH. The Senator's idea of peace is fixed upon the proposition which is now sinking Europe to the bottomless pit.

Mr. BRUCE. My idea of peace is that it is a thing that to exist must be commended.

Mr. BORAH. Just as the Kaiser thought that the only thing was force, that the only thing that people respected was armies and navies, and the Senator sees where they landed.

Mr. BRUCE. Still the Senator does not think that the peace of a city could be preserved without the backing of force, does he?

Mr. BORAH. No; I do not think so; but the application of that proposition to individuals within a State which has the power to enforce is a wholly different proposition than undertaking to enforce the same proposition between nations because, as I said a while ago, we can not find a superpower to do it. The distinction between individuals and communities, between individuals and sovereign states in the application of force, wise men have long since recognized.

Mr. BRUCE. I admit that it is a more difficult thing to police international peace than to police the peace of a city or the peace of a single State of the Union or the peace of the United States. But it seems to me that just because it is more difficult it is an idle dream to believe that the peace of cities has to be policed, that the peace of a single State of the Union has to be policed, and that the peace of the United States has to be

policed, but that yet the peace of the world need not be policed. The Senator would rely upon nothing but the interchange of one vain empty promise for another without any sanction to enforce either.

Mr. BORAH. The Senator from Maryland ought to have been general counsel for the German general staff, not the German people but the general staff.

Mr. BRUCE. No; I would much prefer to be counsel for our own Government or for the Government of the Kingdom of Great Britain which, notwithstanding the fact that it is actuated to an extraordinary degree by principles of good sense and good feeling in its international relations, yet has the prudence to keep its powder dry and to maintain not only for the preservation of the liberties of the English people but for the progress of human civilization itself throughout the world a fully adequate army and navy.

Mr. BORAH. Now if the Senator has concluded I would like to proceed.

Mr. BRUCE. Very well.

Mr. BORAH. I want to recall again the language of Premier Baldwin, because he is now giving an able illustration of the fruits of the policy and the system which the able Senator from Maryland has been eulogizing. It is true that the British Empire has endeavored through the years to keep its powder dry and to keep up its armies and its navies, and to-day it is loaded with a superhuman debt, with millions of people out of employment, adding still millions more in the way of armament, and this is what Premier Baldwin said the near future seems to have in store:

> Believe me, the alternative before us in Europe is very simple and the choice ought to be easy. We must either keep faith with the spirit of the pact that we have signed or in time we must go down the steep place together like the Gadarene swine and perish eternally.

That is the Dantean hell toward which all are tending under this doctrine of force as the sole preserver of peace.

> Let us all to-night, and there are representatives here of many great powers, accept this opportunity which has been given to us for a new start and go forward with new faith and with new hope. I believe the time may come when in the histories of this period there will be no greater act credited to the United States than this, that in this year she had the high honor in voicing the aspirations and desire of mankind in presenting that pact to the nations for signature.
>
> Only let us remember what it is we have signed. It is so tremendous a thing that few of us realize it, and the result of every signature will be nothing unless the nations, realizing to what they are committed, make up their minds their signatures shall be honored to the end of time.

I do not know, and of course no man knows, whether this treaty will long be kept. All laws, whether enacted by man or promulgated by God, are made with the possibility of being broken and shattered; but I do believe, Mr. President, as the British Premier so well said, that if we can not find a means by which to adjust international affairs other than that of relying upon the Army and the Navy, if we can not find a method through peaceful means or through peaceful ways to adjust our controversies, civilization is imperiled as it was just prior to or in the coming of the Dark Ages.

Mr. FESS. Mr. President, will the Senator yield for another question?

Mr. BORAH. I yield.

Mr. FESS. In the judgment of the Senator will the operation of this treaty open the way for further limitation of armament in time to come?

Mr. BORAH. I sincerely believe so.

Mr. FESS. It would appear to me that would be one of the main objects of the treaty.

Mr. BORAH. That is a main object of the treaty and yet, after all, we have got to have a different psychology in international affairs, because if we did not have armies and navies and if we had this war psychology, they would fight with their fists. We have got to create a faith in peaceful methods for the adjustment of international affairs. We have got to instill into the masses of the people and they in turn into their representatives and leaders the belief that war is a futile thing, that, after all, things are never settled until they are settled right, and force seldom takes into consideration the question of right, and therefore it is to their interest to have a more peaceful way of adjusting their controversies.

This treaty has been made in the open light of day. It is the first great treaty of the kind in which the correspondence was carried on public. Back of it stands the mass convictions of the great people of the different nations, and in my opinion, it is working that change in the viewpoint of the nations with reference to the possibility of settling their difficulties which is essential to peace. I hope, of course, that that will be followed, and I believe it will be followed, by disarmament to a marked degree, but disarmament is only, after all, a part and a small part of the question of bringing peace to the nations. I think the question of disarmament is infinitely more important as an economic question because it is now literally burying the people of Europe under supertax burdens that will in time of peace destroy the manhood and womanhood of Europe, and in a longer time other countries, and therefore every step we can take in that direction is not only calculated to make war less liable, but it is infinitely more calculated to rehabilitate the manhood and womanhood of those countries.

Mr. FESS. I was greatly impressed with what the Senator said a moment ago about the moral forces that are vastly more important than we think. It would appear to me that if this treaty would give full play to the moral forces of the world, we may present a public feeling that will lead to disarmament. I had thought that was one of the strong features of the treaty.

Mr. BORAH. It is an important feature.

Mr. Phillip Kerr, who is a distinguished gentleman, intimately associated with Lloyd George during the war, and deeply interested in the cause of peace, speaking of the treaty, and this particular feature of it which we are now discussing as to sanctions, said:

> All the evidence goes to show that ratification will not mean the acceptance by the United States of the responsibility for solving the internal problems of Europe.

Professor Shotwell, one of our leading advocates of peace in this country and a prominent advocate of the league, in discussing this treaty, with reference to sanctions, said:

> But just what is involved in the treaty itself? More especially what are the commitments of the United States under it? Does our acceptance of it imply we are moving away from our policy of isolation? Does it tie us up with Europe and its postwar arrangements as some politicians have claimed? Or, on the other hand, does it achieve its main ideal while reserving for us all necessary freedom of action in other ways? For the answer to these questions one would naturally look into the text of the treaty itself. * * * The renunciation of war as an instrument of our own policy does not in itself call upon us to exercise any such suppression of others. Indeed, the present treaty takes pains to avoid just this commitment. * * * Renunciation, on the other hand, is a simple act by which every sovereign State declares for itself the conditions of its own exercise of power.

Again, discussing a speech made by some celebrated Englishman, he said:

> It was not the Kellogg proposal which called upon His Majesty's Government "to cooperate in securing the peace of the world." This phrase carries us at once into the question of sanctions and the enforcement of peace and is completely out of the atmosphere of the Kellogg proposal.

Mr. BRUCE. Mr. President——

Mr. BORAH. I will yield in just a moment. The London Times in an editorial on May 19, 1928, said:

> Public opinion will be the only security against the violation of the peace, which public opinion has still to be built up.

And, finally, let us take the emphatic and clear statement of our Secretary of State, which reads as follows:

> The purpose of the United States is so far as possible to eliminate war as a factor in international relations. I can not state too emphatically that it will not become a party to any agreement which directly or indirectly, expressly or by implication, is a military alliance. The United States can not obligate itself in advance to use its armed forces against any other nation of the world. It does not believe that the peace of the world or of Europe depends upon or can be assured by treaties of military alliance, the futility of which as guarantors of peace is repeatedly demonstrated in the pages of history.

This statement was made in a public address on the 15th of March, 1928, and was transmitted to all the powers signing the treaty and is now a part of the record making up and completing the negotiations leading up to the signing of the treaty. No one has been permitted to remain in doubt upon this question. Neither the language of the treaty nor the correspondence nor the public statements of public officials have been of such character as to permit two constructions to be placed upon the treaty in regard to the matter of sanctions. Punitive or coercive measures are neither provided for in the language of the treaty nor justified by any reasonable construction of the treaty. But in addition to this, our Government was open, frank, and unmis-

takable in the assertion of the utter absence of any intent to commit us to sanctions under the treaty.

I yield now to the Senator from Maryland.

Mr. BRUCE. I want to ask the Senator just this question. How does he reconcile the emphasis which he placed on the second paragraph in the Kellogg pact, by which the signatories agree that they will resort for the solution of international troubles to nothing but pacific means, with the absolutely irreconcilable antagonism that he has always set up to our entering into the World Court, to say nothing of the League of Nations?

The Senator will recollect that by one of the reservations which we attached to our ratification of the World Court protocol the court was completely detached from all connection with the League of Nations.

Mr. BORAH. I do not recollect anything of that kind.

Mr. BRUCE. Well, that was the general construction placed upon the matter at the time.

Mr. BORAH. That was not the general construction in my opinion. At least there were many who did not take that view.

Mr. BRUCE. The most studious effort was made, so far as our country was concerned, to sever the World Court from the League of Nations by way of reservation. I am merely curious to know to what sort of tribunal the Senator from Idaho would have the countries of the world resort for the purpose of settling international controversies by pacific means, when he is so violently opposed to the entry of the United States into the World Court.

Mr. BORAH. Has the Senator concluded his question?

Mr. BRUCE. Yes; I have.

Mr. BORAH. Mr. President, I do not desire to enter into a discussion of the League of Nations or of the World Court. However, I will undertake, as briefly as I may, to satisfy the Senator's curiosity. If I may make a personal reference, I have always been an advocate of an international judicial tribunal.

Mr. BRUCE. Mr. President, if I may interrupt the Senator, until he found that 52 of the civilized powers of the world agreed with him.

Mr. BORAH. No; but there was some doubt thrown upon it when I found the Senator from Maryland was for it.

Mr. BRUCE. I had not supposed that I had sufficient political siginficance for my views to influence the Senator one way or the other.

Mr. BORAH. Knowing the Senator's philosophy, that nothing counts in international affairs except sheer, brutal force, I naturally have a suspicion of anything that he advocates.

Mr. BRUCE. I ask the Senator not to say "sheer, brutal force." Nothing counts for anything in the field of international peace except that adequate police force which Mr. Taft had in contemplation when he became president of the League to Enforce Peace, and which Theodore Roosevelt had in mind when he said that international justice must be backed by an international police force. That is the kind of force I have in mind.

Mr. BORAH. The Senator has in mind a sufficient force.

Mr. BRUCE. Yes; a sufficient force applied as an instrument of international concert.

Mr. BORAH. Will not the Senator permit me to satisfy his curiosity by a full statement?

Mr. BRUCE. Certainly. I am hardly in a position to refuse the Senator such an opportunity, as I am occupying the floor by his courtesy.

Mr. BORAH. I know the Senator is not in a position to do so, but he succeeds in doing so. [Laughter.]

Mr. BRUCE. I hope that I may achieve success in some direction of a less doubtful character.

Mr. BORAH. I think the Senator has been a marvelous success in some directions.

Mr. BRUCE. I am glad to hear the Senator say so, but he is about the only person who has ever reached that conclusion.

Mr. BORAH. Oh, no, the Senator from Maryland has a multitude of friends; although, of course, there were not quite enough. [Laughter.]

Mr. BRUCE. No; and one reason, perhaps, was because the Senator from Idaho gave his potent aid to my opponent. Of course, I did not object to that.

Mr. BORAH. I beg the Senator's pardon. I visited the Senator's State, but I made no mention of the Senator, nor of his opponent.

Mr. BRUCE. I was told that the Senator, with the inspiration of true prophecy, introduced my opponent to a very large audience there as "The next Senator from Maryland."

Mr. BORAH. The Senator is mistaken, for I did not introduce him. My recollection is that he introduced me, but at least I did not introduce him and I made no reference to the senatorship.

Mr. BRUCE. The Senator was entirely within his rights, as a good party man; I am not questioning that.

Mr. BORAH. I did not think it was necessary to do so.

Mr. BRUCE. I enjoy the Senator's personal friendship, but I do not enjoy his political friendship, and have no right to expect it. I can truly say that I am very proud to enjoy his personal friendship.

Mr. BORAH. I can reciprocate that sentiment.

Mr. BRUCE. I thank the Senator, and I can now take my seat at a very auspicious moment.

Mr. BORAH. Mr. President, I think it will not be out of place, in view of the Senator's question, to go a little further into detail. As I said a moment ago, I have always been an advocate of an international judicial tribunal. The Senator has said that I was interested in that cause until I found that 52 nations had agreed upon a tribunal, and then I rebelled. I beg to say that is not my objection to the World Court. I may have been in error, but I felt very sincerely that the World Court was called upon to exercise functions which ought not to belong to a judicial tribunal. It was, in my judgment, the legal adviser of the League of Nations. I did not object to it being the legal adviser of the League of Nations because it was the League of Nations, but because I regarded it as the legal adviser of a political institution, and I was opposed to it primarily for that reason. Any time that we can conceive a plan which will erect an international judicial tribunal free from any political connection I do not know any reason in the world why I shall not be ready to support it.

Mr. President, I have only desired at this time to state what I understood to be the meaning of the pending treaty; what it is. I have no desire at present to discuss generally what I conceive to be the benefits to be derived from the treaty.

I will say, in conclusion, however, that some 60 nations have now either signed or adhered to the treaty. These nations represent practically the entire world. They have signed it upon the theory that it is an important step in the cause of peace. No one will contend, I presume, that it is the last and final step, but it is a step of almost incalculable moment. It is not all that we will have to do as the years go by in backing up the principle which is incorporated in the treaty. At the present time, however, we have all these nations adhering to or signing the treaty, accepting it as it is, and accepting it upon the theory that it will assist them in settling their controversies in a peaceful way. That can not be other than a most extraordinary achievement in the great cause in which we are all interested.

We have different views as to how to accomplish peace, as to how to advance it, but I take it that all of us are in favor of the ultimate objective, and, as all the nations have practically indorsed this treaty, I trust the Senate of the United States, without any unnecessary delay, will advise the world that it is satisfactory to the people of this country.

Mr. BINGHAM. Mr. President, before the Senator takes his seat, will he be so kind as to allow me to ask him a question?

Mr. BORAH. Certainly.

Mr. BINGHAM. The Senator will pardon me if my question covers some ground that was gone over yesterday, due to the fact that there is no report of the Senator's speech in to-day's RECORD to which I can refer.

Mr. BORAH. The speech was held out of the RECORD, as I thought I would like to print it connectedly. I do not know whether I shall ever be able to do that.

Mr. BINGHAM. The Senator said yesterday, if I understood him correctly, that the treaty forbids force under any circumstances.

Mr. BORAH. Of course, I was using "force" in that connection in the sense of war. In my opinion the treaty does forbid war under any circumstances, except, of course, in case of self-defense. Except in that case, we all concede the treaty does not recognize the employment of war under any circumstances whatever.

Mr. BINGHAM. The Senator will realize that the word "force" has been used frequently, very loosely in the discussion of the treaty, and that, as it was stated yesterday and as the Senator agreed, under certain circumstances nonamicable measures short of war may involve the employment of force.

Mr. BORAH. I do not recall any circumstances except what would really come under the principle of self-defense.

If a government were defending its citizens or protecting the property of its citizens, in my judgment such action would come under the principle of self-defense or under another principle which is kindred to self-defense.

Mr. BINGHAM. Does the Senator think that the bombardment of Vera Cruz during the administration of Huerta was due to the necessity of our maintaining self-defense?

Mr. BORAH. I would not want to discuss that incident; it is in the past.

Mr. BINGHAM. Mr. President, we must learn of the future by what is in the past. I am curious to know whether the Senator thinks if this treaty were ratified it would be possible for us to send an expedition into Mexico under General Pershing, for instance, as we did at that time?

Mr. BORAH. I would not say as to any particular transaction; but let me say this—I will state what I conceive to be the principle of the treaty—that we would have a perfect right to send an expedition anywhere, whether into Mexico or China, if it were necessary, in order to protect the lives and property of our citizens against actual threatened attack. That is not an act of war. A nation has a right to give protection to its citizens and their property, and this is not, in international law, war. I assume that the acts of the government are confined to protection from threatened danger.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Idaho yield to the Senator from Pennsylvania?

Mr. BORAH. Yes.

Mr. REED of Pennsylvania. Our recollection of the fact must be clear that the expedition led by General Pershing went into Mexico in the fresh pursuit of an organized band of Mexicans who had invaded this country and had attacked an American town. It had nothing whatever to do with the occupation of Vera Cruz.

Mr. BORAH. Mr. President, that is true, and I am not necessarily condemning the sending or approving the sending of those troops. It proved to be a futile act, but that was not necessarily a reason for not undertaking it. However, I would prefer to confine myself to what I conceive to be the general principles which will be applied to facts and circumstances as they may arise from time to time. In other words, when a question arises as to whether we are applying the principle of self-defense, the Senate of the United States will be the one to pass on it, and we will be perfectly safe!

Mr. BINGHAM. With the permission of the Senator I will refresh the memory of Senators as to what took place in Congress on April 22, 1914, by referring to the resolution, which reads:

> In view of the facts presented by the President of the United States in his address delivered to the Congress in joint session the 20th day of April, 1914, in regard to certain affronts and indignities committed against the United States in Mexico: Be it
>
> *Resolved*, That the President is justified in the employment of the armed forces of the United States to enforce his demands for unequivocal amends for affronts and indignities committed against the United States; be it further
>
> *Resolved*, That the United States disclaims any hostility to the Mexican people or any purpose to make war upon them.

In view of the statement in the second part of the resolution, does the Senator feel that the ratification of this treaty would in any way interfere with the Congress of the United States passing a similar resolution under similar circumstances in the future?

Mr. BORAH. If in the judgment of the Congress of the United States it should be necessary to do that in order to protect our interests, our citizens or their property, of course, it would have the right to take such action. I decline again to undertake to pass upon past transactions.

Mr. BINGHAM. One more question, if the Senator will be so good as to bear with me, and I will be through. I understood the Senator to say yesterday that the notes in the pamphlet which has been frequently referred to and which contains the "Text of the pact as signed, notes, and other papers," in no way affect the treaty. That statement has been repeated again today. In view of that statement, does the Senator feel that any statements made by the advocates of this treaty on the floor of the Senate may in any way affect the treaty?

Mr. BORAH. Of course, the rule of law is that individual statements upon the part of Members of Congress in the consideration of measures before the respective Houses will not be considered by the court in construing the law. The courts have held that they will give attention, as I recall, to an official report by a committee, but will not take into consideration individual views; and I should say that the same rule would apply with reference to a treaty. Where there are some 98 different views, or a less number, it will be practically impossible to give any effect to an individual view as representing the body; and, unless there is something to indicate that it is in some way an expression of the views of a body or a committee, as I understand, the courts would not consider it, and I would not assume that it would be considered by the parties construing the treaty.

Mr. BINGHAM. Has there been any report on behalf of the committee of which the Senator is chairman to which reference could be made in interpreting the treaty in the future?

Mr. BORAH. No; but we have had printed and filed the statement of the Secretary of State before the committee giving his interpretation of the treaty. I should think that if any statement would be taken to have any effect whatever, it would be the statement of the recognized representative of the Government, or one of them, in the making of the treaty.

Mr. REED of Missouri. Mr. President, will the Senator permit me there?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Missouri?

Mr. BORAH. I do.

Mr. REED of Missouri. I understand—I do not want to misquote the Senator—that his view is that what Mr. Chamberlain said and what other governments say in their notes at or prior to the time of the signing of this treaty does not affect the construction of the treaty. If he did not say that, then I misunderstood him. If he did say that, then how can it be claimed that anything that Mr. Kellogg may have said before the Foreign Relations Committee, although afterwards printed, would affect the treaty?

I may have misunderstood the Senator, and I want to understand him aright.

Mr. BORAH. No; I do not think the Senator has misunderstood me. But perhaps I did not make myself clear.

My contention is that the notes passing between the governments did not in any way change or effect a modification of the treaty. Now, understand again, lest I be misunderstood, that I do not contend that a treaty may not be modified or that notes may not have the effect of doing it; but what I contend is that the substance of these notes, the things that were said in the notes, are no different from that which is in the treaty without the notes. In other words, the notes deal with questions of self-defense. They do not enlarge or diminish or modify or curtail the right of self-defense as it would have existed under the treaty had the notes never been written.

Do I make myself clear?

Mr. REED of Missouri. Proceeding from that point, the Senator, I presume, also says that nothing that has been said by the Secretary of State conflicts with or enlarges in any way the true meaning of the treaties?

Mr. BORAH. Yes; I know of nothing that the Secretary of State has said which does that.

Mr. REED of Missouri. Then nothing that he has said is of importance, just the same as nothing that Chamberlain said and nothing that anybody else said is of importance, because, in the opinion of the Senator, they are all consistent with the treaty.

Mr. BORAH. Exactly. In other words, if we had this treaty here, without a scintilla of writing, notes, or anything else, it would mean just exactly what it means when these notes come in.

Mr. REED of Missouri. What does the Senator, then, say with reference to the position of Russia and the position of two or three other countries, which is that the form of the treaty was attempted to be changed by these previous notes, and they disclaim the construction placed upon it? Does not the Senator think that as a matter of precaution we ought at least to have some regard to the opinions of the chancellories of other countries?

Mr. BORAH. The Secretary of Foreign Affairs, Chicherin, stated what I have stated here—I think I have the language here somewhere—that while these notes had been written they signed the treaty, because, in their opinion, the notes had not in any way affected, modified, or changed the treaty.

Mr. REED of Missouri. I hope the Senator will pardon me a minute while I get just what was said.

Mr. BORAH. In other words—of course, I can not quote his exact language—I think the Senator will agree with me that Chicherin took the position that the English note in no way changed the treaty.

Mr. REED of Missouri. No; they took the position that they would not assent to the change, but they did not take the position that there was not any change.

Mr. BORAH. Does the Senator think Russia would have signed this note if her representatives thought the English note had any effect?

Mr. REED of Missouri. Let me read what was said. I have not it marked, however. If I can find a copy that is marked it will save time. I have the text here.

Mr. ROBINSON of Arkansas and Mr. JOHNSON addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Idaho yield; and if so, to whom?

Mr. BORAH. I yield first to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. May I make a suggestion in that particular? My recollection of the substance of the Russian note is to the effect that the representatives of Russia were not in sympathy or in accord with the views expressed in the British note, but that they did not believe that the legal effect of the British note was to alter the treaty, and therefore they signed it, in no sense accepting the viewpoint expressed by the British in the Chamberlain note.

Mr. BORAH. I think the Senator from Arkansas has stated the matter accurately.

Mr. ROBINSON of Arkansas. I have not read it for some weeks, but that is my recollection.

Mr. REED of Missouri. I think there is a different view here, if the Senator's patience will permit a further interruption.

Mr. JOHNSON. Mr. President——

The PRESIDING OFFICER. To whom does the Senator yield?

Mr. JOHNSON. I just wanted to clear up, if I might, a point in reference to the construction that has just been suggested by the colloquy, if the Senator from Idaho will permit me.

Mr. BORAH. Very well.

Mr. JOHNSON. The position of the Senator from Idaho is, as I understand it, that nothing is said in any note that the treaty does not inherently imply.

Mr. BORAH. Exactly.

Mr. JOHNSON. Now let me put it the other way around. Let us assume that this treaty went to the World Court for construction, and let us assume that in the construction of the treaty by the World Court it held that there was no such implication in it as we have just agreed that there is: Would not the court, then, in construing the treaty, go to the English note to ascertain exactly what Great Britain signed?

Mr. BORAH. Yes; and when they got there they would find exactly what is in the treaty—that is, the right of self-defense.

Mr. JOHNSON. The Senator did not follow me. I say, assuming that they did not hold, as we have been holding here, that the right of self-defense as described by the British was inherent in the treaty, then, in construing the treaty, the court would go to the condition annexed to it by Great Britain?

Mr. BORAH. Of course, if the court should hold that the right of self-defense was not inherent in the treaty, then they would go to the British note, and they would also go to Mr. Kellogg's note, for both of them have stated that the right of self-defense was reserved.

Mr. JOHNSON. Yes; the only query there recurring upon whether the right of self-defense was alike in each instance.

Mr. BORAH. But this treaty never can go to any court, because if it is violated we are the judges of that ourselves, and each signatory is the judge for itself.

Mr. JOHNSON. Yes; but there is one thing in that regard, and if the Senator will read the leading editorial in the New York Times to-day he will see that it is in the minds of those who are proposing this treaty that we are going further into some other place ultimately for some construction and for something further to be done.

Mr. REED of Missouri. Mr. President, if the Senator will pardon me, I do not want to get into a debate here. I want to call attention to this document; but I should like to be permitted to say that it is a solecism to declare in a treaty that all questions are to be submitted to peaceful settlement—which necessarily implies, in many instances at least, some adjudicating body—and then in the same breath to say that there is no such tribunal and we are the sole judges. That will not do.

Mr. BORAH. No; I should not think it would do, and I do not know of anybody who has said it.

Mr. REED of Missouri. I understood that to be the position that has just been taken.

Mr. BORAH. This treaty does not provide for any tribunal.

Mr. REED of Missouri. No; but it implies a tribunal. It implies, if it means anything, that when two nations have a controversy, and they can not settle it or do not settle it by diplomatic means, other means must be found. Among the other means that we know of are arbitration or some tribunal or court; and therefore it is only a fair statement of this treaty to say that it means, "In case of a controversy we will not resort to force. We will endeavor to settle the matter between ourselves by peaceful negotiation; and if that fails we will not then go to war. We will adopt other means, and submit our case to some form of tribunal." So it does not mean that we are the sole judges, unless we are to take the position that after this treaty has been signed no nation is under any obligation to adopt any peaceful means whatsoever, but is at liberty simply to stand upon its position, and then defend that position by force of arms.

Mr. BORAH. I never stated that the subject of the controversy would not be a subject for a tribunal. What I say is that this treaty itself provides for no tribunal.

Mr. REED of Missouri. Oh, certainly not.

Mr. BORAH. What we agree is that if a controversy arises, we will settle it by peaceful means.

Mr. ROBINSON of Arkansas. No; not quite. Will the Senator yield?

Mr. BORAH. No; the Senator is quite right—that we will not pursue any course except peaceful means.

Mr. ROBINSON of Arkansas. That is to say, if we seek the settlement of a controversy in any way, that method must be limited to peaceful means.

Mr. BORAH. Exactly.

Mr. ROBINSON of Arkansas. There is no obligation to settle, except perhaps as it may be implied. The obligation is to limit to pacific means such efforts as may be made for settlement.

Mr. BORAH. Exactly.

Mr. REED of Missouri. Technically, that is correct. Of course it is true in every human controversy that if the injured and innocent party sees fit to rest under his wrong, he is under no obligation to go to a court about it. He is under no obligation to enforce his right. He can remain quiescent and suffer. But, dealing with this matter as a matter of practical common sense, we are trying to meet a condition where nations are not ready to submit to a wrong; and, therefore, being deprived by this treaty of the right to make war, they must find some other means; and the only means I know of, outside of peaceful negotiation—which is as old as civilization—is arbitration, a court, or something of that kind.

The Russian language which I rose to call attention to some time ago makes it perfectly clear to me that at least one government—and, notwithstanding all that some people say, a great government, for it is the government of one of the greatest nations in the world—has taken a different view of the effect of Mr. Chamberlain's note or the intent of Mr. Chamberlain's note than I think has been taken here.

Mr. ROBINSON of Arkansas. The same is true of Persia, also.

Mr. REED of Missouri. Yes; there were several of them. I am reading from paragraph 7 of the Russian note.

> Among the restrictions made in writing at the time of the diplomatic pourparlers among the original signatories of the covenant the Soviet Government paid particular attention to the reservation of the British Government in paragraph 10 of its note of May 19 of this year. The British Government there reserves to itself absolute freedom of action as toward several regions which it does not especially enumerate. If they are regions forming part of the British Empire or its dominions they are already all of them included in the covenant and the case of any aggression against them is provided for in the covenant so that the reservation of the British Government in this respect might seem to be at least superfluous. But if other regions are concerned the signatories of the covenant have a right exactly to know where the freedom of action of the British Government begins and where it ends.
>
> But the British Government reserves to itself full freedom of action not only in cases of armed aggression against those regions but even in the cases of any act whatsoever of enmity or "of immixion" which would justify the British Government in opening hostilities. Recognition of such a right for that Government would come to justifying war and might be taken as a contagious example by other signatories of the covenant who by reason of equal rights would also take upon themselves the same liberty with regard to other regions, and the result would be that there would probably be no place left on the earthly globe where the covenant could be put in operation. Indeed, the restriction made by the British Government carries an invitation to another signatory of the covenant to withdraw from its operation still other regions.

That, of course, means the Monroe doctrine and the United States.

> The Soviet Government is unable to regard this reservation as anything but an attempt to use the covenant itself as an instrument of imperialistic policy.

They then say:

> But the said note of the British Government is not communicated to the Soviet Government as forming a constituting part of the covenant or an annex thereto, so it can not be regarded as binding on the Soviet Government no more than the other restrictions concerning the covenant that are mentioned in the diplomatic correspondence of the original signatories can be binding on the Soviet Government. Neither can the Soviet Government agree to all of the restrictions that justify war and particularly the restrictions made in the said correspondence to

withdraw from the operation of the covenant decisions flowing from the by-laws of the League of Nations and the Locarno agreement.

Summing up the foregoing, I have still to note the absence from the covenant of obligations concerning disarmament which stands as the one essential element by which peace can be guaranteed—the inadequacy and uncertainty of the very formula about the inhibition of war, and, finally, the existence of several restrictions aimed to cast aside any appearance of a promise for the cause of peace. Yet in so far as the Paris covenant lays upon powers certain obligations as to public opinion and affords the Soviet Government another opportunity to bring before all those who are parties to the covenant the most important question for the cause of peace, that of disarmament, the solution of which is still the one guarantee which can ward off war, and the Soviet Government expresses its consent to adhere to the covenant of Paris.

I take it that that means this—that the Soviet Government believes that Great Britain did attach a condition to its signature; that the Soviet Government declines to agree to that condition or any other conditions that may have been attached. The Soviet Government then says:

We agree to the treaty, and we agree to the treaty alone.

I have no doubt that a nation can make that kind of a stipulation. Neither have I any doubt that a nation can attach any other condition at the time of signing; and that, so far as that condition is concerned, that condition runs with the compact.

Mr. BORAH. Mr. President, Russia has signed the treaty. She disagreed with the views, apparently, of the British note, as being a fair construction of the principle of self-defense, which she had a perfect right to do. We all agree that each nation under this treaty will decide for itself what constitutes self-defense.

Mr. REED of Missouri. But, Mr. President, it is not altogether a question of self-defense in the judgment of the Russian Government. I know that the Russian Government is discredited in the minds of many people, but it is the government of about 160,000,000 people, it is part of the world, and while we have no diplomatic relations with it, Mr. Kellogg took pains to see that this treaty was forwarded to it through the French Government. But the Russian Government believes, and I believe, that Mr. Chamberlain meant something except the mere right of self-defense as ordinarily implied. He meant to serve notice upon us that there were regions of the world where British interests were such that if there was an interference they could not, under ordinary circumstances, claim the right of self-defense. Therefore, he said, "You must understand that in these regions"—which he does not name, but I think we know some he meant to include—"in these regions we propose to retain full liberty of action."

Mr. BORAH. As a measure of self-defense. That is just exactly what he says.

Mr. REED of Missouri. Yes; he puts it on that ground, but, of course, you can extend self-defense to a point where it becomes ridiculous. You might say that a man went out and bought stocks in the market as a matter of self-defense, if you want to put that kind of construction on it, because he was defending his property and thus defending his life. You can go to any length. But putting a reasonable construction on it—and I take it that is what Russia had in mind—the territory belonging to a nation it has the right to defend; but there would be another question arising entirely if the country did not belong to Great Britain, if that country had never acknowledged Great Britain's sovereignty and control, and yet if Great Britain meant to assert the right to prevent any interference with that country; I think there is a difference, and I think a very practical difference, as I think I can demonstrate when I take the floor.

Mr. SHIPSTEAD. Mr. President, it has been said that it is up to every nation to determine what constitutes self-defense. Is it not true that every government that took part in the last World War did so under the right of self-defense?

Mr. BORAH. Under the claim of the right; yes.

Mr. SHIPSTEAD. Under the claim of the right of self-defense. Under that construction how could this treaty have stopped the World War?

Mr. BORAH. Is the Senator asking me that question?

Mr. SHIPSTEAD. Yes.

Mr. BORAH. I do not know that this treaty could have stopped the World War. At one time I heard Lord Grey, who was at the head of the foreign affairs of England, say that if there had been some means which represented public opinion, which would have enabled him to call upon the governments to come into conference, in his opinion the World War could have been prevented. Do not understand that I am advocating this treaty upon the theory that it is the dawn of the millennium. I can easily understand that conditions might arise under which this treaty, like the Belgian treaty of neutrality, or other treaties, would go to ruin. I understand that perfectly. But this is a treaty under which, where ordinary controversies arise which might finally ripen into war, the signatories to the treaty would be enabled to ask a conference, a coming together of the nations, for the purpose of adjusting the controversy.

There are really no such things in these days as attack and defense in war, in the sense in which those terms grew up in the old days. War springs out of a multitude of things, different controversies arising which are not settled, engendering suspicion and distrust, and at last hatred and then war. This treaty is designed to afford a place where attention can be drawn to the fact that the nations have made a solemn pledge that they will settle their controversies. It is a method of bringing the nations together. It is not a guaranty against war. There is no such thing, I presume. But it is one of the vital, important steps in fostering a better relationship between nations when controversies arise. That is the object of the treaty, and in my opinion it has very great merit for that reason.

I can well understand that there are conditions under which the treaty would be utterly ignored.

The Senator from Missouri has said that this question of self-defense may be construed to a point where it becomes ridiculous and absurd, and so it may. I know of no means in the world by which we can control the discretion of a nation when it is exercising its right of self-defense.

Mr. WATSON. Did the Soviet Government issue any explanatory note or statement?

Mr. BORAH. The Senator from Missouri just read it.

Mr. JOHNSON. Have those communications been published?

Mr. BORAH. No.

Mr. JOHNSON. May I ask, if it is not too much, that somebody put those notes of other nations, other than the ones printed in the document before Senators, in the RECORD?

Mr. BORAH. I will ask to have them printed as a document.

Mr. ROBINSON of Arkansas. Mr. President——

Mr. REED of Missouri. I was going to ask the Senator if there was any objection to me now offering the correspondence which was sent to me by the Secretary of State.

Mr. BORAH. Not the slightest. The fact is that my attention was called to it several days ago, with a request that it be printed, by the Senator from Virginia, but I overlooked the matter.

Mr. REED of Missouri. I will ask to put them in the RECORD at this time.

Mr. BORAH. If I may make a suggestion to the Senator from Missouri, I will ask him to have them printed in document form. It is very inconvenient to refer to them in the RECORD.

Mr. WATSON. May I inquire, in that connection, before the Senator from Arkansas makes his inquiry, what other nations issued explanatory statements?

Mr. ROBINSON of Arkansas. I was just about to say that among the nations which issued explanatory statements and which took exception to the interpretative note of Mr. Chamberlain was Persia. Persia very emphatically said that she did not place the same construction or interpretation on the treaty that was implied or expressed in the Chamberlain note, but, notwithstanding that fact, she signed the treaty, as did the Soviet Government of Russia. There were one or two other Governments that indicated that they did not acquiesce in the interpretation which was carried in the Chamberlain note, but these two Governments, the Soviet Republic of Russia, and Persia, expressly dissented from it.

In my view of the matter, the British note was an interpretation of the treaty, and that interpretation unquestionably was not concurred in by a number of governments, including Russia and Persia.

Mr. WATSON. In that connection, did they place their own interpretations on the treaty?

Mr. ROBINSON of Arkansas. No.

Mr. WATSON. It was purely negative?

Mr. BORAH. They simply disagreed.

Mr. ROBINSON of Arkansas. They disagreed with the British interpretation.

Mr. BORAH. Before we get away from the Russian matter, in view of the fact that Russia's interest in this matter has been under discussion, I wish to call attention to the fact that since the signing of the treaty by Russia, Russia has been very active in securing the binding effect of this treaty upon other nations in which she is interested. She evidently has some confidence in the treaty.

In an editorial in the Philadelphia Public Ledger of January 2 there is a statement to this effect:

The Soviet Government has appealed to Warsaw to put the Kellogg pact into effect immediately as between Russia and Poland. Moscow has been trying for years to arrange an antiwar agreement with Poland. Little or no success has attended these efforts. A natural distrust of the Soviet Government has had much to do with the failure, and it is far from clear that Poland would be willing to put into effect even the Kellogg pact as far as Russia is concerned.

But it is not entirely without significance, perhaps, that Russia is embracing the Kellogg pact with so much warmth. It is an acknowledgement—though it does not come from the best of sources—that this treaty is the most advanced of its kind to emerge from all the various efforts in the direction of "outlawing" war.

I also ask to insert in the RECORD, without reading, an editorial upon the same subject from the Baltimore Sun under date of January 2, 1929.

The VICE PRESIDENT. Without objection it is so ordered. The editorial is as follows:

[From the Baltimore Sun, January 2, 1929]

RUSSIA STEPS AHEAD

There is always a tendency on the part of extremely practical persons to look upon Russia as a doctrinaire state. When, for instance, she put forward what remains the most courageously common sensical disarmament proposal ever offered by a great power her sincerity was doubted. And when her honesty was proved to many reasonable minds, those who found the plan inconvenient and embarrassing simply fell back upon ridiculing it as an unworkable piece of windy idealism.

Her most recent action is consistent with the best of her earlier efforts in the direction of peace. Failing to gain a real hearing for her own disarmament project she was quick to signify her adherence to the Kellogg pact, though cynical as to the attitude of some other signers. Now she suggests carrying out the essential spirit of that agreement, and of doing it with as small a waste of time as possible. She has, therefore, proposed to her neighbors, Poland and Lithuania, whose recent histories have been full of troubled complications, that the three countries sign a protocol giving the pact immediate effect among themselves.

M. Litvinoff's note is almost crassly frank. "During the four months that have elapsed since the day of the signing of the pact not one of the 14 States has given it ratification, which circumstance arouses the fear that for a long time the pact may remain a document formally without binding power on anyone." Russia is simply stepping ahead of the other nations in its effort to translate the intention of the treaty into fact without delay or useless discussion. This proposal is the more significant in view of the long quarrel between Poland and Lithuania, and the distrust between Poland and the Soviets.

The suggested immediate agreement, pending ratification of the pact, would perhaps go far toward preventing any future snarls in eastern Europe, or, at least, of making them less menacing.

Mr. BORAH. Mr. President, that is an illustration of what I conceive to be the greatest value of this treaty. It is the attempt upon the part of governments to carry out the principle which is involved here and to act upon amicable and peaceful relations with all the governments with which they may have interests or business, and to adjust their controversies in accordance with the principles of this treaty. I do not believe its value in that respect can be overestimated. It is not alone what you find between the four corners of the treaty but what are its potential moral possibilities. We ought not to underestimate its worth unless we have lost faith in moral forces in the higher, finer qualities of mankind.

Mr. REED of Missouri. Mr. President, I think it would make for the convenience of the Senate if I were to present at this time the reservations that have not been discussed. I refer to the reservations of other countries than the United States. I will later have the entire correspondence, so far as it has been furnished to me, printed in document form. It will take but a few moments to read the reservations to the Senate, which we should have before us during this discussion.

Afghanistan, which, as Senators understand, has had some trouble over other nations asserting authority, adhered in this form:

It is understood that this full adhesion of the Afghan Government only bears on the text of the treaty in the same form as that kindly communicated by your excellency to me in your note No. 141 of August 27.

Egypt, which also has its troubles, concluded adhesion in this way:

For the above reasons the Egyptian Government declares that it fully adheres to the pact in the form in which it was signed at Paris, it being understood, however, that this adherence does not entail recognition of any reservations made in connection with this pact.

Hungary, in a somewhat lengthy note, only an excerpt of which I present, said this:

The Hungarian Government adheres to the proposal of the Government of the United States under the supposition that the Government of the United States as well as the governments of the other signatory powers will seek to find the means of rendering it possible that in the future injustices may be remedied by peaceful means.

The Persian note contained this language:

My Government, considering that the multilateral treaty signed at Paris is in harmony with its consistently pacific policy and the obligations which are imposed by the covenant of the League of Nations upon the members thereof; assured, on the other hand, that the text of the treaty does not contravene its right of legitimate defense; it being understood moreover that the reservations made by certain powers can not under any circumstances nor at any time create for Persia any obligation whatsoever to recognize any claims susceptible of affecting its rights or its territorial or maritime possessions, gives it cordial adherence to the international pact for the outlawry of war.

Rumania's note as signed contains this language:

It is shown with absolute clearness by the negotiations preliminary to the signature of the treaty as well as by the changes which have been made in the preamble with respect to its original text and the explanations contained in the note under date of June 23, 1928, of the Government of the United States addressed to the governments invited to sign the treaty, that this treaty in no respect modifies the provision of the covenant of the League of Nations. Consequently, the rights and obligations derived from the new treaty constitute neither an extension nor a reduction of the rights and obligations derived from the covenant of the League of Nations, which remain as they are. It also appears that the new treaty does not conflict with the neutrality treaties nor, in general, with the engagements contained in existing treaties which the Royal Government has contracted up to the present. It also follows from the note of the Government of the United States of June 23 and the above-mentioned acts and negotiations that any violation of the multilateral treaty by one of the contracting parties *ipso facto* releases the other powers signatory to the treaty from their obligations toward the power which has violated the engagements of the same treaty. It follows, moreover, that the right of defense is in no way affected or restricted by the engagements of the new treaty and that each power is entirely free to defend itself at will and according to its necessity against an attack or a foreign invasion.

Then follows the Russian note, a part of which I have read, and all of which will be printed for the advice of the Senate.

In addition to this, and it has not been mentioned to-day, the French note and other notes make it perfectly clear that the obligations of the Locarno pact and the obligations of the nations under the League of Nations pact are stipulated by certain of those nations to be not in any way affected by the present proposed treaty. So I wish to make just the observation that it is perfectly plain, as we enter upon the proposed ratification of the treaty, that it has already received many constructions and that controversies as to its meaning already exist.

Mr. ROBINSON of Indiana. Mr. President, since the question has been raised to-day with reference to possible interpretation of the treaty by some tribunal, and since an editorial of the New York Times has been referred to, I should like to ask the Senator from Idaho [Mr. BORAH] if he places the same construction on the activities in connection with the proposed ratification of this treaty as does the New York newspaper. I read from this morning's New York Times:

The peace treaty, even so, marks a great step in advance, but it is a step leading to something more. This is the reason why ratification of the treaty will be regarded in Europe as a sign, or even proof, that the United States proposes to return to closer cooperation with other nations. It is felt that the treaty will lead us, or should lead us, straight into the World Court. That tribunal constitutes one of the great "pacific means" to which we with others have pledged ourselves to resort. And behind the World Court, as its fostering parent, stands the League of Nations, which already exists as an organization able to make practically effective the pious aspirations of peace breathed in the Kellogg treaty. That instrument of peaceful intentions ought to be ratified. But it will be necessary later, in the legal phrase, to "implement" it by proceeding to more concrete measures and international agencies by which it may be made a living and continuous and effective force in the world.

I am asking the Senator if his idea coincides with that expressed in the editorial to the effect that ratification of the treaty would lead us directly into the World Court, and then immediately after that into the League of Nations?

Mr. BRUCE. Mr. President, may I ask the Senator from what he is reading? I am interested because it coincides so fully with my own views.

Mr. ROBINSON of Indiana. I read from an editorial published to-day in the New York Times.

Mr. BORAH. The Senator wants to know whether I agree with the Times.

Mr. ROBINSON of Indiana. Yes.

Mr. BORAH. Of course, the Times has been a very consistent and a very able advocate of the league and of the court, and has always thought that any step toward peace would be an inadequate and practically futile step unless it led ultimately to the court and to the league. As I understand, that is what it says in the editorial from which the Senator has read. I understand it says further, however, that it will be necessary, in order that we get nearer the court and nearer the league, to enter this treaty with some other distinctive action. In that respect I agree with the Times. I do not think the treaty brings us any nearer to the court or any nearer to the league. If we get any nearer we will have to do something distinctive in the future to get nearer.

Mr. ROBINSON of Indiana. Does the Senator mean to say that in his opinion some tribunal ultimately will be necessarily set up, either the World Court or some other tribunal, to interpret the treaty?

Mr. BORAH. Oh, no; I did not say that. I said that the Times was of the opinion that any effort toward peace was inadequate and futile unless it led ultimately to the court and to the league. That is the view of the Times, and it has been all the time.

Mr. ROBINSON of Indiana. I do not understand that that is the sense of the editorial.

Mr. ROBINSON of Arkansas. Mr. President——

The PRESIDING OFFICER (Mr. SACKETT in the chair). Does the Senator from Indiana yield to the Senator from Arkansas?

Mr. ROBINSON of Indiana. I yield.

Mr. ROBINSON of Arkansas. If a controversy arises between two of the signatories to the treaty as to the meaning of the treaty, since the treaty repudiates and renounces all means of force in the settlement of disputes, it necessarily implies that some tribunal will have to make the interpretation, does it not?

Mr. ROBINSON of Indiana. That is the point I am getting at.

Mr. ROBINSON of Arkansas. Or leave the matter entirely unsettled for all time to come.

Mr. ROBINSON of Indiana. I am asking the Senator from Idaho, who is in charge of the treaty here, if in his opinion, a tribunal of some sort is ultimately necessary to interpret the treaty?

Mr. BORAH. Certainly not. Understand me. For instance, suppose that two European nations should get into a controversy and under the terms of this treaty they should proceed to settle it by peaceful means; undoubtedly, they being members of the court, if they desired to go into the court they could do so, or they could arbitrate it, or they could settle it in any other way, or through diplomatic means. That would be an initiative or choice of the nations at the particular time as to how they should do it. All that this treaty proffers is that they will not seek to bring about a settlement through other than peaceful means. It leaves the peaceful means entirely to the discretion or the judgment or the initiative of the nations at the time the difficulty arises.

Mr. ROBINSON of Indiana. The only tribunal that could pass on the question through peaceful means at the present time, or perhaps the principal tribunal, would be the World Court.

Mr. BORAH. That would not be true with reference to the United States, because we are not a member of the World Court.

Mr. ROBINSON of Indiana. That is just the point. In that event, all the members who have adhered to the protocol of the World Court and who are also all, or practically all, members of the League of Nations could by pacific means decide a question in which we were vitally interested to our disadvantage and against our best interests. Assuming we should object, would not the United States in that event be placed in the position, so far as world opinion is concerned, of opposing pacific means and would not all of those, so far as the moral effect is concerned, be leagued in opinion against the United States?

Mr. BORAH. The World Court might at this time decide a controversy in which the United States had very great interest.

Mr. ROBINSON of Indiana. But at this time we are not bound by any treaty.

Mr. BORAH. We have our arbitration treaties, our conciliation treaties, The Hague tribunal, and other peaceful means which we could now choose, if we desired, with the same freedom that we could after the treaty shall have been signed.

Mr. ROBINSON of Indiana. The chief point I have in mind in interrogating the Senator or asking him these questions is to ascertain whether he entertains the view advanced by the New York Times to the effect that the ratification of this treaty by the Senate will necessarily practically lead us directly into the World Court?

Mr. BORAH. No. If the New York Times takes that view, with all due respect, I disagree with it.

Mr. JOHNSON. Mr. President, to one of the Senators who are engaged in the colloquy I wish to address myself for an instant. I have missed the entire point in this discussion if it has not been made perfectly clear and reiterated again and again that neither the World Court nor any other tribunal nor any country can have anything to do with the settlement of any question that may arise under the treaty, because to each nation itself is left the determination as to whether it acts in self-defense.

Mr. BORAH. Where the question of self-defense is involved, that would undoubtedly be true.

Mr. JOHNSON. Yes; that is undoubtedly true. So that it is left entirely and exclusively to the countries that are engaged in the controversy. If a question of self-defense—which, of course, is the one of any consequence that will arise—arises, it is left to the country itself to determine what it shall do, and that ends the controversy.

Mr. ROBINSON of Arkansas. Will the Senator from California yield to me?

Mr. JOHNSON. I yield.

Mr. ROBINSON of Arkansas. Recent history has demonstrated the difficulty of dealing with this subject. So far as I can recall, in every instance that has arisen since the World War where two nations have been in imminent danger of going to war, particularly referring to the Corfu incident, and the controversy between two South American Republics, more recent, it may be remembered that both parties to the disputes vigorously and persistently insisted that they were acting in self-defense; so that, in all probability, in the future, when nations lose the disposition to settle their differences in an amicable way, they may resort to force, as they have heretofore done, and will justify their course on the ground of self-defense.

The value of the treaty lies in its psychological effect in the creation of a public sentiment in favor of the employment of pacific means; but in a large degree we move in a circle and approach very nearly the point from which we started. When parties enter into an engagement not to fight, they keep the engagement so long as they are in a good humor; but if sufficiently angered, they are likely to forget the engagement and resort to violence. That is true both of individuals and of nations. However, as has been suggested here, it seems to be a difficulty that inheres in human relations.

Mr. JOHNSON. Mr. President, I think probably the Senator from Arkansas is entirely right in that regard, and the pity of it is that this country to-day stands agog, by virtue of what has been published in the press, with the idea that by the ratification of this treaty the Senate of the United States is going to bring a new era, a millennium to the world. This treaty is going to bring, I think, just what the Senator from Arkansas has indicated and nothing more at all.

Mr. BINGHAM. Mr. President, there are three points which I hope the Senator from Idaho, before he concludes the discussion entirely—in other words, before we have a vote on the treaty—will make perfectly clear even if doing so will involve repetition.

The first is in regard to the use of force. The senior Senator from Arkansas [Mr. ROBINSON] a few moments ago, if I understood him correctly, said that the treaty would do away with the use of force. The junior Senator from Maryland [Mr. TYDINGS] some time ago this afternoon said that it would require all dispute between nations to be settled by arbitration or conciliation or mediation. The passage which has just been read from the New York Times by the junior Senator from Indiana [Mr. ROBINSON] calls attention to the attitude of a large section of the press. The letters which we have received from hundreds of our constituents and the petitions which have been received show that a very large number of people in the United States seem to believe that this treaty will do away with the use of force and that in the future any settlement of disputes will only be a question of using amicable means as recognized under international law.

As the Senator from Idaho said yesterday, in reply to a question which I ventured to ask him, that assumption is not justi-

fied, for international law recognizes nonamicable means short of war as a very definite way of settling disputes between nations; and the second article of this treaty which provides that the signatory powers will not use any other means except pacific means does not rule out the use of nonamicable measures short of war.

In order that there may be no question about that, Mr. President, I should like to read from one of the most recent standard works on international law, the Handbook of International Law, by George Grafton Wilson, professor of international law in Harvard University, second edition. In chapter 9 there is a list of "nonamicable measures of redress short of war," which include:

1. Breaking of diplomatic relations—

Which, as everyone realizes, is frequently a step toward war and which occurs generally when two nations get angry with one another.

2. Retorsion, which is a species of retaliation in kind. It usually consists in treating subjects of the state giving cause for retaliation in a manner analogous, if not identical, with that accorded to the subjects of the state resorting to retorsion.

3. Reprisals, which consist in the adoption of measures of retaliation in order to obtain redress for action committed in violation of international right.

They frequently border on war.

4. Embargo, which is a special form of reprisal, and consists in general in the sequestration of the public or private property of an offending state—

And that can only be done by force—

or it may sometimes be applied by a state to its own vessels or goods—

As was done by the United States in 1807 and 1812.

5. Nonintercourse: Nonintercourse laws may, for the purpose of placing stress upon a state which is regarded as the offender, prohibit trade or other relations with its nationals.

6. Display—

And here we come to the meat in the coconut—

Display or restricted use of force: The display of force as a form of constraint to insure observance of rights is sometimes resorted to where the course of justice is uncertain or political conditions are disturbed.

The author goes on to say that "such force may be used to a limited degree without resorting to war"; in other words——

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield for a question?

Mr. BINGHAM. I will yield in a moment. In other words, the use of force short of war is sanctioned as a nonamicable measure of redress and the settlement of disputes. I now yield to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. Of course, technically speaking, there has been a somewhat loose use of the word "force" throughout the debate, but I am wondering if the Senator from Connecticut is taking the position that the "pacific means" referred to in the second article of the pending treaty for the settlement of international disputes are of the character which he has just been describing, namely, nonamicable means. I wonder if he is taking the attitude that the true construction of this treaty is that the nations are binding themselves to use those unfriendly processes which fall short of war but which, nevertheless, frequently provoke war in the settlement of international disputes. Does he not rather think that the real meaning of the words "pacific means" is the processes for peaceful settlement commonly known as arbitration, conciliation, judicial determination, and diplomatic negotiation?

Mr. BINGHAM. Mr. President, it has been taken for granted in all discussions on the subject that the measures to which the Senator has just referred are most certainly to be regarded as coming under the head of "pacific means." I have never heard any question raised as to that; but in chapter 8 of his book on international law, Professor Wilson gives a list of the amicable means, such as the negotiation, good offices and mediation, commissions of inquiry, the council of the League of Nations, arbitration, award, and the permanent court of international justice.

However, the point that I am trying to make, Mr. President, is that in a large degree in the public discussion of this question it has appeared to me that the persons discussing it limited the settlement of dispute to those measures which are generally known as amicable means of settlement of international differences.

Mr. ROBINSON of Arkansas. I do not think anyone has insisted that under no conditions may what the Senator terms, and what are properly termed, "nonamicable means" be employed and still the nation employing them keep within the terms of the treaty; but certainly the true interpretation of the treaty does not imply that the words "pacific means" shall be construed to countenance the employment of such methods as the display of military force or other processes which barely fall short of war. The word "pacific" is to be given I think its fair and usual definition. It means:

1. Serving to make or restore peace; adapted to reconcile differences; peace making; conciliatory, mild; appeasing; as to offer pacific propositions to a belligerent power.

2. Peaceful; not warlike.

The nonamicable methods to which the Senator from Connecticut has referred are rather warlike than peaceful; and certainly it is not an element of strength to this treaty to say that all the nations of the world which agree to it, agree to denounce war with the distinct understanding that they are to employ every means and agency at their command, however warlike, that may fall short of actual and technical violation of the express obligation of the treaty. The use of the words "pacific means" in the second article of this treaty implies that the nations will not proceed with warlike methods but will employ peaceful methods; that they will resort to tribunals if tribunals are in existence; that they will create tribunals if necessary. If the treaty has value, it lies in that fact.

Mr. BORAH. Mr. President, furthermore, this dissertation of the professor is based, it seems, entirely upon an offending nation—some nation which has violated a treaty or violated a right, or has offended another nation. Of course, the conditions there might be such that under those circumstances, in dealing with an offending nation, it might be justified in using methods just on the hither side of war; but, as the Senator from Arkansas said, it certainly would not be the true intent of the treaty or permissible under the treaty to employ those methods against an unoffending nation.

Mr. BINGHAM. I am again very regretful that the Senator has not had the opportunity of correcting what he said yesterday; for I understood him to say yesterday, in response to a question, that it would be permissible as a last resort, in settling disputes between nations, to use any measures short of war.

Mr. BORAH. I have no desire to modify that proposition when we take the facts as they are. When we are dealing with an offending nation or a nation which does not yield to what would be the fair interpretation of the treaty by peaceful means, I presume we could, of course, without technically violating the treaty, use such means as the offending nation has imposed upon us, and doubtless would.

Mr. BINGHAM. My object, Mr. President, was merely to call attention to the fact that this treaty did not mean that we were forbidden to use force, as so frequently has been said by those who are discussing it loosely—"it forbids the use of force." While it does put a premium on the use of arbitration and mediation, it does not forbid the use of force, because there are measures recognized in international law for the settlement of disputes which sanction the use of force and at the same time do not declare that there is a state of war.

There is one other point, Mr. President—and I shall take only a moment or two—and that is my regret that the Senator from Idaho said that nothing which any Senator in favor of the treaty might say on the floor in regard to it could be construed in the future as an interpretation of the treaty. I had most sincerely hoped that at least whatever was said by the chairman of the Foreign Relations Committee reporting the treaty with regard to its interpretation might in the future be regarded as an official interpretation of the attitude of those who were in favor of the ratification of the treaty at this time.

When he declines to assume that responsibility and says that we must take what a committee report has to say about it as our only official interpretation, and the committee makes no report, but publishes merely the hearings before the committee in which the Secretary of State has given his views with regard to the meaning of certain parts of the treaty, it seems to me that there is a very great necessity for the passage by the Senate of a resolution looking forward to the fact that in the future some nation, in attempting to defend before the world its actions with regard to the United States, or in endeavoring to secure public opinion to put us on the wrong side of a question before the world, may claim that the plain language of the treaty says "pacific means only," says nothing about self-defense, says nothing about our right to protect our interests in foreign lands, does not go as far as the Senator from Idaho went yesterday when he said that there was nothing in the treaty to prevent our using our

cruisers and marines in foreign lands for the protection of American citizens and American property, or go as far as he went to-day when he said that self-defense certainly includes and embraces the right to protect American lives and property, in whatever part of the world they may be. My fear is that foreign nations, in endeavoring to influence world opinion in the future, will point to the fact that there were no reservations made and no resolutions passed at the time of ratification of the treaty, whether in the form of reservations or not, to point out that that was the understanding of the Senate.

Finally, Mr. President, it must be borne in mind that there are very cordial advocates of the treaty throughout the length and breadth of the land—notably, some of the most distinguished clergymen in New York and vicinity—who have stated in public that to vote for the treaty and to vote for the cruiser bill is an unthinkable inconsistency. To their minds the treaty so plainly and clearly limits us to amicable measures of settling a dispute that there could be no need for cruisers in the future, and therefore that anyone who voted for both the treaty and the cruiser bill would be guilty of a glaring inconsistency.

Mr. SHIPSTEAD. Mr. President, will the Senator yield for a moment?

Mr. BINGHAM. Certainly.

Mr. SHIPSTEAD. In a speech that Mr. Briand, of France, made at the time the treaty was signed he said that this treaty outlawed war, but only selfish wars, limiting the outlawry to selfish wars. Is it not likely as many cruisers are needed to fight an unselfish war as to fight selfish wars? [Laughter.] I think possibly that problem ought to be borne in mind, in view of the discussion of the outlawry of war that has taken place in the Senate yesterday and to-day.

Mr. WATSON. Mr. President, I should like to ask the Senator a question.

The PRESIDING OFFICER (Mr. SACKETT in the chair). Does the Senator from Connecticut yield to the Senator from Indiana?

Mr. BINGHAM. I do.

Mr. WATSON. Does the Senator construe the Chamberlain note as a reservation to the treaty?

Mr. BINGHAM. Mr. President, I will say to the Senator that I am not a member of the Committee on Foreign Relations nor an international lawyer——

Mr. WATSON. No; but I am asking the Senator.

Mr. BINGHAM. And whatever construction I may put on it would be of very little value. What I am endeavoring to do is to find out whether, if I vote for the treaty, it would in any way express my view that the United States was hampering itself in its efforts in the future to protect American lives and property abroad at any time when the United States believed that its citizens needed such protection, whether its territory was involved or not, whether the Monroe doctrine was involved or not.

Mr. BORAH. Mr. President, when the Senator asked me with reference to whether the views of a Senator would be taken in the construction of a treaty, I undertook to state to him what I understood the rule would be in a judicial proceeding, such as has been announced by the Supreme Court of the United States. I do not know of any rule which could be invoked other than that. It might apply to a treaty or it might not; I do not know. I know of no precedents with reference to treaties. I should suppose the reasoning would apply to treaties.

My own opinion is that the individual view of a Senator would not be regarded as a construction of the treaty. I do not see how it could possibly be so, because another Senator might have a wholly different view, and one Senator's opinion is entitled to quite as much weight as the opinion of another. For that reason the Supreme Court rejects the individual view of a Senator or Member of the House of Representatives. It does not represent the Congress. It is not the authoritative voice of the law-making power. It is the view of some individual before the matter is finally put into the form of a law.

Mr. BINGHAM. Mr. President, before the Senator takes his seat, will he not, therefore, tell us why he objects to having the Senate pass a resolution stating in effect that it is the sense of the Senate that in ratifying this treaty there is nothing whatever done to interfere with our right of defending our territory or our citizens or interests abroad?

Mr. BORAH. For two reasons: In the first place, I regard that right as inherent in the treaty. Nothing we can say or do will add anything to that. In the second place, if the question of our right of self-defense is ever raised by a nation, aside from the treaty itself, the complete answer to it is in the communication of the Secretary of State to the nations at the time they signed the treaty.

Mr. WHEELER. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Montana?

Mr. BORAH. Yes.

Mr. WHEELER. Assuming that we ratify this treaty, and that the same state of affairs should arise between this country and England that arose between this country and Nicaragua, would we have a right to go into England and to carry on as we carried on in Nicaragua?

Mr. BORAH. Is the Senator speaking now of a right?

Mr. WHEELER. A right under the treaty.

Mr. BORAH. I do not understand the Senator's question. I do not see the application.

Mr. WHEELER. My question is this: If we should ratify this treaty, and the same conditions should arise in England as arose in Nicaragua, and we should get into the same difficulty with reference to our property——

Mr. BORAH. The treaty would not have anything whatever to do with that situation.

Mr. WHEELER. The Senator says it would not have anything to do with it?

Mr. BORAH. No. I think not.

Mr. BARKLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Kentucky?

Mr. BORAH. I do.

Mr. BARKLEY. I should like to ask the Senator from Idaho whether he regards any letter or communication among negotiators before a treaty is signed as having the same force and effect as a reservation or limitation placed upon it by the ratifying body after the treaty had been signed?

Mr. BORAH. No; I would not so regard it.

Mr. BARKLEY. In other words, a letter written by any responsible statesman representing any government that signed this treaty, giving his individual views as to what it meant, would not have the same binding effect upon the interpretation of the treaty later as if the ratifying body of some nation in its ratification had a reservation or exception of some kind as to its own action and attitude toward it?

Mr. BORAH. Take, for instance, the question of self-defense: We will use that as an illustration. I take the position, as I have said, that the right of self-defense is inherent in the treaty. If they raise the question of good faith upon our part and contend that it is not sufficiently protected by the treaty, then, in my opinion, the complete answer would be the negotiations themselves. But my position is that the treaty of itself gives the absolute right of self-defense and these notes added nothing to the treaty in this respect.

Mr. BARKLEY. But if the Senate, in its ratification, should attach some reservation as a part of the ratification, that reservation would have more binding force than any letter or communication written before the treaty was signed?

Mr. BORAH. The reservation simply exempts the Government of the United States or some other government from some obligation under the treaty.

Mr. BARKLEY. Yes.

Mr. BORAH. It is not a construction of the treaty in the sense that it binds the other nations. It simply exempts us.

Mr. BARKLEY. Exactly; so that a communication written by any responsible officer of this or any other government before the treaty is actually signed would not be interpreted and could not be regarded as exempting or limiting our country or the country involved to the same extent as if the legislative body, or such other body as had to ratify the treaty, placed the reservation in the treaty itself, or in its ratification? Is that correct?

Mr. SWANSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Virginia?

Mr. BORAH. I do.

Mr. SWANSON. If the Senator will permit me, that very specific question came up last year before the Foreign Relations Committee.

The original treaty of arbitration to some extent was ambiguous as to whether or not it abolished the Bryan treaties. Inquiry was made as to that matter. It could have been construed either way. The Secretary of State came there, and the treaty was ambiguous, and he wrote a letter on the subject, and we agreed and reported; and under the form of that letter all treaties since have been modified. He wrote a letter stating that our interpretation of the treaty was that it did not modify in any respect the Bryan treaties. The first treaty was in the first form, and the committee agreed to take that method of having that ambiguous clause in the treaty clarified. That subject was considered at that time.

Mr. BARKLEY. Yes; but if the Senate, in ratifying the treaty, had placed on it a reservation or an interpretation saying that it did modify the Bryan treaties, the Secretary's letter would have been submerged as compared to the official action of the Senate?

Mr. SWANSON. It would have been submerged, because the French Government, I think, raised the question first; and the French Secretary of State replied to this letter that he so understood it, and accepted it.

Mr. ROBINSON of Arkansas. Mr. President, in all fairness and frankness, taking the instant case, the British Government has given notice of its interpretation of certain phases of this treaty. If we ratify this treaty without any mention of the subject matter of that note there is no tribunal in the world, judicial or political, that would ever question the right of the British Government to stand upon the interpretation placed in its note transmitted before the treaty was ratified.

Mr. JOHNSON. Mr. President, that is exactly what I wanted to add, and to say as well that when the British note is accompanied by a statement that the treaty is executed upon the express condition contained in what is said in the British note, there could be no question at all as to construction.

Mr. ROBINSON of Arkansas. If the Government had merely said, "Our interpretation of this treaty is as follows," and the exchange of ratifications was agreed upon subsequently, the Government making that interpretation would have the right to stand on it, because that was the object in making it.

Mr. BORAH. Mr. President, I do not disagree with that proposition, but what I say is that the letter does not change the treaty, it does not put any interpretation upon the treaty which would not exist without the letter.

Mr. ROBINSON of Arkansas. I have taken no issue with the Senator from Idaho on that.

Mr. REED of Missouri. I take issue, because I say that we must assume that the British statesmen had in mind that they were modifying this treaty. They were not indulging in useless words and saying something for the mere pleasure of saying it. They said this thing, they said it very solemnly, and they said it twice in the correspondence. It has been taken note of by the Russian Government and taken note of by Afghanistan, by Persia, by Egypt, by Rumania, and by Hungary. We can not assume that those words were not intended to enlarge or restrict in some way a construction which might be found in the instrument itself.

I do not think we ought to quibble about that. I am not here to try to raise objections. There are some things I want done with this treaty, but particularly when we have in mind that there is at the present time no authority in any body to construe the treaty, that its construction rests in the conscience of each nation, can there be any question but that the English conscience would be immediately in accord with any reasonable claim that would be made by the British Government that they intended to enlarge this treaty to cover certain matters? That is the conscience we have to deal with when we are leaving the entire enforcement of the treaty to the conscience—it has been said of the world—but it must always be the conscience of the particular nation that is particularly interested.

I disagree from the Senator with the greatest respect and the greatest reluctance, but I do not agree with him that Chamberlain uttered a mass of useless words, meaningless phrases, and solemnly repeated them the second time. I think I can show that it is at least an enlargement of the ordinary construction which ordinary men would put upon this treaty.

Mr. BORAH. Mr. President, I may repeat that the same official who wrote the note has put his own interpretation upon the note, and he says that the note was intended as nothing more than a statement of Great Britain's conception of her right of self-defense under the treaty.

Mr. REED of Missouri. Exactly.

Mr. BORAH. And he further states that it was no different from the right of self-defense which the United States has.

Mr. REED of Missouri. Nevertheless, he stated it, and he took pains to state it twice, and if he had been entirely content with our construction he would not have stated it.

I want to make an inquiry of the leader on the other side, as to whether we are to proceed with this debate now or to go to some other business. I think we have put in a full day's work on this treaty.

Mr. CURTIS. It is pretty late to begin any other business. We did want an executive session with closed doors, but I had hoped that the debate would run a little longer. It seems to me that 4 o'clock is a little early to stop.

Mr. BARKLEY. Mr. President, I would like to ask the Senator from Idaho another question, if we are going on with this. This treaty is bound to mean the same thing to all nations that have signed it. It can not mean one thing to one nation and another thing to another nation. Otherwise it is not multilateral—whether the British Government's note was correct in the interpretation of the treaty or not. If the British note's interpretation is the correct interpretation, then is it not true that it is not only the correct interpretation for Great Britain but for all the other nations that have signed the treaty, if they were similarly situated with Great Britain, or in any degree similarly situated?

Mr. BORAH. It is the same to all nations. Each nation has the right of self-defense, and each nation determines for itself what is self-defense. Great Britain determines for itself what, in the condition of the British Empire, she conceives to be self-defense. We would do the same thing exactly toward what we conceived to be self-defense. Russia would do the same thing. It is the same right, the same principle, applicable to all signers of the treaty.

Mr. BARKLEY. So that if the position taken in the British note is inherent in the treaty, without the note, then it is equally inherent in the treaty for all nations. That is true, is it not?

Mr. BORAH. Not by reason of the British note, but by reason of the treaty.

Mr. BARKLEY. If the British note's interpretation, without the note, would have been inherent in the treaty, it would have been inherent for all the nations?

Mr. BORAH. Absolutely.

Mr. BARKLEY. And if the British note's interpretation is correct, then it is correct for all the nations?

Mr. BORAH. Exactly.

Mr. BARKLEY. So that the British note does no harm, whether it is simply an interpretation of the treaty that would not have been inherent, or whether it was an addition to the treaty. It applies to all the nations exactly the same, to the extent in which they may be situated similar to the position of Great Britain.

Mr. REED of Missouri. Oh, no.

Mr. BARKLEY. Is that correct?

Mr. BORAH. Well——

Mr. BARKLEY. Of course, there is no other nation situated as Great Britain is as respects self-defense.

Mr. BORAH. The principle of self-defense and the terms of the treaty are the same for all nations. Each nation determines for itself what is self-defense under the treaty, and that is common to all the nations. In that respect, of course, it is common to all the nations. Great Britain might put a construction upon it with which we would not agree, but the right to put the construction on it is hers. The principle is the same to all nations. We might disagree as to the application of it.

Mr. BARKLEY. Suppose in the future some other nation, in the shifting of territory, should acquire regions in other parts of the world that occupied the same relationship to the mother nation that these various regions occupy to England. The mere fact that that condition does not exist now would not prevent that particular nation from asserting the same right under this treaty that Great Britain now asserts?

Mr. BORAH. They would have that right if Great Britain had never written any note.

Mr. BARKLEY. So that whether the treaty carried with it that implication, or whether the British note adds something to it, after all is not very material, because it means the same thing in either instance to all the nations that have signed it?

Mr. BORAH. Exactly. There is nothing in the correspondence and the treaty combined with reference to self-defense that is not in the treaty singly and alone.

PRISON-MADE GOODS

As in legislative session,

The PRESIDING OFFICER (Mr. SACKETT in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WATSON. I move that the Senate insist on its amendments, agree to the conference asked by the House, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. COUZENS, Mr. FESS, and Mr. HAWES conferees on the part of the Senate.

EXECUTIVE SESSION BEHIND CLOSED DOORS

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business behind closed doors.

The motion was agreed to, and the doors were closed. After 10 minutes spent in executive session the doors were reopened,

and (at 4 o'clock p. m.) the Senate, as in legislative session, adjourned until to-morrow, Saturday, January 5, 1929, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 4 (legislative day of January 3), 1929

SPECIAL COUNSEL

Owen J. Roberts, of Pennsylvania, to be one of special counsel to have charge and control of the prosecution of litigation in connection with certain leases of oil lands and incidental contracts as provided in Senate Joint Resolution 54, approved February 8, 1924.

POSTMASTERS

CALIFORNIA

Viola A. Johnson to be postmaster at Chula Vista, Calif., in place of V. A. Johnson. Incumbent's commission expired January 9, 1928.

Charles F. Evers to be postmaster at Fortuna, Calif., in place of C. F. Evers. Incumbent's commission expired December 17, 1928.

Ruth A. Haskell to be postmaster at San Ysidro, Calif., in place of R. A. Haskell. Incumbent's commission expired December 17, 1928.

COLORADO

Valcie V. Vining to be postmaster at Wray, Colo., in place of A. J. Miller, resigned.

FLORIDA

Carrie C. Avriett to be postmaster at Jennings, Fla., in place of W. W. Zipperer, removed.

Emma M. Cromartie to be postmaster at Reddick, Fla., in place of E. M. Cromartie. Incumbent's commission expired December 20, 1928.

GEORGIA

Harry P. Womelsdorf to be postmaster at Cartersville, Ga., in place of H. P. Womelsdorf. Incumbent's commission expires January 5, 1929.

William H. Blitch to be postmaster at Statesboro, Ga., in place of W. H. Blitch. Incumbent's commission expires January 5, 1929.

ILLINOIS

Eugene L. Hiser to be postmaster at Bloomington, Ill., in place of E. E. Jones, removed.

Ralph Redding to be postmaster at Fisher, Ill., in place of D. A. Rome, resigned.

Edward J. Briswalter, jr., to be postmaster at Grayville, Ill., in place of A. L. Patterson. Incumbent's commission expired May 12, 1926.

Peter J. Aimone to be postmaster at Toluca, Ill., in place of W. E. Skelton. Incumbent's commission expired January 7, 1928.

INDIANA

David E. Conrad to be postmaster at Lapel, Ind., in place of F. S. Huffman, resigned.

IOWA

Clyde W. Edwards to be postmaster at Adair, Iowa, in place of C. W. Edwards. Incumbent's commission expired December 29, 1928.

Frank C. Bentley to be postmaster at Rhodes, Iowa, in place of L. E. Perry, resigned.

KANSAS

Henry A. Cory to be postmaster at Alta Vista, Kans., in place of H. A. Cory. Incumbent's commission expires January 6, 1929.

Clarence T. Taylor to be postmaster at Arlington, Kans., in place of C. T. Taylor. Incumbent's commission expires January 6, 1929.

Henry N. Van Doren to be postmaster at Deerfield, Kans., in place of H. N. Van Doren. Incumbent's commission expires January 6, 1929.

Guy W. Bryan to be postmaster at Delia, Kans., in place of G. W. Bryan. Incumbent's commission expires January 6, 1929.

George H. Leisenring to be postmaster at Ellis, Kans., in place of G. H. Leisenring. Incumbent's commission expires January 6, 1929.

Grace E. Wilson to be postmaster at Milford, Kans., in place of G. K. Morris, removed.

Clara G. McNulty to be postmaster at Stockton, Kans., in place of C. G. McNulty. Incumbent's commission expires January 6, 1929.

KENTUCKY

Edmund T. Davern to be postmaster at Kenvir, Ky., in place of B. J. Williams, resigned.

Everett E. Davis to be postmaster at Louellen, Ky. Office became presidential July 1, 1928.

E. Paul Counts to be postmaster at Olive Hill, Ky., in place of H. G. Hicks, removed.

LOUISIANA

Emile Aubert to be postmaster at Abite Springs, La., in place of Emile Aubert. Incumbent's commission expired December 13, 1928.

Jessie V. Leech to be postmaster at Mer Rouge, La., in place of J. H. Leech, resigned.

MARYLAND

William G. Smyth to be postmaster at Chestertown, Md., in place of J. N. Bennett. Incumbent's commission expired January 7, 1928.

Louis J. DeAlba to be postmaster at Glenburnie, Md. Office established July 1, 1928.

Robert G. Merryman to be postmaster at Monkton, Md., in place of C. R. Wilhelm, removed.

MASSACHUSETTS

Florence L. Beal to be postmaster at North Cohasset, Mass., in place of E. T. Brickett, resigned.

MICHIGAN

Agnes B. Ruttle to be postmaster at Carsonville, Mich,. in place of A. B. Ruttle. Incumbent's commission expires January 6, 1929.

Florence R. Woodbridge to be postmaster at Sidnaw, Mich., in place of F. R. Woodbridge. Incumbent's commission expires January 6, 1929.

Curtis Van Prentice to be postmaster at South Haven, Mich., in place of Curtis Van Prentice. Incumbent's commission expired December 12, 1928.

James L. Blakeley to be postmaster at Standish, Mich., in place of J. L. Blakeley. Incumbent's commission expires January 6, 1929.

MINNESOTA

Ernie L. Emmons to be postmaster at Emmons, Minn., in place of G. H. Emmons, deceased.

James E. Parish to be postmaster at Houston, Minn., in place of J. E. Redding. Incumbent's commission expired January 25, 1927.

Joseph L. Gilson to be postmaster at Ivanhoe, Minn., in place of J. L. Gilson. Incumbent's commission expires January 6, 1929.

Mary A. Mogren to be postmaster at Ortonville, Minn., in place of M. A. Mogren. Incumbent's commission expired December 9, 1928.

Niels F. Petersen to be postmaster at Tyler, Minn., in place of N. F. Petersen. Incumbent's commission expires January 6, 1929.

MISSISSIPPI

Emma E. Hale to be postmaster at Natchez, Miss., in place of H. D. Hale, deceased.

MISSOURI

Clara Harlin to be postmaster at Gainesville, Mo., in place of A. C. Wood, removed.

Charles W. Lowry to be postmaster at Normandy, Mo., in place of C. A. McSwiney, resigned.

MONTANA

Nora M. Henley to be postmaster at Geyser, Mont., in place of N. M. Henley. Incumbent's commission expired December 12, 1928.

Stanley A. Yergey to be postmaster at Hardin, Mont., in place of S. A. Yergey. Incumbent's commission expired December 12, 1928.

Roy D. Beagle to be postmaster at Savage, Mont., in place of R. D. Beagle. Incumbent's commission expired December 29, 1928.

Alma M. Engle to be postmaster at Somers, Mont., in place of A. M. Engle. Incumbent's commission expires January 6, 1929.

William Fraser to be postmaster at Three Forks, Mont., in place of William Fraser. Incumbent's commission expires January 6, 1929.

NEBRASKA

Laurence N. Merwin to be postmaster at Beaver City, Nebr., in place of L. N. Merwin. Incumbent's commission expires January 6, 1929.

Clarissa Bilyeu to be postmaster at Big Spring, Nebr., in place of N. G. Craig, resigned.

Marcus H. Carman to be postmaster at Cook, Nebr., in place of M. H. Carman. Incumbent's commission expires January 6, 1929.

Joe G. Crews to be postmaster at Culbertson, Nebr., in place of J. G. Crews. Incumbent's commission expires January 6, 1929.

Charles H. Fueston to be postmaster at Dakota City, Nebr., in place of C. H. Fueston. Incumbent's commission expires January 6, 1929.

William C. Coupland to be postmaster at Elgin, Nebr., in place of W. C. Coupland. Incumbent's commission expires January 6, 1929.

Lucy L. Mendenhall to be postmaster at Elk Creek, Nebr., in place of L. L. Mendenhall. Incumbent's commission expires January 6, 1929.

Charles E. Cook to be postmaster at Franklin, Nebr., in place of C. E. Cook. Incumbent's commission expires January 6, 1929.

James J. Green to be postmaster at Moorefield, Nebr., in place of J. J. Green. Incumbent's commission expires January 6, 1929.

Herbert L. Wichman to be postmaster at Norfolk, Nebr., in place of H. L. Wichman. Incumbent's commission expires January 6, 1929.

George A. Ayer to be postmaster at Oxford, Nebr., in place of G. A. Ayer. Incumbent's commission expires January 6, 1929.

Olaf H. Larson to be postmaster at Shickley, Nebr., in place of O. H. Larson. Incumbent's commission expired December 11, 1928.

Lulu C. Brown to be postmaster at Stockville, Nebr., in place of L. C. Brown. Incumbent's commission expires January 6, 1929.

Franz J. Riesland to be postmaster at Wood River, Nebr., in place of F. J. Riesland. Incumbent's commission expires January 6, 1929.

NEW JERSEY

David Tumen to be postmaster at Atlantic Highlands, N. J., in place of David Tumen. Incumbent's commission expired December 13, 1928.

John R. Yates to be postmaster at Bivalve, N. J., in place of J. R. Yates. Incumbent's commission expires January 6, 1929.

Earl C. Woodworth to be postmaster at Essex Fells, N. J., in place of Edwin Condit, deceased.

NEW YORK

John A. Crager to be postmaster at Hagaman, N. Y., in place of J. A. Crager. Incumbent's commission expires January 6, 1929.

Hazel I. VanNamee to be postmaster at Richville, N. Y., in place of H. G. VanNamee, removed.

NORTH CAROLINA

Keiffer L. Long to be postmaster at Thomasville, N. C., in place of F. E. Sigman, removed.

NORTH DAKOTA

Myron B. Fallgatter to be postmaster at Kintyre, N. Dak. Office became presidential July 1, 1928.

Bernice R. Ronning to be postmaster at Kramer, N. Dak., in place of S. M. Ronning, deceased.

OHIO

Calvin M. Crabtree, jr., to be postmaster at Convoy, Ohio, in place of J. A. Dressel. Incumbent's commission expired February 24, 1924.

Charles F. Shoemaker to be postmaster at Pickerington, Ohio, in place of C. F. Shoemaker. Incumbent's commission expired December 17, 1928.

Clarence S. Frazer to be postmaster at Xenia, Ohio, in place of C. S. Frazer. Incumbent's commission expired December 12, 1928.

OKLAHOMA

Jennie L. Timberlake to be postmaster at Terral, Okla., in place of J. L. Timberlake. Incumbent's commission expired December 12, 1928.

OREGON

Earl B. Watt to be postmaster at Falls City, Oreg., in place of E. B. Watt. Incumbent's commission expires January 5, 1929.

Jay W. Moore to be postmaster at Harrisburg, Oreg., in place of J. T. Anderson. Incumbent's commission expired March 19, 1928.

Clarence C. Presley to be postmaster at Newport, Oreg., in place of O. P. Shoemaker, resigned.

PENNSYLVANIA

Beatrice Davidson to be postmaster at Grindstone, Pa., in place of Beatrice Davidson. Incumbent's commission expired February 18, 1928.

Harry G. Miller to be postmaster at Hillcoke, Pa. Office became presidential July 1, 1928.

Anna R. Parker to be postmaster at Kulpmont, Pa., in place of A. R. Parker. Incumbent's commission expired January 8, 1928.

Winston J. Beglin to be postmaster at Midland, Pa., in place of W. J. Beglin. Incumbent's commission expired March 1, 1928.

Mary G. Cann to be postmaster at Stoneboro, Pa., in place of W. B. Parker. Incumbent's commission expired January 24, 1928.

PORTO RICO

Luis E. Kolb to be postmaster at Utuado, P. R., in place of Moises Jordan, removed.

SOUTH CAROLINA

Hamilton R. Burkett to be postmaster at Eastover, S. C., in place of E. C. Rye, removed.

SOUTH DAKOTA

Nellie M. Sullivan to be postmaster at Athol, S. Dak., in place of N. M. Sullivan. Incumbent's commission expired December 11, 1928.

TENNESSEE

Grosvenor M. Steele to be postmaster at Bemis, Tenn., in place of G. M. Steele. Incumbent's commission expires Jan-6, 1929.

Emma R. Kilgore to be postmaster at Cottagegrove, Tenn., in place of E. R. Kilgore. Incumbent's commission expires January 6, 1929.

Sampson DeRossett to be postmaster at Crossville, Tenn., in place of Sampson DeRossett. Incumbent's commission expires January 6, 1929.

Roe Austin to be postmaster at Dover, Tenn., in place of Roe Austin. Incumbent's commission expires January 6, 1929.

Stephen Hixson to be postmaster at Dunlap, Tenn., in place of Stephen Hixson. Incumbent's commission expires January 6, 1929.

Benjamin Ford to be postmaster at Hartford, Tenn. Office became presidential July 1, 1928.

Link Monday to be postmaster at Kimberlin Heights, Tenn., in place of Link Monday. Incumbent's commission expires January 6, 1929.

Carrie S. Honeycutt to be postmaster at Wartburg, Tenn., in place of C. S. Honeycutt. Incumbent's commission expires January 6, 1929.

TEXAS

Elizabeth Ingenhuett to be postmaster at Comfort, Tex., in place of Elizabeth Ingenhuett. Incumbent's commission expired December 20, 1928.

Alvin O. Fricke to be postmaster at Kingsbury, Tex., in place of A. O. Fricke. Incumbent's commission expired December 20, 1928.

Ruth S. Marion to be postmaster at Kermit, Tex. Office became presidential October 1, 1928.

Edward H. Reinhard to be postmaster at Poth, Tex., in place of E. H. Reinhard. Incumbent's commission expired December 10, 1928.

Susan Sipes to be postmaster at Sinton, Tex., in place of M. W. Williams, resigned.

Emil J. Spickerman to be postmaster at Skidmore, Tex., in place of E. J. Spickerman. Incumbent's commission expired December 20, 1928.

UTAH

Joseph Odell to be postmaster at Logan, Utah, in place of Joseph Odell. Incumbent's commission expires January 6, 1929.

Warren W. Porter to be postmaster at Morgan, Utah, in place of W. W. Porter. Incumbent's commission expires January 6, 1929.

John E. Lunt to be postmaster at Nephi, Utah, in place of J. E. Lunt. Incumbent's commission expires January 6, 1929.

Robert S. Calderwood to be postmaster at Tremonton, Utah, in place of S. W. Elswood, removed.

VIRGINIA

Peter L. Cooper to be postmaster at Clarksville, Va., in place of W. B. Alfred, deceased.

Edgar B. Elliott to be postmaster at Gate City, Va., in place of H. E. Lane, removed.

WISCONSIN

Redmond F. English to be postmaster at Arcadia, Wis., in place of S. K. Gaveney, removed.

Orville T. Huggins to be postmaster at Belmont, Wis., in place of T. C. Snyder, deceased.

Bert Piepenburg to be postmaster at Mountain, Wis., in place of Marinus Jensen, deceased.

George H. Drake to be postmaster at Rothschild, Wis., in place of Clytie Geiger, removed.

WYOMING

Charles M. FitzMaurice to be postmaster at Greybull, Wyo., in place of B. R. Jones, removed.

CONFIRMATIONS

Executive nominations confirmed by the Senate January 4 (legislative day of January 3), 1929

SPECIAL COUNSEL

Owen J. Roberts, of Pennsylvania, special counsel, to have charge and control of the prosecution of litigation in connection with certain leases of oil lands and incidental contracts as provided in Senate Joint Resolution 54, approved February 8, 1924.

POSTMASTERS

FLORIDA

Victor Allen, Bushnell.

MONTANA

William G. Hunter, Boulder.

HOUSE OF REPRESENTATIVES

FRIDAY, *January 4, 1929*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Knowing the fullness of Thy mercy and the majesty of Thy love we would again, dear Lord, revive the ministry of praise. In the ages to come we hope to serve Thee by praise, but here and now we can serve Thee best by service. We thank Thee that out of the gates of Thy throne flow the streams of benevolence that sweeten the bitter waters of afflicted and sorrowing human life. In the name of Him who achieved miracles of restoration and recovery we ask the blessing of comfort and healing upon the strickened multitudes of our country. O Thou in whom purity, goodness, and power came to their full fruitage, stay Thou the contagion that is abroad in our land. Bring to all our people new strength, new hope, and new vision. O lift the curtains of the world and show Thyself to be great and holy, and may humanity everywhere fall at Thy feet with joy. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed with amendments, in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 15569. An act making appropriations for the Departments of State and Justice and for the judiciary and for the Departments of Commerce and Labor for the fiscal year ending June 30, 1930, and for other purposes.

RECLASSIFICATION OF FEDERAL EMPLOYEES

Mr. CELLER. Mr. Speaker, I ask unanimous consent to address the House for three minutes.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for three minutes. Is there objection?

There was no objection.

Mr. CELLER. Mr. Speaker, ladies, and gentlemen of the House, I desire to direct the attention of this body to a bill which I have just placed in the hamper, a companion bill to a bill offered in the Senate yesterday by Senator BROOKHART. This bill attempts to bring about some sort of justice and equity in connection with the carrying out of the varying features of the Welch bill, the salary increase bill. When we in the last session passed the Welch bill we thought we were at least going to give some sort of justice to the rank and file of the civilian employees, but unfortunately in the carrying out or in the administration of that act inequalities which heretofore existed were greatly aggravated. If any of you go to the various departments and you want to find out some information as to how that act was administered, you will find a great deal of dissatisfaction, a great deal of injustice. You will find instead of a leveling of the inequalities that the injustices, inadequacies in salary, and discriminations as to grade have greatly increased in the administration of this act. The bill which I have offered seeks to remedy to a great extent those injustices, and I ask your kindly consideration of it, particularly the members of the Civil Service Committee. I acted as one of the House managers in the conference on the Welch bill. I held out for the Senate bill because it was more liberal than the House bill. It was fairer. A spirit of economy—I should say parsimony—prevailed, dictated from above. The administration would not pay the price of giving the rank and file a living wage. My bill and that of Senator BROOKHART will give complete satisfaction.

LEAVE OF ABSENCE

Mr. DICKINSON of Iowa. Mr. Speaker, I request that my colleague, Mr. DOWELL, of Iowa, be given leave of absence for 10 days on account of a death in his immediate family.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

NATIONAL SANATORIUM, MARION, IND.

Mr. HALL of Indiana. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on H. R. 14153, now on the House Calendar, with reference to an appropriation for the Marion National Sanatorium.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. HALL of Indiana. Mr. Speaker, on December 17 the House had under consideration H. R. 14153, to authorize an additional appropriation of $150,000 for the construction of a hospital annex at the Marion (Ind.) Branch. The discussion of this bill indicates considerable misinformation and lack of understanding of the purposes of this appropriation and the reason for the additional amount.

The Sixty-ninth Congress authorized an appropriation of $700,000 for this sanatorium—$600,000 of which was made available for the construction of three cottages and $100,000 for the hospital annex. Since this authorization the Supervising Architect of the Treasury Department has been making definite plans for the construction of these buildings. He finds and advises that the $100,000 provided for the hospital annex is not sufficient to give the required relief and states in a letter to the Secretary of War that an additional $150,000 is necessary. In order that the Members of the House may be more fully acquainted with the Marion Sanatorium, I am submitting a statement which covers not only the work which is being done by the hospital but gives a good résumé of the equipment. I would especially call attention to that paragraph concerning the treatment hospital which states that at the present time about 40 terminal cases of paresis are cared for, is overcrowded and the beds occupied by these cases of paresis are needed for other patients with disabilities requiring special treatment. To correct this situation, it is proposed to construct a building to be used as an annex to the treatment hospital, this building to have a capacity of not less than 50 beds for the accommodation and proper segregation of these terminal cases of paresis. The building would be located immediately in the rear of the present treatment hospital and operated as an annex to the treatment service. As indicated above, such a building would materially relieve the congested situation on the treatment hospital and afford far better care for this special type of patients.

The Marion National Sanatorium was formally opened for the care of ex-service men suffering from nervous and mental diseases January 1, 1921. At that time there was available for occupancy approximately 300 beds. A large proportion of the hospital facilities were being reconstructed so as to properly care for patients of this type. The capacity was rapidly increased to 1,012. These beds were occupied almost as rapidly as buildings were completed. On February 20, 1923, a hospital unit for tuberculosis and neuropsychiatric patients was opened with a bed capacity of 80 beds, this increasing the capacity of the hospital to 1,092. For approximately two years the entire hospital has been filled to capacity, and during the past year and a half there has been at all times a waiting list of from 40 to 60 to 70 patients. It is ordinarily considered good hospital practice for hospitals of this type to have at least 10 per cent vacancy in order to facilitate transfers necessary for better care and administration and to properly segregate the different types of mental diseases. Owing to the large number of applications for admission that has been received, for over a year the number of vacant beds has at all times been less than 3 per cent. This has resulted in the following condition, namely, that whenever it was necessary to transfer a patient for medical or surgical treatment to the treatment hospital, it was necessary to transfer some one out to another building, and this in turn demanded four to six transfers.

It can readily be seen that this is not good hospital practice and does not make for the best care and administration. The

number of applications for admission is increasing rather than decreasing, and from all sources of information throughout this section of country, it would seem that this condition will obtain for an indefinite period. Although there is a Veterans' Bureau hospital with a capacity of 500 beds at Chillicothe, Ohio; one at Camp Custer, Mich., bed capacity, 500; limited facilities at Edward Hines, Jr., Hospital, Chicago; and a newly opened hospital at Great Lakes, Chicago, for the same type of cases, still the need for additional beds is urgent, and it would seem that an increase in bed capacity at the Marion National Sanatorium is the logical solution of this problem, in view of the fact that this hospital has been operating for over five years successfully.

There is maintained an exceedingly well-trained, well-organized, and efficient medical staff to which only minor additions would be necessary if additional beds were provided.

There is a nursing corps of 55 graduate registered nurses, especially trained in the care of nervous and mental patients. This nursing staff is exceedingly efficient and would require only a moderate number of additions. The other hospital personnel is well organized and efficient.

There is at this hospital one of the best-equipped clinical laboratories in the country. It is adequately personneled to care for the present patient population as well as any other additional patients in the future.

There is an exceptionally well organized and equipped occupational-therapy school housed in a specially designed and constructed building for this purpose. It is in charge of a chief aide with 12 assistant aides, directly under the supervision of the medical director and superintendent.

There are electro and hydro therapy departments fully equipped and have sufficient capacity to take care of additional patients.

There is maintained a general library of 4,863 volumes, and in addition to the books listed there are 61 weekly and monthly magazines and newspapers provided. This library is housed in a most splendid building equipped with reading rooms and an amusement hall.

There is a very commodious and well-equipped gymnasium of sufficient capacity to care for the needs of even a larger hospital than at present. The physical rehabilitation work carried on in this gymnasium is under the direction of a physical director and an assistant who have had long experience in this work and are exceedingly efficient.

There is also maintained a commodious theater, where picture shows, vaudeville, and other entertainments are given three times a week throughout the season.

The reservation consists of 333 acres, 120 of which is under cultivation.

The executive, finance, quartermaster's, and commissary departments are fully organized and are functioning in a most economical and efficient manner. These departments are all adequate to properly administer a hospital of increased capacity.

All the necessary utilities, such as water supply, electric power, heat, and sewerage, are installed. The only additional requirements for a hospital of increased capacity would be minor additions to the heating plant consisting of one 250-horsepower boiler.

From the above it can be readily noted that, first, the need exists for additional beds for neuropsychiatric cases; second, that with an institution fully equipped in all departments and proper utilities already existing additional hospital facilities can be provided at a far more economical figure than could be done in case another neuropsychiatric hospital were to be constructed from the ground up. It is believed that new hospital buildings could be constructed here in the minimum period of time, and as rapidly as completed the necessary additional personnel could be provided and the additional 250 beds contemplated thrown open for the reception of patients in a much shorter time than would be possible under any other condition.

The four building, with a capacity of 250 beds, asked for, are needed for very definite and specific reasons.

The treatment hospital, where at the present time about 40 terminal cases of paresis are cared for, is overcrowded and the beds occupied by these cases of paresis are needed for other patients with disabilities requiring special treatment. To correct this situation, it is proposed to construct a building to be used as an annex to the treatment hospital, this building to have a capacity of not less than 50 beds for the accommodation and proper segregation of these terminal cases of paresis. The building would be located immediately in the rear of the present treatment hospital and operated as an annex to the treatment service. As indicated above, such a building would materially relieve the congested situation on the treatment hospital and afford far better care for this special type of patients.

One building of approximately 65-bed capacity is urgently needed to relieve the congestion on the reception service. The number of extremely psychotic patients received on this service has steadily increased and the facilities on the reception service where these patients must necessarily be kept for a period of observation, while adequate when the building was constructed a few years ago, are entirely inadequate at the present time and from the type and number of applications received for admission, it is believed that this situation will be a permanent one. Therefore, the construction of this building is deemed of the greatest importance to the proper administration of the reception service.

The other two buildings proposed are to be used for the care and segregation of other types, mainly, the various forms of dementia præcox which constitute a large percentage of admissions.

As the situation now exists, the four new buildings with a bed capacity of 250, now under construction, will give relief from the present congestion in all departments, thereby permitting a better classification, proper segregation, and more satisfactory results in the treatment of all patients. Finally, and of the greatest importance, it would afford relief to a large number of ex-service men with nervous and mental disabilities throughout this district, who are and will be, in the future, in urgent need of hospital care and for whom no hospital facilities are available.

JUSTICE FOR FORMER EMERGENCY OFFICERS

Mr. WURZBACH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the bill H. R. 10436, introduced by myself.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WURZBACH. Mr. Speaker, supplemental legislation is greatly needed to correct the excessive disparities between the pay of those former emergency officers, originally appointed lieutenant colonels, majors, captains, and first lieutenants under section 24 of the act of June 4, 1920, and officers of the prewar Regular Army now in those grades. I feel sure these inequalities and unfair, unjust discriminations against the emergency officers were never intended by Congress, would never have occurred had Congress been properly and fully advised in the matter at the time of the passage of the pay readjustment act in 1922, and will quickly be wiped out when Congress realizes the situation.

This pay act was a measure intended to equalize conditions, to partially recompense the emergency officers in pay for what they had lost or been deprived of by various unjust and discriminatory measures, rulings, constructions, and acts. In order to fully understand the purposes of this bill and its provisions the first thing to do is to see what it does not do.

It does not in any way affect or change the promotion list; nobody loses or gains a single file. It has nothing to do with retirement. It does not apply for any longevity or "fogey" purposes. It does not in the least conflict or interfere with any past or pending legislation and is not included in any other bill. This corrective legislation is needed irrespective of whether any other pending bills pass or fail. Nobody loses a single dollar by its provisions. It does not grant any double benefits, for when one is promoted he gets no benefit from this bill; it only helps those who are not promoted. It is not opposed by any class, for opposition or amendments to it would be without real justice and merit, only an attempt by some to have themselves included in the bill, get something for themselves, right or wrong, or object simply because they do not get something. Further, it does not in any way change the principles of the pay act of June 10, 1922 (42 Stat. 631), nor its rates of pay and allowances or schedule of years.

On the contrary, this bill merely supplies an accidental omission in said pay act, benefits about 2,200 former emergency officers in the matter of their pay only, without injuriously affecting anybody in any way. It includes everyone possible under the provisions and principles of the pay act.

It merely allows the former emergency officers appointed first lieutenants, captains, majors, or lieutenant colonels as of July 1, 1920, under the act of June 4, 1920 (41 Stat. 759), to retain the equivalents, or constructive periods, of 3, 7, 14, and 20 years, respectively, given them in the pay act to put them in the second, third, fourth, or fifth pay periods, and to add to such terms their actual service, and thus be enabled to advance to a higher pay period when not promoted. This is the whole sum and substance of this bill. As the law now is, if promoted, they keep this constructive service, have it to start, only lose it when not promoted, the very time they need

it most. For the cardinal principle of the pay act as set forth in the report (No. 926) on it is to help those not promoted, to "protect the individual in the case of abnormally slow promotion."

And it is principally the former emergency officers who have been and are suffering from "abnormally slow promotion." Beginning with July 1, 1920, literally thousands of pre-war Regulars have been promoted to major generals, brigadier generals, colonels, lieutenant colonels, and majors, but with the small exception of about a dozen old majors, nearly all of whom are now dead or retired, no former emergency officers have been promoted to any of these grades. A careful investigation of the hearings before the committees, their reports, and the discussions in Congress relative to said pay act discloses statements by Senator Wadsworth, Representatives McKenzie, WILLIAM B. OLIVER, JOHN Q. TILSON, BYRNS, and Gen. John J. Pershing, showing it was the purpose and intention to grant the former emergency officers these periods of 3, 7, 14, and 20 years of constructive service for all pay-period purposes. By inadvertence Congress failed to make it apply in event the officer was not promoted. (See p. 6540, vol. 62, pt. 6, and pp. 6622 and 6821, vol. 62, pt. 7, CONGRESSIONAL RECORD; also hearings on pay act on November 25, 1921, before a joint committee, p. 109; and Rept. 926 on pay act of 1922, p. 8.)

After the World War the Army was reorganized, mainly under the act of June 4, 1920, which contains several restrictions and limitations for the former emergency officers which were not held applicable to the pre-war Regulars. These were as to the grades the emergency officers could fill, the small number of them appointed in the higher grades, the limits as to age, requirements as to examinations, and position on the promotion list. By various interpretations, constructions, and rulings, made either contrary to the legal opinions of the established authorities, or without any proper opinions, the former emergency officers were placed in unfavorable positions in several ways. The selection of these former emergency officers to be appointed and the arranging of the promotion list were done by boards composed entirely of pre-war Regulars.

Having this in mind, Congress passed the pay readjustment act of June 10, 1922, endeavoring to equalize matters by making it possible for the former emergency officers to start in higher pay periods, to advance in pay periods, and get additional pay, since their chances to be promoted in grade had been rendered very small, or greatly deferred.

For this reason and on account of their greater age, education at their own expense, their experience, World War service, judgment and training, all of which they brought as a voluntary contribution to the Army, the former emergency officers appointed colonels were considered as having 26 years' constructive service and placed in the sixth pay period; those appointed lieutenant colonels were considered as having 20 years' constructive service and placed in the fifth pay period; those appointed majors were considered as having 14 years' service and placed in the fourth pay period; those appointed captains were considered as having 7 years' service and placed in the third pay period; and finally those appointed first lieutenants were considered as having 3 years' service and placed in the second pay period. The pay act establishes six pay periods, with base pay for the first of $1,500 a year, progressing up to the sixth with a base pay of $4,000 a year.

This act puts in the sixth pay period the pre-war Regular colonels having over 26 years' service, and these former emergency officers appointed colonels, without regard to their length of service, so these latter are considered as having such 26 years as constructive service for pay-period purposes only. But actually only 5 emergency officers were appointed colonels out of the 599 colonels authorized by the act of June 4, 1920, which required that—

a suitable number be appointed in each grade below brigadier general.

It also includes in the sixth period the emergency lieutenant colonels promoted to colonels, irrespective of their length of service, whilst the pre-war lieutenant colonel promoted to colonel must have over 26 years' service. So the emergency lieutenant colonel retains his constructive service when promoted.

The fifth pay period embraces pre-war lieutenant colonels with over 20 and less than 30 years' service and those former emergency officers appointed lieutenant colonels without regard to their length of service, so these latter are considered as having the needed 20 years as constructive service for pay-period purposes only. But actually only 14 emergency officers were appointed lieutenant colonels out of the 674 lieutenant colonels authorized by the act of June 4, 1920. It also includes emergency majors promoted to lieutenant colonels, without regard to their length of service, whilst the pre-war Regular major thus promoted must have over 20 years' service to advance to the fifth pay period. So the emergency major retains his constructive service when promoted.

Certainly the emergency lieutenant colonels not promoted and having 10 years' actual service should be allowed to add this to their 20 years' constructive service to make the 30 years needed to advance to the sixth pay period. This the pay act accidentally omitted, but this bill supplies it and cures the defect.

Under the present law the pre-war Regular lieutenant colonel serves 10 years at most in the fifth period, then advances to the sixth period whether promoted or not, but the emergency lieutenant colonel not promoted must have 30 years' actual service before he can advance to the sixth period. As he had to be over 45 years old to be appointed and must retire at 64 it is impossible for him to thus advance to the sixth period. This inequality, discrimination, and injustice this bill rectifies and removes by adding to those in the sixth period the emergency lieutenant colonels, not promoted, who have completed 10 years' actual service.

The fourth pay period embraces pre-war majors with over 14 and less than 23 years' service, and those former emergency officers appointed majors without regard to their length of service, so these latter are considered as having the needed 14 years as constructive service for pay-period purposes only. But only 208 emergency officers were appointed majors out of the 2,245 majors authorized by the act of June 4, 1920. It also embraces emergency captains promoted to majors without regard to their length of service, whilst the pre-war captain promoted to major must have over 14 years' service, so the emergency captain retains his constructive service when promoted. Emergency majors not promoted and having 9 years' actual service should be allowed to add this to their 14 years' constructive service to make the 23 years necessary to advance to the fifth pay period. This is what the law now accidentally omits and this bill supplies.

Now, the pre-war Regular major serves nine years at the most in this fourth period, then advances to the fifth period whether promoted or not, but the emergency major not promoted must have 23 years' actual service before he can advance to the fifth period. As he was on the average about 43 years old when appointed and must retire at 64 scarcely any can thus advance to the fifth pay period. This inequality, discrimination, and injustice this bill also rectifies and removes by adding to those in the fifth pay period the emergency majors not promoted who have completed nine years' actual service.

The third pay period embraces pre-war captains, with over 7 and less than 17 years' service, and these former emergency officers appointed captains without regard to their service, so these latter are considered as having the needed 7 years as constructive service for pay-period purposes only. It also embraces emergency first lieutenants promoted to captains without regard to their length of service.

Emergency captains not promoted and having two years' actual service should be allowed to add this to their constructive service to make the 17 years necessary to advance to the fourth pay period. This is what the law now accidentally omits, but this bill supplies. Now the pre-war Regular captain serves 10 years at the most in this third period; then advances to the fourth period whether promoted or not; but the emergency captain, not promoted, must have 17 years' actual service before he can advance to the fourth period. This inequality, discrimination, and injustice this bill also rectifies and removes by adding to those in the fourth pay period the emergency captains not promoted who have completed 10 years' actual service.

The second pay period embraces pre-war first lieutenants with over 3 and less than 10 years' service and those former emergency officers appointed first lieutenants without regard to their length of service, so these latter are given the needed 3 years as constructive service. Another inequality is corrected in this bill by also adding to those the fourth pay period those appointed to the Army on July 1, 1920, as first lieutenants who have been promoted to captains and who have had 14 years' actual service.

Former emergency officers appointed colonels are not included in this bill because they are already in the sixth or highest pay period, and this bill in no way affects them; they can not be included.

Former emergency officers appointed second lieutenants were not given any constructive service by the pay, as they needed none, so they can not be and are not included in this bill. Besides, they have all been promoted to first lieutenants or captains and are all now in the third, or captains' pay period.

Moreover, the second lieutenants are much younger and will be able to acquire sufficient actual service, before retirement, to advance to higher pay periods; they had no just claim for any constructive service and were not given any in the pay act.

Under the requirements, a former emergency officer must be past 36 years of age to be appointed a major, but about 1,200 pre-war Regulars under 36 were made majors, many at the immature ages of 26, 27, 28, or 29.

With the pay act operating as at present, there are great discriminations against the former emergency officers in several ways. Pre-war majors are actually receiving more remuneration than even emergency colonels or lieutenant colonels. And pre-war majors, younger on the average by about 10 years than the emergency majors, doing exactly the same work, are receiving from $140 to $160 more each month than the emergency major. Even after this bill becomes the law, these pre-war majors will still receive about $70 a month more than the emergency majors.

It is estimated that the greatest cost of this bill will be for the first year, approximately $900,000, but this is not "the annual additional cost," since the increased cost will decrease rapidly each successive year as these former emergency officers die, resign, retire, or advance into higher pay periods by length of service, irrespective of this bill.

The Committee on Military Affairs of the Senate favorably unanimously reported upon bill S. 3569, when identical with H. R. 10436. (See S. Rept. No. 962, 70th Cong., 1st sess.)

When it was under discussion before the whole Senate, Senator DAVID REED, chairman of the Committee on Military Affairs, supported it strongly, stating that the pay bill of 1922 gave a constructive credit of 14 years to certain officers—the former emergency officers appointed majors—at the beginning of their service, but by a holding—or omission—

denies them this same constructive credit from then on—

When not promoted. He further said:

This is the result of a technicality that did not occur to anyone in Congress or in the department. This bill will go very far toward relieving the discontent among the emergency officers who were taken in in 1920. It merely carries on the constructive credit for service that they were given at the beginning of their term. I believe it is fair and I hope it will be passed. (See CONGRESSIONAL RECORD, May 8, 1928, p. 8464.)

And the Senate, on May 23, 1928, unanimously passed the bill. On the floor at the very last minute an amendment was presented adding almost 2,000 more captains to the bill who have no right or reason to be in the bill. The amendment is worded—

or whose present rank as captain dates from July 1, 1920, or earlier.

This was never considered by the Senate Military Committee, no testimony was ever taken to support it, nor did the Senate have the opportunity to fully consider it. This amendment brings about 2,000 additional captains within the benefits of the bill, with a consequent increase in its cost of over 250 per cent. These captains are by no means entitled to such treatment under the principles of the pay act.

Congress did not intend to advance them to the fourth or higher pay period except by actual years of service. The majority of these 2,000 officers were appointed to the Army in the grade of provisional second lieutenant and have already realized unexpected and abnormally swift promotion. All are favorably placed on the promotion list to the detriment of most former emergency officers. The pay act contemplates that an officer entering the service as a second lieutenant shall serve a minimum of 3 years in that grade, 7 years as a first lieutenant, and 7 years as a captain, a total of 17 years, before advancing to the fourth pay period—unless promoted to a field grade, in which case he reaches the fourth pay period after 14 years of service. Congress gave these additional 2,000 captains no constructive service for advancement to the fourth pay period and never so intended. The present amendment would elevate them to the fourth pay period with only 10 years' actual service, instead of 14 or 17 years. The present average age of these officers is about 36 years, while the present average age of the captains affected by the original bill, without this amendment, is about 44 years, a difference in age, experience, and maturity, which of course explains the original appointment of the latter group as captains and the purpose of Congress in allowing them 7 years of constructive service for pay-period purposes.

The balance of the group benefited by the amendment is composed of former emergency officers originally appointed in the grades of second or first lieutenant and who have already profited by immediate promotion and advancement of one or two pay periods. Their average age is also about 36 years. To give them the same constructive service as is given those originally appointed captains is illogical, unnecessary, was never intended by Congress, and was not done in the pay act of 1922, which this bill does not change in principle. Such a grant would elevate officers appointed second lieutenants to the fourth pay period seven years before that period would be reached by many officers simultaneously appointed as first lieutenants. This amendment should be stricken out, the substitute amendment adopted, and the bill passed. This substitute amendment at the end of the first section on page 3, after the word "service," changes the period to a semicolon and adds the words—

and also to captains of the Army who were appointed to the Regular Army under the provisions of the first sentence of said section 24 in the grade of first lieutenant and who have completed 14 years' service.

TRANSMISSION IN THE MAILS OF POISONOUS DRUGS AND MEDICINES

Mr. KENDALL. Mr. Speaker, I call up the bill (S. 3127) to amend section 217, as amended, of the act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909.

The Clerk read the Senate bill.

Mr. GARNER of Texas. Mr. Speaker, is this a privileged bill?

The SPEAKER. The Chair so understands. There is an identical bill, as the Chair understands, on the House Calendar.

The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

CONVICT-MADE GOODS

Mr. KOPP. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases, with Senate amendments, disagree to the Senate amendments, and ask for a conference.

The Clerk read the title of the bill.

Mr. MAPES. Mr. Speaker, reserving the right to object, and I do not intend to object, I should like to call the attention of the chairman and the other members of the conference committee on the part of the House to the third amendment of the Senate to the House bill:

On page 2, line 5, after the word "otherwise," the Senate adopted this amendment: "*Provided*, That this act shall not apply to the preparation or processing of farm products so as to make same suitable for use by the manufacturer in the making of any manufactured article."

Mr. Speaker, the penal institutions of some of the States, including the State of Michigan, manufacture canned goods. I am not sure, with this amendment as it reads now, whether canned goods would be excepted from the provisions of the bill or not, but it seems to me there would be no uncertainty about it if the first part of the Senate amendment should be adopted and the other part eliminated. For example, if the House conferees and the Senate conferees would agree to leave in this langauge—

Provided, That this act shall not apply to the preparation or processing of farm products—

and eliminate the rest of the Senate amendment, it seems to me there would be no question but what canned goods would not come under the provision of the bill; but, with the qualifying clause in the bill—

so as to make same suitable for use by the manufacturer in the making of any manufactured article—

I am not sure whether they are included or not. I would like to recommend to the conferees that they give this particular amendment very serious consideration, and if it can be arranged so as to except from the provisions of the law canned goods, it seems to me it would be a very desirable thing to do.

Mr. GARRETT of Tennessee. Mr. Speaker, reserving the right to object, I understand there are two or three other amendments, one of them extending the time of its going into operation to five years. It seems to me this amendment ought to prevail.

The second amendment provides—

except commodities manufactured in Federal penal and correctional institutions for use by the Federal Government.

I should be very glad if the gentleman would let us have now his interpretation of the meaning of that particular amendment, which is amendment No. 2.

Mr. KOPP. My understanding of the purpose of that amendment of the Senate is this: By our present law and practice the Federal Government does not sell goods upon the market that it manufactures in the Federal penitentiaries, but it manufactures goods for Federal purposes. The intention of this amendment, as I understand, is to save that right to the Federal Government

so that it will not be interfered with by this bill when it undertakes to manufacture goods at Leavenworth or Atlanta or at its institutions in the other States. I understand that is the purpose.

Mr. SCHAFER. Mr. Speaker, reserving the right to object, I have tried to get a copy of the bill, but find none available at this time. Is this the bill which gives the States authority to regulate prison-made goods moving in interstate commerce?

Mr. GARRETT of Tennessee. Yes; I believe it has been so called.

Mr. SCHAFER. The Cooper-Hawes bill?

Mr. GARRETT of Tennessee. I think it has been so known.

Mr. COOPER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. SCHAFER. Yes.

Mr. COOPER of Ohio. This is the Cooper-Hawes bill with Senate amendments. The Attorney General requested that the amendment that the gentleman from Tennessee spoke about a moment ago he adopted. Personally I can not see any necessity for it at all, because the Federal Government at this time does not permit any convict-made goods to go on the market in competition with free labor and private industry.

Mr. GARRETT of Tennessee. However, there is no law preventing it, is there?

Mr. COOPER of Ohio. I do not know about that. I believe there is. I will ask the gentleman from Iowa if there is such a law at the present time.

Mr. KOPP. I so understand.

Mr. COOPER of Ohio. The Attorney General seemed to think it ought to go in the bill.

In regard to the other amendment, which the gentleman from Michigan spoke about, I believe that ought to be carefully considered by the conferees, for I am of the opinion that it might open the door for all agricultural products to be exempt from the provisions of this law if the amendment remains in the bill as it came from the Senate, I hope the conferees will follow the advice of the gentleman from Michigan [Mr. MAPES] and try to have that remedied before it comes back to the House.

As to the amendment extending the time from three to five years, I have no serious objection to that, and I do not believe any other member of the Labor Committee has any serious objection to it.

Mr. SCHAFER. Mr. Speaker, under the reservation I would like to state that I hope the House conferees will oppose the Senate amendment which makes certain exceptions.

If the bill is right in principle, it should be enacted into law in the form it passed the House by an overwhelming majority vote. There should be no exemptions, as provided for in the Senate amendments. Those who produce agricultural products are entitled to protection from unfair competition of the product of convict labor.

Mr. GARRETT of Tennessee. Mr. Speaker, still further reserving the right to object, if I may, in order to make this statement—one aspect of this subject which I fear most Members have overlooked, and which I can not but believe my friend who has just addressed the House has overlooked, is the humanitarian aspect of it as applied to the prisoners themselves. The fact is that this bill, if it shall stand the test of the courts, is going to work a very great hardship at least for a time. The question of what shall be done with the prisoners is going to be a tremendously pressing problem. They can not be, or should not be, kept in idleness; that is not in the interest of the prisoner and it is not in the interest of society.

I can not resist the feeling that certain influences all along have overemphasized the amount of competition which has been given to legitimate labor and legitimate industry by prison labor. I am not at all sure that we are doing the right thing in passing the bill at all, and if it is passed I certainly think this amendment extending the time for five years should be approved, because they will need that time to study the problem in order to know what to do in a humanitarian way for these prisoners.

Mr. COOPER of Ohio. Mr. Speaker, I fully agree with the gentleman from Tennessee that the prisoners should have some labor to perform; this bill is not going to stop the prisoners from working. It merely gives the States the right to regulate the sale of convict-made goods. We have a law in the State of Ohio regulating the sale of convict-made goods within our borders, and last year $3,000,000 worth of convict-made goods from other States were sold in Ohio in competition with free labor and legitimate business, over which our State had no control whatever. This bill provides that when a State has a law regulating the sale of convict-made goods, made in said State, it shall also have the power to regulate the sale of prison-made goods imported from other States.

Mr. SCHAFER. Will the gentleman yield?

Mr. COOPER of Ohio. Yes.

Mr. SCHAFER. Is there any good reason why there should be any exception as embodied in the Senate amendment?

Mr. COOPER of Ohio. As far as the amendment granting extension of time for two years more, we can offer no serious objection to that, for it is giving them a little time to reestablish the whole prison system of employing prisoners, and by giving them five years instead of three, which the bill provided when passed by the House, they will have sufficient time to readjust the system.

Mr. SCHAFER. How about the other amendment, excepting certain products?

Mr. COOPER of Ohio. I have expressed myself on that. I am not in favor of that Senate amendment as it now stands.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER appointed the conferees on the part of the House, as follows: Mr. KOPP, Mr. ZIHLMAN, and Mr. CONNERY.

MICHIGAN HABITUAL CRIMINAL LAW

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent to address the House for seven minutes.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for seven minutes. Is there objection?

There was no objection.

Mr. LAGUARDIA. Mr. Speaker, sometimes the titles assumed by individuals have such high-sounding names that their utterances may receive more attention than would otherwise be justified. I have here a clipping from the New York World of January 3, 1929, which quotes one Dr. Clarence True Wilson, who calls himself the "executive secretary of the board of temperance, prohibition, and public morals of the Methodist Church."

This statement is so un-Christianlike, so extreme, so wild, so intemperate that it is well and necessary to distinguish it and make clear that it can not possibly represent in any way the views of the thinking men and women of the great Methodist Church.

This man Wilson, referring to the case of Mrs. Etta Mae Miller, mother of 10 children, who was sentenced to life imprisonment for selling a pint of liquor in violation of the State prohibition law, approves of the life sentence and apparently regrets the punishment could not be more severe. This man Wilson is quoted as saying:

> Our only regret is that the woman was not sentenced to life imprisonment before her 10 children were born.

In other words, Doctor Wilson, under the guise of speaking for the church, approved of the life sentence, and if he were to carry out to a logical conclusion his approval and his recommendation we would have to amend our laws so that before a woman is married a board of temperance and morals would first have to pass upon her qualifications to bear children, particularly as to her future or potential proclivities for selling liquor any time during her natural life. Or perhaps the "doctor" would have Congress prohibit by law any person not approved by him, or convicted of violating the liquor law, from bearing children. He gloats and rejoices at the cruel life sentence imposed on this unfortunate woman.

Mr. COOPER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. LAGUARDIA. In just a moment. A more extreme statement has never been expressed by anyone outside of an insane asylum, and I state frankly that if Doctor Wilson were a resident of New York City, or if he were a resident of Washington, D. C., I would ask for a commission to test his sanity. His inhuman and unnatural views as expressed by him are not human and are not normal. I yield now to the gentleman from Ohio.

Mr. COOPER of Ohio. Why does the gentleman say that Doctor Wilson is speaking for the Methodist churches of this country?

Mr. LAGUARDIA. I say that he is not. And that is exactly the fact that I am trying to bring out. I say that he is not speaking for the Methodist churches of this country. It is exactly my purpose in taking the floor, because some good people might read this statement and be misled.

The gentleman has now my purpose in calling attention to this statement. This is the kind of thought that is back of the extreme prohibition idea. This is the kind of a man who assumes leadership in prohibition enforcement. Think of demanding a prohibition test before marriage, and then life imprisonment if there is any belief of future violations before the bearing of children. I should like to hear from anyone on the floor of this House who will stand up and approve of Doctor Wilson's statement. It is too bad that this board

of public morals, prohibition, and temperance can not get an amendment to the law which would let them pass upon the qualifications of people who want to marry with power to impose a life sentence if they are not of their own particular standard of prohibitionist. Let me point out to Doctor Wilson that we have never heard him attacking some of the largest contributors to the prohibition chest who are making huge profits out of prohibition. If this is the best example of the leadership of thought in prohibition, then make the best of it.

Mr. SCHAFER. Mr. Speaker, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SCHAFER. The gentleman from New York is an authority on prohibition matters. Has the gentleman any information indicating whether or not the Anti-Saloon League returned the $500,000 donation to that organization by the notorious Kresge, of Detroit?

Mr. LAGUARDIA. Oh, I think possibly the Anti-Saloon League, feeling that Mr. Kresge needed more money for his orgies in New York and elsewhere in violating the law, might have returned a part of it to him. I do not know.

DEFICIENCY APPROPRIATIONS

Mr. ANTHONY, from the Committee on Appropriations, reported the bill (H. R. 15848) making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1929, and prior fiscal years, to provide urgent supplementary appropriations for the fiscal year ending June 30, 1929, and for other purposes, which was read a first and second time, and with the accompanying papers, referred to the Committee of the Whole House on the state of the Union and ordered printed.

Mr. BYRNS. Mr. Speaker, I reserve all points of order.

The SPEAKER. The gentleman from Tennessee reserves all points of order.

Mr. GARNER of Texas. Mr. Speaker, permit me to ask the gentleman from Kansas [Mr. ANTHONY] when it is expected to take up this bill?

Mr. ANTHONY. To-morrow.

Mr. GARNER of Texas. The gentleman does not hope to pass the bill to-morrow?

Mr. ANTHONY. I would like, if possible to do so. Of course, it would depend entirely upon the demands for general debate.

Mr. GARNER of Texas. The reason that I am asking the gentleman is because I would like to have some understanding of when we shall vote on the bill or when we shall take it up under the 5-minute rule. I know that there will be some considerable debate asked for on this side of the House.

Mr. ANTHONY. We will be disposed to grant all reasonable requests for debate.

Mr. BYRNS. I understood from the gentleman from Kansas that there would be no disposition to consider this bill under the 5-minute rule before Monday.

Mr. ANTHONY. I stated if there was no considerable demand for debate I would hope to pass it to-morrow, but it is agreeable to me to utilize to-morrow for general debate.

Mr. BYRNS. On this side of the House there will be requests for at least two hours, and possibly more, for general debate. To-morrow is Saturday. Why could not the gentleman agree to take this up under the 5-minute rule on Monday?

Mr. TILSON. Monday is Consent Calendar day.

Mr. BYRNS. Then Tuesday.

Mr. ANTHONY. It ought not to take long on Monday after general debate to pass the bill under the 5-minute rule. We ought to dispose of it in an hour.

Mr. GARRETT of Tennessee. Is it the purpose to set aside this War Department bill?

Mr. ANTHONY. That is the understanding.

Mr. TILSON. That was agreed when the War Department bill was called up for consideration.

Mr. GARNER of Texas. Let us agree to take this up under the 5-minute rule on Tuesday, then.

MICHIGAN HABITUAL CRIMINAL LAW

Mr. KETCHAM. Mr. Speaker, in view of the statement of the gentleman from New York [Mr. LAGUARDIA] I ask unanimous consent to proceed for three minutes.

The SPEAKER. The gentleman from Michigan asks unanimous consent to proceed for three minutes. Is there objection?

There was no objection.

Mr. KETCHAM. Mr. Speaker, in view of the great solicitude expressed on the floor of the House by distinguished Representatives from New York, Wisconsin, and other States, I thought it might be of interest to the House to take about two minutes this morning to read into the proceedings of the House an editorial from the Detroit Free Press of January 2, 1929, which I trust will be given due attention by these gentlemen:

MICHIGAN'S OWN BUSINESS

Prosecuting Attorney Barnard Pierce, of Ingham County, made a statement that needed utterance when he said to the jurymen in the Etta Mae Miller "fourth-offense" case: "This is no business of anyone outside of Michigan. Your decision is no business of Illinois, New York, or any other State, or of the Federal Government."

For propagandist reasons which have nothing whatever to do with an enthusiasm for impartial and effective administration of law, certain persons and publications in more or less adjacent parts of the country have been sob-squadding with great assiduity over the Miller case, and in effect have been attacking the whole of Michigan's penal code because in one particular it displeases them. These weepers and wailers are not at all interested in our State's fight against banditry and general crime. Generally speaking, they are interested only in booze and they resent the punishment of anybody caught peddling it.

[Applause.]

That statement may seem rather sweeping, nevertheless we think it is substantially true.

The Free Press is not among those who consider the Michigan penal code perfect as it stands. Those who drew it up had no idea that it would prove to be without flaws or opportunities for improvement. But it is better than anything of the sort the State ever had before, and it is far better than anything most other parts of the country possess, and it can be amended by the legislature as the experience of two years may show it ought to be amended, without the assistance of self-appointed advisers in New York or Illinois or anywhere else.

[Applause.]

The editorial speaks for itself. It only needs to be said that the Detroit Free Press is one of the leading papers of the State and the country, and certainly has not heretofore been accused of being fanatically dry in either news or editorials.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. CELLER. Mr. Speaker, I ask unanimous consent that the gentleman's time be extended, so that I can ask him a question.

Mr. TILSON. Mr. Speaker, there must be an end to this. I object.

CONSTRUCTION AT MILITARY ACADEMY, WEST POINT

Mr. MORIN. Mr. Speaker, by direction of the Committee on Military Affairs, I ask unanimous consent to take from the Speaker's table the bill H. R. 11469, with Senate amendments, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to take from the Speaker's table the bill H. R. 11469, with Senate amendments, disagree to the Senate amendments, and ask for a conference. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 11469) to authorize appropriations for construction at the United States Military Academy, West Point, N. Y.

The SPEAKER. Is there objection?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, I would like to have a little information about these amendments. Is there ever going to come an end to the addition of appropriations for the development of West Point Military Academy? As I remember, the House passed this bill just in the form the War Department said they wanted it. The Senate has added several hundred thousand dollars to it. Is there any basis for these proposed additions? And what is likely to be the attitude of the House conferees toward them?

Mr. MORIN. I will say to the gentleman from Michigan that the bill originally passed by the House was a bill sent up by the War Department and introduced by myself. It was to conform to the continuous building program at West Point. In that program there was an item for the building of two apartment houses. After the proposed bill was introduced the Secretary of War decided that but one apartment house should be built and the balance of the officers provided for in separate quarters. He sent a letter to the committee recommending that we increase the item for officers' quarters in order to build the separate houses. He also recommended the elimination of two items not considered of immediate necessity.

Mr. CRAMTON. That is, postpone several items; not anything cut out, but to postpone several items?

Mr. MORIN. The House in passing upon the bill did not act on the Secretary of War's later recommendation. The bill as it passed the Senate is just as the Secretary of War recommended in his second letter to our committee.

Mr. CRAMTON. What was the attitude of the Budget on the recommendation of the department?

Mr. MORIN. They approved it.

Mr. CRAMTON. What is the attitude of the conferees? Is it entirely in harmony with this proposed increase?

Mr. MORIN. Well, Mr. JAMES and Mr. MCSWAIN and myself will be the conferees. I approve of it because it conforms to the recommendation of the Secretary of War, to which I have just called attention.

Mr. CRAMTON. I am not going to object, as I do not know enough about it to justify me in taking such action. But I believe there should be an end to the building program at West Point.

Mr. MORIN. Of course, there should be, but that program will take some years to complete.

Mr. CRAMTON. If the Committee on Military Affairs of the House intend to continue their present policy of taking over the functions of the Committee on Appropriations and prescribing just what buildings shall be constructed and how much they shall cost, even in the case of an icehouse, then I think they should come to the House with positive declarations and recommendations, and stick to them, instead of going to the other end of the Capitol.

Mr. MORIN. The committee is conforming to the program of the Budget Bureau. Formerly we did not do that. I have tried several times to have a complete program authorized, but it has been rejected. Therefore we are compelled to come in each year and ask for authorizations of just the amount needed to carry on the building program during the ensuing year.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection; and the Speaker appointed as conferees on the part of the House Mr. MORIN, Mr. JAMES, and Mr. MCSWAIN.

REAPPORTIONMENT BILL—MINORITY REPORT

Mr. RANKIN. Mr. Speaker, I ask unanimous consent that we may have five legislative days in which to file a minority report on the reapportionment bill.

The SPEAKER. The gentleman from Mississippi asks unanimous consent that five legislative days be allowed in which to file a minority report on the reapportionment bill. Is there objection?

Mr. TILSON. Reserving the right to object, Mr. Speaker, I wish to say that I have planned, in making up the program for next week, to consider this bill on Thursday of next week. Will the request of the gentleman from Mississippi interfere in any way with this program?

Mr. RANKIN. I will make it three legislative days.

The SPEAKER. The gentleman from Mississippi modifies his request and asks unanimous consent that three legislative days be allowed in which to file a minority report. Is there objection?

Mr. RAMSEYER. Mr. Speaker, reserving the right to object, I would like to know what deep-seated governmental policy is at stake which requires that this bill, after it was up for consideration in the House just a few months ago, should be called up hastily at this time?

Mr. TILSON. I do not think it is being very hastily called up. We are giving a week's notice now and it has been talked about ever since we reassembled on the first Monday in December, so that it does not seem to be hastily called up at all.

Mr. RAMSEYER. The gentleman misses the main part of my question, to which I would like to have an answer. However, I will ask an easy question: Is it contemplated by the leader that in case this bill is defeated in January to call it up again in February?

Mr. TILSON. No; I should not expect to call it up again as early as February, if it failed in January.

Mr. RAMSEYER. Would the gentleman from Connecticut favor a rule making this committee a privileged committee, so it can report and call up a bill whenever it desires?

Mr. TILSON. I should not favor such a rule, but I think the House ought to be in a position to execute its will at any time, as it can do in this case.

Mr. LAGUARDIA. We are only nine years behind now.

Mr. RAMSEYER. The Senate is the cause of that, and not the House.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. CELLER. Mr. Speaker, reserving the right to object, may I ask the gentleman from Connecticut when we will take up the judges bill? I understood it was to be taken up next Thursday.

Mr. TILSON. The judges bill will probably be taken up early the following week.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

WAR DEPARTMENT APPROPRIATION BILL

Mr. BARBOUR. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15712) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1930, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15712, with Mr. TILSON in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15712, which the Clerk will report by title.

The Clerk read the title of the bill.

Mr. BARBOUR. Mr. Chairman, I yield myself one hour.

The CHAIRMAN. The gentleman from California is recognized for one hour.

Mr. BARBOUR. Mr. Chairman, the Committee on Appropriations submits for the consideration of the House to-day the bill making appropriations for the military and nonmilitary activities of the War Department for the fiscal year 1930. The subcommittee which had charge of the preparation of this bill met on the 15th day of November and began its hearings on that day. It has been at work on the bill practically ever since that time up until the present. The subcommittee went into all matters which are covered by the bill very carefully and we feel that the hearings on this bill are quite complete and that anyone interested in any particular item can secure almost any information he may desire with respect thereto from the hearings.

I want to say that this bill does not represent the thought or judgment of any particular member but rather is it the final thought and judgment of all of the members of the subcommittee, approved by all of the members of the whole Committee on Appropriations. If you examine the bill, you will find that there are several improvements over former bills in the mechanics of the measure which is proposed here to-day, vastly improving the form of former War Department appropriation bills. The credit for that work is due almost entirely to Mr. Pugh, who has very efficiently served this subcommittee as clerk during the preparation of this bill. [Applause.]

The appropriation bill for 1930, which is now before you, carries direct appropriations for military activities amounting to $328,038,815. It also includes contract authorizations amounting to $3,000,000, and purchase-of-discharge funds amounting to $300,000, in all $331,338,815. The 1929 War Department appropriation bill carried direct appropriations of $309,601,568.50, reappropriations of $1,844,419, and contract authorizations amounting to $7,115,000. The total of the 1929 bill, including reappropriations and contract authorizations was $318,560,987.50 for military activities. For nonmilitary activities the 1929 bill carried $88,915,653, and the 1930 bill carries $107,089,600. The total of the two bills, including reappropriations, contract authorizations, and purchase-of-discharge funds, is as follows: For 1929, $407,476,640.50, and for 1930, $438,428,415.

In making comparisons, however, between the appropriations for the two years it may not be proper to include reappropriations, because they have heretofore been reported to the House in previous appropriation bills as money appropriated; neither is it proper to consider contract authorizations, because contract authorizations must be appropriated for later and will come in in the totals of later appropriation bills.

I give you these items, however, just to afford a clearer picture of what the 1930 bill does as compared with the 1929 bill.

The proper comparison of the two bills is made in the direct appropriations. The 1929 bill carried for military activities in direct appropriations $309,601,568.50, for nonmilitary activities it carried $88,915,653, a total of $398,517,221.50. The 1930 bill carries for military activities $328,038,815, for nonmilitary activities $107,089,600, or a total of $435,128,415. In direct appropriations the 1930 bill carries $36,611,193.50 more than the bill for the present fiscal year.

I will state that the total of the 1930 bill is $43,392 under the amount recommended by the Bureau of the Budget.

The principal increases in the 1930 bill under military activities are in pay of the Army, the increase amounting to $3,215,995; post construction, the increase amounting to $9,357,950; for the Air Corps an increase of $8,729,141; for the United States Military Academy at West Point an increase of $600,000; for the National Guard an increase of $578,197; and on account of the Welch Act an increase of $2,272,000.

In the nonmilitary activities the principal increases are $20,000,000 on account of flood control on the Mississippi River; $4,370,000 on account of return of contributed funds in connection with flood control on the Sacramento River; and $1,351,000 on account of the Panama Canal.

The bill provides for an Army of an average enlisted strength of 118,750 men, the same as at present; 6,500 Philippine Scouts; and an average officer strength of 12,000.

For the present fiscal year we appropriated for about 11,800 officers and for 1930 we are providing for 200 more officers on account of increase of officer personnel in the Air Corps.

Under the Quartermaster Corps it is proposed in this bill to purchase 259 motor vehicles; 24 trucks at a maximum cost of $6,000 each, 100 trucks at a maximum cost of $3,000 each, 15 ambulances at a maximum of $3,000 each, 10 passenger cars at a maximum of $2,500 each, 50 passenger cars at a maximum of $1,500 each, and 60 solo motor cycles at a maximum of $325 each.

The bill carries language which will permit the purchase of a larger number of these motor vehicles with the same funds if it is found possible to do so. Sometimes in buying motor vehicles in large quantities they can be purchased at reduced rates, so the Quartermaster Corps is not confined to the exact number stated in the bill and if they are able with these funds to purchase more the language will permit them to do so.

It might interest the members of the committee to know that on November 1, 1928, the Army had on hand a total of 17,581 motor vehicles. Of this number 7,667 were operating, 9,914 were not operating, but of this latter number 6,363 were serviceable or economically repairable, and 3,551 were unserviceable and not economically repairable.

The question of horses and mules is one to which the subcommittee having charge of the bill has given very careful consideration.

Under the provisions of this bill the Army will purchase 1,500 horses at an average estimated price of $165 per head, and 1,000 mules at the same average price. In 1929 there were purchased 2,300 horses and 1,700 mules.

The total requirements of the Army in horses and mules under the reduced allowance based on a strength of 118,750 men is 24,296 horses and 14,913 mules, or a total of 39,209 animals. On July 1, 1928, we had on hand 22,886 horses, 13,583 mules, or a total of 36,469. This was a shortage of about 2,400 horses and 1,300 mules below the reduced requirements for the present strength of the Army; but in investigating this question the committee went into the matter of privately owned mounts of officers.

We found that 1,856 officers of the Army own a total of 2,548 horses which they have purchased with their own funds. The law provides that an officer below the grade of major owning one horse shall receive from the Government $150 per annum on account of that horse. If he owns two horses, he receives $200 per annum. The horse is also foraged and stabled. Above the grade of captain, officers may own two horses up to the rank of general, and then they may own three horses, for which no allowance is paid by the Government, but those horses are foraged and stabled by the Government.

The committee, as I said a moment ago, considered this question carefully and it came to the conclusion that if the Government is paying $150 a year for one horse privately owned by an officer and $200 a year for two horses privately owned by an officer, then those horses should be counted in estimating the total number of horses on hand. They are provided in this way in lieu of a Government horse. An officer is given his choice of riding a Government-owned horse or owning his own horse, and if he owns his own horse he is paid this allowance. If he is paid this allowance, in the opinion of the committee that horse should be counted in determining the total number of horses on hand.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. BARBOUR. I yield to the gentleman from New York.

Mr. LAGUARDIA. Is this allowance for horses applicable to officers who are not mounted?

Mr. BARBOUR. Only to officers required to be mounted. A provision was inserted in the bill limiting the allowance to one horse, and the limit of the number of horses stabled and foraged to one horse. That will reduce the expense of the Government for privately owned mounts by the amount allowed for the second horse and the amount paid out on account of forage and stabling for the second and third horses.

Counting the horses privately owned, we find there is a very small shortage in the actual requirements of the Army at this time; possibly a few hundred at the outside.

The status as to horses on June, 1930, is that we will be 354 short on the basis of the revised peace allowance and the purchase of 1,500 horses during the next fiscal year, taking into account also 1,856 privately owned mounts. As to mules, we will be 1,967 short. So you will see as to horses that the mounts privately owned practically balance the requirements.

Mr. WURZBACH. Will the gentleman yield?

Mr. BARBOUR. Certainly.

Mr. WURZBACH. Under the $150 annual allowance to an officer, what does that represent—the purchase price?

Mr. BARBOUR. It is supposed to be in lieu of the purchase price. Some of the officers purchase very fine horses, and the cost of those horses amount to a considerable sum of money. An officer who wants to own his horse generally prefers to have a better horse than the Government furnishes.

Mr. WURZBACH. He wants a more expensive horse than the Government furnishes? And it is more expensive to the Government.

Mr. BARBOUR. It is more expensive. If the Government pays $150 per year for a privately owned horse, almost the cost of a Government horse would be paid to the officer in one year.

Mr. BRIGGS. Will the gentleman yield?

Mr. BARBOUR. Certainly.

Mr. BRIGGS. To what extent have the horses and mules been displaced by motors?

Mr. BARBOUR. That is receiving considerable attention from the War Department. We find some very prominent officers in the Army who are strongly in favor of horses, saying that we will require practically the same number all of the time. We find some who say that motors will replace the horses to a considerable extent. At the present time the division artillery is horse drawn, while the heavier artillery is motor drawn. As I say, that matter is receiving the attention and study of the War Department, and it may well be considered in view of the rapid growth of the use of motor vehicles in the commercial world.

Mr. BRIGGS. I saw somewhere that during a bomb and mimic warfare quite a number of horses suffered by explosions, and so forth. I wondered to what extent efforts were being made to utilize motor transportation.

Mr. BARBOUR. That is something that is receiving very serious consideration.

Now, for the housing program for post construction the bill carries $14,441,950 and $3,000,000 contract authorization.

Of this appropriation, $4,800,000 will be used to satisfy contract authorizations carried in prior appropriations acts. The 1929 bill carried $5,084,000 in direct appropriations and a contract authorization of $2,115,000, and the 1928 deficiency act carried $7,485,975. The total amount appropriated for post construction, including the amount carried in this bill, is $36,854,925, with a contract authorization of $3,000,000. That brings the total up to $39,854,925—almost $40,000,000 provided for post construction.

This will provide all post construction authorized up to the present time, except $250,000 for Scott Field, in Illinois, which was stricken out of the bill in the Senate last year because of opposition there and has not been restored to the bill.

With the funds carried in the bill the housing will provide for 23,798 enlisted men, 797 noncommissioned officers, and 727 officers, 1,408 hospital beds, and provides housing for 192 nurses.

This will leave unprovided for, according to the War Department estimates, 14,602 enlisted men, 2,463 noncommissioned officers, and 3,286 officers. General Summerall, Chief of Staff, when he was before the committee, stated that progress in the housing program is satisfactory. "We are building as rapidly and as economically as possible." A table contained in the hearings gives full and complete information up to the present time of the status of every project in the housing program.

For barracks and quarters the amount carried in this bill is $11,650,784, which is $1,018,160 less than was carried in the 1929 bill. A decrease in this item was possible because the liberal appropriations for barracks and quarters, which is a repair and maintenance item, has enabled them to put the buildings in very good shape. Then there is the new construction coming in, which will make the repair and maintenance items less. General Cheatham assured the subcommittee that he would get by in good shape with this amount for barracks and quarters.

For seacoast defenses we are carrying along the work of installing fire-control and building emplacements for large and heavy caliber guns, acquiring lands for 16-inch gun batteries in Oahu, and for the mounting of 240-millimeter howitzers in that island. Generally speaking, the work of the seacoast defenses is being carried along and progress is being made.

Mr. SWING. Mr. Chairman, will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. SWING. What progress is being made in the matter of heavy railroad guns, portable guns, that can be taken from one place to another? For instance, at San Diego there is nothing

in the way of guns that would serve as defense, but we have been told in the past that they were developing a gun that could be transferred back and forth as needed. Will the gentleman tell us what progress they have made in that?

Mr. BARBOUR. The Ordnance Corps is experimenting all of the time and endeavoring to improve the seacoast and field artillery, and it is making real progress along those lines. We have a certain number of mounted railway guns. There are some at Panama, there are two at Los Angeles, and there are some stationed at other places; and these, according to the reports made to our committee by the Ordnance Department, are very effective guns. As to the number on hand, I am not prepared to state to the gentleman from California, because I do not have that information at hand.

Mr. SWING. But they have been found to be practicable?

Mr. BARBOUR. They are said to be very efficient.

Mr. SWING. And their number will increase in the future?

Mr. BARBOUR. Yes; I so understand.

Mr. WAINWRIGHT. As a matter of fact, is there not a unit known as the regiment of railway artillery which handles that caliber and character of ordnance?

Mr. BARBOUR. The manufacture is under the general supervision of the Ordnance Department. Just what the subsidiary organization is that handles it I could not say. The operation of such guns in seacoast defense is in the hands of the Coast Artillery.

Mr. WAINWRIGHT. There is a definite organization known as the regiment of railway artillery?

Mr. TABER. I understand that we have something like 188 of these railway mounted guns, many of which are at Aberdeen.

Mr. SWING. And those at Aberdeen have not yet been mounted?

Mr. TABER. There may be some there that are not mounted. I am referring to mounted guns.

Mr. HOUSTON of Hawaii. Mr. Chairman, will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. HOUSTON of Hawaii. I notice under seacoast defenses that there is a total sum in excess of $3,000,000 provided, and that in the tabulation there is given something in excess of $946,000 for insular departments. Is the gentleman in a position to advise as to what part of that sum is for the Territory of Hawaii's defenses and Oahu defenses?

Mr. BARBOUR. These seacoast defense items are divided into several different activities. There is the Signal Corps, the Engineer Corps, Ordnance, and the Coast Artillery. There are four different departments of the Army that have something to do with these seacoast defense appropriations. These appropriations carry money for searchlights in Hawaii, for emplacements for 16-inch guns in Hawaii—that is, two additional 16-inch guns which will make the total number four, and for acquiring land, 11.09 acres for howitzers, and for emplacements for twelve 240-millimeter howitzers, which will complete the emplacement project for the howitzers. There is also equipment for one antiaircraft battery, the continuation of the fire-control installation for the 16-inch guns and the large guns that are mounted in the island of Oahu. That, in a general way, covers the activities that are provided for in this bill for the Territory of Hawaii.

Mr. HOUSTON of Hawaii. Then the figure, in other words, under insular departments is practically all for Oahu defenses?

Mr. BARBOUR. Yes; most of it. There is something for replacement of cables in Manila and Subig Bays, but outside of that it is all for Oahu.

Mr. BRIGGS. Mr. Chairman, will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. BRIGGS. Can the gentleman advise the committee just what progress is being made along the line of the development of antiaircraft artillery?

Mr. BARBOUR. You will find a statement in the hearings on that which will give you, I think, very satisfactory information. Real progress, the Ordnance Department reports to your committee, is being made. Great improvements have resulted from experiments that have been carried on. They are improving their antiaircraft guns and are getting very good results. Some of the recent results are stated in the hearings. Generally speaking, there has been material improvement in the antiaircraft equipment and fire.

Mr. BRIGGS. Along with the development of antiaircraft artillery, does not the gentleman think there should be some addition to the strength of the Coast Artillery, with better equipment for antiaircraft—better equipment than it now possesses?

Mr. BARBOUR. We are providing equipment for it here; fire control for antiaircraft batteries; purchasing antiaircraft guns; purchasing the latest models of searchlights to be used in antiaircraft fire, and so on. That work is going forward.

Mr. BRIGGS. Is that a substantial increase, so that coast defenses can be manned for antiaircraft? In my own locality I do not know of any antiaircraft guns in the coast defenses there. There are three batteries there and no antiaircraft guns at all, and but a very small skeleton organization of men to man the forts. My understanding is that all the way south, nearly from Fortress Monroe on the Atlantic and along the whole Gulf shore line, there is practically little more than a handful of coast artillery for the coast defense, and the coast defense of the South and Southeastern part of this country is entitled to more consideration than it is receiving. I am not disposed, however, to hold the Coast Artillery Corps responsible for this condition.

Mr. BARBOUR. We are carrying forward this program from year to year. Of course, the complete equipment of our coast defenses all at one time would be a very large proposition. Experiments are being made and progress is being made in development. It would not be a good business proposition to build a large number of guns which in a brief space of time might be obsolete or obsolescent. We are carrying forward now work on a considerable number of antiaircraft guns of the latest type, of a mobile type, I might say, and we think it would not be good policy to build a large number of them at one time and in a short time find they were supplanted by something more recent.

Mr. BRIGGS. I understand that the antiaircraft guns should first be perfected and developed before they are purchased for distribution on a large scale. I understand that in the 105-millimeter gun changes have been made within the last year by the department, making it a more efficient weapon. I assume, however, that it will not be long before they will have fully perfected such a weapon. And then I want to know if it is the intention to give the coast defenses such equipment as may be necessary and let them have enough antiaircraft battalions to effectively man and use them so that adequate coast defense can be assured, as well as proper provision be made for the Air Service.

Mr. BARBOUR. Of course, this committee does not in any way intend to hamper the development of coast artillery and coast defenses. In fact, the committee is quite sympathetic toward that development. Just what the committee will do some time in the future we could not say at this time, but we do believe in carrying forward this program of coast defense at least in a practical and efficient way to the extent that funds available will permit.

Mr. BRIGGS. My impression is that there are only three or four antiaircraft battalions in the whole Coast Artillery Corps. Two of these are located outside in our Territorial possessions and only one or two in the United States proper. I think there should be more attention given to the creation of antiaircraft battalions to be stationed in the coast defenses along our seacoasts at home.

Mr. BARBOUR. Most of the antiaircraft batteries and equipment and personnel are overseas; that is, at Panama and the Hawaiian Islands. Those are considered to be the strategic points.

Mr. BRIGGS. I have no fault to find with that. But I am talking about the coast defenses at home which have been stripped of men. Before the war the coast defense branch of the Army had about 18,000 men. Since the war they have had only 12,000; and more than half of those have been moved to our Territorial possessions. The Chief of the Coast Artillery states in the hearings that we need 12,000 men in the United States proper.

Mr. BARBOUR. It is not necessary fully to man all our coast defenses. We have a considerable number of Coast Artillery units in the National Guard. We have also a number of Coast Artillery officers in the reserve, who are receiving training. In case of an emergency there are a number of men who are pretty well prepared to step in and man the guns that are in these defenses.

Mr. BRIGGS. My observation is that in the National Guard it is not so easy to get them into the Coast Artillery. They prefer the other branches of the service to a large extent. If we are going to have an effective coast defense, we have got to have men trained in the proper use of antiaircraft guns and in target practice. Otherwise you might have the same situation as was had at Fortress Monroe a few years ago when we lacked men of sufficient experience in antiaircraft gunnery and practice.

Mr. BARBOUR. We have highly trained men in antiaircraft artillery.

Mr. BRIGGS. But not enough of them. That is exactly what I am talking about.

Mr. BARBOUR. That is a matter for the Congress to determine. We are carrying the Army along on a basis of 118,750 men, which has been the accepted policy of Congress for a number of years past. Now, if the gentleman from Texas wants a larger Army, he is raising another question.

Mr. BRIGGS. It is more the policy that I am talking about. For instance, the Coast Artillery service seems to be stripped down to the very bone; and if they want 300 or 400 men, it seems to have difficulty in getting them; and they seem to have difficulty in keeping the depleted number they now have.

Mr. BARBOUR. You take an Artillery officer and a Cavalry officer and they will tell you the same thing. Of course, these units are not being maintained at their full war strength.

Mr. BRIGGS. I appreciate that. It is my understanding that in providing for a strength of 118,000, it is from limitation of appropriation and not of legislation; because the legislative authorization is very much higher than that. When the aircraft development under the 5-year program came along it was expected that the increase in the Air Service, both enlisted as well as officer personnel, would be in addition to the then existing Army strength, but apparently an effort has constantly been and is being made by the Budget or somebody else in executive authority to compel contribution of men from the various other branches of the service; so that, as I say, the Coast Artillery service is being stripped of its strength right along. It was the understanding that the increases in the Air Service, under the 5-year program, both in enlisted and offcer strength, would be in addition to and not at the expense of other arms of the service. That was the idea I had from the debates when the matter came before the House on several occasions; and I think I interrogated the gentleman from California, the chairman of this subcommittee, whether that was not his view of it, and I think he indicated it was, and that the committee had attempted to make provision for it; but my observation and my information is that there is a great deal of resistance being offered to that effort by the Budget and in other quarters, so that other services are being constantly reduced. I want the Air Service to get all the men it needs, and I think it ought to be carried forward within the full spirit of the 5-year program; but I think the spirit of that program is that such extra men as may be needed to carry out the program should be taken into that service, in addition to Regular Army strength, and let the other services get along with the existing order of things.

Mr. BARBOUR. Coming to the Air Corps, this bill carries for the Air Corps a total of $33,359,409. The 1929 bill carried $24,630,268, with a contract authorization of $5,000,000, and $1,071,479 in reappropriations. There is no contract authorization carried in this bill, as the funds herein contained are intended to provide for the full Air Corps requirements.

Mr. ABERNETHY. Will the gentleman yield?

Mr. BARBOUR. I yield to the gentleman from North Carolina.

Mr. ABERNETHY. Is extra provision made for additional men in the Air Corps?

Mr. BARBOUR. You mean the flying cadets?

Mr. ABERNETHY. Yes.

Mr. BARBOUR. We carry a provision in the bill for them; yes.

Mr. ABERNETHY. How many extra ones do you provide for?

Mr. BARBOUR. There are 296 who take a 6-month course; that is practically 300, and they take two groups of them into the course every year. There is a November course and then another one along in the spring, so that they get about 600 a year for this six months' training.

Mr. ABERNETHY. Is that an increase over what it has been heretofore?

Mr. BARBOUR. I believe it is. They are taking all they can possibly handle with the training facilities available.

Mr. ABERNETHY. I suppose every Member of Congress has the same problem, that there are many young men in the country who are anxious to get into the Air Corps.

Mr. BARBOUR. There is no difficulty at all in getting the finest type of young men in the country for flying cadets.

Mr. ABERNETHY. There is no difficulty, but what are the opportunities for young men getting into that service?

Mr. BARBOUR. They are giving everything they have in the way of opportunity. Of course, the Air Corps right now is going through a process of development. It has not all of the facilities it will have in the future, but with the facilities available they are taking in all of the flying cadets they can possibly accommodate.

The money carried in this bill will purchase in 1930, 275 planes for the Regular Army and 22 for the National Guard, making a total of 297. It will purchase 14 attack planes, 67 bombardment planes, 146 observation planes, and 70 pursuit planes, amounting in all to a total of 297. No training planes are provided for here, because at the present time we are 13 training planes over the present requirements of the 5-year program. At the present time or, rather, on October 1, 1928, the Army had on hand 1,005 airplanes serviceable and in good condition, on order 470 planes, and these funds will buy 297 more. These figures include 148 planes in the hands of the National Guard on June 30, 1929. At the end of 1930 we will be short something over 100 planes, mostly observation planes, but we have a very good supply of planes on hand, and the committee does not consider this prospective shortage as a serious matter; in fact, General Summerall, the Chief of Staff, when he was testifying before the committee, said:

> I believe we have been procuring airplanes as rapidly as we can develop suitable types and have delivered the quantities of airplanes that we ought to have.

He specifically stated they were not short because of any lack of action on the part of Congress.

As to pilots in the Air Corps, on September 30, 1928, we had 732 Regular officer pilots and 41 enlisted pilots. We had 296 flying cadets in training at that time, and we had 63 reserve officer pilots on active duty with the Army Air Corps.

On June 30, 1929, the National Guard will have 152 planes. This will equip 19 squadrons with 8 planes each.

The National Guard has 218 qualified pilots. In the Organized Reserves we have 631 pilots of class 1, 1,000 pilots of class 2, and then I understand there is another large group of pilots who are not trained as highly as these other two groups.

The 631 class 1 pilots are men who are efficient enough at this time to be ordered into service and to take charge of flying planes. The 1,000 class 2 pilots can be brought into that condition of efficiency with a short refresher course. The other pilots would have to receive considerable training to put them in shape to be real effective pilots in the Air Corps.

Mr. WAINWRIGHT. Will the gentleman yield for a question?

Mr. BARBOUR. I yield to the gentleman from New York.

Mr. WAINWRIGHT. Did the committee go into the question of the type and quality of plane furnished to the National Guard to determine whether they are as modern and as up to date in every way as may be desired for the purpose, or as modern and up to date as those furnished the regular Air Service?

Mr. BARBOUR. Yes. I will say to the gentleman from New York they are getting the same types of planes as the Regular Army. The National Guard is now well equipped and in 1930 will be completely equipped with modern, up-to-date planes.

Mr. WAINWRIGHT. The gentleman has very completely answered my question by stating that they are equipped with new planes.

Mr. BARBOUR. Yes.

Mr. FURLOW. Will the gentleman yield?

Mr. BARBOUR. I yield to the gentleman from Minnesota.

Mr. FURLOW. The gentleman will recall that in the 1926 Air Corps act we provided for 1,650 officers in the Air Corps at the end of a 5-year period. Can the gentleman tell the committee whether or not we are living up to that program in so far as personnel is concerned?

Mr. BARBOUR. So far as the officers are concerned, we are behind on the requirements at this time, and this is due to the difficulty that has been encountered in securing officers for the Air Corps.

As the gentleman well knows the tests that a candidate for appointment in the Air Corps must pass are very severe, and not everybody by long odds can meet these requirements, and they have experienced difficulty in getting officers from other branches of the service who could pass these tests, or even from civilian life. Their main source of supply right now is from the flying cadets. They are furnishing to-day the main supply of officers in the Army Air Corps.

Mr. FURLOW. May I say to the gentleman that my investigation convinces me that there has been no effort on the part of the War Department to give permanent commissions in the Air Corps to all the graduates from Kelly Field who would accept Regular Army commissions, men who have qualified and are qualified. The War Department has been waiting for these transfers from the other branches. As a result of this we are far behind in our program, and it is my understanding the War Department has arbitrarily advanced this 5-year program to a 6-year program, in reality, from the time it was intended to start. In so far as the statement attributed to the War De-

partment that we can not get qualified pilots at the present time I know that is erroneous. I know that Kelly Field has graduated many men who have asked for commissions in the Regular Army upon completion of training, and they have been refused. Maybe they went into the reserve, but we have lost many others by failing to take them when they were in a receptive mood. The difficulty is because the other branches have been reluctant to give up their files for the Air Corps. As a result our personnel program is behind our building program. I think we have reached a very serious point in the development of our Air Corps when we go on with the building program so far as equipment is concerned, and yet neglect a vital part of the program which is personnel.

Mr. BARBOUR. There is undoubtedly a relation between the two.

Mr. FURLOW. I understand, though, that files have been opened and examinations to fill vacancies have been called. This will help but we should be in position to fill our vacancies from recent graduating classes at Kelly Field. I hope the Congress will keep an eye on this personnel program and keep it abreast of the building program, and I hope that the Congress will make itself felt and make its voice heard so that those charged with this responsibility will know that Congress intends to have the 5-year program carried out as originally contemplated.

Mr. BARBOUR. I will state to the gentleman from Minnesota that the reason for providing money in this bill for 200 additional officers is to take up that slack in the Air Corps officer personnel.

Mr. FURLOW. And we never contemplated that our officer personnel would go beyond 12,000 officers.

Mr. JAMES. Will the gentleman yield?

Mr. FURLOW. I yield, if the gentleman from California [Mr. BARBOUR] will permit.

Mr. JAMES. It is not the fault of the War Department; it is the fault of the commander in chief.

Mr. FURLOW. In saying the War Department, I referred to whoever was in charge down there and either puts out these orders or fails to put out these orders. Something is wrong and it ought to be corrected. The 5-year program was supposed to start July 1, 1926, and be completed July 1, 1931. Now, somebody, without authority, has advanced it to July 1, 1932. We will go into that later.

Mr. BARBOUR. For Chemical Warfare Service this bill carries an appropriation of $1,246,776. This is a decrease of $56,504 below the amount carried in the bill for the present fiscal year.

The bill contemplates that 21,000 gas masks shall be manufactured for the Army in 1930. We manufactured 24,000 for the Army in 1929.

They are developing a new gas mask at the Edgewood Arsenal; a mask that is far superior to anything that we have heretofore had. In view of this development and in view of the fact that our Edgewood Arsenal can be placed on a rather large production basis in a short period of time, the subcommittee felt that this provision for 21,000 gas masks for the Army in 1930 would be sufficient. The new type of gas mask that our Chemical Warfare Service is manufacturing is the best gas mask in the world. Our plant at Edgewood has a potential capacity of 8,000 gas masks per day. In 60 days it can be producing 200,000 gas masks a month; and during that period of 60 days can turn out 200,000. In view of the fact that these gas masks deteriorate, particularly the rubber element, the committee felt that the 21,000 would be sufficient to put in the bill for the year 1930; although the new mask, owing to the way it is sealed and stored, is expected to last from 10 to 15 or perhaps 20 or even more years.

Coming to the National Guard, the bill carries a total of $32,319,798 for the National Guard. This is an increase of $578,197 over the 1929 bill.

The strength of the National Guard on June 30, 1928, was 183,019, and it is contemplated that by June 30, 1930, the strength will be 190,000. This bill provides for some additional members of the National Guard in order to round out certain existing units.

It provides for 48 armory drills; it provides for the usual 15 days' camp instruction; and it also carries funds for new uniforms for the National Guard, $612,890 being carried in the bill for that purpose. The committee feels that the National Guard is quite well taken care of.

As to the Organized Reserves, the bill carries $5,533,129, and there is an additional $224,750 of funds to be received during the fiscal year 1930 from the purchase by enlisted men of the Army of their discharges. That makes a total of $5,757,879. This is an increase over the 1929 bill. It will train the same number of 15-day trainees as were trained during the present fiscal year—19,448. It will not train as many for periods longer than 15 days, but provides for exactly the same number of trainees for 15 days as we had in 1929.

Now as to the Reserve Officers' Training Corps, there is $2,676,817. This is a decrease as compared with 1929, but in 1930 we will have a carry-over from 1929 which will more than offset the apparent decrease.

Mr. JAMES. Will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. JAMES. How much does that carry over?

Mr. BARBOUR. I understand that it is about $500,000.

Mr. JAMES. That amount they expect to expend before June 30, 1929?

Mr. BARBOUR. No; the committee is advised that they will have $500,000 to carry over, and with that carried in the bill it will be sufficient.

Mr. JAMES. That is the amount they said they would expend between now and June 30.

Mr. BARBOUR. No; that will not be expended and will remain available for 1930 activities.

Mr. McSWAIN. Will the gentleman yield?

Mr. BARBOUR. I will yield.

Mr. McSWAIN. I want to go back to the Organized Reserves. I desire to make a statement before I ask the question. The Organized Reserves are furnishing the most economic element of national defense that our program of defense has. By the way of offsetting certain criticism I have heard made of them, I desire to say in addition and in respect to any compensation for the continuous training that they are under by way of study and answering questionnaires, taking up much of their time, that they actually expend money from their own independent resources to pay the organization chapter dues and to pay for their official organ that contains instruction as well as inspiration.

I am asking a question of the gentleman to this effect: I want to ask him as to the propriety and wisdom of having the War Department as a portion of the instruction for the Organized Reserves to take over the publication and circulation of the magazine, or inaugurate the publication of a magazine, in the interest of the Organized Reserves, so that they would not have to pay $2 a year or more for a magazine to get information about the work of the corps. It seems to me that men who have had experience in military training constituting the reserves, not receiving any drill pay as the National Guard receives, could very well be given additional encouragement and not be put to all of the expense of the personal needs. I am asking the gentleman if any such encouragement to the Organized Reserves is in contemplation?

Mr. BARBOUR. Our committee has not considered it. Offhand, it strikes me that the gentleman's own committee would have jurisdiction of that matter. I understand that the gentleman's committee is considering a policy with respect to the Organized Reserves and their relation to the War Department, and it would seem to me that that would be a part of that program. As far as the cost of the Organized Reserves is concerned, the figures submitted show that the average cost of the 15-day trainees was $181.31. Of course, their pay depends on their rank or grade. The average for pay and allowance is $135.53, their mileage average $21.25, and the average expense of the camp per officer training is $24.53, which makes up the total average of $181.31 per year for each officer in the Organized Reserves who receives a 15-day training.

Mr. JAMES. Mr. Chairman, will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. JAMES. In getting information regarding the civilian components, like the Reserve Officers' Training Corps and the citizens' military training camps and the Organized Reserves, to about how many places did the gentleman have to go?

Mr. BARBOUR. Not many. The War Department furnished information on the Reserve Officers' Training Corps, and as far as we have been able to determine very satisfactory information, and also with regard to the citizens' military training camps; but in connection with the latter we generally hear some of the representatives of the Citizens' Military Training Camps Association. They are civilians who are interested in this citizens' military training camp work and are devoting their time, and some of them their money, without compensation or return to advancing the interest of these camps. On the Organized Reserves we have representatives of the War Department who appear before our committee, and then this committee has always extended to the officers of the Organized Reserve Officers' Association an opportunity to appear before our committee and have a rather full and complete hearing, at least to present their ideas in connection with the reserve officers' training. The committee has not sought their appearance, but

they have appeared before our committee and we have accorded them an opportunity to be heard.

Mr. JAMES. For instance, in order to get information regarding how much money is necessary for reserve flying, instead of getting it from the Air Corps, you have to get it from a branch of the General Staff?

Mr. BARBOUR. It comes up in the items for the Organized Reserves training, which are presented to the committee by the officers who are stationed in the War Department. One man who was principally active in presenting these items to the committee is a reserve officer who is on duty in the War Department, Major Ames.

Mr. JAMES. I read his testimony. About two years ago we tried to find out from Mr. Davison and General Fechet about how much money should be expended for the reserve flying. They had no idea whether it was $100,000 or $400,000, and our committee thought that that was very strange. When we looked into the matter we found that they had nothing to do with it; that it was a branch of the General Staff that determined that.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. WAINWRIGHT. I assume that the gentleman will be generous in yielding.

Mr. BARBOUR. Yes. We want to have full and free discussion within the limit of time.

Mr. WAINWRIGHT. The gentleman has it within his power to grant himself an unlimited amount of time for adequate discussion of this important measure. With regard to the Reserve Officers' Training Corps, we realize that the whole future and the strength and the success of the reserve-officer feature of the Army depends upon the Reserve Officers' Training Corps.

Mr. BARBOUR. And it is getting more so all of the time.

Mr. WAINWRIGHT. Absolutely. I would like to ask the gentleman if any figures were presented to the subcommittee as to how many of these Reserve Officers' Training Corps trainees had already qualified and taken their commissions as second lieutenants, and, next, how many of those young men who have had commissions awarded them have followed that up by a period of training as reserve officers?

Mr. BARBOUR. The gentleman will find rather complete information in the hearings as to the number of Reserve Officers' Training Corps graduates who have taken their commissions in the reserve. From 1920 to 1928, inclusive, the total is 28,829. I am not sure that the hearing shows the number of them that are following up their work and taking the courses of training.

Mr. WAINWRIGHT. The gentleman, of course, must see, manifestly, that the whole point of this is, How many of these young men are following it up?

Mr. BARBOUR. There is a considerable number of them, I should say a very satisfactory number, but I am unable to give any definite figures.

Mr. WAINWRIGHT. Will not the gentleman put that in his remarks? It seems to me that that information might be incorporated in his remarks, if he will be good enough to extend them to that extent.

Mr. BARBOUR. For citizens' military training camps the bill carries an appropriation of $2,742,158, as compared with $2,801,240 in 1929. However, that apparent decrease will be more than offset by a carry-over of $173,000 into the 1930 fiscal year. The last bill, the bill for this year, contemplated training for 35,000 trainees at the citizens' military training camps. There were actually 34,514 who completed their 30-day course of training at these camps. This bill, however, provides for an increased number of trainees and contemplates that 37,500 young men will receive the benefit of this training at the citizens' military training camps in 1930. That will be an increase of 2,500 over the number provided for for 1929.

Mr. WAINWRIGHT. The gentleman will recall that when this subject was up before the House at the last session some of us tried to have a sum that would provide for 40,000.

Mr. BARBOUR. Yes.

Mr. WAINWRIGHT. As one of those interested in this subject, may I express my very great gratification at the fact that the committee have seen fit to raise the amount of the appropriation a sufficient sum over and above the Budget estimates to provide for the training of 2,500 more boys. It seems to me, from the standpoint of those who are interested, that the committee is to be very much commended for that course.

The gentleman from South Carolina said that the reserve officers were probably the most economical feature of the national defense. Without questioning that, may I say that the training of these boys at a cost of $69.25 a year, as is shown, is obviously about as economical a provision for training of man power as can be conceived? The committee itself in its report asked the question as to how this shall be developed and where it will end. May I reiterate that gentlemen who are interested in the citizens' military training camps have stated on the floor heretofore that we should proceed progressively to the 50,000 mark, which was originally fixed for it; and that the results thus far in the splendid effect of the training of those boys will amply, and more than amply, justify continuing the amount, we might say progressively up to the ultimate unit of 50,000?

Mr. BARBOUR. I will say to the gentleman from New York that there is no definite policy with respect to citizens' military training camps. The full responsibility seems to fall upon the Committee on Appropriations in determining the number. We feel on the committee that it would be very advisable to have some kind of a definite policy adopted with regard to the training of the civilian branches. Then we would know what to expect each year, and Congress would know what to expect. As it is now, when the committee begins the consideration of the War Department bill, reserve officers all over the country write letters urging that we should train so many, and others urging that we should train a different number, the writers having different ideas, some feeling that we should train a certain number and others feeling we should train another number; and it is the same way with regard to training camps. The committee does the best it can under the circumstances with the funds available.

Now, for the National Board for the Promotion of Rifle Practice this bill carries $659,500. For 1929 there was a reappropriation of $500,000. You will recall that last year an amendment was put on the bill on the floor of the House providing for the national rifle matches to be held this past summer. The bill as reported to the House carried no appropriation for the national matches. Subsequent to that date Congress passed a bill making the national matches at Camp Perry, Ohio, a national event, so this money for the national matches for next year goes into the bill in its regular order.

The next proposition is the ammunition to be furnished to the civilian rifle clubs throughout the country. There are nearly 1,600 of these rifle clubs. The Federal Government has been issuing to these rifle clubs about 2,000,000 or more rounds of ammunition per year.

That is a maximum of 120 rounds of ammunition, .30 caliber, and 200 rounds of .22 caliber per man shooting. The amount that is issued to any one club, however, is limited. These rifle clubs have come to expect this free issue of ammunition by the Federal Government. Following the war, when we had large quantities of ammunition on hand and no particular use for it, there was no objection on the part of anybody to giving this ammunition to these civilian rifle clubs, but now we are reaching a point where the question of our ammunition reserves has got to be one of importance, and we are squarely confronted by the question of whether or not we are going to continue to furnish this ammunition in the same quantities to the civilian rifle clubs. If we do that, we will in all probability have to buy ammunition in order to issue it to them, whereas heretofore it has been given out of war-time stocks. That is the question which confronts us, and we will have to meet it. In this bill we provide, from purchase-of-discharge funds, a sufficient amount of money to furnish the civilian rifle clubs with the amount of ammunition they are having during the fiscal year 1929.

That, gentlemen, completes the important items of the military activities, and we now come to the nonmilitary activities.

The bill carries $3,500 to complete the plans and supervise the construction of the monument of the Unknown Soldier. A bill was passed by Congress authorizing $50,000 for this purpose. Two thousand five hundred dollars has already been appropriated and $3,500 more is needed for the completion of the plans and the supervision of construction, which will leave $44,000 of the amount authorized to complete the tomb itself. We are advised that this money will be sufficient to complete the tomb.

Mr. ABERNETHY. Will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. ABERNETHY. Is this the tomb here [indicating]?

Mr. BARBOUR. This is it, and I was just going to describe it to the Members of the House. This is a model of the proposed Tomb of the Unknown Soldier. The act authorizing the completion of the tomb was approved July 3, 1926. It provides that the accepted design of the tomb and inclosure shall be subject to the approval of the Arlington Cemetery Commission, the American Battle Monuments Commission, and the Fine Arts Commission.

The Secretary of War appointed a jury to advise him, consisting of some of the most eminent architects of the country, selected or suggested by the American Institute of Architects, and, in addition, Mr. Hanford MacNider, representing the American Legion, and Mrs. Rock, of Philadelphia, a gold-star mother. Seventy-three designs were submitted, and the design here exhibited was the final selection of this jury. Subsequently, in accordance with the law, the design was submitted to the three specifically named commissions and each was unanimously in favor of the advisory jury's selection. The accepted design was accompanied by a sketch looking to the opening up of the whole front so that there would be an ornamental setting for the tomb and that it would be a focal point of the grounds. This phase of the work, estimated to cost around $350,000, has not been authorized. The winning design was submitted by Mr. Thomas Hudson Jones, sculptor, and Mr. Lorimer Rich, architect, both of New York City.

The figures in relief on the model of the accepted design represent peace, victory, and the American soldier. The inscription, to be cut at the opposite end, has not yet been determined upon.

I think, perhaps, all of the Members will be interested in this model, because it is the accepted design for the completion of the Tomb of the Unknown Soldier, and the money already appropriated will finish this work. The present tomb, I understand, comes to here on the model [indicating] and the balance is the superstructure that is to be placed on the present tomb. It is plain; it is not overornamental; and I think the beauty of it will appeal to almost anyone. Now, that part of the project has been authorized. It is planned, however, to build this approach, which will cost, as nearly as can be estimated now, in the neighborhood of $350,000; and the Quartermaster General has stated to the committee that that must not be accepted as a final estimate because it may be more than that. However, I do not think anyone will object to that, because if it is to be done at all, the American people will want it done right and will not want the Congress, and the Congress itself will not want, to be niggardly in regard to the money that it expends on the memorial to the Unknown Soldier.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. BARBOUR. Mr. Chairman, I ask unanimous consent to proceed for 20 additional minutes.

The CHAIRMAN. The gentleman from California asks unanimous consent to proceed for 20 additional minutes. Is there objection?

There was no objection.

Mr. BARBOUR. This sketch here shows the amphitheater with the tomb in the same place it is located now, with the superstructure on it, which will give you some idea of the appearance of the plan from the proposed approach. It is proposed to break through the cement wall that exists there at the present time, and this approach is to be in the neighborhood of 500 feet long, I believe 480 feet long, and something over 200 feet wide. Here is another sketch showing another view of it, which gives you a more general view of the proposed plan. You will notice it is not overdone; in other words, it is plain, it is simple, and I think in its artistic effects it is very appealing. Here is a bird's-eye view of the whole scheme or plan as it will appear from the air when completed. This part is the amphitheater. The little black rectangular mark is the present tomb, and this will be the approach as it appears from the air.

I have brought these models and sketches here to-day in order that the Members of the House might have an understanding of just what was being done with regard to the proposed Tomb of the Unknown Soldier. It is something that the people of the entire country are interested in, and when it is done they want it done right. There has been a lot of controversy as to just what, if anything, should be done, and the members of the committee feel that this plan is one that will meet with the approval of the Congress and with the approval of the people of the country generally.

For rivers and harbors the bill this year carries $50,000,000. This is a decrease of $5,886,310 as compared with the amount carried in the 1929 bill. We had on hand, however, a balance on November 1, 1928, of $44,502,297, nearly $7,000,000 of which has not as yet been allotted. Out of this money will be allotted funds for carrying on the surveys which a good many of the gentlemen living in the Mississippi Valley are interested in.

It is proposed to allot $1,500,000, and if more funds are needed to carry on the work more money will be allotted for this activity; in fact, General Jadwin stated that if more money was needed in 1930 the Board of Army Engineers would allot it up to the amount they could spend economically and efficiently. He stated further that the work of making these surveys was being pushed vigorously and they were being made just as fast as could be, consistent with thorough work, economy, and efficiency.

The $50,000,000 is all that the Board of Army Engineers asked, and they assured the committee that these funds would be sufficient to carry on the work during the fiscal year 1930.

Mr. BRIGHAM. Will the gentleman yield?

Mr. BARBOUR. I yield to the gentleman from Vermont.

Mr. BRIGHAM. Is adequate provision made to carry on surveys in sections which have suffered from floods other than the Mississippi Valley?

Mr. BARBOUR. Yes; I understand the surveys are being carried on in sections other than the Mississippi Valley.

Mr. BRIGHAM. And adequate provision is made to continue that work?

Mr. BARBOUR. General Jadwin assured us he would allot whatever was necessary to efficiently and economically carry on the work.

Mr. ABERNETHY. Will the gentleman yield for one question?

Mr. BARBOUR. Yes.

Mr. ABERNETHY. I understand you have allotted all that the Army engineers say they can profitably expend; is that true?

Mr. BARBOUR. Yes.

Mr. ABERNETHY. I have read with a great deal of interest the way the work on rivers and harbors is being carried on, and I want to say in passing that the gentleman's knowledge of this entire situation is very illuminating and very pleasing to the membership of the House, I am sure, because it shows that the gentleman has a thorough understanding of all these activities. The gentleman's remarks are very interesting, and the liberality with which he has approached this subject is very pleasing to me, at least, as one Member of the House.

Mr. BARBOUR. I thank the gentleman from North Carolina.

On the item of flood control the bill carries $30,000,000 as compared with an appropriation of $10,000,000 in 1929. However, previous to this time there was a deficiency appropriation of $14,000,000 for flood control, and there has also been available for the work of flood control on the Mississippi River $12,000,000 more of previous appropriations; but the 1930 appropriation for flood control as compared with the 1929 appropriation is a straight increase of $20,000,000.

General Jadwin, who is the Chief of Engineers, stated to the committee that this is all that could be economically expended on flood-control work in 1930. You will understand that at the present time there is a great deal of preliminary work that must be done in regard to the spillways and floodways that it is proposed to construct. Rights of way must be secured for levees and for flowage, and all of this work the Board of Army Engineers assures us is being pushed just as vigorously as it possibly can, and the report of the Board of Army Engineers on this activity, in the opinion of the members of the subcommittee, is very satisfactory. I will say that in the hearings is a brief statement by the Chief of Engineers outlining just what the plan of the Board of Army Engineers with respect to flood control on the Mississippi River is, and what it proposes to do, and anybody who wants to get a clear-cut picture of the plan can get it by reading this comparatively brief statement which takes up but a very few printed pages in the hearings. It is there available and to my mind is very interesting.

For the National Home for Disabled Volunteer Soldiers we are providing what General Wood, president of the board, stated was sufficient funds with the understanding that the board of governors has had with the Appropriations Committee, and that is that if the funds carried in the bill are not sufficient to properly care for these veterans of the wars that the Government is providing for in these homes, they will go ahead and take proper care of them, and, if necessary, come back and get a deficiency appropriation. With this understanding General Wood says that the funds carried in the bill are ample.

Coming down to the Panama Canal, it is proposed to carry on the work of the construction of the Alhajuela Dam. Funds for the Alhajuela Dam were first carried in the 1929 appropriation bill, $250,000 to commence the preliminary work. This bill carries $1,000,000 to continue the work of construction. It will not, however, start the actual construction work. It will build a road and allow them to continue their diamond borings and continue the various investigations they have to make in a big construction project of this kind.

The Alhajuela Dam is 12 miles up the Chagres River and will store a sufficient quantity of water to permit them to double the capacity of the present traffic of the canal without any question as to there being an ample water supply.

They are confronted at Panama at times with the possibility of a dry year, and with their increasing traffic it interferes with the transit of the large ships through the canal. The

deep-draft vessels have to be towed through the cut, and that slows up the work of operation and also makes it more expensive to operate; but the new dam, when it is completed, will provide ample water not only for doubling the present traffic capacity but, the committee understands, it will provide ample water for a third set of locks, if a third set of locks is deemed necessary.

Mr. KETCHAM. Will the gentleman yield?

Mr. BARBOUR. I yield to the gentleman from Michigan.

Mr. KETCHAM. Will the gentleman be kind enough just at this point to make a brief statement as to the financial operations of the canal for this year? It seems to me that is very interesting.

Mr. BARBOUR. The financial operations of the canal are very interesting.

The total net revenues for the year 1928, which is the last year available, were $18,961,564.29. This is an increase of almost $3,500,000 over the total net revenues for the preceding year 1927.

In arriving at these net revenues all expenses, including depreciation and amortization, except interest on the investment, are deducted. They do not deduct interest on the investment. This includes not only the canal but the business divisions that are carried on by the Panama Canal.

Mr. BRIGHAM. Can the gentleman tell what rate of interest that would pay on the original investment?

Mr. BARBOUR. Well, let us see. The total cost of the canal, including the railroad, is $386,000,000.

The gentleman can readily estimate it. Three hundred and eighty-six million dollars was the total cost of the canal. The present Governor of the Canal Zone says that in arriving at the cost of the canal we should add compound interest at the rate of 3 per cent from the time of construction during all the time this money has been out. He says that is the proper way to arrive at the cost of the canal—that the actual expenditure does not represent it, but that is a matter of bookkeeping and accounting. The proposed method of estimating the cost of the canal suggested by the present governor perhaps would be the correct way of estimating it.

Mr. BRIGHAM. The Government is getting 4 per cent on the cost of the canal.

Mr. BARBOUR. Yes. The tolls for 1928 were $26,943,513.16. The transits have been increasing until the last few months when there was a slight decrease. In 1928 the commercial transits were 17.63 per day; including all ships, transports, and Government vessels that do not pay toll, the daily average has been 19.

Mr. ALMON. Will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. ALMON. The Government in business at Panama has been a remarkable success.

Mr. BARBOUR. Absolutely; and it is very well handled by the Government officials in charge of that great project.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. BARBOUR. I will.

Mr. WAINWRIGHT. In going back to the design for the Tomb of the Unknown Soldier, I want to ask the gentleman if this appropriation is made for beginning the work, it would mean a definite congressional approval of that particular design which would preclude any modification?

Mr. BARBOUR. No; it is not necessary to be made in that way. It can be authorized for completing the tomb of the Unknown Soldier.

Mr. WAINWRIGHT. In other words, my thought is this: That there should be considerable latitude left for further discretion for any necessary modification in the design. There may be some who would criticize the allegorical figure on the front, the male figure, as hardly a sufficient representation of the American soldier—at least not as we knew him.

Mr. BARBOUR. I would say to the gentleman that when it comes to a work of art you can frequently find many differences of opinion on the same subject—some good and some otherwise.

Mr. WAINWRIGHT. You do not need to be much of an artist to have some sense of fitness of things, with relation to the conception of what would be an appropriate representation of the American soldier.

Mr. BARBOUR. Those are matters which can be properly worked out.

Now that covers the more important items of the bill. There are a few matters in the bill which change our former policy in the way of limitation. For instance, it is provided that only one horse shall be allowed to an officer, and an annual allowance for forage and stabling provided. That I discussed a short time ago. Then it is also provided that the number of officers who shall be taken into the Army during the fiscal year 1930 shall be limited to West Point graduates, warrant officers, enlisted men of the Regular Army, and persons commissioned in accordance with the law in the Army Air Corps. That is made necessary because if we do not place a limitation on it, it is liable to go over the 12,000 that we are providing for. While that might appear to be a discrimination against others who could qualify, the committee felt that we should apply some limitation at this time, and so we limited it to West Point graduates, enlisted men, and warrant officers who can qualify and men going into the Air Corps.

Mr. JAMES. Mr. Chairman, will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. JAMES. Is not the number of officers limited to 12,000 plus the 403 in the Air Corps?

Mr. BARBOUR. Let me ask the gentleman that question. The gentleman would know that, because it would come under the jurisdiction of his committee. Is there a limit of 12,000 on the number of officers, or is that the amount we have been appropriating for?

Mr. JAMES. My impression is that it is 12,000, by law, and that we increased the number by 403 in providing for the Air Corps.

Mr. BARBOUR. I would not state definitely, because that is a legislative matter. My understanding has been, however, that the limit was not fixed by law at 12,403.

Mr. JAMES. We increased the number of officers 403 to go into the Air Corps. I do not think that they can have more than 12,403.

Mr. BARBOUR. This is to hold the number to 12,000. This is to meet a situation which now confronts us. Next year it may not be necessary to do that.

Mr. JAMES. The language is not such that it prevents these men who graduate from Kelly Field from going into the Air Corps?

Mr. BARBOUR. Oh, no; it does not prevent them. It specifically mentions persons appointed or commissioned in accordance with law in the Army Air Corps.

There are one or two other changes in the language in the bill. One limits the activities of the post exchanges, and another one limits the procurement activities of the Army.

The committee has found that in this procurement work a large organization is being built up, composed to a considerable extent of civilians, but at the same time requiring the attention of a number of Army officers. It is being carried on under the supervision and direction of the Assistant Secretary of War, Colonel Robbins. Each time an increase in this activity occurs it means more money. The activity has been growing, until now there is a large number of people, civilian and military, engaged in this procurement work and study. The committee felt that in view of the fact that it was subject to great expansion we should put this limitation upon it and say that the funds could not be used for other procurement officers in excess of the number now engaged in that work.

Mr. JAMES. Will the gentleman please explain about the proviso respecting the field-service appropriation, that it shall not be available for personnel services in the office of the Assistant Secretary of War?

Mr. BARBOUR. Yes. My recollection of that is that the Assistant Secretary of War has been calling in people from the field service for work in his office, and we have been trying to get the field rolls and the departmental rolls straightened out so that we would know that the people in the departments were being paid from the departmental rolls and those in the field service paid from the field rolls. It was to prevent the field-service appropriations being used to pay for services in the departments. Such services should be more properly on the departmental roll and can be more properly taken care of. I understand the bookkeeping system will be greatly simplified by that provision.

The CHAIRMAN. The gentleman's time has again expired. [Applause.]

Mr. CLAGUE. Mr. Chairman, I yield five minutes to the gentleman from Massachusetts [Mr. GIFFORD].

Mr. GIFFORD. Mr. Chairman, inasmuch as an amendment will be offered at the end of this appropriation bill relating to the purchase within the United States of materials by the Army, and later a similar amendment may be offered to the Navy bill, I wish to place in the RECORD certain quotations. First, from a statement made by the president of our New England council, made recently:

> We should have a law to require our Army and Navy, the military arms of our Government, to purchase their supplies within the defense of our guns. It is clearly absurd that their purchases be made abroad of those things essential in carrying on war, and things in case of war

they will need in large quantities. These purchases usually come in without paying a tariff. It seems absurd.

From an official of a department of the Government:

The law requires that the heads of departments place the orders with the lowest bidders, price and quality being equal. There is some association in Washington—I don't recall the name of it, but it is a sort of association of Government purchasing agents—and they have recently secured the introduction of a bill calling for a revision of the purchase laws. One section of that bill has revised the phrase, the conditions of which I have referred to somewhat, but to my mind not sufficiently, or not at all adequately to protect our own manufacturing interests in securing and having an even chance of getting Government purchases. The clause reads, "Orders placed on goods shall be placed with the lowest bidder, price and quality being equal." But that is not sufficient. Orders have been placed on balloon cloth, airplane cloth, silk parachute cloth, and khaki goods, and I recall an order for about 50,000 yards of expensive material which could be made in this country, I have no doubt, but it went to foreign mills because the total saving on the purchase was less than $1,500. I am sure that the saving to the Government of $1,500 was more than lost in other forms of revenue and taxes and wages, you might say, in one form or another, so in the end they more than lost that $1,500.

Mr. TABER. Would the gentleman be willing to put his proposed amendment in the RECORD to-night, so that we may know what it is?

Mr. GIFFORD. The form of the amendment is not entirely agreed upon. We want the best expert advice that we can get, but I can read what will be very much like the amendment desired:

That the head of a department may have discretion in placing those orders whereby he may set aside bids made by a foreign mill or agent for goods, even though it is at a lower price.

In closing, I wish to repeat those words which to me and to the audience who listened seemed very impressive:

We must have a law to require our Army and Navy, the military arms of our Government, to purchase their supplies within the defense of our guns.

The CHAIRMAN. The gentleman from Mississippi [Mr. COLLINS] is recognized for one hour.

Mr. DAVIS. Mr. Chairman, I wish to announce that my colleague from Tennessee [Mr. MCREYNOLDS] is absent on account of illness.

Mr. HUDDLESTON. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Alabama makes the point of order that there is no quorum present. The Chair will count. [After counting.] A quorum is not present. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 5]

Aldrich	Dallinger	Hull, Tenn.	Palmer
Allgood	Davey	Igoe	Parker
Arentz	Deal	Jacobstein	Parks
Auf der Heide	Denison	Johnson, Ill.	Patterson
Ayres	DeRouen	Johnson, Ind.	Peavey

Weller	Williamson	Wyant	
Welsh, Pa.	Wilson, Miss.	Yates	

Thereupon the committee rose; and the Speaker having resumed the chair, Mr. TILSON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill (H. R. 15712), making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1930, and for other purposes, finding itself without a quorum, the roll was called, and he submitted a list of the absentees for printing in the Journal.

The SPEAKER. The gentleman from Connecticut, Chairman of the Committee of the Whole House on the state of the Union, having under consideration the bill H. R. 15712, reports that that committee, finding itself without a quorum, he had directed the roll to be called, whereupon 246 Members answered to their names—a quorum. The names of the absentees will appear in the Journal. The committee will resume its session.

Thereupon the Committee of the Whole House on the state of the Union resumed its session, with Mr. TILSON in the chair.

The CHAIRMAN. The gentleman from Mississippi [Mr. COLLINS] is recognized.

Mr. COLLINS. Mr. Chairman and Members of the House, the management of the affairs of our Government is perhaps the biggest business enterprise in existence. It is difficult even for those of us intrusted with its management to know very much about it; hence it is not strange that the public is unconcerned and disposed to let it drift along. The attitude of the public is not very different from ours—we try to know something about those matters in which we have a special interest, while we ignore or permit others to attend to the rest.

The War Department is big; in fact, it is an enormous project. The work is supposed to be difficult and highly specialized, and all of us are disposed to let Army officers formulate the policies for us to blindly follow, assuming that what is done is right, and that we should never set our opinions against those experts in such matters.

I am convinced that we have been following dangerous lines and that the time has come for us to inquire diligently into these programs and the proposals of these men, then we can dictate legislative procedure uninfluenced by sentiment or the glitter of brass buttons. In this land of ours it is the duty of civilians to outline the military policy of their Government and to completely dominate its military activities.

I shall try to point out to you some of the salient features of this bill—to do more than to scratch the surface of this gigantic task would be impossible here this afternoon.

The activities of the War Department can well be considered under six subdivisions:

First. The Regular Army.

Second. The Militia Bureau, or, more correctly speaking, the federalized National Guard.

Third. The Organized Reserves.

Fourth. The Reserve Officers' Training Corps.

Fifth. The citizens' military training camps.

Sixth. The National Board for the Promotion of Rifle Practice.

The last five are civilian organizations. However, officers and enlisted men of the Regular Army are in direct charge of their operation and management, 3,089 officers and 24,019 enlisted men being assigned to these organizations for their training and instruction.

The Regular Army is, of course, growing not only in officers and enlisted men but in civilian personnel as well. The five civilian military organizations are likewise growing and are becoming more and more effective, especially from a political standpoint, and their political influence and power is growing in proportion to their growth in numbers. Numerically, they are larger and more effective now than they have ever been, and next year they will be larger and more effective than they are to-day. Their political influence and power, too, will grow with their ever-increasing numbers and their wishes will be more and more respected by public officials generally and especially those of us in Congress.

The creation of another division called the munitions unit was proposed in the 1929 bill; Congress authorized its creation in an act passed June 8, 1926, but this subcommittee, however, saw fit to prevent its beginning in 1929 and under that particular name it does not appear in this bill. The purpose of this unit was to take young men after graduation from college and give them 3 months' training in the Regular Army, then send them to college for 9 months and after this to put them in the factories of the country for 6 months, giving in all 18 months'

specialized training in factory work and management, and in the event of hostilities these men would become officers and would take charge of the factories of our country and operate them under the supervision of the Regular Army. It was proposed to begin with 250 such students and later to bring them up to 400 and thence to a larger figure. The law says that one-half of 1 per cent of the enlisted strength of the Army and 2 per cent of officers can be trained annually, and with our Regular Army establishment at its present size, this would provide approximately 840 students to be trained annually and with the retirement figure at 64 years, it would be possible to have about 34,500 such officers. Of course, this figure is the outstanding one and should be reduced by one-half on account of deaths, resignations, and other causes, but even with 17,250 such officers, its size and expense would be enormous. This scheme has never been tried out. No country has it now or has undertaken it. The student trained may or may not follow the work for which he was specially trained. If he did not, his training was wasted. If he did pursue the work for which he was trained, it would be foolish to let him contract with himself in the purchase of supplies for the Government or to permit him to adopt work standards, with the War Department backing him in his every whim. Aside from this, it is a dangerous undertaking in a republic to put its factories, including management and men, under the control of the Military Establishment.

Notwithstanding the action of the committee in failing to provide by name for this unit, the same activity by a different name appears in this bill; and while there also appears a provision keeping its size down to what it is now, as time goes on it will nevertheless grow year after year, and the Congress should bestir itself for the purpose of destroying it now while it is young. It is termed "procurement." Officers of the Regular Army, as well as officers in the civilian military organizations, are assigned to this work; they have offices rented in the various cities of the United States with competent civilian personnel all paid for out of funds appropriated in this bill, and these officers are supposed to keep in touch with the factories, fields, and transportation systems so that in the event of war or an emergency they can take charge of them and operate them, as they perhaps think, very much better and with a greater degree of patriotism than their civilian owners—all of which, however, I very much doubt. My own ideas are that those in charge of our fields, factories, and transportation systems understand the problems confronting them very much better than outsiders, even though these outsiders be Army officers. They have always shown a willingness to respond to all calls made upon them by their country and I sincerely believe that they can be trusted in the future to provide food, transportation, clothing, and implements of warfare better if left alone. Imagine some second lieutenant telling Mr. Ford how to run his factory either in peace or in war time, or some first lieutenant telling Mr. Atterbury how to run the Pennsylvania Railroad, or some captain telling the farmers of the country how they can best secure a larger number of bushels of wheat on a given number of acres of land. It is the rankest nonsense. The Army has tried to conduct strictly civilian activities in the past in other countries and their efforts have always been failures. They are not trained for this work and are incompetent to perform it. Success in any line requires the constant study of those in charge and their duties should not be interfered with by meddlers foisted on them by the Government under the pretext of national defense.

The enlisted strength of the Regular Army is 118,750 men. The officers number 12,000; however, the bill, as it came to this subcommittee, carried 12,200. The Philippine Scouts had last year a strength of 6,060. This bill provides for 6,500. The Army has 1,157 warrant officers; there are 148 retired officers on active duty; and a large number of these are in high schools scattered throughout the country teaching little boys to "play at war" and likewise trying to popularize the military idea.

There are about 60,000 civilians provided for in this bill assigned to various activities of the Army. It is impossible to find out just exactly their number, but they will aggregate about 60,000 and they will gradually increase. Their salaries compare favorably with men in similar lines of work in civilian life and hence they are superior as military workmen and as military experts to enlisted men. Their presence makes the Army much more effective than it would be by the addition of a similar number of enlisted men, and also relieves officers and men of much onerous work that they would otherwise have to do and in turn gives them more time for pleasure and amusement and general recreation. The officers of all classes number 13,305, and the enlisted men, including Philippine Scouts, are 125,250, and to these should be added experts, mechanics of all kinds, and other civilians performing all sorts of work, the total of these being about 60,000, giving the Regular Army a total strength of about 198,555.

The officer and enlisted strength provided for in this bill is larger than it was in 1929. It was about 5,000 greater in 1929 than it was in 1926 and 1927. While this bill shows an officer and enlisted strength of only 365 more men than were provided for in the 1929 bill, the cost of the Regular Army is very much more than the cost provided for in the 1929 act. This cost year after year will show larger increases. The pay of the 12,000 officers in this bill will be around three and a half million dollars more than that provided in the 1929 act. All branches of the Regular Army are abundantly provided for. The Air Corps alone is given $33,578,683 as against a total appropriation for 1929 of $25,875,041. The figure $33,578,683 does not, however, represent the cost of the Air Corps. Its real cost is $66,336,002. As evidence of the fact that this appropriation is more than sufficient, I call the attention of the Congress to the following statement of General Summerall when asked about its adequacy:

> It is a well-balanced program, and we feel in many ways it is quite generous.

The Militia Bureau of the federalized National Guard continues to grow. In 1920 it had 1,939 officers and 47,019 enlisted men; on June 30, 1927, there were 12,010 officers and 182 warrant officers and 168,750 enlisted men—a total of 180,920 men. There was carried in the 1929 bill an appropriation sufficient to take this number to 188,000, of whom 13,630 are officers. This bill carries an appropriation sufficient to provide for 190,000 men, of whom 13,966 are officers. Those in charge of the Militia Bureau testify that their immediate program will seek a total aggregate strength of 210,521 National Guard troops. After this number is reached, then the goal will be 435,000, for that is the number authorized in the national defense act. Regular Army officers and federalized National Guard officers are quite enthusiastic over making the National Guard a thoroughly efficient organization. They are anxious for it to grow and to become more effective and are quite solicitous about every subject pertaining to its welfare, and have thus far been able to secure practically everything that their hearts might desire.

This bill provides for 48 drills a year and 15 days' intensive training at camp. Of course, officers and men attending these drills and taking this intensive training are paid for doing so. There are quite a number of members of the guard, both officers and men, who have a yearly status and are paid according to their grade. The training of the guard is practically the same as that of the Regular Army; it is organized according to the same lines, and it has cavalry, field artillery, an air corps, tank corps, an engineers' unit, a chemical warfare section, an observation section, and practically everything else that the Regular Army has. Two hundred and sixty-three of its officers and 110 of its enlisted men go to service schools and are there given special training by officers in the Regular Army. The amount provided for this schooling totals approximately $375,000. Guard affairs generally and instruction of its officers and men are under Regular Army officers and enlisted men; 447 officers and 589 noncommissioned officers are especially detailed for their training and instruction.

Of course, it has to have plenty of horses for its several branches, the same as the Regular Army, including its air corps, for horseback riding is becoming more and more popular as a social activity, and an ample number of horses must be provided for those in the federalized National Guard who are anxious to ride. On December 1, 1928, it had 10,299 horses; of this number 8,389 were Government-owned and 1,910 were State-owned, which had been federally accepted and were maintained at Federal expense. This number does not include the ones provided in the 1929 bill.

It has 19 organized air squadrons, with 347 officers and 1,689 men. They each averaged 91.56 flying hours. Pilots in the Regular Army average around 200 hours a year. They are up to full strength in all classes of planes. This bill provides for the purchase of 22 additional planes. It has its various units, including harbor defense, antiaircraft artillery; in fact, almost every kind of modern equipment, such as ambulances, tractors, trucks, searchlights, and so forth. The motorized vehicles number 5,795.

The federalized guard during the past four years has cost the Government some $55,000,000 per year. This bill carries $32,319,798, and after State contributions and free issues are added the cost will be around $55,000,000—perhaps more.

The per capita cost of the members of the federalized guard to the Federal Government is $222.55 and to the States $87.31—a total of $309.86—and these figures do not include all of the

items that should be properly charged against the guard. The total value of equipment in the guard as of June 30, 1928, is $111,973,941.49. The real per capita cost of members of the guard to the Federal Government and State governments is around $500 per year.

The Organized Reserves have grown to be largely an officer organization. There is a branch for enlisted men, but there are very few in it. The Organized Reserves is the result of the national defense act. It is growing very rapidly and will continue to grow, and there is no limit upon its possible growth. The members of this subcommittee have repeatedly requested the War Department to furnish information as to those in the Organized Reserves who are showing an interest in it, but there seems to be a disposition in the department to let well enough alone; and if a person becomes a member of the Organized Reserves, whether he performs any duty or not he will always continue to be an officer in it, and I am confident that this policy will continue. On June 30, 1920, it had 68,232 officers and no enlisted men. On June 30, 1926, it had 103,829 officers and 5,775 enlisted men. On June 30, 1927, it had 110,014 officers and 5,735 enlisted men. On June 30, 1928, it had 114,824 commissioned officers and 5,416 enlisted men. Of these officers 20,000 are provided 15 days' training out of funds appropriated in this bill. Four hundred and fifty-four officers will be given more than 15 days' training. This subcommittee increased the number to be trained over that recommended by the Budget. This bill provides for the training of 130 Air Corps officers, who will receive one year's instruction. This number will increase year after year until 330 are annually trained, and shortly afterwards this number will go to 550 per year. These reserve officers are also given correspondence course, or, in other words, such of them as are willing to take these courses, and under this practice certain military instruction is provided.

This particular activity is divided into various units and sections, the same as the Regular Army and the federalized guard, with war implements of the same or similar kinds. They have Regular Army officers totaling 416 and 501 enlisted men over them who are assigned for their training and officer management. The officers in the Organized Reserves were officers to start with, and it is wholly unnecessary to furnish them with intensive training at all times; however, every effort is made to keep them abreast with the times and to provide them with modern military instruction.

The Organized Reserves is growing just like all of the other branches of the Army. In 1920 the number of officers was around 68,000, and it stayed around this figure for about one year; then, in 1923, it was 70,000; 1924, 81,000; 1925, 95,000; 1926, 103,000; 1927, 110,000; 1928, 114,824. The immediate goal for the Organized Reserves is 125,000, and this will be reached in a very short while in spite of the fact that it was decided last year that only 65,833 of these officers could possibly be used in the mobilization of three and a half million men. One-tenth of the officers of the Organized Reserves going to camp are used in procurement.

The word "procurement" as used by the Army in this connection does not mean procurement; it merely means that these 2,000 men are given training under military officers in farm management, transportation management, factory management, and, in fact, the management of practically all civilian activities so that in the event of war or a great emergency the production of food and the manufacture of clothing, medicine, and in fact everything that could be used by human beings or an Army, as well as transportation facilities, would be under the control and dictation of Army officers. The amount carried in this bill for the Organized Reserves is $5,757,879. Of course, this item covers only the general activities of the Organized Reserves.

The Reserve Officers' Training Corps is made up of young men in the colleges and the high schools of the country and there are 127,141 of these young men who will take toll out of this bill; those in the colleges are divided into two classes: The advanced students and the basic students. There are 13,870 of the advanced students and 71,250 of the basic students. Those little boys in the high schools of the country who are given military instruction are known as junior students and they number 42,021. In addition to these, there are 59 schools with an enrollment of 14,807 that are known as 55–C schools. They do not properly belong to the Reserve Officers' Training Corps; they are given infantry training mostly and are provided with rifles and ammunition and certain other allowances. I can not give the Congress the number of girls who are given this particular training because their number was not furnished to the committee, but usually pretty girls are chosen as officers and sponsors and uniforms are provided for them. These girl officers are frequently installed with much pomp and ceremony and public display; they lead parades and participate in reviews and preside on social occasions, conduct personal inspection of boy cadets in some places, and act as general billboards advertising the glory of the Reserve Officers' Training Corps and the military machinery.

The Boston Post carried this story of how these little ladies are made useful:

Four girls of the New Bedford High School have been elected officers in the Reserve Officers' Training Corps of the New Bedford High School, and their commissions have been authorized by the War Department. * * * The girl officer, according to modern training ideas, furnishes a liaison between the social and military life of the school. The girl officer is expected to call the attention of the boy in training to the fact that a button may be missing from his tunic or that a grease spot may have appeared at his elbow. The reserve officer, it is believed, would more readily accept criticism from a girl than he would from a boy, and be more anxious to avoid it. The same idea prompts the training officer to have the girls accompany them on tours of inspection. * * * The "lady officers" are known as sponsors and are elected by the student body. Thus the most popular girls in the school are officially recognized in the Army organization.

I have a picture of 11 pretty little girls from the Ogden, Utah, high schools, all dressed in special military uniform. Under the photo is this quotation:

Always filled are the ranks of the Reserve Officers' Training Corps at Ogden. The photo shows the reason.

I have also a press clipping showing Major General Summerall with a pretty girl from Creighton University, in Omaha. The general is quoted as saying:

With so pretty a colonel, it is no wonder the Creighton Reserve Officers' Training Corps is such a well-drilled unit.

According to the San Diego Union, they have gone one step further out there and have a corps of matron sponsors as well as pretty girl sponsors to help popularize their military unit. The military minded are out to get the whole family to boost their idea. In turn for the publicity and popularity the girls give the Reserve Officers' Training Corps, they get much social distinction and no end of newspaper publicity, their pictures appearing in scores and scores of newspapers from coast to coast. As many as 50 to 75 pictures of many of these girls are published by as many different city newspapers. Of course, the youngsters fall for this, as do their mothers, brothers, sisters. It is the old game of playing sex appeal on youngsters for the purpose of helping to popularize this activity of "playing at war."

The girls have rifle teams, and they like it; and, of course, it does not cost them anything. It helps to make them popular, and they join in the game. So many of these trainings units are so well supplied with officers and men that they have time to coach these teams on the side—as a delight to themselves, to the girls, and to the community. The press is filled with pictures of these fair marksmen. I have a clipping that tells the story of one who became so enthusiastic over her work that she actually enrolled in the military unit at her university and took the training. She was made an honorary colonel for her interest. The press reports her as studying infantry drill, musketry, and automatic-rifle shooting. The fact that these news stories with photographs of pretty girls go out over the country all the time is another factor to keep in mind when trying to estimate the future influence of this program. We pay officers to train men for battle, and they spend their time playing around with co-ed marksmen and Government equipment is used by many of these teams, and the Government supplies the ammunition.

The big parade for boy cadets where girl officers turn out to "strut their stuff" is becoming a community event in many places and, of course, the Regular Army is glad to pull off these events, since it gives them opportunities to make speeches on the glories of preparedness and the general stupidity of our country in the past. You should see some of these gala parades and reviews held by our civilian training units—for the edification of those in the ranks and those in the grand stands. Just listen to this press description of a review in a western high school taken from the San Diego Union of January 24, 1928:

The battalion and company officers were ordered "front and center," to be confronted by a line of girls equal in number to the cadet officers. There was an instant of salute, and each officer claimed his sponsor and proudly lead her to his unit, where she took her place with as much precision as her escort. The companies and battalions greeted their sponsors with a round of applause.

Some of the newspaper headlines run:

Fifteen thousand at Gloucester High School battalions field day. Pretty sponsors spur boys in annual Reserve Officers' Training Corps field day. Reserve Officers' Training Corps unit struts stuff in annual review—

And so forth.

These parades and reviews are made so thrilling and attractive by every means possible that the little tots of the community will look forward to the time when they get big enough to participate in yet bigger and showier parades.

The young ladies are not the only agencies used in the Reserve Officers' Training Corps for the purpose of popularizing military training. Horses also play a large part. There are certain schools that would probably not have a Reserve Officers' Training Corps unit were it not for the riding horses that are provided for the amusement of these young men. Riding is becoming very popular socially, and most young men in schools like to ride, and as long as they are able to ride a good horse, furnished, fed, and equipped in a fine, splendid way by the United States Government, they join the Reserve Officers' Training Corps—for the purpose of improving their horsemanship. Nearly 2,000 horses are furnished now by the Government to various educational institutions, and additional ones were provided for in the 1929 bill and still more in this bill. The Government has 13 mules assigned to the Reserve Officers' Training Corps. I do not know whether there is any special significance in the number 13 or not, but I do know there is a dearth of mules. I presume that they are used for zoological purposes.

So you see we can now add to the saying, "Join the Army and become a man," "Join the Reserve Officers' Training Corps and ride." The horse is kept in the Army because of its amusement and social value rather than its probable military usefulness.

In order to further popularize this work the drilling is reduced to a very low minimum. Three hours per week constitute the entire time that is required of a young man, and of this time not over one-third is devoted to drills. The rest of the time is taken up with such work as organization and administration, military customs, military courtesy, military hygiene, first aid, marksmanship, physical training, command, leadership, military sketching, map reading, military law, patriotism, the beauties of the national defense act, and such other kindred subjects. Bayonet practice has been abolished because it did not have a very favorable appeal to young men and young women engaged in this training, and it was thought that it was tending to make the work less attractive and popular. Band instruments are likewise provided by the Government, so that these young men and young women may be supplied with music at Federal expense, and, of course, hostesses are furnished in the camps, so as to wet-nurse these youngsters and direct them along the proper social lines. There are other things too numerous to mention furnished and provided these young people so as to popularize the training.

These young men in the colleges are given subsistence allowance at school and are provided with uniforms. And, of course, the military uniform has always been one of the prize inducements for persuading young men and women that military service was glorious. The advanced course students are provided with a uniform costing $30 and allowed $6 the second year for its renovation. The junior and basic units are provided with a less expensive uniform, but with this bill the uniform allowance for the juniors will be increased, and in a very short while the juniors will be given a uniform costing around $20 per man. I have not been able to learn how the uniforms for the young ladies are furnished, but I presume it is taken care of somewhere in the bill.

And, mind you, the Regular Army officers say they need a new uniform for the soldiers of the country, the enlisted men in the Regular Army. Those men who will stand the brunt of the battle in the event of war. They can not afford to ask us to give these men a new uniform, but they are asking for one for these youngsters in the colleges of the country.

The Reserve Officers' Training Corps is divided into the Infantry, the Cavalry, the Field Artillery, the Coast Artillery, the Air Corps, Engineers, Signal Corps, and other corps units in the same manner as the Regular Army. They have allotted to them for their training and education 700 Regular Army officers, 108 active retired Army officers, 18 warrant officers, 495 noncommissioned officers, 27 active retired noncommissioned officers, and 407 enlisted men, over 1,750 Army men in all. I do not remember now the number of hostesses.

Mr. BLACK of Texas. Mr. Chairman, will the gentleman yield there?

Mr. COLLINS. Certainly.

Mr. BLACK of Texas. It is my recollection that the War Department did not want rifle matches except every few years, and Congress itself passed a law requiring that they shall be annual affairs.

Mr. COLLINS. That is so.

Mr. BLACK of Texas. I know I opposed the passage of the bill at the time, but my opposition was ineffective.

Mr. COLLINS. Only 27 of the teams will go to the rifle matches.

Most of these young men are youngsters of tender years and, of course, those in the high schools are very young and their minds are in a formative state.

Military training is compulsory in about 85 colleges and universities, but is elective in about 45. In the high schools it is compulsory in about 20 cities and elective in about 35. In the 55–C schools, which are in addition to those just named, I have no information as to whether training is elective or compulsory.

This military training is acceptable to the management of many schools and colleges because it provides subsistence and uniform allowance to students, as well as the so-called physical training and citizenship training at Federal Government expense, and further because of the fact that other work like horseback riding, and so forth, that most young men like to indulge in is furnished them free.

The amount carried for this activity is $2,676,817, but this by no means covers the entire expense of this activity. It really does not even begin to take care of it.

Citizens' military training camps are intended to take care of the training of citizens generally along military lines. It is intended to train at these camps young men from all the walks of civil life who would like to go to camp for 30 days where military instruction is provided them. They are usually trained at Regular Army camps; 34,515 were trained this year. This bill provides for the training of 37,500, an increase of about 3,000 over the number last trained.

All kinds of advertising campaigns are carried on to secure these trainees. Moving-picture films are used, and posters and leaflets, advertising buttons, window cards, street-car cards, and bus cards are used to induce young men to go to summer training camps. The Post Office Department uses a stamp on the face of letters for the purpose of advertising this activity. Of course, other forms of advertising are also used, and then there are Army officers and enlisted men stationed over the country for the purpose of persuading the heads of big corporations to permit young men working for them to attend these summer camps.

These young men at camp are also provided with hostesses to look after their social activities. They are also given numerous kinds of amusement, including horses to ride, and other methods calculated to popularize the work. This particular activity, like all the rest of them, will grow, and those having it in charge ultimately hope to train at least 100,000 of these young men annually.

At camp these boys are provided with the usual uniform—a cravat, raincoat, shirts, gymnasium shoes, one or two pairs of service shoes, and such other articles as they might need for training and the amusements furnished them. Fourteen hundred Regular Army officers and 22,000 enlisted men and a number of hostesses are provided by the Government to look after and train these young men while they are at camp for 30 days.

This organization is also instructed in the work of factory management, railroad management, farm management, and other civilian activities, so that they may be used in the general scheme of taking over the management of farms, transportation systems, and manufacturing concerns in the event of war or national emergency. This work is called "procurement," too, and has been discussed heretofore. For this activity $2,742,158 is appropriated, but this amount is small as compared with the total cost of the work.

Rifle matches are also provided for in this bill. This is now a yearly activity. The amount of $734,750 is appropriated to carry on this work, but this figure also does not tell the whole story, for there are a great many articles furnished to these men which are not included in this figure; neither does it take care of the salaries and other general expenses of Army officers who are assigned to this particular duty.

This bill provides for 27 civilian teams of 10 men each, or 270 civilians that will go to the annual matches. The different branches of the Regular Army will send teams too, also the various civilian military organizations, including the schools. The Navy will likewise send its teams there. Of course, the rifle clubs throughout the country are furnished with ammunition and guns, and there are several thousand such teams; but only 27 of the teams will go to the annual rifle matches. There are a number of these teams that are made up of ladies. Not

only the young ladies in the schools have rifle teams, but also ladies throughout the country belong to rifle teams and some of them go to these matches. Civilians belonging to these teams are usually men of mature years, some of them range in age between 60 and 70 years.

From the statements I have made it will be seen that we are carrying on a very elaborate program in training our men and women for military duty, and we are spending a great deal of money in popularizing the military idea. The total number in all of these military establishments, including the Regular Army, is about 700,000, and constitutes an army very much bigger than the average citizen realizes. Of course, it must be admitted that many of these citizens' military trainees are encouraged to be in these units by Regular Army management for propaganda purposes only. They are given sugar-coated training because they will become boosters of the war-game idea. Whatever their purpose in being in these organizations does not matter; we are confronted with the stern reality that there exisits in the United States a military establishment numbering around 700,000 persons, and that it is growing rapidly year by year, and that it has the lawful, regular, legislative, authorized authority to grow. It is evident also that the time is near at hand when it will approach the million mark, and then the 2,000,000 mark will be close at hand, and when it reaches 1,000,000, Members of Congress who stand in its way will be retired to private life; then we will find ourselves in the attitude of humbly obeying commands that will be sternly given us. I think it is high time that we see conditions as they really exist, and while we are free we should curb this growing menace.

Just what is our military department looking forward to in the way of an expansion program? In a little book by Lieut. Col. P. S. Bond we have an outline of what he believes would constitute a proper military policy. I take it that this proposal of Colonel Bond is suggestive of what our War Department is driving at because his works are very widely used by the War Department in the training of our young men throughout the country.

Let us look at his proposed military program:

1. A Regular Army of about 300,000 enlisted men and 20,000 officers, etc.
2. A National Guard under complete Federal control, numbering from 400,000 to 500,000 officers and men.
3. An Organized Reserve of from 500,000 to 1,000,000 officers and men, etc.
4. The Reserve Officers' Training Corps in schools and colleges.
5. Universal military training for young men in time of peace.
6. Summer camps of instruction (nine in addition to universal training camps) for—
   a. Regular Army.
   b. National Guard.
   c. Organized Reserves, etc.
7. Uniform organization training and equipment for all branches of the military forces.
8. Compulsory service, both military and industrial, in time of war.
9. Enlistments to six months beyond the cessation of hostilities for all wars.
10. Appointment of all officers by Federal authority.
11. Use of Regular officers in the higher command and staff positions with National Guard and reserve troops in time of war, etc.
12. A proper equipment for all troops, and a proper reserve of equipment and all necessary supplies, etc.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield there?

Mr. COLLINS. Certainly.

Mr. LAGUARDIA. Who is that from whom the gentleman has been quoting?

Mr. COLLINS. Lieut. Col. P. S. Bond. He is a gentleman who writes articles and books for the schools and colleges of the country engaged in this training.

This colorful program is enlightening, for it reveals the real meaning beneath the endeavors of those who are trying to boost the Military Establishment and to popularize it. This is what they are looking forward to. The methods of embellishing the military game I have outlined above are a part of the means for making us willing to swallow this whole scheme without gulping too much as it goes down. Of course, this Congress and the country at large would not accept any such proposition if it were all presented to us at once—but when it comes in small doses, all wrapped up in pretty bundles of colorful display and charmed public sentiment, we are more inclined to take it.

Let me throw light upon the methods they are using to get us back of this scheme.

First. In the first place there is the practice of presenting military training and military life as training in citizenship, physical education, and character development. Parents are told to send their boys to the citizens' military training camps and to Reserve Officers' Training Corps units in the schools and colleges to make men of them. Quite often very little is said about preparation for national defense and little effort is made to develop the spirit of really being ready to face the crucial tests of actual warfare. Rather the summer vacation side of the camps or the personal advantages to be gained from the training units are stressed. After a boy has enrolled in one of these civilian training agencies because of these appeals to his personal desires he is told that what he is doing is the highest form of patriotism and that he is being made the very best kind of man and citizen.

Schools and colleges that are pressed for funds for maintaining courses in physical training and courses in citizenship are willing to pass the buck to the Federal Government and accept military training and military instructors in the place of civilian teachers especially prepared to teach these subjects.

The result of this is that military men are set up as experts in physical education, in citizenship, and in character development. Boys and girls are given the impression that good citizenship and good character consist of the ways and attitudes of the military man. Since military training is extolled above other forms of training for these same ends, boys and girls get the idea that there is no other class so well fitted to lead youth as the military group, no other service so patriotic as military service.

If you will drop into the post office in this city down near the Pennsylvania Station you will see a poster of a man in military uniform rushing over a hilltop with his rifle and bayonet in position to thrust, while behind him the flag flutters in the breeze. At the top of the poster is the heading, "United States marines." Underneath this highly colored figure is the statement in large letters, "A man's game," the idea being that the military game is the only man's game.

Members of the reserve who are out in the business and industrial world succeed in getting civilian support and money to help out the extensive military appropriations carried in this bill for further garnishing the military life. Funds for prizes and awards to members of various units are secured and these awards are granted before large audiences of admiring parents and neighbors. One of our large universities, for example—the University of Illinois—carries in its annual catalogue the announcement of five medals or prizes to be given to the boys who most enthusiastically enter into the war game.

Magazines published through civilian money singing the praises of the War Department program are widely circulated through the country. At least in one case, that is in the second largest city in the country—in the Chicago High School Reserve Officers' Training Corps units—they are given to all boys taking training. Bulletins and magazines published by branches of the service, and carried under the War Department official business postal frank, carry propaganda for a blatant militarism and ridicule efforts to find substitutes for the military way of doing business.

These magazines are published by certain branches of the Army, are paid for by the United States Government, and go out under frank. In the December issue of one of the bulletins of one of the branches of the service, for example, they departed so far from their regular business of military preparedness to carry an attack upon "labor colleges," hinting that all such were attempts to undermine the Government. I do not know anything about labor colleges. I am not their defender. I only know that Government funds should not be spent in this way. Just what is the philosophy that is being sold to the country through these moves to popularize the Military Establishment? Let us look at some of the public utterances of our military representatives. Major General Hinds is reported in the press—Rocky Mountain News, Denver, November 18, 1927—to have said to the students of the Denver High School:

> There will be another war just as sure as the sun rises in the east.

General Ely, commandant of the Second Corps Area, speaking before the Exchange Club of New York City, is reported in the New York Times—October 12, 1928—to have said:

> We all know there will be a next war, despite talk of peace pacts. * * * We can get around these disarmament pacts and be prepared for the next war only if we adopt some sort of a program of industrial preparedness.

Major McNair, of the Purdue University Reserve Officers' Training Corps, said in the Purdue Alumnus of May 3, 1926:

> If a pacifist is one who believes that war is unnecessary and preventable, then pacifism becomes a menace.

The CHAIRMAN. The gentleman has consumed one hour.

Mr. COLLINS. Mr. Chairman, I yield myself 10 additional minutes.

The CHAIRMAN. Without objection, the gentleman is recognized for 10 additional minutes.

There was no objection.

Mr. COLLINS. Lieut. Col. P. S. Bond, who is the author or editor of a number of training manuals used by our civilian military training units and whose military dream I have just read to you, says in his booklet, Our Military Policy, which is used by many college units:

> We live in a world governed by Divine laws which we can neither alter nor evade. And in this world of ours force is the ultimate power.

Now, one does not have to be a pacifist to feel that the effect over a period of years of this playing around with our boys and girls of men who hold this military philosophy of ever-recurrent wars and big preparedness for peace will be a constant growth of that sentiment in the land. At a time when our country is trying along with other lands to find some substitute for war we go on laying the foundations for an ever-increasing military machine.

This appropriation provides for some 700,000 men, an establishment as large as any possessed by any other nation. Many of these are having a most delightful experience and are most happy to be a part of this giant army. They will attract others to desire the same experience. We may expect down through the years to see the demands made upon this Congress grow until our Military Establishment reaches further and further into the life of our people. This is only a beginning if we are to judge by the evidences I have given of the efforts made to extend the popularity of our war establishment.

We are being made to work for this goal—not knowingly, for we do not seem to know what we are doing. Gradually, but faster than we realize, we are lead, as those mesmerized, and without knowing the result of our conduct. This applies with equal truth to the general public who are carried away with this popularizing, this playing at the only man's game, and to those of us who vote year after year for these growing appropriations.

Are we not proceeding along ways proven wrong? Are we not laying the foundations for future trouble? Can we carry on as we are going to-day without provoking our neighbors to follow after us, and will not the day of reckoning come to us as it has to others? We complain of the military and naval preparedness of our sister nations, while at the same time we are lulling ourselves into the stupid notion that our conduct is different from theirs. Fellow Members, is it not about time to correctly interpret our own actions? We are fooling no one but ourselves. [Applause.]

Mr. ADKINS. Will the gentleman yield?

Mr. COLLINS. Yes.

Mr. ADKINS. Did the gentleman vote to recommend this elaborate scheme to the House?

Mr. COLLINS. I did not. [Applause.]

Mr. JAMES. Will the gentleman yield?

Mr. COLLINS. Certainly.

Mr. JAMES. Will the gentleman put in the RECORD the names of the magazines published by the War Department and sent out under frank?

Mr. COLLINS. I will say to the gentleman that later on I hope to make a speech on magazines in the War Department.

Mr. JAMES. I read the hearings, but could not find any, so I would like to have the gentleman give me the names of the magazines published by the Army or any branch of the Army and sent out under frank.

Mr. COLLINS. I have an armful of them over in my office, and if the gentleman wants to look at them he can do so.

Mr. JAMES. I do not want to look at them, but I would like to have the gentleman put the names of the magazines in the RECORD so we can all know about them.

Mr. COLLINS. As I said, I hope to make a speech later on on the subject of magazines in the Army.

Mr. ABERNETHY. Will the gentleman yield?

Mr. COLLINS. Yes.

Mr. ABERNETHY. The gentleman has attacked the entire system of national defense as now proposed by law. Has the gentleman any plan to suggest other than that we now have, and has he any suggestion to make as to how we should defend ourselves in this country?

Mr. COLLINS. The gentleman is just raking straw now.

Mr. ABERNETHY. No; I am not raking straw; I am asking seriously.

Mr. COLLINS. The gentleman is not asking a question to elicit information, but I will ask the gentleman whether he approves of all these activities enumerated by me.

Mr. ABERNETHY. I approve of an adequate national defense, I will say to the gentleman.

Mr. COLLINS. I am not asking the gentleman if he believes in adequate national defense; I am asking him if he believes in this playing at the war game. I do not yield to the gentleman to make a speech.

Mr. ABERNETHY. I did not mean to offend the gentleman.

Mr. COLLINS. I know the purpose the gentleman has in the back of his head.

Mr. ABERNETHY. The gentleman has attacked the entire War Department, as I understand.

Mr. COLLINS. I have not done anything of the kind.

Mr. ABERNETHY. That is the way I understood the gentleman's speech.

Mr. COLLINS. The gentleman is still raking straw. The gentleman is joining the army of propagandists; that is what he is doing.

Mr. ABERNETHY. No; I am not raking straw.

Mr. COLLINS. The gentleman is getting in on it.

Mr. ABERNETHY. No; I am not raking straw; I am just asking the gentleman a polite question, but if he does not care to answer it, all right.

Mr. COLLINS. The gentleman is just joining the rest of these propaganda agents.

Mr. SCHAFER. Will the gentleman yield?

Mr. COLLINS. Yes.

Mr. SCHAFER. The gentleman stated he did not vote to report this appropriation bill to the House. Is the gentleman going to offer amendments as we progress under the 5-minute rule to cure the situation which he has been condemning?

Mr. COLLINS. I hope to offer some amendments, but I am rather inclined to believe, from my experience last year, that my amendments will not be accepted. I will try some of them, though.

Mr. ADKINS. Will the gentleman yield further?

Mr. COLLINS. Yes, indeed.

Mr. ADKINS. The purpose I had in mind in asking my question was to ascertain whether the ideas the gentleman has so ably presented in his speech were given to the committee and how the gentleman's committee took the suggestions he has made here. Has the gentleman presented those matters to the committee?

Mr. COLLINS. I will say this to the gentleman in defense of the committee: This committee cut out a lot of very useless items; in fact, the committee deserves the congratulations of this House for the elimination of many items that I think should have been eliminated. The trouble about most of the activities that I have criticized is that ample law exists for their continuance. The national defense act was passed at the immediate close of the war, when men were excited and had all sorts of notions about preparedness, all sorts of ideas about what was going to happen to us in the future and taking advantage of this situation this act was jammed through Congress. The national defense act permits almost anything to be done by the War Department. If it were proposed to-day, it would not get 25 votes.

Mr. ADKINS. The thought I had in mind was whether or not the matter was presented to the committee and whether the committee had this idea of militarizing the minds of our country.

Mr. COLLINS. Ours is not a legislative committee anyway but is an appropriation committee, and if we propose legislation, points of order would be made against it and such proposed legislation would go out of the bill. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has again expired.

If there is no further debate, the Clerk will read.

The Clerk read as follows:

> Office of Chief of Engineers, $121,858: *Provided,* That the services of skilled draftsmen, civil engineers, and such other services as the Secretary of War may deem necessary may be employed only in the office of the Chief of Engineers, to carry into effect the various appropriations for rivers and harbors, surveys, and preparation for and the consideration of river and harbor estimates and bills, to be paid from such appropriations: *Provided further,* That the expenditures on this account for the fiscal year 1930 shall not exceed $191,620; the Secretary of War shall each year, in the Budget, report to Congress the number of persons so employed, their duties, and the amount paid to each.

Mr. ABERNETHY. Mr. Chairman, I move to strike out the last word.

Mr. Chairman and Members of the House, it was not my intention nor purpose to have anything to say on this occasion, but in view of the colloquy between the distinguished gentleman who has just preceded me, Mr. COLLINS, of Mississippi, a member of the Subcommittee on Appropriations, and myself, I think

it is due me, and particularly in view of the manner in which the gentleman answered my question, it is due the House that I should make a brief statement of my ideas on the question of national defense.

If I interpreted the gentleman's speech that he made here, it was a very general attack upon our laws of preparedness in this country, which are incorporated in the national defense act, without suggesting or setting up in his speech any method for the defense of the country or any procedure for us to follow in times of peace.

Seriously, I think the gentleman has made a speech here which very seriously attacks our entire national-defense system. For one, I am not in favor of a large standing Army or a large Navy, but I do not think this country is justified even in peace times in going along without some plan of defense for our people.

Mr. SCHAFER. Will the gentleman yield there?

Mr. ABERNETHY. Yes; I yield to the gentleman.

Mr. SCHAFER. Especially when the other nations of the world are increasing their appropriations for armies and navies and air forces.

Mr. ABERNETHY. I think the gentleman is correct; and I want to say in passing I think this bill that is now before the House is certainly as free of partisanship as any appropriation bill I have ever had occasion to study; and I want to say further that this Subcommittee of the Committee on Appropriations has been very liberal to the people of the section of the country that I in part have the honor to represent.

Now, take the National Guard, the Officers' Training Corps, and the citizens' military training camps, and the various school military activities, and especially take the training camps that we have every year in various sections of the country, I do not see anything in these activities that is undermining the foundations of our Government. I do not see anything wrong with them, and I confess, in all seriousness, I do not think the gentleman was justified in saying that I was "just raking straw," whatever he means by that term. I think the gentleman is not even raking straw. I think he is doing worse than that. I think he is attacking a great legislative program and is attacking the national-defense system of our country. That is the way I feel about it.

I did not intend to say anything at this time on the bill, but for one I believe in an adequate defense, and in respect to our Army and our Navy, they should be sufficiently large in peace time that in case of war we can build up a sufficient Army and Navy for our defense. I think wherever our flag flies we ought to spend enough money and have enough men to protect American lives and property. [Applause.]

The pro forma amendment was withdrawn.

The Clerk read as follows:

In expending appropriations or portions of appropriations, contained in this act, for the payment for personal services in the District of Columbia in accordance with the classification act of 1923, as amended (U. S. C., pp. 65–71, secs. 661–673, 45 Stat. 776–785), the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act, as amended, and in grades in which only one position is allocated the salary of such position shall not exceed the average of the compensation rates for the grade, except that in unusually meritorious cases of one position in a grade advances may be made to rates higher than the average of the compensation rates of the grade but not more often than once in any fiscal year and then only to the next higher rate: *Provided*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed as of July 1, 1924, in accordance with the rules of section 6 of such act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade in the same or a different bureau, office, or other appropriation unit, or (4) to prevent the payment of a salary under any grade at a rate higher than the maximum rate of the grade when such higher rate is permitted by the classification act of 1923, as amended, and is specifically authorized by other law.

Mr. LAGUARDIA. Mr. Chairman, I have an amendment. On page 4, line 4, strike out "pp. 65–71" and insert in lieu thereof "title 5."

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will read.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: On page 4, line 4, within the parenthesis, strike out "pp. 65–71" and insert "title 5."

Mr. BARBOUR. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. BARBOUR. The gentleman's amendment leaves in the letters "U. S. C."

Mr. LAGUARDIA. Yes. I want to call the attention of the committee to the fact that all through the bill reference is made to the United States Code by pages and sections. It so happens that just now there is but one print of the United States Code and the page reference may be correct, but the proper method of referring to the United States Code is by title and section. It is not necessary to refer to the chapter because the sections run consecutively within the title.

Now, it may so happen that the copy of the laws that you refer to in the departments or elsewhere may be in pamphlet form or there may be other editions and therefore your page reference is of no value.

Mr. BARBOUR. Does not the gentleman think, though, that this is a more convenient reference, because your title may cover a great many pages, and if you simply refer to the title then you have to turn to each page?

Mr. LAGUARDIA. No; because you have the reference to the section. It is dangerous to refer to pages because all the editions of the law are not the same. A page reference is only useful assuming every one has the same edition of the law, and inasmuch as the print we have before us will change next year, if we add the laws that have passed this year, then your page reference is not of any value even with respect to the edition now in use; and there is a rule now before the House that references to the code must be made according to title and section.

Mr. BARBOUR. Our only object is to make the reference as convenient as possible so that the law can be readily turned to.

Mr. LAGUARDIA. Exactly. A great many officials who are handling these matters in all likelihood have not the United States Code before them, but they will have the title and the section of the code which is referred to.

Mr. BARBOUR. Of course, this bill is only an annual appropriation bill.

Mr. LAGUARDIA. Exactly; but it is good parliamentary practice to have uniform references, and that is what we are trying to get.

Mr. BARBOUR. The citations are carried in this way all through the bill.

Mr. LAGUARDIA. I know that.

Mr. BARBOUR. They ought to be uniform.

Mr. LAGUARDIA. They ought to be uniform. I can correct them as far as we go to-day and I think to-morrow, by the time we take up the bill again, the gentleman ought to be prepared to have the clerk of the committee prepare them.

Mr. BARBOUR. The gentleman wants us to prepare them?

Mr. LAGUARDIA. I do not care who does it, but it is something that ought to be done.

Mr. BARBOUR. We might ask unanimous consent to have all the references uniform.

Mr. LAGUARDIA. That would be fine. I think if this amendment is approved of, if the chairman of the subcommittee would ask unanimous consent that where references to pages appear the title shall be inserted, then that can be done as a matter of mechanics.

Mr. BARBOUR. Yes.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BARBOUR. Mr. Chairman, I ask unanimous consent that in each place in the bill where the citation "U. S. C." appears the page references be stricken out and the proper title references be inserted, so that the citations will be uniform in the bill.

The CHAIRMAN. The gentleman from California asks unanimous consent that the same amendment may be made wherever this same language appears in the bill. Is there objection?

There was no objection.

The Clerk read as follows:

When specifically approved by the Secretary of War, transfers may be made between the appropriations in this act under the respective jurisdiction of any bureau, office, corps, or branch, in order to meet increases in compensation resulting from the reallocation by the Personnel Classification Board of positions under any such organization unit. Any such transfers shall be reported to Congress in the annual Budget.

Mr. O'CONNOR of Louisiana. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman from California, Was this paragraph inserted to meet the situation created by the interpretation by the Comptroller General of the Welch Act?

Mr. BARBOUR. No; this is to take care of a situation that exists this year to which this bill applies. It is carried in all the appropriation bills this year.

Mr. O'CONNOR of Louisiana. The same phraseology was inserted in the preceding appropriation bills?

Mr. BARBOUR. Yes.

Mr. O'CONNOR of Louisiana. I understood in the colloquy between the chairman of one of the appropriation subcommittees and some Member of the House that the military bill would contain a paragraph that would tend to cure the situation that was brought about through the interpretation of the Welch Act.

Mr. BARBOUR. Not this bill. That matter has been considered, as I understand, by the Committee on Appropriations and will come in later in one of the appropriation bills. It is not in this bill.

Mr. O'CONNOR of Louisiana. Is it understood that some corrective language will be placed in an appropriation bill?

Mr. BARBOUR. That is my understanding. It was not intended to be in this bill.

Mr. O'CONNOR of Louisiana. I was told by some one in charge of an appropriation bill—I think it was the gentleman from Pennsylvania [Mr. SHREVE]—that later on the situation we all had in mind brought about by the interpretation or misinterpretation of the Welch Act would be corrected by some amendment by Mr. ANTHONY, and I thought it would be inserted in this bill.

Mr. BARBOUR. No; I understand that it will be in some appropriation bill that is to follow.

The pro forma amendment was withdrawn, and the Clerk read as follows:

GENERAL STAFF CORPS

CONTINGENCIES, MILITARY INTELLIGENCE DIVISION

For contingent expenses of the Military Intelligence Division, General Staff Corps, and of the military attachés at the United States embassies and legations abroad, including the purchase of law books, professional books of reference, and subscriptions to newspapers and periodicals; for cost of maintenance of students and attachés; for the hire of interpreters, special agents, and guides, and for such other purposes as the Secretary of War may deem proper, including $5,000 for the actual and necessary expenses of officers of the Army on duty abroad for the purpose of observing operations of armies of foreign states at war, to be paid upon certificates of the Secretary of War that the expenditures were necessary for obtaining military information, $55,000, to be expended under the direction of the Secretary of War: *Provided*, That section 3648, Revised Statutes, shall apply neither to subscriptions for foreign and professional newspapers and periodicals nor to other payments made from appropriations contained in this act in compliance with the laws of foreign countries under which the military attachés are required to operate.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word. This appropriation, I am sure, is intended by the committee to be used exclusively for the purpose of acquiring military intelligence in the strictest sense of the word. In other words, such as the preparation of armies in other countries, the movement of troops, fortifications, and information of an absolutely military value. It so happens that in the aftermath of the war the intelligence unit of the Army, and especially some of the reserve officers who were in that unit during the war, have taken upon themselves activities in prying into the private affairs and viewpoints of their fellow citizens. They have become the keepers, so to speak, of their brother's patriotism. Everyone's loyalty is measured by them by the volume of shouting for larger Army and bigger Navy. Most of these amateur sleuths—branding others as pacifists, because they seek to prevent another World War—got themselves in the intelligence unit and kept from being sent across, because they were too yellow themselves to get in any combatant branch of the Army.

We had a glaring instance of that in the incident related yesterday by the gentleman from Illinois [Mr. MORTON D. HULL]. A sergeant in the Military Intelligence Service made a complaint and filed an affidavit charging a Member of Congress with violating the franking privilege, when as a matter of fact, after careful investigation it was found that there was no foundation at all for any such charge. Members will recollect that the gentleman from Oklahoma [Mr. MCCLINTIC] took the floor and exhibited a large number of envelopes that had been returned and opened them in our presence, and in not one of them was a single item that was not entitled to the franking privilege. This man knowingly committed perjury, and apparently is still in the service. He represents the type used to do this kind of work. We should know that this appropriation will be used under the strictest interpretation of the law, and that such interference, such extravagance and unnecessary activity in collecting and collating the viewpoint of citizens of this country does not come within the scope of the law or the appropriation.

Only recently, Mr. Chairman, some one in the War Department has tabulated a chart showing the membership in various organizations and churches, to show that there is an organized movement in this country against war. If there is an organized movement against war in this country, it is a wholesome thing, and it will be found that among the American citizens who are active in bringing about this idea for the prevention of war there are a great many who saw active service in the war. I am convinced that these diligent sleuths are in the pay of munition makers. I fail to see how the War Department can justify the use of public funds for such unlawful purposes. Anyone or any organization that goes on record or takes a stand or assumes an attitude for the prevention of war is immediately branded by these paid agents. That does not come within the scope of the appropriation providing for military intelligence, and I do hope that the committee in providing these funds will scrutinize the way in which they were spent, and also go into the employment and the duties and the services rendered by officers and men in the intelligence unit.

Mr. JAMES. Mr. Chairman, I rise in opposition to the pro forma amendment. On page 8 of the bill, commencing on line 5, we find the language:

Provided, That section 3648, Revised Statutes, shall apply neither to subscriptions to foreign and professional newspapers—

And so forth.

That language occurs in four or five places in the bill. I have never heard anybody yet object to that language. Why does not the chairman offer an amendment inserting the word "hereafter," so that there will be no necessity of putting it in each time?

Mr. LAGUARDIA. Oh, I would object to that. These are annual appropriations, and it is all right to go along in this way and, where an exception is necessary, it ought to be provided for.

The Clerk read as follows:

FINANCE DEPARTMENT

PAY, ETC., OF THE ARMY

For pay of officers of the line and staff, $32,082,469; pay of warrant officers, $2,053,872; aviation increase to commissioned and warrant officers of the Army, $1,585,508; additional pay to officers for length of service, $8,626,302; pay of enlisted men of the line and staff, not including the Philippine Scouts, $51,410,547; aviation increase to enlisted men of the Army, $528,210; pay of enlisted men of the Philippine Scouts, $1,040,390; additional pay for length of service to enlisted men, $3,049,453; pay of the officers on the retired list, $7,749,121; increased pay to retired officers on active duty, $168,650; pay of retired enlisted men, $11,484,253; increased pay and allowances of retired enlisted men on active duty, $6,152; pay of retired pay clerks, $5,062; pay of retired veterinarians, $1,785; pay of not to exceed 65 civil-service messengers at $1,200 each at headquarters of the several Territorial departments, corps areas, Army and corps headquarters, Territorial districts, tactical divisions and brigades, service schools, camps, and ports of embarkation and debarkation, $77,340; pay and allowances of contract surgeons, $51,756; pay of nurses, $850,660; pay of hospital matrons, $600; rental allowances, including allowances for quarters for enlisted men on duty where public quarters are not available, $6,611,033; subsistence allowances, $5,881,205; interest on soldiers' deposits, $75,000; payment of exchange by officers serving in foreign countries, and when specially authorized by the Secretary of War, by officers disbursing funds pertaining to the War Department, when serving in Alaska, and all foreign money received shall be charged to and paid out by disbursing officers of the Army at the legal valuation fixed by the Secretary of the Treasury, $1,000; additional pay to officers below the grade of major required to be mounted and who furnish their own mounts, $210,000; in all, $133,550,368; and the money herein appropriated for "Pay, etc., of the Army" shall be accounted for as one fund: *Provided*, That the number of horses owned by any officer of the Army occasioning any public expense, including extra compensation, shall be reduced to one on July 1, 1929, and no appropriation contained in this act shall be available for any expense on account of a Government-owned horse used by any officer who has a privately owned mount occasioning public expense, including extra compensation, except in the case of an officer serving with troops whose privately owned mount may be sick or injured, and except in the case of an officer away from his regular post of duty: *Provided further*, That during the fiscal year 1930 the sum herein appropriated for pay of officers shall not be available for the pay of any persons initially appointed or commissioned in any of the promotion-list branches of the Regular Army after June 30, 1929, except (1) from graduates of the United States Military Academy, (2) from warrant officers and enlisted men of the Regular Army, and (3) persons appointed or commissioned in accordance with law in the Army Air Corps.

Mr. WAINWRIGHT. Mr. Chairman, I make the point of order against the provision, beginning in line 18 on page 11,

down to and inclusive of line 2 on page 12, upon the ground that this is legislation on an appropriation bill. It is in effect a repeal or an annulment of a positive provision of existing law, a positive statute passed in 1878, which provides that where officers are required to be mounted and provide their own horses, two may be maintained at public expense in case the officer is below the grade of general and three in the case of officers of the grade of general. This is a repeal of the present law.

Mr. BARBOUR. Mr. Chairman, the provision is clearly in order under the Holman rule, because it reduces the amount of the appropriation necessary for this item below what it would be if the language were stricken out. It is a limitation and a reduction in the appropriation.

Mr. WAINWRIGHT. Mr. Chairman, I do not profess to be an expert in parliamentary law, but I have understood that the Holman rule related to what would be in effect a new provision of law, which would limit an appropriation, that it would not cover the case of a positive repeal of an existing statute.

Mr. LAGUARDIA. If it reduces the appropriation, it would.

Mr. BARBOUR. This is not a repeal. It relates simply to this appropriation bill, and is a reduction in the amount of money carried for this purpose. Therefore it is a reduction in the amount of the appropriation that would be necessary if this language were not in the bill.

Mr. GARRETT of Tennessee. Mr. Chairman, the gentleman from New York [Mr. LAGUARDIA] has just stated that if it reduces the appropriation it would be in order. I presume the gentleman has reference to the Holman rule. I do not think it would necessarily follow that it would be in order coming from this committee. Is it the sole contention that it is in order because it reduces the appropriation?

Mr. BARBOUR. The language objected to provides that the number of horses owned by any officer in the Army occasioning public expense, including extra compensation, shall be reduced to one on July 1, 1929—

and no appropriation contained in this act shall be available for any expense on account of a Government-owned horse used by any officer who has a privately owned mount occasioning public expense, including extra compensation, except in the case of an officer serving with troops whose privately owned mount may be sick or injured, and except in the case of an officer away from his regular post of duty.

The law itself provides that officers of different grades may have certain allowances for a certain number of horses privately owned.

Mr. WAINWRIGHT. Mounted officers.

Mr. BARBOUR. Of course. They are mounted officers. A general might have three.

Mr. COLLINS. Oh, they have some of these privately owned horses even in the Air Corps.

Mr. BARBOUR. A general might have three horses. He gets no allowance for that. No one above the grade of captain gets any allowance for his horse, but they do get forage and stabling. From and including a captain on down they are allowed $150 per year for one horse, $200 a year for two horses, and forage and stabling accommodations for two horses. The purpose of the language in the bill is to limit that allowance both in money and forage and stabling accommodations to one horse instead of two, and in some cases more, during the life of this bill. It reduces the monetary allowance by $50 in the case of two horses, and it reduces the forage allowance about $125 per year per horse, so that it is clearly a reduction in the appropriation and a limitation upon the expenditure of this money.

Mr. GARRETT of Tennessee. So far as I am concerned I have no objection to the legislation. But I am interested in it as a parliamentary question.

Mr. WAINWRIGHT. Mr. Chairman, my point is that this amendment in effect changes a provision of law which has been in effect now for 50 years, providing for the maintenance of horses for mounted officers. Of course it was for the purpose of encouraging officers to cultivate horsemanship.

The gentleman from Mississippi [Mr. COLLINS] attempted to inject a facetious element into the discussion. It is quite conceivable that officers in the Air Service might have to perform duties that would require them to be mounted. That does not seem to me to be in any way pertinent to the point. The point is this, that the provision provides—

That the number of horses owned by any officer of the Army occasioning any public expense, including extra compensation, shall be reduced to one on July 1, 1929.

Now there is a positive direction of law which is inconsistent with the law of 1878, and which in effect nullifies the statute of 1878. This provision is not necessarily confined to this appropriation bill, but it is for all time. I repeat the language:

Provided, That the number of horses owned by any officer of the Army occasioning any public expense, including extra compensation, shall be reduced to one on July 1, 1929.

There is a positive direction reducing the number of horses to be maintained at public expense which a mounted officer may have.

Mr. LAGUARDIA. No; it is not that. That refers to allowances he may have for the upkeep of the horse. This is a positive reduction in the number of horses he may have.

Mr. WAINWRIGHT. Not at all. The qualifying language comes afterwards. The language of the first clause of the paragraph is general in character, providing that the number of horses shall be reduced to one. Feeling as I do that this would be an extremely unfortunate change to make at this time, I am prepared for the ruling of the Chair, without further argument.

The CHAIRMAN. The gentleman from New York [Mr. WAINWRIGHT] is entirely right in his contention that the proviso against which he has made a point of order is legislation on an appropriation bill. This is the purpose of the language, and the only purpose to change existing law. The question is, Is it in order under our rules?

In order to come within the rules the present occupant of the chair thinks it must either come in under the Holman rule or as a limitation. The proviso in question can be divided into two separate and distinct propositions. The first is, "That the number of horses owned by any officer of the Army occasioning any public expense, including extra compensation, shall be reduced to one on July 1, 1929." This is one substantive proposition, reducing the number of horses for which an officer shall have compensation allowance; and the Chair thinks it clearly brings itself under the Holman rule because under the present law more than one horse occasioning public expense is allowed. If the provision has any effect at all, it causes a reduction in the number of horses, a corresponding reduction in the compensation allowed, and is therefore in order under the Holman rule.

The second proposition, beginning on line 21 on page 11, is that—

No appropriation contained in this act shall be available for any expense on account of a Government-owned horse used by any officer who has a privately owned mount occasioning public expense, including extra compensation, except in the case of an officer serving with troops whose privately owned mount may be sick or injured, and except in the case of an officer away from his regular post of duty.

This portion of the proviso is clearly a limitation. It simply places a limitation upon the expenditure of appropriations carried in this bill, saying, in effect, that no part of this appropriation shall be expended if it is to be used on account of a Government-owned horse by an officer who has a privately owned mount. The Chair thinks that this is a proper limitation from a parliamentary standpoint which the House has the right to place on any appropriation carried in a general appropriation bill. The Chair overrules the point of order.

Mr. WAINWRIGHT. Mr. Chairman, I now move to strike out the paragraph in question, namely, from the word "*Provided*," appearing on line 18 of page 11, down to and including line 2 of page 12.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WAINWRIGHT: Beginning on page 11, line 18, after the word "*Provided*," strike out the remainder of the page and down to and including line 2 on page 12.

The CHAIRMAN. The Chair will hear the gentleman from New York.

Mr. WAINWRIGHT. Mr. Chairman, I think the discussion on the point of order clearly indicates the purpose of the amendment. It seems to me that no good reason has been presented by the committee why the rule of allowance which has been in effect in the last 50 years in the Army should at this particular time be changed. Horsemanship and the encouragement of horsemanship are just as important considerations at this time as they were at that time. The main purpose, of course, was to encourage officers whose duties require them to be mounted to provide themselves with a suitable number of horses.

It would, of course, promote a much better service were mounted officers not restricted to one mount. It has always been the custom that a general commanding a division or a corps, or higher ranking generals of the Army, should have more than one mount.

I realize, of course, in this day when the motor has become of such general use, that there might be some little modification, possibly, of the necessity, but it seems to me that it is

important to-day that our officers should be encouraged to ride, so as to avoid the results of the sedentary life that comes from a too liberal use of motors, with all the advantages that come from the cultivation of horsemanship. Therefore I feel this provision should not be adopted and that this restriction should be eliminated. In any event it involves a very paltry amount of money, namely, $40,000, in view of the consideration involved. I do not think we should deprive the mounted officers of the Army of this privilege afforded them by 50 years of usage and law, a privilege which they have enjoyed. I trust the amendment may be adopted.

Mr. BARBOUR. Mr. Chairman, this matter was gone into in the general statement on the bill and also in the discussion of the point of order. The sole purpose of the committee in bringing this language in is to reduce the amount of this appropriation. It is the opinion of the committee that we are not justified in spending the amount of money that has heretofore been expended.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York.

The question was taken and the amendment was rejected.

Mr. O'CONNOR of Louisiana. Mr. Chairman, I move to strike out the last word. I have always been interested in Tommy Atkins and sort of commiserated with him in all his woes. Therefore I have a corresponding interest in the fellow who goes under the name of Bill Hart, or some other name, and occupies the position in our Army that Tommy Atkins occupies in the British Army. How many men are in the United States Army in accordance with the bill?

Mr. BARBOUR. The bill provides for an average strength of 118,750 enlisted men.

Mr. O'CONNOR of Louisiana. How many common soldiers, as they are called?

Mr. BARBOUR. They are enlisted men. None of our soldiers are common soldiers.

Mr. O'CONNOR of Louisiana. Well, the word "common" has a well-accepted meaning. I do not mean it in a sinister way or to reflect upon them at all, and the gentleman knows that. How many enlisted men are there? They are not common, of course, but the fellows at the bottom are treated by the Government, it appears to me, in a common or cheap way as regards pay.

Mr. BARBOUR. There are 118,750 enlisted men. There are 6,500 Philippine Scouts. They are in the Philippine Islands. Our soldiers are the best paid soldiers in the world.

Mr. O'CONNOR of Louisiana. How many officers are there?

Mr. BARBOUR. Twelve thousand officers are provided for in this bill, including the Air Corps.

Mr. O'CONNOR of Louisiana. What is the pay of enlisted men?

Mr. BARBOUR. There are several grades. They start in at what they call privates, seventh class, and then they work up through several grades and length of service classifications.

Mr. O'CONNOR of Louisiana. Let us get to the bottom ones.

Mr. BARBOUR. If the gentleman wants that, it is all set forth in detail in the hearings.

Mr. O'CONNOR of Louisiana. Can not the gentleman answer the question I have propounded?

Mr. BARBOUR. Yes, indeed. But I say it is all set forth in detail in the hearings, and if the gentleman will turn to page 139 he will find it all in detail.

Mr. O'CONNOR of Louisiana. Which reminds me of the fact that the Roman laws had to be promulgated and Caracalla set them up so high and in such fine print that nobody could see them or read them. [Laughter.]

Mr. BARBOUR. If the gentleman will listen, I will tell him what this is. An enlisted man of the first grade, with less than 4 years' service, gets $126 per month; for over 4 years' service, $132.30 per month; for over 8 years' service, $138.60 per month; for over 12 years' service, $144.90 per month; and on up to over 20 years' service, when he gets $157.50 per month. That is an enlisted man, first grade. The grades and classes go down to the seventh grade, sixth class, and there are several grades and classes in between with different lengths of service.

Mr. O'CONNOR of Louisiana. Let us get to the mud sills—the foundation.

Mr. BARBOUR. A private of the seventh grade, sixth class, with less than 4 years' service, gets $24 a month, and that ranges up to $29.25 a month for over 20 years' service. Then there are a large number of grades and lengths of service in between that and the first grade, which is the highest.

Mr. O'CONNOR of Louisiana. Is $24 the lowest pay?

Mr. BARBOUR. Yes.

Mr. O'CONNOR of Louisiana. I understood it was between $15 and $18.

Mr. BARBOUR. No. According to the information furnished to the committee it is $24 a month.

Mr. O'CONNOR of Louisiana. Let me ask the chairman this question in all sincerity: Do you believe you are going to make the American Army a place where American youth, ambitious, but without any prestige behind them and without any influence to find its way up through military channels, will enlist under those circumstances—that is, start as an enlisted man at $24 per month, with $29 as the ultima Thule?

Mr. BARBOUR. The highest pay for an enlisted man is $157.50 per month. They are having no difficulty in getting all the enlistments the Army requires, and the enlisted men receive much more than their pay in the way of subsistence, quarters, clothing, medical care, and many other things.

Mr. O'CONNOR of Louisiana. What is the percentage of desertions?

Mr. BARBOUR. It is all set out in the hearings, but it is something like 5 per cent. Does the gentleman want me to read the hearings to him?

Mr. O'CONNOR of Louisiana. No.

Mr. BARBOUR. There are over 1,600 printed pages.

Mr. O'CONNOR of Louisiana. If the gentleman is not prepared to answer the question that is all right, and I can understand there are difficulties in the way.

Mr. BARBOUR. I shall be glad to answer any question the gentleman may propound, but the gentleman can find all this in the hearings without taking up the time of the House.

Mr. O'CONNOR of Louisiana. That may be all right if the committee wants to be so expeditious about putting this bill through.

Mr. BARBOUR. No; we will try to give everybody all the time they want to discuss it.

Mr. O'CONNOR of Louisiana. I thought the gentleman and his committee wanted discussion of these matters and invited such discussion. I thought that was the purpose of our consideration of the bill.

Mr. BARBOUR. That is true, and I am telling the gentleman where he can find the information without taking up the time of the Committee of the Whole.

Mr. O'CONNOR of Louisiana. There has not been so much time taken up. The Senate will probably take a month to consider this bill if it so desires.

Mr. BARBOUR. The gentleman asked a question that requires one-half page of fine print to answer and I have referred the gentleman to the page where he can get the information and he has objected to that method of getting the information.

Mr. O'CONNOR of Louisiana. I hope the gentleman is not incensed at an inquiry on the part of one of the Members of this House.

Mr. BARBOUR. Not at all.

Mr. O'CONNOR of Louisiana. It looks to me like the major part of our military and naval appropriations are for the big fish and very little for the enlisted men or, as they are sometimes called by way of description and not derogatively, "common soldiers" and "common seamen." Twenty-four dollars per month is not an attractive amount to any American youth no matter how eager he may be to join the Army. For an opulent country like ours it is not a creditable attitude. There are so many other avenues opened up to a boy of spirit, where the pay is sufficiently high, that he will forego his natural bent to attach himself to the military service of his country, and will, though reluctantly, cast his lot with some civilian occupation. That is one of the reasons why our Regular Army causes many of us to think of the celebrated musical comedy, the Milk White Flag, by the famous Hoyt, the purpose of which was to show that the only reason for the existence of the poor soldiers of the awkward squad was to excuse or justify the large number of officers, whose duties were largely social and whose rank made them attractive.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

The pro forma amendment was withdrawn.

Mr. LAGUARDIA. Mr. Chairman, I ask unanimous consent that we may return to this section when the bill is again taken up in committee for consideration in order not to delay matters. I understand it is the purpose to adjourn very soon.

Mr. BARBOUR. For what purpose does the gentleman make the request?

Mr. LAGUARDIA. I have an amendment which I am sure the gentleman will not agree to, and, judging from the present temper of the committee with the very small attendance, I do not think I would get many votes for my amendment.

Mr. BARBOUR. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TILSON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 15712, the War Department appropriation bill, had come to no resolution thereon.

LIABILITY OF OWNERS OF VESSELS

Mr. WHITE of Maine. Mr. Speaker, I ask unanimous consent that the bill (H. R. 14483) fixing the liability of owners of vessels, which was referred to the Committee on Interstate and Foreign Commerce, may be rereferred to the Committee on the Merchant Marine and Fisheries, and I may say I do this after consultation with the chairman of the Committee on Interstate and Foreign Commerce and with his concurrence.

The Clerk read the title of the bill.

The SPEAKER. The gentleman from Maine asks unanimous consent that this bill may be rereferred from the Committee on Interstate and Foreign Commerce to the Committee on the Merchant Marine and Fisheries. Is there objection?

Mr. GARRETT of Tennessee. Mr. Speaker, reserving the right to object, is it agreed that the bill properly belongs to that committee?

The SPEAKER. The Chair will state that at the time the Chair referred the bill he thought it was a very close question. He has been informed by the chairman of the Merchant Marine and Fisheries Committee and the chairman of the Committee on Interstate and Foreign Commerce that this rereference is satisfactory.

Mr. GARRETT of Tennessee. I have no objection.

The SPEAKER. Is there objection?

There was no objection.

NEW YEAR'S GREETINGS

Mr. COLLINS. Mr. Speaker, I ask unanimous consent to extend my remarks by inserting in the RECORD a speech delivered New Year's Day by the gentleman from Florida [Mr. GREEN].

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. COLLINS. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I insert the following New Year's greetings to the American people from Congressman ROBERT ALEXIS GREEN of the second district of Florida over radio station WJSV, Washington, D. C., made January 1, 1929:

I rejoice with the people of America in the happiness and brightness of the new year. Our Nation is at peace with the world. There is nothing more worthy than that of being a plain American citizen, because America is, in my opinion, the greatest of all nations, offering freedom, prosperity, opportunity, and equality to each and every one of its citizens. It leads in scientific, economical, industrial, moral, and social development. No more cosmopolitan or noble citizenship among the rank and file is to be found anywhere.

In extending my greetings to the American citizen I admonish them to preserve and conserve our Nation's natural resources; to exercise economy and avoid waste in domestic and public life; to exercise frugality, honesty, and thrift; to abide by the laws of the respective States and the Nation; to uphold and support constituted authority; better educate the youth of the land; and at all times bear in mind that ultimate happiness is permanently realized only through moral and spiritual excellency.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted to Mr. O'CONNOR of New York, indefinitely, on account of illness.

ADJOURNMENT

Mr. BARBOUR. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 6 minutes p. m.) the House adjourned until to-morrow, Saturday, January 5, 1929, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Saturday, January 5, 1929, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10 a. m.)

Independent offices appropriation bill.
District of Columbia appropriation bill.

COMMITTEE ON FOREIGN AFFAIRS

(10.30 a. m.)

Favoring the ratification by the United States Senate of the Kellogg peace pact (H. Res. 264).

COMMITTEE ON THE PUBLIC LANDS

(10 a. m.)

A hearing before the special joint committee investigating the Northern Pacific land grants.

COMMITTEE ON WAYS AND MEANS

(11 a. m.)

Authorizing the President, under certain conditions, to invite the participation of other nations in the Chicago World's Fair, providing for the admission of their exhibits, and for other purposes (H. J. Res. 365).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

723. A letter from the President of the Chesapeake & Potomac Telephone Co., transmitting report of the Chesapeake & Potomac Telephone Co. to the Congress of the United States for the year 1928; to the Committee on the District of Columbia.

724. A letter from the Acting Secretary of Commerce, transmitting draft of a bill to improve the efficiency of the Lighthouse Service, and for other purposes; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. ANTHONY: Committee on Appropriations. H. R. 15848. A bill making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1929, and prior fiscal years, to provide urgent supplemental appropriations for the fiscal year ending June 30, 1929, and for other purposes; without amendment (Rept. No. 2006). Referred to the Committee of the Whole House on the state of the Union.

Mr. HILL of Washington: Committee on Irrigation and Reclamation. S. 1462. An act providing for the necessary surveys, studies, investigations, and engineering of the Columbia Basin reclamation project, and for other purposes; with amendment (Rept. No. 2008). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mrs. KAHN: Committee on Military Affairs. H. R. 11963. A bill for the relief of Leo B. Thome; without amendment (Rept. No. 2007). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 15848) making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1929, and prior fiscal years, to provide urgent supplemental appropriations for the fiscal year ending June 30, 1929, and for other purposes; committed to the Committee of the Whole House on the state of the Union.

By Mr. BEERS: A bill (H. R. 15849) authorizing Richard H. Klein, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Susquehanna River at or near the borough of Liverpool, Perry County, Pa.; to the Committee on Interstate and Foreign Commerce.

By Mr. MILLER: A bill (H. R. 15850) for the construction of a bridge by the Bainbridge Island Chamber of Commerce across Agate Pass adjoining Bainbridge Island with the mainland in Kitsap County, State of Washington; to the Committee on Interstate and Foreign Commerce.
